# A Letter to Shareholders

#### Dear Shareholder

The present time may well be remembered as one of the most tumultuous periods in financial market history. Over the past year, the bursting of the housing bubble and the resultant credit crisis swelled into an all-out global financial market meltdown that featured the collapse of storied financial firms, volatile swings in the world s financial markets and monumental government responses, including the nearly \$800 billion economic stimulus plan signed into law just after period end.

The US economy appeared relatively resilient through the first few months of 2008, when rising food and energy prices fueled inflation fears. Mid-summer ushered in dramatic changes—inflationary pressure subsided amid a plunge in commodity prices, while economic pressures intensified in the midst of a rapid deterioration in consumer spending, employment and other key indicators. By year s end, the National Bureau of Economic Research affirmed that the United States was in a recession, which officially began in December 2007. The Federal Reserve Board (the Fed ), after slashing interest rates aggressively early in the period, resumed that rate-cutting campaign in the fall, with the final reduction in December 2008 bringing the target federal funds rate to a record low range of between zero and 0.25%. Importantly, the central bank pledged that future policy moves to revive the global economy and financial markets would comprise primarily nontraditional and quantitative easing measures, such as capital injections, lending programs and government guarantees.

Against this backdrop, US equity markets experienced intense volatility, with the sentiment turning decisively negative toward period end. Declines were significant and broad-based, with little divergence among large- and small-cap stocks. Non-US stocks posted stronger results early on, but quickly lost ground as the credit crisis revealed itself to be global in scope and as the worldwide economic slowdown gathered pace. Overall, aggressive monetary and fiscal policy, combined with the defensiveness of the US, helped domestic equities notch better performance than their non-US counterparts.

In fixed income markets, risk aversion remained the popular theme, leading the Treasury sector to top all other asset classes. The high yield market was particularly hard hit in this environment, as economic turmoil, combined with frozen credit markets and substantial technical pressures, took a heavy toll. Meanwhile, the municipal bond market was challenged by a dearth of market participants, lack of liquidity, difficult funding environment and backlog of new-issue supply, which sent prices lower and yields well above Treasuries. By period end, however, some positive momentum had returned to the municipal space.

In all, an investor flight to safety prevailed, as evidenced in the six- and 12-month returns of the major benchmark indexes:

| Total Returns as of January 31, 2009  | 6-month  | 12-month |
|---|----------|----------|
| US equities (S&P 500 Index)   | (33.95)% | (38.63)% |
| Small cap US equities (Russell 2000 Index)  | (37.38)  | (36.84)  |
| International equities (MSCI Europe, Australasia, Far East Index)                   | (40.75)  | (43.74)  |
| US Treasury securities (Merrill Lynch 10-Year US Treasury Index)                    | 11.96    | 10.64    |
| Taxable fixed income (Barclays Capital US Aggregate Bond Index*)                    | 3.23     | 2.59     |
| Tax-exempt fixed income (Barclays Capital Municipal Bond Index*)                    | 0.70     | (0.16)   |
| High yield bonds (Barclays Capital US Corporate High Yield 2% Issuer Capped Index*) | (19.07)  | (19.72)  |

BlackRock California Investment Quality Municipal Trust Inc.

#### **Investment Objective**

BlackRock California Investment Quality Municipal Trust Inc. (RAA) (the Trust ) seeks to provide high current income which, in the opinion of bond counsel to the issuer, is exempt from regular federal and California income tax consistent with preservation of capital.

#### **Performance**

For the six months ended January 31, 2009, the Trust returned (16.55)% based on market price and (7.80)% based on net asset value (NAV). For the same period, the closed-end Lipper California Municipal Debt Funds category posted an average return of (18.01)% on a market price basis and (11.97)% on a NAV basis. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The period witnessed a slight tightening in some credit spreads for lower-rated California holdings. Management s strategic efforts have been aimed at producing a more balanced contribution to the Trust s total return from its current yield. These efforts have increased the undistributed net interest income balance, as short-term borrowing costs have decreased along with short-term rate cuts by the Fed. The Trust maintained a neutral duration stance throughout the period.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

4 SEMI-ANNUAL REPORT JANUARY 31, 2009

### **BlackRock California Municipal Income Trust**

#### **Investment Objective**

BlackRock California Municipal Income Trust (BFZ) (the Trust ) seeks to provide high current income which, in the opinion of bond counsel to the issuer, is exempt from regular federal income tax and California income taxes.

