**U.S. PHYSICAL THERAPY, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
September 30, 2011**

(unaudited)

1. BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES

The consolidated financial statements include the accounts of U.S. Physical Therapy, Inc. and its subsidiaries. All significant intercompany transactions and balances have been eliminated. The Company primarily operates through subsidiary clinic partnerships, in which the Company generally owns a 1% general partnership interest and a 64% limited partnership interest. The managing therapist of each clinic owns, directly or indirectly, the remaining limited partnership interest in the majority of the clinics (hereinafter referred to as Clinic Partnership). To a lesser extent, the Company operates some clinics, through wholly-owned subsidiaries, under profit sharing arrangements with therapists (hereinafter referred to as Wholly-Owned Facilities).

The Company continues to seek to attract physical and occupational therapists who have established relationships with patients and physicians by offering therapists a competitive salary and a share of the profits of the clinic operated by that therapist. The Company has developed satellite clinic facilities of existing clinics, with the result that many Clinic Partnerships and Wholly-Owned Facilities operate more than one clinic location. In addition, the Company has acquired a majority interest in a number of clinics through acquisitions.

On July 25, 2011, the Company acquired a 51% interest in a 20 clinic multi-partner physical therapy group. During the three months ended September 30, 2011, the Company opened eight new clinics, seven as satellites of existing clinics and one with a new partner. During the same three month period, the Company closed six clinics. During the nine months ended September 30, 2011, the Company opened 16 new clinics, 11 as satellites of existing clinics and five with new partners. During the same nine month period, the Company closed eight clinics. As of September 30, 2011, the Company operates 420 clinics in 42 states.

During 2010, we acquired a majority interest in 25 clinics in three separate transactions. On February 26, 2010, we acquired a 70% interest in five clinics in the Northeast (Northeast Acquisition). On December 21, 2010, we acquired a 70% interest in a six clinic physical therapy group in the mid-Atlantic region (Mid-Atlantic Acquisition). On December 31, 2010, we acquired a 65% interest in a 14 clinic physical therapy group located in the Southeast (Southeast Acquisition).

The results of operations of the acquired clinics have been included in our consolidated financial statements since the date of their acquisition.

The Company intends to continue to focus on developing new clinics and on opening satellite clinics where deemed appropriate. The Company will also continue to evaluate acquisition opportunities.

The accompanying unaudited consolidated financial statements were prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and in accordance with the instructions for Form 10-Q. However, the statements do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements.

Management believes this report contains all necessary adjustments (consisting only of normal recurring adjustments) to present fairly, in all material respects, the Company's financial position, results of operations and cash flows for the interim periods presented. For further information regarding the Company's accounting policies, please read the audited financial statements included in the Company's Form 10-K for the year ended December 31, 2010.

The Company believes, and the Chief Executive Officer, Chief Financial Officer and Corporate Controller have certified, that the financial statements included in this report present fairly, in all material respects, the Company's financial position, results of operations and cash flows for the interim periods presented.

Operating results for the three and nine months ended September 30, 2011 are not necessarily indicative of the results the Company expects for the entire year. Please also review the Risk Factors section included in our Form 10-K for the year ended December 31, 2010.

Clinic Partnerships

For Clinic Partnerships, the earnings and liabilities attributable to the non-controlling interests, typically owned by the managing therapist, directly or indirectly, are recorded within the balance sheets and income statements as

non-controlling interests.

Table of Contents

Wholly-Owned Facilities

For Wholly-Owned Facilities with profit sharing arrangements, an appropriate accrual is recorded for the amount of profit sharing due to the profit sharing therapists. The amount is expensed as compensation and included in clinic operating costs – salaries and related costs. The respective liability is included in current liabilities – accrued expenses on the balance sheet.

Significant Accounting Policies

Cash

The Company maintains its cash at financial institutions. The combined account balances at several institutions may exceed the Federal Deposit Insurance Corporation (FDIC) insurance coverage and, as a result, there is a concentration of credit risk related to amounts on deposit in excess of FDIC insurance coverage. Management believes that this risk is not significant.

Long-Lived Assets

Fixed assets are stated at cost. Depreciation is computed on the straight-line method over the estimated useful lives of the related assets. Estimated useful lives for furniture and equipment range from three to eight years and for software purchased from three to seven years. Leasehold improvements are amortized over the shorter of the related lease term or estimated useful lives of the assets, which is generally three to five years.

Impairment of Long-Lived Assets and Long-Lived Assets to Be Disposed Of

The Company reviews property and equipment and intangible assets with finite lives for impairment upon the occurrence of certain events or circumstances which indicate that the related amounts may be impaired. Assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell.

Goodwill

For 2010 and 2011 acquisitions, goodwill represents the excess of the amount paid and fair value of the non-controlling interests over the fair value of the acquired business assets, which include certain intangible assets. Historically, goodwill has been derived from acquisitions and, prior to 2009, from the purchase of some or all of a particular local management s equity interest in an existing clinic. Effective January 1, 2009, if the purchase price of a non-controlling interest by the Company exceeds or is less than the book value at the time of purchase, any excess or shortfall is recognized as an adjustment to additional paid-in capital.

The fair value of goodwill and other intangible assets with indefinite lives are tested for impairment annually and upon the occurrence of certain events, and are written down to fair value if considered impaired. The Company evaluates goodwill for impairment on at least an annual basis (in its third quarter) by comparing the fair value of each reporting unit to the carrying value of the reporting unit including related goodwill. The Company operates a one segment business which is made up of various clinics within partnerships. A reporting unit refers to the acquired interest of a single clinic or group of clinics. Local management typically continues to manage the acquired clinic or group of clinics. For each clinic or group of clinics, the Company maintains discrete financial information and both corporate and local management regularly review the operating results. Historically, the Company has not combined any of the reporting units for impairment testing because they have not met the criteria for aggregation. For each purchase of the equity interest, goodwill, if any, is assigned to the respective clinic or group of clinics, if deemed appropriate. The evaluation of goodwill in 2011 and 2010 did not result in any goodwill amounts that were deemed impaired.

An impairment loss generally would be recognized when the carrying amount of the net assets of the reporting unit, inclusive of goodwill and other intangible assets, exceed the estimated fair value of the reporting unit. The estimated fair value of a reporting unit is determined using two factors: (i) earnings prior to taxes, depreciation and amortization for the reporting unit multiplied by a price/earnings ratio used in the industry and (ii) a discounted cash flow analysis. A weight is assigned to each factor and the sum of each weight times the factor is considered the estimated fair value. For 2011, the factors (ie., price/earnings ratio, discount rate and residual capitalization rate) were updated to reflect current market conditions.

Table of Contents**Non-controlling interests**

The Company recognizes non-controlling interests as equity in the consolidated financial statements separate from the parent entity's equity. The amount of net income attributable to non-controlling interests is included in consolidated net income on the face of the income statement. Changes in a parent entity's ownership interest in a subsidiary that do not result in deconsolidation are treated as equity transactions if the parent entity retains its controlling financial interest. The Company recognizes a gain or loss in net income when a subsidiary is deconsolidated. Such gain or loss is measured using the fair value of the non-controlling equity investment on the deconsolidation date. When the purchase price of a non-controlling interest by the Company exceeds or is less than the book value at the time of purchase, any excess or shortfall is recognized as an adjustment to additional paid-in capital. Additionally, operating losses are allocated to non-controlling interests even when such allocation creates a deficit balance for the non-controlling interest partner.

