Form 10-Q
November 12, 2013

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549
FORM 10-Q
(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the quarterly period ended September 30, 2013
Or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the transition period from _____ to _____
Commission File Number: 1-7183

TEJON RANCH CO.
(Exact name of Registrant as specified in its charter)

Delaware 77-0196136
(State or other jurisdiction of (IRS Employer
incorporation or organization) Identification No.)

P.O. Box 1000, Lebec, California 93243
(Address of principal executive offices)

Registrant's telephone number, including area code: (661) 248-3000

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer
Non-accelerated filer Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes No

The number of the Company's outstanding shares of Common Stock on November 1, 2013 was 20,140,872.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

September 30, 2013

1. BASIS OF PRESENTATION

The summarized information of Tejon Ranch Co. and its subsidiaries, (collectively, the “Company”), furnished pursuant to the instructions to Part I of Form 10-Q is unaudited and reflects all adjustments which are, in the opinion of the Company’s management, necessary for a fair statement of the results for the interim period. All such adjustments are of a normal recurring nature. The Company has reclassified certain prior period amounts in the consolidated statements of operations, and cash flows to conform to the current year presentation. We have evaluated subsequent events through the date of issuance of our consolidated financial statements.

The periods ending September 30, 2013 and 2012 include the consolidation of Centennial Founders, LLC’s statement of operations within the resort /residential segment and statements of cash flows. The Company’s September 30, 2013 and December 31, 2012 balance sheets and statements of equity are presented on a consolidated basis including the consolidation of Centennial Founders, LLC.

The Company has identified four reportable segments: commercial/industrial real estate development; resort/residential real estate development; mineral resources; and farming. The Company determined that the mineral resources segment should be reported, as a result of an evaluation of the Company’s operations during the fourth quarter of 2012. Mineral resources collects royalty income from oil and gas leases, rock and aggregate leases, and from a cement company. Information for the Company’s reported segments is presented in its consolidated statements of operations. The Company’s reporting segments follow the same accounting policies used for the Company’s consolidated financial statements. Management evaluates a segment’s performance based upon a number of factors including pretax results.

The results of the period reported herein are not indicative of the results to be expected for the full year due to the seasonal nature of the Company’s agricultural activities and timing of real estate sales and leasing activities. Historically, the Company’s largest percentages of farming revenues are recognized during the third and fourth quarters of the fiscal year.

For further information and a summary of significant accounting policies, refer to the Consolidated Financial Statements and notes thereto included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2012.

2. EQUITY

Earnings Per Share (EPS)

Net income (loss) per share is based upon the weighted average number of shares of common stock outstanding during the period. Diluted net income per share is based upon the weighted average number of shares of common stock outstanding and the weighted average number of shares outstanding assuming the issuance of common stock upon exercise of stock options, warrants to purchase common stock, and vesting of stock grants per U.S. generally accepted accounting principles, or GAAP.

	Three Months Ended September 30		Nine Months Ended September 30	
	2013	2012	2013	2012
Weighted average number of shares outstanding:				
Common stock	20,140,473	20,074,233	20,125,792	20,030,396
Common stock equivalents-stock options, grants	45,489	18,821	40,864	58,695
Diluted shares outstanding	20,185,962	20,093,054	20,166,656	20,089,091

Warrants

On August 7, 2013, Tejon Ranch Co. (the “Company”) announced that its Board of Directors declared a dividend of warrants (the “Warrants”) to purchase shares of Company common stock, par value \$0.50 per share (“Common Stock”) to holders of record of Common Stock as of August 21, 2013 (the “Record Date”). The Warrants were distributed to shareholders on August 28, 2013. Each Warrant will entitle the holder to purchase one share of Common Stock at an initial exercise price of \$40.00 per share. The Warrants will be exercisable through August 31, 2016, subject to the Company’s right to accelerate the expiration date under certain circumstances when the Warrants are in-the-money.

Edgar Filing: TEJON RANCH CO - Form 10-Q

Each holder of Common Stock as of the Record Date received a number of Warrants equal to the number of shares held multiplied by 0.14771, rounded to the nearest whole number. No cash or other consideration will be payable in respect of any fractional Warrants that are rounded down. The Company issued an aggregate of 3,000,000 Warrants. The Company issued the Warrants pursuant to a Warrant Agreement, dated as of

8

Table of Contents

August 7, 2013, between the Company, Computershare, Inc. and Computershare Trust Company, N.A., as warrant agent (the "Warrant Agreement").

3. MARKETABLE SECURITIES

The Company classifies its securities as available-for-sale and therefore is required to adjust securities to fair value at each reporting date. All costs and both realized and unrealized gains and losses on securities are determined on a specific identification basis.

The following is a summary of available-for-sale securities at:

(\$ in thousands)	Fair Value Hierarchy	September 30, 2013	December 31, 2012
		Cost	Estimated Fair Value
Certificates of deposit			
with unrecognized losses for less than 12 months		\$1,717	\$1,707
with unrecognized losses for more than 12 months		111	111
with unrecognized gains		7,006	7,050
Total Certificates of deposit	Level 1	8,834	8,868
US Treasury and agency notes			
with unrecognized losses for less than 12 months		5,853	5,841
with unrecognized losses for more than 12 months		3,948	3,930
with unrecognized gains		5,957	6,001
Total US Treasury and agency notes	Level 2	15,758	15,772
Corporate notes			
with unrecognized losses for less than 12 months		9,155	9,049
with unrecognized losses for more than 12 months		316	315
with unrecognized gains		22,082	22,338
Total Corporate notes	Level 2	31,553	31,702
Municipal notes			
with unrecognized losses for less than 12 months		1,378	1,360
with unrecognized losses for more than 12 months		1,045	1,040
with unrecognized gains		5,689	5,745
Total Municipal notes	Level 2	8,112	8,145
		\$64,257	\$64,487
			\$64,465
			\$65,049

We evaluate our securities for other-than-temporary impairment based on the specific facts and circumstances surrounding each security valued below its cost. Factors considered include the length of time the securities have been valued below cost, the financial condition of the issuer, industry reports related to the issuer, the severity of any decline, our intention not to sell the security, and our assessment as to whether it is not more likely than not that we will be required to sell the security before a recovery of its amortized cost basis. We then segregate the loss between the amounts representing a decrease in cash flows expected to be collected, or the credit loss, which is recognized through earnings, and the balance of the loss which is recognized through other comprehensive income.

At September 30, 2013, the fair market value of investment securities exceeded the cost basis by \$230,000. The cost basis includes any other-than-temporary impairments that have been recorded for the securities. None have been

recorded at September 30, 2013. The Company has determined that any unrealized losses in the portfolio are temporary as of September 30, 2013. The Company believes that market factors such as, changes in interest rates, liquidity discounts, and premiums required by market participants rather than an adverse change in cash flows or a fundamental weakness in credit quality of the issuer have led to the temporary declines in value. In the future based on changes in the economy, credit markets, financial condition of issuers, or market interest rates, this could change. As of September 30, 2013, the adjustment to accumulated other comprehensive income (loss) in consolidated equity for the temporary change in the value of securities reflects a decrease in the market value of available-for-sale securities of \$212,000, which is net of estimated taxes of \$142,000.

Table of Contents

As of September 30, 2013, the Company's gross unrealized holding gains equal \$400,000 and gross unrealized holding losses equal \$170,000.

The following tables summarize the maturities, at par, of marketable securities by year:

(in thousands)

At September 30, 2013	2013	2014	2015	2016	2017	Total
Certificates of deposit	\$965	\$1,627	\$4,213	\$1,501	\$437	\$8,743

	\$4,057	\$18,818	\$21,723	\$11,690	\$6,398	\$62,686

(in thousands)

At December 31, 2012	2013	2014	2015	2016	Total
Certificates of deposit	\$1,268	\$1,627	\$4,316	\$301	\$7,512
U.S. Treasury and agency notes	6,285	7,248	2,633	11	16,177
Corporate notes	10,916	6,729	9,420	3,325	30,390
Municipal notes	2,305	4,340	1,960	400	9,005
	\$20,774	\$19,944	\$18,329	\$4,037	\$63,084

The Company's investments in corporate notes are with companies that have an investment grade rating from Standard & Poor's.

4. LONG TERM WATER ASSETS

Long term assets consist of water and water contracts held for future use or sale. The water is held at cost which includes the price paid for the water and the cost to pump and deliver the water from the California aqueduct into the water bank. Water is currently held in a water bank on Company land in southern Kern County. Company banked water costs also include costs related to the right to receive additional acre feet of water in the future from the Antelope Valley East Kern Water Agency, or AVEK. The Company has also banked water within an AVEK owned water bank.

The Company also owns additional transferable water and holds State Water Project, or SWP contracts with the Tulare Water Storage and Dudley-Ridge Water Storage Districts to supply water through 2035. These contracts are being amortized using the straight line method over that period. Annual amortization for the next five years will be \$708,000 per year. Water contracts with the Wheeler Ridge Maricopa Water Storage District, or WRMWSA, and the Tejon-Castac Water District, or TCWD, are also in place, but were entered into with each district at inception of the contract and not purchased later from third parties, and do not have a related financial value on the books of the Company. Therefore there is no amortization expense related to these contracts. Annual costs associated with these contracts are expensed each quarter.

