This document includes IFRS interim financial information reconciled to US GAAP. On July 30, 2007 we filed our IFRS interim financial information for the six month period ended June 30, 2007.

Cautionary Statement regarding Forward-Looking Statements

This announcement contains forward-looking statements. Forward-looking statements are statements that are not historical facts, including statements about our beliefs and expectations. Any statement in this announcement that expresses or implies our intentions, beliefs, expectations or predictions (and the assumptions underlying them) is a forward-looking statement. These statements are based on plans, estimates and projections, as they are currently available to the management of ABN AMRO. Forward-looking statements therefore speak only as of the date they are made, and we take no obligation to update publicly any of them in light of new information or future events.

Forward-looking statements involve inherent risks and uncertainties. A number of important factors could therefore cause actual future results to differ materially from those expressed or implied in any forward-looking statement. Such factors include, without limitation, the conditions in the financial markets in Europe, the United States, Brazil and elsewhere from which we derive a substantial portion of our trading revenues; potential defaults of borrowers or trading counterparties; the implementation of our restructuring including the envisaged reduction in headcount; the reliability of our risk management policies, procedures and methods; and other risks referenced in our filings with the U.S. Securities and Exchange Commission. For more information on these and other factors, please refer to our Annual Report on Form 20-F filed with the U.S. Securities and Exchange Commission and to any subsequent reports furnished or filed by us with the U.S. Securities and Exchange Commission.

Any forward-looking statements contained in this report are made as of the date hereof, and the companies assume no obligation to update any of the forward-looking statements contained in this announcement.

Signatures

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

Title: Chief Accounting Officer

1. Basis of Presentation

This report summarizes the effect of the application of US GAAP to ABN AMRO's equity and net profit attributable to shareholders of the parent company as determined under IFRS for the six months period ended June 30, 2007 included in our IFRS interim financial report.

2. Reconciling differences between IFRS and US GAAP

The consolidated financial statements of ABN AMRO are prepared in accordance with International Financial Reporting Standards (IFRS) which vary in certain significant respects from accounting principles generally accepted in the United States of America (US GAAP).

The significant differences between IFRS and US GAAP that are applicable to the Group are as follows:

IFRS US GAAP

Goodwill and business combinations

On transition to IFRS at January 1, 2004, the Group elected not to reinstate goodwill which had previously been written off to shareholders' equity as a balance sheet asset.

The US GAAP balance sheet includes goodwill recognized prior to January 1, 2004.

In a step acquisition, the existing ownership interest in an entity must be revalued to the new valuation basis established at the time of acquisition. The increase in value is recorded directly in equity as a revaluation reserve. In a step acquisition, the existing ownership interest remains at its original valuation.

Gains and losses on the disposal of foreign operations exclude the effect of cumulative currency translation differences arising prior to January 2004 as they were set to zero on the transition to IFRS.

Gains and losses on the disposal of foreign operations include cumulative currency translation differences prior to January 2004.

Allowances for loan losses

The principles for determining loan loss allowances under IFRS rely on an incurred loss model.

US GAAP principles are consistent with IFRS, however differences in application exist.

Financial investment

Debt securities included in the Group's investment portfolio that are traded on an active market are typically classified as Available-for-Sale (AFS) assets.

Non-marketable investments classified as AFS and recorded at fair value under IFRS are recorded at cost under US GAAP.

IFRS standards exclude changes in fair value attributable to movements in the risk-free interest rate, in and of itself, as evidence of a potential impairment.

US GAAP standards include changes in fair value attributable to movements in the risk-free interest rate, in and of itself, as evidence of a potential impairment.

Under IFRS an impairment recognized does not establish a new cost basis for the underlying debt or equity security. Impairment of debt securities may be reversed through income if there is a subsequent Under US GAAP recognized impairment establishes a new cost basis for the underlying debt or equity security. Under US GAAP an impairment loss cannot be reversed through income.

increase in fair value that can be objectively related to a new event.

IFRS

Changes in the fair value of AFS debt securities arising from changes in foreign exchange rates are recorded in income as exchange differences. Such differences are typically offset by exchange difference on matched currency funding.

On the transition to IFRS, certain debt securities were designated as Held-to-Maturity (HTM) assets.

Private equity

Under IFRS, all investments where the Group has control are consolidated in the Group's financial statements.