Revenue Recognition

Revenues are recognized in the period in which services are rendered. Net patient revenues (patient revenues less estimated contractual adjustments) are reported at the estimated net realizable amounts from third-party payors, patients and others for services rendered. The Company has agreements with third-party payors that provide for payments to the Company at amounts different from its established rates. The allowance for estimated contractual adjustments is based on terms of payor contracts and historical collection and write-off experience. The Company determines allowances for doubtful accounts based on the specific agings and payor classifications at each clinic. The provision for doubtful accounts is included in clinic operating costs in the statement of net income. Net accounts receivable, which are stated at the historical carrying amount net of contractual allowances, write-offs and allowance for doubtful accounts, includes only those amounts the Company estimates to be collectible. Since 1999, reimbursement for outpatient therapy services provided to Medicare beneficiaries has been made according to a Medicare Physician Fee Schedule (MPFS) published by the Department of Health and Human Services (HHS). Under the Balanced Budget Act of 1997, the total amount paid by Medicare in any one year for outpatient physical therapy or occupational therapy to any one patient is subjected to a stated dollar amount (the Medicare Cap or Limit), except for services provided by hospitals. Outpatient therapy services rendered to Medicare beneficiaries by the Company's therapists are subject to the Medicare Cap, except to the extent these services are rendered pursuant to certain management and professional services agreements with inpatient facilities. In 2006, Congress passed the Deficit Reduction Act (DRA), which allowed the Centers for Medicare & Medicaid Services (CMS) to grant exceptions to the Medicare Cap for services provided during the year, as long as those services met certain qualifications. The exception process initially allowed for automatic and manual exceptions to the Medicare Cap for medically necessary services. The Temporary Extension Act of 2010, enacted on March 2, 2010, extended the therapy cap exceptions process through March 31, 2010, retroactive to January 1, 2010. With respect to the MPFS, in April 2010, the Continuing Extension Act of 2010 was signed into law which extended the zero percent update through May 31, 2010. On March 23, 2010, the President signed into law the Patient Protection and Affordable Care Act (PPACA), which extended the exceptions process for the outpatient therapy Medicare Cap. For physical therapy and speech language pathology service combined, and for occupational therapy services, the Medicare Cap for 2010 was \$1,860. On June 25, 2010, the President signed into law the Preservation of Access to Care for Medicare Beneficiaries and Pension Relief Act (PACMBPRA). The legislation increased reimbursement to providers of outpatient physical therapy for Medicare patients by 2.2% effective June 1, 2010 through November 30, 2010. On November 2, 2010, CMS released a final ruling on the Multiple Procedure Payment Reduction (MPPR) that included changes to the reimbursement for Medicare related therapy services that became effective January 1, 2011. Under MPPR, the practice expense of second and subsequent therapy codes billed in a single day will be reduced by 25%. This reduction will result in an estimated 5% to 7% rate reduction for therapy services provided in calendar year 2011 for Medicare patients. On December 15, 2010, the President signed into law the Medicare and Medicaid Extenders Act of 2010 (MMEA) which tabled for one year the scheduled Medicare rate reduction for physicians, physical therapists and various other healthcare service providers. Further, under the Physician Fee Schedule, during December 2010, CMS released corrected payment amounts for 2011 that incorporated the changes included in the MMEA. Effective January 1, 2011,

pursuant to CMS's ruling on the MPPR, the practice expense of second and subsequent therapy codes billed in a single day was reduced by 20% to 25%. This reduction will result in an estimated 5% to 7% rate reduction for the Company's reimbursement for therapy services provided in calendar year 2011 for Medicare patients. For physical therapy and speech language pathology service combined, and for occupational therapy services, the Medicare Cap for 2011 is \$1,870.

Table of Contents

Laws and regulations governing the Medicare program are complex and subject to interpretation. The Company believes that it is in compliance in all material respects with all applicable laws and regulations and is not aware of any pending or threatened investigations involving allegations of potential wrongdoing that would have a material effect on the Company's financial statements as of September 30, 2011. Compliance with such laws and regulations can be subject to future government review and interpretation, as well as significant regulatory action including fines, penalties, and exclusion from the Medicare program.

Other revenues are derived from contractual arrangements whereby the Company manages a clinic for third party owners and physician services revenue. The Company does not have any ownership interest in these clinics with the contractual arrangements. Typically, revenues from contractual arrangements are determined based on the number of visits conducted at the clinic and recognized when services are performed. Revenues from physician services, sold through franchisee arrangements, are recognized over the period services are provided.

Contractual Allowances

Contractual allowances result from the differences between the rates charged for services performed and expected reimbursements for such services by both insurance companies and government sponsored healthcare programs. Medicare regulations and the various third party payors and managed care contracts are often complex and may include multiple reimbursement mechanisms payable for the services provided in Company clinics. The Company estimates contractual allowances based on its interpretation of the applicable regulations, payor contracts and historical calculations. Each month the Company estimates its contractual allowance for each clinic based on payor contracts and the historical collection experience of the clinic and applies an appropriate contractual allowance reserve percentage to the gross accounts receivable balances for each payor of the clinic. Based on the Company's historical experience, calculating the contractual allowance reserve percentage at the payor level is sufficient to allow it to provide the necessary detail and accuracy with its collectibility estimates. However, the services authorized and provided and related reimbursement are subject to interpretation that could result in payments that differ from the Company's estimates. Payor terms are periodically revised necessitating continual review and assessment of the estimates made by management. The Company's billing systems may not capture the exact change in its contractual allowance reserve estimate from period to period in order to assess the accuracy of its revenues, and hence, its contractual allowance reserves. Management regularly compares its cash collections to corresponding net revenues measured both in the aggregate and on a clinic-by-clinic basis. In the aggregate, historically the difference between net revenues and corresponding cash collections has generally reflected a difference within approximately 1% of net revenues. Additionally, analysis of subsequent period's contractual write-offs on a payor basis shows a less than 1% difference between the actual aggregate contractual reserve percentage as compared to the estimated contractual allowance reserve percentage associated with the same period end balance. As a result, the Company believes that a change in the contractual allowance reserve estimate would not likely be more than 1% at September 30, 2011.

Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

The Company recognizes the financial statement benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting the more-likely-than-not threshold, the amount to be recognized in the financial statements is the largest benefit that has a greater than 50 percent likelihood of being realized upon ultimate settlement with the relevant tax authority.

The Company recognizes accrued interest expense and penalties associated with unrecognized tax benefits as income tax expense. The Company did not have any accrued interest or penalties associated with any unrecognized tax benefits nor was any interest expense recognized during the three and nine months ended September 30, 2011 and 2010.

Table of Contents

Fair Value of Financial Instruments

The carrying amounts reported in the balance sheet for cash and cash equivalents, accounts receivable, accounts payable and notes payable approximate their fair values due to the short-term maturity of these financial instruments. The carrying amount of the revolving line of credit approximates its fair value. The interest rate on the revolving line of credit, which is tied to the Eurodollar Rate, is set at various short-term intervals as detailed in the credit agreement.

