CVRD s performance in the second quarter of 2005****BOVESPA: VALE3, VALE5****NYSE: RIO, RIOPR****LATIBEX: XVALO, XVALP**

Rio de Janeiro, August 10, 2005 - Excellence in strategy execution, supported mainly by discipline in capital allocation, has enabled CVRD to successfully take advantage of the opportunities offered by the long cycle of mining and metals. The results of the second quarter of 2005 (2Q05) reflect this process, with the achievements of new records: shipments of iron ore and pellets, gross revenues, operational performance, cash generation and net earnings. The quality of the result is highlighted by production records 112.157 million tons of iron ore in 1H05, capital expenditure of US\$ 2.5 billion in the last 12 months and the achievement of the investment grade rating.

62.386 million tons of iron ore and pellets shipped in 2Q05, beating the 4Q04 record of 61.824 million tons.

Gross revenues of US\$3.721 billion, 53.3% higher than the previous quarterly record, of US\$2.428 billion for 4Q04.

Operating profit, measured by adjusted EBIT⁽¹⁾, reached US\$1.771 billion, 112.9% more than in 2Q04.

Adjusted EBIT margin of 50.1%, 680 basis points (bp) higher than the previous record of 43.3% in 2Q04.

Adjusted EBITDA⁽²⁾, at US\$2.033 billion, more than doubled the value of 2Q04, passing the US\$2 billion mark for the first time in CVRD s history.

LTM adjusted EBITDA amounted to US\$5.034 billion, showing its thirteenth consecutive quarter of growth.

Net earnings of US\$ 1.630 billion, 223.4% yoy growth, and 72.9% higher than the previous record of US\$ 943 million, registered in 3Q04.

SELECTED FINANCIAL INDICATORS

	2Q04	1Q05	2Q05	1S04	US\$ million 1S05

US GAAP

BUSINESS OUTLOOK

The global economy appears to be close to completion of a transition toward a more sustainable long-term rate of expansion. In spite of the adverse effect of the shock in oil prices whose persistence at high levels, indeed, reflects the strength of demand there are good indications that the world economic growth is robust and should continue over the coming quarters.

In 2Q05 the US economy completed its ninth consecutive quarter with an annual expansion rate above 3%. At the same time, China's annualized GDP growth rate has been above 9% since 3Q03 and was 9.5% in 2Q05.

Leading indicators of manufacturing industry activity are showing signals that suggest a strong recovery, as new wholesale orders, production, purchasing orders/inventories have been growing significantly since June.

There was substantial accumulation of inventories in the US in 4Q04 and 1Q05, leading companies to reduce them in 2Q05. Therefore, the ISM (Institute of Supply Management) indicator for the industry reached in May 2005 its lowest point of a downtrend which begun in 2Q04. Since then, its behavior reversed markedly, indicating acceleration of industrial growth in the next two quarters.

The adjustment in the US economy coincided with a similar industrial movement in other important economies, in terms of consumption of inventories of commodities and processed raw materials, which had reached excessive levels in response to the increase in prices and supply-side uncertainties in 2004.

With this phase completed, there is a recovery in the Purchasing Manager Indices (PMIs) in practically all the world's regions, suggesting the start of a globally synchronized recovery in economic activity. This synchronization had been broken down since the middle of 2004, with the slow growth of Japan and the Eurozone.

The dynamics of the cycle now translate into new purchase orders, increased international trade flows, industrial growth, and recovery in commodity prices. Symptomatically, copper prices reached 20-year record highs in June and July, and primary aluminum prices interrupted their downtrend initiated since last March, accumulating a fall of 15.5% until the first week of July.

In the steel industry, the International Iron and Steel Institute (IISI) figure of 7.6% for global expansion of production in the first half of the year hides the disparity between the very strong Chinese growth of 28.3% and a soft patch in the rest of the world, where production increased by only 0.6%, as a result of the marginal cuts since February. Indeed, building of inventories in the hands of consumers of steel products forced the industry to slow down production, primarily in the EU and North America where crude steel output decreased, respectively, by 1.7% and 2.6%.

In the developing economies, which are less subject to cyclical variations, being China and India typical examples, steel production continued to grow vigorously, with increases of 28.3% and 12%, respectively, in the first half of 2005.

In the coming months we expect to see the differences between steel production growth in the various regions of the world diminishing with more moderate expansion in China, where there appears to be a short term excess supply in long steels, and a recovery in the European Union and the US, reflecting the reduction of inventories over recent months. It is important to point out that the urbanization process in large scale in China is expected to continue for at least the next 10 years. Thus, strong demand for long steel, used in civil construction, should prevail.

2Q05

Table of Contents

US GAAP

In China, fixed assets investments, a good leading indicator for steel consumption, has been growing at annual rates above 25% since March, and was 27.1% in June. Thus, the strong outlook for consumption combined with the probably more moderate increase in production indicates lower availability for exports, setting the stage for a recovery in steel production in other regions of the world.

A scenario in which there is persistent economic growth in China, strengthening of the US, European and Japanese economies, and a slow response from supply given the restraints on supply of equipment, makes it possible to foresee lengthening of the present mining and metals cycle.

The continuity of the global economic growth with strong liquidity in the financial markets and solid demand for commodities tends to benefit Brazil and sustain the appreciation of the Real against the US dollar.

As a result of the performance of steel production, Chinese imports of iron ore reached 131.2 million tons in the first half of 2005 (1H05), 34.1% higher yoy. China's volume of imports in 1H05 was equal to the annual imports of the whole of the European Union, for example.

In spite of record imports, inventories of iron ore in the Chinese ports in July continued to be low. Spot market prices started rising again, remaining above benchmark prices. Thus, all the signs indicate that excess global demand for iron ore will continue.

In July, the China National Development & Reform Commission issued its *Steel Industry Development Policy*, aiming to restructure the steel industry turning it more efficient and competitive in the global market. The steel industry in China is still very fragmented: according to the China Iron & Steel Association (CISA) in 2004 there were 871 steel mills in operation, but only 15 with capacity of 5 million tons per year or more, and the top 10 companies were producing 35% of the total output. The Chinese government's target is to increase this percentage to 50% in 2005 and 70% in 2010, through mergers and expansion of the more competitive operations.

Since the directives of the new policy do not apply to projects that have already been approved, we believe their effects will not be felt in the short term. It is possible, however, to predict that the focus on consolidation, productivity gains and product quality improvements will tend to benefit an iron ore supplier such as CVRD, which has large scale, high quality products, capacity to develop specific solutions, and whose clients are among the players with the largest scale, financial capacity and advanced technological development.

The market for alumina continues to show signs of disequilibrium between supply and demand. Chinese imports in 1H05 were 3.7 million tons, 30% more than in 1H04, and prices have passed the US\$ 400/ton mark. Our expectation is that this scenario will not change significantly over the next 18 months.

The situation in the ferro alloys market is different from that of the other mineral products. After a strong rise which began in 4Q03, prices entered a downtrend starting around the middle of 2004, with the exception of medium carbon ferro-manganese alloy, whose price fall is more recent, becoming pronounced in 1Q05.

The imbalance in the alloys market was caused by the strong expansion of capacity which, according to data from the International Manganese Institute, was 12.3% in 2003 and 15.4% in 2004 and in global production, which grew 20% in 2004, put in place mainly by the higher-cost, non-integrated producers. The expansion of Chinese production from 20% of global alloys production in 2000 to 35% in

2Q05

Table of Contents

US GAAP

2004, supported by a considerable increase in imports of manganese ore since 2001 was a key factor in this context of excess supply.