Table of Contents

Purchased water assets consist of the following:

(in acre feet)	September 30, 2013	December 31, 2012
Banked water and water for future delivery		
AVEK water bank	12,280	11,478
Company water bank	8,818	8,700
AVEK water for future delivery	2,362	2,362
Total Company and AVEK banked water	23,460	22,540
Transferable water with AVEK*	14,786	14,786
SWP contracts	3,444	3,444
Total purchased water - third parties	41,690	40,770
WRMWSD - Contracts with Company	15,547	15,547

TCWD - Banked water contracted to Company	38,943	38,943
Total purchased and contracted water sources in acre feet	101,659	100,739
(\$ in thousands)	September 30, 2013	December 31, 2012
Banked water and water for future delivery - Company and AVEK	\$4,779	\$4,448
Transferable water	10,862	8,988
SWP Contracts (net of accumulated amortization of \$2,552 and \$2,021 at September 30, 2013 and December 31 2012, respectively)	15,416	15,837
Total water assets	31,057	29,273
Less: current portion	(708) (708
Long-term water assets	\$30,349	\$28,565

*Any transferable water with AVEK that is used by the Company or returned by AVEK to the Company will be returned at a 1.5 to 1 factor giving the Company use of a total of 22,179 acre feet.

5. ACCRUED LIABILITIES AND OTHER

Accrued liabilities and other consists of the following:

(\$ in thousands)	September 30, 2013	December 31, 2012
Accrued vacation	\$ 689	\$ 674
Accrued paid personal leave	631	662
Accrued bonus	1,721	573
Property tax payable	510	—
Other	701	223
	\$ 4,252	\$ 2,132

6. SHORT-TERM AND LONG TERM DEBT

Long-term debt consists of the following:

(\$ in thousands)	September 30, 2013	December 31, 2012
Note payable to a financial institution	\$4,750	\$253
Less current portion	(231) (41
	\$4,519	\$212

During the third quarter of 2013, we entered into a promissory note agreement to pay a principal amount of \$4,750,000 with principal and interest due monthly starting on October 1, 2013. The interest rate on this promissory note is 4.25% per annum, with principal and interest payments ending on September 1, 2028. The proceeds from this promissory note were used to eliminate debt that had been previously used to provide long-term financing for a building being leased to Starbucks and provide additional working capital for future investment. The balance of the long-term debt instrument listed above approximates the fair value of the instrument.

Table of Contents

We have a long-term revolving line of credit of \$30,000,000 that, as of September 30, 2013, had no outstanding balance. At the Company's option, the interest rate on this line of credit can float at 2.50% over a selected LIBOR rate or can be fixed at 2.25% above LIBOR for a fixed rate term. During the term of this credit facility (which matures in December 2013), we can borrow at any time and partially or wholly repay any outstanding borrowings and then re-borrow, as necessary. Under the terms of the line of credit, we must maintain tangible net worth, defined as total equity, including noncontrolling interest, plus debt less intangible assets, of not less than \$175,000,000 and liquid assets of not less than \$25,000,000. At September 30, 2013 our tangible net worth was \$317,745,000 and liquid assets were \$73,569,000. A portion of our farm acreage secures this line of credit.

7. STOCK COMPENSATION

The Company's stock incentive plans provide for the making of awards to employees based upon time-based criteria or through the achievement of performance-related objectives. The Company has issued three types of stock grant awards under these plans: restricted stock with time-based vesting, performance share grants that only vest upon the achievement of specified performance conditions, such as corporate cash flow goals, and performance share grants that include threshold, target, and maximum achievement levels based on the achievement of specific real estate development performance milestones. The payouts at each performance goal are as follows:

Performance Share Grants with Performance Conditions (in shares)

Below threshold performance	—
Threshold performance	82,878
Target performance	407,757
Maximum performance	595,575

The following is a summary of the Company's stock grant activity assuming target achievement for outstanding performance grants for the following periods:

	September 30, 2013	December 31, 2012
Stock Grants Outstanding Beginning of the Year	688,041	744,508
New Stock Grants/Estimated additional shares maximum performance	96,087	113,643
Vested Grants	(62,997)	(170,110)
Expired/Forfeited Grants	(221,552)	—
Stock Grants Outstanding September 30, 2013	499,579	688,041

The unamortized cost associated with nonvested stock grants and the weighted-average period over which it is expected to be recognized as of September 30, 2013 was \$4,138,000 and 30 months, respectively. The fair value of restricted stock with time-based vesting features is based upon the Company's share price on the date of grant and is expensed over the service period. Fair value of performance grants that cliff vest based on the achievement of performance conditions is based on the share price of the Company's stock on the day of grant once the Company determines that it is probable that the award will vest. This fair value is expensed over the service period applicable to these grants. For performance grants that contain a range of shares from zero to maximum we determine, based on historic and projected results, the probability of (1) achieving the performance objective, and (2) the level of achievement. Based on this information, we determine the fair value of the award and measure the expense over the service period related to these grants. Because the ultimate vesting of all performance grants is tied to the achievement of a performance condition, we estimate whether the performance condition will be met and over what period of time. Ultimately, we adjust compensation cost according to the actual outcome of the performance condition. Under the Non-Employee Director Stock Incentive Plan, or NDSI Plan, each non-employee director receives his or her annual compensation in stock.

Table of Contents

The following table summarizes stock compensation costs for the Company's 1998 Stock Incentive Plan, or Employee 1998 Plan, and the NDSI Plan for the following periods:

	Nine Months Ended September 30, 2013	Nine Months Ended September 30, 2012
Employee 1998 Plan:		
Expensed	\$ 17,000	\$ 3,898,000
Capitalized	245,000	281,000
	262,000	4,179,000
NDSI Plan	384,000	286,000
	\$ 646,000	\$ 4,465,000

During the first quarter of 2013 an executive officer of the Company resigned, which led to the Company reversing \$485,000 of previously recognized stock compensation expense as the shares were forfeited upon leaving the Company. During the second quarter of 2013 our Chief Executive Officer and President, Robert A. Stine, announced he would retire at the end of 2013. Based on this announcement, we adjusted the service period related to his performance grants, which resulted in shares being forfeited and the reversal of \$2,271,000 previously recognized stock compensation expense.

8. INCOME TAXES

For the nine months ended September 30, 2013, the Company incurred a net income tax expense of \$1,752,000 compared to a net income tax expense of \$1,461,000 for the nine months ended September 30, 2012. These represent effective income tax rates of approximately 28% and 25% for the nine months ended September 30, 2013 and, 2012, respectively. The effective tax rate for the first nine months of 2013 is calculated based on the year to date net income for 2013 adjusted for estimated permanent tax differences such as depletion allowances. During 2013, depletion allowances have decreased due to lower oil and gas revenues compared to 2012. As of September 30, 2013, our balance sheet reflects an income tax payable of \$835,000.

The Company classifies interest and penalties incurred on tax payments as income tax expenses. During the first nine months ended September 30, 2013, the Company made income tax payments of \$115,000 for the 2013 tax year.

9. COMMITMENTS AND CONTINGENCIES

A total of 5,488 acres of the Company's land is subject to water contracts with the WRMWSD, requiring minimum future annual payments through the life of the contract which is 2035. The estimated future minimum annual payments are \$2,500,000 before any potential credits are received, whether or not water is available or is used. These payments are expensed each quarter through our farming operations.

The Tejon Ranch Public Facilities Financing Authority, or TRPFFA, is a joint powers authority formed by Kern County and TCWD, to finance public infrastructure within the Company's Kern County developments. TRPFFA has created two Community Facilities Districts, or CFDs, the West CFD and the East CFD. The West CFD has placed liens on 420 acres of the Company's land to secure payment of special taxes related to \$28,620,000 of bond debt sold by TRPFFA for Tejon Ranch Commerce Center, or TRCC-West. The East CFD has placed liens on 1,931 acres of the Company's land to secure payments of special taxes related to \$39,750,000 of bond debt sold by TRPFFA for TRCC-East. At TRCC-West, the West CFD has no additional bond debt approved for issuance. At TRCC-East, the East CFD has approximately \$80,250,000 of additional bond debt authorized by TRPFFA that can be sold in the future.

In connection with the sale of bonds there is a standby letter of credit for \$5,426,000 related to the issuance of East CFD bonds. The standby letter of credit is in place to provide additional credit enhancement and cover approximately two years worth of interest on the outstanding bonds. This letter of credit will not be drawn upon unless the Company, as the largest land owner in the CFD, fails to make its property tax payments. The Company believes that the letter of credit will never be drawn upon. The letter of credit is for two years beginning in January 2013 and will be renewed in two-year intervals as necessary. The annual cost related to the letter of credit is approximately \$83,000.

The Company is obligated, as a landowner in each CFD, to pay its share of the special taxes assessed each year. The secured lands include both the TRCC-West and TRCC-East developments. Proceeds from the sale of West CFD

bonds went to reimburse the Company for public infrastructure related to the TRCC West development. At this time there are no additional reimbursement funds remaining from the West CFD bonds and there is approximately \$8,900,000 of funds available for reimbursement of cost within the East CFD bonds. During the second quarter of 2013, \$14,139,000 of funds were reimbursed to the Company. During 2012, the Company paid approximately \$606,000 in special taxes. We anticipate we will pay approximately \$886,000 in special taxes during 2013. As development continues to occur at TRCC, new owners of land and

Table of Contents

new lease tenants, through triple net leases, will bear an increasing portion of the assessed special tax. As this happens, the Company's obligation is correspondingly reduced. The amount of special taxes paid by the Company could change in the future based on the amount of bonds outstanding and the amount of taxes paid by others.

Tejon Mountain Village

On November 10, 2009, an additional suit was filed in the U.S. District Court for the Eastern District of California (Fresno Division) by David Laughing Horse Robinson ("plaintiff") an alleged representative of the federally-unrecognized "Kawaiisu Tribe" alleging, inter alia, that the Company does not hold legal title to the land within the TMV development that it seeks to develop. The grounds for the federal lawsuit were the subject of a United States Supreme Court decision in 1924 where the United States Supreme Court found against the Indian tribes. The suit named as defendants the Company, two affiliates (Tejon Mountain Village, LLC and Tejon Ranchcorp), the County of Kern, and Ken Salazar, in his capacity as U.S. Secretary of the Interior.