Segment Reporting

Operating segments are components of an enterprise for which separate financial information is available that is evaluated regularly by chief operating decision makers in deciding how to allocate resources and in assessing performance. The Company identifies operating segments based on management responsibility and believes it meets the criteria for aggregating its operating segments into a single reporting segment.

Use of Estimates

In preparing the Company's consolidated financial statements, management makes certain estimates and assumptions, especially in relation to, but not limited to, purchase accounting goodwill impairment, allowance for receivables, tax provision and contractual allowances, that affect the amounts reported in the consolidated financial statements and related disclosures. Actual results may differ from these estimates.

Self-Insurance Program

The Company utilizes a self-insurance plan for its employee group health insurance coverage administered by a third party. Predetermined loss limits have been arranged with the insurance company to minimize the Company's maximum liability and cash outlay. Accrued expenses include the estimated incurred but unreported costs to settle unpaid claims and estimated future claims. Management believes that the current accrued amounts are sufficient to pay claims arising from self insurance claims incurred through September 30, 2011.

Restricted Stock

Restricted stock issued to employees and directors is subject to certain conditions, including continued employment or continued service on the board, respectively. The transfer restrictions for shares granted to employees lapse in equal installments on the following four or five annual anniversaries of the date of grant. Compensation expense for grants of restricted stock is recognized based on the fair value per share on the date of grant amortized over the service period. The restricted stock issued is included in basic and diluted shares for the earnings per share computation.

Recently Promulgated Accounting Pronouncements

In July 2011, the Financial Accounting Standards Board (FASB) issued ASU 2011-07, Health Care Entities (Topic 954): Presentation and Disclosure of Patient Service Revenue, Provision for Bad Debts and the Allowance for Doubtful Accounts for Certain Health Care Entities (ASU 2011-07). ASU 2011-07 requires certain health care entities to change the presentation in their statement of operations by reclassifying the provision for bad debts associated with patient service revenue from an operating expense to a deduction from patient service revenue (net of contractual allowances and discounts). Additionally, those health care entities are required to provide enhanced disclosure about their policies for recognizing revenue and assessing bad debts. The amendments also require disclosures of patient service revenue (net of contractual allowances and discounts) as well as qualitative and quantitative information about changes in the allowance for doubtful accounts. ASU 2011-07 is effective for fiscal years and interim periods within those fiscal years beginning after December 15, 2011, with early adoption permitted. The Company is in the process of evaluating the effects of ASU 2011-07 on its consolidated financial statements.

In September 2011, the FASB issued ASU 2011-08, Intangibles-Goodwill and Other (Topic 350): Testing Goodwill for Impairment (ASU 2011-08), which modifies the impairment test for goodwill intangibles. These modifications provide an entity the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not (more than 50%) that the fair value of a reporting unit is less than its carrying amount. Such qualitative factors may include the following: macroeconomic conditions; industry and market considerations; cost factors; overall financial performance; and other relevant entity-specific events. If an entity elects to

Table of Contents

perform a qualitative assessment and determines that an impairment is more likely than not, the entity is then required to perform the existing two-step quantitative impairment test, otherwise no further analysis is required. An entity also may elect not to perform the qualitative assessment and, instead, go directly to the two-step quantitative impairment test. These changes are effective for any goodwill impairment test performed on January 1, 2012 or later, although early adoption is permitted. These changes should not affect the outcome of the impairment analysis of a reporting unit. The Company performs a review of the Company's goodwill in the third quarter of each fiscal year. The adoption of ASU 2011-08 in 2012 should not have a material impact on the Company's consolidated financial statements.

2. EARNINGS PER SHARE

The computations of basic and diluted earnings per share for the Company are as follows (in thousands, except per share data):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
Numerator:				
Net income attributable to common shareholders	\$ 4,099	\$ 3,875	\$ 12,745	\$ 11,498
Denominator:				
Denominator for basic earnings per share - weighted-average shares	11,886	11,667	11,824	11,634
Effect of dilutive securities - Stock options	125	222	183	228
Denominator for diluted earnings per share - adjusted weighted-average shares	12,011	11,889	12,007	11,862
Earnings per share attributable to common shareholders:				
Basic	\$ 0.35	\$ 0.33	\$ 1.08	\$ 0.99
Diluted	\$ 0.34	\$ 0.33	\$ 1.06	\$ 0.97

All options to purchase shares were included in the diluted earnings per share calculation for the three and nine months ended September 30, 2011 as the average market price of the common shares was above the exercise prices. However, options to purchase 107,250 shares for the three and six months ended September 30, 2010 were excluded from the diluted earnings per share calculations for the period because the options' exercise prices were greater than the average market price of the common shares during the period.

The Company's restricted stock issued is included in basic and diluted shares for the earnings per share computation from the date of grant.

3. ACQUISITION OF BUSINESS

On July 25, 2011, the Company acquired a 51% interest in a 20 clinic multi-partner physical therapy group (July 2011 Acquisition). The purchase price for the 51% interest was \$8,426,000, which consisted of \$8,226,000 in cash and a \$200,000 seller note, which is payable in two principal installments totaling \$100,000 each, plus any accrued interest, in July 2012 and 2013. The seller note accrues interest at 3.25% per annum. The consideration was agreed upon through arm's length negotiations. Funding for the cash portion of the purchase price was derived from proceeds from the Company's revolving credit facility.

The results of operations of the July 2011 Acquisition have been included in the Company's consolidated financial statements since acquired.

Because the July 2011 Acquisition occurred during the quarter ended September 30, 2011, the purchase price plus the fair value of the noncontrolling interest was allocated to the fair value of the assets acquired and liabilities assumed based on the preliminary estimates of fair values at the acquisition date, with the amount exceeding the estimated fair values being recorded as goodwill. The Company is in the process of completing its formal valuation analysis to identify and determine the fair value of tangible and intangible assets acquired and the liabilities assumed. Thus, the final allocation of the purchase price may differ from the preliminary estimates used at September 30, 2011 based on additional information obtained. Changes in the estimated valuation of the tangible and intangible assets acquired and the completion by the Company of the identification of any unrecorded pre-acquisition contingencies, where the liability is probable and the amount can be reasonably estimated, will likely result in adjustments to goodwill.

Table of Contents

The preliminary purchase price was allocated as follows (in thousands):

Cash paid, net of cash acquired	\$ 8,149
Seller note	200
Total consideration	\$ 8,349
Estimated fair value of net tangible assets acquired:	
Total current assets	\$ 1,311
Total non-current assets	1,100
Total liabilities	(596)
Net tangible assets acquired	\$ 1,815
Goodwill	14,630
Fair value of noncontrolling interest	(8,096)
	\$ 8,349

Unaudited proforma consolidated financial information for the July 2011 Acquisition has not been included as the results were not material to current operations.

4. ACQUISITIONS OF NON-CONTROLLING INTERESTS

In five separate transactions during the nine months ended September 30, 2011, the Company purchased a total of 20.2% of the 30% non-controlling interest in STAR Physical Therapy, LP, a subsidiary of the Company (STAR). The aggregate purchase price paid for the 20.2% interest was \$15.3 million, which included \$0.8 million of undistributed earnings. The remaining purchase price of \$14.5 million, less future tax benefits of \$5.7 million, was recognized as an adjustment to additional paid-in capital. After these transactions, the Company owned 90.2% and the non-controlling interest limited partners in aggregate owned the remaining 9.8% in the partnership. Of the 20.2% aggregate non-controlling interests purchased, 15% was held by Regg Swanson, the Managing Director and a founder of STAR and a member of the Company's Board of Directors (Swanson). The purchase prices were determined based on the contractual terms in the Reorganization of Securities Purchase Agreement dated as of September 6, 2007 among the Company, STAR, the limited partners of STAR and Regg Swanson as Seller Representative and in his individual capacity, which was filed as Exhibit 10.1 to the Company's Current Report on Form 8-K filed with the SEC on September 7, 2007. After the sale of his 15% interest, Swanson owned 3.3% of STAR (Swanson Interest). See Note 8 Subsequent Events.