Due to the context of accumulation of inventories and falling prices, CVRD is shutting down temporarily the two furnaces of its Mo I Rana plants, in Norway, and running the Dunkerque unit, in France, at half-capacity these two actions should reduce the company's output of alloys by an estimated 200,000 tons in an annualized basis. At the same time, other players are also reducing production, some recently re-activated plants are being closed, and the Chinese government is eliminating export incentives.

As a consequence, we expect alloy prices to stabilize in the near future. Manganese ore and ferro alloys provided 4.2% of CVRD's total sales revenue in 2Q05.

IMPORTANT RECENT EVENTS

CVRD rated investment grade

On July 8, Moody's Investors Service upgraded CVRD foreign currency rating from Ba1 to Baa3. According to Moody's rating scale, Baa3 qualifies the Company as a moderate credit risk issuer, without speculative elements, corresponding to investment grade.

The upgrade of CVRD's rating is a landmark in its growth path, characterized by the Company's strong commitment to shareholder value creation. CVRD is the first Brazilian company to obtain the investment grade rating.

Dividend payment

On April 29, CVRD distributed to its shareholders a total of US\$ 500 million, equivalent to US\$ 0.435 per share, as the first installment of the minimum dividend for the year of 2005, set at US\$ 1.0 billion.

Payment of the second tranche of the minimum dividend is scheduled for October 31.

Development of the Vermelho nickel project approved

In July, CVRD's Board of Directors gave the go-ahead for development of the Vermelho nickel project, located in the Carajás mineral province, in the Brazilian state of Pará. This project will mark the Company's entry into the global nickel market. The Vermelho project will have production capacity for approximately 46,000 tons per year (tpy) of metallic nickel and 2,800 tpy of cobalt. The useful life of the project is estimated to be 40 years.

The estimated investment is up to US\$ 1.2 billion, with startup scheduled for the fourth quarter of 2008.

CVRD begins mineral exploration in Australia

In July CVRD signed agreement with the Australian mining companies Aquila Resources Limited and AMCI Holdings for an exploration study of the Belvedere Coal Underground Project (Belvedere). Belvedere is an estimated 2.7 billion ton hard coking coal resource located in the state of Queensland, Australia.

At the conclusion of the pre-feasibility study, CVRD has the option to acquire a 51% interest in Belvedere at a price of US\$ 90 million. CVRD has further options to increase its stake in the project up to 100% by acquiring its partners interests at a fair market value determined at the time of the exercising of each option.

With this project, CVRD now has mineral exploration investments in four continents: South America, Africa, Asia and Australasia.

2Q05

Table of Contents

US GAAP

First iron ore shipment to Ukraine

In August, CVRD concluded its first iron ore shipment to Ukraine. Ukraine is the world seventh largest steel producer. This shipment represents the conquest of a new frontier of the iron ore seaborne market.

Divestment of QCM

CVRD's subsidiary Caemi sold its shareholding in Quebec Cartier Mining Company (QCM), an iron ore and pellets producer with operations in Quebec, Canada, for US\$ 125 million, to Dofasco Inc, on July 22.

This transaction completed CVRD's compliance with its undertakings to the antitrust authorities of the European Union.

NEW RECORD OF REVENUES: US\$ 3.7 BILLION

CVRD's gross revenues in 2Q05, of US\$ 3.721 billion, was 83.0% higher yoy, and exceeded the previous quarterly revenue record of US\$ 2.428 billion achieved in 4Q04. The increase of US\$ 1.688 billion in comparison to 2Q04 is mainly due to higher sales prices (85%), of which US\$ 1.294 billion was related to the annual price increase of iron ore and pellets.

Increase in volume sold contributed US\$ 261 million for the revenues increase US\$ 190 million of this coming from iron ore and US\$ 63 million from copper concentrate, which began to be shipped to clients only in June 2004.

Ferrous minerals accounted to 78.2% of gross revenues, aluminum products 8.8%, logistics services 8.5% and non-ferrous minerals 4.5%.

The main destinations of CVRD's sales in the 1Q05 were: Europe (30.9%), Brazil (27.2%) and Asia (24.8%). Of the total revenue of US\$ 1.013 billion accounted as sales to the Brazilian market, US\$ 216 million were sales of pellet feed to the Tubarão joint ventures (Nibrasco, Itabasco, Hispanobras and Kobrasco), which process them into pellets and sell to other markets. After Brazil itself, China was the Company's largest single destination market, representing 11.6% of total revenues.

Ferrous minerals

Record shipments of iron ore and pellets

In 2Q05 CVRD shipped 62.386 million tons of iron ore and pellets, 11.8% more than in 2Q04, and 0.9% higher than the previous quarterly record (4Q04), of 61.824 million tons.

Shipments of iron ore totaled 56.167 million tons, and shipments of pellets totaled 6.219 million tons. The reduction in pellet sales in comparison with the 7.459 million tons shipped in 2Q04 was due to the maintenance stoppage at the São Luís plant, whose production was reduced by 472,000 tons in 2Q05, and distribution of shipments between quarters of the year. Thus, total shipments of pellets in 1H05, 13.532 million, were only marginally less than the total of 13.584 million in 1H04.

In 2Q05, CVRD purchased 4.140 million tons of iron ore from other mining companies located in the Iron Ore Quadrangle in the Brazil's State of Minas Gerais to complement its own production in the quarter a new record, of 60,692 million tons and enable it to fulfill client contracts. Total purchases from third party suppliers in 1H05 were 8.496 million tons, 10.5% more than the 7.687 million tons of 1H04.

2Q05

Table of Contents**US GAAP**

Of the total of iron ore and pellets sold in 2Q05, 11.747 million tons or 18.8% went to China, 10.4% to Germany, 10.0% to Japan, 5.0% to Italy and 4.6% to France.

Sales to Brazilian steelmakers and pig iron producers totaled 9.038 million tons, 14.5% of total shipments; and shipments to the Tubarão joint ventures were 5.359 million tons, 8.6% of the total.

CVRD's average sale prices in 2Q05 were US\$ 38.58 per ton for iron ore and US\$ 90.69 per ton for pellets, an yoy growth of 97.8% and 121.8%, respectively. It should be noted that 2Q05 revenues contains approximately 90% of the retroactive adjustment for the January – March period for price increases. This adjustment distorts the figure for the average price in the period.

Sales of manganese ores amounted to 194,000 tons, 4.4% less yoy and 2.0% less qoq, mainly reflecting reduction in Chinese demand.

Sales of ferro alloys reached 147,000 tons, 7.3% more than in 2Q04, and 11.4% more than in the previous quarter. The average price of manganese ore was US\$ 97.94 per ton, 3.0% down from 1Q05, and maintaining the downtrend, which started in 4Q04 – but still 80.7% higher than the price level of 2Q04. The reduction in price was more accentuated in ferro alloys: this quarter's average price of US\$ 939 per ton was 12.7% less than in 1Q05 and 6.7% less than in 2Q04.

The global market for alloys is in a typical oversupply phase, after production growth of 20% in 2004. With the accumulation of inventories and falling prices, CVRD has decided to shut down temporarily its Mo I Rana plants in Norway, and reduce capacity utilization at Dunkerque, France, to 50% – these actions together will reduce output of alloys by an estimated 200,000 tons in an annualized basis.

Various swing producers' plants with high costs, which produce at the top of the cycle and close in the low part of the cycle – have shut down operations due to the price fall, and, therefore, the rate of production growth fell in 1Q05, from 20% to 15% per year. Supply – and as a result, prices – are expected to stabilize in the coming quarters.

