## FORWARD-LOOKING STATEMENTS

In order to utilize the “Safe Harbor” provisions of the United States Private Securities Litigation Reform Act of 1995 (the “Reform Act”), Sappi Limited (the “Company”) is providing the following cautionary statement. Except for historical information contained herein, statements contained in this Report on Form 6-K may constitute “forward-looking statements” within the meaning of the Reform Act. The words “believe”, “anticipate”, “expect”, “intend”, “estimate”, “plan”, “assume”, “positioned”, “will”, “may”, “should”, “risk” and other similar expressions, which are predictions of or indicate future events and future trends, which do not relate to historical matters, identify forward-looking statements. In addition, this Report on Form 6-K may include forward-looking statements relating to the Company’s potential exposure to various types of market risks, such as interest rate risk, foreign exchange rate risk and commodity price risk. Reliance should not be placed on forward-looking statements because they involve known and unknown risks, uncertainties and other factors which are in some cases beyond the control of the Company, together with its subsidiaries (the “Group”), and may cause the actual results, performance or achievements of the Group to differ materially from anticipated future results, performance or achievements expressed or implied by such forward-looking statements (and from past results, performance or achievements). Certain factors that may cause such differences include but are not limited to:

- o the highly cyclical nature of the pulp and paper industry (and the factors that contribute to such cyclicity, such as levels of demand, production capacity, production, input costs including raw material, energy and employee costs, and pricing);
- o the impact on the business of the global economic downturn;
- o unanticipated production disruptions (including as a result of planned or unexpected power outages);
- o changes in environmental, tax and other laws and regulations;
- o adverse changes in the markets for the Group’s products;
- o the emergence of new technologies and changes in consumer trends increase preferences for digital media;
- o consequences of the Group’s leverage, including as a result of adverse changes in credit markets that affect the Group’s ability to raise capital when needed;
- o adverse changes in the political situation and economy in the countries in which the Group operates or the effect of governmental efforts to address present or future economic or social problems;
- o the impact of restructurings, investments, acquisitions, dispositions and other strategic initiatives (including related financing), any delays, unexpected costs or other problems experienced in connection with dispositions or with integrating acquisitions or implementing restructurings or strategic initiatives (including dissolving wood pulp conversion projects), and achieving expected savings and synergies; and
- o currency fluctuations.

These and other risks, uncertainties and factors are discussed in the Company’s Annual Report on Form 20-F and other filings with and submissions to the Securities and Exchange Commission, including this Report on Form 6-K. Shareholders and prospective investors are cautioned not to place undue reliance on these forward-looking statements. These forward-looking statements are made as of the date of the submission of this Report on Form 6-K and are not intended to give any assurance as to future results. The Company undertakes no obligation to publicly update or revise any of these

forward-looking statements, whether to reflect new information or future events or circumstances or otherwise.

Sappi works closely with customers, both direct and indirect, in over 100 countries to provide them with relevant and sustainable paper, paper-pulp and dissolving wood pulp products and related services and innovations.

Our market-leading range of paper products includes: coated fine papers used by printers, publishers and corporate end-users in the production of books, brochures, magazines, catalogues, direct mail and many other print applications; casting release papers used by suppliers to the fashion, textiles, automobile and household industries; and in our Southern African region, newsprint, uncoated graphic and business papers, premium-quality packaging papers, paper-grade pulp and dissolving wood pulp.

Our dissolving wood pulp products are used worldwide by converters to create viscose fibre, acetate tow, pharmaceutical products as well as a wide range of consumer products.

The pulp needed for our products is either produced within Sappi or bought from accredited suppliers.

Across the group, Sappi is close to 'pulp neutral', meaning that we sell almost as much pulp as we buy.

#### Commentary on the quarter

The group operating profit excluding special items of US\$73 million for the quarter was impacted by generally lower selling prices for pulp and paper.