Effective June 30, 2011, the Company purchased the 35% non-controlling interest in one of its Texas partnerships. The aggregate purchase price for the 35% interest was \$3.9 million, of which \$3.5 million was paid in cash and \$367,272 was paid in the form of a note to the seller, which is payable in two equal annual installments of principal plus any accrued and unpaid interest. Interest accrues at 3.25% per annum. The purchase price included \$0.2 million of undistributed earnings and \$0.2 million in invested capital. The remaining purchase price of \$3.5 million, less future tax benefits of \$1.4 million, was recognized as an adjustment to additional paid-in capital. After this transaction, the Company owns 100% of the partnership.

In addition, during the nine months ended September 30, 2011, the Company purchased the non-controlling interests of two other partners for \$112,000, which included \$47,000 of undistributed earnings. The remaining purchase price of approximately \$60,000, less future tax benefits of \$23,000, was recognized as an adjustment to additional paid-in capital.

5. GOODWILL

The changes in the carrying amount of goodwill consisted of the following (in thousands):

	Nine Months Ended September 30, 2011
Beginning balance	\$ 79,424
Goodwill acquired during the period	14,630
Goodwill allocated to specific assets for businesses acquired in 2010	(2,990)
Goodwill adjustments for purchase price allocation of businesses acquired in 2010	402
Goodwill written off	(14)
Ending balance	\$ 91,452

Table of Contents

The Company has substantially finalized its valuations for the Mid-Atlantic Acquisition and the Southeast Acquisition which occurred in December 2010. While the valuations associated with the acquired liabilities are still in process, the Company does not expect there to be significant adjustments to the amounts recorded as of September 30, 2011 upon completion of the process. Of the amount paid and included in goodwill at December 31, 2010, \$2,990,000 was allocated to intangible assets as follows: \$1.7 million to tradenames; \$1.0 million to referral relationships and \$290,000 to non compete agreements. The value assigned to tradenames has an indefinite life and is tested at least annually for impairment in conjunction with the Company's annual goodwill impairment test. The value assigned to referral relationships is being amortized over their respective estimated useful lives of 12 years. Non compete agreements are amortized over the respective term of the agreements which range from five to six years. In addition, the Company adjusted the amount of the value initially assigned to the clinic equipment and assumed liabilities, which resulted in a reduction of the net value by \$402,000 and an increase in goodwill of the same amount. The goodwill written off in the amount of \$14,000 relates to a clinic that was closed.

6. NOTES PAYABLE

Notes payable as of September 30, 2011 and December 31, 2010 consisted of the following (\$ in thousands):

	2011	2010
Revolving credit agreement average effective interest rate of 1.97% inclusive of unused fee	\$ 26,400	\$ 5,500
Various promissory notes payable in annual installments of an aggregate of \$100 plus accrued interest through February 26, 2012, interest accrues at 3.25% per annum	100	200
Promissory note payable in annual installments of \$100 plus accrued interest through December 31, 2012, interest accrues at 3.25% per annum	200	200
Promissory note payable in annual installments of \$50 plus accrued interest through December 21, 2012, interest accrues at 4.00% per annum	100	100
Promissory note payable in annual installments of \$184 plus accrued interest through June 30, 2013, interest accrues at 3.25% per annum	367	
Promissory note payable in annual installments of \$100 plus accrued interest through July 25, 2013, interest accrues at 3.25% per annum	200	
	27,367	6,000
Less current portion	(533)	(250)
	\$ 26,834	\$ 5,750

Effective August 27, 2007, the Company entered into a credit agreement with a commitment for a \$30.0 million revolving credit facility which was increased to \$50.0 million effective June 4, 2008 ("Credit Agreement"). Effective March 18, 2009, the Credit Agreement was amended to permit the purchase up to \$15,000,000 of the Company's common stock subject to compliance with certain covenants, including the requirement that after giving effect to any stock purchase, the Company's consolidated leverage ratio (as defined in the Credit Agreement) be less than 1.0 to 1.0 and that any stock repurchased be retired within seven days of purchase. Effective October 13, 2010, the Credit Agreement was amended to extend the maturity date from August 31, 2011 to August 31, 2015. In addition, the Credit Agreement was amended to adjust the pricing grid which is based on the Company's consolidated leverage ratio with the applicable spread over LIBOR ranging from 1.6% to 2.5% or the applicable spread over the Base Rate ranging from .1% to 1%. On July 14, 2011, the Credit Agreement was amended to increase the commitment from \$50.0 million to \$75.0 million. The Credit Agreement is unsecured and has loan covenants, including requirements that the Company comply with a consolidated fixed charge coverage ratio and consolidated leverage ratio. Proceeds from the Credit Agreement may be used for working capital, acquisitions, purchases of the Company's common stock, dividend payments to the Company's common stockholders, capital expenditures and other corporate purposes. Fees under the Credit Agreement include an unused commitment fee ranging from .1% to .25% depending on the

Company's consolidated leverage ratio and the amount of funds outstanding under the Credit Agreement. On September 30, 2011, \$26.4 million was outstanding on the revolving credit facility resulting in \$48.6 million of availability. The Company was in compliance with all of the covenants thereunder.

The Company generally enters into various notes payable as a means of financing a portion of its acquisitions and purchases of non controlling interests. In June 2011, the Company, in conjunction with the purchase of a non controlling interests, entered into a note payable in the amount of \$367,272 payable in two equal annual installments of \$183,636 plus any accrued and unpaid interest. Interest accrues at 3.25% per annum. In conjunction with the July 2011 Acquisition, the Company entered into a note payable in the amount of \$200,000 payable in two equal annual installments of \$100,000 plus any accrued and unpaid interest. Interest accrues at 3.25% per annum.

Table of Contents

Aggregate annual payments of principal required pursuant to the revolving credit facility and the above notes payable subsequent to September 30, 2011 are as follows:

During the twelve months ended September 30, 2012	\$ 533
During the twelve months ended September 30, 2013	434
During the twelve months ended September 30, 2014	
During the twelve months ended September 30, 2015	26,400
	\$ 27,367

7. COMMON STOCK

In September 2001 through December 31, 2008, the Board of Directors (Board) authorized the Company to purchase, in the open market or in privately negotiated transactions, up to 2,250,000 shares of the Company s common stock. In March 2009, the Board authorized the repurchase of up to 10% or approximately 1,200,000 shares of its common stock (March 2009 Authorization). In connection with the March 2009 Authorization, the Company amended its bank credit agreement to permit share repurchases of up to \$15,000,000. The Company is required to retire shares purchased under the March 2009 Authorization. Since there is no expiration date for the two share repurchase programs, additional shares may be purchased from time to time in the open market or private transactions depending on price, availability and the Company s cash position. During the nine months ended September 30, 2011, the Company purchased 125,000 shares of its common stock for an aggregate cost of \$2.3 million. Using the September 30, 2011 closing price of \$18.52 per share, there were approximately 312,000 shares remaining that could be purchased under these programs.