The Company and other defendants filed motions to dismiss plaintiff's complaint for failure to state a claim and lack of jurisdiction. On January 24, 2011, the Company received a ruling by Judge Wanger dismissing all claims against the Company, TMV, the County and the federal defendants. However, the judge did grant a limited right by the plaintiff to amend certain causes of action in the complaint.

During April, 2011, the plaintiff filed his second amended complaint against the Company, alleging similar items as in the original suit. The plaintiff filed new materials during July, 2011 related to his second amended complaint.

Thereafter, the case was reassigned to Magistrate Judge McAuliffe. On January 18, 2012, the Judge McAuliffe issued an order dismissing all claims in plaintiff's second amended complaint for failure to state a cause of action and/or for lack of jurisdiction, but allowing the plaintiff one more opportunity to state certain land claims provided plaintiff file an amended complaint on or before February 17, 2012. The court also indicated that it was considering dismissing the case due to the lack of federal recognition of the "Kawaiisu Tribe". The court then granted plaintiff an extension until March 19, 2012 to file his third amended complaint.

Plaintiff filed his third amended complaint on March 19, 2012. Defendants filed motions to dismiss all claims in the third amended complaint without further leave to amend on April 30, 2012. Plaintiff thereafter substituted in new counsel and with leave of court filed his opposition papers on June 8, 2012. Defendants filed their reply papers on June 22, 2012. Oral argument of the motions to dismiss the third amended complaint was conducted on July 20, 2012. On August 7, 2012, the court issued its Order dismissing all of Robinson's claims without leave to amend and with prejudice, on grounds of lack of jurisdiction and failure to state a claim.

On September 24, 2012, Robinson (through another new counsel) filed a timely notice of appeal to the U.S. Court of Appeals for the Ninth Circuit. On September 26, 2012, the Court of Appeals issued its time schedule order calling for briefing to be completed by February, 2013. Robinson's brief was due to be filed on January 2, 2013. On February 26, 2013, the Ninth Circuit issued an order dismissing the appeal for failure to prosecute including failure to file an opening brief. Forty-five days later, Robinson's counsel filed a motion to reinstate the appeal. As an excuse Robinson's new counsel offered that he overlooked the court of appeal's briefing schedule order and assumed that state court procedure would be followed. The motion to reinstate the appeal was accompanied by a proposed opening brief. In response, the Company and the County of Kern filed oppositions to the motion to reinstate the appeal. Despite objections by the Company and the County (in which the U.S. Department of Justice ("DOJ") did not join), the Ninth Circuit granted Robinson's motion to reinstate, rejected the appeal of that reinstatement decision by the County and the Company, and set a due date of July 7, 2013 (Sunday) for the opposition briefs of the Company and the County to be filed. Thereafter, the DOJ and the County exercised their right to obtain an automatic 30-day extension to August 6, 2013, and the Company filed an unopposed motion (which the Ninth Circuit granted) extending the Company's date for its opposition brief to August 6, 2013 as well. Thereafter, DOJ requested and obtained further extensions of time to file its answering brief, first to August 27, 2013, and finally to September 17, 2013. The Company filed its answering brief and supplemental excerpts of record on August 27, 2013. Kern County and DOJ both filed their answering briefs on September 17, 2013. Both the Company and Kern County (but not DOJ) included in their answering briefs the argument that the Court of Appeal lacks jurisdiction to hear the appeal because Robinson did not show the required extraordinary good cause for his failure to file his opening briefs. Robinson is entitled to file optional reply briefs and has obtained an extension of time to November 12, 2013, to do so. In the meantime, the Company continues to believe

that a negative outcome of this case is remote at this time and the monetary impact of an adverse result, if any, also cannot be estimated at this time.

National Cement

The Company leases land to National Cement Company of California Inc., or National, for the purpose of manufacturing Portland cement from limestone deposits on the leased acreage. The California Regional Water Quality Control Board, or RWQCB, for the Lahontan Region issued several orders in the late 1990s with respect to environmental conditions on the property currently leased to National:

Table of Contents

Groundwater plume of chlorinated hydrocarbon compounds. This order directs the Company's former tenant Lafarge Corporation, or Lafarge, the current tenant National, and the Company to, among other things, clean up (1) groundwater contamination on the leased property. In 2003, Lafarge and National installed a groundwater pump-and-treat system to clean up the groundwater. The Company is advised that Lafarge and National continue to operate the cleanup system and will continue to do so over the near-term.

Cement kiln dust. National and Lafarge have consolidated, closed and capped cement kiln dust piles located on land leased from the Company. An order of the RWQCB directs National, Lafarge and the Company to maintain (2) and monitor the effectiveness of the cap. Maintenance of the cap and groundwater monitoring remain as on-going activities.

Former industrial waste landfills. This order requires Lafarge, National and the Company to complete the cleanup (3) of groundwater associated with the former industrial waste landfills. The Company is advised that the cleanup is complete. Lafarge continues to monitor the groundwater.

Diesel fuel. An order of the RWQCB directs Lafarge, National and the Company to clean up contamination from a (4) diesel fuel tank and pipeline. The Company is advised that Lafarge and National have substantially completed the groundwater cleanup and that groundwater monitoring remains an on-going activity.

To date, the Company is not aware of any failure by Lafarge or National to comply with the orders or informal requests of the RWQCB. Under current and prior leases, National and Lafarge are obligated to indemnify the Company for costs and liabilities arising directly or indirectly out of their use of the leased premises. The Company believes that all of the matters described above are included within the scope of the National or Lafarge indemnity obligations and that Lafarge and National have sufficient resources to perform any reasonably likely obligations relating to these matters. If they do not and the Company is required to perform the work at its own cost, it is unlikely that the amount of any such expenditure by the Company would be material.

Antelope Valley Groundwater Cases

On November 29, 2004, a conglomerate of public water suppliers filed a cross-complaint in the Los Angeles Superior Court seeking a judicial determination of the rights to groundwater within the Antelope Valley basin, including the groundwater underlying the Company's land. Four phases of a multi-phase trial have been completed. Upon completion of the third phase, the court ruled that the groundwater basin is currently in overdraft and established a current total sustainable yield. The fourth phase of trial occurred in first half 2013 and resulted in confirmation of each party's groundwater pumping for 2011 and 2012. The next phase of trial is anticipated to occur in the 1st or 2nd quarter of 2014 and may address a number of issues, including whether prescription of rights to groundwater has occurred. At this time, it is difficult to ascertain whether a settlement agreement will be reached and what effect, if any, this case may have on the Centennial project or the Company's remaining lands in the Antelope Valley. Because the water supply plan for the Centennial project includes several sources of water in addition to groundwater underlying the Company's lands, and because the creation of an efficient market for local water rights is frequently an outcome of adjudication proceedings, the Company remains hopeful that sufficient water to supply the Company's needs will continue to be available for its use regardless of the outcome of this case.

State Water Resources Control Board Lawsuit

On May 12, 2010, the California Attorney General, on behalf of the State Water Resources Control Board, filed a complaint in the Alameda County Superior Court for civil penalties and a permanent injunction against a number of TravelCenters of America LLC, or TA, facilities in the Central Valley of California. The travel centers in the Petro Travel Plaza Holdings LLC, or TA/Petro, were also included in the complaint. The lawsuit alleges violations of various reporting, operating and monitoring regulations related to operation and maintenance of underground storage tanks. In addition to the TA/Petro entity and its respective member entities, the lawsuit also names the Company and Tejon Industrial Corporation as defendants. The Company has tendered defense of the lawsuit to TA, under the "defend and indemnify" clause in the TA/Petro LLC's operating agreement, and has also secured the services of an outside law firm to work with TA's outside counsel under a joint defense agreement. On September 16, 2011, the Company and Tejon Industrial Corp. were dismissed from the lawsuit, without prejudice. The parties remaining are currently engaged in discussions regarding a negotiated resolution, and the Company understands that a settlement of the claims asserted in the litigation is likely. If such a settlement is reached, the Company does not anticipate a material adverse

impact on the Company.

Water Bank Lawsuits

On June 3, 2010, the Central Delta and South Delta Water Agencies and several environmental groups, including CBD, filed a complaint in the Sacramento County Superior Court against the California Department of Water Resources (DWR), Kern County Water Agency and a number of “real parties in interest,” including the Company and TCWD. The lawsuit challenges certain amendments to the State Water Project contracts that were originally approved in 1995, known as the “Monterey Amendments.” The original Environmental Impact Report, or EIR, for the Monterey Amendments was determined to be insufficient in an earlier lawsuit. The current lawsuit principally (i) challenges the adequacy of the remedial EIR that DWR

15

Table of Contents

prepared as a result of the original lawsuit and (ii) challenges the validity of the Monterey Amendments on various grounds, including the transfer of the Kern Water Bank, or KWB, from DWR to Kern County Water Agency and in turn to the Kern Water Bank Authority (KWBA), whose members are various Kern and Kings County interests, including TCWD, which TCWD has a 2% interest in the KWBA. A parallel lawsuit was also filed by the same plaintiffs in Sacramento Superior Court against Kern County Water Agency, also naming the Company and TCWD as real parties in interest, which has been stayed pending the outcome of the other action against DWR. The Company is named on the ground that it “controls” TCWD. TCWD has a contract right for water stored in the KWB and rights to recharge and withdraw water. Counsel for the Company is pursuing a dismissal of the Company from these lawsuits. In an initial favorable ruling on January 25, 2013, Judge Frawley determined that the challenges to the validity of the Monterey Amendments, including the transfer of the KWB, were not timely and barred by the statutes of litigation and doctrine of laches. The substantive hearing on the challenges to the EIR is scheduled for January 31, 2014. Given the preliminary nature of these lawsuits, the Company has an insufficient basis to address the merits or potential outcomes of the lawsuit. The monetary value of a potential adverse outcome on the claim likewise cannot be estimated at this time.