The North American business achieved a good result, with slightly weaker than expected performance in our Southern African and European businesses. In Europe, the operating and sales achievements were ahead of the market, which remains challenging and where conditions worsened during the quarter.

Lower pricing across all graphic paper grades led to lower profitability for the European paper business.

In South Africa, the impact of lower dissolving wood pulp prices compared to the equivalent quarter in the prior year combined with the three-week road transport strike negatively affected the result. However, volume and pricing momentum picked up towards the end of the quarter.

NBSK pulp prices, to which most of our paper pulp and dissolving wood pulp sales are linked, increased during the quarter from the recent lows reached at the end of September 2012. Average NBSK prices were essentially flat compared to the prior quarter and were approximately US\$90 per ton lower than in the equivalent quarter last year. Hardwood pulp prices were significantly higher than the equivalent quarter last year, which negatively affected our European operations as they are significant buyers of hardwood pulp. The prices of other major inputs such as energy, wood and chemicals were generally lower than in the equivalent quarter last year with the exception of the Southern African business.

There were no major special items for the quarter. The charge to special items of US\$3 million included a positive plantation fair value price adjustment of US\$8 million and a restructuring provision of US\$7 million primarily related to the mothballing of PM4 at Tugela.

Finance costs of US\$42 million were lower than the equivalent quarter last year of US\$54 million following the refinancing completed over the past year and the reduction in gross debt.

Earnings per share for the quarter was 3 US cents (including a charge of 1 US cent in respect of special items) compared with 9 US cents (including a gain of 2 US cents in respect of special items) in the equivalent quarter last year.

#### Cash flow and debt

Net cash utilised for the quarter was US\$102 million, an improvement compared with net cash utilised of US\$111 million in the equivalent quarter last year. This cash outflow for the quarter was mainly as a result of a seasonal increase in working capital, which typically increases at the end of the first financial quarter as a result of the seasonal slowdown in deliveries in the second half of December. Capital expenditure in the quarter increased to US\$97 million compared to US\$75 million a year ago, reflecting the continued expenditure on the dissolving wood pulp projects.

Net debt of US\$2,095 million is down from US\$2,175 million in December 2011, but up from US\$1,979 million in the quarter ended September 2012 as a result of the seasonal increase in cash utilisation.

Liquidity remains strong with cash on hand of US\$504 million and the €350 million (US\$463 million) available from the undrawn committed revolving credit facility at quarter-end. During December 2012, we finalised a committed revolving credit facility in South Africa of US\$118 million, of which US\$65 million was undrawn at the end of December 2012.

Market conditions in the European paper business continued to be challenging, and deteriorated during the quarter. The business achieved sales volumes for the quarter equal to the equivalent quarter in the prior year, despite industry volumes that were depressed year-on-year, in the case of mechanical coated paper by as much as 7%. During the quarter we experienced strong downward pressure on pricing for all graphic paper grades, and average graphic paper sales prices were 2% lower than in the equivalent quarter last year.

Our European business maintained a strong focus on cost containment and variable costs remain 2% below those of the equivalent quarter last year.

The coated specialties business continues to perform well, with increased sales volumes and stable to increasing price movements compared with the equivalent quarter last year.

The performance of our North American coated paper business was good, with increased sales volumes partially offset by 3% lower average sales prices when compared to the equivalent quarter last year.

4

The pulp business continued to be negatively impacted by pulp prices that are 5% lower than the equivalent quarter last year, and 3% lower than the prior quarter. Sales volumes were also lower than in both comparative periods, due in part to a planned increase in pulp inventories at the Cloquet mill ahead of the conversion to dissolving wood pulp. The conversion of the Cloquet pulp mill from hardwood kraft pulp to dissolving wood pulp continues on schedule for an expected start-up in the third financial quarter of 2013.

Release paper sales volumes were markedly higher than in both the equivalent quarter last year, and the prior quarter. Average sales prices, whilst stable compared to the prior quarter were below those of the equivalent quarter last year.

