PROSPECTUS SUMMARY

The items in the following summary are described in more detail later in this prospectus. This summary provides an overview of selected information and does not contain all the information you should consider. Therefore, you should also read the more detailed information set out in this prospectus, including the financial statements.

We are one of the nation's fastest growing operators of large sports, athletic, fitness and family recreation centers based on revenue. As of April 30, 2004, we operated 33 centers primarily in suburban locations across eight states under the LIFE TIME FITNESS® brand. In addition to traditional health club offerings, most of our centers include an expansive selection of premium amenities and services, such as indoor swimming pools, basketball and racquet courts, child care centers and spas, in a resort-like setting. We believe our distinctive centers provide a unique experience at a compelling value for our members, resulting in a high number of memberships per center.

Over the past 12 years, as we have opened new centers, we have refined the size and design of our centers. Of our 33 centers, we consider 24 to be of our large format design, and of these 24 centers, we consider 12 to be of our current model design. Although the size and design of our centers may vary, our business strategy and operating processes remain consistent across all of our centers. Each of our current model centers targets 11,500 memberships by offering approximately 105,000 square feet of health, fitness and family recreation programs and services. Most of the centers that we have opened since 2000 conform to our current model center, and each of these centers has delivered growth in membership levels, revenue and profitability across a range of geographic markets.

Throughout our history, we have consistently increased our revenue by opening new centers, increasing the number of memberships per existing center and focusing on the sale of additional products and services in our centers. For each of the fiscal years from 2000 to 2003, we experienced annual revenue growth of 74%, 45%, 43% and 32%, respectively, with revenue of \$256.9 million in 2003; annual EBITDA growth of 92%, 54%, 35% and 63%, respectively, with EBITDA of \$80.0 million in 2003; and annual net income growth of 55%, 7%, 86% and 178%, respectively, with net income of \$20.6 million in 2003.

Our Competitive Strengths

We offer comprehensive and convenient programs and services.

Our large format centers offer sports, athletic, fitness and family recreation programs and services and are conveniently located in high traffic suburban areas. Unlike traditional health clubs, these centers typically offer large indoor and outdoor family recreation pools, climbing walls and basketball and racquet courts, in addition to approximately 400 pieces of cardiovascular and resistance training equipment and an extensive offering of health and fitness classes, as well as child-care, spa and dining services. We design and operate our large format centers to accommodate a large and active membership base by providing access to the centers 24 hours a day, seven days a week.

We offer a value proposition that encourages membership loyalty.

The variety of amenities and services we offer exceeds most other health and fitness center alternatives. Our monthly membership dues typically range from \$40 to \$60 per month for an individual membership and from \$80 to \$130 per month for a couple or family membership. Our value proposition and customer-focused approach create loyalty among our members, resulting in an attrition rate that was 6.3% better than the industry average in 2001 and 5.7% better than the industry average in 2002.

We have an established and profitable economic model.

Our economic model is based on attracting a large membership base within a short time period, as well as retaining those members and maintaining tight expense control. We expect the typical membership

Table of Contents

base at our large format centers to increase from approximately 35% of targeted membership capacity at the end of the first month of operations to over 90% of targeted membership capacity by the end of the third year of operations. Average targeted membership capacity for all of our large format centers is approximately 10,500, and 11,500 for our large format centers that are current model centers. Average revenue at our 15 large format centers that were opened in 2001 or earlier exceeded \$10.7 million for the year ended December 31, 2003. At these centers during the same period, EBITDA averaged 40% of revenue, including corporate, general and administrative expense of approximately 9% of revenue, and net income averaged approximately 15% of revenue. Our investment for a large format center has averaged approximately \$17.8 million, and for a current model center has averaged approximately \$23.5 million.

We believe we have a disciplined and sophisticated site selection and development process.

We believe we have developed a disciplined and sophisticated process to identify specific sites for future centers. This multi-step process is based upon demographic, psychographic and competitive criteria generated from profiles of already successful centers. As a result of our strict adherence to this process, we have never closed a center, and our large format centers produced, on average, EBITDA in excess of 21% of revenue and net income of less than 1% of revenue during their first year of operation.

We have a committed and experienced senior management team.

Our senior management team has extensive and diverse professional experience. This team is led by our Chief Executive Officer and founder, Bahram Akradi, who has worked in the health and fitness industry for over 20 years, our Chief Operating Officer, Michael Gerend, and our Chief Financial Officer, Michael Robinson. The talented senior management team brings experience from both inside and outside the health and fitness industry and has been instrumental in building and growing our company.

Our Growth Strategy

Drive membership growth.

New Centers. We opened four centers in 2003, and we plan to open six large format centers in 2004, five of which will be current model centers, and six current model centers in 2005 in both new and existing markets. We believe, based upon our data, that there is the potential for adding at least 225 additional current model centers throughout the U.S. in existing as well as new markets.