10. RETIREMENT PLANS

The Company has a defined benefit plan that covers many of its employees, or the Benefit Plan. The benefits are based on years of service and the employee’s five-year final average salary. Contributions are intended to provide for benefits attributable to service both to date and expected to be provided in the future. The Company funds the plan in accordance with the Employee Retirement Income Security Act of 1974 (ERISA) and the Pension Protection Act. The Company anticipates contributing approximately \$850,000 to the plan during 2013.

The Benefit Plan assets consist of equity, debt and short-term money market investment funds. The plan’s current investment policy targets 65% equities, 25% debt and 10% money market funds. Equity and debt investment percentages are allowed to fluctuate plus or minus 20% around the respective targets to take advantage of market conditions. As an example, equities can fluctuate from 78% to 52% of plan assets. At September 30, 2013, the investment mix was approximately 58% equity, 35% debt, and 7% money market funds. At December 31, 2012, the investment mix was approximately 71% equity, 26% debt and 3% money market funds. Equity investments consist of a combination of individual equity securities plus value funds, growth funds, large cap funds and international stock funds. Debt investments consist of U.S. Treasury securities and investment grade corporate debt. The weighted-average discount rate and rate of increase in future compensation levels used in determining the periodic pension cost is 4.0% in 2013 and 2012. The expected long-term rate of return on plan assets is 7.5% in 2013 and 2012. The long-term rate of return on plan assets is based on the historical returns within the plan and expectations for future returns.

The expected total pension and retirement expense for the Benefit Plan was as follows:

(In thousands)	Nine Months Ended	
	2013	2012
Cost components:		
Service cost-benefits earned during the period	\$ (213)	\$ (188)
Interest cost on projected benefit obligation	(282)	(288)
Expected return on plan assets	342	335
Net amortization and deferral	(144)	(165)
Total net periodic pension cost	\$ (297)	\$ (306)

The Company has a Supplemental Executive Retirement Plan, or SERP, to restore to executives designated by the Compensation Committee of the Board of Directors the full benefits under the pension plan that would otherwise be restricted by certain limitations now imposed under the Internal Revenue Code. The SERP is currently unfunded. The expected total pension and retirement expense for SERP was as follows:

(In thousands)	Nine Months Ended	
	2013	2012
Cost components:		
Service cost-benefits earned during the period	\$ (129)	\$ (129)

Edgar Filing: TEJON RANCH CO - Form 10-Q

Interest cost on projected benefit obligation	(162) (162)
Net amortization and deferral	(216) (48)
Total net periodic pension cost	\$(507) \$(339)

16

Table of Contents

11. BUSINESS SEGMENTS

The Company has identified four reportable segments: commercial/industrial real estate development; resort/residential real estate development; mineral resources; and farming.

The revenue components of our commercial/industrial real estate development segment for the nine months ended September 30 are as follows:

(In thousands)	2013	2012
Commercial leases	\$5,078	\$4,537
Grazing leases	1,090	958
Land Sale	—	648
All other land management ancillary services	2,221	1,366
	\$8,389	\$7,509

Commercial lease revenue consists of land and building leases to tenants at our commercial retail and industrial developments, base and percentage rents from our Calpine power plant lease, communication tower rents, and payments from easement leases. All other land management ancillary services include wildlife management, landscape and property maintenance, and building management services. During the first eight months of 2012, the Company's game management operations were temporarily suspended in order to complete the development of a new sales program and operating procedures. Please refer to Form 8-K filed on January 20, 2012 regarding the Company's game management and hunting operations. Game management reopened operations on September 1, 2012.

The resort/residential real estate development segment produces revenues from farming activities such as hay and alfalfa sales within the Centennial Founders, LLC and is actively involved in the land entitlement and pre-development process. The farming segment produces revenues from the sale of wine grapes, almonds and pistachios.

The mineral resources segment receives oil and mineral royalties from the exploration and development companies who extract or mine the natural resources from our land. The following table summarizes these activities:

(\$ in thousands)	Nine Months Ended	
	September 30, 2013	September 30, 2012
Oil and gas	\$6,198	\$9,137
Rock aggregate	639	944
Cement	581	559
Land lease for oil exploration	637	592
	\$8,055	\$11,232

12. INVESTMENTS IN UNCONSOLIDATED AND CONSOLIDATED JOINT VENTURES

The Company maintains investments in joint ventures. The Company accounts for its investments in unconsolidated joint ventures using the equity method of accounting unless the venture is a variable interest entity, or VIE, and meets the requirements for consolidation. The Company's investment in its unconsolidated joint ventures at September 30, 2013 was \$62,000,000. The equity in the income of the unconsolidated joint ventures was \$2,920,000 for the nine months ended September 30, 2013. The unconsolidated joint ventures have not been consolidated as of September 30, 2013, because the Company does not control the investments. The Company's current joint ventures are as follows: Petro Travel Plaza Holdings LLC – TA/Petro is an unconsolidated joint venture with TravelCenters of America, LLC for the development and management of travel plazas and convenience stores. This is a 60%-owned joint venture which owns and operates travel plazas/commercial highway operations in TRCC. It houses multiple commercial eating establishments as well as diesel and gasoline operations. The Company does not control the investment due to its having only 50% voting rights, and because our partner in the joint venture is the managing partner and performs all of the day-to-day operations at the facility. At September 30, 2013, the Company had an equity investment balance of \$10,296,000 in this joint venture.

Tejon Mountain Village LLC – Tejon Mountain Village LLC, or TMV LLC, is an unconsolidated joint venture between the Company and DMB TMV LLC (a wholly owned subsidiary of DMB Associates, Inc.) formed to obtain all necessary government entitlement approvals and to develop the Tejon Mountain Village project. The Company

owns a 50% interest in this venture. At September 30, 2013, the Company's equity investment balance in this joint venture was \$43,379,000.

Table of Contents

Rockefeller Joint Ventures – The Company has multiple joint ventures with Rockefeller Group Development Corporation or Rockefeller. Two joint ventures are for the development of buildings on approximately 91 acres and are part of an agreement for the potential development of up to 500 acres of land in TRCC including pursuing Foreign Trade Zone, or FTZ, designation and development of the property within the FTZ for warehouse distribution and light manufacturing. The Company owns a 50% interest in each of the joint ventures. Currently the Five West Parcel LLC joint venture owns and leases a 606,000 square foot building. The second of these joint ventures, 18-19 West LLC, was formed in August 2009 through the contribution of 61.5 acres of land by the Company, which is being held for future development.

During the second quarter of 2013, we entered into a new joint venture with Rockefeller, the TRCC/Rock Outlet Center LLC joint venture, to develop, own, and manage a 326,000 square foot outlet center on land at TRCC-East. This outlet center is estimated to cost approximately \$86 million to construct and will be funded through a construction loan for up to 60% of the costs and equity from the members. This joint venture is separate from the above agreement to develop up to 500 acres. During the second quarter of 2013, we contributed land and other assets at an agreed value of \$10,558,000 for our capital contribution and Rockefeller matched our capital contribution with cash.

At September 30, 2013, the Company's combined book value equity investment balance in these three joint ventures was \$8,325,000.

Centennial Founders, LLC – Centennial Founders, LLC is a joint venture with Pardee Homes, Lewis Investment Company, and Standard Pacific Corp. that was organized to pursue the entitlement and development of land that the Company owns in Los Angeles County. Based on the Second Amended and Restated Limited Liability Company Agreement of Centennial Founders, LLC and the change in control and funding that resulted from the amended agreement, Centennial Founders, LLC qualified as a variable interest entity, beginning in the third quarter of 2009 and the Company was determined to be the primary beneficiary. As a result, Centennial Founders, LLC has been consolidated into our financial statements beginning in that quarter. Our partners retained a noncontrolling interest in the joint venture. At September 30, 2013 the Company had a 72.52% ownership position in Centennial Founders, LLC.

The Company's investment balance in its unconsolidated joint ventures differs from its capital accounts in the respective joint ventures. The differential represents the difference between the cost basis of assets contributed by the Company and the agreed-upon contribution value of the assets contributed.

Table of Contents

Unaudited condensed balance sheet information of the Company's unconsolidated and consolidated joint ventures as of September 30, 2013 and December 31, 2012 and condensed statements of operations for the nine months ended September 30, 2013 and September 30, 2012 are as follows:

13. SUBSEQUENT EVENTS

On November 6, 2013, the Company completed the acquisition of a water purchase agreement from DMB Pacific LLC, or DMB, that will allow the Company to purchase 6,693 acre feet of water each year from the Nickel Family, LLC, or Nickel, a California limited liability company that is located in Kern County. The aggregate purchase price was approximately \$18,700,000 and was paid one-half in cash and one-half in shares of Company common stock. The number of shares of common stock delivered was determined based on the volume weighted average price of common stock for the ten trading days that ended two days prior to closing.

This purchase of water is similar to other transactions the Company has completed over the last several years as the Company has been building its water assets for internal needs as well as for investment purposes due to the tight water environment within California.

The initial term of the water purchase agreement with Nickel runs through 2044 and includes a Company option to extend the contract for an additional 35 years. The annual cost of water in 2014 under the contract is \$656 per acre-foot, subject to annual cost increases based on the greater of the consumer price index and 3%.