Variable costs remained well controlled, with nearly all categories of input costs lower than in the equivalent quarter last year, resulting in total variable costs per ton being 4% lower than in the equivalent quarter last year.

The Southern African business showed a similar result compared to the prior quarter despite the impact of the three-week road transport strike which spilled over into this quarter. Compared with the equivalent quarter last year however, the operating result was weaker due to lower sales volumes, lower average prices in the Specialised Cellulose business and higher variable costs.

The Specialised Cellulose business sold 175kt of dissolving wood pulp during the quarter, similar to the equivalent quarter last year, but less than the volume sold in the prior quarter due to shipping and production schedules. Average sales prices, which are linked to NBSK pulp, were 12% lower than in the equivalent quarter last year, and similar to those achieved in the prior quarter. The Specialised Cellulose business generated an EBITDA excluding special items of ZAR351 million, representing an EBITDA excluding special items margin of 28%.

The Southern African paper business further improved its performance, compared both to the equivalent quarter last year and the prior quarter. While sales volumes were lower predominantly due to the restructuring of the business and resultant machine closures, sales prices were higher for both local and export sales.

Input costs increased, particularly purchased wood and pulp, as a result of the weaker Rand/US Dollar exchange rate.

Directorate

Professor Meyer Feldberg, our lead independent director, retired from the board at the end of December 2012 having reached the board's mandatory retirement age. Sir Nigel Rudd who has served as a non-executive director for more than six years succeeded Professor Feldberg as lead independent director.

Outlook

Financial year 2013 is an important transitional year for the group as we expand our Specialised Cellulose business and continue to optimise our paper businesses.

Market conditions for the paper business, particularly in Europe, are expected to remain challenging for the remainder of the fiscal year, particularly with regards to pricing and input costs. Pulp prices, a major input cost for our European business in particular, have increased since the end of the quarter. Conversely, paper pulp and dissolving wood pulp sales from our North American and Southern African operations should benefit from these higher pulp prices. Overall the group benefits from higher pulp prices as a result of the higher margins in the North American and Southern African businesses.

Price increases were announced for coated woodfree paper in Europe effective from 01 January 2013. The impact of these increases is expected to be gradually felt over the coming months and be fully in place during the course of the third financial quarter. Prices for coated mechanical paper decreased in January, and will not recover before July.

The Specialised Cellulose business continues to sell all available production volumes. The Specialised Cellulose expansion projects at both the Ngodwana and Cloquet mills proceed on plan for start-up in our third financial quarter. The Ngodwana mill will take an extended planned annual maintenance shut during the second financial quarter due to the conversion project. We expect that this will negatively impact the quarter operating profit by approximately US\$20 million.

As previously indicated, as a result of the capex spend on the dissolving wood pulp projects, we expect net debt to increase from the September 2012 level during the 2013 fiscal year and to reduce again post the completion of the projects.

Given prevailing market conditions, we expect the second quarter operating profit excluding special items to be below that of the first quarter for the reasons described above. However, we expect the operating profit in the second half of the financial year to be stronger than in the first half.

On behalf of the board

R J Boëttger

S R Binnie

Notes to the condensed group results

**1. Basis of preparation**

The condensed consolidated interim financial results for the three months ended December 2012 have been prepared in compliance with the Listings Requirements of the JSE Limited and in accordance with the framework concepts and the measurement and recognition requirements of International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board, AC 500 standards issued by the Accounting Practices Board, the requirements of the Companies Act of South Africa and the information required by IAS 34 *Interim Financial Reporting*. The accounting policies applied in the preparation of these interim financial results are consistent with those applied for the year ended September 2012.

The preparation of this condensed consolidated financial information was supervised by the Chief Financial Officer, S R Binnie CA(SA).

These results are unaudited.