CVRD's sales of ferrous minerals – iron ore, pellets, manganese and ferro alloys in 2Q05 was US\$ 2.908 billion, 103.9% higher than 2Q04, US\$ 1.426 billion, and 81.3% more than 1Q05, US\$ 1.604 billion.

Iron ore shipments produced revenues of US\$ 2.167 billion, pellets US\$ 564 million, operating services for the Tubarão pelletizing plants US\$ 6 million, manganese ore US\$ 19 million and ferro alloys US\$ 138 million.

The aluminum chain

Given the stabilization of the production capacity in the short term, there were no remarkable changes in the quarterly sales volumes of bauxite, alumina and aluminum. Considerable portion of the quarter variations was caused by reschedule of shipments.

Sales of bauxite were 475,000 tons in the quarter, compared to 361,000 tons in 1Q05 and 365,000 in 2Q04.

Alumina sales volume was 402,000 tons, 19.6% higher than the 336,000 tons produced in 2Q04, but 15.9% lower than the volume produced in 1Q05.

CVRD's sales volume of primary aluminum, 110,000 tons, was in line with its 109,000 tons sold in 1Q05, and slightly lower than the 119,000 tons sold in 2Q04.

2Q05

Table of Contents

US GAAP

The operational improvements in the Barcarena smelter increased the production of primary aluminum to 220,000 tons in 1H05, enabling CVRD to benefit from the increase in prices.

CVRD's average selling prices in 2Q05 were US\$ 27.37 per ton for bauxite, US\$ 274 per ton for alumina and US\$ 1,855 per ton for aluminum. Compared to average prices for 2Q04, these prices were 24.9% higher for bauxite, 10.8% higher for alumina and 12.6% higher for primary aluminum.

Revenues from aluminum products in 2Q05 totaled US\$ 327 million, 13.2% more than the 2Q04 revenues of US\$ 289 million. The increase in prices of products was responsible for 86.8% of this difference.

Copper

CVRD sold 105,000 tons of copper concentrate in 2Q05, 20,000 tons more than in the previous quarter, 85,000 tons, and 71,000 tons more than in 2Q04, when shipments began.

Output of the Sossego copper mine continues to be lower than programmed, since the drilling equipments acquired this year have not yet been delivered – delivery is now expected in the second half of the year. The resulting expected production of copper in concentrate in 2005 should be approximately 130,000 tons.

The average price of copper concentrate in 2Q05, US\$ 886 per ton, was 25.5% more than in 2Q04, US\$ 706 per ton, and slightly higher than the average price of US\$ 882 per ton in 1Q05. LME copper prices continue to be at record levels, reflecting strong Chinese demand, the slowdown in the increase of smelters' production, and the extremely low level of reported inventories.

CVRD's revenue from copper concentrates in the quarter was US\$ 93 million. This was US\$ 69 million more than in 2Q04. The volume increase was responsible for 91% of this increase in revenue, and higher prices for 9%.

Industrial minerals

The Company sold 303,000 tons of kaolin in 2Q05, which compares to 293,000 tons in 2Q04, and 280,000 tons in 1Q05. The increase reflects new contracts with clients as already anticipated.

CVRD's average sale price of kaolin in 2Q05 was US\$ 149 per ton, an increase of 6.6% qoq and of 11.6% yoy. Sales revenues were US\$ 45 million, which exceeded the sales revenue of 2Q04 and 1Q05 – US\$ 39 million in both quarters by US\$ 6 million.

Shipments of potash, 129,000 tons, were 22% less yoy. In the first half of the year, as well as the adverse seasonal effect, Brazilian consumption of potash fell year-on-year for the first time since 1998 due to crop losses caused by the strong drought in the South of Brazil.

In the second half of 2005, with the effects of the drought overcome, and with the planting for the new crop, especially coffee – which uses potash intensively as a soil nutrient – we expect a strong expansion in sales. Such increase will be enabled by the capacity expansion of the Taquari-Vasouras mine. With the ramp-up of the new installations, CVRD should produce 710,000 tons in 2005 against 638,000 in 2004. In 2006, operating at full capacity, estimated production is 850,000 tons of potash.

2Q05

Table of Contents**US GAAP**

The average market price of potash, which is settled in the international market, was US\$ 240 per ton in 2Q05, 28.7% more than in 2Q04 and 10.5% more than in 1Q05.

Sales of potash contributed US\$31 million to CVRD's total revenue in 2Q05.

Logistics

Logistics services generated revenues of US\$ 316 million in 2Q05, 43.6% more than the revenues of US\$ 220 million verified in 2Q04, and 36.2% more than the US\$ 232 million of 1Q05. It provided 8.5% of the Company's total revenues in the quarter.

General cargo carried by the Carajás (EFC), Vitória-Minas (EFVM) and Centro-Atlântica (FCA) railroads contributed with revenues of US\$ 233 million, while port services produced US\$ 59 million, and coastal shipping and port support services US\$ 24 million.

CVRD's railroads transported 7.418 billion net ton kilometers (ntk) of general cargo, an increase of 4.0% against 2Q04, when 7.135 billion ntk were transported. The main types of cargo were agricultural products, 39.9% of the total, steel industry inputs and products 36.3%, and building materials and forest products 6.7%.

The Company's ports and maritime terminals handled 8.336 million tons of general cargo, compared to 7.614 million tons in 2Q04.

OPERATING COSTS AND EXPENSES

Globally, the mining and metals industry is suffering pressures in costs of energy, equipment, parts, various raw materials and labor. At the same time, the currencies of commodity producing countries have appreciated significantly against the US dollar. Although the weakness of the US dollar contributes, over time, to increasing dollar prices of mining and metals, it has a negative, and almost immediate, effect on costs.

Since 70% of CVRD's operational costs and expenses are denominated in Reais, the 18.6% appreciation of the Real against the US dollar from 2Q04 to 2Q05, alone, produced a negative effect of US\$ 169 million in the operational results.

Cost of goods sold (COGS) in 2Q05 was US\$ 1.508 billion, an increase of US\$ 261 million over 1Q05, and US\$ 596 million more than in 2Q04.

The largest individual item in the difference in COGS from 2Q04 was outsourced services – an increase of US\$ 164 million, mainly due to higher sales volumes (US\$ 41 million), the increase in rail freight charges (US\$ 37 million), the appreciation of the Brazilian currency (US\$ 34 million), increased waste material removal in the mines (US\$ 24 million), and higher prices (US\$ 18 million).

Part of CVRD's iron ore production is transported through MRS, which impacts outsourced services expenses. In 2Q05 CVRD spent US\$ 104 million with railroad freights, totaling US\$ 202 million in the first half of the year. To speed up production in the high part of the cycle and prepare reduction of costs for the low part of the cycle, the Company has increased the rate of waste material removal – which is carried out by outsourced service companies. Cost of materials increased by US\$ 130 million, with a strong element from higher costs of spare parts. Besides that, the increase in price of iron ore and pellets also had a significant impact on COGS. Expenditure on the acquisition of these products increased by US\$ 99 million.

Energy costs, which are 17.6% of COGS, increased by US\$ 95 million, reflecting higher fuel prices – the effects of the oil shock, passed through to the Brazilian market – and higher prices of electricity. In the new long-term contract for supply of electricity to the aluminum smelter in Barcarena, the price is denominated in Reais with a portion indexed to the LME metal price. Thus the appreciation of the Real against the US dollar and the increase in the price of the metal from 2Q04 both contributed to an increase in CVRD's energy costs.

