Privacy. The Eaton Vance organization is committed to ensuring your financial privacy. Each of the financial institutions identified below has in effect the following policy (Privacy Policy) with respect to nonpublic personal information about its customers:

Only such information received from you, through application forms or otherwise, and information about your Eaton Vance fund transactions will be collected. This may include information such as name, address, social security number, tax status, account balances and transactions.

None of such information about you (or former customers) will be disclosed to anyone, except as permitted by law (which includes disclosure to employees necessary to service your account). In the normal course of servicing a customer's account, Eaton Vance may share information with unaffiliated third parties that perform various required services such as transfer agents, custodians and broker/dealers.

Policies and procedures (including physical, electronic and procedural safeguards) are in place that are designed to protect the confidentiality of such information.

We reserve the right to change our Privacy Policy at any time upon proper notification to you. Customers may want to review our Policy periodically for changes by accessing the link on our homepage: www.eatonvance.com.

Our pledge of privacy applies to the following entities within the Eaton Vance organization: the Eaton Vance Family of Funds, Eaton Vance Management, Eaton Vance Investment Counsel, Boston Management and Research, and Eaton Vance Distributors, Inc.

In addition, our Privacy Policy only applies to those Eaton Vance customers who are individuals and who have a direct relationship with us. If a customer's account (i.e., fund shares) is held in the name of a third-party financial adviser/broker-dealer, it is likely that only such adviser's privacy policies apply to the customer. This notice supersedes all previously issued privacy disclosures.

For more information about Eaton Vance's Privacy Policy, please call 1-800-262-1122.

Delivery of Shareholder Documents. The Securities and Exchange Commission (the SEC) permits funds to deliver only one copy of shareholder documents, including prospectuses, proxy statements and shareholder reports, to fund investors with multiple accounts at the same residential or post office box address. This practice is often called householding and it helps eliminate duplicate mailings to shareholders.

Eaton Vance, or your financial adviser, may household the mailing of your documents indefinitely unless you instruct Eaton Vance, or your financial adviser, otherwise.

If you would prefer that your Eaton Vance documents not be householded, please contact Eaton Vance at 1-800-262-1122, or contact your financial adviser.

Your instructions that householding not apply to delivery of your Eaton Vance documents will be effective within 30 days of receipt by Eaton Vance or your financial adviser.

Portfolio Holdings. Each Eaton Vance Fund and its underlying Portfolio (if applicable) will file a schedule of its portfolio holdings on Form N-Q with the SEC for the first and third quarters of each fiscal year. The Form N-Q will be available on the Eaton Vance website www.eatonvance.com, by calling Eaton Vance at 1-800-262-1122 or in the EDGAR database on the SEC's website at www.sec.gov. Form N-Q may also be reviewed and copied at the SEC's public reference room in Washington, D.C. (call 1-800-732-0330 for information on the operation of the public reference room).

Proxy Voting. From time to time, funds are required to vote proxies related to the securities held by the funds. The Eaton Vance Funds or their underlying portfolios (if applicable) vote proxies according to a set of policies and procedures approved by the Funds' and Portfolios' Boards. You may obtain a description of these policies and procedures and information on how the Funds or Portfolios voted proxies relating to portfolio securities during the most recent 12 month period ended June 30, without charge, upon request, by calling 1-800-262-1122. This description is also available on the SEC's website at www.sec.gov.

Eaton Vance Municipal Income Trusts **as of November 30, 2008**

MANAGEMENT'S DISCUSSION OF FUND PERFORMANCE

Eaton Vance Municipal Income Trusts (the Trusts) are closed-end Trusts, traded on the NYSE Alternext U.S., which are designed to provide current income exempt from regular federal income tax and state personal income taxes, as applicable. This income is earned by investing primarily in investment-grade municipal securities.