**45**

41

**7. Material balance sheet movements**

Cash and cash equivalents, interest-bearing borrowing and inventories

Inventory increased as a result of a conscious decision to increase stock holding in anticipation of the dissolving wood pulp conversion projects. The decrease in trade and other receivables is mainly attributable to the receipt of US\$42 million on the sale of the previously equity accounted 34% shareholding in Jiangxi Chenming Paper Company. Cash and cash equivalents decreased as a result of the redemption of the remaining €31 million (US\$42 million) of its senior secured notes due 2014, cash capital expenditure of US\$97 million, proceeds on sales of investment as described above and reduction in other current liabilities of US\$54 million due to seasonal changes.

**8. Post balance sheet events**

Following the closure of its Usutu Mill in the 2010 financial year, Sappi Southern Africa has signed an agreement to sell its villages situated around the mill for US\$11 million that have a book value of US\$0.3 million. The sale is subject to the provision of guarantees by the buyer and the registration of the transfer of the properties in the name of the buyer.

**Supplemental information** (*this information has not been audited or reviewed*)

**General definitions**

**Average** – averages are calculated as the sum of the opening and closing balances for the relevant period divided by two

**Black Economic Empowerment** – as envisaged in the Black Economic Empowerment (BEE) legislation in South Africa

**Black Economic Empowerment charge** – represents the IFRS 2 non-cash charge associated with the BEE transaction implemented in fiscal 2010

**Fellings** – the amount charged against the income statement representing the standing value of the plantations harvested

**NBSK** – Northern Bleached Softwood Kraft pulp. One of the main varieties of market pulp, produced from coniferous trees (ie spruce, pine) in Scandinavia, Canada and northern USA. The price of NBSK is a benchmark widely used in the pulp and paper industry for comparative purposes

**SG&A** – selling, general and administrative expenses

**Non-GAAP measures**

The group believes that it is useful to report certain non-GAAP measures for the following reasons:

- these measures are used by the group for internal performance analysis;
- the presentation by the group's reported business segments of these measures facilitates comparability with other companies in our industry, although the group's measures may not be comparable with similarly titled profit measurements reported by other companies; and
- it is useful in connection with discussion with the investment analyst community and debt rating agencies.

These non-GAAP measures should not be considered in isolation or construed as a substitute for GAAP measures in accordance with IFRS

**Capital employed** – shareholders' equity plus net debt

**EBITDA excluding special items** – earnings before interest (net finance costs), taxation, depreciation, amortisation and special items

**Headline earnings** – as defined in circular 3/2012 issued by the South African Institute of Chartered Accountants, separates from earnings all separately identifiable re-measurements. It is not necessarily a measure of sustainable earnings. It is a Listings Requirement of the JSE Limited to disclose headline earnings per share

**Net assets** – total assets less total liabilities

**Net asset value per share** – net assets divided by the number of shares in issue at balance sheet date

**Net debt** – current and non-current interest-bearing borrowings, and bank overdraft (net of cash, cash equivalents and short-term deposits)

**Net debt to total capitalisation** – net debt divided by capital employed

**Net operating assets** – total assets (excluding deferred taxation and cash) less current liabilities (excluding interest-bearing borrowings and overdraft). Net operating assets equate to **segment assets**

**ROCE** – annualised return on average capital employed. Operating profit excluding special items divided by average capital employed

**ROE** – annualised return on average equity. Profit for the period divided by average shareholders' equity

**RONOA** – return on average net operating assets. Operating profit excluding special items divided by average segment assets

**Special items** – special items cover those items which management believe are material by nature or amount to the operating results and require separate disclosure. Such items would generally include profit or loss on disposal of property, investments and businesses, asset impairments, restructuring charges, non-recurring integration costs related to acquisitions, financial impacts of natural disasters, non-cash gains or losses on the price fair value adjustment of plantations and alternative fuel tax credits receivable in cash

*The above financial measures are presented to assist our shareholders and the investment community in interpreting our financial results. These financial measures are regularly used and compared between companies in our industry.*