Due to the increase in the value of the Company's asset base, depreciation and amortization expenses were US\$ 42 million higher yoy. In the last 30 months, CVRD invested US\$ 5.4 billion and the Brazilian Real has appreciated 50.3% against the US dollar. These events caused an increase in property plant and

2Q05

10

Table of Contents**US GAAP**

equipment, from US\$ 3.3 billion in December 2002 to US\$ 11.5 billion in June 2005. Depreciation increased to US\$ 249 million in 1H05, from US\$ 375 million in 2004 and US\$ 205 million in 2002.

Demurrage expenses were US\$ 16 million in the quarter. This is higher than the total of US\$ 14 million in 2Q04, but there was a considerable reduction from the US\$ 21 million of demurrage expenses in 1Q05.

CVRD has been working strongly to improve its logistic processes in order to optimize the mine-railway-port integration.

Simultaneously, the Company is investing considerable resources in its logistics infrastructure. One of the results of these efforts is the minimization of waiting time suffered by vessels at its ports and maritime terminals.

One example is the second ship loader of Pier III at the Company's port of Ponta da Madeira (PDM), which started operation in July, increasing its operational capacity and flexibility. In the same month, PDM's third car dumper came into operation - this will speed up unloading of the iron ore trains from Carajás. The operation of the second ship loader of Pier III and the third car dumper enables PDM iron ore loading capacity to reach 85 million tpy.

SG&A expenses of US\$ 135 million in 1Q05 were US\$ 29 million more than in 2Q04 - basically reflecting the increase in salaries, put in place in July 2004, and increased disbursement on social projects, US\$ 7.5 million, and on general expenses.

In 2Q05 CVRD donated US\$ 3.6 million to its foundation, Fundação Vale do Rio Doce - institution that finances projects aimed at elementary education and at promotion of citizenship in low income communities, spent US\$ 2.0 million in projects for indigenous communities and invested US\$ 6.9 million to complete the construction of physical infrastructure in the Canaã dos Carajás municipality, in the State of Pará, where the Sossego copper mine is located. In 1H05, CVRD spent US\$ 16.3 million to improve economic and social welfare in the regions where it operates.

Intensification of investments in mineral exploration resulted in research and development expenditure of US\$ 54 million in 2Q05, twice its value of US\$ 27 million in 2Q04.

COST OF GOODS SOLD BREAKDOWN

2Q05						

Table of Contents**US GAAP****THE EXCELLENCE OF CVRD S OPERATIONAL PERFORMANCE**

Operating profit measured by adjusted EBIT was a record US\$ 1.771 billion, 112.9% higher than in 2Q04 and 122.8% higher than in 1Q05. For the half-year it was US\$ 2.566 billion, 81.3% more than in 1H04.

EBIT margin, in spite of the 18.6% yoy appreciation in the Real against the dollar, as measured by the average exchange rate, was 50.1%, higher than its previous record value, of 43.3%, in 2Q04.

Adjusted EBIT in 2Q05 was US\$ 939 million more than in 2Q04, reflecting the increase of US\$ 1.616 billion in net revenues, which was partially offset by the increase of US\$ 596 million in COGS.

The adjusted EBIT margin of the ferrous minerals division was 56.2%, 1,040 basis points higher than its value of 45.8% in 2Q04, reflecting the 2005 increase in prices for iron ore and pellets.

The aluminum business posted an adjusted EBIT margin of 32.7%, which compares with 47.5% in 2Q04. In spite of the increase in average price between the two quarters, there was a fall in margin mainly due to the appreciation of the Real against the US dollar and the increase in costs of electricity.

The adjusted EBIT margin of the logistics services was 30.0%, 190 bp higher yoy, helped by the appreciation of the Real since logistics transactions are Real denominated.

The EBIT margin of the non-ferrous minerals division, at 36.9% in 2Q05, was lower than in 2Q04 (48.3%), due to increased depreciation expenses and increased cost of production of copper concentrate. The previously mentioned operational problems at Sossego are resulting in production below expected levels and in temporary increase in operational costs.

ADJUSTED EBIT MARGIN BY BUSINESS AREA

	2Q04	1Q05	2Q05
Ferrous minerals	45.8%	38.8%	56.2%
Non ferrous minerals	48.3%	30.9%	39.4%
Aluminum	47.9%	38.6%	32.7%
Logistics	28.1%	22.2%	30.0%
Total	43.3%	35.9%	50.1%

ANOTHER MILESTONE: QUARTERLY EBITDA ABOVE US\$ 2 BILLION

CVRD s 2Q05 adjusted EBITDA moved to a new level above US\$ 2 billion at US\$ 2.033 billion. It was more than the double of values for 2Q04 and 1Q05, US\$ 971 million and US\$ 993 million, respectively.

In the twelve-month period to June 2005, adjusted EBITDA amounted to US\$ 5.034 billion. 2Q05 was the thirteenth consecutive quarterly result in which the LTM adjusted EBITDA increased and was 72.9% higher yoy.

The difference of US\$ 1.062 billion between cash generation of 2Q05 and 2Q04 is made up of an increase of US\$ 939 million in adjusted EBIT, a raise of US\$ 57 million in depreciation, and an increment of US\$ 66 million in dividends received.

2Q05

Table of Contents**US GAAP**

The dividends received from affiliated companies and joint ventures totaled US\$ 126 million in 2Q05 against US\$ 60 million in 2Q04. CVRD received US\$ 35 million from Samarco, US\$ 34 million from Usiminas, US\$ 30 million from MRN, US\$ 11 million from GIIC, US\$ 8 million from Valesul, and US\$ 3 million from Hispanobras.

The 2Q05 cash generation by business unit was: ferrous minerals 83.0%, aluminum products 7.3%, logistics 6.4%, and non-ferrous minerals 2.2%.

FINANCIAL REVENUES/EXPENSES

CVRD posted net financial expenses of US\$ 24 million in 2Q05. In relation to 2Q04 this was an improvement of US\$ 63 million. Financial revenues, at US\$ 27 million, were US\$ 8 million higher than in 2Q04; and financial expenses, at US\$ 51 million, were US\$ 55 million lower.

The lower financial expenses reflected an increase of US\$ 33 million in the result of derivatives transactions made for protection against market risks interest rate, currency and commodity price which had generated a gain of US\$ 56 million in 2Q05, compared to a gain of US\$ 23 million in 2Q04. The main driver was the gains from hedging of alumina and aluminum prices of the order of US\$ 73 million.

The effect on the Company's net foreign currency liability of the 11.8% appreciation of the Real against the US dollar from 31 March to 30 June, 2005 generated a positive accounting gain of US\$ 304 million in the 2Q05 result.

2Q05

Table of Contents

US GAAP

INCOME FROM SHAREHOLDINGS

Equity income from affiliates and joint ventures totaled US\$ 220 million, 46.7% or US\$ 70 million higher yoy. The pelletizing companies, benefiting from the increase in prices of their products, were the main responsible for the raise, being its equity income US\$ 131 million in 2Q05, against US\$ 34 million in 2Q04.

The contribution of the shareholdings in steel, on the other hand, at US\$ 62 million, was lower than in 2Q04 (US\$ 92 million), reflecting the divestment of CVRD's interest in CST in the second half of 2004.

RECORD NET EARNINGS: US\$ 1.630 BILLION

CVRD's net earnings in 2Q05 was a record, US\$ 1.630 billion, 223.4% higher than in 2Q04 and 133.5% higher than in 1Q05. Net earnings in the half-year were US\$ 2.328 billion, compared to US\$ 909 million in 1H04.

The principal element in this excellent performance was operational profit, US\$ 939 million higher than in 2Q04.

