ITEM 1. DESCRIPTION OF BUSINESS

Telecom Communications Inc. was incorporated on January 6, 1997 in the State of

## Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

Indiana under the corporate name MAS Acquisition XXI Corp. Prior to December 21, 2000, we were a blank check company seeking a business combination with an unidentified business. On December 21, 2000, we acquired Telecom Communications of America, a sole proprietorship doing business in Los Angeles, California since August 15, 1995, and changed our name to Telecom Communications Inc. In connection with this acquisition, Aaron Tsai, our former sole officer and director was replaced by Telecom Communications of America's owners and associates. We issued 9,000,000 shares of our common stock or 90% of our total outstanding common stock after giving effect to the acquisition. MAS Capital Inc. returned 7,272,400 shares of common stock for cancellation without any consideration.

On September 30, 2003, Telecom Communications, Inc. (the "Company" or "Telecom") consummated a Stock Purchase Agreement (the "Stock Purchase Agreement") with Arran Services Limited ("Arran") and its sole shareholder, Mr. Fred Chi Yuan Deng, for the acquisition of all of the capital stock of Arran, a British Virgin Islands corporation. In exchange for the capital interest, Mr. Deng and his designate received a total of 23,800,000 shares of Telecom common stock, representing approximately 64% of the outstanding shares of Telecom.

On September 30, 2003, Telecom discontinued its operations in the U.S.

On the closing of the Stock Purchase Agreement, Mr. Deng was elected chairman and CEO of the Company. In addition, Mr. Ou Zhixiong, and Ms. Lijian Deng were elected as directors of the Company. In connection with the acquisition, Mr. Tak Hiromoto resigned as chairman and CEO of Telecom, but continued as President and as a director of Telecom. Ms. Elizabeth Hiromoto continued as a director and Secretary of Telecom. On December 31, 2003, Mr. Tak Hiromoto and Ms. Elizabeth Hiromoto resigned as director, President and Secretary, respectively. Mr. Fred Deng was appointed as President while Ms. Lijian Deng was appointed as Secretary.

The Company sold its 80% ownership in StarEastNet to a third party investor for a consideration of \$200,000 in cash on November 20, 2003. StarEastNet's business model had not been profitable in the past several years and Management believed it would not help the Company in the long run, as the Company shifted its core business to wireless short/multimedia messaging services.

On March 16, 2004, Telecom acquired the remaining 20% interest of IC Star MMS Limited ("IC Star") not owned by Arran from Auto Treasure Holdings Limited, a company wholly owned by the majority shareholders of the Company, for the consideration of 9,889,000 shares of Telecom common stock and warrants to purchase 10,000,000 shares of Telecom common stock at \$2 per share.

On April 16, 2004, Telecom Communications, Inc., through Arran, sold its 60% beneficial share ownership in Panyu No. 6 Construction Company Limited ("Panyu") to a related party [Aries Vision Technology Limited ("Aries"), a limited liability company incorporated in the British Virgin Islands] for the consideration of \$2,580,390.

On June 6, 2004, Telecom entered into a subscription agreement (the "Subscription Agreement") with Taikang Capital Managements Corporation ("Taikang"), under which the Company has agreed to issue and sell to Taikang in a private placement, certain promissory notes each having a maturity date as set forth therein, in the total aggregate principal amount of \$1,000,000, bearing interest at a rate of 6% per annum (the "Notes"). Taikang converted \$500,000 of the Notes into 2,500,000 shares of Telecom common stock with par value \$0.001 on July 22, 2004. On July 22, 2004, Telecom entered into a stock purchase agreement

## Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

with Taikang, for the purchase of 7,500,000 shares of the Company's common stock, par value \$.001 per share for an aggregate purchase price of \$1,500,000.

On July 22, 2004, Deng Chi Yuan (Fred Chi Yuan Deng), the majority shareholder of Telecom then entered into stock purchase agreements (the "Agreements") with each of three (3) accredited investors, under which he agreed to sell shares of the Company's common stock, \$.001 par value (the "Common Stock"), at a price equal to \$.16 per share (the "Shares"). Pursuant to the Agreements, 6,000,000 Shares were purchased by Telecom Value Added, Inc.; 6,000,000 Shares were purchased by Bloomen Limited; and 5,800,000 Shares were purchased by Bon Air Group Limited, respectively. In a concurrent transaction, Deng transferred 51 shares (51% percent of the outstanding shares) of Auto Treasure Holdings Limited, a company which holds approximately 16% of all the Company's issued and outstanding shares, as well as warrants exercisable to purchase 10,000,000 shares of Common Stock to key officers of the Company.

On October 7, 2004, Telecom entered into a stock purchase agreement with Taikang, an affiliate of the Company, for the purchase of 10,000,000 shares of the Company's common stock, par value \$.001 per share for an aggregate purchase price of \$2,000,000.

### Overview

Telecom is a Total Solutions Provider that offers Integrated Communications Network Solutions and is a leading Internet and telecommunications value-added service provider doing business through 2 major wholly-owned subsidiaries, Arran Services Limited ("Arran") and Alpha Century Holdings Limited ("Alpha"), both are limited companies incorporated in the British Virgin Islands.

Arran was founded on December 3, 2001 and commenced its operations in January 2003. Arran, through its acquisition of 60% ownership in Panyu No. 6 Construction Company Limited ("Panyu") in January 2003, is engaged in the construction of communication infrastructure and residential and commercial buildings. The participation in communication infrastructure construction, through regular construction companies, allows the Company to leverage its strength of content development in delivering its services to broader communities. Network infrastructure has always been considered the necessary fundamental necessity for telecommunication industry. Arran, through its wholly-owned subsidiary IC Star MMS Limited ("IC Star"), is also a content provider focused on design and development of entertainment content. IC Star has contracted with more than 2000 websites and collected all of their Internet and mobile phone users to be the online/offline members. ICStarMMS.com, through IC China network, links entertainment and lifestyle information to local

2

communities by Short Message Service, Multimedia Messaging Service or other wireless devices to mobile subscribers across China.

Alpha was formed in December 2003 to hold certain assets of the Company and commenced operations in providing Total Solutions System to its clients. It offers integrated communications network solutions and Internet content service in universal voice, video and data web, and mobile communication for interactive media applications, technology and content leader in interactive multimedia communications, develops, markets and sells universal media software solutions for enterprise-wide deployment of integrated communication and media application.

### INDUSTRY BACKGROUND

# Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

## INTRODUCTION OF MOBILE BUSINESS

The Internet and world-wide web have introduced a new set of business challenges. It offers no time constraints or geographical boundaries, and opens up more communication, interaction and transaction channels than ever before. Fixed line Internet access has propelled many "bricks-and-mortar" companies into the Internet age. The convergence of wireless devices and the Internet create the second wave of change across industries.

Mobile business represents the convergence of mobile telephony and Internet technologies and a removal of the limitation or restrictions that exist today in the "wired" world. It is characterized by its ability to deliver multiple information types from multiple devices over multiple networks to users with multiple needs, as demonstrated in the following table:

SERVICES	DEVICES	COMMUNICATION TECHNOLOGY	APPLICATION/CONTENTS
Communications	PC	FIXED	Information Portal
Information	Hand-Held Device	o Analogue Phone	Infrastructure
Finance	Data-Enabled Mobile	o ISDN	Applications
Commerce	Phone	o Broadband	End User Applications
Advertising		(ADSL, XDSL)	E-Markets
Entertainment	ITV	MOBILE	Legacy
	Set-Top Box	o 2G (e.g. GSM)	
	Internet-Capable	o 2.5G (e.g. GRPS)	
	Console	o 3G (e.g. UMTS)	
	Home PC Substitute	SHORT RANGE	
	Screen Phone	o Blue Tooth	
		o 802.11	

## NETWORK TECHNOLOGIES

GSM - GSM (Global System for Mobile Communication) operates in the 900 MHz and the 1800 MHz (1900MHz in the US) frequency bands and is the prevailing mobile standard in Europe and most of the countries in the Asia Pacific region. It provides simple wireless voice transmission and minimal data services.

GPRS - GPRS (General Packet Radio Service) is a packet switched wireless protocol as defined in the GSM standard that offers instant access to data networks. It permits a fast transmission speed of up to 115 Kbps. The advantage of GPRS is that it provides an "always on" connection (i.e. instant IP connectivity) between the mobile terminal and the network. GPRS is the first transport mode to allow full instant Internet access and will enable a wide range of applications.

3G - 3rd Generation (3G) is the generic term for the next big step in mobile technology development. It is a new generation of mobile communication service that has surpassed the limited services of the existing voice communication with

## Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

higher speed of transmission and bandwidth. It can be used to transmit text, digitized voice, video and multimedia data at a rate up to 2 Mbps in a fixed or stationary wireless environment and 384-Kbps in a mobile environment.

### SERVICE TECHNOLOGIES

SMS - SMS (Short Message Service) has provided the ability to send and receive text message to and from mobile phones. Each message can contain up to 160 alphanumeric characters. About 90% of SMS message are voice mail notifications or simple person-to-person messaging. The remaining are various information services, such as news, stock prices, sports, weather, horoscopes, jokes, etc. In addition, SMS e-mail notification, SMS chat and downloading of ringing tones have also have been offered. SMS is an ideal technology for pushing information from one-to-one or one-to-few.

WAP - WAP (Wireless Application Protocol) is an open, global standard for mobile solutions, including connecting mobile terminals to the Internet. WAP based technology permits the design of interactive, real-time mobile services for smart phones or communicators. The advantage of WAP is that it is user friendly and much easier to receive and react to information on a mobile telephone.

MMS - MMS (multimedia messaging service) is one of the recent developments in mobile messaging. MMS provides automatic and immediate delivery of personal messages. Unlike the SMS however, MMS allows mobile phone users to enhance their messages by incorporating sound, images, and other rich content, transforming it into a personalized visual and audio message. With MMS, it is not only possible to send your multimedia messages from one phone to another, but also from phone to email, and vice versa. This feature dramatically increases the possibilities of mobile communication, both for private and corporate use.

### TELECOMMUNICATIONS IN CHINA

The telecommunications industry in China has experienced rapid growth in recent years. According to the Ministry of Information Industry, the total number of wireless access lines in service increased from 108.8 million at the end of 1999 to 249.9 million by the end of September 2003, representing a compound annual growth rate of 24.6%. As the result of the increasing demand for information demand and technology development, the market for data communication and Internet services in China also experienced a rapid growth during the same period. The number of Internet users in China increased from 8.9 million at the end of 1999 to 53.8 million at the end of September 2003, representing a compound annual growth rate of 60%.

4

According to Strategy Analytics, an independent international research and consulting firm, there will be approximately 1.5 billion mobile phone subscribers by 2004 in developed markets. In addition, Strategy Analytics reports that cellular data services will become more important in the future and will account for approximately 36% of total mobile revenue in 2010.