Economic and Market Conditions

Economic growth in the third quarter of 2008 retracted 0.3%, down from a positive second quarter growth rate of 2.8%, according to data released by the U.S. Department of Commerce. Most of the major Gross Domestic Product (GDP) components led to the decline; however, most influential was a sharp downturn in personal consumption expenditures by consumers, a factor which has continued to weigh on the economy during the first two months of the fourth quarter of 2008. While high commodity prices have mitigated since their summertime peaks, management believes consumers continued to pare costs as they remained cautious of what increasingly has become a weaker economic environment. Rising unemployment levels, now at a five-year high, have led to constrained personal consumption and overall economic contraction. The housing market continues to weigh on the economy, with new home sales continuing to fall and existing home sales beginning to stabilize only as cautious buyers begin to see value in distressed pricing. Low home prices continue to pressure consumers and banks, causing increased bank foreclosures and more mark-to-market write downs of mortgage-backed securities at commercial banks and financial institutions. During the year ended November 30, 2008, the capital markets have experienced historic events resulting in unprecedented volatility. During September 2008, for example, the federal government took control of federally-chartered mortgage giants Fannie Mae and Freddie Mac. During the same month, Lehman Brothers filed for bankruptcy protection and Merrill Lynch was acquired by Bank of America. Also in September 2008, Goldman Sachs and Morgan Stanley petitioned the Federal Reserve (the Fed) to become bank holding companies, a step which brings greater regulation but also easier access to credit. These actions, in conjunction with Bear Stearns' acquisition by JP Morgan in March 2008, drastically redefined the Wall Street landscape. In addition to the independent Wall Street brokerages, the banking sector was shaken by the failure of Washington Mutual and the sale of Wachovia. In the insurance sector, the federal government provided more than \$85 billion in loans to help stabilize American International Group, Inc. (AIG). Finally, the U.S. Congress approved a \$700 billion program authorizing the federal government to purchase troubled assets from financial institutions, a program which has continued to evolve since its passing.

During the year ended November 30, 2008, the Fed lowered the Federal Funds rate to 1.00% from as high as 5.25% in the summer of 2007. In addition to its interest rate policy, the Fed has also taken extraordinary action through a variety of innovative lending techniques in an attempt to facilitate an easing of the credit crisis.

Management Discussion

The Trusts invest primarily in bonds with stated maturities of 10 years or longer, as longer-maturity bonds historically have provided greater tax-exempt income for investors than shorter-maturity bonds.

Relative to their primary benchmark, the Barclays Capital Municipal Bond Index¹ (the Index) a broad-based, unmanaged index of municipal bonds the Trusts underperformed for the year ended November 30, 2008. As a result of an active management style that focuses on income and longer call protection, each Trust generally holds longer-maturity bonds. Management believes that much of the Trusts' underperformance can be attributed to the shift of investors' capital into shorter-maturity bonds, a result of the broader-based credit crisis that has rattled the fixed-income markets since the summer of 2007. This underperformance was magnified by the Trusts

Trust shares are not insured by the FDIC and are not deposits or other obligations of, or guaranteed by, any depository institution. Shares are subject to investment risks, including possible loss of principal invested.

Lehman
Brothers
Municipal Bond

Index. It is not possible to invest directly in an Index. The Index's total return does not reflect expenses that would have been incurred if an investor individually purchased or sold the securities represented in the Index.

Past performance is no guarantee of future results.

The views expressed throughout this report are those of the portfolio managers and are current only through the end of the period of the report as stated on the cover. These views are subject to change at any time based upon market or other conditions, and the investment adviser disclaims any responsibility to update such views. These views may not be relied on as investment advice and, because investment decisions for a fund are based on many factors, may not be relied on as an indication of trading intent on behalf of any Eaton Vance fund. Portfolio information provided in the report may not be representative of the Trusts' current or future investments and may change due to active management.

Eaton Vance Municipal Income Trusts **as of November 30, 2008**

MANAGEMENT'S DISCUSSION OF FUND PERFORMANCE

use of leverage and leveraged investments. The move to shorter-term investments was originally driven by uncertainty surrounding financial companies' exposure to subprime mortgage-backed debt but later spread to the municipal market when major municipal bond insurers suffered rating downgrades due to their exposure to mortgage-related structured products.

The ratio of yields on current coupon AAA-rated insured municipal bonds to the yield on 30-year Treasury bonds was 157% as of November 30, 2008, with many individual municipal bonds trading at higher ratios.¹ Management believes that this was the result of continued dislocation in the fixed-income marketplace caused by a flight to Treasury securities, municipal bond insurance companies' mark-to-market risks and the decentralized nature of the municipal marketplace. Historically, this is a rare occurrence in the municipal bond market and is generally considered a signal that municipal bonds are significantly under-valued relative to taxable Treasury bonds.

Against this backdrop, management continues to manage all of its municipal funds with the same relative value approach that it has traditionally employed, maintaining a long-term perspective when markets exhibit extreme short-term volatility. We believe this approach has provided excellent long-term benefits to our investors over time.