The water purchased will ultimately be used in the development of the Company's land for commercial/industrial development, residential development, and farming. Interim uses will include the sale of portions of this water to third party users on an annual basis until the water is fully used for the Company's internal uses.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Quarterly Report on Form 10-Q contains forward-looking statements, including without limitation statements regarding strategic alliances, the almond, pistachio and grape industries, the future plantings of permanent crops, future yields, prices and water availability for our crops and real estate operations, future prices, production and demand for oil and other minerals, future development of our property, future revenue and income of our jointly-owned travel plaza and other joint venture operations, potential losses to the Company as a result of pending environmental proceedings, the adequacy of future cash flows to fund our operations, market value risks associated with investment and risk management activities and with respect to inventory, accounts receivable and our own outstanding indebtedness and other future events and conditions. In some cases these statements are identifiable through the use of words such as "anticipate", "believe", "estimate", "expect", "intend", "plan", "project", "target", "can", "could", "will", "should", "would", and similar expressions. In addition, any statements that refer to projections of our future financial performance, our anticipated growth, and trends in our business and other characterizations of future events or circumstances are forward-looking statements. We caution you not to place undue reliance on these forward-looking statements. These forward-looking statements are not a guarantee of future performances and are subject to assumptions and involve known and unknown risks, uncertainties and other important factors that could cause the actual results, performance or achievements of the Company, or industry results, to differ materially from any future results, performance, or achievement implied by such forward-looking statements. These risks, uncertainties and important factors include, but are not limited to, weather, market and economic forces, availability of financing for land development activities, and success in obtaining various governmental approvals and entitlements for land development activities. No assurance can be given that the actual future results will not differ materially from the forward-looking statements that we make for a number of reasons including those described above in the section entitled, "Risk Factors" in this report and our Annual Report on Form 10-K .

Overview

We are a diversified real estate development and agribusiness company committed to responsibly using our land and resources to meet the housing, employment, and lifestyle needs of Californians and to create value for our shareholders. In support of these objectives, we have been investing in land planning and entitlement activities for new industrial and residential land developments and in infrastructure improvements within our active industrial development. Our prime asset is approximately 270,000 acres of contiguous, largely undeveloped land that, at its most southerly border, is 60 miles north of Los Angeles and, at its most northerly border, is 15 miles east of Bakersfield. Our business model is designed to create value through the entitlement and development of land for commercial/industrial and resort/residential uses while at the same time protecting significant portions of our land for conservation purposes. We operate our business near one of the country's largest population centers, which is expected to continue to grow well into the future.

We currently operate in four business segments: commercial/industrial real estate development; resort/residential real estate development; mineral resources; and farming.

Our commercial/industrial real estate development segment generates revenues from building, grazing, and land lease activities, land and building sales, and ancillary land management activities. The primary commercial/industrial development is TRCC and during the first quarter of 2013 we began land planning activities and the first steps of gathering information to prepare an environmental impact report to entitle the Grapevine Development Area, which is an approximately 15,315-acre potential development area located on the San Joaquin Valley floor area of our lands, adjacent to TRCC. The resort/residential real estate development segment is actively involved in the land entitlement and development process internally and through joint venture entities. Its revenues are generated through farming activities within the Centennial joint venture. Within our resort/residential segment, the two active developments are TMV and the Centennial master planned community. Our mineral resources segment generates revenues from oil and gas royalty leases, rock and aggregate mining leases, and a lease with National Cement. The farming segment produces revenues from the sale of wine grapes, almonds, and pistachios.

For the first nine months of 2013 we had net income of \$4,936,000 compared to net income of \$4,295,000 for the first nine months of 2012. When comparing to the first nine months of 2012, the improvement in net income is primarily

the result of improved equity in earnings of unconsolidated joint ventures and a reduction in operating expenses.

Critical Accounting Policies

The preparation of our interim financial statements in accordance with GAAP requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We consider an accounting estimate to be critical if (1) the accounting estimate requires us to make assumptions about matters that were highly uncertain at the time the accounting estimate was made, and (2) changes in the estimates that are likely to occur from period to period, or use of different estimates that we reasonably could have used in the current period, would have a material impact on our financial condition or results of operations. On an on-going basis, we evaluate our

Table of Contents

estimates, including those related to revenue recognition, impairment of long-lived assets, capitalization of costs, profit recognition related to land sales, stock compensation, and our defined benefit retirement plan. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Our critical accounting policies have not changed since the filing of our Annual Report on Form 10 – K for the year ended

December 31, 2012. Please refer to that filing for a description of our critical accounting policies.

Results of Operations

Comparison of nine months ended September 30, 2013 to nine months ended September 30, 2012

Total revenues for the first nine months of 2013 were \$32,363,000 compared to \$33,542,000 for the first nine months of 2012. This decrease of \$1,179,000, or 4%, in total revenues is primarily attributable to a decrease in mineral resources revenues, partially offset by improved revenues from the other operating segments.

Commercial/industrial revenues improved \$880,000, or 12%, in the first nine months of 2013 compared to the same period in 2012. The improvement is primarily due to a \$1,036,000 increase in hunting and grazing lease revenues, as our hunting program was closed during the first eight months of 2012. Additionally, percentage rent from our Calpine power plant increased \$477,000. These increases were partially offset by a \$648,000 decrease in land sale revenue recognized in the first half of 2012 related to the deferred gain from the land sale to Caterpillar that occurred in December of 2011.

Commercial/industrial expenses increased by \$550,000, or 6%, during the first nine months of 2013 compared to the same period in 2012, primarily due to a \$453,000 increase in hunting department expenses resulting from the re-opening of the hunting program in September 2012, a \$290,000 increased allocation from corporate general and administrative, and a \$195,000 increase in assessments from TCWD. These increases are partially offset by a \$173,000 decrease in stock compensation mainly due to a change in estimate in 2012 of a performance condition tied to the TMV and Centennial projects. Additional decreases in expenses are tied to lower employee benefit expenses in 2013 due to a change in policy in 2012 and reduced marketing expenses, as the budget for the marketing of the outlet center is now included in the TRCC/Rock Outlet Center LLC joint venture.

Resort/residential revenues increased \$614,000, or 230%, during the first nine months of 2013 compared to the same period in 2012, primarily due to a \$354,000 increase in ancillary hay sales at the Centennial project and a \$235,000 increase in management fees from the TMV project.

Resort/residential expenses decreased \$1,207,000, or 34%, in the first nine months of 2013 compared to the same period in 2012, primarily due to a \$1,246,000 decrease in compensation, mainly stock compensation due to the reversal of previously recorded expense related to unvested awards of an executive who left the Company and a change in estimate in 2012 of a performance condition tied to the TMV and Centennial projects.

Mineral resources revenues decreased \$3,177,000, or 28%, during the first nine months of 2013 compared to the same period in 2012, due to approximately \$545,000 in revenues recorded in the first quarter of 2012 from new wells that came on-line, a decrease in production of 29% resulting from temporary closures of existing wells for maintenance, expansion of production facilities, and regulatory permitting management. In addition, the price per barrel of oil decreased by 1% when compared to the first nine months of 2012.

Farming revenues increased \$504,000, or 3%, during the first nine months of 2013 compared to the same period in 2012, primarily due to a \$2,059,000 increase in almond revenues. This improvement in almond revenue compared to the same period in 2012 is driven by a 64% increase in price for the sale of our prior year almond crop inventory as well as sales for our current 2013 crop. This increase in pricing was slightly offset by a 9% decrease in almond pounds sold. At September 30, 2013, there were 16% of almond acres remaining to be harvested. During the summer, high winds damaged all of our crops at varying degrees resulting in lower production levels for all crops. Pistachio revenues decreased \$1,387,000 resulting from a 29% decrease in pounds sold, as a result of this being a down production cycle year coupled with the wind damage. Average price per pound of pistachios increased 6%. At September 30, 2013, all pistachio acres were harvested. Wine grape revenues decreased \$293,000 resulting from a

33% decrease in tons sold, as a result of a 25% reduction of the French Columbard variety due removal of old vines, coupled with the wind damage. At September 30, 2013, approximately 50% of the wine grape acreage remains to be harvested.

Farming expenses increased \$1,436,000, or 17%, during the first nine months of 2013 compared to the same period in 2012, primarily due to increases of \$827,000, \$530,000 and \$230,000 for almonds, wine grapes and pistachios crop cost of sales, mainly due to an early 2013 harvest as compared to last year.

Table of Contents

Corporate expenses decreased \$2,035,000, or 22%, during the first nine months of 2013 compared to the same period in 2012, primarily due to a \$2,605,000 decrease in stock compensation primarily due to the reversal of expense associated with grants that will not vest upon the Chief Executive Officer's retirement in December 2013 coupled with a change in estimate in the second quarter of 2012 of a performance condition tied to the TMV project, and a \$685,000 increase in allocations to other segments. These decreases were partially offset by a \$721,000 increase in professional services primarily related to general business consulting, responding to the SEC comment letter, the warrant dividend program, and consulting services in preparation for increased business activity from the outlet center. Other expenses that increased are \$241,000 higher licensing fees for IT software and a \$217,000 increase in charitable donations mainly to the Bakersfield Houchin Blood Bank.

