Buffered PLUS Based on the iShares® MSCI Emerging Markets ETF due May 5, 2021

Buffered Performance Leveraged Upside SecuritiesSM

Fully and Unconditionally Guaranteed by Morgan Stanley

Principal at Risk Securities

The Buffered PLUS are unsecured obligations of Morgan Stanley Finance LLC (“MSFL”) and are fully and unconditionally guaranteed by Morgan Stanley. The Buffered PLUS will pay no interest, provide a minimum payment at maturity of only 10% of the stated principal amount and have the terms described in the accompanying product supplement for PLUS, index supplement and prospectus, as supplemented or modified by this document. At maturity, if the underlying shares have appreciated in value, investors will receive the stated principal amount of their investment plus leveraged upside performance of the underlying shares, subject to the maximum payment at maturity. If the underlying shares have depreciated in value, but the underlying shares have not declined by more than the specified buffer amount, the Buffered PLUS will redeem for par. However, if the underlying shares have declined by more than the buffer amount, investors will lose 1% for every 1% decline beyond the specified buffer amount, subject to the **minimum payment at maturity of 10% of the stated principal amount. Investors may lose up to 90% of the stated principal amount of the Buffered PLUS.** The Buffered PLUS are for investors who seek an equity fund-based return and who are willing to risk their principal and forgo current income and upside above the maximum

payment at maturity in exchange for the leverage and buffer features that in each case apply to a limited range of performance of the underlying shares. The Buffered PLUS are notes issued as part of MSFL's Series A Global Medium-Term Notes program.

All payments are subject to our credit risk. If we default on our obligations, you could lose some or all of your investment. These securities are not secured obligations and you will not have any security interest in, or otherwise have any access to, any underlying reference asset or assets.

FINAL TERMS

Issuer:	Morgan Stanley Finance LLC
Guarantor:	Morgan Stanley
Maturity date:	May 5, 2021
Underlying shares:	Shares of the iShares® MSCI Emerging Markets ETF (the "Fund")
Aggregate principal amount:	\$8,441,100 § If the final share price is <i>greater than</i> the initial share price: \$10 + leveraged upside payment
Payment at maturity per Buffered PLUS:	<i>In no event will the payment at maturity exceed the maximum payment at maturity.</i> § If the final share price is <i>less than or equal to</i> the initial share price but has decreased from the initial share price by an amount less than or equal to the buffer amount of 10%: \$10 § If the final share price is <i>less than</i> the initial share price and has decreased from the initial share price by an amount <i>greater than</i> the buffer amount of 10%: ($\$10 \times \text{the share performance factor}$) + \$1.00 <i>Under these circumstances, the payment at maturity will be less than the stated principal amount of \$10.</i> <i>However, under no circumstances will the Buffered PLUS pay less than \$1.00 per Buffered PLUS at maturity.</i>
Leveraged upside payment:	$\$10 \times \text{leverage factor} \times \text{share percent increase}$
Share percent increase:	$(\text{final share price} - \text{initial share price}) / \text{initial share price}$
Share performance factor:	$\text{final share price} / \text{initial share price}$
Initial share price:	\$43.93, which is the closing price of one underlying share on the pricing date
Final share price:	The closing price of one underlying share on the valuation date <i>times</i> the adjustment factor on such date
Adjustment factor:	1.0, subject to adjustment in the event of certain events affecting the underlying shares
Valuation date:	April 30, 2021, subject to postponement for non-trading days and certain market disruption events
Leverage factor:	200%
Buffer amount:	10%. As a result of the buffer amount of 10%, the value at or above which the underlying shares must close on the valuation date so that investors do not suffer a loss on their initial investment in the Buffered PLUS is \$39.537, which is 90% of the initial share price.
Minimum payment at maturity:	\$1.00 per Buffered PLUS (10% of the stated principal amount)
Maximum payment at maturity:	

	\$12.05 per Buffered PLUS (120.50% of the stated principal amount)
Interest:	None
Stated principal amount:	\$10 per Buffered PLUS
Issue price:	\$10 per Buffered PLUS
Pricing date:	April 30, 2019
Original issue date:	May 3, 2019 (3 business days after the pricing date)
CUSIP:	61768X796
ISIN:	US61768X7966
Listing:	The Buffered PLUS will not be listed on any securities exchange.
Agent:	Morgan Stanley & Co. LLC (“MS & Co.”), an affiliate of MSFL and a wholly owned subsidiary of Morgan Stanley. See “Supplemental information regarding plan of distribution; conflicts of interest.”
Estimated value on the pricing date:	\$9.708 per Buffered PLUS. See “Investment Summary” on page 2.
Commissions and issue price:	Price to public Agent’s commissions and fees Proceeds to us ⁽³⁾
Per Buffered PLUS	\$10 \$0.20 ⁽¹⁾ \$0.05 ⁽²⁾ \$9.75
Total	\$8,441,100 \$211,027.50 \$8,230,072.50