#### **Performance**

For the six months ended January 31, 2009, the Trust returned (19.93)% based on market price and (10.61)% based on NAV. For the same period, the closed-end Lipper California Municipal Debt Funds category posted an average return of (18.01)% on a market price basis and (11.97)% on a NAV basis. All returns reflect reinvestment of dividends. The Trust moved from a premium to NAV to a discount by period-end, which accounts for the difference between performance based on price and performance based on NAV. A neutral duration stance and a relatively high cash equivalent reserve provided some cushion to the Trust s NAV. Despite this positioning, the NAV was negatively affected by deteriorating prices on some of its zero-coupon holdings, as well as spread widening on assets with weaker monoline insurance wraps. Management s strategy is to pursue a balanced approach to returns by improving current yield as opportunities arise, while generally keeping duration exposure no higher than neutral.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

SEMI-ANNUAL REPORT JANUARY 31, 2009

5

The investment advisor has deemed certain of these non-rated securities to be of investment grade quality. As of January 31, 2009 and July 31, 2008, the market value of these securities was \$1,889,706, representing 1% and \$2,242,216, representing 1%, respectively, of the Trust s long-term investments.

### **BlackRock Florida Municipal 2020 Term Trust**

### **Investment Objective**

**BlackRock Florida Municipal 2020 Term Trust (BFO) (the Trust )** seeks to provide current income that is exempt from regular federal income tax and Florida intangible personal property taxes and to return \$15.00 per share (the initial public offering price) on or about December 31, 2020.

#### **Performance**

For the six months ended January 31, 2009, the Trust returned (5.33)%, based on market price, and (7.71)%, based on NAV. For the same period, the closed-end Lipper Florida Municipal Debt Funds category posted an average return of (5.78)% on a market price basis and (5.87)% on a NAV basis. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The Trust s underperformance was driven primarily by a rising yield (and correspondingly falling price) environment for intermediate and long-term municipals during the second half of 2008. An intermediate duration bias mitigated the downward price movement somewhat. The allocation to lower-rated issues also detracted from results as spreads widened during the six months.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no quarantee of future results.

6 SEMI-ANNUAL REPORT JANUARY 31, 2009

The investment advisor has deemed certain of these non-rated securities to be of investment grade quality. As of January 31, 2009 and July 31, 2008, the market value of these securities was \$10,830,683, representing 10% and \$11,848,675, representing 9%, respectively, of the Trust s long-term investments.

**BlackRock Investment Quality Municipal Income Trust** 

### **Investment Objective**

**BlackRock Investment Quality Municipal Income Trust (RFA) (the Trust )** seeks to provide high current income which, in the opinion of bond counsel to the issuer, is exempt from regular federal income tax and to provide an exemption from Florida intangible personal property taxes consistent with preservation of capital.

#### **Performance**

Effective September 16, 2008, BlackRock Florida Investment Quality Municipal Trust was renamed BlackRock Investment Quality Municipal Income Trust.

For the six months ended January 31, 2009, the Trust returned (16.70)% based on market price and (13.55)% based on NAV. For the same period, the closed-end Lipper General Municipal Debt Funds (Leveraged) category posted an average return of (12.07)% on a market price basis and (12.78)% on a NAV basis. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. Sector allocation played an important role in determining how the fund performed during the reporting period. Spread products, such as healthcare, housing, tax increment financing and corporate-backed bonds, significantly underperformed as the economic downturn continued to add more stress on the fundamental credit quality for these sectors. The Trust s exposure to these issues detracted from performance. Also hampering results was exposure to alternative minimum tax bonds, which underperformed as spreads widened out significantly over the past six months.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

SEMI-ANNUAL REPORT

**JANUARY 31, 2009** 

7

The investment advisor has deemed certain of these non-rated securities to be of investment grade quality. As of January 31, 2009 and July 31, 2008, the market value of these securities was \$620,048, representing 4% and \$722,157, representing 3%, respectively, of the Trust s long-term investments.