The appreciation of the Real, while having an adverse impact on operational costs and expenses, resulting in compressing margins, operational profit and cash generating, on the other hand caused a positive accounting gain of US\$ 304 million on currency variations.

Of the difference of US\$ 1.126 billion between net profit in 2Q04 and 2Q05, the lower net financial expenses contributed to US\$ 63 million, and the increase in equity income to US\$ 70 million.

The Company's good operational and financial results more than offset the US\$ 373 million increase in income tax and social contribution, arising from higher taxable earnings base.

PARADIGM SHIFT: THE INVESTMENT GRADE CONQUEST

On July 8, 2005 Moody's Investors Service upgraded CVRD's foreign currency credit rating from Ba1 to Baa3 which on Moody's scale means credit of moderate risk, without speculative elements, identified as investment grade.

This upgrade is the result of continuous effort to implement a long-term strategy focused on the value creation, which has been responsible for CVRD's strong cash flow, supported by excellence in financial management, oriented toward minimization of risks and the strengthening of the Company's capacity to assume financial commitments.

The improvement of CVRD's credit risk classification is a historic benchmark in the Company's growth trajectory, characterized as it has been by firm commitment to value creation for its shareholders.

CVRD is now one of the rare cases in which a company that has the vast majority of its assets in a non-investment grade country is itself promoted to investment grade thus breaking a previous paradigm, and becoming the only company in Brazil with this position.

2Q05

Table of Contents**US GAAP**

CVRD's total debt on June 30, 2005 was US\$ 4.168 billion, compared to US\$ 4.182 billion on March 2005 and to US\$ 4.088 billion in the end of 2004. Net debt(4) at the end of June 2005 was US\$ 3.212 billion, slightly higher than the US\$ 3.060 billion verified at the end of March 2005.

The average maturity of CVRD's debt on June 30, 2005 was 6.57 years, with 50% of the total debt at fixed rates and 50% at floating rates.

The rapid growth in adjusted EBITDA has been reflected in the improving trend of the Company's leverage and interest coverage indicators. Cash generation growth enables the financing of investments and distribution of dividends with only marginal increases in debt levels, leading to a decline in leverage and an increase in interest coverage. This trend is expected to be even higher in 2H05 given the expectation of decrease in total debt due to its amortization.

Total debt/LTM adjusted EBITDA fell from 2.05x on December 31, 2001 to 0.83x on June 30, 2005. Interest coverage, expressed as LTM adjusted EBITDA / interest paid⁽⁵⁾ increased significantly to 17.73x on June 30, 2005 from 7.58x.

In June, CVRD used part of its free cash flow and the prepayment of some bank loans contracted at floating rates, in a transaction with total value of US\$ 240.6 million. This aimed to reduce risks – refinancing risk and interest rate risk and also the Company's average cost of debt.

In isolation, these transactions reduced the proportion of floating-rate debt from 53% to 50% of CVRD's total, and also produced a marginal positive impact on the debt's cost and average maturity.

The effect of the debt amortization was not fully reflected in the Company's total debt because CVRD contracted in April export finance credit lines to deal with short-term cash management. Such credit lines will be liquidated during 2H05, US\$ 129 million in 3Q05 and US\$ 186 million in 4Q05, reducing debt levels.

15

Table of Contents**US GAAP****GREEN LIGHT FOR VERMELHO**

CVRD's priority for the use of its strong cash flow is to finance investments that constitute platforms for shareholder value creation. At this point of the economic cycle, which is characterized, among other factors, by a significant increase in the price of equipments, raw materials and services, the choice of the right investment opportunities, that are truly capable of adding value, became an even greater challenge for the managers of a mining company. Based on rigorous criteria, CVRD continues to invest a considerable volume of funds in the quest for profitable growth.

Total capital expenditure in 2Q05 was US\$ 821.3 million, 44.0% more than in 1Q05. US\$ 658.4 million of this total was spent on organic growth projects and R&D, and US\$ 162.9 million on stay-in-business capex maintaining existing operations¹.

CVRD's total capex in the first half of 2005 was US\$ 1.392 billion, 41.8% of the total of US\$ 3.332 billion budgeted for the year.

The amount spent on research and development in 2Q05 was US\$ 42.7 million, more than 50% higher than the US\$ 28.2 million spent in the previous quarter. Mineral exploration efforts were focused on identifying new deposits of copper, coal, nickel, gold and manganese.

CVRD has various studies in progress. Highlights are: the Cristalino copper project in Carajás, in the Brazilian state of Pará; the São João do Piauí nickel project in the Brazilian state of Piauí; the coal project at Moatize in Mozambique; the manganese project at Franceville in Gabon; the phosphates project in Bayóvar, Peru; and the potash project at Rio Colorado in Argentina. The Company will start studies for the Belvedere coal project in Queensland, Australia.

The acquisition of 25% of the Chinese anthracite producer Henan Long Energy Resources Ltd. was concluded in this quarter, on payment of US\$ 86.3 million. Henan is expected to produce 1.7 million tons in 2005.

At the beginning of July, CVRD's Board of Directors approved investment in development of the Vermelho nickel project with estimated production capacity of 46,000 tpy of metallic nickel and 2,800 tpy of cobalt. The estimated total investment is up to US\$ 1.2 billion, for startup scheduled for the last quarter of 2008.

Main CVRD projects currently in progress

Area	Project	Budgeted 2005 US\$ million	Status
Ferrous minerals	Expansion of the Carajás iron ore mines by 85 Mtpa Northern System	140	For completion in 2006, this will add 15 million tons to CVRD's annual production capacity. The second ship loading system of Pier III is in test phase.
	Brucutu iron ore mine Southern System	205	Phase I should be completed in 2006, increasing nominal production capacity to 15 million tpy. Phase II is scheduled for completion in 2007, to bring production capacity to 24 million tpy. A further expansion, to 30 million tpy is currently under study.
	Itabira iron ore mines Southern System	16	Modernization of operations and expansion of production capacity to 46 million tpy, for conclusion and startup in 2006.

¹ Capex figures are based on actual disbursements.

2Q05

Table of Contents**US GAAP**

Area	Project	Budgeted 2005 US\$ million	Status
	Fazendão iron ore mine Southern System	52	Project to produce 14 million tons run-of-mine (ROM) iron ore/year. Works to begin in second half 2005, for completion and operational startup in 2007.
	Fábrica iron ore mine Southern System	38	Project for expansion of production capacity by 5 million tons, from 12 to 17 million tpy. Startup scheduled for 2007.
	Timbopeba iron ore mine Southern System	25	Extension of the mine's working life to 2008, with estimated annual production capacity of 2.7 million tons. US\$7.8 million will be invested in development, purchase of small scale equipment and new access for the crushing facilities; a further US\$17.6 million will be spent on rolling stock for the EFVM railroad.
	Tubarão Port expansion Southern System	22	Expansion of the conveyor belt and dockside machinery, and construction of new dockside storage patios.
	Expansion of the São Luis pelletizing plant	18	Expansion of capacity from 6 to 7 million tpy. The expansion will be completed by January 2006. Production this year is estimated at 6.25 million tons.
Coal	Anthracite	86	Acquisition of 25% of the Chinese anthracite producer Henan Longyu Energy Resources Ltd., in partnership with Yoncheng and Baosteel, has been completed. The mine will produce 1.7 million tons of high quality anthracite in 2005.
	Metallurgical coke	16	Acquisition of 25% stake in the Chinese coal producer Shandong Yankuang International Coking Ltd. for production of metallurgical coke in association with Yankuang. The project has estimated production capacity of 2 million tpy of coke, and 200,000 tpy of methanol. Startup is planned for 2006.
Non-ferrous minerals	Expansion of the Taquari-Vassouras potash mine	9	Project to expand nominal potash production capacity from 600,000 to 850,000 tpy. The ramp-up period has begun and production of 710,000 tons is expected this year.