8. SUBSEQUENT EVENTS

In October 2011, the Company purchased 60.6% of the Swanson Interest for \$1.5 million, which included \$0.1 million of undistributed earnings. After this transaction, the Company owns 92.2% and the non-controlling interest limited partners in aggregate own the remaining 7.8% in the partnership. After this transaction, Swanson owns 1.3% of STAR.

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.****EXECUTIVE SUMMARY****Our Business**

We operate outpatient physical and/or occupational therapy clinics that provide preventive and post-operative care for a variety of orthopedic-related disorders and sports-related injuries, treatment for neurologically-related injuries and rehabilitation of injured workers.

On July 25, 2011, the Company acquired a 51% interest in a 20 clinic multi-partner physical therapy group (July 2011 Acquisition). During the three months ended September 30, 2011, the Company opened eight new clinics, seven as satellites of existing clinics and one with a new partner. During the same three month period, the Company closed six clinics. During the nine months ended September 30, 2011, the Company opened 16 new clinics, 11 as satellites of existing clinics and five with new partners. During the same nine month period, the Company closed eight clinics. During 2010, we completed the following acquisitions (2010 Acquisitions):

Acquisition	Date 2010	% Interest Acquired	Number of Clinics
Northeast Acquisition	February 26 December	70%	5
2010 Mid-Atlantic Acquisition	21 December	70%	6
Southeast Acquisition	31	65%	14

The 2010 Mid-Atlantic Acquisition and the Southeast Acquisition are hereinafter referred to as the December 2010 Acquisitions .

The results of operations of the acquired clinics have been included in our consolidated financials since the date of their acquisition.

In addition to our owned clinics, we also manage physical therapy facilities for third parties, primarily physicians, with 16 third-party facilities under management as of September 30, 2011.

Selected Operating and Financial Data

The following table presents selected operating and financial data that we believe are key indicators of our operating performance.

Table of Contents

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2011	2010	2011	2010
Number of clinics, at the end of period	420	372	420	372
Working days	64	64	192	191
Average visits per day per clinic	20.8	20.3	20.8	20.6
Total patient visits	548,991	483,152	1,605,134	1,449,281
Net patient revenue per visit	\$ 104.43	\$ 107.11	\$ 104.59	\$ 105.45

RESULTS OF OPERATIONS**Three Months Ended September 30, 2011 Compared to the Three Months Ended September 30, 2010**

Net revenues increased to \$59.7 million for the three months ended September 30, 2011 (2011 Third Quarter) from \$53.4 million for the three months ended September 30, 2010 (2010 Third Quarter) due to an increase in patient visits from 483,000 to 549,000, offset by a decrease of \$2.68 in net patient revenue per visit from \$107.11 to \$104.43. Other revenues included a \$0.4 million year-over-year quarterly increase in physician services revenue. During the 2011 Third Quarter a large physician services franchisee defaulted on making payments. The Company recognized none of the \$446,000 in payments contractually due from the franchisee in the quarter and, as described below, fully reserved the outstanding receivable balance of \$750,000 from this franchisee.

Net income attributable to our common shareholders for the 2011 Third Quarter was \$4.1 million versus \$3.9 million for the 2010 Third Quarter. Net income was \$0.34 per diluted share for the 2011 Third Quarter as compared to \$0.33 per diluted share for the 2010 Third Quarter. Total diluted shares were 12.0 million for the 2011 Third Quarter and 11.9 million for the 2010 Third Quarter.

Net Patient Revenues

Net patient revenues increased to \$57.3 million for the 2011 Third Quarter from \$51.7 million for the 2010 Third Quarter, an increase of \$5.6 million, or 10.8%, primarily due to an increase in patient visits from 483,000 to 549,000, offset by a decrease of \$2.68 in net patient revenue per visit from \$107.11 to \$104.43.

The growth in patient visits was attributable to 74,000 visits in clinics opened or acquired between October 1, 2010 and September 30, 2011 (New Clinics), primarily due to the December 2010 Acquisitions and the July 2011 Acquisition. This increase was offset by a decrease of 8,000 visits for clinics opened or acquired prior to October 1, 2010 (Mature Clinics).

Net patient revenues related to New Clinics amounted to \$7.1 million, primarily due to the December 2010 Acquisitions and the July 2011 Acquisition. Net patient revenues for Mature Clinics decreased \$1.5 million for the 2011 Third Quarter as compared to the 2010 Third Quarter.

Net patient revenues are based on established billing rates less allowances and discounts for patients covered by contractual programs and workers compensation. Net patient revenues are after contractual and other adjustments relating to patient discounts from certain payors. Payments received under these programs are based on predetermined rates and are generally less than the established billing rates of the clinics.

Table of Contents**Other Revenues**

Other revenues increased by \$0.7 million from \$1.6 million to \$2.3 million primarily due to \$0.4 million higher revenues from physician services, which include clinical services related to intra articular joint and lumbar osteoarthritis programs as well as electro-diagnostic analysis.

Clinic Operating Costs

Clinic operating costs as a percentage of net revenues were 76.9% for the 2011 Third Quarter and 72.8% for the 2010 Third Quarter. The combination of the lost franchisee revenue of \$446,000, discussed previously, coupled with fully reserving the outstanding receivable balance of the defaulting franchisee of \$750,000 accounts for most of the margin contraction in the quarter.

Clinic Operating Costs Salaries and Related Costs

Salaries and related costs increased to \$32.4 million for the 2011 Third Quarter from \$28.0 million for the 2010 Third Quarter, an increase of \$4.4 million, or 15.9%. The \$4.4 million increase was attributable to the New Clinics. Salaries and related costs as a percentage of net revenues were 54.3% for the 2011 Third Quarter and 52.4% for the 2010 Third Quarter. If the lost franchisee revenue discussed above had been recognized, salaries and related costs as a percentage of net revenues would have been 53.9% for the 2011 Third Quarter.

Clinic Operating Costs Rent, Clinic Supplies, Contract Labor and Other

Rent, clinic supplies, contract labor and other were \$12.0 million for the 2011 Third Quarter and \$10.2 million for the 2010 Third Quarter. For New Clinics, rent, clinic supplies, contract labor and other amounted to \$1.8 million for the 2011 Third Quarter. For Mature Clinics, rent, clinic supplies, contract labor and other remained flat in the 2011 Third Quarter compared to the 2010 Third Quarter. Rent, clinic supplies, contract labor and other as a percentage of net revenues was 20.1% for the 2011 Third Quarter and 19.0% for the 2010 Third Quarter.

Clinic Operating Costs Provision for Doubtful Accounts

The provision for doubtful accounts was \$1.4 million for the 2011 Third Quarter and \$0.7 million for the 2010 Third Quarter. The provision for doubtful accounts for patients accounts receivable as a percentage of net patient revenues was 2.5% for the 2011 Third Quarter and 1.3% for the 2010 Third Quarter. In the 2011 Third Quarter, the bad debt expense attributable to the physician services franchisee default was \$750,000. Primarily as the result of the described franchisee default, on the balance sheet the allowance for doubtful accounts for accounts receivable-other, which includes physician services, increased from \$83,000 in the third quarter of 2010 to \$916,000 as of the end of the most recent quarter.