### MOBILE DATA USAGE

China's mobile phone users sent 90 billion short messages last year, accounting for about a quarter of the total in the world. A latest survey conducted by Kongzhong.com, a value-added mobile service provider based in Beijing, showed about 40% of users between 18 and 60 have used the SMS service. Approximately 57% are using SMS to chat and play online games, ranking first among all applications. Other major applications of SMS include online news, financial

## Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

information, handset pictures and ring tone downloads. Subscription services account for a large share of mobile data's increased popularity. The new services are being aggressively promoted by service providers, including the listed Internet portals Sohu.com, Sina.com and Netease.com and many smaller players. Dating services and games with cash prizes have emerged as leading drivers of mobile data use. Long offered on mainstream Internet sites, their mobile incarnations generally require customers to subscribe, driving up revenue for service providers.

The most significant growth for the sector, however, is likely to come from increased SMS usage by existing SMS users. China Mobile's "Monternet" and Unicom's "Uni-Info" mobile data revenue-sharing schemes are now well established with consumers and with third party service providers that offer content. With the models in place and revenue sharing between operators and service providers now taking place, the structure is positioned to scale as new service providers attract more SMS usage with a diversity of new content and services targeting the growing base of mobile subscribers.

### DRIVERS OF SMS GROWTH IN CHINA

---

Ease of Use	No need to register, no complicated set up required
-------------	---

---

Low Price	RMB 0.1/message for contract subscribers; RMB 0.15/message for pre-paid
-----------	--

---

Viral Marketing	Friends send to friends, teaching each other how to send and receive
-----------------	--

---

Always On	Service is available whenever and wherever the mobile phone is turned on
-----------	--

---

According to WTO accords, foreign firms are now permitted to invest in service providers, further boosting China's SMS market. Service providers and the operators themselves are actively exploring cross-media SMS events that bridge television and print media together with SMS. SMS interconnection between China Mobile and Unicom networks in 2002 and 2003 was also a major driver of SMS growth.

### THE WARMING UP OF MMS

According to [www.thefeature.com](http://www.thefeature.com), building on the success of SMS messaging in China with 90 billion SMS messages sent in 2002, analysts are expecting MMS to be a huge phenomenon in the wireless communication scene. Three factors are expected to drive the mass adoption of MMS. Firstly, half of the nation-wide subscriber base changes mobile handsets yearly. Color-screen handsets from both foreign and domestic manufacturers are just being introduced and are expected to generate significant sales among early adopters this year. Secondly, the introduction of new GPRS- and MMS-based services that will fully utilize the features on those new handsets, has led many to believe that 2.5 G is almost assured of success in China. Thirdly, to encourage Internet service providers to develop more MMS content, China Mobile raised the revenue share ratio, and now 85% of the MMS revenue goes to the Internet service providers, while the company takes the remaining 15%. This compares favorably to the 80:20 revenue share ratio for plain-text SMS services.

## Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

Gartner Dataquest predicts that SMS traffic will peak around 2003 before it is to be overtaken by multimedia messaging traffic. MMS revenue will double from the current \$13.4 billion to around \$22.3 billion by 2006. Other analysts are even more bullish, Ovum says that by 2007, the MMS market will be worth around \$70 billion.

### THE GROWTH OF MOBILE AND TELECOMMUNICATIONS VALUE-ADDED SERVICES IN CHINA

Mobile subscribers in China are increasingly using their mobile handsets to access a wider range of value-added services, including instant message, information services and games applications. Both China Mobile and China Unicom have assisted the growth of value-added services by launching its Monternet platform and Uni-Info platform to expand their mobile data services. Both companies adopted similar business models of partnering with Internet content and service providers who developed mobile content and data services while mobile operators provide the transmission network, billing systems, and fee collection services for the service providers based on revenue sharing arrangements.

Compared to mobile voice communications, mobile data communications is still at an early stage in China, accounting for only 9.4% of total mobile revenues in 2002, according to Pyramid Research. We believe that telecommunications operators in China will continue to develop mobile network infrastructure which will provide new opportunities for the growth of mobile value-added services and applications as well as stimulate the market demand for these services.

The following shows the forecast for the growth of the mobile data services industry in China from 2002-2007:

6

US\$ million	2002A	2003E	2004E	2005E	2006E	2007E	CAGR (0
Value-added service & SMS revenues	2,521	3,882	5,871	8,426	11,658	15,219	43.
GPRS revenues	25	70	237	463	1,044	2,066	141.

### PRODUCTS AND SERVICES

General Construction and Network Infrastructure Construction - Through its construction company in Guangzhou, the [Group] provides general construction to residential community, commercial, cultural and digital community. Construction includes setting up of broadband and fiber cable system over communities,

## Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

LAN/WAN and Wi-Fi, internet/intranet/TV and wireless data communications network infrastructure. This operation ceased in April 2004 due to the disposal of the subsidiary. However, the participation in this operation had expanded the Company's network connection and client base in China.

My Star Friends - We have created the original Star SMS/MMS called "My Star Friends" community. It allowed subscribers to communicate with [the Star] by SMS/MMS using service provider's platform.

Entertainment News - Via the platform of service providers and mobile operators, subscribers can receive the latest entertainment news about Asia stars.

Total Solutions -Information Manager System & SMS/MMS Call Center CRM System - Total Solution system offered integrated communications network solutions and Internet content service in voice, data and video through mobile and Internet network with interactive media applications. Telecom, through IC Star and Alpha delivered the Information Manager System advantage and services of providing consistent, quality customer care and infotainment support services. In addition, it offers the client high-value, low-cost sales and service solutions using the highly scalable interactive MMS response (IMR), interactive voice responses (IVR) and speech recognition solutions, combined with an extensive network of Asia contract centers for live operator support and provide their clients opt-in subscriptions of Short Message Services (SMS) and Multimedia Message Services (MMS). It offers corporations advanced Internet and wireless capabilities without the need of the installation of expensive hardware at customer locations. Each user gets a unique code number and an associated web

7

page to manage incoming and outgoing short messages, multimedia messages, phone calls, voice mails and emails with one single common interface. The Total Solution also allows simple, rapid administration of a company's telecom services, including adding new customers and moving telephone number locations online (VoIP) without the cost of a telecom support department. Users can consolidate their multiple phone numbers (office, home, mobile) with a single personal telephone number so callers reach them wherever they are. Further, a virtual SMS/MMS number handles all incoming faxes plus a unified virtual mailbox conveniently manages voicemail and faxes like e-mail.

Search Engine Optimization for mobile phone (SEO4Mobile) - SEO4Mobile offers wireless mobile phone providers the ability to use a short message service (SMS) search feature. Users who enter a relevant keyword or keyword phrase, along with a geographic identifier, can send searches to mobile operator via an SMS and receive a multimedia response that has been processed through a search engine on the Internet. By specifically laying out a separate search SMS for the geographic portion, SEO4Mobile helps structure the search in a simple and efficient way for the searcher. SEO4Mobile will then parse out its advertiser keyword ads that have a local identifier as it sends them to its distribution partners, thereby returning targeted results for mobile searches.

AdMaxB2Search - The Advertiser maximum bid listing system for mobile phone service providers is developed for small to mid-sized businesses that want to offer valuable advertising content to SEO4Mobile users quickly and simply, without impacting their design or operations. Through a step-by-step, wizard-driven set up, advertisers and partners of Telecom can log in to an Intranet site to bid on listing and directory functionality or upload a link over the Internet to a website of advertising distributors. With all their network distribution partners, users of AdMaxB2Search will share a percentage of the revenue earned by distributors when their users search for an ad and are

## Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

sent to that SEO4Mobile. Advertisers who use this service will be given access to SEO4Mobile service providers and their users through search engine optimizers.

### BUSINESS STRATEGIES

Our goal is to be the leading Internet and telecommunications value-added content provider in China. We have expanded our connection to local communities by participating in the telecommunication infrastructure industry through Panyu No. 6 Construction Company which we sold in April 2004. Our strong client/user database, through IC China network, and valuable entertainment and lifestyle information data, are the fundamental strengths of Telecom. We believe our large user base through contracting with various service providers in China, is one of the important business drivers as it provides us with the opportunity to market and deliver our value-added services and products. Our distinctive entertainment information database also provides us the opportunity to distribute online/offline content such as music, video and other forms of multimedia content through mobile operators to the end-users.

In order to leverage our strong user database and information content, we have sought appropriate software to enhance the value of our resources. We believe the integration of our user database, information content and appropriate software shall lead us to penetrate into the value-added content provider market rapidly. To satisfy a low cost objective for a growing company, we rely on third

8

party software at this stage rather than maintain a research & development department for the creation of software. We will continue to expand our client database by entering into cooperation agreements with local Chinese service providers. We intend to develop and enrich our content from self production and internal efforts and cooperation with third-party content providers. We will also seek mobile operators and mobile phone manufacturers who will bundle our products like SEO4Mobile into mobile phones. We will enter into strategic relationships with various enterprise software providers in China with which we co-market, and bundle or distribute our Total Solutions with their products.

### IC STAR MMS LIMITED

IC Star is a China-based local information and services affiliate network. It has contracted with more than 2,000 websites and collected all of their internet and mobile phone users to be the online/offline members. It began operations in December 1999 as an internet alliance concept focused on providing solutions to Chinese city local content providers wishing to publish their news across China. In May 2000, IC Star launched our affiliate network, then called goongreen.org, offering Chinese-language local news, information and community features such as publishing services targeted at online users in China. In October 2002, IC Star expanded its affiliate network by partnering with Aixi Software Limited, a leading network Internet/Intranet development Company with offices in Guangzhou, China and 6 distinct web sites targeting Chinese community users, education users and business users in China. ICStarMMS.com, through IC China network, links lifestyle infotainment with local communities across China. It has created the original Star SMS/MMS called "My Star Friends" community. It allowed subscribers of the contracted Service Providers to communicate with the [Star] by SMS/MMS through China Mobile's network. In January 2003, we continued our network and entertainment content expansion by the acquisition of stareastnet.com a leading entertainment and life information destination web site targeting Chinese users in greater China. As previously discussed, on December 31, 2003 the Company acquired the remaining interests of IC Star it did

## Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

not already own. Today, we operate IC Star web sites to provide Chinese content and services that speak directly to the audience of each region, enriching the online experience of their users.

### ALPHA CENTURY HOLDINGS LIMITED

Alpha was established in December 2003 as an investment holding company having interest in Huiji Electric (Panyu) Limited, a company in China with limited turnover on trading business. Alpha also holds certain assets for the group such as computer equipment and developing software. It signed contracts with clients by offering communications networks from IC Star's data base and content plus Alpha's asset to form integrated Total Solution. Alpha has developed products like Information Manager System, SMS/MMS Call Center System, SE04Mobile, and the latest AdMaxB2Search.