Existing Centers. Of our 33 centers, the nine that we opened in 2002 and 2003 averaged 65% of targeted membership capacity as of December 31, 2003. We expect the continuing ramp in memberships at these centers to contribute significantly to our growth in 2004 as these centers ramp toward our goal of 90% of targeted membership capacity by the end of their third year of operations. We also plan to continue to drive membership growth at other centers that are not yet at targeted capacity.

Increase revenue per membership.

From 1999 to 2003, we increased revenue per membership from \$659 to \$1,089. We believe the revenue from sales of our in-center products and services will grow at a faster rate than enrollment fees and membership dues. From 1999 to 2003, revenue from the sale of in-center products and services grew from \$10.6 million to \$54.2 million. We expect to continue to drive in-center revenue by increasing sales of our current in-center products and services and introducing new products and services, thereby increasing revenue per membership.

Leverage the LIFE TIME FITNESS brand into the broader health and wellness industry.

Our rapidly expanding membership base has allowed us to expand the LIFE TIME FITNESS brand into other wellness-related offerings. We plan to leverage the LIFE TIME FITNESS brand into other businesses in the broader health and wellness industry. We have developed and market a line of nutritional products, we circulate 500,000 copies of each issue of our magazine, *Experience Life*, and we attract an international field of participants to our annual LIFE TIME FITNESS triathlon.

Table of Contents

Risks Affecting Us

Our business is subject to numerous risks as discussed more fully in the section entitled "Risk Factors" immediately following this Prospectus Summary. In particular, if we are unable to identify and acquire suitable sites for new centers, are unable to attract and retain members or experience delays in opening new centers, we may not be able to achieve our business objectives. If our business continues to grow, the continued growth may place strains on our systems and our management team, which has never had direct responsibility for managing a publicly traded company. In addition, because of the capital-intensive nature of our business, we will need to incur additional indebtedness and, if we are not able to access additional capital, our ability to expand our business may be impaired.

Our principal executive offices are located at 6442 City West Parkway, Eden Prairie, Minnesota 55344, and our telephone number is (952) 947-0000. Our web site is located at www.lifetimefitness.com. The information contained on our web site is not a part of this prospectus.

- (1) The statement of operations data for the year ended December 31, 2003 and the three months ended March 31, 2004 and the balance sheet data as of March 31, 2004 reflect the pro forma effect of the conversion of all the redeemable preferred stock into shares of common stock in connection with this offering.
- (2) In-center revenue includes revenue generated at our centers from fees for personal training, group fitness training and other member activities, sales of products offered at our LifeCafe, sales of products and services offered at our LifeSpa and renting space in certain of our centers.
- (3) For the year ended December 31, 2002 we recorded an asset impairment charge of \$7.0 million related to our only executive facility, which is located in downtown Minneapolis, Minnesota, and a restaurant that we operate in the same building. The center is one of only two of our centers that are located in urban areas. This executive facility and restaurant differ significantly from our standard model and the initial cash flow results have not been as high as projected. Additionally, this facility and restaurant are located in a more costly geographic area of downtown Minneapolis. The charge represents the difference between the fair value of the assets as determined by discounted estimated future cash flows and the carrying amount of the assets.
- (4) A loss on the extinguishment of debt of \$2.9 million was recorded for the year ended December 31, 2001. The charge consisted of early extinguishment fees and the write-off of loan costs related to the original debt in connection with the refinancing of 10 of our centers.

Edgar Filing: LIFE TIME FITNESS INC - Form S-1/A

- (5) In 1999, we formed Bloomingdale LIFE TIME Fitness, L.L.C., referred to as Bloomingdale LLC, with two unrelated organizations for the purpose of constructing, owning and operating a sports, fitness and family recreation center in Bloomingdale, Illinois. Each member made an initial capital contribution of \$2.0 million and owns a one-third interest in Bloomingdale LLC. The center

Table of Contents

commenced operations in February 2001. The terms of the relationship among the members are governed by an operating agreement. Bloomingdale LLC is accounted for as an investment in an unconsolidated affiliate and is not consolidated in our financial statements.

- (6) The diluted weighted average number of common shares outstanding is the weighted average number of common shares plus the weighted average conversion of any dilutive common stock equivalents, such as redeemable preferred stock, and the assumed weighted average exercise of dilutive stock options using the treasury stock method. For the year ended December 31, 2001, there were no dilutive common stock equivalents. For the year ended December 31, 2002, only the shares issuable upon the exercise of stock options were dilutive. For the year ended December 31, 2003 and each of the three month periods ended March 31, 2003 and 2004, the shares issuable upon the exercise of stock options and the conversion of redeemable preferred stock were dilutive. The number of shares excluded from the computation of dilutive earnings per share was 14,247,600, 11,323,000 and 0 for the years ended December 31, 2001, 2002 and 2003, respectively, and 0 for the three months ended March 31, 2003 and 2004.