Our allowance for doubtful accounts for patient accounts receivable as a percentage of total patient accounts receivable was 7.1% at September 30, 2011, as compared to 8.1% at December 31, 2010. Our days sales outstanding was 48 days at September 30, 2011 compared to 45 days at December 31, 2010.

Corporate Office Costs

Corporate office costs, consisting primarily of salaries and benefits of corporate office personnel, rent, insurance costs, depreciation and amortization, travel, legal, professional, and recruiting fees, were \$5.1 million for the 2011 Third Quarter and \$5.8 million for the 2010 Third Quarter. Corporate office costs were lower in the 2011 Third Quarter due to a significant reduction in accrued incentive compensation and bonus expense as compared to the 2010 Third Quarter. As a percentage of net revenues, corporate office costs were 8.6% for the 2011 Third Quarter and 10.9% for the 2010 Third Quarter.

Interest Expense

Interest expense increased to \$149,000 in the 2011 Third Quarter compared from \$50,000 in the 2010 Third Quarter due to an increase in the average borrowings outstanding under our revolving credit facility during the 2011 period compared to the 2010 period. At September 30, 2011, \$26.4 million was outstanding under our revolving credit facility.

Table of Contents**Provision for Income Taxes**

The provision for income taxes increased to \$2.7 million for the 2011 Third Quarter from \$2.5 million for the 2010 Third Quarter. During the 2011 and 2010 Third Quarters, the Company accrued state and federal income taxes at an effective tax rate (provision for taxes divided by the difference between income before taxes and net income attributable to non-controlling interests) of 39.3%.

Non-controlling Interests

Net income attributable to non-controlling interests was \$1.8 million for the 2011 Third Quarter and \$2.3 million for the 2010 Third Quarter. The reduction is attributable to the Company's increased ownership interest in certain physical therapy partnerships and the reduced earnings in the Company's principal physician services partnership as a result of the franchisee default. Net income attributable to non-controlling interests as a percentage of operating income before corporate office costs was 12.7% for the 2011 Third Quarter and 15.8% for the 2010 Third Quarter.

Nine Months Ended September 30, 2011 Compared to the Nine Months Ended September 30, 2010

Net revenues increased to \$176.3 million for the nine months ended September 30, 2011 (2011 Nine Months) from \$157.9 million for the nine months ended September 30, 2010 (2010 Nine Months) due to an increase in patient visits from 1.4 million to 1.6 million offset by a decrease of \$0.86 in net patient revenue per visit from \$105.45 to \$104.59, as well as an increase of \$2.8 million in revenue from physician services recorded in Other revenues .

Net income attributable to our common shareholders for the 2011 Nine Months was \$12.7 million versus \$11.5 million for the 2010 Nine Months. Net income was \$1.06 per diluted share for the 2011 Nine Months as compared to \$0.97 per diluted share for the 2010 Nine Months. Total diluted shares were 12.0 million for the 2011 Nine Months and 11.9 million for the 2010 Nine Months.

Net Patient Revenues

Net patient revenues increased to \$167.9 million for the 2011 Nine Months from \$152.8 million for the 2010 Nine Months, an increase of \$15.1 million, or 9.9%, primarily due to an increase in patient visits from 1.4 million to 1.6 million.

The growth in patient visits was attributable to 166,000 visits in New Clinics, primarily due to the December 2010 Acquisitions and July 2011 Acquisition. This increase was offset by a decrease of 10,000 visits for Mature Clinics.

The increase in net patient revenues of \$15.1 million related to New Clinics, primarily due to the December 2010 Acquisitions and the 2011 July Acquisition.

Net patient revenues are based on established billing rates less allowances and discounts for patients covered by contractual programs and workers' compensation. Net patient revenues are after contractual and other adjustments relating to patient discounts from certain payors. Payments received under these programs are based on predetermined rates and are generally less than the established billing rates of the clinics.

Other Revenues

Other revenues increased by \$3.3 million from \$5.1 million to \$8.4 million primarily due to \$2.8 million higher revenues from physician services, which include clinical services related to intra articular joint and lumbar osteoarthritis programs as well as electro-diagnostic analysis.

Clinic Operating Costs

Clinic operating costs as a percentage of net revenues were 74.0% for the 2011 Nine Months and 73.1% for the 2010 Nine Months.

Clinic Operating Costs - Salaries and Related Costs

Salaries and related costs increased to \$93.2 million for the 2011 Nine Months from \$82.4 million for the 2010 Nine Months, an increase of \$10.8 million, or 13.1%. The \$10.8 million increase included costs of \$10.0 million attributable to the New Clinics and an increase of \$0.8 million in costs related to Mature Clinics. Salaries and

Table of Contents

related costs as a percentage of net revenues were 52.8% for the 2011 Nine Months and 52.2% for the 2010 Nine Months.

Clinic Operating Costs Rent, Clinic Supplies, Contract Labor and Other

Rent, clinic supplies, contract labor and other were \$34.7 million for the 2011 Nine Months and \$30.5 million for the 2010 Nine Months. For New Clinics, rent, clinic supplies, contract labor and other amounted to \$4.4 million for the 2011 Nine Months. For Mature Clinics, rent, clinic supplies, contract labor and other decreased by \$0.2 million in the 2011 Nine Months. Rent, clinic supplies, contract labor and other as a percentage of net revenues was 19.7% for the 2011 Nine Months and 19.3% for the 2010 Nine Months.

Clinic Operating Costs Provision for Doubtful Accounts

The provision for doubtful accounts was \$2.6 million for the 2011 Nine Months and \$2.5 million for the 2010 Nine Months. The provision for doubtful accounts for patients accounts receivable as a percentage of net patient revenues was 1.5% for the 2011 Nine Months and 1.6% for the 2010 Nine Months. Our allowance for doubtful accounts for patient accounts receivable as a percentage of total patient accounts receivable was 7.1% at September 30, 2011, as compared to 8.1% at December 31, 2010. Our days sales outstanding was 48 days at September 30, 2011 compared to 45 days at December 31, 2010.

Corporate Office Costs

Corporate office costs, consisting primarily of salaries and benefits of corporate office personnel, rent, insurance costs, depreciation and amortization, travel, legal, professional, and recruiting fees, were \$17.6 million for the 2011 Nine Months and \$17.1 million for the 2010 Nine Months. As a percentage of net revenues, corporate office costs were 10.0% for the 2011 Nine Months and 10.8% for the 2010 Nine Months.

Interest and Other Income, net

Interest and other income in the 2010 Nine Months included a pre-tax gain of \$578,000 from the sale of our 51% interest in a five clinic Texas joint venture.

Interest Expense

Interest expense increased to \$331,000 in the 2011 Nine Months compared to \$195,000 in the 2010 Nine Months due to an increase in the average borrowings outstanding under our revolving credit facility during the 2011 period compared to the 2010 period. At September 30, 2011, \$26.4 million was outstanding under our revolving credit facility.

Provision for Income Taxes

The provision for income taxes increased to \$8.3 million for the 2011 Nine Months from \$7.4 million for the 2010 Nine Months. During the 2011 and 2010 Nine Months, the Company accrued state and federal income taxes at an effective tax rate (provision for taxes divided by the difference between income before taxes and net income attributable to non-controlling interests) of 39.3%.