### RISK FACTORS AFFECTING OUR FUTURE RESULTS OF OPERATIONS

Our future results of operations involve a number of risks and uncertainties. With any business undertaking and their inherent unforeseeable risk in conducting business, the following paragraphs discuss a number of risks that could impact the Company's financial condition and results of operations.

9

#### (a) Country risk

Currently, the Company's revenues are derived from sale of its contents, software and services to customers in the Peoples Republic of China (PRC). The Company hopes to expand its operations to countries outside the PRC, however, such expansion has not yet commenced and there are no assurances that the Company will be able to achieve such an expansion successfully. Therefore, a downturn or stagnation in the economic environment of the PRC could have a material adverse effect on the Company's financial condition.

#### (b) Products risk

Our revenue-producing operations are limited and the information available about us makes an evaluation of us difficult. We have conducted limited operations and we have little operating history that permits you to evaluate our business and our prospects based on prior performance. You must consider your investment in light of the risks, uncertainties, expenses and difficulties that are usually encountered by companies in their early stages of development, particularly those engaged in international commerce. In addition to competing with other telecommunication and web companies, the Company could have to compete with larger US companies who have greater funds available for expansion, marketing, research and development and the ability to attract more qualified personnel if access is allowed into the PRC market. If US companies do gain access to the PRC markets in general, it may be able to offer products at a lower price. There can be no assurance that the Company will remain competitive should this occur.

#### (c) Exchange risk

The Company generates revenue and incurs expenses and liabilities in Chinese renminbi, Hong Kong dollars and U.S. dollars. As a result, the Company is subject to the effects of exchange rate fluctuations with respect to any of these currencies. Since 1994, the official exchange rate for the conversion of renminbi to U.S. dollars has generally been stable and the renminbi has appreciated slightly against the U.S. dollar. However, given recent economic instability and currency fluctuations in the world, the Company can offer no

## Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

assurance that the renminbi will continue to remain stable against the U.S. dollar or any other foreign currency. The Company's results of operations and financial condition may be affected by changes in the value of renminbi and other currencies in which its earnings and obligations are denominated. The Company has not entered into agreements or purchased instruments to hedge its exchange rate risks, although the Company may do so in the future.

(d) Our future performance is dependent on our ability to retain key personnel

Our future success depends on the continued services of executive management in China. The loss of any of their services would be detrimental to us and could have an adverse effect on our business development. We do not currently maintain key-man insurance on their lives. Our future success is also dependent on our ability to identify, hire, train and retain other qualified managerial and other employees. Competition for these individuals is intense and increasing.

(e) Our business depends significantly upon the performance of our subsidiaries, which is uncertain.

10

Currently, a majority of our revenues are derived via the operations of our subsidiaries. Economic, governmental, political, industry and internal company factors outside our control affect each of our subsidiaries. If our subsidiaries do not succeed, the value of our assets and the price of our common stock could decline. Some of the material risks relating to our partner companies include:

- Our subsidiaries are located in China and have specific risks associated with that; and
- Intensifying competition for our products and services and those of our subsidiaries, which could lead to the failure of some of our subsidiaries.

(f) A visible trading market for our common stock may not develop.

Our common stock is currently traded on the Over-the-Counter Bulletin Board under the symbol "TCOM". The quotation of our common stock on the OTCBB does not assure that a meaningful, consistent and liquid trading market currently exists. We cannot predict whether a more active market for our common stock will develop in the future. In the absence of an active trading market:

- investors may have difficulty buying and selling or obtaining market quotations; and
- market visibility for our common stock may be limited; and
- a lack of visibility for our common stock may have a depressive effect on the market price for our common stock.

(g) Liability risk

We act as a total solution provider on our contracted projects. Insurance companies in China offer limited business insurance products. As a result, we do not have any business liability or disruption insurance coverage for our operations in China, and our coverage may not be adequate to compensate for all losses that may occur, particularly with respect to loss of business and reputation. Any business disruption litigation or natural disaster could expose us to substantial costs and losses.

## Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

### OTHER RISK FACTORS

There are several risks and uncertainties, including those relating to the Company's ability to raise money and grow its business and potential difficulties in integrating new acquisitions, especially as they pertain to foreign markets and market conditions. These risks and uncertainties can materially affect the results predicted. Other risks include the Company's limited operating history, the limited financial resources, domestic or global economic conditions, activities of competitors and the presence of new or additional competition, and changes in Federal or State laws and conditions of equity markets.

The Company's future operating results over both the short and long term will be subject to annual and quarterly fluctuations due to several factors, some of which are outside the control of Telecom. These factors include but are not limited to fluctuating market demand for our services, and general economic conditions.

11

### GOVERNMENTAL REGULATION

#### Effect of Probable Governmental Regulation on the Business

As we expand our efforts to develop new products and services, we will have to remain attentive to relevant federal and state regulations. We intend to comply fully with all laws and regulations, and the constraints of federal and state restrictions could impact the success of our efforts.

As our services are available in multiple states and foreign countries, these jurisdictions may claim that we are required to qualify to do business as a foreign corporation in each such state and foreign country. New legislation or the application of laws and regulations from jurisdictions in this area could have a detrimental effect upon our business. We cannot predict the impact, if any, that future regulatory changes or developments may have on our business, financial condition, or results of operation.

The PRC government heavily regulates its Internet and value-added telecommunications services sectors, including content restrictions on the Internet and value-added telecommunications services and the licensing and permit requirements for companies in the said industry. Because these laws and regulations and the legal requirements with regard to the Internet and value-added telecommunications services are relatively new, their interpretation and enforcement involve significant uncertainty. It has created substantial uncertainties regarding the legality of existing and future operations and activities of the Internet and telecommunications service in China, including our business. In some cases, our current and previous services or business could be deemed to be in violation of PRC laws or regulations, in which case we may be subject to fines or other penalties and/or may have to cease such business or services.

#### COST AND EFFECTS OF COMPLIANCE WITH ENVIRONMENTAL LAWS

Our business is not subject to regulation under the state and federal laws regarding environmental protection and hazardous substances control. We are unaware of any bills currently pending in Congress that could change the application of such laws so that they would affect us.

## Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

### COMPETITION

The market for Internet and value-added telecommunications services in PRC is competitive and the competition is expected to increase in the future when the market matures and is opened. As the industry is relatively new and is growing rapidly, the basis of competition may shift, offering opportunities for new competitors to enter the market. In addition, as China opens its value-added telecommunications service market to foreign investors, we may face increased competition from international competitors with experience developed in overseas markets and significantly greater financial, technical and marketing resources than we have. Such competitors could also attempt to increase their presence in our markets by forming strategic alliances with other competitors, by offering new or improved products or by increasing their efforts to gain and retain market share through competitive pricing. As a result, our competitors may be able to adapt more quickly to changes in customer needs or to devote greater resources than we can to the sales of our real estate projects. Currently, our main competitors in the overall Internet and value-added telecommunications services market in China are local Internet portals such as Sina.com and

12

Sohu.com We believe our niche in the integrated total solution offering software with entertainment and lifestyle online/offline information, plus our client database has provided us a better position in the specialized Internet and value-added communications services market in China at the moment. However, as the market for Internet and value-added telecommunications services matures, price competition and ability to develop better products has intensified and is likely to continue to intensify. Such competition has adversely affected, and likely will continue to adversely affect, our gross profits, margins and results of operations. There can be no assurance that we will be able to continue to compete successfully with existing or new competitors.

### EMPLOYEES

We believe that the success of our business will depend, in part, on our ability to attract, retain and motivate highly qualified sales, technical and management personnel, and upon the continued service of our senior management personnel. As of the date of this annual report, we have 20 full-time employees. We consider our employee relations to be good and we have never experienced any work stoppages. We cannot assure you that we will be able to successfully attract, retain and motivate a sufficient number of qualified personnel to conduct our business in the future.

### ITEM 2. PROPERTIES

The Company leases an office at Room 1602, Honkwok TST center, 5-9 Observatory Court, TST Kowloon, Hong Kong with approximately 120 square meters. The lease was signed in May 2003 and expires in April 2005 with current rent payment of \$1,175 per month. Huiji Electric (Panyu) Limited leases an office at #62 Cunqianjia Daping Shiqiao Panyu Guangzhou GD.511490 China. The rent is under negotiation with the landlord.

### ITEM 3. LEGAL PROCEEDINGS

None

### ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

No matter was submitted to a vote during the year.

# Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

## PART II

### ITEM 5. MARKET FOR THE REGISTRANT'S COMMON STOCK AND RELATED SECURITY HOLDER MATTERS

#### MARKET INFORMATION

Our common stock is currently traded on a limited basis on the Over-the Counter Bulletin Board under the symbol "TCOM". The quotation of our common stock on the OTCBB does not assure that a meaningful, consistent and liquid trading market currently exists. We cannot predict whether a more active market for our common stock will develop in the future. In the absence of an active trading market:

13

- Investors may have difficulty buying and selling or obtaining market quotations;
- Market visibility for our common stock may be limited; and
- A lack of visibility of our common stock may have a depressive effect on the market price for our common stock.

The reported high and low sale prices for the common stock are shown below for the periods indicated. The prices reflect inter-dealer prices, without retail mark-up, markdown or commissions, and may not always represent actual transactions. As of September 30, 2004, we had approximately 190 stockholders of record.

Period	High	Low
Quarter ended December 31, 2003	\$2.64	\$0.40
Quarter ended March 31, 2004	\$0.98	\$0.52
Quarter ended June 30, 2004	\$0.73	\$0.17
Quarter ended September 30, 2004	\$0.34	\$0.09

On December 1, 2004, TCOM was quoted at \$0.70 per share.

#### DIVIDENDS

There are no present material restrictions that limit the ability of the Company to pay dividends on common stock or that are likely to do so in the future. The Company has not paid any dividends with respect to its common stock, and does not intend to pay dividends in the foreseeable future.

#### THE APPLICATION OF THE "PENNY STOCK REGULATION" COULD HARM THE MARKET PRICE OF OUR COMMON STOCK

Our common stock currently trades on the OTC Bulletin Board. Since our common stock continues to trade below \$5.00 per share, our common stock is considered a "penny stock" and is subject to SEC rules and regulations, which impose limitations upon the manner in which our shares can be publicly traded.

These regulations require the delivery, prior to any transaction involving a penny stock, of a disclosure schedule explaining the penny stock market and the associated risks. Under these regulations, certain brokers who recommend such securities to persons other than established customers or certain accredited investors must make a special written suitability determination regarding such a

## Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

purchaser and receive such purchaser's written agreement to a transaction prior to sale. These regulations have the effect of limiting the trading activity of our common stock and reducing the liquidity of an investment in our common stock.