The following table summarizes the weighted average common shares for basic and diluted earnings per share computations:

	December 31,			March 31,	
	2001	2002	2003	2003	2004
(In thousands)					
Weighted average number of common shares outstanding basic	12,360	15,054	16,072	15,984	16,156
Effect of dilutive stock options		1,376	1,522	1,340	2,043
Effect of dilutive redeemable preferred shares outstanding			11,018	10,447	11,018
Weighted average number of common shares outstanding dilutive	12,360	16,430	28,612	27,771	29,217

- (7) Assumes the conversion of all preferred stock into _____ shares of common stock upon completion of this offering and the sale by us of _____ shares of common stock at an assumed initial public offering price of \$ _____ per share in this offering and the application of the estimated aggregate net proceeds to us of \$ _____ million after deducting underwriting discounts and commissions and estimated offering expenses payable by us of \$ _____. We intend to use up to \$15.0 million of the net proceeds to repay amounts outstanding under our revolving credit facility and, for purposes of this table, we have assumed that we will repay \$15.0 million under our revolving credit facility. Amounts repaid under our revolving credit facility may, subject to the terms of the facility, be reborrowed by us. We also intend to use approximately \$9.0 million to repay a loan under our construction facility. See Use of Proceeds. The as adjusted balance sheet data are presented as if this offering and the application of the net proceeds from this offering occurred on March 31, 2004.
- (8) Membership dues, enrollment fees and in-center revenue for a center are included in comparable center revenue growth beginning on the first day of the thirteenth full calendar month of the center's operation.
- (9) Average revenue per membership is total center revenue for the period divided by an average number of memberships for the period, where average number of memberships for the period is derived from dividing the sum of the total memberships outstanding at the end of each month during the period by the total number of months in the period.
- (10) Average in-center revenue per membership is total in-center revenue for the period divided by the average number of memberships for the period, where the average number of memberships for the period is derived from dividing the sum of the total memberships outstanding at the end of each month during the period by the total number of months in the period.

Table of Contents

- (11) EBITDA consists of net income plus interest expense, net, provision for income taxes and depreciation and amortization. This term, as we define it, may not be comparable to a similarly titled measure used by other companies and is not a measure of performance presented in accordance with GAAP. We use EBITDA as a measure of operating performance. The funds depicted by EBITDA are not necessarily available for discretionary use if they are reserved for particular capital purposes, to maintain compliance with debt covenants, to service debt or to pay taxes. EBITDA should not be considered as a substitute for net income, cash flows provided by operating activities or other income or cash flow data prepared in accordance with GAAP. Additional details related to EBITDA are provided in Management's Discussion and Analysis of Financial Condition and Results of Operations - Non-GAAP Financial Measures.

The following table provides a reconciliation of net income, the most directly comparable GAAP measure, to EBITDA:

	Fiscal Year Ended December 31,			Three Months Ended March 31,	
	2001	2002	2003	2003	2004
	(In thousands)

Interest expense, net	12,035	14,950	19,132	4,563	4,612
Provision for income taxes	3,019	5,971	15,006	3,067	3,977
Depreciation and amortization	17,280	20,801	25,264	5,833	6,947
EBITDA	\$36,317	\$49,143	\$80,007	\$17,675	\$21,183

- (12) EBITDA margin is the ratio of EBITDA to total revenue.
- (13) Capital expenditures represent investments in our new centers, costs related to updating and maintaining our existing centers and other infrastructure investments. For purposes of deriving capital expenditures from our cash flow statement, capital expenditures include our purchases of property and equipment and property and equipment purchases financed through notes payable and capital lease obligations.
- (14) The operating data being presented in these items include the center owned by Bloomingdale LLC. See also footnote 5 for a discussion of Bloomingdale LLC. The data presented elsewhere in this section exclude the center owned by Bloomingdale LLC.

Table of Contents

RISK FACTORS

Investing in our common stock involves a high degree of risk. You should carefully consider the risks described below before participating in this offering. You should also refer to the other information in this prospectus, including our financial statements and the related notes. If any of the following risks actually occurs, our business, financial condition, operating results or cash flows could be materially harmed. As a result, the trading price of our common stock could decline, and you might lose all or part of your investment.

Risks Related to Our Business

If we are unable to identify and acquire suitable sites for new sports, fitness and family recreation centers, our revenue growth rate and profits may be negatively impacted.