Selected dealers, including Morgan Stanley Wealth Management (an affiliate of the agent), and their financial advisors will collectively receive from the agent, MS & Co., a fixed sales commission of \$0.20 for each Buffered PLUS they sell. See “Supplemental information regarding plan of distribution; conflicts of interest.” For additional information, see “Plan of Distribution (Conflicts of Interest)” in the accompanying product supplement for PLUS.

(1) Reflects a structuring fee payable to Morgan Stanley Wealth Management by the agent or its affiliates of \$0.05 for each Buffered PLUS.

(2) See “Use of proceeds and hedging” on page 17.

The Buffered PLUS involve risks not associated with an investment in ordinary debt securities. See “Risk Factors” beginning on page 6.

The Securities and Exchange Commission and state securities regulators have not approved or disapproved these securities, or determined if this document or the accompanying product supplement, index supplement and prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The Buffered PLUS are not deposits or savings accounts and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency or instrumentality, nor are they obligations of, or guaranteed by, a bank.

You should read this document together with the related product supplement, index supplement and prospectus, each of which can be accessed via the hyperlinks below. Please also see “Additional Terms of the Buffered PLUS” and “Additional Information About the Buffered PLUS” at the end of this document.

As used in this document, “we,” “us” and “our” refer to Morgan Stanley or MSFL, or Morgan Stanley and MSFL collectively, as the context requires.

Buffered PLUS Based on the iShares® MSCI Emerging Markets ETF due May 5, 2021

Buffered Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

Investment Summary

Buffered Performance Leveraged Upside Securities

Principal at Risk Securities

The Buffered PLUS Based on the iShares® MSCI Emerging Markets ETF due May 5, 2021 (the “Buffered PLUS”) can be used:

§ As an alternative to direct exposure to the underlying shares that enhances returns for a certain range of positive performance of the underlying shares, subject to the maximum payment at maturity

§ To enhance returns and potentially outperform the underlying shares in a moderately bullish scenario

§ To achieve similar levels of upside exposure to the underlying shares as a direct investment, subject to the maximum payment at maturity, while using fewer dollars by taking advantage of the leverage factor

§ To obtain a buffer against a specified level of negative performance in the underlying shares

Maturity:	Approximately 2 years
Leverage factor:	200%
Maximum payment at maturity:	\$12.05 per Buffered PLUS (120.50% of the stated principal amount)
Minimum payment at maturity:	\$1.00 per Buffered PLUS (10% of the stated principal amount). Investors may lose up to 90% of the stated principal amount of the Buffered PLUS.
Buffer amount:	10%
Coupon:	None

The original issue price of each Buffered PLUS is \$10. This price includes costs associated with issuing, selling, structuring and hedging the Buffered PLUS, which are borne by you, and, consequently, the estimated value of the Buffered PLUS on the pricing date is less than \$10. We estimate that the value of each Buffered PLUS on the pricing date is \$9.708.

What goes into the estimated value on the pricing date?

In valuing the Buffered PLUS on the pricing date, we take into account that the Buffered PLUS comprise both a debt component and a performance-based component linked to the underlying shares. The estimated value of the Buffered PLUS is determined using our own pricing and valuation models, market inputs and assumptions relating to the underlying shares, instruments based on the underlying shares, volatility and other factors including current and expected interest rates, as well as an interest rate related to our secondary market credit spread, which is the implied interest rate at which our conventional fixed rate debt trades in the secondary market.

What determines the economic terms of the Buffered PLUS?

In determining the economic terms of the Buffered PLUS, including the leverage factor, the maximum payment at maturity, the buffer amount and the minimum payment at maturity, we use an internal funding rate, which is likely to be lower than our secondary market credit spreads and therefore advantageous to us. If the issuing, selling, structuring and hedging costs borne by you were lower or if the internal funding rate were higher, one or more of the economic terms of the securities would be more favorable to you.