For all investments where the Group has a financial interest that is not controlling, the Group has elected to designate these investments as fair value through income with changes in fair value from period to period being recorded in income.

Pensions and other post-retirement benefits
Defined benefit pension schemes and other
post-retirement benefits are actuarially assessed each
year. The difference between the fair value of the plan
assets and the present value of the obligation at the
balance sheet date, adjusted for any unrecognized
actuarial gains and losses and past service costs
recognized on the balance sheet date as an asset or
liability.

Pension and other post-retirement benefit assets and liabilities were recognized in full on transition to IFRS.

Share based payment plans

Under IFRS, share based options and other share based payment schemes are recognized over the vesting period at fair value calculated at grant date, in income and equity.

US GAAP

Under US GAAP changes in the fair value of AFS debt securities arising from changes in foreign exchange rates are recorded in shareholders' equity and transferred to income on disposal of the security.

Investments designated as HTM under IFRS were transferred for US GAAP purposes from the AFS portfolio at fair value to the HTM portfolio on January 1, 2004. The unrealized gains and losses recorded in equity as of January 1, 2004 are amortized to income over the remaining contractual life of the securities using the effective yield method.

Under US GAAP the Group accounts for its private equity investments held by private equity subsidiaries in accordance with the American Institute of Certified Public Accountants (AICPA) Auditing and Accounting Guide, "Audits of Investment Companies". Consequently, such investments are recorded at their fair value with changes in fair value from period to period recognized in income.

The adoption of SFAS 158 "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans" in 2006 replaced the requirement to record an additional minimum liability. SFAS 158 requires the full recognition of the funded status of the Group's defined benefit pension plan as an asset or liability in the year-end balance sheet.

Under US GAAP differences arise as compared to IFRS from the different dates of adoption used for calculations.

Under US GAAP, share based options granted prior to January 1, 2006 were recorded based on intrinsic values. New awards and awards modified, repurchased or cancelled after that date are recorded based on initial fair values similar to IFRS. Difference also can occur in the timing of recognition for the tax impact of share based payment schemes.

IFRS US GAAP

Restructuring provisions

Under IFRS, costs associated with onerous operating lease payments are recognized when the decision to terminate the lease is made.

Under IFRS, provisions are made for any direct restructuring costs that management is committed to, has a detailed formal plan, and has raised a valid expectation of carrying out that plan in those affected and other parties such as customers and suppliers.

Derivatives used for hedging

Where derivative instruments have been entered into and designated in hedging relationships in accordance with the provisions of IFRS, hedge accounting has been applied from the date of designation.

The Group applied the IFRS 1 hedge accounting transition provisions at January 1, 2004.

Mortgage servicing rights

Mortgage servicing rights hedged under a fair value hedging relationship are adjusted for changes in fair value, with changes in fair value for the hedged portion, from period to period, recognized directly in income.

Fair value differences

Under IFRS, the Group has elected to apply the fair value through income option to certain non-controlling equity investments, mortgages originated and held for sale, unit-linked investments held for the account of insurance policy holders and certain structured liabilities.

Preference shares

Under IFRS, preference shares issued by ABN AMRO Holding N.V. are classified as debt due to the non discretionary nature of the preference dividend payment. Preference dividends are recorded as interest payments in the consolidated financial statements.

Under US GAAP, costs associated with onerous operating lease contracts are recognized once there are no economic benefits received by the lessee, which is typically the date on which the leased property is vacated.

Under US GAAP, even when management has committed itself to a detailed exit plan, it does not follow automatically that the costs of that exit plan may be provided for. For example, one-time employee termination costs are recognized rateably over any required employee service period if the termination period is longer than the minimum retention period.

Prior to January 1, 2005, derivatives designated for hedge accounting under US GAAP were limited to those undertaken by the Group in North America and those used by the Group to hedge net investments in non-Euro operations.

Since January 1, 2005, the designation of hedges for US GAAP reporting has been extended to include those hedge relationships that qualify under US GAAP and can be accounted for the same as under IFRS.

Under US GAAP, hedge accounting was applied from January 1, 2001 whereas from January 1, 2004 under IFRS. This difference affected the reporting of the Group's mortgage banking activities in the US sold at the beginning of 2007.