To successfully expand our business, we must identify and acquire sites that meet the site selection criteria we have established. In addition to finding sites with the right demographic and other measures we employ in our selection process, we also need to evaluate the penetration of our competitors in the market. We face significant competition from other health and fitness center operators for sites that meet our criteria, and as a result we may lose those sites, our competitors could copy our format or we could be forced to pay significantly higher prices for those sites. If we are unable to identify and acquire sites for new sports, fitness and family recreation centers, our revenue growth rate and profits may be negatively impacted. Additionally, if our analysis of the suitability of a site is incorrect, we may not be able to recover our capital investment in developing and building the new center. For example, in 2002 we recorded an asset impairment charge of \$7.0 million related to our executive facility, which is located in downtown Minneapolis, Minnesota, and a restaurant that we operate in the same building.

We may be unable to attract and retain members, which could have a negative effect on our business.

The success of our business depends on our ability to attract and retain members, and we cannot assure you that we will be successful in our marketing efforts or that the membership levels at our centers will not materially decline, especially at those centers that have been in operation for an extended period of time. All of our members can cancel their membership at any time upon one month's notice. In addition, we experience attrition and must continually attract new members in order to maintain our membership levels. There are numerous factors that could lead to a decline in membership levels or that could prevent us from increasing membership at newer centers where membership is generally not yet at a targeted capacity, including market maturity or saturation, a decline in our ability to deliver quality service at a competitive price, direct and indirect competition in the areas where our centers are located, a decline in the public's interest in health and fitness, changes in discretionary spending trends and general economic conditions. In addition, we may decide to close a center and attempt to move members of that center to a different center or we may have to temporarily relocate members if a center is closed for remodeling or due to fire, earthquake or other casualty.

Delays in new sports, fitness and family recreation center openings could materially adversely affect our financial performance.

In order to meet our objectives, it is important that we open new centers on schedule. A significant amount of time and expenditure of capital is required to develop and construct new centers. If we are significantly delayed in opening new centers, our competitors may be able to open new clubs in the same market before we open our centers. This change in the competitive landscape could negatively impact our pre-opening sales of memberships and increase our investment costs. In addition, delays in opening new

Table of Contents

centers could hurt our ability to meet our growth objectives. Our ability to open new centers on schedule depends on a number of factors, many of which are beyond our control. These factors include:

obtaining acceptable financing for construction of new sites;

obtaining entitlements, permits and licenses necessary to complete construction of the new center on schedule;

recruiting, training and retaining qualified management and other personnel;

securing access to labor and materials necessary to develop and construct our centers;

delays due to material shortages, labor issues, weather conditions or other acts of god, discovery of contaminants, accidents, deaths or injunctions; and

general economic conditions.

Our continued growth could place strains on our management, employees, information systems and internal controls which may adversely impact our business and the value of your investment.

Over the past several years, we have experienced significant growth in our business activities and operations, including an increase in the number of our sports, fitness and family recreation centers. Our past expansion has placed, and any future expansion will place, significant demands on our administrative, operational, financial and other resources. Any failure to manage growth effectively could seriously harm our business. To be successful, we will need to continue to implement management information systems and improve our operating, administrative, financial and accounting systems and controls. We will also need to train new employees and maintain close coordination among our executive, accounting, finance, marketing, sales and operations functions. These processes are time-consuming and expensive, will increase management responsibilities and will divert management attention.

The opening of new centers in existing locations may negatively impact our comparable revenue increases and our overall operating margins.

We currently operate sports, fitness and family recreation centers in eight states. Our plans for 2004 include opening six new centers, four of which are in an existing market. With respect to existing markets, it has been our experience that opening new centers may attract some memberships away from other centers already operated by us in those markets and diminish their revenues. In addition, as a result of new center openings in existing markets, and because older centers will represent an increasing proportion of our center base over time, our comparable center revenue increases may be lower in future periods than in the past.

Another result of opening new centers is that our overall operating margins may be lower than they have been historically. We expect both the addition of pre-opening expenses and the lower revenue volumes characteristic of newly-opened centers to affect our operating margins at these new centers. We also expect certain operating costs, particularly those related to occupancy, to be higher than in the past in some newly-entered geographic regions. As a result of the impact of these rising costs, our total center contribution and operating margins may be lower in future periods than they have been in the past.

Our debt levels may limit our flexibility in obtaining additional financing and in pursuing other business opportunities.

As of March 31, 2004, we had total consolidated indebtedness of \$219.1 million, consisting principally of obligations under construction and term notes that are secured by certain of our properties, borrowings under our revolving credit facility that are secured by certain personal property, mortgage notes that are secured by certain of our sports, fitness and family recreation centers and obligations under capital leases.

Table of Contents

Our level of indebtedness could have important consequences to us, including the following:

our ability to obtain additional financing, if necessary, for capital expenditures, working capital, acquisitions or other purposes may be impaired or such financing may not be available on favorable terms;

we will need a substantial portion of our cash flow to pay the principal of, and interest on, our indebtedness, including indebtedness that we may incur in the future;

payments on our indebtedness will reduce the funds that would otherwise be available for our operations and future business opportunities;

a substantial decrease in our cash flows from operations could make it difficult for us to meet our debt service requirements and force us to modify our operations;

we may be more highly leveraged than our competitors, which may place us at a competitive disadvantage;

our debt level may make us more vulnerable and less flexible than our competitors to a downturn in our business or the general economy; and

some of our debt has a variable rate of interest, which increases our vulnerability to interest rate fluctuations.