What is the relationship between the estimated value on the pricing date and the secondary market price of the Buffered PLUS?

The price at which MS & Co. purchases the Buffered PLUS in the secondary market, absent changes in market conditions, including those related to the underlying shares, may vary from, and be lower than, the estimated value on the pricing date, because the secondary market price takes into account our secondary market credit spread as well as the bid-offer spread that MS & Co. would charge in a secondary market transaction of this type and other factors. However, because the costs associated with issuing, selling, structuring and hedging the Buffered PLUS are not fully deducted upon issuance, for a period of up to 6 months following the issue date, to the extent that MS & Co. may buy or sell the Buffered PLUS in the secondary market, absent changes in market conditions, including those related to the underlying shares, and to our secondary market credit spreads, it would do so based on values higher than the estimated value. We expect that those higher values will also be reflected in your brokerage account statements.

MS & Co. may, but is not obligated to, make a market in the Buffered PLUS, and, if it once chooses to make a market, may cease doing so at any time.

Morgan Stanley Finance LLC

Buffered PLUS Based on the iShares® MSCI Emerging Markets ETF due May 5, 2021

Buffered Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

Key Investment Rationale

The Buffered PLUS offer leveraged upside exposure to the underlying shares, subject to the maximum payment at maturity, while providing limited protection against negative performance of the underlying shares. Once the underlying shares have decreased in price by more than a specified buffer amount, investors are exposed to the negative performance of the underlying shares, subject to the minimum payment at maturity. At maturity, if the underlying shares have appreciated, investors will receive the stated principal amount of their investment plus leveraged upside performance of the underlying shares, subject to the maximum payment at maturity. At maturity, if the underlying shares have depreciated and (i) if the closing price of the underlying shares has not declined from the initial share price by more than the specified buffer amount, the Buffered PLUS will redeem for par, or (ii) if the closing price of the underlying shares has declined by more than the buffer amount, the investor will lose 1% for every 1% decline beyond the specified buffer amount, subject to the minimum payment at maturity. **Investors may lose up to 90% of the stated principal amount of the Buffered PLUS.**

Leveraged Performance up to a Cap	The Buffered PLUS offer investors an opportunity to capture enhanced returns for a certain range of positive performance relative to a direct investment in the underlying shares, subject to the maximum payment at maturity.
Upside Scenario	The underlying shares increase in price, and, at maturity, the Buffered PLUS redeem for the stated principal amount of \$10 plus 200% of the share return, subject to the maximum payment at maturity of \$12.05 per Buffered PLUS (120.50% of the stated principal amount).
Par Scenario	The underlying shares decline in price by no more than 10%, and, at maturity, the Buffered PLUS redeem for the stated principal amount of \$10.
Downside Scenario	The underlying shares decline in price by more than 10%, and, at maturity, the Buffered PLUS redeem for less than the stated principal amount by an amount that is proportionate to the percentage decrease of the underlying shares from the initial share price, plus the buffer amount of 10%. (Example: if the underlying shares decrease in price by 35%, investors would lose 25% of their principal and the Buffered PLUS will redeem for \$7.50, or 75% of the stated principal amount.) The minimum payment at maturity is \$1.00 per Buffered PLUS.

How the Buffered PLUS Work

Payoff Diagram

The payoff diagram below illustrates the payment at maturity on the Buffered PLUS based on the following terms:

Stated principal amount:	\$10 per Buffered PLUS
Leverage factor:	200%
Buffer amount:	10%
Maximum payment at maturity:	\$12.05 per Buffered PLUS
Minimum payment at maturity:	\$1.00 per Buffered PLUS

Buffered PLUS Payoff Diagram

How it works

Upside Scenario. If the final share price is greater than the initial share price, investors will receive the \$10 stated principal amount plus 200% of the appreciation of the underlying shares over the term of the Buffered PLUS, subject to the maximum payment at maturity. An investor will realize the maximum payment at maturity of \$12.05 per Buffered PLUS at a final share price of 110.25% of the initial share price.

§ If the value of the underlying shares appreciate 2%, the investor would receive a 4% return, or \$10.40 per Buffered PLUS.

§ If the value of the underlying shares appreciate 40%, the investor would receive only the maximum payment at maturity of \$12.05 per Buffered PLUS, or 120.50% of the stated principal amount.

§ **Par Scenario.** If the final share price is less than or equal to the initial share price but has decreased from the initial share price by an amount less than or equal to the buffer amount of 10%, investors will receive the stated principal amount of \$10 per Buffered PLUS.