Stockholders should be aware that, according to the Securities and Exchange Commission Release No. 34- 29093, the market for penny stocks has suffered in recent years from patterns of fraud and abuse. These patterns include:

- Control of the market for the security by one or a few broker-dealers that are often related to the promoter or issuer;

14

- Manipulation of prices through prearranged matching of purchases and sales and false and misleading press releases;

- "Boiler room" practices involving high pressure sales tactics and unrealistic price projections by inexperienced sales persons;

- Excessive and undisclosed bid-ask differentials and markups by selling broker-dealers; and

- The wholesale dumping of the same securities by promoters and broker-dealers after prices have been manipulated to a desired level, along with the inevitable collapse of those prices with consequent investor losses.

Furthermore, the "penny stock" designation may adversely affect the development of any public market for the Company's shares of common stock or, if such a market develops, its continuation. Broker-dealers are required to personally determine whether an investment in "penny stock" is suitable for customers.

Penny stocks are securities (i) with a price of less than five dollars per share; (ii) that are not traded on a "recognized" national exchange; (iii) whose prices are not quoted on the NASDAQ automated quotation system (NASDAQ-listed stocks must still meet requirement (i) above); or (iv) of an issuer with net tangible assets less than \$2,000,000 (if the issuer has been in continuous operation for at least three years) or \$5,000,000 (if in continuous operation for less than three years), or with average annual revenues of less than \$6,000,000 for the last three years.

Section 15(g) and Rule 15g-2 of the Exchange Act require broker-dealers dealing in penny stocks to provide potential investors with a document disclosing the risks of penny stocks and to obtain a manually signed and dated written receipt of the document before effecting any transaction in a penny stock for the investor's account. Potential investors in the Company's common stock are urged to obtain and read such disclosure carefully before purchasing any shares that are deemed to be "penny stock."

Rule 15g-9 requires broker-dealers in penny stocks to approve the account of any investor for transactions in such stocks before selling any penny stock to that investor. This procedure requires the broker-dealer to (i) obtain from the investor information concerning his or her financial situation, investment experience and investment objectives; (ii) reasonably determine, based on that information, that transactions in penny stocks are suitable for the investor and that the investor has sufficient knowledge and experience as to be reasonably capable of evaluating the risks of penny stock transactions; (iii) provide the investor with a written statement setting forth the basis on which the broker-dealer made the determination in (ii) above; and (iv) receive a signed

## Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

and dated copy of such statement from the investor, confirming that it accurately reflects the investor's financial situation, investment experience and investment objectives. Compliance with these requirements may make it more difficult for the Company's stockholders to resell their shares to third parties or to otherwise dispose of them.

15

FUTURE SALES OF LARGE AMOUNTS OF COMMON STOCK COULD ADVERSELY EFFECT THE MARKET PRICE OF OUR COMMON STOCK AND OUR ABILITY TO RAISE CAPITAL.

Future sales of our common stock by existing stockholders pursuant to Rule 144 under the Securities Act of 1933, or following the exercise of future option grants, could adversely affect the market price of our common stock. Our directors and executive officers and their family members are not under lockup letters or other forms of restriction on the sale of their common stock. The issuance of any or all of these additional shares upon exercise of options will dilute the voting power of our current stockholders on corporate matters and, as a result, may cause the market price of our common stock to decrease. Further, sales of a large number of shares of common stock in the public market could adversely affect the market price of the common stock and could materially impair our future ability to generate funds through sales of common stock or other equity securities.

RECENT SALES OF UNREGISTERED SECURITIES

ITEM 6. MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATIONS

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This periodic report contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 with respect to the financial condition, results of operations, business strategies, operating efficiencies or synergies, competitive positions, growth opportunities for existing products, plans and objectives of management. Statements in this periodic report that are not historical facts are hereby identified as "forward-looking statements" for the purpose of the safe harbor provided by Section 21E of the Exchange Act and Section 27A of the Securities Act.

Prospective shareholders should understand that several factors govern whether any forward -looking statement contained herein will be or can be achieved. Any one of those factors could cause actual results to differ materially from those projected herein. These forward - looking statements include plans and objectives of management for future operations, including plans and objectives relating to the products and the future economic performance of the Company. Assumptions relating to the foregoing involve judgments with respect to, among other things, future economic, competitive and market conditions, future business decisions, and the time and money required to successfully complete development projects, all of which are difficult or impossible to predict accurately and many of which are beyond the control of the Company. Although we believe that the assumptions underlying the forward - looking statements contained herein are reasonable, any of those assumptions could prove inaccurate and, therefore, there can be no assurance that the results contemplated in any of the forward - looking statements contained herein will be realized. Based on actual experience and business development, the Company may alter its marketing, capital expenditure plans or other budgets, which may in turn affect the our results of operations. In light of the significant uncertainties inherent in the

forward-looking statements included therein, the inclusion of any such statement should not be regarded as a representation by the Company or any other person that the objectives or plans of the Company will be achieved.

The following analysis of the results of operations and financial condition of the Company should be read in conjunction with the financial statements of Telecom Communications, Inc. for the year ended September 30, 2004 and notes thereto contained in this Report on Form 10-KSB of Telecom Communications, Inc.

#### OVERVIEW

We are a leading value-added information service provider for China and the global Chinese community. Our specialized product Total Solutions System offers integrated communications network solutions and Internet content service in universal voice, video, data, web and mobile communication for interactive media applications and technology and content leaders in interactive multimedia communications. Telecom develops, markets and sells a universal media software solution for enterprise-wide deployment of integrated voice, video, data, web, and mobile communication for media applications. Designed around Telecom's Internet content and database and integrated into the Information Manager System and SMS/MMS Call Center CRM System core software, the Total Solutions application facilitates the collaboration of key business processes such as, corporate and marketing communications, membership distance interactive program, product development, customer relationship management and content management by allowing dispersed enterprise users to collaborate in real time with multimedia message services.

Our business model is built on the integration of strong entertainment and lifestyle content, our network database and the application of technology. Our network database was established by signing contracts with strategic partners and collecting all of their Internet and mobile phone users to be the online/offline members in China. We also established the network database from the construction company that we previously owned, Panyu No. 6 Construction Company Limited ("Panyu"), that provided network construction and general construction to the region. Our content was built through our business alliance in which IC Star (formerly known as Sino Super Ltd.) (<http://www.ICSTARMMS.com>), one of our subsidiaries and a network services provider based in Hong Kong, links entertainment and lifestyle information to local communities across China. IC Star, which was originally created as the Star SMS /MMS called "My Star Friends" community, was first invented as a SMS/MMS interactive between IC Star and fans in the world. By integrating the network database and content into a software that TCOM sources from the market, we can leverage the functions of the software and target it to various industries.

We believe that we are one of the leading Internet and value-added telecommunications services providers specializing in entertainment and lifestyle content in China. Since the launch of our Total Solutions - Information System and the SMS/MMS CRM in July, we have signed various contracts with clients which showed customer acceptance. It proved that our expectation on the reception of the integrated Internet and value-added telecommunication service is on the right track. We will target the enterprise multimedia communications market in China where we believe there is significant growth potential. Our latest products SEO4Mobile (Search Engine Optimization for mobile phones) and AdMaxB2Search have proved our strength in innovative and creative value-added service. As a result, three contracts have been signed with business partners.

One of our subsidiaries, IC Star MMS Ltd., or ICStar (formerly known as Sino Super Ltd.), a network services company based in Hong Kong, began operations in December 1999 with an Internet alliance concept focused on providing solutions to Chinese city local contents providers wishing to publish their news across China. In May 2000, ICStar launched our affiliate network, then called goongreen.org, offering Chinese-language local news, information and community features such as publishing services targeted at online users in China. In October 2002, ICStar expanded its affiliate network by partnering with Aixi Software Limited, a leading network Internet/Intranet development company with an office in Guangzhou China and 6 distinct web sites targeting Chinese community users, education users and business users in China. In January 2003, we continued our network expansion and entertainment content provided by the acquisition of stareastnet.com, a leading entertainment and life information destination web site targeting Chinese users in greater China. Today, ICStarMMS web sites serves local Chinese communities with its enriched and diversified content focused on entertainment and life-style information.

We will derive our revenues from the offering of our products Total Solutions System - Information Manager System, SMS/MMS CRM System, SEO4Mobile and AdMaxB2Search. Revenues are derived principally from providing integrated solutions and the AdMaxB2Search platform by entering into business contracts with enterprises for a fixed monthly fee.

#### BUSINESS PARTNERSHIP DEVELOPMENTS

-----  
On October 26, 2004, IC Star (<http://www.icstarmms.com>) entered into a cooperation agreement with Baidu.com (<http://www.baidu.com>), the number one Chinese internet search engine. Under the agreement, IC Star will work with Baidu.com to develop Short Messaging Service (SMS), Multimedia Messaging Service (MMS), and other wireless contents such as artist profiles and gaming. Baidu will provide the technical platform and take part in promoting this new operation to its users that have 60 million keyboard resolutions every day.

On November 1, 2004, Telecom reached an agreement with Aries and Gold Swallow Shop Limited to form Animation Studio, a joint venture to create, develop and produce computer generated or flash animated feature films, videos and multimedia content, and to develop and distribute digital videos and other products based on the content and program. Aries is currently in production on animated feature films to be broadcast on the Cartoon Channel in China during the second quarter of 2005. Gold Swallow Shop has investments to develop related software and run a distribution chain of home videos, music and games software in China. Gold Swallow develops home videos and distributes products that ignite customers to become better and more active participants in the China experience. In addition to the joint venture, TCOM will be granted a first right for exclusive arrangement wireless value-added service of all products and contents developed by the joint venture from time to time.

On November 15, 2004, IC Star, entered into a cooperation agreement with the wireless business division of Beijing eLong Information Technology Limited, a company of eLong Inc. (Nasdaq: LONG) (<http://www.elong.com>), the leading online travel service provider and community in China. Under the agreement, IC Star will utilize the best of its pool of celebrity and artistic resources, in conjunction with eLong's development of Short Messaging Service (SMS), Multimedia Messaging Service (MMS) and Coloring Ring Back Tone service. eLong will provide the technical platform and promote these new services to its users.

Since October 2003, the Company or its subsidiaries, through our strategic partner--Aixi Software Ltd., has signed contracts with various service providers in China in order to expand our network database. The service providers include:

Shanghai Linktone

Founded in October 1999, Linktone has emerged as an acknowledged leader in China's fast-growing wireless services sector. By developing a wide range of attractive content and applications for the paying end user, and by establishing nearly nationwide coverage through China's mobile operators, China Mobile and China Unicom, Linktone has enjoyed substantial, sustained growth in its user base and revenues. Linktone's current focus on Short Messaging Services (SMS) allows potential access to virtually all of China's 185 million GSM subscribers, among users of SMS, and familiarity with its functions, which continue to increase rapidly month to month. Linktone's consumer services focus on entertainment, messaging and personalized information.