Our share of earnings from our joint ventures increased \$1,272,000 during the first nine months of 2013 compared to the same period in 2012, primarily due to \$988,000 higher income from our TA/Petro joint venture mainly due to improved non-fuel margins and lower operating and interest expenses. Additionally, our share of income from our Five West Parcel LLC joint venture increased \$184,000 mainly due to the increased occupancy of the Five West Parcel building that started in April 2012 and a credit from our partner in the TRCC/Rock Outlet Center LLC joint venture to reimburse us for outlet center marketing expenses incurred before the joint venture was established. Net income attributable to common stockholders for the first nine months of 2013 increased \$577,000 to \$4,991,000 compared to the same period in 2012. The increase is tied to lower total expenses primarily due to the decrease in stock compensation expense and an increase in equity in earnings of unconsolidated joint ventures largely from our TA/Petro joint venture which was partially offset by lower total revenues, mainly from mineral resources and an increase in income tax expense.

Comparison of three months ended September 30, 2013 to three months ended September 30, 2012

Total revenues for the third quarter of 2013 were \$15,128,000 compared to \$16,114,000 for the third quarter of 2012. This decline of \$986,000, or 6%, in total revenues is primarily attributable to a decrease in mineral resources revenues.

Commercial/industrial revenues improved \$104,000, or 4%, when compared to the third quarter of 2012. The improvement is primarily due to an increase in percentage rent from our Calpine power plant and improved revenues from ancillary services such as the hunting program.

Commercial/industrial expenses increased by \$234,000, or 8%, compared to the third quarter of 2012, primarily due to a \$160,000 increase in assessments from TCWD, a \$131,000 decrease in capitalized project costs, and an \$84,000 increase in stock compensation expense compared to the same period in 2012 due to a change in estimate during 2012 tied to the Centennial project that reduced expense. These increases were partially offset by a \$122,000 decrease in compensation as a result of changes to employee benefits recorded in 2012.

Resort/residential revenues increased \$278,000, or 211%, during the third quarter of 2012, primarily due to the timing of ancillary hay sales at the Centennial project and an increase in management fees from the TMV project.

Resort/residential expenses decreased \$626,000, or 44%, compared to the third quarter of 2012, primarily due to a \$381,000 decrease in compensation, including stock compensation, related to an executive who left the Company.

Professional services decreased \$120,000 mainly due to performance fees paid to consultants in 2012 related to achievement of development milestones. Additionally, ancillary cost of crop sales decreased \$78,000,

Mineral resources revenues decreased \$1,023,000, or 30%, compared to the third quarter of 2012, primarily due to a 32% decrease in production, as described above which was partially offset by a 12% increase in the average price per barrel of oil when compared to the third quarter of 2012.

Farming revenues decreased \$345,000, or 4% during the third quarter of 2013 compared to the same period of 2012, primarily due to a \$1,335,000 decrease in pistachio revenues, \$293,000 decrease in wine grape revenues, partially offset by a \$1,184,00 increase in almond revenues. During the summer, high wind damaged all of our crops at varying degrees resulting in lower production levels. The decrease in pistachio revenues was driven by a 31% decrease in pounds sold during the third quarter, as a result of this being a down production cycle year coupled with the wind damage. The average price of pistachios increased 11%. The decrease in wine grape revenues was due to a 33% decrease in tons sold, as a result of a 25% reduction in acreage of the French Columbard variety due to the removal of

vines, coupled with wind damage on current grape crop. The \$1,184,000 increase in almond revenues were driven by a 29% increase in average price per pound and a 28% increase in pounds sold when compared to the third quarter of 2012. The increase in pounds sold was mainly due to an early harvest. However, we expect total production to be lower due to wind damage.

Farming expenses increased \$1,221,000, or 24%, during the third quarter of 2013 compared to the same period in 2012, primarily due to a \$862,000 increase in almond crop cost of sales, a \$466,000 increase in wine grape crop cost of sales, and a

Table of Contents

\$313,000 increase in pistachio crop cost of sales. The increases in crop expenses are mainly due to an early harvest and timing of sales. These increases are partially offset by a \$310,000 decrease in water costs for credits received for pumping the Ranch's ground water into the district water system.

Corporate expenses increased \$323,000, or 12%, during the third quarter of 2013 compared to the third quarter of 2012, primarily due to a \$232,000 increase in professional services mainly for consulting related to general business activities and the warrant dividend program. Licenses increased \$114,000 primarily related to our software infrastructure. Stock compensation increased \$322,000 compared to the same period in 2012 due to a change in estimate during 2012 tied to the Centennial project that reduced expense, as well as an increase in grants to the board of directors. These increases are partially offset by a \$232,000 increase in allocations to other segments and a \$98,000 decrease in compensation compared to 2012 due to a change in employee benefits.

Our share of earnings from our joint ventures increased \$127,000 in the third quarter of 2013 compared to the third quarter of 2012, primarily due to a \$223,000 higher income from our TA/Petro joint venture mainly due to improved non-fuel margins and lower interest expense.

Net income attributable to common stockholders during the quarter ended September 30, 2013 declined \$1,729,000 to \$2,292,000. The decrease is driven by lower mineral resources revenues and higher farming expenses, as a result of the timing of the 2013 crop harvest.

Future activities within the commercial/industrial segment continue to be focused on the marketing and development of commercial/industrial and retail product offerings within TRCC-East and completing the build-out of TRCC-West. These developments are being planned to coincide with what we anticipate to be future market demand, although the timing and extent of the future market demand is difficult for us to predict. During the second quarter of 2013, we began construction of an outlet center through the TRCC/Rock Outlet Center LLC joint venture. It is expected the outlet center will be completed during late summer of 2014. We are continuing to work with a number of potential tenants to finalize leases for our outlet center and we hope to complete these activities during fourth quarter of 2013. We completed a new phase of master infrastructure development within TRCC-East during the first quarter of 2013. This new infrastructure will begin to open up retail and industrial sites in the southern section of the TRCC-East development.

We believe our development strategy fits within the logistics model that many companies are using, which favors larger single-site buildings rather than a number of decentralized smaller distribution centers. Buildings of 1.0 million square feet or larger are more difficult to build in Los Angeles due to the number of acres necessary for a building of that size. Our ability to provide land parcels to support buildings of that size can provide us with a potential marketing advantage in the future. A potential disadvantage to our development strategy is our distance from the Port of Los Angeles in comparison to the traditional warehouse/distribution centers east of Los Angeles. Vacancy rates have declined in the Inland Empire region of Los Angeles, a large industrial area within Los Angeles that we compete with for customers. Lease rates in the Inland Empire area have also been improving, which could be helpful to us in our lease pricing in the future.

During the remainder of 2013, we anticipate that our commercial/industrial and resort/residential real estate segments will incur costs, net of amounts capitalized, related to professional service fees, marketing costs, commissions, planning costs, and staffing costs as we continue to pursue development opportunities. Infrastructure development and marketing activities and costs could continue over the next several years as we develop our land holdings.

Most of the expenses incurred within our resort/residential segment during 2013 will be focused on the ongoing implementation of the Ranch Wide Management Plan section of the Conservation and Land Use Agreement and in coordinating efforts with our joint venture partners in the achievement of entitlement for Centennial Founders, LLC, The Grapevine Development Area, and beginning of pre-development activities at TMV.

All of our crops are sensitive to the size of each year's world crop. Large crops in California and abroad can rapidly depress prices. Thus far during the 2013 almond and pistachio prices remain strong and almond prices have increased approximately 64% compared to the first nine months of 2012. With demand remaining strong for almonds and pistachios, estimated pricing for the 2013 crop harvest is expected to be comparable to and possibly better than 2012. Pricing for 2013 will ultimately be based on the size of the 2013 crop, which at this time in the harvest season appears

smaller than the prior year.

Prices received for many of our products are dependent upon prevailing market conditions and commodity prices. Therefore, we are unable to accurately predict revenue and we cannot pass on to our customers any cost increases caused by general inflation, except to the extent such inflation is reflected in market conditions and commodity prices. The operations of the Company are seasonal and future results of operations cannot be predicted based on quarterly results. Future real estate sales and leasing activity are dependent on market circumstances and specific opportunities and therefore are difficult to predict from period to period.

Table of Contents

For further discussion of the risks and uncertainties that could potentially adversely affect us, please refer to Part I, Item 7 – “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in the Company’s Annual Report on Form 10-K for the year ended December 31, 2012, or Annual Report, and in Part I, Item 1A - "Risk Factors" of our Annual Report.

We continue to be involved in various legal proceedings related to leased acreage. For a further discussion, please refer to “Note 9. Commitments and Contingencies” in the Notes to Unaudited Consolidated Financial Statements in this report.

Income Taxes

For the nine months ended September 30, 2013, the Company incurred a net income tax expense of \$1,752,000 compared to a net income tax expense of \$1,461,000 for the nine months ended September 30, 2012. These represent effective income tax rates of approximately 28% and 25% for the nine months ended September 30, 2013 and, 2012, respectively. The effective tax rate for the first nine months of 2013 is calculated based on the net income for the first nine months 2013 adjusted for estimated permanent tax differences such as depletion allowances. During 2013, depletion allowances have decreased due to lower oil and gas revenues compared to 2012. As of September 30, 2013, our balance sheet reflects an income tax payable of \$835,000.

The Company classifies interest and penalties incurred on tax payments as income tax expenses. During the first nine months ended September 30, 2013, the Company made income tax payments of \$115,000 for the 2013 tax year.

Cash Flow and Liquidity

Our cash, cash equivalents and marketable securities totaled approximately \$73,569,000 at September 30, 2013, an increase of \$1,301,000, or 2%, from the corresponding amount at the end of 2012. Cash, cash equivalents and marketable securities increased during the first nine months of 2013 due to the reimbursement of infrastructure costs of \$14,139,000 from the East CFD and an increase in long term debt, which is partially offset by property and equipment expenditures, infrastructure development costs, investment in joint ventures, and payroll taxes paid on vested stock grants.