§ **Downside Scenario.** If the final share price is less than the initial share price and has decreased from the initial share price by an amount greater than the buffer amount of 10%, investors will receive an amount that is less than the stated

Buffered Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

principal amount by an amount that is proportionate to the percentage decrease in the value of the underlying shares from the initial share price, plus the buffer amount of 10%. The minimum payment at maturity is \$1.00 per Buffered PLUS.

§ For example, if the value of the underlying shares depreciate 45%, investors would lose 35% of their principal and receive only \$6.50 per Buffered PLUS at maturity, or 65% of the stated principal amount.

Risk Factors

The following is a non-exhaustive list of certain key risk factors for investors in the Buffered PLUS. For further discussion of these and other risks, you should read the section entitled “Risk Factors” in the accompanying product supplement for PLUS, index supplement and prospectus. You should also consult with your investment, legal, tax, accounting and other advisers in connection with your investment in the Buffered PLUS.

Buffered PLUS do not pay interest and provide a minimum payment at maturity of only 10% of your principal. The terms of the Buffered PLUS differ from those of ordinary debt securities in that the Buffered PLUS do not pay interest, and provide a minimum payment at maturity of only 10% of the stated principal amount of the Buffered PLUS, subject to our credit risk. If the final share price is less than 90% of the initial share price, you will § receive for each Buffered PLUS that you hold a payment at maturity that is less than the stated principal amount of each Buffered PLUS by an amount proportionate to the decline in the closing value of the underlying shares from the initial share price, plus \$1.00 per Buffered PLUS. **Accordingly, investors may lose up to 90% of the stated principal amount of the Buffered PLUS.**

The appreciation potential of the Buffered PLUS is limited by the maximum payment at maturity. The appreciation potential of the Buffered PLUS is limited by the maximum payment at maturity of \$12.05 per Buffered PLUS, or 120.50% of the stated principal amount. Although the leverage factor provides § 200% exposure to any increase in the final share price over the initial share price, because the payment at maturity will be limited to 120.50% of the stated principal amount for the Buffered PLUS, any increase in the final share price over the initial share price by more than 10.25% of the initial share price will not further increase the return on the Buffered PLUS.

§ **The market price of the Buffered PLUS will be influenced by many unpredictable factors.** Several factors, many of which are beyond our control, will influence the value of the Buffered PLUS in the secondary market and the price at which MS & Co. may be willing to purchase or sell the Buffered PLUS in the secondary market, including the trading price, volatility (frequency and magnitude of changes in value) and dividends of the underlying shares and of the stocks composing the MSCI Emerging Markets IndexSM, interest and yield rates in the market, time remaining until the Buffered PLUS mature, geopolitical conditions and economic, financial, political, regulatory or judicial events that affect the underlying shares or equities markets generally and which may affect the final share price of the underlying shares, the exchange rates relative to the U.S. dollar with respect to each of the currencies in which the shares comprising the MSCI Emerging Markets IndexSM trade, the occurrence of certain events affecting the underlying shares that may or may not require an adjustment to the adjustment factor, and any actual or anticipated changes in our credit ratings or credit spreads. The price of the underlying shares may be, and has recently been, volatile, and we can give you no assurance that the volatility will lessen. See “iShare® MSCI Emerging Markets ETF Overview” below. You may receive less, and possibly significantly less, than the stated

principal amount per Buffered PLUS if you try to sell your Buffered PLUS prior to maturity.

The Buffered PLUS are subject to our credit risk, and any actual or anticipated changes to our credit ratings or credit spreads may adversely affect the market value of the Buffered PLUS. You are dependent on our ability to pay all amounts due on the Buffered PLUS at maturity and therefore you are subject to our credit risk. If we default on our obligations under the Buffered PLUS, your investment would be at risk and you could lose some or all § of your investment. As a result, the market value of the Buffered PLUS prior to maturity will be affected by changes in the market's view of our creditworthiness. Any actual or anticipated decline in our credit ratings or increase in the credit spreads charged by the market for taking our credit risk is likely to adversely affect the market value of the Buffered PLUS.