### **BlackRock Municipal Income Investment Trust**

### **Investment Objective**

BlackRock Municipal Income Investment Trust (BBF) (the Trust ) seeks to provide high current income which, in the opinion of bond counsel to the issuer, is exempt from regular federal income tax and Florida intangible personal property tax.

#### **Performance**

Effective September 16, 2008, BlackRock Florida Municipal Income Trust was renamed BlackRock Municipal Income Investment Trust.

For the six months ended January 31, 2009, the Trust returned (11.47)% based on market price and (12.43)% based on NAV. For the same period, the closed-end Lipper General Municipal Debt Funds (Leveraged) category posted an average return of (12.07)% on a market price basis and (12.78)% on a NAV basis. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. Sector allocation played an important role in determining how the fund performed during the reporting period. A positive contributor to performance was the Trust s significant overweight in pre-refunded bonds in the one- to five-year maturity range, as the yield curve steepened and short- and intermediate-maturity issues outperformed. Conversely, spread products, such as healthcare, housing, tax increment and corporate-backed bonds, significantly underperformed as the economic downturn continued to add more stress on the fundamental credit quality for these sectors. The Trust s exposure to these issues detracted from results.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

SEMI-ANNUAL REPORT JANUARY 31, 2009

9

### **BlackRock New Jersey Municipal Income Trust**

#### **Investment Objective**

BlackRock New Jersey Municipal Income Trust (BNJ) (the Trust ) seeks to provide high current income which, in the opinion of bond counsel to the issuer, is exempt from regular federal income tax and New Jersey gross income tax.

#### Performance

For the six months ended January 31, 2009, the Trust returned (8.96)% based on market price and (14.15)% based on NAV. For the same period, the closed-end Lipper New Jersey Municipal Debt Funds category posted an average return of (11.15)% on a market price basis and (9.23)% on a NAV basis. All returns reflect reinvestment of dividends. The Trust s premium to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. Sector allocation played an important role in determining how the fund performed during the reporting period. Spread products, such as health-care and housing bonds, significantly underperformed as the economic downturn continued to add more stress on the fundamental credit quality for these sectors. The Trust s exposure to these issues detracted from performance. Also hampering results was exposure to alternative minimum tax bonds, which underperformed as spreads widened out significantly over the past six months.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

10 SEMI-ANNUAL REPORT JANUARY 31, 2009

### BlackRock New York Investment Quality Municipal Trust Inc.

#### **Investment Objective**

BlackRock New York Investment Quality Municipal Trust Inc. (RNY) (the Trust ) seeks to provide high current income which, in the opinion of bond counsel to the issuer, is exempt from regular federal, New York State and New York City income tax consistent with preservation of capital.

#### Performance

For the six months ended January 31, 2009, the Trust returned (11.90)% based on market price and (7.39)% based on NAV. For the same period, the closed-end Lipper New York Municipal Debt Funds category posted an average return of (15.16)% on a market price basis and (12.83)% on a NAV basis. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. Fund performance was positively influenced by an average distribution rate and an overweight exposure to pre-refunded and education-related bonds. Negative impacts on performance came from overweights in corporate credits, housing bonds and healthcare bonds, and from underweights in tax-backed and transportation bonds. The Trust's overweight in bonds with maturities greater than 20 years detracted overall, but benefited performance toward the end of the period. Fortunately, management avoided selling these holdings when values were distressed, which would have locked in their underperformance.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

- Yield on closing market price is calculated by dividing the current annualized distribution per share by the closing market price. Past performance does not guarantee future results.
- <sup>2</sup> Tax equivalent yield assumes the maximum federal tax rate of 35%.
- The distribution is not constant and is subject to change.
- Represents Preferred Shares as a percentage of total managed assets, which is the total assets of the Trust, including any assets attributable to Preferred Shares, minus the sum of accrued liabilities. For a discussion of leveraging techniques utilized by the Fund, please see The Benefits and Risks of Leveraging on page 13.