Linktone has also established itself as a provider of innovative enterprise solutions. In May 2002, Linktone partnered with McDonald's Corporation (China) to launch a first of its kind, nationwide SMS promotion for the 2002 World Cup Tournament in Japan and Korea. Linktone has also worked to promote feature films, television programs, major entertainment events, and consumer goods. Although SMS remains Linktone's core focus, the Company has developed offerings for the mobile operators that include WAP over GPRS, WAP over CDMA, EMS, MMS, location-based and cell-broadcasting content and applications, as well as a number of products, scheduled for release later this year, for China Mobile's new 2.5G GPRS network. Linktone's headquarters are located in Shanghai, and the company maintains regional offices in Beijing, Guangzhou, Fuzhou, Qingdao and Xian.

5Wan.com

5wan International (<http://www.5wan.com>) concentrates on tens of millions cell phone users by offering humanization, high technology, and mobile entertainment. In China, 5wan has already launched several WAP games, and achieved great success. Their first release was the first role play WAP game - "SYZF" 5wan then introduced the release of the first multi-person SMS game - "king of fighter."

5wan's products and services are based on WAP, SMS, GPRS, Java and MPEG4. Also, 5wan is the first software developer to pass the Ericsson GPRS test. Ericsson (ERICY) has already used 5wan's game software in its application integration, recommended formally by China Mobile (CHL).

3721 Inter China Network Software Co. Ltd

3721 Inter China Network Software Co. Ltd ([www.3721.com](http://www.3721.com)) was acquired by Yahoo! Holdings (Hong Kong) Ltd., a wholly owned subsidiary of Yahoo!, Inc. Under the agreements, the partners started to market ICStar short messages service (SMS), Multimedia Messages Services (MMS), ring tones, broadband to its own multi-millions users. ICStar will provide entertainment information celebrities as its core competency and other wireless contents such as wall paper and

## Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

gaming. Both companies will work together to provide better customer preferred type of wireless/Internet products and services to lead a new trend of entertainment era in China.

### Tencent Company Limited

Tencent is one of the first Internet Instant Messaging (IM) software developers in China, and a leading provider for Internet and mobile value-added services with a focus on IM and related value-added services. Its holding company, Tencent Holdings Limited, has been listed on the Hong Kong Stock Exchange since June 2004. Tencent was founded in November 1998 in Shenzhen, China. In February 1999, Tencent launched its first IM software--"Tencent QQ." Over the past five years, Tencent has strived to pursue technological advancement while maintaining a steady high growth in users. The vast community of Tencent QQ users demonstrates Tencent's technological strength in operating massive online application systems and IM-related applications.

Tencent users can communicate real time with each other via their IM platform with their PCs, mobile and fixed line phones, as well as various terminal devices. Not only can users communicate via text, images, audio, video and email, but they also have access to various Internet services and mobile value-added services designed to enhance the community experience, including mobile games, dating, content downloads and other entertainment services.

Under the agreements, the partners started to market IC Star's and Alpha's short messages service (SMS), Multimedia Message Services, ring tones, and broadband to their own multi-millions of users. IC Star will provide entertainment information celebrities as its core competency and other integrated contents. Both companies will work together to provide better customer preferred types of wireless/Internet products and services and lead a new trend of offering Total Solutions to corporations through wireless and Internet communications in China.

### Impact of Inflation

We believe that inflation has had a negligible effect on operations during the period. We believe that we can offset inflationary increases in the cost of sales by increasing sales and improving operating efficiencies.

### Trends, Events, and Uncertainties

Demand for the Company's products will be dependent on, among other things, market acceptance of the Company's concept, the quality of its products and general economic conditions, which are cyclical in nature. Inasmuch as a major portion of the Company's activities is the receipt of revenues from the sales of

20

its products, the Company's business operations may be adversely affected by the company's competitors and prolonged recessionary periods.

### RESULTS OF OPERATIONS

YEAR ENDED SEPTEMBER 30, 2004 COMPARED THE YEAR ENDED SEPTEMBER 30, 2003

Revenue for the year ended September 30, 2004 was \$1,431,473. \$834,752 was generated from our IC Star subsidiary doing business in telecommunication

## Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

add-value service through SMS and MMS in a profit sharing model. \$596,721 was generated from Alpha doing business in Total Solutions commencing from September 2004. We did not have revenues for the year ended September 30, 2003. The Company recognizes revenue when there is persuasive evidence of an arrangement, delivery has occurred, the fee is fixed or determinable, collectibility is reasonably assured, and there are no substantive performance obligations remaining.

For the year ended September 30, 2004, costs of sales amounted to \$685,958 for 48% of net revenues and consists of direct material or contents and labor costs and those indirect costs related to contract performance, such as indirect labor, supplies, tools, repairs, and depreciation costs as well as local taxes incurred. These costs are directly attributable to our contractual projects.

For the year ended September 30, 2004, we incurred operating expenses of \$2,618,084 as compared to \$488,568 for the year ended September 30, 2003. For the year ended September 30, 2004, operating expenses consisted of salaries of \$436,329, consultancy fee of \$1,306,000, depreciation expenses of \$262,027 and other selling, general and administrative expenses of \$613,728. For the year ended September 30, 2003, operating expenses consisted of settlement expense related to settlement of a lawsuit of \$400,000, and other selling, general and administrative expenses of \$88,568.

For the year ended September 30, 2004, we incurred interest income of \$45 and no interest expense. A total of \$753,695 was recorded as the Company recognized other income consisting primarily of the settlement of a liability and the received payment and sale proceeds from the sale of a subsidiary in November 2003. Acquisition cost of \$8,126,917 for the additional 20% of IC Star was arrived at from the issuance of common shares.

For the year ended September 30, 2004, we recorded minority interest expense of \$35,824 related to the allocation of profits to our minority interest holder.

For the year ended September 30, 2004, we recorded a net income of \$518,360 from discontinued operations, which was net of income tax of \$89,076, and a loss on the sale of the discontinued operations of \$138,277.

### OVERALL

We reported a net loss for the year ended September 30, 2004 of \$8,901,487. This translates to an overall per-share loss of \$.19 for the year ended September 30, 2004.

### LIQUIDITY AND CAPITAL RESOURCES

At September 30, 2004, we had a cash balance of \$325,131 held in Hong Kong, the Special Administrative Region of The People's Republic of China, and \$11,576 held in PRC. We currently have no cash positions in the United States. We have been funding our operations from the receipt of customer deposits on our construction projects and receipt of sales proceeds of disposal of subsidiaries. We also funded our operation by issuing common stock for a consideration of \$2,000,000 on July 22, 2004

Management has invested substantial time evaluating and considering numerous proposals for possible acquisition or combination developed by management or presented by investment professionals, the Company's advisors and others. We continue to consider acquisitions, business combinations, or start up proposals,

## Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

which could be advantageous to shareholders. No assurance can be given that any such project acquisition, or combination will be concluded.

At September 30, 2004, our Company had stockholders equity of \$2,660,641. Our Company's future operations and growth will likely be dependent on our ability to raise capital for expansion and to implement our strategic plan.

Net cash provided by operating activities was \$562,741 for the year ended September 30, 2004 and was attributable to our net loss \$8,901,487 offset by non-cash activity such as depreciation on discontinued/continued operation of \$469,100, loss on disposal of equipment of \$150,310, minority interest of \$310,489, acquisition cost of \$8126,917 and common stock issued for service of \$1,740,000 as well as gain on disposal of subsidiary of \$61,723. We may continue to use cash in our operations due to the continuing implementation of our business model and increased expenses from costs associated with being a public company.

Net cash used in investing activities for the year ended September 30, 2004 was \$1,780,239 compared to net cash provided by investing activities of \$159,718 for the year ended September 30, 2003. For the year ended September 30, 2004, we received \$200,000 of cash from the disposal of a subsidiary, which was off set by sales proceeds on disposal of the subsidiary net of cash in the amount of \$1,343,810, and capital expenditures of \$636,429.

Net cash provided by financing activities was \$393,180 for the year ended September 30, 2004. Net cash provided by financing activities consisted of proceeds from related party loans of \$69,117, proceeds from loans payable of \$304,063 and proceeds from the issuance of common stock accounted for \$20,000. .

Our future growth is dependent on our ability to raise capital for expansion, and to seek additional revenue sources. If we decide to pursue any acquisition opportunities or other expansion opportunities, we may need to raise additional capital, although there can be no assurance such capital- raising activities would be successful.

22

### RECENT ACCOUNTING PRONOUNCEMENTS

The Financial Accounting Standards Board has recently issued several new accounting pronouncements:

In July 2002, the FASB issued SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities. This statement addresses financial accounting and reporting for costs associated with exit or disposal activities and nullifies Emerging Issues Task Force ("EITF") Issue No. 94-3, Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring). This statement applies to costs associated with an exit activity that does not involve an entity newly acquired in a business combination or with a disposal activity covered by SFAS No. 144. These costs include, but are not limited to, termination benefits provided to current employees that are involuntarily terminated under the terms of a benefit arrangement that, in substance, is not an ongoing benefit arrangement or an individual deferred compensation contract, costs to terminate a contract that is not a capital lease and costs to consolidate facilities or relocate employees. This statement does not apply to costs associated with the retirement of a long-lived asset covered by SFAS No. 143, Accounting for Asset Retirement Obligations. This statement was adopted effective January 1, 2004, and it did not have an impact on the Company's current financial position or its

## Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

results of operations.

On December 31, 2002, the FASB issued SFAS No. 148, Accounting for Stock-Based Compensation - Transition and Disclosure. SFAS No. 148 amends SFAS No. 123, Accounting for Stock-Based Compensation, to provide alternative methods of transition to SFAS No. 123's fair value method of accounting for stock-based employee compensation. SFAS No. 148 also amends the disclosure provisions of SFAS No. 123 and APB Opinion No. 28, Interim Financial Reporting, to require disclosure in the summary of significant accounting policies of the effects of an entity's accounting policy with respect to stock-based employee compensation on reported net income and earnings per share in annual and interim financial statements. While SFAS No. 148 does not amend SFAS No. 123 to require companies to account for employee stock options using the fair value method, the disclosure provisions of SFAS No. 148 are applicable to all companies with stock-based employee compensation, regardless of whether they account for that compensation using the fair value method of SFAS No. 123 or the intrinsic value method of APB Opinion No. 25. The Company adopted the required disclosure provisions of SFAS No. 148 effective January 1, 2003, and its application did not have an impact on the Company's current financial position or its results of operations.