As a finance subsidiary, MSFL has no independent operations and will have no independent assets. As a finance subsidiary, MSFL has no independent operations beyond the issuance and administration of its securities and will have no independent assets available for distributions to holders of MSFL securities if they make claims in respect of such securities in a bankruptcy, resolution or similar proceeding. Accordingly, any recoveries by such § holders will be limited to those available under the related guarantee by Morgan Stanley and that guarantee will rank *pari passu* with all other unsecured, unsubordinated obligations of Morgan Stanley. Holders will have recourse only to a single claim against Morgan Stanley and its assets under the guarantee. Holders of securities issued by MSFL should accordingly assume that in any such proceedings they would not have any priority over and should be

Morgan Stanley Finance LLC

Buffered PLUS Based on the iShares® MSCI Emerging Markets ETF due May 5, 2021

Buffered Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

treated *pari passu* with the claims of other unsecured, unsubordinated creditors of Morgan Stanley, including holders of Morgan Stanley-issued securities.

The amount payable on the Buffered PLUS is not linked to the value of the underlying shares at any time other than the valuation date. The final share price will be based on the closing price on the valuation date, subject to postponement for non-trading days and certain market disruption events. Even if the value of the underlying shares appreciate prior to the valuation date but then drop by the valuation date by more than 10%, the payment at maturity will be less, and may be significantly less, than it would have been had the payment at maturity been linked to the value of the underlying shares prior to such drop. Although the actual value of the underlying shares on the stated maturity date or at other times during the term of the Buffered PLUS may be higher than the closing price on the valuation date, the payment at maturity will be based solely on the closing price on the valuation date.

Investing in the Buffered PLUS is not equivalent to investing in the underlying shares or the stocks composing the MSCI Emerging Markets IndexSM. Investing in the Buffered PLUS is not equivalent to investing in the underlying shares, the MSCI Emerging Markets IndexSM (the “share underlying index”) or the stocks that constitute the MSCI Emerging Markets IndexSM. Investors in the Buffered PLUS will not have voting rights or rights to receive dividends or other distributions or any other rights with respect to the underlying shares or the stocks that constitute the MSCI Emerging Markets IndexSM.

The price of the underlying shares is subject to currency exchange risk. Because the price of the underlying shares is related to the U.S. dollar value of stocks underlying the MSCI Emerging Markets IndexSM, holders of the Buffered PLUS will be exposed to currency exchange rate risk with respect to each of the currencies in which such component securities trade. Exchange rate movements for a particular currency are volatile and are the result of numerous factors including the supply of, and the demand for, those currencies, as well as relevant government policy, intervention or actions, but are also influenced significantly from time to time by political or economic developments, and by macroeconomic factors and speculative actions related to the relevant region. An investor’s net exposure will depend on the extent to which the currencies of the component securities strengthen or weaken against the U.S. dollar and the relative weight of each currency. If, taking into account such weighting, the dollar strengthens against the currencies of the component securities represented in the MSCI Emerging Markets IndexSM, the price of the underlying shares will be adversely affected and the payment at maturity on the Buffered PLUS may be reduced.

Of particular importance to potential currency exchange risk are:

existing and expected rates of inflation;

existing and expected interest rate levels;

the balance of payments; and

the extent of governmental surpluses or deficits in the countries represented in the MSCI Emerging Markets IndexSM and the United States.

All of these factors are in turn sensitive to the monetary, fiscal and trade policies pursued by the governments of various countries represented in the MSCI Emerging Markets IndexSM and the United States and other countries important to international trade and finance.

There are risks associated with investments in securities, such as the Buffered PLUS, linked to the value of foreign (and especially emerging markets) equity securities. The underlying shares track the performance of the MSCI Emerging Markets IndexSM, which is linked to the value of foreign (and especially emerging markets) equity securities. Investments in securities linked to the value of foreign equity securities involve risks associated with the securities markets in those countries, including risks of volatility in those markets, governmental intervention in those markets and cross-shareholdings in companies in certain countries. Also, there is generally less publicly § available information about foreign companies than about U.S. companies that are subject to the reporting requirements of the Securities and Exchange Commission, and foreign companies are subject to accounting, auditing and financial reporting standards and requirements different from those applicable to U.S. reporting companies. The prices of securities issued in foreign markets may be affected by political, economic, financial and social factors in those countries, or global regions, including changes in government, economic and fiscal policies and currency exchange laws. In addition, the stocks included in the MSCI Emerging Markets IndexSM