SEMI-ANNUAL REPORT JANUARY 31, 2009

11

### **BlackRock New York Municipal Income Trust**

#### **Investment Objective**

BlackRock New York Municipal Income Trust (BNY) (the Trust ) seeks to provide high current income which, in the opinion of bond counsel to the issuer, is exempt from regular federal income tax and New York State and New York City personal income taxes.

#### **Performance**

For the six months ended January 31, 2009, the Trust returned (21.70)% based on market price and (12.49)% based on NAV. For the same period, the closed-end Lipper New York Municipal Debt Funds category posted an average return of (15.16)% on a market price basis and (12.83)% on a NAV basis. All returns reflect reinvestment of dividends. The Trust moved from a premium to NAV to a discount by period-end, which accounts for the difference between performance based on price and performance based on NAV. Fund performance was positively influenced by an average distribution rate and an overweight exposure to pre-refunded and education-related bonds. Negative impacts on performance came from overweights in corporate credits and housing bonds. The Trust's overweight in bonds with maturities greater than 18 years detracted overall, but benefited performance toward the end of the period. Fortunately, management avoided selling these holdings when values were distressed, which would have locked in their underperformance.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

12 SEMI-ANNUAL REPORT JANUARY 31, 2009

# The Benefits and Risks of Leveraging

The Trusts may utilize leverage to seek to enhance the yield and NAV of their Common Shares. However, these objectives cannot be achieved in all interest rate environments.

To leverage, certain Trusts issue Preferred Shares, which pay dividends at prevailing short-term interest rates, and invest the proceeds in long-term municipal bonds. In general, the concept of leveraging is based on the premise that the cost of assets to be obtained from leverage will be based on short-term interest rates, which normally will be lower than the income earned by each Trust on its longer-term portfolio investments. To the extent that the total assets of the Trust (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, the Trust s Common Shareholders will benefit from the incremental yield.

To illustrate these concepts, assume a Trust s Common Shares capitalization is \$100 million and it issues Preferred Shares for an additional \$50 million, creating a total value of \$150 million available for investment in long-term municipal bonds. If prevailing short-term interest rates are 3% and long-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Trust pays dividends on the \$50 million of Preferred Shares based on the lower short-term interest rates. At the same time, the Trust s total portfolio of \$150 million earns the income based on long-term interest rates. In this case, the dividends paid to Preferred Shareholders are significantly lower than the income earned on the Trust s long-term investments, and therefore the Common Shareholders are the beneficiaries of the incremental yield.

Conversely, if prevailing short-term interest rates rise above long-term interest rates of 6%, the yield curve has a negative slope. In this case, the Trust pays dividends on the higher short-term interest rates whereas the Trust stotal portfolio earns income based on lower long-term interest rates. If short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental yield pickup on the Common Shares will be reduced or eliminated completely.

Furthermore, the value of the Trust s portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors also influence the value of portfolio investments. In contrast, the redemption value of the Trust s Preferred Shares does not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Trust s NAV positively or negatively in addition to the impact on Trust performance from leverage from Preferred Shares discussed above.

Certain Trusts may also, from time to time leverage their assets through the use of tender option bond ( TOB ) programs, as described in Note 1 of the Notes to Financial Statements. TOB investments generally will provide the Trusts with economic benefits in periods of declining short-term interest rates, but expose the Trusts to risks during periods of rising short-term interest rates similar to those associated with Preferred Shares issued by the Trusts, as described above. Additionally, fluctuations in the market value of municipal bonds deposited into the TOB trust may adversely affect the Trusts NAVs per share.

The use of leverage may enhance opportunities for increased returns to the Trusts and Common Shareholders, but as described above, it also creates risks as short- or long-term interest rates fluctuate. Leverage also will generally cause greater changes in the Trusts NAV, market price and dividend rate than a comparable portfolio without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, the Trusts net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, the Trusts net income will be less than if leverage had not been used, and therefore the amount available for distribution to shareholders will be reduced. The Trusts may be required to sell portfolio securities at inopportune times or below fair market values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments which may cause the Trusts to incur losses. The use of leverage may limit the Trusts ability to invest in certain types of securities or use certain types of hedging strategies, such as in the case of certain restrictions imposed by ratings agencies that rate preferred shares issued by a Trust. The Trusts will incur expenses in connection with the use of leverage, all of which are borne by the holders of the Common Shares and may reduce returns on the Common Shares.