The following table shows our cash flow activities for the nine months ended September 30:

(In thousands)	2013	2012
Operating activities	\$5,025	\$11,486
Investing activities	\$(7,025)	\$(20,510)
Financing activities	\$3,863	\$(2,140)

During the first nine months of 2013, our operations provided \$5,025,000 of cash primarily attributable to operating results mainly from farming revenues, mineral resources revenues, and investment income. These increases in cash were partially offset by an increase in accounts receivable and a decrease in accounts payable.

During the first nine months of 2012, our operations provided \$11,486,000 of cash primarily from \$7,200,000 cash distributions from our Petro joint venture and improved operating results mainly from oil royalties and crop revenues. These increases in cash were partially offset with income tax payments, net of refunds, totaling approximately \$2,821,000 related to the 2011 tax year.

During the first nine months of 2013, investing activities used \$7,025,000 of cash primarily as a result of \$15,789,000 in capital expenditures, \$2,899,000 net investment in our unconsolidated joint ventures. \$473,000 net investment in marketable securities. These expenditures were partially offset by a \$14,139,000 in reimbursement proceeds for public infrastructure costs through the communities facilities district, or CFD and \$512,000 in reimbursements for outlet center costs incurred prior to the formation of the joint venture. Included in the \$15,789,000 of capital expenditures during the first nine months of 2013 was \$2,352,000 related to Centennial Founders LLC. The remaining capital expenditures consisted of \$13,437,000 of investments in TRCC infrastructure, primarily associated with the development of an outlet center on land at TRCC-East and ordinary capital expenditures such as farm equipment replacements and crop development.

During the first nine months of 2012, investing activities used \$20,510,000 of cash primarily as a result of the \$435,000 net investment in marketable securities, \$15,777,000 in capital expenditures, described below, and \$5,404,000 in contributions in our unconsolidated joint ventures, partially offset by a \$1,012,000 distribution from our Five West Parcel LLC joint venture. Included in the \$15,777,000 of capital expenditures during the first nine months

of 2012 was \$2,012,000 related to Centennial Founders LLC. The remaining capital expenditures consisted of investments in TRCC infrastructure and ordinary capital expenditures such as farm equipment replacements and crop development.

We estimate that our investment requirements for 2013 could total approximately \$22,000,000. These amounts include contributions to our joint ventures, primarily TMV, the TRCC/Rock Outlet Center joint venture, and Centennial, investments in

Table of Contents

infrastructure within TRCC-East and investment related to the first phase of land planning and entitlement for the Grapevine Development Area. We are also purchasing an additional water contract for 6,693 acre feet of water during the fourth quarter of 2013. Contributions to joint ventures will be related to the entitlement process for Centennial Founders LLC and litigation costs, and pre-development costs for TMV and construction development of the new TRCC/Rock Outlet Center LCC joint venture.

During the first nine months of 2013, financing activities provided \$3,863,000 in cash, primarily as the result of entrance into a \$4,750,000 debt agreement which was partially offset by payroll taxes on issuance of restricted stock grants and the repayment of long term debt for a building being leased to Starbucks. During the first nine months of 2012, financing activities used \$2,140,000 in cash, primarily as a result of payroll taxes on issuance of restricted stock grants. At September 30, 2013 and at the date of filing of this Form 10-Q there was no outstanding balance on our line of credit.

Capital Structure and Financial Condition

At September 30, 2013, total capitalization at book value was \$317,745,000 consisting of \$4,750,000 of debt and \$312,995,000 of equity, resulting in a debt-to-total-capitalization ratio of approximately 1.5%, which is slightly higher than the debt-to- total-capitalization ratio at December 31, 2012.

We have a long-term revolving line of credit of \$30,000,000 that, as of September 30, 2013, had no outstanding balance. At the Company's option, the interest rate on this line of credit can float at 2.50% over a selected LIBOR rate or can be fixed at 2.25% above LIBOR for a fixed rate term. During the term of this credit facility (which matures in December 2013), we can borrow at any time and partially or wholly repay any outstanding borrowings and then re-borrow, as necessary. Under the terms of the line of credit, we must maintain tangible net worth, defined as total equity, including noncontrolling interests, plus debt less intangible assets, not less than \$175,000,000 and liquid assets of not less than \$25,000,000. At September 30, 2013 our tangible net worth was \$317,745,000 and liquid assets were \$73,569,000. This line of credit is secured by a portion of our farm acreage.

The outstanding long-term debt, less current portion of \$231,000, was \$4,519,000 at September 30, 2013. During the third quarter of 2013, we entered into a debt agreement to pay a principal amount of \$4,750,000 with principal and interest due monthly starting on October 1, 2013. The interest rate on this promissory note is 4.25% per annum, with principal and interest payments ending on September 1, 2028. The proceeds from this promissory note were used to eliminate debt that had been previously used to provide long-term financing for a building being leased to Starbucks and for working capital purposes.

Our current and future capital resource requirements will be provided primarily from current cash and marketable securities, cash flow from ongoing operations, proceeds from the sale of developed and undeveloped parcels, potential sales of assets, additional use of debt, proceeds from the reimbursement of public infrastructure costs through Community Facilities District bond debt (described below under "Off-Balance Sheet Arrangements"), and the issuance of common stock.

During October 2012, we filed a shelf registration statement on Form S3, which went effective May 2013. Under the shelf registration statement, we may offer and sell in the future one or more offerings, common stock, preferred stock, debt securities, warrants or any combination of the foregoing. The shelf registration will allow for efficient and timely access to capital markets and when combined with our other potential funding sources just noted, provide us with a variety of capital funding options that can then be used and appropriately matched to the funding need. As noted above, at September 30, 2013, we had \$73,569,000 in cash and securities and as of the filing date of this Form 10-Q, we have \$30,000,000 available on credit lines to meet any short-term liquidity needs.

On August 7, 2013, the Company announced that its Board of Directors declared a dividend of warrants to purchase shares of Company common stock, par value \$0.50 per share to holders of record of Common Stock as of August 21, 2013. The Warrants were distributed to shareholders on August 28, 2013. Each Warrant will entitle the holder to purchase one share of Common Stock at an initial exercise price of \$40.00 per share. The Warrants will be exercisable through August 31, 2016, subject to the Company's right to accelerate the expiration date under certain circumstances when the Warrants are in-the-money. Each holder of Common Stock as of the Record Date received a number of Warrants equal to the number of shares held multiplied by 0.14771, rounded to the nearest whole number. No cash or other consideration will be payable in respect of any fractional Warrants that are rounded down. The Company issued

an aggregate of 3,000,000 Warrants. The Company issued the Warrants pursuant to a Warrant Agreement, dated as of August 7, 2013, between the Company, Computershare, Inc. and Computershare Trust Company, N.A., as warrant agent. Proceeds received from the exercise of the Warrants will be used to provide additional working capital for generate corporate purposes, including development activities within the Company's industrial and residential projects and to continue its investments into water assets and water facilities.

We continue to expect that substantial future investments will be required in order to develop our land assets. In order to meet these long-term capital requirements, we may need to secure additional debt financing and continue to renew our existing credit facilities. In addition to debt financing, we will use other capital alternatives such as joint ventures with financial partners, sales of assets, and the issuance of common stock. We will use a combination of the above funding sources to properly match funding requirements with the assets or development project being funded. There is no assurance that we can obtain financing

Table of Contents

or that we can obtain financing at favorable terms. We believe we have adequate capital resources to fund our cash needs and our capital investment requirements as described earlier in the cash flow and liquidity discussions.

Contractual Cash Obligations

The following table summarizes our contractual cash obligations and commercial commitments over the next five years:

(In thousands)	Payments Due by Period				
	Total	One Year or Less	Years 2-3	Years 4-5	After 5 Years
CONTRACTUAL OBLIGATIONS:					
Long-term debt	\$4,750	\$231	\$493	\$537	\$3,489
Interest on fixed rate debt	1,682	197	364	321	800
Line of Credit	8	8	—	—	—
Letter of Credit Fee	83	—	83	—	—
Tejon Ranch Conservancy	4,080	640	1,130	880	1,430
Cash contract commitments	5,361	5,361	—	—	—
Defined Benefit Plan	4,050	850	1,600	1,600	—
SERP	3,910	419	824	800	1,867
Estimated minimum payments to WRMWSD	55,000	2,500	5,000	5,000	42,500
Total contractual obligations	\$78,924	\$10,206	\$9,494	\$9,138	\$50,086

The categories above include purchase obligations and other long-term liabilities reflected on our balance sheet under GAAP. A “purchase obligation” is defined in Item 303(a)(5)(ii)(D) of Regulation S-K as “an agreement to purchase goods or services that is enforceable and legally binding on [us] that specifies all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the transaction.” Based on this definition, the table above includes only those contracts that include fixed or minimum obligations. It does not include normal purchases, which are made in the ordinary course of business. A total of 5,488 acres of the Company’s land is subject to water contracts with the Wheeler Ridge Maricopa Water Storage District, or WRMWSD, requiring minimum future annual payments through the life of the contract which is 2035, for as long as the Company owns such land. The estimated future minimum annual payments are estimated to be \$2,500,000 before any potential credits are received, whether or not water is available or is used.

Our cash contract commitments consist of contracts in various stages of completion related to infrastructure development within our industrial developments and entitlement costs related to our industrial and residential development projects. At the present time, we do not have any capital lease obligations or purchase obligations outstanding. Our operating lease obligations are for office equipment, several vehicles, and a temporary trailer providing office space and average approximately \$25,000 per month.