Morgan Stanley Finance LLC

Buffered PLUS Based on the iShares® MSCI Emerging Markets ETF due May 5, 2021

Buffered Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

and that are generally tracked by the underlying shares have been issued by companies in various emerging markets countries, which pose further risks in addition to the risks associated with investing in foreign equity markets generally. Countries with emerging markets may have relatively unstable governments, may present the risks of nationalization of businesses, restrictions on foreign ownership and prohibitions on the repatriation of assets, and may have less protection of property rights than more developed countries. The economies of countries with emerging markets may be based on only a few industries, may be highly vulnerable to changes in local or global trade conditions, and may suffer from extreme and volatile debt burdens or inflation rates. Local securities markets may trade a small number of securities and may be unable to respond effectively to increases in trading volume, potentially making prompt liquidation of holdings difficult or impossible at times. Moreover, the economies in such countries may differ unfavorably from the economy in the United States in such respects as growth of gross national product, rate of inflation, capital reinvestment, resources, self-sufficiency and balance of payment positions between countries.

Adjustments to the underlying shares or to the MSCI Emerging Markets IndexSM could adversely affect the value of the Buffered PLUS. As the investment adviser to the iShares® MSCI Emerging Markets ETF, BlackRock Fund Advisors (the “Investment Adviser”), seeks investment results that correspond generally to the price and yield performance, before fees and expenses, of the MSCI Emerging Markets IndexSM. Pursuant to its investment strategy or otherwise, the Investment Adviser may add, delete or substitute the stocks composing the iShares® MSCI Emerging Markets ETF. Any of these actions could adversely affect the price of the underlying shares and, consequently, the value of the Buffered PLUS. MSCI Inc. (“MSCI”) is responsible for calculating and maintaining the MSCI Emerging Markets IndexSM. MSCI may add, delete or substitute the stocks constituting the MSCI Emerging Markets IndexSM or make other methodological changes that could change the value of the MSCI Emerging Markets IndexSM. MSCI may discontinue or suspend calculation or publication of the MSCI Emerging Markets Index at any time. In these circumstances, the calculation agent will have the sole discretion to substitute a successor index that is comparable to the discontinued MSCI Emerging Markets IndexSM and is permitted to consider indices that are calculated and published by the calculation agent or any of its affiliates.

The performance and market price of the Fund, particularly during periods of market volatility, may not correlate with the performance of the share underlying index, the performance of the component securities of the share underlying index or the net asset value per share of the Fund. The Fund does not fully replicate the share underlying index and may hold securities that are different than those included in the share underlying index. In addition, the performance of the Fund will reflect additional transaction costs and fees that are not included in the calculation of the share underlying index. All of these factors may lead to a lack of correlation between the performance of the Fund and the share underlying index. In addition, corporate actions (such as mergers and spin-offs) with respect to the equity securities underlying the Fund may impact the variance between the performances of the Fund and the share underlying index. Finally, because the shares of the Fund are traded on an exchange and are subject to market supply and investor demand, the market price of one share of the Fund may differ from the net asset value per share of the Fund.

In particular, during periods of market volatility, or unusual trading activity, trading in the securities underlying the Fund may be disrupted or limited, or such securities may be unavailable in the secondary market. Under these circumstances, the liquidity of the Fund may be adversely affected, market participants may be unable to calculate accurately the net asset value per share of the Fund, and their ability to create and redeem shares of the Fund may be disrupted. Under these circumstances, the market price of shares of the Fund may vary substantially from the net asset value per share of the Fund or the level of the share underlying index.

For all of the foregoing reasons, the performance of the Fund may not correlate with the performance of the share underlying index, the performance of the component securities of the share underlying index or the net asset value per share of the Fund. Any of these events could materially and adversely affect the price of the shares of the Fund and, therefore, the value of the Buffered PLUS. Additionally, if market volatility or these events were to occur on the valuation date, the calculation agent would maintain discretion to determine whether such market volatility or events have caused a market disruption event to occur, and such determination would affect the payment at maturity of the Buffered PLUS. If the calculation agent determines that no market disruption event has taken place, the payment at maturity would be based solely on the published closing price per share of the Fund on the valuation date, even if the Fund's shares are underperforming the share underlying index or the component securities of the share underlying index and/or trading below the net asset value per share of the Fund.