US GAAP does not permit the fair value through income designation until the adoption of FAS 157 and FAS 159. Consequently, those assets and liabilities designated at fair value through income under IFRS are accounted for under the appropriate US GAAP guidance applicable to each individual asset or liability.

Under US GAAP, preference shares are classified as equity as they are legally equity instruments and are not mandatorily redeemable by either the issuer or the holder.

IFRS US GAAP

Loan Origination Costs

Under IFRS, certain direct costs of origination, typically internal costs, are not considered to be incremental to the origination of a financial instrument. These costs are not deferred and amortized to income over the life of the loan as an adjustment to the effective yield and instead are recognized directly in expense.

Sales and lease back

Under IFRS, gains arising from a sale and operating leaseback transaction are recognized immediately in income when the transaction has been entered into at fair value.

Consolidation of Special Purpose Entities

SIC-12 applies to activities regardless of whether they are conducted by a legal entity. Under SIC-12, an SPE is consolidated by the entity that is deemed to control it. Indicators of control include the SPE conducting activities on behalf of the Group or the Group holding the majority of the risks and rewards of the SPE. The concept of economic benefit or risk is a major part of the analysis.

Jointly controlled entities

The consolidated financial statements include the Group's proportionate share of jointly controlled entities assets, liabilities, income and expense on a line-by-line basis.

US GAAP requires that loan origination fees and direct costs of origination, whether internal or external, be deferred and amortized to income over the life of the loan as an adjustment to interest income as part of the effective yield on the loan.

Under US GAAP, gains arising from a sale and operating leaseback transaction are generally deferred and amortized over the future period of the operating lease.

FIN 46(R) only applies to legal structures. FIN 46(R) is a consolidation model that requires consolidation assessments to be made where a company has a controlling financial interest via means other than through voting stock. FIN 46(R) requires consolidation when a party is exposed to the majority of an entity's expected losses or the majority of the residual returns. The guidance in FIN 46(R) is more detailed than SIC-12 and may result in different consolidation outcomes than those identified in SIC-12.

Under US GAAP, jointly controlled entities are recorded using the equity method of accounting.

3. Applicable recent developments under US GAAP

Adopted pronouncements

FIN 48: Accounting for Uncertainty in Income Taxes

On July 13, 2006, the FASB issued Interpretation No. 48, "Accounting for Uncertainty in Income Taxes - an Interpretation of FASB Statement No. 109" (FIN 48).

This statement was issued to provide additional guidance and clarification on accounting for uncertainty in income tax positions. The interpretation prescribes a recognition threshold and measurement attribute for financial statement recognition and measurement of tax positions, as well as increased disclosure requirements with regards to uncertain tax positions.

The FASB decided at the January 17, 2007 Board meeting not to delay the effective date of FIN 48 but agreed to release a proposed amendment to FIN 48 which amends the term "ultimately settled", in the context of recognizing previously unrecognized tax benefits, to "effectively settled" whilst also providing a number of conditions which must be present to demonstrate that the a tax position has been "effectively settled".

The Group adopted FIN 48 as of January 1, 2007. The adoption had a negative impact on shareholders' equity of EUR 16 million.

The Company classifies interest as interest expense and penalties as tax expense.

The total unrecognized tax benefits as of June 30, 2007 are EUR 1.9 billion.

The total amount of accrued interest and penalties recognized in the balance sheet at June 30, 2007 is approximately EUR 370 million.

The Group is currently under audit by taxing authorities in major taxing jurisdictions around the world. It is thus reasonably possible that significant changes in the gross balance of unrecognized tax benefits may occur within the next 12 months (an estimate of the range of such gross changes cannot be made), but the Group does not expect such audits to result in amounts that would cause a significant change to its effective tax rate.

The following are the major tax jurisdictions in which the Group and its affiliates operate and the earliest tax year subject to examination:

Jurisdiction:	Tax year:
Brazil	2002
Italy	2002
Netherlands	2002
United Kingdom	1999
United States	2000

SFAS 155: Accounting for Certain Hybrid Financial Instruments

On February 16, 2006, the FASB issued SFAS 155, "Accounting for Certain Hybrid Instruments" (SFAS 155).

SFAS 155 permits entities to elect to measure at fair value through earnings hybrid financial instruments that contain an embedded derivative that would otherwise require bifurcation. This fair value election is made on an

instrument-by-instrument basis and is irrevocable. It is available for all qualifying hybrid instruments that exist as of the date of adoption, January 1, 2007, as well as new instruments issued or acquired after the date of adoption.