Under the Investment Company Act of 1940, the Trusts are permitted to issue Preferred Shares in an amount of up to 50% of their total managed assets at the time of issuance. Under normal circumstances, each Trust anticipates that the total economic leverage from Preferred Shares and TOBs will not exceed 50% of its total managed assets at the time such leverage is incurred. As of January 31, 2009, the following Trusts had economic leverage from Preferred Shares and TOBs as a percentage of their total managed assets as follows:

|  | Percent of<br>Leverage |
|--|------------------------|
| BlackRock California Investment Quality Municipal Trust Inc. | 38%                    |
| BlackRock California Municipal Income Trust                  | 42%                    |
| BlackRock Florida Municipal 2020 Term Trust                  | 40%                    |
| BlackRock Investment Quality Municipal Income Trust          | 40%                    |
| BlackRock Municipal Income Investment Trust                  | 41%                    |
| BlackRock New Jersey Investment Quality Municipal Trust Inc. | 41%                    |
| BlackRock New Jersey Income Trust                            | 41%                    |
| BlackRock New York Investment Quality Municipal Trust Inc.   | 39%                    |
| BlackRock New York Municipal Income Trust                    | 42%                    |

#### **Derivative Instruments**

The Trusts may invest in various derivative instruments, including swap agreements and futures, and other instruments specified in the Notes to Financial Statements, which constitute forms of economic leverage. Such instruments are used to obtain exposure to a market without owning or taking physical custody of securities or to hedge market and/or interest rate risks. Such derivative instruments involve risks, including the imperfect correlation between the value of a derivative instrument and the underlying asset, possible default of the other party to the transaction and illiquidity of the derivative instrument. The Trusts ability to successfully use a derivative instrument depends on the Advisor's ability to accurately predict pertinent market movements, which cannot be assured. The use of derivative instruments may result in losses greater than if they had not been used, may require the Trusts to sell or purchase portfolio securities at inopportune times or for prices other than current market values, may limit the amount of appreciation the Trusts can realize on an investment or may cause the Trusts to hold a security that it might otherwise sell. The Trusts investments in these instruments are discussed in detail in the Notes to Financial Statements.

| Net unrealized depreciation   | \$<br>(1,305,715) |

- (a) MBIA Insured.
- (b) FSA Insured.
- (c) US government securities, held in escrow, are used to pay interest on this security as well as to retire the bond in full at the date indicated, typically at a premium to par.
- (d) FHLMC Collateralized.
- (e) FNMA Collateralized.
- (f) GNMA Collateralized.
- (g) AMBAC Insured.
- (h) Securities represent underlying bonds transferred to a tender option bond trust in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to tender option bond trusts.

- (i) Security may have a maturity of more than one year at the time of issuance, but has variable rate and demand features that qualify it as a short-term security. The rate disclosed is as of report date. This rate changes periodically based upon prevailing market rates.
- (j) Represents the current yield as of report date.
- (k) Investments in companies considered to be an affiliate of the Trust, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, were as follows:

| Affiliate                           | Net<br>Activity | Income      |
|-------------------------------------|-----------------|-------------|
| CMA California Municipal Money Fund | 704,828         | \$<br>5,020 |

For Trust compliance purposes, the Trust sindustry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Trust management. This definition may not apply for purposes of this report which may combine industry sub-classifications for reporting ease.

Effective August 1, 2008, the Trust adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 clarifies the definition of fair value, establishes a framework for measuring fair values and requires additional disclosures about the use of fair value measurements. Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstance, to the extent observable inputs are not available (including the Trust s own assumption used in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust s policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following table summarizes the inputs used as of January 31, 2009 in determining the fair valuation of the Trust s investments:

| Valuation<br>Inputs | Investments in Securities |
|---------------------|---------------------------|
|                     | Assets                    |
| Level 1             | \$ 1,236,964              |
| Level 2             | 17,440,576                |
| Level 3             |                           |
|                     |                           |
| Total               | \$ 18,677,540             |