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

	118 copper mine	32	Project for production of 36,000 tons of copper cathode/year.
	Vermelho nickel mine	34	Project for production of 46,000 tons of metallic nickel and 2,800 tons of cobalt, per year. Approved in July 2005; conclusion planned for 4Q08.
Aluminum	Alumina: Alunorte Modules 4 and 5	306	Modules 4 and 5 will increase the refinery's production capacity to 4.2 million tons of alumina/year. Completion is planned for 1Q06.
	Paragominas I bauxite mine	154	Will produce 4.5 million tpy of bauxite starting early in 2007. Tubes are currently being delivered for construction of the 244-km ore delivery pipeline to transport bauxite from Paragominas to the alumina refinery in Barcarena, in the Brazilian state of Pará. Earthmoving work has been completed for start of construction.
Logistics	Acquisition of locomotives and railcars for EFVM, EFC and FCA railroads	559	2,288 railcars and 63 locomotives were bought in the first half of 2005.
Electric energy	Aimorés hydroelectric power plant	12	This power plant on the Doce river in the Brazilian state of Minas Gerais will have generation capacity of 330MW. The first turbine started up in July 2005; the other two are programmed to startup by October. CVRD owns 51.0% stake in the project.
	Capim Branco I and II hydroelectric power plants	73	Both plants are on the Araguari river in the Brazilian state of Minas Gerais. Scheduled to start operating in 2006, they have generating capacity of 240MW and 210MW, respectively. Works are 68% completed on Capim Branco I, and 41% on Capim Branco II. CVRD has a 48.4% stake in both projects.

THE SARBANES-OXLEY LAW: ADAPTING THE BYLAWS

CVRD's Extraordinary General Shareholders Meeting held on June 19, 2005 made changes to the Bylaws to introduce and provide for compliance with the principles and concepts of the Sarbanes-Oxley Act of 2002, Rule 10A-3 of the Securities and Exchange Act of 1934, and Rule 303A.06 of the New York Stock Exchange Listed Company Manual, with necessary adaptations to Brazilian legislation. Also in accordance with the rules of the Sarbanes-Oxley Act, CVRD created an internal complaints channel.

TELECONFERENCE AND WEBCAST

CVRD will hold a conference call and webcast on Friday, August 12, 2005, at 12:00 p.m. Rio de Janeiro time, 11:00 a.m. US Eastern Standard time, and 4:00 p.m. UK time. To participate, see the instructions on CVRD's website www.cvr.com.br, in the *Investor Relations* subsection. A playback of the call and webcast will be available on the site for 90 days following August 12.

SELECTED FINANCIAL INDICATORS OF THE MAIN NON-CONSOLIDATED COMPANIES

Selected financial indicators of the principal non-consolidated companies can be found in CVRD's quarterly accounts, which are available on its website, www.cvr.com.br, in the *Investor Relations* subsection.

Adjusted EBIT	832	795	1,771

(2) Adjusted EBITDA

The term EBITDA refers to a financial measure that is defined as earnings (losses) before interest, taxes, depreciation and amortisation; we use the term Adjusted EBITDA to reflect that our financial measure also excludes monetary gains/losses, equity in results of affiliates and joint ventures less dividends received from those companies, changes in provision for losses on equity investments, adjustments for changes in accounting practices, minority interests and non-recurring expenses. However, Adjusted EBITDA is not a measure determined under GAAP in the United States of America and may not be comparable to similarly titled measures reported by other companies. Adjusted EBITDA should not be construed as a substitute for operating income or as a better measure of liquidity than cash flow from operating activities, which are determined in accordance with GAAP. We have presented Adjusted EBITDA to provide additional information with respect to our ability to meet future debt service, capital expenditure and working capital requirements. The following schedule reconciles Adjusted EBITDA to net cash provided by (used in) operating activities reported on our Consolidated Statements of Cash Flows, which we believe is the most directly comparable GAAP measure:

RECONCILIATION BETWEEN ADJUSTED EBITDA VS. OPERATING CASH FLOW

			US\$ million
	2Q04	1Q05	2Q05
Operating cash flow	700	431	1,426

This communication may include declarations which represent the expectations of the Company's Management about future results or events. All such declarations, when based on future expectations and not on historical facts, involve various risks and uncertainties. The Company cannot guarantee that such declarations turn out to be correct. Such risks and uncertainties include factors relative to the Brazilian economy and capital markets, which are volatile and may be affected by developments in other countries; factors relative to the iron ore business and its dependence on the steel industry, which is cyclical in nature; and factors relative to the high degree of competitiveness in industries in which CVRD operates. To obtain additional information on factors which could cause results to be different from those estimated by the Company, please consult the reports filed with the Comissão de Valores Mobiliários (CVM Brazilian stock exchange regulatory authority) and the U.S. Securities and Exchange Commission SEC, including the most recent Annual Report CVRD Form 20F.

**Report of Independent Registered
Public Accounting Firm**

To the Board of Directors and Stockholders

Companhia Vale do Rio Doce

We have reviewed the accompanying unaudited condensed consolidated balance sheet of Companhia Vale do Rio Doce and subsidiaries as of June 30, 2005, and the unaudited condensed consolidated statements of income, of cash flows and of changes in stockholders' equity for the three-month periods ended June 30 and March 31, 2005 and June 30, 2004 and for the six-month periods ended June 30, 2005 and 2004, respectively. This interim financial information is the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the condensed consolidated interim financial information referred to above for them to be in conformity with accounting principles generally accepted in the United States of America.

We previously audited in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Companhia Vale do Rio Doce and subsidiaries as of December 31, 2004, and the related consolidated statements of income, of cash flows and of changes in stockholders' equity for the year then ended (not presented herein) and in our report dated March 21, 2005, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2004 is fairly stated in all material respects in relation to the consolidated balance sheet from which it has been derived.

1 The Company and its operations

Companhia Vale do Rio Doce (CVRD) is a limited liability company, duly organized and existing under the laws of the Federative Republic of Brazil. Our operations are carried out through CVRD and its subsidiary companies, joint ventures and affiliates, and mainly consist of mining, non-ferrous metal production and logistics, as well as energy, aluminum and steel activities. Further details of our joint ventures and affiliates are described in Note 7.

The main operating subsidiaries we consolidate are as follows:

Subsidiary	% ownership	% voting capital	Head office location	Principal activity
Alumina do Norte do Brasil S.A. Alunorte (Alunorte)	57	61	Brazil	Alumina
Alumínio Brasileiro S.A. Albras (Albras)	51	51	Brazil	Aluminum
CADAM S.A (CADAM) (1)	37	100	Brazil	Kaolin

e Participações
Ltda.

2 Basis of consolidation

All majority-owned subsidiaries where we have both share and management control are consolidated, with elimination of all significant intercompany accounts and transactions. Additionally, variable interest entities in which we are the primary beneficiary (FASB Interpretation FIN No. 46 Consolidation of Variable Interest Entities (revised December 2003)) are consolidated as from January 1, 2004. Investments in unconsolidated affiliates and joint ventures are reported at cost plus our equity in undistributed earnings or losses. Included in this category are certain joint ventures in which we have majority ownership but, by force of shareholders agreements, do not have effective management control. We provide for losses on equity investments with negative stockholders equity where applicable.