Morgan Stanley Finance LLC

Buffered PLUS Based on the iShares® MSCI Emerging Markets ETF due May 5, 2021

Buffered Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

The rate we are willing to pay for securities of this type, maturity and issuance size is likely to be lower than the rate implied by our secondary market credit spreads and advantageous to us. Both the lower rate and the inclusion of costs associated with issuing, selling, structuring and hedging the Buffered PLUS in the original issue price reduce the economic terms of the Buffered PLUS, cause the estimated value of the Buffered PLUS to be less than the original issue price and will adversely affect secondary market prices. Assuming no change § in market conditions or any other relevant factors, the prices, if any, at which dealers, including MS & Co., may be willing to purchase the Buffered PLUS in secondary market transactions will likely be significantly lower than the original issue price, because secondary market prices will exclude the issuing, selling, structuring and hedging-related costs that are included in the original issue price and borne by you and because the secondary market prices will reflect our secondary market credit spreads and the bid-offer spread that any dealer would charge in a secondary market transaction of this type as well as other factors.

The inclusion of the costs of issuing, selling, structuring and hedging the Buffered PLUS in the original issue price and the lower rate we are willing to pay as issuer make the economic terms of the Buffered PLUS less favorable to you than they otherwise would be.

However, because the costs associated with issuing, selling, structuring and hedging the Buffered PLUS are not fully deducted upon issuance, for a period of up to 6 months following the issue date, to the extent that MS & Co. may buy or sell the Buffered PLUS in the secondary market, absent changes in market conditions, including those related to the underlying shares, and to our secondary market credit spreads, it would do so based on values higher than the estimated value, and we expect that those higher values will also be reflected in your brokerage account statements.

The estimated value of the Buffered PLUS is determined by reference to our pricing and valuation models, which may differ from those of other dealers and is not a maximum or minimum secondary market price. These pricing and valuation models are proprietary and rely in part on subjective views of certain market inputs and certain assumptions about future events, which may prove to be incorrect. As a result, because there is no market-standard way to value these types of securities, our models may yield a higher estimated value of the Buffered PLUS than those generated by others, including other dealers in the market, if they attempted to value the § Buffered PLUS. In addition, the estimated value on the pricing date does not represent a minimum or maximum price at which dealers, including MS & Co., would be willing to purchase your Buffered PLUS in the secondary market (if any exists) at any time. The value of your Buffered PLUS at any time after the date of this document will vary based on many factors that cannot be predicted with accuracy, including our creditworthiness and changes in market conditions. See also “The market price of the Buffered PLUS will be influenced by many unpredictable factors” above.

§ **The antidilution adjustments the calculation agent is required to make do not cover every event that could affect the shares of the iShares® MSCI Emerging Markets ETF.** MS & Co., as calculation agent, will adjust the

adjustment factor for certain events affecting the shares of the iShares® MSCI Emerging Markets ETF. However, the calculation agent will not make an adjustment for every event that could affect the shares of the iShares® MSCI Emerging Markets ETF. If an event occurs that does not require the calculation agent to adjust the adjustment factor, the market price of the Buffered PLUS may be materially and adversely affected.

The Buffered PLUS will not be listed on any securities exchange and secondary trading may be limited. The Buffered PLUS will not be listed on any securities exchange. Therefore, there may be little or no secondary market for the Buffered PLUS. MS & Co. may, but is not obligated to, make a market in the Buffered PLUS and, if it once chooses to make a market, may cease doing so at any time. When it does make a market, it will generally do so for transactions of routine secondary market size at prices based on its estimate of the current value of the Buffered PLUS, taking into account its bid/offer spread, our credit spreads, market volatility, the notional size of the proposed § sale, the cost of unwinding any related hedging positions, the time remaining to maturity and the likelihood that it will be able to resell the Buffered PLUS. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the Buffered PLUS easily. Since other broker-dealers may not participate significantly in the secondary market for the Buffered PLUS, the price at which you may be able to trade your Buffered PLUS is likely to depend on the price, if any, at which MS & Co. is willing to transact. If, at any time, MS & Co. were to cease making a market in the Buffered PLUS, it is likely that there would be no secondary market for the Buffered PLUS. Accordingly, you should be willing to hold your Buffered PLUS to maturity.

The calculation agent, which is a subsidiary of Morgan Stanley and an affiliate of MSFL, will make determinations with respect to the Buffered PLUS. As calculation agent, MS & Co. has determined the initial share price, will determine the final share price and will calculate the amount of cash you receive at maturity. Moreover, certain determinations made by MS & Co. in its capacity as calculation agent, may require it to exercise discretion and make subjective judgements, such as with respect to the occurrence or non-occurrence of market § disruption events and the selection of a successor index or calculation of the final share price in the event of a market disruption event or discontinuance of the MSCI Emerging Markets IndexSM. These potentially subjective determinations may adversely affect the payout to you at maturity. For further information regarding these type of determinations, see “Description of PLUS—Postponement of Valuation Date(s)” and “—Calculation Agent and Calculations” in the accompanying product supplement. In addition, MS & Co. has determined the estimated value of the Buffered PLUS on the pricing date.