In addition to the amount of indebtedness outstanding as of March 31, 2004, we have access to an additional \$133.1 million under our credit facilities. Following this offering, we will continue to have the ability to incur new debt, subject to limitations under our existing credit facilities and in our debt financing agreements. Furthermore, we have 13 centers financed by Teachers Insurance and Annuity Association of America that are subject to cross-default and cross-collateral provisions, which would allow the lender to foreclose on each of these 13 centers if there is an event of default related to one or more of these centers. If we incur additional debt, the risks associated with our leverage, including our ability to service our debt, could intensify.

Because of the capital-intensive nature of our business, we may have to incur additional indebtedness or issue new equity securities and, if we are not able to access additional capital, our ability to operate or expand our business may be impaired and our operating results could be adversely affected.

Our business requires significant levels of capital to finance the development of additional sites for new sports, fitness and family recreation centers and the construction of our centers. If cash from available sources is insufficient, or if cash is used for unanticipated needs, we may require additional capital sooner than anticipated. In the event that we are required or choose to raise additional funds, we may be unable to do so on favorable terms or at all. Furthermore, the cost of debt financing could significantly increase, making it cost-prohibitive to borrow, which could force us to issue new equity securities. If we issue new equity securities, existing shareholders may experience additional dilution or the new equity securities may have rights, preferences or privileges senior to those of existing holders of common stock. If we cannot raise funds on acceptable terms, we may not be able to take advantage of future opportunities or respond to competitive pressures. Any inability to raise additional capital when required could have an adverse effect on our business plans and operating results.

The health club industry is highly competitive and our competitors may have greater resources and name recognition than we have.

We compete with other health and fitness centers, physical fitness and recreational facilities established by local non-profit organizations, governments, hospitals, and businesses, amenity and condominium clubs and similar non-profit organizations, local salons, cafes and businesses offering similar ancillary services, and, to a lesser extent, racquet, tennis and other athletic clubs, country clubs, weight reducing salons and the home fitness equipment industry. Competitors, which may have greater resources or greater name recognition than we have, may compete with us to attract members in our markets. Non-

Table of Contents

profit and government organizations in our markets may be able to obtain land and construct centers at a lower cost than us and may be able to collect membership fees without paying taxes, thereby allowing them to lower their prices. This competition may limit our ability to increase membership fees, retain members, attract new members and retain qualified personnel.

Competitors could copy our business model and erode our market share, brand recognition and profitability.

We employ a business model that could allow competitors to duplicate our successes. We cannot assure you that our competitors will not attempt to copy our business model and that this will not erode our market share and brand recognition and impair our growth rate and profitability. In response to any such competitors, we may be required to decrease our membership fees, which may reduce our operating margins and profitability.

We have significant operations concentrated in certain geographic areas, and any disruption in the operations of our centers in any of these areas could harm our operating results.

We currently operate multiple sports, fitness and family recreation centers in several metropolitan areas, including 14 in the Minneapolis/St. Paul market, seven in the Chicago market and five in the Detroit market, with continued planned expansion in other markets. As a result, any prolonged disruption in the operations of our centers in any of these markets, whether due to technical difficulties, power failures or destruction or damage to the centers as a result of a natural disaster, fire or any other reason, could harm our operating results. In addition, our concentration in these markets increases our exposure to adverse developments related to competition, as well as economic and demographic changes in these areas.

If we cannot retain our key personnel and hire additional highly qualified personnel, we may not be able to successfully manage our operations and pursue our strategic objectives.

We are highly dependent on the services of our senior management team and other key employees at both our corporate headquarters and our centers, and on our ability to recruit, retain and motivate key personnel. Competition for such personnel is intense, and the inability to attract and retain the additional qualified employees required to expand our activities, or the loss of current key employees, could materially and adversely affect us.

If our founder and chief executive officer leaves our company for any reason, it could have a material adverse effect on us.

Our growth and development to date have been largely dependent upon the services of Bahram Akradi, our Chairman of the Board of Directors, President, Chief Executive Officer and founder. If Mr. Akradi ceases to be Chairman of the Board of Directors and Chief Executive Officer for any reason other than due to his death or incapacity or as a result of his removal pursuant to our articles of incorporation or bylaws, we will be in default under the loan documents for our 13 centers financed with Teachers Insurance and Annuity Association of America. As a result, Mr. Akradi may be able to exert disproportionate control over our company because of the significant consequence of his departure. We do not have any employment or non-competition agreement with Mr. Akradi.

We could be subject to claims related to health or safety risks at our sports, fitness and family recreation centers.