We evaluate the carrying value of our listed investments relative to publicly available quoted market prices. If the quoted market price is below book value, and such decline is considered other than temporary, we write-down our equity investments to quoted market value.

We define joint ventures as businesses in which we and a small group of other partners each participate actively in the overall entity management, based on a shareholders agreement. We define affiliates as businesses in which we participate as a minority stockholder but with significant influence over the operating and financial policies of the investee.

Investments in unincorporated joint ventures, formed for the purpose of investing in hydroelectric power projects, are proportionately consolidated.

Table of Contents

3 Summary of significant accounting policies

Our condensed consolidated interim financial information for the three-month periods ended June 30, 2005, March 31, 2005 and June 30, 2004 and for the six-month periods ended June 30, 2005 and 2004 is unaudited. However, in our opinion, such condensed consolidated financial information includes all adjustments, consisting only of normal recurring adjustments, necessary for a fair presentation of the results for interim periods. The results of operations for the three and six month period ended June 30, 2005 are not necessarily indicative of the results to be expected for the full fiscal year ending December 31, 2005.

In preparing the consolidated financial statements, we are required to use estimates to account for certain assets, liabilities, revenues and expenses. Our consolidated financial statements therefore include various estimates concerning the selection of useful lives of property, plant and equipment, provisions necessary for contingent liabilities, fair values assigned to assets and liabilities acquired in business combinations, income tax valuation allowances, employee post-retirement benefits and other similar evaluations, actual results may vary from our estimates.

Exchange rates at June 30, 2005, March 31, 2005 and December 31, 2004 were R\$2,3504: US\$1.00, R\$2,6662: US\$1.00 and R\$2,6544: US\$1.00, respectively.

4 Recently-issued accounting pronouncements

In June 2005, the FASB issued SFAS No. 154, *Accounting Changes and Error Corrections* which sets reporting of a change in accounting principles or errors. We do not expect FASB No. 154 to have a significant impact on our financial position, results of operations or cash flows.

In March 2005, the FASB issued FSP FIN 46(R)-5, *Consolidation of Variable Interests Entities* to address whether a reporting enterprise should consider whether it holds an implicit variable interest in a variable interest entity (VIE) or potential VIE when specific conditions exist. We adopted FIN 46R and we do not expect FSP FIN 46(R)-5 to have any impact on our financial position, results of operations or cash flows.

In March 2005, the FASB issued FASB Interpretation No. 47, *Accounting for Conditional Asset Retirement Obligations* which refers to legal obligation to perform an asset retirement activity. We do not expect FASB Interpretation No. 47 to have a significant impact on our financial position, results of operations or cash flows.

In December 2004, the FASB issued SFAS No. 123R, *Share-Based Payment* which sets accounting requirements for share-based compensation to employees, including employee-stock-purchase-plans (ESPPs) and provides guidance on accounting for awards to non-employees. Which did not have a significant impact on our financial position, results of operations or cash flows.

In December 2004, the FASB issued SFAS No. 153, *Exchanges of Nonmonetary Assets* an amendment of APB No. 29. We will apply this Statement in the event exchanges of nonmonetary assets occur in fiscal periods beginning after June 15, 2005.

In November 2004, the FASB issued SFAS No. 151, *Inventory Costs* an amendment of ARB No. 43, Chapter 4 that deals with inventory pricing. We have already adopted this new Statement, which did not have a significant impact on our financial position, results of operations or cash flows.

In September 2004, the FASB issued FSP EITF Issue 03-1-1, which delayed the effective date of paragraphs 10-20 of EITF Issue No. 03-1, *The Meaning of Other-Than-Temporary*

Table of Contents

Impairment and Its Application to Certain Investments. We do not expect EITF Issue No. 03-01 to have any impact on our financial position, results of operations or cash flows.

5 Income taxes

Income taxes in Brazil comprise federal income tax and social contribution, which is an additional federal tax. The statutory composite enacted tax rate applicable in the periods presented is 34% represented by a 25% federal income tax rate plus a 9% social contribution rate.

The amount reported as income tax expense in our condensed consolidated financial information is reconciled to the statutory rates as follows:

	Three-month periods ended			Six-month periods ended June 30	
	June 30, 2005	March 31, 2005	June 30, 2004	2005	2004
Income before income taxes, equity results and minority interests	2,051	730	500	2,781	911
Federal income tax and social contribution expense at statutory enacted rates	(697)	(248)	(171)	(945)	(310)
Adjustments to derive effective tax rate:					
Tax benefit on interest attributed to stockholders	131	54	44	185	99
Exempt foreign income (expenses)	82	46	21	128	35
Difference on tax basis of equity investees	(17)	(4)	(16)	(21)	(30)
Tax incentives	59	22	3	81	12
Valuation allowance reversal (provision)			52		52
Other non-taxable gains (losses)	5	17	3	22	13
Federal income tax and social contribution expense in consolidated statements of income	(437)	(113)	(64)	(550)	(129)

We have certain tax incentives relative to our iron ore and manganese operations in Carajás, potash in Sergipe and relative to alumina and aluminum in Barcarena. The incentives relative to iron ore and manganese comprise full income tax exemption on defined production levels up to 2005 and partial exemption up to 2013. The incentive relating to alumina and potash comprise full income tax exemption on defined production levels which expires in 2010 and 2013, respectively, while the partial exemption incentives relative to aluminum expire in 2013. An amount equal to the tax saving must be appropriated to a reserve account within stockholders' equity and may not be distributed in the form of cash dividends.

Table of Contents**8 Pension costs**

	Three month periods ended			Six-month periods ended June 30	
	June 30, 2005	March 31, 2005	June 30, 2004 (*)	2005	2004 (*)
Service cost – benefits earned during the period	1			1	1
Interest cost on projected benefit obligation	60	56	47	116	94
Expected return on assets	(75)	(69)	(53)	(144)	(106)
Amortization of initial transitory obligation	2	3	2	5	4
Net deferral	(4)	(4)	(6)	(8)	(12)
Net periodic pension cost	(16)	(14)	(10)	(30)	(19)

(*) Based on 2004 annual periodic pension cost.

In addition to benefits provided under the Pension Plan, accruals have been made relative to supplementary health care benefits extended in previous periods as part of early-retirement programs. Such accruals included in long-term liabilities totaled US\$229 and US\$215, at June 30, 2005 and December 31, 2004, respectively, plus US\$44 and US\$34, respectively, in current liabilities.

The cost recognized for the three-month ended June 30, 2005, March 31, 2005, and June 30, 2004 relative to the defined contribution element of the New Plan was US\$2, in each period.

We previously disclosed in our consolidated financial statements for the year ended December 31, 2004, that we expected to contribute US\$16 to our defined benefit pension plan in 2005. As of June 30, 2005, US\$9 of our contributions have been made. We do not expect any change in our previous estimate.

9 Commitments and contingencies

(a) At June 30, 2005, we had extended guarantees for borrowings obtained by affiliates and joint ventures in the amount of US\$6, as follows:

Affiliate or Joint Venture	Amount of guarantee	Denominated currency	Purpose	Final maturity	Counter guarantees
SAMARCO	5	US\$	Debt guarantee	2008	None
VALESUL	1	R\$	Debt guarantee	2007	None

6

We expect no losses to arise as a result of the above guarantees. We charge a commission for extending these guarantees in the case of Samarco.

We have not provided any significant guarantees since January 1, 2003 which would require fair value adjustments under FIN 45 Guarantor s Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others .