Non-controlling Interests

Net income attributable to non-controlling interests was \$6.9 million for the 2011 Nine Months and \$6.8 million for the 2010 Nine Months. Net income attributable to non-controlling interests as a percentage of operating income before corporate office costs was 15.0% for the 2011 Nine Months and 16.1% for the 2010 Nine Months.

LIQUIDITY AND CAPITAL RESOURCES

We believe that our business is generating sufficient cash flow from operating activities to allow us to meet our short-term and long-term cash requirements, other than those with respect to future acquisitions. At September 30, 2011, we had \$9.5 million in cash compared to cash of \$9.2 million at December 31, 2010. Although start-up costs associated with opening new clinics and our planned capital expenditures are significant, we believe that our cash and unused availability under our \$75.0 million revolving credit facility are sufficient to fund the working capital needs of our operating subsidiaries, corporate costs, dividends, purchases of our common stock, accrued clinic closure costs, future clinic development and investments through at least September 2012. Significant acquisitions of clinics and/or non-controlling interests would likely require financing under our existing revolving credit agreement (defined below).

Table of Contents

During the 2011 Nine Months, \$20.6 million was provided by operations, \$20.9 million was derived from net proceeds from our revolving credit facility and \$0.8 million was obtained from the exercise of stock options and related tax benefits. The major uses of cash included: purchase of business (\$8.1 million), payments for acquisitions of non-controlling interests (\$18.9 million), distributions to non-controlling interest partners (\$7.3 million), purchases of our common stock (\$2.3 million), purchases of fixed assets (\$2.4 million) and payments of cash dividends to our shareholders (\$2.8 million).

Effective August 27, 2007, we entered into a credit agreement with a commitment for a \$30.0 million revolving credit facility which was increased to \$50.0 million effective June 4, 2008 (Credit Agreement). Effective March 18, 2009, we amended the Credit Agreement to permit us to purchase up to \$15,000,000 of our common stock subject to compliance with certain covenants, including the requirement that after giving effect to any stock purchase, our consolidated leverage ratio (as defined in the Credit Agreement) be less than 1.0 to 1.0 and that any stock repurchased be retired within seven days of purchase. Effective October 13, 2010, we amended the Credit Agreement to extend the maturity date from August 31, 2011 to August 31, 2015. In addition, the Credit Agreement was amended to adjust the pricing grid which is based on our consolidated leverage ratio with the applicable spread over LIBOR ranging from 1.6% to 2.5% or the applicable spread over the Base Rate ranging from .1% to 1%. On July 14, 2011, we amended the Credit Agreement to increase the commitment from \$50.0 million to \$75.0 million. The Credit Agreement is unsecured and has loan covenants, including requirements that we comply with a consolidated fixed charge coverage ratio and consolidated leverage ratio. Proceeds from the Credit Agreement may be used for working capital, acquisitions, purchases of our common stock, dividend payments to our common stockholders, capital expenditures and other corporate purposes. Fees under the Credit Agreement include an unused commitment fee ranging from .1% to .25% depending on our consolidated leverage ratio and the amount of funds outstanding under the Credit Agreement. On September 30, 2011, \$26.4 million was outstanding on the revolving credit facility resulting in \$48.6 million of availability, and we were in compliance with all of the covenants thereunder.

In five separate transactions during the nine months ended September 30, 2011, we purchased a total of 20.2% of the 30% non-controlling interest in STAR Physical Therapy, LP, a subsidiary of the Company (STAR). The aggregate purchase price paid for the 20.2% interest was \$15.3 million, which included \$0.8 million of undistributed earnings. The remaining purchase price of \$14.5 million, less future tax benefits of \$5.7 million, was recognized as an adjustment to additional paid-in capital. After these transactions, we owned 90.2% and the non-controlling interest limited partners in aggregate owned the remaining 9.8% in the partnership. In October 2011, we purchased 2.0% of the 9.8% interest for \$1.5 million, which included \$0.1 million of undistributed earnings. After the October transaction, we own 92.2% of STAR and the non-controlling interest limited partners in aggregate own the remaining 7.8% in the partnership.

Effective June 30, 2011, we purchased the 35% non-controlling interest in one of our Texas partnerships (June 2011 Noncontrolling Interest Purchase). The aggregate purchase price for the 35% interest was \$3.9 million, of which \$3.5 million was paid in cash and \$367,272 was paid in the form of a note to the seller, which is described in detail below. The purchase price included \$0.2 million of undistributed earnings and \$0.2 million in invested capital. The remaining purchase price of \$3.5 million, less future tax benefits of \$1.4 million, was recognized as an adjustment to additional paid-in capital. After this transaction, we own 100% of the partnership.

In addition, during the nine months ended September 30, 2011, we purchased the non-controlling interests of two other partners for \$112,000, which included \$47,000 of undistributed earnings. The remaining purchase price of approximately \$60,000, less future tax benefits of \$23,000, was recognized as an adjustment to additional paid-in capital.

Historically, we have generated sufficient cash from operations to fund our development activities and to cover operational needs. We plan to continue developing new clinics and making additional acquisitions. We also from time to time purchase the non-controlling interests in our Clinic Partnerships. Generally, any acquisition or purchase of non-controlling interests is expected to be accomplished using a combination of cash and financing. Any large acquisition would likely require financing.

We make reasonable and appropriate efforts to collect accounts receivable, including applicable deductible and co-payment amounts, in a consistent manner for all payor types. Claims are submitted to payors daily, weekly or

monthly in accordance with our policy or payor's requirements. When possible, we submit our claims electronically. The collection process is time consuming and typically involves the submission of claims to multiple payors whose payment of claims may be dependent upon the payment of another payor. Claims under litigation and vehicular incidents can take a year or longer to collect. Medicare and other payor claims relating to new clinics awaiting Medicare Rehab Agency status approval initially may not be submitted for six months or more. When all reasonable internal collection efforts have been exhausted, accounts are written off prior to sending them to outside collection firms. With managed care, commercial health plans and self-pay payor type receivables, the write-off generally occurs after the account receivable has been outstanding for at least 120 days.

Table of Contents

We generally enter into various notes payable as a means of financing our acquisitions. Our presently outstanding notes payable relate to our 2010 Acquisitions, the June 2011 Noncontrolling Interest Purchase and the July 2011 Acquisition. For the 2010 Acquisitions, we entered into several notes payable aggregating \$500,000. The notes are payable in two equal annual installments of principal over two years, plus any accrued and unpaid interest. Interest accrues at various interest rates ranging from 3.25% to 4.0% per annum. At September 30, 2011, the balance on these notes payable was \$400,000. In addition, we assumed leases with remaining terms of one month to six years for the operating facilities. For the June 2011 Noncontrolling Interest Purchase, we entered into a note payable in the amount of \$367,272 payable in two equal annual installments of \$183,636, plus any accrued and unpaid interest. Interest accrues at 3.25% per annum. For the July 2011 Acquisition, we entered into a note payable in the amount of \$200,000 payable in two equal annual installments of \$100,000 plus any accrued and unpaid interest. Interest accrues at 3.25% per annum. In addition, we assumed leases with remaining terms of one month to ten years for the operating facilities. In conjunction with the 2010 Acquisitions and the July 2011 Acquisition, in the event that a limited minority partner's employment ceases at any time after three years from the acquisition date, we have agreed to repurchase that individual's non-controlling interest at a predetermined multiple of earnings before interest and taxes.