Use of our centers poses potential health or safety risks to members or guests through exertion and use of our equipment, swimming pools and other facilities and services. We cannot assure you that claims will not be asserted against us for injury or death suffered by someone using our facilities or services. In addition, the child-care services we offer at our centers expose us to claims related to child-care. Lastly, because we construct our own centers, we also face liability in connection with the construction of these centers.

Table of Contents

We are subject to extensive government regulation, and changes in these regulations could have a negative effect on our financial condition and results of operations.

Various federal and state laws and regulations govern our operations, including:

general rules and regulations of the Federal Trade Commission, state and local consumer protection agencies and state statutes that prescribe certain forms and provisions of membership contracts and that govern the advertising, sale and collection of our memberships;

state and local health regulations;

federal regulation of health and nutritional products; and

regulation of rehabilitation service providers.

Any changes in such laws could have a material adverse effect on our financial condition and results of operations.

We have introduced other business initiatives that may not be profitable.

In addition to our sports, fitness and family recreation centers, we have introduced other business initiatives in the areas of nutritional products, media and athletic events in order to capitalize on our brand identity and membership base. We have limited experience with these other initiatives and face significant competition against established companies with more retail experience and greater financial resources than us. We may not be able to compete effectively against these established companies, and these other business initiatives may not be profitable. In addition, we license from a third party the right to use the mark LIFE TIME in connection with our nutritional products, as well as the right to use certain ingredients of such products. These rights may be material to marketing and distributing our nutritional products. If these licenses are terminated for any reason, we may no longer be able to market and distribute nutritional products under the LIFE TIME FITNESS brand.

We could be subject to claims related to our nutritional products.

The nutritional products industry is currently the source of proposed federal laws and regulations, as well as numerous lawsuits. We advertise and offer for sale proprietary nutritional products within our centers, on the Internet and through selected national retail channels. We cannot assure you that there will be no claims against us regarding the ingredients in, manufacture of or results of using our nutritional products. Furthermore, we cannot assure you that any rights we have under indemnification provisions or insurance policies will be sufficient to cover any losses that might result from such claims.

If it becomes necessary to protect or defend our intellectual property rights or if we infringe on the intellectual property rights of others, we may be required to pay royalties or fees or become involved in costly litigation.

We may have disputes with third parties to enforce our intellectual property rights, protect our trademarks, determine the validity and scope of the proprietary rights of others or defend ourselves from claims of infringement, invalidity or unenforceability. Such disputes may require us to engage in litigation. We may incur substantial costs and a diversion of resources as a result of such disputes and litigation, even if we win. In the event that we do not win, we may have to enter into royalty or licensing agreements, we may be prevented from using the marks within certain markets in connection with goods and services that are material to our business or we may be unable to prevent a third party from using our marks. We cannot assure you that we would be able to reach an agreement on reasonable terms, if at all. In particular, although we own an incontestable federal trademark registration for use of the LIFE TIME FITNESS® mark in the field of health and fitness centers, we are aware of entities in certain locations around the country that use LIFE TIME FITNESS or a similar mark in connection with goods and services related to health and fitness. The rights of these entities in such marks may predate our rights.

Table of Contents

Accordingly, if we open any sports, fitness and family recreation centers in the areas in which these parties operate, we may be required to pay royalties or may be prevented from using the mark in such areas.

Our business could be affected by acts of war, terrorism or natural disasters.

Current world tensions could escalate, potentially leading to war or acts of terrorism. This could have unpredictable consequences on the world economy and on our business.

Risks Related to this Offering

We will face new challenges and increased costs as a public company.

Our management team has historically operated our business as a privately held company. Our management team has never had direct responsibility for managing a publicly traded company. We will incur increased costs as a result of being a public company, particularly in light of recently enacted and proposed changes in laws and regulations and listing requirements.

We may use the proceeds of this offering in ways with which you may disagree.

Our management will have significant discretion in the use of a substantial portion of the proceeds of this offering. Accordingly, it is possible that our management may allocate the proceeds differently than investors in this offering desire, or that we will fail to maximize our return on these proceeds.

We cannot assure you that a market will develop for our common stock or what the market price of our common stock will be.

The initial public offering price for our common stock will be determined through our negotiations with the underwriters and may not bear any relationship to the market price at which it will trade after this offering. Before this offering, there was no public trading market for our common stock, and we cannot assure you that one will develop or be sustained after this offering. If a market does not develop or is not sustained, it may be difficult for you to sell your shares of common stock at an attractive price or at all. We cannot predict the prices at which our common stock will trade. It is possible that in some future quarter our operating results may be below the expectations of financial market analysts and investors and, as a result of these and other factors, the price of our common stock may fall.

The price of our common stock may be volatile.