Adoption of SFAS 155 on January 1, 2007 had a positive impact on shareholder's equity of EUR 56 million net of tax and was posted in "Other Fair Value Differences". SFAS 155 was applied to hybrid notes already held at fair value under IFRS, thus removing a IFRS-US GAAP reconciling item.

Pronouncements to be adopted in 2008

SFAS 157: Fair Value Measurements

On September 15, 2006, the FASB released SFAS 157, "Fair Value Measurements" (SFAS 157). The Statement is applicable to the Group in 2008.

The standard provides companies enhanced guidance on using fair value to measure financial assets and liabilities and applies whenever other statements require (or permit) assets or liabilities to be measured at fair value. The FASB states that SFAS 157 "does not expand the use of fair value in any new circumstances."

SFAS 157 introduces a definition of fair value: "Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date."

SFAS 157 will change current practice by requiring certain methods to be used to measure fair value and establishes a three level hierarchy for measuring fair value and expands disclosures about fair value measurements.

SFAS 159: The Fair Value Option for Financial Assets and Financial Liabilities

On February 15, 2007, the FASB released SFAS 159, "The Fair Value Option for Financial Assets and Financial Liabilities" (SFAS 159). The Statement is applicable to the Group in 2008.

The standard provides companies an option to report selected financial assets and liabilities at fair value on an instrument-by-instrument basis (the fair value option). The guidance provided by SFAS 159 further aligns the guidance provided by the fair value option allowed under IAS 39, 'Financial Instruments: Recognition and Measurement'.

The Groups continues its work on the adoption of SFAS 157: Fair Value Measurements and SFAS 159: The Fair Value Option for Financial Assets and Financial Liabilities.

Other pronouncements

SFAS 156: Accounting for Servicing of Financial Assets

On March 17, 2006, the FASB issued SFAS 156, "Accounting for Servicing of Financial Assets - an Amendment of FASB Statement 140" (SFAS 156).

The standard provides companies accounting guidelines for all separately recognized servicing assets and servicing liabilities and requires entities to initially recognize servicing rights at fair value and to subsequent measure at amortized cost or fair value.

At the beginning of 2007 ABN AMRO sold ABN AMRO Mortgage Group, Inc., its US-based residential mortgage broker origination platform and servicing business. Accordingly, this statement has no impact on the Group's equity or net profit as determined in accordance with US GAAP.

Reconciliation of net profit under IFRS and US GAAP

The following text explains the significant adjustments to ABN AMRO's profit attributable to the shareholders of the parent company for the six months ended June 30, 2007 that result from the application of US GAAP instead of IFRS.

Net profit for the six months ended June 30, 2007, in accordance with US GAAP, was EUR 12 million higher than net profit in accordance with IFRS, principally as a result of:

- (i) EUR 222 million higher result attributable to differences in the application of hedge accounting.
- (ii) EUR 186 million higher result from differences in the application of fair value measurements.
- (iii) EUR 158 million lower result for mortgage servicing rights due to the sale of ABN AMRO Mortgage Group Inc., US-based residential mortgage broker origination platform and servicing business. Under US GAAP these servicing assets where recorded at a higher amount at December 31, 2006, leading to a lower disposal profit under US GAAP in 2007.
- (iv) EUR 125 million lower result reflecting the reversal of the fair value gain recorded under IFRS on the sale of the shares in AAC Capital Holdings B.V. to the management of this company and the resulting loss of control over investments managed by this company. Under US GAAP these investments were already at fair value.
 - (v) EUR 52 million lower result due to of higher costs for pensions and post-retirement benefits.

6. Consolidated ratios of earnings to fixed charges

The following table sets forth our consolidated ratios of earnings to fixed charges for the periods indicated based on the figures resulting from the reconciliation to US GAAP.

	6 months June	
	2007	2006^{2}
Excluding Interest on Deposits ¹	2.04	1.93
Including Interest on Deposits ¹	1.22	1.24

¹ Deposits include Banks and Total customer accounts. See the Consolidated Financial Statements as included in our Form 20-F for 2006.

² The 2006 ratios have been adjusted for the presentation of LaSalle as discontinued operations and the presentation of interest income and expense related to trading activities in the trading result.