SEMI-ANNUAL REPORT

# Schedule of Investments (concluded)

#### BlackRock California Municipal Income Trust (BFZ)

\* The cost and unrealized appreciation (depreciation) of investments as of January 31, 2009, as computed for federal income tax purposes, were as follows:

| Aggregate cost                | \$<br>314,782,495  |
|-------------------------------|--------------------|
|                               |                    |
| Gross unrealized appreciation | \$<br>3,362,561    |
| Gross unrealized depreciation | (31,379, 413)      |
|                               |                    |
| Net unrealized depreciation   | \$<br>(28,016,852) |

- (a) AMBAC Insured.
- (b) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (c) MBIA Insured.
- (d) FGIC Insured.
- (e) US government securities, held in escrow, are used to pay interest on this security as well as to retire the bond in full at the date indicated, typically at a premium to par.
- (f) XL Capital Insured.
- (g) FSA Insured.
- (h) FNMA Collateralized.
- (i) Assured Guaranty Insured.
- (j) Represents a step-up bond that pays an initial coupon rate for the first period and then a higher coupon rate for the following periods. Rate shown is as of report date.
- (k) Security is collateralized by Municipal or US Treasury Obligations.
- (i) Security represents a beneficial interest in a trust. The collateral deposited into the trust is federally tax-exempt revenue bonds issued by various state or local governments, or their respective agencies or authorities. The security is subject to remarketing prior to its stated maturity, and is subject to mandatory redemption at maturity.
- (m) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (n) Securities represent underlying bonds transferred to a tender option bond trust in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to tender option bond trusts.
- (o) Security may have a maturity of more than one year at time of issuance, but has variable rate and demand features that qualify it as a short-term security. The rate disclosed is as of report date. This rate changes periodically based upon prevailing market rates.
- (p) Investments in companies considered to be an affiliate of the Trust, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, were as follows:

| Affiliate                           | Net Activity | Income       |
|-------------------------------------|--------------|--------------|
| CMA California Municipal Money Fund | (1,730,325)  | \$<br>68,948 |

(q) Represents the current yield as of report date.

For Trust compliance purposes, the Trust sindustry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Trust management. This definition may not apply for purposes of this report which may combine industry sub-classifications for reporting ease.

Effective August 1, 2008, the Trust adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 clarifies the definition of fair value, establishes a framework for measuring fair values and requires additional disclosures about the use of fair value measurements. Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstance, to the extent observable inputs are not available (including the Trust s own assumption used in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust spolicy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following table summarizes the inputs used as of January 31, 2009 in determining the fair valuation of the Trust s investments:

| Valuation<br>Inputs | Investments in<br>Securities |
|---------------------|------------------------------|
|                     | Assets                       |
| Level 1             | \$ 15,725,811                |
| Level 2             | 300,324,828                  |
| Level 3             |                              |
|                     |                              |
| Total               | \$ 316,050,639               |

See Notes to Financial Statements.

|                               |                   |
| Net unrealized depreciation   | \$<br>(8,597,190) |

- (a) FSA Insured.
- (b) MBIA Insured.
- (c) US government securities, held in escrow, are used to pay interest on this security as well as to retire the bond in full at the date indicated, typically at a premium to par.
- (d) AMBAC Insured.
- (e) Assured Guaranty Insured.
- (f) ACA Insured.
- (g) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (h) FHLMC Collateralized.
- (i) FNMA Collateralized.
- (j) GNMA Collateralized.
- (k) Securities represent underlying bonds transferred to a tender option bond trust in exchange for which the Trust acquired residual interest certificates. These securities serve as a collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to tender option bond trusts.
- (I) Represents the current yield as of report date.
- (m) Investments in companies considered to be an affiliate of the Trust, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, were as follows:

Affiliate Net Activity Income

CMA Florida Municipal Money Fund

5,915,744

. \$

17,712

For Trust compliance purposes, the Trust s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Trust management. This definition may not apply for purposes of this report which may combine industry sub-classifications for reporting ease.

Effective August 1, 2008, the Trust adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 clarifies the definition of fair value, establishes a framework for measuring fair values and requires additional disclosures about the use of fair value measurements. Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities

&#14