In May 2003, the FASB issued SFAS No. 150, Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity. SFAS No. 150 establishes standards for how companies classify and measures certain financial instruments with characteristics of both liabilities and equity. It requires companies to classify a financial instrument that is within its scope as a liability (or an asset in some circumstances). SFAS No. 150 is effective beginning with the second quarter of fiscal 2004. This statement was adopted effective January 1, 2004, and it did not have an impact on the Company's current financial position or its results of operations.

### ITEM 7. FINANCIAL STATEMENTS

See "Index to Financial Statements" for the financial statements included in this Form 10-KSB.

23

### ITEM 8. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Robert G. Ercek, CPA resigned as independent certified public accountant and independent auditor on December 31, 2003. His report on our financial statements for the years ended September 30, 2002 and 2001 did not contain an adverse opinion or disclaimer of opinion, nor were they qualified or modified as to uncertainty, audit scope or accounting principles other than the uncertainty related to our ability to continue as a going concern through September 30, 2002. During the fiscal years ended September 30, 2002 and 2001, there were no disagreements with Robert G. Ercek, CPA on any matters of accounting principles or practices, financial statement disclosure or auditing scope or procedure, which, if not resolved to the satisfaction of Robert G. Ercek, CPA, would have caused it to make reference to the subject matter of the disagreement in connection with its report on these financial statements for those periods.

Sherb and Company, LLP ("Sherb"), was retained as independent certified accountants and independent auditor in December 2003 and resigned on April 12, 2004. Its report on our financial statements for the years ended September 30, 2003 and the subsequent interim period through April 11, 2004, did not contain an adverse opinion or disclaimer of opinion, nor were they qualified or modified

## Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

as to uncertainty, audit scope or accounting principles other than the uncertainty related to our ability to continue as a going concern. There were no disagreements between Telecom and Sherb on any matter of accounting principles or practices, financial statement disclosure, or auditing scope or procedures, which disagreements, if not resolved to Sherb's satisfaction, would have caused Sherb to make reference to the subject matter of the disagreement in connection with their reports on these financial statements for those periods.

On April 12, 2004, Livingston, Wachtell & Co., LLP ("LWC"), was retained as independent certified accountants and independent auditor and resigned on September 17, 2004. LWC's reports on the Company's financial statements for the past two fiscal years did not contain an adverse opinion, disclaimer of opinion, nor were they qualified or modified as to uncertainty, audit scope or accounting principles. During the Company's two most recent fiscal years and through September 17, 2004, there were no disagreements with LWC on any matter of accounting principles or practices, financial statement disclosure, or auditing scope or procedure, which disagreements, if not resolved to the satisfaction of LWC, would have caused it to make reference to the subject matter of the disagreements in connection with its report. No reportable events of the type described in item 304(a)(1)(iv)(B) of Regulation S-B occurred during the two most recent fiscal years.

Effective September 17, 2004, Child, Sullivan & Company was appointed as the new independent registered public accounting firm for the Company.

### ITEM 8A. CONTROLS AND PROCEDURES

As of the end of the period covered by this report, we conducted an evaluation, under the supervision and with the participation of the Chief Executive Officer and Chief Financial Officer, of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")). Based on this evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure

24

controls and procedures are effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms. There was no change in the Company's internal control over financial reporting during the Company's most recently completed fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

### ITEM 9. DIRECTORS, EXECUTIVE OFFICERS, PROMOTERS AND CONTROL PERSONS; COMPLIANCE WITH SECTION 16(A) OF THE EXCHANGE ACT

#### DIRECTORS AND EXECUTIVE OFFICERS

The following table includes the names, positions held and ages of our executive officers and directors.

NAME	AGE	POSITION
	62	Chairman of the Board
Guosheng Liu	30	CEO, President and Director
Shanhe Yang	31	Controller, Secretary and Director

Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

Lijian Deng	24	Chief Information Officer and Director
Lirong Liu	48	CFO and Director
Gary Lam		

25

GUOSHENG LIU, CHAIRMAN  
-----

Ms. Deng has been responsible for management of the export department and has been accumulating administration operation experience for 10 years in international trade and corporate management. Ms. Deng attended an advanced study in FUDAN University Shanghai prior to joining the Company.

GARY LAM, CFO  
-----

Mr. Lam joined the Company in late 2003 and has over 16 years of extensive experience in treasury management. Mr. Lam is an affiliated member of the Hong Kong Securities Institute. Mr. Lam was appointed as director of Renren Holdings Limited (a public company in HK) during May 2001-September 2002.

LIRONG LIU, CHIEF INFORMATION OFFICER AND DIRECTOR  
-----

Ms. Liu joined the Company in 2004. She spent 4 years in broadcasting and communications after graduation from college. Prior to joining the group, Ms. Liu had worked for various foreign conglomerates in the electronics industry in Zhuhai where she had served in different departments. With more than four years experience in Internet and the virtual media market, Ms. Liu was recognized as an outstanding information/content integration professional when she worked for Aixi Software Limited before joining our Company.

Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

AUDIT COMMITTEE

-----

We do not have an audit committee. The entire Board of Directors serves as the audit committee. Because of the small size of the Company and the risk attendant to a small public company, we are currently unable to attract an audit committee

26

financial expert to our Board of Directors. There are no other committees of the Board of Directors.

Code of Ethics

-----

See Exhibit 14 for the Company's Code of Ethics.

ITEM 10. EXECUTIVE COMPENSATION

The following table sets forth in summary form the compensation received during each of the Company's last three completed fiscal years by the President and Secretary/ Treasurer of the Company.

Summary Compensation Table

The following table sets forth information relating to all compensation awarded to, earned by or paid by us during the past three fiscal years to: (a) our Chief Executive Officer; and (b) each of our executive officers who earned more than \$100,000 during the last three fiscal periods ended September 30, 2004, 2003 and 2002:

Name and Principal Position	Fiscal Year	Annual Compensation		Long-Term Compensation		
		Salary (\$) Annual	Bonus (\$)	Other Compensation (\$)	Restricted Stock Awards (\$)	Sec Und Optio
Shanhe Yang Chief Executive Officer, President and Director	2004	\$ 124,000	\$ -	\$ -	\$ -	
	2003	\$ -	\$ -	\$ -	\$ -	
	2002	\$ -	\$ -	\$ -	\$ -	
Lijian Deng Controller, Secretary and Director	2004	\$ 124,000	\$ -	\$ -	\$ -	
	2003	\$ -	\$ -	\$ -	\$ -	
	2002	\$ -	\$ -	\$ -	\$ -	
Lirong Liu Chief Information Officer and Director	2004	\$ 124,000	\$ -	\$ -	\$ -	
	2003	\$ -	\$ -	\$ -	\$ -

None

AGGREGATED OPTION/SAR EXERCISES IN LAST FISCAL YEAR AND  
FISCAL YEAR-END OPTION/SAR VALUES  
-----

None

TERM OF OFFICE  
-----

The term of office of the current directors shall continue until new directors are elected or appointed.

EMPLOYMENT AGREEMENTS  
-----

The Company has entered into employment agreements with management officers. The terms of the employment have been disclosed above. There are no employment

27

contract established with our employees in China as it is not common to have employment contract in China for non-management employee.

TERMINATION OF EMPLOYMENT AND CHANGE OF CONTROL ARRANGEMENT  
-----

There are no compensatory plans or arrangements, including payments to be received from the Company, with respect to any person named in the Summary Compensation Table set out above which would in any way result in payments to any such person because of his or her resignation, retirement or other termination of such person's employment with the Company or its subsidiaries, or any change in control of the Company, or a change in the person's responsibilities following a change in control of the Company.

INDEMNIFICATION OF OFFICERS AND DIRECTORS  
-----

We indemnify to the fullest extent permitted by, and in the manner permissible under the laws of the State of Indiana, any person made, or threatened to be made, a party to an action or proceeding, whether criminal, civil, administrative or investigative, by reason of the fact that he/she is or was a director or officer of our Company, or served any other enterprise as director, officer or employee at our request. Our board of directors, in its discretion, shall have the power on behalf of the Company to indemnify any person, other than a director or officer, made a party to any action, suit or proceeding by reason of the fact that he/she is or was our employee.

ITEM 11. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

(a) Security Ownership of Certain Beneficial Owners

The following table sets forth, as of [December 20], 2004, information known to us relating to the beneficial ownership of shares of common stock by: each person who is the beneficial owner of more than five percent of the outstanding shares of common stock; each director; each executive officer; and all executive

Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

officers and directors as a group.

We believe that all persons named in the table have sole voting and investment power with respect to all shares of common stock beneficially owned by them except as stated therein.

Under the securities laws, a person is considered to be the beneficial owner of securities that can be acquired by him within 60 days from the date of this filing upon the exercise of options, warrants or convertible securities. We determine beneficial owner's percentage ownership by assuming that options, warrants or convertible securities that are held by him, but not those held by any other person and which are exercisable within 60 days of the date of this filing, have been exercised or converted. As of December 20, 2004, there were 70,188,000 shares of our common stock issued and outstanding.

The following table sets forth, as of [December 20], 2004, information known to us relating to the beneficial ownership of shares of common stock by: each person who is the beneficial owner of more than ten percent of the outstanding shares of common stock; each director; each executive officer; and all executive officers and directors as a group.

28

We believe that all persons named in the table have sole voting and investment power with respect to all shares of common stock beneficially owned by them except as stated therein.

Title of Class	Name and address of beneficial owner	Number of Shares	Percent of Class
Common	Taikang Capital Managements Corporation	20,000,000	28.5%
Common	Lijian Deng	20,089,000 (1)	14.4%
Common	Shanhe Yang	20,089,000 (2)	14.4%
Common	Lirong Liu	20,089,000 (3)	14.4%
Common	Gary Lam	100,000 (4)	0.1%
Directors and executive officers as a group (4 persons)		10,589,000	15.09%

(b) Changes in Control

We know of no contractual arrangements which may at a subsequent date result in a change of control in the Company.

ITEM 12. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

An officer of the Company or companies owned by this officer advanced funds to the Company for working capital purposes. At September 30, 2004, the Company owed this officer or his companies \$165,343. The advances are non-interest bearing and are payable on demand and are shown as a current liability.

On April 16, 2004, the Company sold its 60% interest in Panyu to Aries Vision Technology Limited ("Aries"), a related party, for approximately \$2,580,390. Approximately \$2,095,128 is payable to the majority shareholder and the remaining \$483,234 to Arran. Loss on disposal amounted to \$138,277.

On May 3, 2004, Alpha Century Holdings Limited ("ACH"), a wholly owned subsidiary of Telecom Communications, Inc., (the "Company") entered into the Software ASP Reseller Agreement (the "Agreement") with Taikang Capital Managements Corporation d/b/a Taikang Insurance Agencies Managements in China ("Taikang"). Subsequent to the signing of the Agreement, Taikang became an affiliate of the Company on July 22, 2004, as a result of entering into a stock purchase agreement with the Company.