The trading price of our common stock following this offering may fluctuate substantially. The price of our common stock after this offering may be higher or lower than the price you pay, depending on many factors, some of which are beyond our control and may not be related to our operating performance. These fluctuations could cause you to lose part or all of your investment in our shares of common stock. Those factors that could cause fluctuations include, but are not limited to, the following:

price and volume fluctuations in the overall stock market from time to time;

significant volatility in the market price and trading volume of health and fitness companies;

actual or anticipated changes in our earnings or fluctuations in our operating results or in the expectations of financial market analysts;

investor perceptions of the health and fitness industry, in general, and our company, in particular;

the operating and stock performance of comparable companies;

general economic conditions and trends;

the seasonality of our business;

the opening of new centers;

Table of Contents

major catastrophic events;

loss of external funding sources;

sales of large blocks of our stock or sales by insiders; or

departures of key personnel.

If you purchase shares of common stock sold in this offering, you will experience significant and immediate dilution.

If you purchase shares of our common stock in this offering, you will experience significant and immediate dilution because the price that you pay will be substantially greater than the net tangible book value per share of the shares you acquire. This dilution is due in large part to the fact that our earlier investors paid substantially less than the initial public offering price when they purchased their shares. You will experience additional dilution upon the exercise of stock options to purchase common stock.

Our principal shareholders, directors and executive officers may exercise significant control over our company.

Our principal shareholders, directors and executive officers and entities affiliated with them will own approximately % of the outstanding shares of our common stock after this offering. As a result, these shareholders, if acting together, will be able to influence or control matters requiring approval by our shareholders, including the election of directors and the approval of mergers or other extraordinary transactions. They may also have interests that differ from yours and may vote in a way with which you disagree and which may be adverse to your interests. The concentration of ownership may have the effect of delaying, preventing or deterring a change of control of our company, could deprive our shareholders of an opportunity to receive a premium for their common stock as part of a sale of our company and might ultimately affect the market price of our common stock.

Our articles of incorporation, bylaws and Minnesota law may discourage takeovers and business combinations that our shareholders might consider in their best interests.

Anti-takeover provisions of our articles of incorporation, bylaws and Minnesota law could diminish the opportunity for shareholders to participate in acquisition proposals at a price above the then current market price of our common stock. For example, while we have no present plans to issue any preferred stock, our board of directors, without further shareholder approval, may issue shares of undesignated preferred stock and fix the powers, preferences, rights and limitations of such class or series, which could adversely affect the voting power of your shares. In addition, our bylaws provide for an advance notice procedure for nomination of candidates to our board of directors that could have the effect of delaying, deterring or preventing a change in control. Further, as a Minnesota corporation, we are subject to provisions of the Minnesota Business Corporation Act, or MBCA, regarding control share acquisitions and business combinations. We may, in the future, consider adopting additional anti-takeover measures. The authority of our board to issue undesignated preferred stock and the anti-takeover provisions of the MBCA, as well as any future anti-takeover measures adopted by us, may, in certain circumstances, delay, deter or prevent takeover attempts and other changes in control of the company not approved by our board of directors.

We do not anticipate paying cash dividends on our shares of common stock in the foreseeable future.

We have never declared or paid any cash dividends on our shares of common stock. We intend to retain any future earnings to fund the operation and expansion of our business and, therefore, we do not anticipate paying cash dividends on our shares of common stock in the foreseeable future. In addition, the terms of our revolving credit facility and certain of our debt financing agreements prohibit us from paying dividends without the consent of the lenders. As a result, capital appreciation, if any, of our common stock will be your sole source of gain for the foreseeable future.

Table of Contents

Common stock available for future sale by our shareholders may adversely affect our stock price.

If our shareholders sell substantial amounts of our common stock in the public market following this offering, the market price of our common stock could fall. These sales could also make it more difficult for us to sell shares of our common stock or equity-related securities in the future.

Table of Contents

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This prospectus contains forward-looking statements. The forward-looking statements are contained principally in the sections entitled Prospectus Summary, Risk Factors, Use of Proceeds, Management's Discussion and Analysis of Financial Condition and Results of Operations and Business. These statements involve known and unknown risks, uncertainties and other factors which may cause our actual results, performance or achievements to be materially different from any future results, performances or achievements expressed or implied by the forward-looking statements. Forward-looking statements include statements about:

- our estimates of future expenses, revenue and profitability;
- trends affecting our financial condition and results of operations;
- our ability to attract and retain members or achieve our targeted membership capacity;
- the availability and terms of debt financing;
- our ability to identify sites and open new centers on schedule;
- new initiatives to enhance our brand in the areas of exercise, nutrition and education;
- industry trends and the competitive environment;
- the impact of losing one or more senior executive or failing to attract additional key personnel; and
- other factors referenced in this prospectus, including those set forth under the caption Risk Factors.