A Note Regarding Auction Preferred Shares (APS)

As has been widely reported since mid-February 2008, the normal functioning of the auction market in the United States for certain types of auction rate securities has been disrupted by an imbalance between buy and sell orders. Consistent with patterns in the broader market for auction rate securities, the Trusts have, since mid-February, experienced unsuccessful APS auctions. In the event of an unsuccessful auction, the affected APS remain outstanding, and the dividend rate reverts to the specified maximum payable rate.

During the year ended November 30, 2008, certain Trusts redeemed a portion of their outstanding APS. Information relating to these redemptions is contained in Note 2 to the Financial Statements. Replacement financing for the redeemed APS may have been provided through the creation of tender option bonds (TOBs).² The cost to the Trusts of the new TOB financing is expected, over time, to be lower than the total cost of APS based on the maximum applicable dividend rates. Each Trust's APS percentage (i.e., APS at liquidation value as a percentage of the Trust's net assets applicable to common shares plus APS) as of November 30, 2008 is reflected on the Trust-specific pages following this letter. The leverage created by APS and TOB investments provides an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and share price of the common shares).

From December 22, 2008 through December 24, 2008, after the end of the reporting period, certain Trusts voluntarily redeemed a portion of their outstanding APS to reduce the amount of the Trusts' financial leverage. Information relating to these redemptions is contained in Note 14 to the Financial Statements.

Rating Distribution*⁶

By total investments

* *The rating distribution presented above includes the ratings of securities held by special purpose vehicles in which the Trust holds a residual interest. See Note 1H to the Trust's financial statements. Absent such securities, the Trust's rating distribution at November 30, 2008, is as follows, and the average rating is AA-:*

AAA	27.5%	BBB	8.3%
AA	32.0%	BB	0.5%
A	24.1%	Not Rated	7.6%

Trust Statistics⁷

Number of Issues:	93
Average Maturity:	21.6 years
Average Effective Maturity:	20.3 years
Average Call Protection:	7.6 years
Average Dollar Price:	\$ 80.66
APS Leverage:**	34.7%
TOB Leverage:**	16.1%

** *APS leverage represents the liquidation value of the Trust's Auction Preferred Shares (APS) outstanding at 11/30/08 as a percentage of the Trust's net assets*

applicable to common shares plus APS and TOB Floating Rate Notes. TOB leverage represents the amount of Floating Rate Notes outstanding at 11/30/08 as a percentage of the Trust's net assets applicable to common shares plus APS and Floating Rate Notes. Floating Rate Notes in both calculations reflect the effect of TOBs purchased in secondary market transactions.

¹ *Returns are historical and are calculated by determining the percentage change in share price or net asset value (as applicable) with all distributions reinvested. The Trust's performance at market share price will differ from its results at NAV. Although share price performance generally reflects investment results over time, during shorter periods,*

returns at share price can also be affected by factors such as changing perceptions about the Trust, market conditions, fluctuations in supply and demand for the Trust's shares, or changes in Trust distributions.

Performance results reflect the effects of APS outstanding and TOB investments, which are forms of investment leverage. Use of leverage creates an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and market price of common shares).²

The Trust's market yield is calculated by dividing the last dividend paid per common share of the fiscal year by the share price at the end of the fiscal year and annualizing the result.³

Taxable-equivalent figure assumes a maximum 41.05% combined federal and state income tax rate. A lower tax rate would

result in a lower tax-equivalent figure. ⁴ Formerly called Lehman Brothers Municipal Bond Index and Lehman Brothers Municipal Bond Long 22+ Index, respectively. It is not possible to invest directly in an Index. The Indices total returns do not reflect the expenses that would have been incurred if an investor individually purchased or sold the securities represented in the Indices. Index performance is available as of month end only. ⁵ The Lipper Averages are the average annual total returns, at net asset value, of the funds that are in the same Lipper Classification as the Trust. It is not possible to invest in a Lipper Classification. Lipper Classifications may include insured and uninsured funds, as well as leveraged and unleveraged funds. The Lipper California Municipal Debt Funds Classification (closed-end) contained 24, 24

and 13 funds for the 1-year, 5-year and Life-of-Trust time periods, respectively. Lipper Averages are available as of month end only.⁶ Rating Distribution is determined by dividing the total market value of the issues by the total investments of the Trust. Although the investment adviser considers ratings when making investment decisions, it performs its own credit and investment analysis and does not rely primarily on the ratings assigned by the rating services. Credit quality can change from time to time, and recently issued credit ratings may not fully reflect the actual risks posed by a particular security or the issuer's current financial condition.⁷ Trust holdings information excludes securities held by special purpose vehicles in which the Trust holds a residual interest. * *The rating distribution presented above includes the ratings of securities held by special purpose vehicles in which the Trust holds a residual interest. See Note 1H to the Trust's financial statements. Absent such securities, the Trust's rating distribution at November 30, 2008, is as follows, and the average rating is A:*