Grace Motion, Inc. a company in which a director of the Company has a beneficial interest, was paid a consulting fee amounting to US \$37,180.

The Company advance \$5,327 to a company in which a shareholder of the Company has a beneficial interest. The advances are non-interest bearing and are payable on demand.

A personal guarantee was granted from Mr. Gary Lam for the lease of an automobile for \$76,923.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To The Stockholders  
Telecom Communications, Inc.

We have audited the accompanying consolidated balance sheet of Telecom Communications Inc. and Subsidiaries as of September 30, 2004, and the related consolidated statements of operations, stockholders' equity (deficit), and cash flows for the year then ended. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an

Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

opinion on these consolidated financial statements based on our audits.

We conducted our audit in accordance with generally accepted auditing standards as established by the AICPA's Auditing Standards Board and in accordance with the standards of the Public Company Accounting Oversight Board (United States of America). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Telecom Communications, Inc. and Subsidiaries as of September 30, 2004, and the results of their operations and their cash flows for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

TELECOM COMMUNICATIONS, INC.  
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
 SEPTEMBER 30, 2004

1. BUSINESS DESCRIPTION AND ORGANIZATION

THE COMPANY

Telecom Communications, Inc. (the "Company" or "Telecom") was incorporated on January 6, 1997 in the State of Indiana under the corporate name MAS Acquisition XXI Corp. Prior to December 21, 2000, the Company was a blank check company seeking a business combination with an unidentified business. On December 21, 2000, the Company acquired Telecom Communications of America, which was a sole proprietorship conducting business as a provider of long distance telephone carriers to individuals. This acquisition gave the Company the ability to provide low cost access to long distance carriers for individuals needing to call Latin and South America. The Company's long distance business operated over the Internet. In addition, the Company also provided various services such as check cashing, money wiring, the sale of bus tokens and passes, and the sale of California lottery tickets. Upon making this acquisition, the Company changed its name to Telecom Communications, Inc.

ACQUISITION OF THE OPERATING SUBSIDIARY AND THE SHARE EXCHANGE

In September 2003, the Company discontinued its above operations and on September 30, 2003, Telecom consummated a Stock Purchase Agreement with Arran Services Limited ("Arran") and its sole shareholder (the "majority shareholder"), for the acquisition of all of the capital stock of Arran, a British Virgin Islands corporation. In exchange for the capital interest, the majority shareholder and his designate received a total of 23.8 million shares of Telecom's common stock, representing approximately 64% of the outstanding shares of Telecom. On the closing of the Stock Purchase Agreement, the majority shareholder was elected chairman and CEO of the Company.

Telecom conducts all of its business in China through Arran's subsidiary IC Star MMS Limited ("IC Star"). IC Star (formerly known as Sino Super Limited) was an 80% owned China-based local information and services affiliate network. Established in December 1991, IC Star links entertainment and lifestyle information to local communities across China.

On March 16, 2004, the Company acquired from Auto Treasure Holdings Limited, an entity 100% owned by the majority shareholder, the remaining 20% interest of IC Star for a consideration of 9,889,000 shares of Telecom common stock and

## Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

10,000,000 warrants to purchase 10,000,000 shares of Telecom common stock at \$2 per share. As a result, as of March 16, 2004, Telecom owned 100% of IC Star. This transfer was deemed to be a transfer between entities under common control and was therefore recorded on the Company's records at its historical cost basis. In connection with the new issuance of 9,889,000 shares of Telecom common stock and 10,000,000 warrants (expire March 15, 2006), the excess of the purchase consideration of \$8,322,295 over the book value of the net assets of \$195,378 acquired amounted to \$8,126,917 and was recorded in the consolidated

F-8

### TELECOM COMMUNICATIONS, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS SEPTEMBER 30, 2004

statement of operations as acquisition expense. On December 15, 2003, the Company formed Alpha Century Holdings Limited ("Alpha") which is a wholly owned subsidiary registered in the British Virgin Islands and was formed for investment holdings. On March 31, 2004, Arran sold its interest in Huiiri Electric (Panyu) Limited ("Huiiri") to Alpha for approximately \$13,000. Panyu No.6 Construction Company ("Panyu"), was a 60% owned subsidiary located in Guangzhou, China, and its business was an integrated construction company. Panyu is focused on both general construction as well as the construction of network infrastructure for residential, industrial, cultural and commercial building communities. The Company sold Panyu on April 16, 2004 (refer to note 5). For the year ended September 30, 2003, all operating activity and financial results of the Company are related to Panyu. Panyu's operating results for the years ended September 30, 2004 and 2003 are shown as Discontinued Operations.

#### CONTROL BY PRINCIPAL STOCKHOLDERS

The directors, executive officers and their affiliates or related parties, own beneficially and in the aggregate, the majority of the voting power of the outstanding shares of the common stock of the Company. Accordingly, the directors, executive officers and their affiliates, if they voted their shares uniformly, would have the ability to control the approval of most corporate actions, including increasing the authorized capital stock of the Company and the dissolution, merger or sale of the Company's assets or business.

#### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

##### PRINCIPLES OF CONSOLIDATION AND BASIS OF PRESENTATION

The consolidated financial statements of the Company, include the accounts of Telecom, Arran, Alpha, IC Star and Huiiri. The consolidated statements have been prepared in accordance with accounting principles generally accepted in the United States of America. All significant intercompany transactions have been eliminated.

The Company has determined Hong Kong dollars to be the functional currency of IC Star, and the People's Republic of China Chinese Yuan Renminbi, to be the functional currency of Panyu. There were no material gains or losses or effect of exchange rate changes on cash recognized as a result of translating foreign currencies to the U.S. dollars due to the stability of the currency. No assurance however, can be given as to the future valuation of the foreign currencies and how further movements in the foreign currencies could affect future earnings of the Company.

The balance sheets of all foreign subsidiaries were translated at period end

Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

exchange rates. All of the Company's material long-lived assets are located in

F-9

TELECOM COMMUNICATIONS, INC.  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
SEPTEMBER 30, 2004

the People's Republic of China at September 30, 2004. Expenses were translated at exchange rates in effect during the year, substantially the same as the period end rates.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - (CONT'D)

CASH AND CASH EQUIVALENTS

For purpose of the cash flow statements, the Company considers all highly liquid investments with original maturities of three months or less at time of purchase to be cash equivalents.

TRADE ACCOUNTS RECEIVABLE

Trade accounts receivable are recorded at the invoiced amount and do not bear interest. The allowance for doubtful accounts represents the Company's best estimate of the amount of probable credit losses in the existing accounts receivable balance. The Company determines the allowance for doubtful accounts based upon historical write-off experience and current economic conditions. The Company reviews the adequacy of its allowance for doubtful accounts on a regular basis. Receivable balances past due over 90 days, which exceed a specified dollar amount, are reviewed individually for collectibility. Account balances are charged off against the allowance after all means of collection have been exhausted and the potential for recovery is considered remote. The Company does not have any off-balance sheet credit exposure related to its customers.

PROPERTY AND EQUIPMENT

Property and equipment are recorded at cost. Depreciation is calculated using the straight-line method over the expected useful life of the asset. The Company generally uses the following depreciable lives for its major classifications of property and equipment:

DESCRIPTION	USEFUL LIVES
COMPUTER HARDWARE	3 YEARS
COMPUTER SOFTWARE	3 YEARS

F-10

TELECOM COMMUNICATIONS, INC.  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
SEPTEMBER 30, 2004

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - (CONT'D)

IMPAIRMENT OF LONG-LIVED ASSETS

## Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

Long-lived tangible assets and definite-lived intangible assets are reviewed for possible impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. The Company uses an estimate of undiscounted future net cash flows of the assets over the remaining useful lives in determining whether the carrying value of the assets is recoverable. If the carrying values of the assets exceed the expected future cash flows of the assets, the Company recognizes an impairment loss equal to the difference between the carrying values of the assets and their estimated fair values. Impairment of long-lived assets is assessed at the lowest levels for which there are identifiable cash flows that are independent from other groups of assets. The evaluation of long-lived assets requires the Company to use estimates of future cash flows. However, actual cash flows may differ from the estimated future cash flows used in these impairment tests.

### RELATED PARTY AND STOCKHOLDERS' LOANS

The caption "Due to related party" are loans that are unsecured, non-interest bearing and have no fixed terms of repayment, and therefore, are deemed payable on demand.

### USE OF ESTIMATES

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

### SIGNIFICANT ESTIMATES

Several areas require management's estimates relating to uncertainties for which it is reasonably possible that there will be a material change in the near term. The more significant areas requiring the use of management estimates related to valuation of the useful lives of the Company's equipment and valuation of tax and other contingent liabilities and the valuation of the stock warrants and options issued and outstanding.

F-11

TELECOM COMMUNICATIONS, INC.  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
SEPTEMBER 30, 2004

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - (CONT'D)

### LOSS PER SHARE

Basic loss per common share ("LPS") is calculated by dividing net loss by the weighted average number of common shares outstanding during the period. Diluted earnings per common share are calculated by adjusting the weighted average outstanding shares, assuming conversion of all potentially dilutive stock options.

### REVENUE RECOGNITION

## Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

The Company recognizes revenue when there is persuasive evidence of an arrangement, delivery has occurred, the fee is fixed or determinable, collectibility is reasonably assured, and there are no substantive performance obligations remaining.

### FOREIGN CURRENCY TRANSLATION

Transactions and balances originally denominated in U.S. dollars are presented at their original amounts. Transactions and balances in other currencies are converted into U.S. dollars in accordance with Statement of Financial Accounting Standards (SFAS) No. 52, "Foreign Currency Translation," and are included in determining net income or loss.

For foreign operations with the local currency as the functional currency, assets and liabilities are translated from the local currencies into U.S. dollars at the exchange rate prevailing at the balance sheet date. Revenues, expenses and cash flows are translated at the average exchange rate for the period to approximate translation at the exchange rate prevailing at the dates those elements are recognized in the financial statements. Translation adjustments resulting from the process of translating the local currency financial statements into U.S. dollars are included in determining comprehensive loss.

The functional currency of the Company's Chinese subsidiary, IC Star, is the Hong Kong dollar (HKD), and for its subsidiary, Panyu No. 6 Construction Company Limited, Chinese Renminbi (RMB), is the local currency. The financial statements of the subsidiaries are translated to United States dollars using year-end rates of exchange for assets and liabilities, and average rates of exchange for the period for revenues, costs, and expenses. Net gains and losses resulting from foreign exchange transactions are included in the consolidated statements of operations. The cumulative translation adjustment and effect of exchange rate changes for the year ended September 30, 2004 was \$7,299.