In some cases, you can identify forward-looking statements by terms such as anticipates, believes, could, estimates, expects, intends, plans, potential, predicts, projects, should, will, would, and similar expressions intended to identify forward-looking statements. Forward-looking statements reflect our current views with respect to future events, are based on assumptions and are subject to risks and uncertainties. We discuss many of these risks in this prospectus in greater detail under the heading Risk Factors. Given these uncertainties, you should not place undue reliance on these forward-looking statements. Also, forward-looking statements represent our estimates and assumptions only as of the date of this prospectus. You should read this prospectus and the documents that we reference in this prospectus and have filed as exhibits to the registration statement, of which this prospectus is a part, completely and with the understanding that our actual future results may be materially different from what we expect.

Except as required by law, we assume no obligation to update any forward-looking statements publicly, or to update the reasons actual results could differ materially from those anticipated in any forward-looking statements, even if new information becomes available in the future.

Table of Contents

USE OF PROCEEDS

The net proceeds from the sale of the _____ shares of our common stock offered by us are estimated to be approximately \$ _____, after deducting the underwriting discount and estimated offering expenses and assuming an initial public offering price of \$ _____, or approximately \$ _____ if the over-allotment option is exercised by the underwriters in full. We will not receive any of the proceeds from the shares of our common stock sold by the selling shareholders.

A principal purpose of this offering is to establish a public market for our common stock. We expect to use all of the net proceeds of this offering, except as described below, to finance our growth by opening additional sports, fitness and family recreation centers, including approximately \$20 to \$25 million for the purchase of land for centers we plan to open in 2005, approximately \$15 to \$20 million for the construction of the six centers we plan to open in 2004 and approximately \$10 to \$15 million for the purchase of the initial exercise equipment, furniture and fixtures for the six centers we plan to open in 2004. We expect to use a portion of the net proceeds to completely repay amounts outstanding under our revolving credit facility as soon as practicable after receiving the proceeds from this offering, which amount could be up to \$15 million. The revolving credit facility bears interest at 4.0% over LIBOR and expires on June 30, 2005. The amounts to be repaid under the revolving credit facility were borrowed within the past year and were used to fund acquisition of land and construction of centers we plan to open in 2004 and other working capital needs. We also expect to use approximately \$9 million of the net proceeds of this offering to repay a loan under the construction facility that we used to finance the development of our center in Plano, Texas. The term loan bears interest at 0.5% over the prime rate and expires on December 10, 2006.

The amounts and timing of our actual use of proceeds will depend upon numerous factors, including our plans for the construction and opening of new centers and our ability to obtain and extend our debt financing on favorable terms. The amounts that we may allocate to the particular uses of the net proceeds of this offering may vary from the above based primarily on amounts outstanding under our revolving credit facility and the distinct timing implications between membership dues generated and when funds are needed. In addition, the amount used for any particular component of constructing and opening a new center may vary depending on increases and decreases in costs of the different components and our ability to negotiate pricing. Although we do not currently have any specific plans for other uses of the proceeds, there are other potential uses of the proceeds, including expediting future land purchases, technological investment in our current in-center and corporate businesses, investment in our current corporate headquarters, acquisitions of free-standing single unit health clubs, acquisitions of other health club companies and initial investments in additional corporate businesses. Our management will have significant flexibility and discretion in applying the net proceeds of this offering. Until we use the proceeds for a particular purpose, we plan to invest the net proceeds of this offering generally in short-term, investment-grade instruments, interest-bearing securities or direct or guaranteed obligations of the United States, but we cannot assure you that these investments will yield a favorable return.

DIVIDEND POLICY

We have never declared or paid any cash dividends on our common stock. We currently intend to retain all future earnings for the operation and expansion of our business and do not anticipate declaring or paying any cash dividends on our common stock in the foreseeable future. In addition, the terms of our revolving credit facility and certain of our debt financing agreements prohibit us from paying dividends without the consent of the lenders. The payment of any dividends in the future will be at the discretion of our board of directors and will depend upon our results of operations, earnings, capital requirements, contractual restrictions, outstanding indebtedness and other factors deemed relevant by our board.

Table of Contents**CAPITALIZATION**

The following table sets forth our capitalization as of March 31, 2004:

on an actual basis; and

on an as-adjusted basis to give effect to (1) the filing of our amended and restated articles of incorporation to provide for authorized capital stock of _____ shares of common stock and _____ shares of preferred stock, (2) the sale by us of _____ shares of common stock at an assumed initial public offering price of \$ _____ per share in this offering and the receipt of the estimated \$ _____ million in net proceeds from this offering, after deducting underwriting discounts and commissions and estimated offering expenses payable by us of \$ _____, and (3) the conversion of all preferred stock upon the completion of this offering.

You should read the information below in conjunction with our consolidated financial statements and the related notes and Management's Discussion and Analysis of Financial Condition and Results of Operations included elsewhere in this prospectus.