AAA	24.6%	BB	3.5%
AA	21.9%	B	4.5%
A	18.4%	CCC	0.7%
BBB	14.2%	Not Rated	12.2%

Trust Statistics⁷

Number of Issues:	105
Average Maturity:	25.7 years
Average Effective Maturity:	24.4 years
Average Call Protection:	8.1 years
Average Dollar Price:	\$ 84.80
APS Leverage:**	24.6%
TOB Leverage:**	29.7%

** *APS leverage represents the liquidation value of the Trust's Auction Preferred Shares (APS) outstanding at*

11/30/08 as a percentage of the Trust's net assets applicable to common shares plus APS and TOB Floating Rate Notes. TOB leverage represents the amount of Floating Rate Notes outstanding at 11/30/08 as a percentage of the Trust's net assets applicable to common shares plus APS and Floating Rate Notes. Floating Rate Notes in both calculations reflect the effect of TOBs purchased in secondary market transactions.

¹ *Returns are historical and are calculated by determining the percentage change in share price or net asset value (as applicable) with all distributions reinvested. The Trust's performance at market share price will differ from its results at NAV. Although share price performance*

generally reflects investment results over time, during shorter periods, returns at share price can also be affected by factors such as changing perceptions about the Trust, market conditions, fluctuations in supply and demand for the Trust's shares, or changes in Trust distributions. Performance results reflect the effects of APS outstanding and TOB investments, which are forms of investment leverage. Use of leverage creates an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and market price of common shares).² The Trust's market yield is calculated by dividing the last dividend paid per common share of the fiscal year by the share price at the end of the fiscal year and annualizing the result.³ Taxable-equivalent figure assumes a maximum 35.00%

*federal income tax rate. A lower tax rate would result in a lower tax-equivalent figure.*⁴ Formerly called *Lehman Brothers Municipal Bond Index and Lehman Brothers Municipal Bond Long 22+ Index*, respectively. It is not possible to invest directly in an Index. The Indices total returns do not reflect the expenses that would have been incurred if an investor individually purchased or sold the securities represented in the Indices. Index performance is available as of month end only.⁵ The Lipper Averages are the average annual total returns, at net asset value, of the funds that are in the same Lipper Classification as the Trust. It is not possible to invest in a Lipper Classification. Lipper Classifications may include insured and uninsured funds, as well as leveraged and unleveraged funds. The Lipper General Municipal Debt Funds (Leveraged)

Classification
(closed-end)
contained 60, 59
and 42 funds for the
1-year, 5-year and
Life-of-Trust time
periods,
respectively. Lipper
Averages are
available as of
*month end only.*⁶
Rating Distribution
is determined by
dividing the total
market value of the
issues by the total
investments of the
Trust. Although the
investment adviser
considers ratings
when making
investment
decisions, it
performs its own
credit and
investment analysis
and does not rely
primarily on the
ratings assigned by
the rating services.
Credit quality can
change from time to
time, and recently
issued credit
ratings may not
fully reflect the
actual risks posed
by a particular
security or the
issuer's current
financial condition.
⁷*Trust holdings*
information
excludes securities
held by special
purpose vehicles in
which the Trust
holds a residual
interest. See Note
1H to the Trust's
financial

statements.

Past performance is no guarantee of future results. Returns are historical and are calculated by determining the percentage change in net asset value or share price (as applicable) with all distributions reinvested. Investment return and principal value will fluctuate so that shares, when sold, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Trust's current performance may be lower or higher than the quoted return. For performance as of the most recent month end, please refer to www.eatonvance.com.

Portfolio Manager: Robert B. MacIntosh, CFA

Rating Distribution*⁶

By total investments

* *The rating distribution presented above includes the ratings of securities held by special purpose vehicles in which the Trust holds a residual interest.