Hedging and trading activity by our affiliates could potentially adversely affect the value of the Buffered PLUS. One or more of our affiliates and/or third-party dealers have carried out, and will continue to carry out, hedging activities related to the Buffered PLUS (and to other instruments linked to the underlying shares or the MSCI Emerging Markets IndexSM), including trading in the underlying shares and in other instruments related to the underlying shares or the MSCI Emerging Markets IndexSM. As a result, these entities may be unwinding or adjusting hedge positions during the term of the Buffered PLUS, and the hedging strategy may involve greater and more frequent dynamic adjustments to the hedge as the valuation date approaches. Some of our affiliates also trade the § underlying shares or the stocks that constitute the MSCI Emerging Markets IndexSM and other financial instruments related to the MSCI Emerging Markets IndexSM on a regular basis as part of their general broker-dealer and other businesses. Any of these hedging or trading activities on or prior to the pricing date could have increased the initial share price, and, therefore, could have increased the price at or above which the shares of the iShares® MSCI Emerging Markets ETF must close on the valuation date so that investors do not suffer a loss on their initial investment in the Buffered PLUS. Additionally, such hedging or trading activities during the term of the Buffered PLUS, including on the valuation date, could adversely affect the closing price of the shares of the iShares® MSCI Emerging Markets ETF on the valuation date, and, accordingly, the amount of cash an investor will receive at maturity.

§ The U.S. federal income tax consequences of an investment in the Buffered PLUS are uncertain. Please read the discussion under “Additional Information—Tax considerations” in this document and the discussion under “United States Federal Taxation” in the accompanying product supplement for PLUS (together, the “Tax Disclosure Sections”) concerning the U.S. federal income tax consequences of an investment in the Buffered PLUS. As discussed in the Tax Disclosure Sections, there is a substantial risk that the “constructive ownership” rule could apply, in which case all or a portion of any long-term capital gain recognized by a U.S. Holder could be recharacterized as ordinary income and an interest charge could be imposed. If the Internal Revenue Service (the “IRS”) were successful in asserting an alternative treatment, the timing and character of income on the Buffered PLUS might differ significantly from the tax treatment described in the Tax Disclosure Sections. For example, under one possible treatment, the IRS could seek to recharacterize the Buffered PLUS as debt instruments. In that event, U.S. Holders would be required to accrue into income original issue discount on the Buffered PLUS every year at a “comparable yield” determined at the time of issuance and recognize all income and gain in respect of the Buffered PLUS as ordinary income.

Additionally, as discussed under “United States Federal Taxation—FATCA” in the accompanying product supplement for PLUS, the withholding rules commonly referred to as “FATCA” would apply to the Buffered PLUS if they were recharacterized as debt instruments. However, recently proposed regulations (the preamble to which specifies that taxpayers are permitted to rely on them pending finalization) eliminate the withholding requirement on payments of gross proceeds of a taxable disposition. The risk that financial instruments providing for buffers, triggers or similar downside protection features, such as the Buffered PLUS, would be recharacterized as debt is greater than the risk of recharacterization for comparable financial instruments that do not have such features. We do not plan to request a ruling from the IRS regarding the tax treatment of the Buffered PLUS, and the IRS or a court may not agree with the tax treatment described in the Tax Disclosure Sections.

In 2007, the U.S. Treasury Department and the IRS released a notice requesting comments on the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; whether short-term instruments should be subject to any such accrual regime; the relevance of factors such as the exchange-traded status of the instruments and the nature of the underlying property to which the

instruments are linked; the degree, if any, to which income (including any mandated accruals) realized by non-U.S. investors should be subject to withholding tax; and whether these instruments are or should be subject to the “constructive ownership” rule, as discussed in this document. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the Buffered PLUS, possibly with retroactive effect. Both U.S. and Non-U.S. Holders should consult their tax advisers regarding the U.S. federal income tax consequences of an investment in the Buffered PLUS, including possible alternative treatments, the potential application of the constructive ownership rule, the issues presented by this notice and any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.