- (b)** We and our subsidiaries are defendants in numerous legal actions in the normal course of business. Based on the advice of our legal counsel, management believes that the provision made against contingent losses is sufficient to cover probable losses in connection with such actions.

F - 12

Table of Contents

The provision for contingencies and the related judicial deposits are composed as follows:

	June 30, 2005		December 31, 2004	
	Provision for contingencies	Judicial deposits	Provision for contingencies	Judicial deposits
Labor claims	256	127	221	109
Civil claims	204	95	185	72
Tax related actions	814	390	473	341
Others	44	10	35	9
	1,318	622	914	531

Labor related actions principally comprise employee claims for (i) payment of time spent travelling from their residences to the work-place, (ii) additional payments for alleged dangerous or unhealthy working conditions and (iii) various other matters, often in connection with disputes about the amount of indemnities paid upon dismissal.

Civil actions principally relate to claims made against us by contractors in connection with losses alleged to have been incurred by them as a result of various past government economic plans during which full indexation of contracts for inflation was not permitted.

Tax related actions principally comprise our challenges of certain income tax, revenue taxes, Value Added Tax and of the tax on checking account transaction CPMF.

We continue to vigorously pursue our interests in all the above actions but recognize that probably will incur some losses in the final instance, for which we have made provisions.

Our judicial deposits are made as required by the courts for us to be able to enter or continue a legal action. When judgment is favorable to us, we receive the deposits back; when unfavorable, the deposits are released to the prevailing party.

Contingencies settled in the three-month period ended June 30, 2005, March 31, 2005 and June 30, 2004 aggregated US\$56, US\$4 and US\$14, respectively, and additional provisions aggregated US\$44, US\$14 and US\$39, respectively.

In addition to the contingencies for which we have made provisions, we have possible losses in connection with tax contingencies totaling US\$843 at June 30, 2005, for which, no provision is maintained.

- (c) We and BNDES entered into a contract, known as the Mineral Risk Contract, in March 1997, relating to prospecting authorizations for mining regions where drilling and exploration are still in their early stages. The Mineral Risk Contract provides for the joint development of certain unexplored mineral deposits in approximately two million identified hectares of land in the Carajás region, as well as proportional participation in any financial benefits earned from the development of such resources. Iron ore and manganese deposits already identified and subject to development are specifically excluded from the Mineral Risk Contract.

Pursuant to the Mineral Risk Contract, we and BNDES each agreed to provide US\$205, which represents half of the US\$410 in expenditures estimated as necessary to complete geological exploration and mineral resource development projects in the region. We will oversee these projects and BNDES will advance us half of our costs on a quarterly basis. Under the Mineral Risk Contract, as of June 30, 2005, the remaining contributions towards

exploration and development activities totaled US\$44. In the event that either of us wishes to conduct further exploration and development after having spent such US\$205, the contract provides that each party may either choose to match the other party's contributions, or may choose to have its financial interest proportionally diluted. If a party's participation in the project is diluted to an amount lower than 40% of the amount invested in connection with exploration and development projects, then the Mineral Risk Contract provides that the diluted party will lose all the rights and benefits provided for in the Mineral Risk Contract and

F - 13

Table of Contents

any amounts previously contributed to the project.

Under the Mineral Risk Contract, BNDES has agreed to compensate us through a finder's fee production royalty on their share of mineral resources that are discovered and placed into production. This finder's fee is equal to 3.5% of the revenues derived from the sale of gold, silver and platinum group metals and 1.5% of the revenues derived from the sale of other minerals, including copper, except for gold and other minerals discovered at Serra Leste, for which the finder's fee is equal to 6.5% of revenues.

- (d) At the time of our privatization in 1997, we issued shareholder revenue interests known in Brazil as debentures to our then-existing shareholders, including the Brazilian Government. The terms of the debentures, were set to ensure that our pre-privatization shareholders, including the Brazilian Government, would participate alongside us in potential future financial benefits that we are able to derive from exploiting our mineral resources.

On March 22, 2005 we declared a distribution on these debentures in the amount of US\$3, paid as from April 1, 2005.

- (e) We use various judgments and assumptions when measuring our environmental liabilities and asset retirement obligations. Changes in circumstances, law or technology may affect our estimates and we periodically review the amounts accrued and adjust them as necessary. Our accruals do not reflect unasserted claims because we are currently not aware of any such issues. Also the amounts provided are not reduced by any potential recoveries under cost sharing, insurance or indemnification arrangements because such recoveries are considered uncertain. The changes are demonstrated as follows:

	Three-month periods ended (unaudited)			Six-month periods ended June 30	
	June 30, 2005	March 31, 2005	June 30, 2004	2005	2004

10 Segment and geographical information

In 1999 we adopted SFAS 131 Disclosures about Segments of an Enterprise and Related Information with respect to the information we present about our operating segments. SFAS 131 introduced a management approach concept for reporting segment information, whereby such information is required to be reported on the basis that the chief decision-maker uses internally for evaluating segment performance and deciding how to allocate resources to segments. Our business segments are currently organized as follows:

Ferrous products comprises iron ore mining and pellet production, as well as the Northern and Southern transportation systems, including railroads, ports and terminals, as they pertain to mining operations. Manganese mining and ferroalloys are also included in this segment.

Non-ferrous products comprises the production of non-ferrous minerals, including potash, kaolin, copper and research of others minerals, mainly nickel.

F - 14

Table of Contents

Logistics comprises our transportation systems as they pertain to the operation of our ships, ports and railroads for third-party cargos.

Holdings divided into the following sub-groups:

Aluminum comprises aluminum trading activities, alumina refining and aluminum metal smelting and investments in joint ventures and affiliates engaged in bauxite mining.

Steel comprises our investments in joint ventures and affiliates operating in the steel industry.

Others comprises our investments in joint ventures and affiliates engaged in other business.

F - 15

Table of Contents

Consolidated net income and principal assets are reconciled as follows:

Table of Contents**11 Derivative financial instruments**

Volatility of interest rates, exchange rates and commodity prices are the main market risks to which we are exposed all three are managed through derivative instruments. These have the exclusive aim of reducing exposure to risk. We do not use derivatives for speculation purposes.

We monitor and evaluate our derivative positions on a regular basis and adjust our strategy in response to market conditions. We also periodically review the credit limits and credit worthiness of our counter-parties in these transactions. In view of the policies and practices established for operations with derivatives, management considers the occurrence of non-measurable risk situations as unlikely.

The asset (liability) balances and the change in fair value of derivative financial instruments are as follows (the quarterly information is unaudited):

	Interest rates (LIBOR)	Currencies	Gold	Alumina	Aluminum	Total
Unrealized gains (losses) at April 1, 2005	(12)	3	(31)	(50)	(113)	(203)

Table of Contents

Supplemental Financial Statements

The following unaudited information provides additional details in relation to certain financial ratios.

EBITDA Earnings Before Interest, Income Tax, Depreciation and Amortization

(a) EBITDA represents operating income plus depreciation, amortization and depletion plus impairment/gain on sale of property, plant and equipment plus dividends received from equity investees.

(b) EBITDA is not a US GAAP measure and does not represent cash flow for the periods presented and should not be considered as an alternative to net income (loss), as an indicator of our operating performance or as an alternative to cash flow as a source of liquidity.

(c) Our definition of EBITDA may not be comparable with EBITDA as defined by other companies.

(d) Although EBITDA, as defined above, does not provide a US GAAP measure of operating cash flows, we use it to measure our operating performance and it is commonly used by financial analysts in evaluating our business.

Selected financial indicators for the main affiliates and joint ventures are available on the Company's website, www.cvrld.com.br, under investor relations