The purchase agreement related to the physician services business in which we acquired a majority interest in October 2008 provides for possible contingent consideration of up to \$3,781,000 based on the achievement of a designated level of operating results within a three-year period following the acquisition. In 2009 and 2010, we paid \$1,200,000 and \$1,080,000, respectively, of additional consideration related to the operating results for the first and second years. Such amounts were recorded as additional goodwill.

The purchase agreement related to the acquisition of a nine clinic practice in June 2008 also provides for possible contingent consideration of up to \$1,500,000 based on the achievement of a designated level of operating results within a three-year period following the acquisition. There was no contingent consideration earned based on the operating results of this acquisition during the three-year period.

From September 2001 through December 31, 2008, the Board authorized us to purchase, in the open market or in privately negotiated transactions, up to 2,250,000 shares of our common stock. In March 2009, the Board authorized the repurchase of up to 10% or approximately 1,200,000 shares of our common stock (March 2009 Authorization). In connection with the March 2009 Authorization, we amended our bank credit agreement to permit the share repurchases of up to \$15,000,000. We are required to retire shares purchased under the March 2009 Authorization. Since there is no expiration date for these share repurchase programs, additional shares may be purchased from time to time in the open market or private transactions depending on price, availability and our cash position. During the three months ended September 30, 2011, we purchased 125,000 shares of our common stock for an aggregate cost of \$2.3 million. Using the September 30, 2011 closing price of \$18.52 per share, there were approximately 312,000 shares remaining that could be purchased under these programs.

FACTORS AFFECTING FUTURE RESULTS

The risks related to our business and operations include:

The uncertain economic conditions and the historically high unemployment rate in the United States may have material adverse impacts on our business and financial condition that we currently cannot predict.

We depend upon reimbursement by third-party payors including Medicare and Medicaid.

Changes as a result of healthcare reform legislation may affect our business.

We depend upon the cultivation and maintenance of relationships with the physicians in our markets.

We also depend upon our ability to recruit and retain experienced physical and occupational therapists.

Our revenues may fluctuate due to weather.

Our operations are subject to extensive regulation.

We operate in a highly competitive industry.

We may incur closure costs and losses.

Future acquisitions may use significant resources, may be unsuccessful and could expose us to unforeseen liabilities.

Certain of our internal controls, particularly as they relate to billings and cash collections, are largely decentralized at our clinic locations.

See Risk Factors in Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2010.

FORWARD LOOKING STATEMENTS

Forward-Looking Statements

We make statements in this report that are considered to be forward-looking within the meaning under Section 21E of the Securities Exchange Act of 1934. These statements contain forward-looking information relating to the financial condition, results of operations, plans, objectives, future performance and business of our Company. These statements (often using words such as believes, expects, intends, plans, appear, should and similar words) involve risks and uncertainties that could cause actual results to differ materially from those we project. Included among such statements are those relating to opening new clinics, availability of personnel and the reimbursement environment. The forward-looking statements are based on our current views and assumptions and actual results could differ materially from those anticipated in such forward-looking statements as a result of certain risks, uncertainties, and factors, which include, but are not limited to:

- changes in Medicare guidelines and reimbursement or failure of our clinics to maintain their Medicare certification status,
- revenue and earnings expectations;
- general economic conditions;
- business and regulatory conditions including federal and state regulations;
- changes as the result of government enacted national healthcare reform;
- availability and cost of qualified physical and occupational therapists;
- personnel productivity;
- competitive, economic or reimbursement conditions in our markets which may require us to reorganize or close certain clinics and thereby incur losses and/or closure costs including the possible write-down or write-off of goodwill and other intangible assets;
- changes in reimbursement rates or payment methods from third party payors including government agencies and deductibles and co-pays owed by patients;
- maintaining adequate internal controls;
- availability, terms, and use of capital;
- acquisitions, purchase of non-controlling interests (minority interests) and the successful integration of the operations of the acquired businesses; and
- weather and other seasonal factors.

Many factors are beyond our control. Given these uncertainties, you should not place undue reliance on our forward-looking statements. Please see our periodic reports filed with the Securities and Exchange Commission (the SEC) for more information on these factors. Our forward-looking statements represent our estimates and assumptions only as of the date of this report. Except as required by law, we are under no obligation to update any forward-looking statement, regardless of the reason the statement is no longer accurate.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

We do not maintain any derivative instruments, interest rate swap arrangements, hedging contracts, futures contracts or the like. The Company's primary market risk exposure is the changes in interest rates obtainable on our revolving credit agreement. The interest on our revolving credit agreement is based on a variable rate. At September 30, 2011, \$26.4 million was outstanding on our revolving credit facility. Based on the balance of the revolving credit facility at September 30, 2011, any change in the interest rate of 1% would yield a decrease or increase in annual interest expense of \$264,000.

Table of Contents**ITEM 4. CONTROLS AND PROCEDURES.****(a) Evaluation of Disclosure Controls and Procedures**

As of the end of the period covered by this report, the Company's management completed an evaluation, under the supervision and with the participation of our principal executive officer and principal financial officer, of the effectiveness of our disclosure controls and procedures. Based on this evaluation, our principal executive officer and principal financial officer concluded (i) that our disclosure controls and procedures are designed to ensure that information required to be disclosed in the reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to our management, including our principal executive officer and principal financial officer, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure and (ii) that our disclosure controls and procedures are effective.

(b) Changes in Internal Control Over Financial Reporting

There have been no changes in our internal control over financial reporting during the period covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION**ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**

The following table provides information regarding shares of the Company's common stock repurchased by the Company during the quarter ended September 30, 2011.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)	Maximum Number of Shares that May Yet be Purchased Under the Plans or Programs (1)
July 1, 2011 through July 31, 2011		\$		
August 1, 2011 through August 31, 2011		\$		
September 1, 2011 through September 30, 2011	125,012	\$ 18.11	125,012	312,000
Total	125,012	\$ 18.11	125,012	312,000

- (1) In September 2001 through December 31, 2008, the Board of Directors (Board) authorized the Company to purchase, in the open market or in privately negotiated transactions, up to 2,250,000 shares of its common stock. As of December 31, 2008, there were approximately 50,000 shares remaining that could be purchased under these programs. In March 2009, the Board authorized the repurchase of up to 10% or approximately 1,200,000 shares of the Company's common stock. In connection with the March 2009 Authorization, the Company amended its Credit Agreement to permit the share repurchases of up to \$15,000,000. The Company is required to retire shares purchased under the March 2009 Authorization. Since there is no expiration date for these share repurchase programs, additional shares may be purchased from time to time in the open market or private transactions depending on price, availability and the Company's cash position. During the three months ended September 30, 2011, the Company purchased 125,012 shares for an aggregate price of \$2.3 million. There were no shares purchased in the preceding six months ended June 30, 2011. The number of shares that may yet be purchased is calculated on the shares authorized to be repurchased less those repurchased, subject to this cumulative

\$15,000,000 limit. Without amending the Credit Agreement, there were approximately 312,000 shares remaining that could be purchased under these programs using the September 30, 2011 closing price of \$18.52 per share.