F-12

TELECOM COMMUNICATIONS, INC.  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
SEPTEMBER 30, 2004

### COMPREHENSIVE LOSS

Comprehensive loss includes changes to equity accounts that were not the result of transactions with shareholders. Comprehensive loss is comprised of net loss and other comprehensive income and loss items. The Company's comprehensive income and losses generally consist of changes in the fair value of changes in the cumulative foreign currency translation adjustment.

### INCOME TAXES

Income taxes are accounted for under the asset and liability method in accordance with SFAS No. 109 "Accounting for Income Taxes". Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

## Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

Deferred tax assets are reduced by a valuation allowance to the extent that the recoverability of the asset is not considered to be more likely than not. The Company did not provide any current or deferred income tax provision or benefit for any periods presented to date because it has experienced a net operating loss since inception and other than the net operating loss, has no other deferred tax assets or liabilities.

### STOCK-BASED COMPENSATION

The Company accounts for stock options issued to employees in accordance with the provisions of Accounting Principles Board ("APB") Opinion No. 25, "Accounting for Stock Issued to Employees," and related interpretations. As such, compensation cost is measured on the date of grant as the excess of the current market price of the underlying stock over the exercise price. Such compensation amounts, if any, are amortized over the respective vesting periods of the option grant. The Company adopted the disclosure provisions of SFAS No. 123, "Accounting for Stock-Based Compensation" and SFAS 148, "Accounting for Stock-Based Compensation -Transition and Disclosure", which permits entities to provide pro forma net income (loss) and pro forma earnings (loss) per share disclosures for employee stock option grants as if the fair-valued based method defined in SFAS No. 123 had been applied. The Company accounts for stock options and stock issued to non-employees for goods or services in accordance with the fair value method of SFAS 123.

F-13

TELECOM COMMUNICATIONS, INC.  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
SEPTEMBER 30, 2004

### 3. PROPERTY AND EQUIPMENT

Property and equipment, which is located in China, consisted of the following at September 30, 2004:

Computer hardware	451,521
Computer software	1,980,000
	-----
	2,431,521
Less: accumulated depreciation	(222,896)
	-----
	2,208,625
	=====

### 4. RELATED PARTY TRANSACTIONS

An officer of the Company or companies owned by this officer advanced funds to the Company for working capital purposes. At September 30, 2004, the Company owed this officer or his companies \$165,343. The advances are non-interest bearing and are payable on demand and are shown as a current liability. On April 16, 2004, the Company sold its 60% interest in Panyu to Aries Vision Technology Limited ("Aries"), a related party, for approximately \$2,580,390. Approximately \$2,095,128 is payable to the majority shareholder and the remaining \$483,234 to Arran. Loss on disposal amounted to \$138,277. On May 3, 2004, Alpha Century Holdings Limited ("ACH") a wholly owned subsidiary of Telecom Communications, Inc., (the "Company") entered into the Software ASP Reseller Agreement (the "Agreement") with Taikang Capital Managements

## Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

Corporation d/b/a Taikang Insurance Agencies Managements in China ("Taikang"). Subsequent to the signing of the Agreement, Taikang became an affiliate of the Company on July 22, 2004, as a result of entering into a stock purchase agreement with the Company. Grace Motion, Inc. a company in which a director of the Company has a beneficial interest, was paid a consulting fee amounting to US \$37,180.

A personal guarantee was granted from an officer for the lease of an automobile for \$76,923.

The Company advanced \$5,327 to a company in which a shareholder of the Company has a beneficial interest. The advances are non-interest bearing and are payable on demand.

### 5. LEASE OBLIGATIONS

#### Operating Leases

Lessee Costs - In the normal course of business, the Company leases office space and data centers under noncancelable operating lease agreements. The Company

F-14

TELECOM COMMUNICATIONS, INC.  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
SEPTEMBER 30, 2004

rents office space, primarily for regional sales administration offices, in commercial office complexes that are conducive to administrative operations. The majority of the Company's data centers are leased in different locations to computer servers storage with hosting and facility services. These operating lease agreements generally contain renewal options that may be exercised at the Company's discretion after the completion of the base rental term. In addition, many of the rental agreements provide for regular increases to the base rental rate at specified intervals, which usually occur on an annual basis. At September 30, 2004, the Company had operating leases that have remaining terms of one year. The following table summarizes the Company's future minimum lease payments under operating lease agreements at September 30, 2004 :

YEAR ENDED SEPTEMBER 30,	
-----	
2005	\$17,036 =====

The Company recognizes lease expense on a straight-line basis over the life of the lease agreement. Contingent rent expense is recognized as it is incurred. Total rent expense in continuing operations from operating lease agreements was \$27,699 and \$ 5,400, for fiscal years 2004 and 2003.

### 6. CONTINGENT LIABILITIES

During the year, the Company was involved in a lawsuit brought by third parties claiming for unspecified damages for alleged breach of contract and an injunction to restrain them from using items with entertainment content. The Company intends to contest the claims strongly and, while the final outcome of

## Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

the proceedings is uncertain, it is the management's opinion that the ultimate liability, if any, will not have a material impact upon the Company's financial position. Accordingly, no provision for these claims has been made in the accompanying financial statements.

### 7. STOCK TRANSACTIONS

On July 22, 2004, the Company entered into a stock purchase agreement (the "Purchase Agreement") with Taikang Capital Managements Company ("Taikang"), under which the Company has agreed to issue and sell to the purchasers in a private placement 7,500,000 shares of the Company's Common Stock, par value

F-15

TELECOM COMMUNICATIONS, INC.  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
SEPTEMBER 30, 2004

\$.001 per share for an aggregate purchase price of \$1,500,000. Simultaneous with this transaction, Taikang converted the \$500,000 Convertible Promissory Note into 2,500,000 shares of Common Stock. On April 12, 2004, the Company issued 2,600,000 shares at market price of \$.62 to the various employees and consultants resulting in an expense of \$1,612,000. On June 17, 2004, the Company issued 400,000 shares at a market price of \$.32 to a consultant resulting in an expense of \$128,000. Total shares issued for services rendered was 1,740,000.

### 8. INCOME TAXES

The Company accounts for income taxes in accordance with the provisions of SFAS No. 109, "Accounting for Income Taxes."

Income tax expense is based on reported income before income taxes. Deferred income taxes reflect the effect of temporary differences between assets and liabilities that are recognized for financial reporting purposes and the amounts that are recognized for income tax purposes. In accordance with SFAS No. 109, "Accounting for Income Taxes", these deferred income taxes are measured by applying currently enacted tax laws.

There are net operating loss carryforwards allowed under the Hong Kong and China's governments' tax systems. In China, the previous five years net operating losses are allowed to be carried forward five years to offset future taxable income. In Hong Kong, prior years net operating losses can be carried forward indefinitely to offset future taxable income. The Company has available approximately \$ 49,037 of unused operating loss carryforwards and based on a 30% tax rate has a deferred tax asset of approximately \$14,711. The Company recorded a valuation allowance for the same amount at September 30, 2004.

The company will withhold and pay income taxes on its employees' wages, which funds the Chinese government's sponsored health and retirement programs of all the employees.

### 9. DISCONTINUED OPERATIONS

During the year, the Company sold the operations of Panyu. Under the provisions of SFAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets, the financial results of these operations were classified as discontinued operations in the accompanying consolidated statements of operations, net of tax, in 2004. The net income (loss) from discontinued operations consisted of

# Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

the following during the year:

F-16

TELECOM COMMUNICATIONS, INC.  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
SEPTEMBER 30, 2004

Total pre-tax profit from discontinued operations	607,436
Total income tax provision from discontinued operations	(89,076)
	-----
Income from discontinued operations, net of income tax	\$ 518,360
	=====

## 10. RECENT ACCOUNTING PRONOUNCEMENTS

In July 2002, the FASB issued SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities. This statement addresses financial accounting and reporting for costs associated with exit or disposal activities and nullifies Emerging Issues Task Force ("EITF") Issue No. 94-3, Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring). This statement applies to costs associated with an exit activity that does not involve an entity newly acquired in a business combination or with a disposal activity covered by SFAS No. 144. These costs include, but are not limited to, termination benefits provided to current employees that are involuntarily terminated under the terms of a benefit arrangement that, in substance, is not an ongoing benefit arrangement or an individual deferred compensation contract, costs to terminate a contract that is not a capital lease and costs to consolidate facilities or relocate employees. This statement does not apply to costs associated with the retirement of a long-lived asset covered by SFAS No. 143, Accounting for Asset Retirement Obligations. This statement was adopted effective January 1, 2004, and it did not have an impact on the Company's current financial position or its results of operations.

On December 31, 2002, the FASB issued SFAS No. 148, Accounting for Stock-Based Compensation - Transition and Disclosure. SFAS No. 148 amends SFAS No. 123, Accounting for Stock-Based Compensation, to provide alternative methods of transition to SFAS No. 123's fair value method of accounting for stock-based employee compensation. SFAS No. 148 also amends the disclosure provisions of SFAS No. 123 and APB Opinion No. 28, Interim Financial Reporting, to require disclosure in the summary of significant accounting policies of the effects of an entity's accounting policy with respect to stock-based employee compensation on reported net income and earnings per share in annual and interim financial statements. While SFAS No. 148 does not amend SFAS No. 123 to require companies to account for employee stock options using the fair value method, the disclosure provisions of SFAS No. 148 are applicable to all companies with stock-based employee compensation, regardless of whether they account for that compensation using the fair value method of SFAS No. 123 or the intrinsic value method of APB Opinion No. 25. The Company adopted the required disclosure

Edgar Filing: TELECOM COMMUNICATIONS INC - Form 10KSB

provisions of SFAS No. 148 effective January 1, 2003, and its application did

F-17

TELECOM COMMUNICATIONS, INC.  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
SEPTEMBER 30, 2004

not have an impact on the Company's current financial position or its results of operations.

In May 2003, the FASB issued SFAS No. 150, Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity. SFAS No. 150 establishes standards for how companies classify and measure certain financial instruments with characteristics of both liabilities and equity. It requires companies to classify a financial instrument that is within its scope as a liability (or an asset in some circumstances). SFAS No. 150 is effective beginning with the second quarter of fiscal 2004. This statement was adopted effective January 1, 2004, and it did not have an impact on the Company's current financial position or its results of operations.

11. CAPITAL COMMITMENT

As of the balance sheet date, the Company has a capital commitment on a purchase of motor vehicles for an aggregate purchase price of USD \$84,617.

12. SUBSEQUENT EVENTS

On October 7, 2004, Telecom entered into a stock purchase agreement with Taikang, an affiliate of the Company, for the purchase of 10,000,000 shares of the Company's common stock, par value \$.001 per share for an aggregate purchase price of \$2,000,000.