Our financial obligations to the Tejon Ranch Conservancy, or Conservancy, are prescribed in the Conservation and Land Use Agreement executed June 2008, or Conservation Agreement. Our advances to the Conservancy are dependent on the occurrence of certain events and their timing, and are therefore subject to change in amount and period. The amounts included above are the minimum amounts we anticipate contributing through the year 2021. The obligation shown above represents eighty percent of the total required obligations under the Conservation Agreement for the next three years and fifty-five percent thereafter. These percentages take into consideration current and anticipated cash funding levels of the Company to the TMV LLC and the Centennial Founders, LLC and the anticipated funding levels of our joint venture partners.

As discussed in “Note 10. Retirement Plans” in the Notes to Unaudited Consolidated Financial Statements in this report, we have long-term liabilities for employee retirement plans. The payments related to retirement plans are not included above since they are dependent upon when the employee retires or leaves the Company. In addition, minimum pension funding requirements are not included above, as such amounts are not available for all periods presented. We estimate that we will contribute approximately \$850,000 to the pension plan in 2013.

Table of Contents

Off-Balance Sheet Arrangements

The following table shows contingent obligations we have with respect to certain bonds issued by the Community Facilities District, or CFD:

(In thousands)	Amount of Commitment Expiration Per Period				
	Total	One Year or Less	Years 1-3	Years 4-5	After 5 Years
OTHER COMMERCIAL COMMITMENTS:					
Standby letter of credit	\$5,426		\$5,426	—	—
Total other commercial commitments	\$5,426	—	\$5,426	—	—

Tejon Ranch Public Facilities Financing Authority, or TRPFFA, is a joint powers authority formed by Kern County and TCWD to finance public infrastructure within the Company's Kern County developments. TRPFFA created two CFDs, the West CFD and the East CFD. The West CFD has placed liens on 420 acres of the Company's land to secure payment of special taxes related to \$28,620,000 of bond debt sold by TRPFFA for TRCC-West. The East CFD has placed liens on 1,931 acres of the Company's land to secure payments of special taxes related to \$39,750,000 of bond debt sold by TRPFFA for TRCC-East. At TRCC-West, the West CFD has no additional bond debt approved for issuance. At TRCC-East, the East CFD has approximately \$80,250,000 of additional bond debt authorized by TRPFFA.

In connection with the sale of bonds there is a standby letter of credit for \$5,426,000 related to the issuance of East CFD bonds. The standby letter of credit is in place to provide additional credit enhancement and cover approximately two years worth of interest on the outstanding bonds. This letter of credit will not be drawn upon unless the Company, as the largest landowner in the CFD, fails to make its property tax payments. As development occurs within TRCC-East there is a mechanism in the bond documents to reduce the amount of the letter of credit. The Company believes that the letter of credit will never be drawn upon. This letter of credit is for a two-year period of time that began January 2013 and will be renewed in two-year intervals as necessary. The annual cost related to the letter of credit is approximately \$83,000.

The Company maintains investments in joint ventures. The Company accounts for its investments in unconsolidated joint ventures using the equity method of accounting unless the venture is a variable interest entity, or VIE, and meets the requirements for consolidation. For a further discussion, please refer to "Note 12. Investments in Unconsolidated Joint Ventures" in the Notes to Unaudited Consolidated Financial Statements in this report.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk represents the risk of loss that may impact the financial position, results of operations, or cash flows of the Company due to adverse changes in financial or commodity market prices or rates. We are exposed to market risk in the areas of interest rates and commodity prices.

Financial Market Risks

Our exposure to financial market risks includes changes to interest rates and credit risks related to marketable securities, interest rates related to our outstanding indebtedness and trade receivables.

The primary objective of our investment activities is to preserve principal while at the same time maximizing yields and prudently managing risk. To achieve this objective and limit interest rate exposure, we limit our investments to securities with a maturity of less than six years and an investment grade rating from Moody's or Standard and Poor's. See "Note 3. Marketable Securities" in the Notes to Unaudited Consolidated Financial Statements in this report.

Our line-of-credit currently has no outstanding balance. The interest rate on our line-of-credit can either float with LIBOR or be tied to a specific LIBOR rate on a fixed basis and change only at maturity of the fixed-rate feature. We are exposed to interest rate risk on our long term debt currently outstanding. The long-term debt of \$4,750,000 has a fixed interest rate of 4.25% and the fair value of this long-term debt will change based on interest rate movements in the market. The floating rate feature in our line of credit can expose us to variability in interest payments due to changes in interest rates. We believe it is prudent at times to limit the variability of floating-rate interest payments and in the past have entered into interest rate swaps to manage those fluctuations.

At September 30, 2013, we had no outstanding interest rate swap agreements. However during 2012, TA/Petro, an unconsolidated joint venture of the Company, had an interest rate swap agreement with respect to its long-term debt to

manage interest rate risk by converting floating interest rate debt to fixed-rate debt. This swap agreement matured in August 2012.

27

Table of Contents

Changes in the value of the interest rate swap are reflected in other comprehensive income of the joint venture, and the Company accounts for its share of the change in the interest rate swap in other comprehensive income.

Market risk related to our farming inventories ultimately depends on the value of almonds, grapes, and pistachios at the time of payment or sale. Credit risk related to our receivables depends upon the financial condition of our customers. Based on historical experience with our current customers and periodic credit evaluations of our customers' financial conditions, we believe our credit risk is minimal. Market risk is discussed below in the section pertaining to commodity price exposure.

The following tables provide information about our financial instruments that are sensitive to changes in interest rates. The tables present our debt obligations and marketable securities and their related weighted-average interest rates by expected maturity dates.

Interest Rate Sensitivity Financial Market Risks

Principal Amount by Expected Maturity

At September 30, 2013

(In thousands except percentage data)

	2013	2014	2015	2016	2017	Thereafter	Total	Fair Value at September 30, 2013
Assets:								
Marketable securities	\$4,062	\$18,971	\$22,245	\$12,229	\$6,750	\$—	\$64,257	\$64,487
Weighted average interest rate	1.60	% 1.40	% 1.45	% 1.19	% 1.32	% —	% 1.38	%
Liabilities

Weighted average interest rate	4.25	% 4.25	% 4.25	% 4.25	% 4.25	% 4.25	% 4.25	%

Interest Rate Sensitivity Financial Market Risks

Principal Amount by Expected Maturity

At December 31, 2012

(In thousands)

	2013	2014	2015	2016	2017	Thereafter	Total	Fair Value at December 31, 2012
Assets:								
Marketable securities	\$20,903	\$20,264	\$18,971	\$4,327	\$—	\$—	\$64,465	\$65,049
Weighted average interest rate	2.05	% 1.44	% 1.49	% 1.47	% —	% —	% 1.66	%
Liabilities:								
Long-term debt	\$41	\$43	\$46	\$49	\$52	\$22	\$253	\$253
Weighted average interest rate	6.75	% 6.75	% 6.75	% 6.75	% 6.75	% 6.75	% 6.75	%

Our risk with regard to fluctuations in interest rates has increased slightly related to marketable securities since these balances have increased compared to December 31, 2012.

Commodity Price Exposure

As of September 30, 2013, we have exposure to adverse price fluctuations associated with certain inventories and accounts receivable. Farming inventories consist of farming cultural and processing costs related to 2012 and 2011

crop production. The farming costs inventoried are recorded at actual costs incurred. Historically, these costs have been recovered each year when that year's crop harvest has been sold.

Table of Contents

With respect to accounts receivable, the amount at risk relates primarily to farm crops. These receivables are recorded as estimates of the prices that ultimately will be received for the crops. The final price is generally not known for several months following the close of our fiscal year. Of the \$10,341,000 of accounts receivable outstanding at September 30, 2013, \$7,764,000 or 72% is at risk to changing prices. Of the amount at risk to changing prices, \$4,164,000 is attributable to pistachios and \$963,000 is attributable to almonds. Additionally, \$2,547,000 is not at risk to changing prices and is part of a bonus receivable for pistachios. The comparable amount of accounts receivable at risk to price changes at December 31, 2012 was \$7,867,000, or 82% of the total accounts receivable of \$8,768,000. Of the December 31, 2012 amount at risk to changing prices, \$5,025,000 is related to pistachios and \$2,842,000 is related to almonds.

The price estimated for recording accounts receivable for pistachios recorded at September 30, 2013 was \$2.40 per pound, as compared to \$2.20 per pound at December 31, 2012. For each \$.01 change in the price of pistachios, our receivable for pistachios increases or decreases by \$17,000. Although the final price of pistachios (and therefore the extent of the risk) is not presently known, our estimate is in the range of prices received for the last three years, which have ranged from \$1.91 to \$2.75. With respect to almonds, the price estimated for recording the receivable was \$2.51 per pound. For each \$0.01 change in the price of almonds, our receivable for almonds increases or decreases by \$4,000. The range of final prices over the last three years for almonds has ranged from \$1.71 to \$3.06 per pound.

ITEM 4. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer, Chief Financial Officer and Controller, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rules 13a-15 and 15d-15 of the Securities Exchange Act of 1934, as amended, or the Exchange Act. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective in ensuring that all information required in the reports we file or submit under the Exchange Act was accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure and was recorded, processed, summarized and reported within the time period required by the rules and regulations of the Securities and Exchange Commission.

(b) Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting identified in connection with the evaluation required by paragraph (d) of Rule 13a-15 or Rule 15d-15 under the Exchange Act that occurred during our last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

Please refer to “Note 9. Commitments and Contingencies” in the Notes to Unaudited Consolidated financial Statements in this report.

Item 1A. Risk Factors

There have been no material changes to the risk factors disclosed in Item 1A or elsewhere in our most recent Annual Report on Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Not applicable.

Item 3. Defaults Upon Senior Securities

Not applicable.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

Not applicable.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Company has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
