UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2009

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 001-16749

GeoPetro Resources Company

(Exact name of registrant as specified in its charter)

California

(State of incorporation)

94-3214487

(IRS Employer Identification Number)

One Maritime Plaza, Suite 700

San Francisco, CA

(Address of principal executive offices)

94111

(Zip Code)

(415) 398-8186

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No .

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No .

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of large accelerated filer, accelerated filer, and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer
(Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No .

Edgar Filing: GEOPETRO RESOURCES CO - Form 10-Q

There were 34,284,646 shares of no par value common stock outstanding on November 9, 2009.

Table of Contents

GEOPETRO RESOURCES COMPANY

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

1. BASIS OF PRESENTATION AND USE OF ESTIMATES:

The interim consolidated financial statements of GeoPetro Resources Company (we, us, our, GeoPetro or the Company) are unaudited and contain all adjustments (consisting primarily of normal recurring accruals) necessary for a fair statement of the results for the interim periods presented. Results for interim periods are not necessarily indicative of results to be expected for a full year or for previously reported periods due in part, but not limited to, the volatility in crude oil and natural gas commodity prices, interest rates, estimates of reserves, drilling risks, geological risks, transportation restrictions, the timing of acquisitions, product demand, market competition, interruption in production and our ability to obtain additional capital. You should read these consolidated interim financial statements in conjunction with the audited consolidated financial statements and notes thereto included in GeoPetro's Annual Report on Form 10-K for the year ended December 31, 2008.

The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) and include the accounts of GeoPetro and its wholly-owned subsidiaries. Intercompany accounts and transactions are eliminated. In preparing the accompanying financial statements, management has made certain estimates and assumptions that affect reported amounts in the financial statements. Actual results may differ from those estimates. Significant assumptions are required in the valuation of proved oil and natural gas reserves, which may affect the amount at which oil and natural gas properties are recorded. The computation of share-based compensation expense requires assumptions such as volatility, expected life and the risk-free interest rate. It is at least reasonably possible these estimates could be revised in the near term, and these revisions could be material.

Change in Accounting Method and Basis of Presentation - Revenue Recognition Prior to December 31, 2008, revenue was recognized upon delivery of oil and gas production and was shown net of applicable royalty payments, as well as processing, gathering, transportation and marketing fees. The Company recognized revenue from the Madisonville Field net of applicable fees to gather, treat, transport and market the Company's natural gas production. The applicable fees were paid to unrelated third parties. On December 31, 2008, the Company completed the acquisition of the Plant from Madisonville Gas Processing, LP (MGP). As of January 1, 2009, revenue is being recognized without the netting of applicable royalty payments, as well as processing, gathering, transportation and marketing fees since we have acquired the Plant. For all periods presented, revenue from the Madisonville Field is recognized when the price for gas delivered became fixed and determinable.

Impairment of Oil and Gas Properties Under full cost accounting, a ceiling test is performed to ensure that unamortized capitalized costs in each cost center (country) do not exceed their fair value. Impairment is recognized when the carrying value is greater than the discounted future cash flows. In the event of impairment, the amount by which the carrying value exceeds the estimated fair value of the long-lived asset is charged to earnings. The present

Table of Contents

value of estimated future net revenues is computed by applying current oil and gas prices to estimated future production of proved oil and gas reserves as of period-end, less estimated future expenditures to be incurred in developing and producing the proved reserves assuming the continuation of existing economic conditions. We recognized no impairment of evaluated properties at September 30, 2009. Under current accounting rules, we are required to use the natural gas price prevailing on the last day of our accounting period to determine whether any impairment needs to be recognized. However, we are permitted in certain circumstances to use a price that is in effect subsequent to our period end but prior to the issuance of our financial statements. In determining that no impairment existed at September 30, 2009, we utilized the price prevailing on October 30, 2009 to determine that the carrying value of the unamortized capitalized costs in our United States cost center did not exceed the discounted future cash flows from those properties. Had we used the price prevailing on September 30, 2009, we would have recognized an impairment expense of \$7,921,708.

2. LIQUIDITY:

As of September 30, 2009, we have a working capital deficit of \$2,716,389, and for the nine months ended, our cash used in operating activities amounted to \$3,350,834. We estimate our minimum investment needs during (i) the remainder of 2009 and (ii) calendar 2010, amount to \$4,500,000 related to our natural gas processing plant and our natural gas properties within the Madisonville field. Our results of natural gas operations amounted to a deficit of \$4,571,269 for the nine months ended September 30, 2009. Further, we have debt service and dividend requirements that will require cash payments. We hold working interests in undeveloped leases, seismic options, lease options and foreign concessions and we have participated in seismic surveys and the drilling of test wells on undeveloped properties. We plan further leasehold acquisitions and seismic operations for the remainder of 2009 and future periods. Exploratory and developmental drilling is scheduled during 2010 and future periods on our undeveloped properties. During the nine months ended September 30, 2009, we raised \$850,000 in convertible notes that were converted into our Series B Preferred Stock on April 30, 2009, an additional \$2,181,710 in our Series B Preferred Stock, and issued \$1,177,000 in promissory notes. On September 30, 2009, we completed the sale of certain idle equipment from our natural gas processing plant for total cash proceeds of \$2.5 million. During October 2009, we issued a promissory note for total gross proceeds of \$720,000 (net proceeds of \$691,200) and issued an additional 3,395,000 shares of Series B Preferred Stock for total gross proceeds of \$2,546,250. In addition to these items, we will need to raise additional equity or enter into new borrowing arrangements to finance our operating deficit and our continued participation in planned activities. If additional financing is not available, we will be compelled to reduce the scope of our business activities. If we are unable to fund our operating cash flow needs and planned capital investments, it will be necessary to farm-out our interest in proposed wells, sell a portion of our interest in prospects, sell a portion of our interest in our producing oil and gas properties, reduce general and administrative expenses, or a combination of all of these factors.

3. RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS:

In December 2007, the FASB issued ASC 805-10 (formerly SFAS No. 141 (revised 2007)), *Business Combinations*. ASC 805-10, which among other things, establishes principles and requirements for how the acquirer in a business combination (i) recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquired business, (ii) recognizes and measures the goodwill acquired in the business combination or a gain from a bargain purchase, and (iii) determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. ASC 805-10 is effective for fiscal years beginning on or after December 15, 2008, with early adoption prohibited. This standard will change our accounting treatment for business combinations on a prospective basis.

In December 2007, the FASB issued ASC 810-10 (formerly SFAS No. 160), *Noncontrolling Interests in Consolidated Financial Statements, an Amendment of ASC 860-10 (formerly ARB No. 51)*. ASC 810-10 establishes accounting and reporting standards for noncontrolling interests in a subsidiary and for the deconsolidation of a subsidiary. Minority interests are recharacterized as noncontrolling interests and classified as a component of equity. It also establishes a single method of accounting for changes in a parent's ownership interest in a subsidiary and requires

Edgar Filing: GEOPETRO RESOURCES CO - Form 10-Q

expanded disclosures. This statement is effective for fiscal years beginning on or after December 15, 2008, with early adoption prohibited. The adoption of ASC 810-10 on January 1, 2009 did not have a material impact on our financial position or results of operations.

In March 2008, the FASB issued ASC 815-10 (formerly SFAS No. 161), *Disclosures about Derivative Instruments and Hedging Activities*, an amendment of FASB Statement No. 133. ASC 815-10 amends and expands the disclosure requirements of FASB Statement No. 133 with the intent to provide users of financial statement with an enhanced understanding of (i) how and why an entity uses derivative instruments, (ii) how derivative instruments and the related

Table of Contents

hedged items are accounted for under FASB Statement No. 133 and its related interpretations, and (iii) how derivative instruments and related hedged items affect and entity's financial position, financial performance and cash flows. The adoption of ASC 815-10 on January 1, 2009 did not have a material impact on our reported financial position or results of operations.

In June 2008, the FASB ratified the consensus reached on ASC 815-40 (formerly Emerging Issues Task Force (EITF) Issue No. 07-05), Determining Whether an Instrument (or Embedded Feature) Is Indexed to an Entity's Own Stock. ASC 815-40 clarifies the determination of whether an instrument (or an embedded feature) is indexed to an entity's own stock, which would qualify as a scope exception under ASC 815-10, Accounting for Derivative Instruments and Hedging Activities. ASC 815-40 is effective for financial statements issued for fiscal years beginning after December 15, 2008. Early adoption for an existing instrument is not permitted. The adoption of ASC 815-40 on January 1, 2009 did not have a material effect on our consolidated financial statements.

In December 2008, the SEC issued the final rule on the Modernization of Oil and Gas Reporting. This SEC ruling revises its oil and gas reserves reporting requirements effective for fiscal years ending on or after December 31, 2009, with early adoption prohibited. These revisions by the SEC are intended to provide investors with a more meaningful and comprehensive understanding of oil and gas reserves. These changes include:

- Modifying prices used to estimate reserves for SEC disclosure purposes to a 12-month average price instead of a single-day, period-end price.
- Requiring certain additional disclosures around proved undeveloped reserves, internal controls used to ensure objectivity of the estimation process, and qualifications of those preparing and/or auditing the reserves.
- Expanding the definition of oil and gas reserves and providing clarification of certain concepts and technologies used in the reserve estimation process.
- Allowing optional disclosure of probable and possible reserves and permitting optional disclosure of price sensitivity analysis.

Historically, the reserves calculated based on the SEC's reporting requirements were also used to calculate depletion on our producing properties, as required by ASC 932-235 (formerly SFAS 69) Disclosures about Oil and Gas Producing Activities. However, the change in the SEC reporting requirements has not yet been adopted by the FASB. The SEC has announced its intent to discuss potential amendments to ASC 932-235 with the FASB so that the reserves disclosed remain consistent with the reserves used to calculate depletion on our producing properties. Any such change would impact our future financial results. The SEC has indicated that it may delay the effective date of the revised reporting requirements if the FASB does not make conforming amendments by December 31, 2009.

On June 30, 2009, we adopted ASC 855-10 (formerly SFAS No. 165) *Subsequent Events*. ASC 855-10 establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be

Edgar Filing: GEOPETRO RESOURCES CO - Form 10-Q

issued. Specifically, ASC 855-10 sets forth the period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements, the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements, and the disclosures that an entity should make about events or transactions that occurred after the balance sheet date. The adoption of ASC 855-10 had no impact on our results, cash flow or financial position as management already followed a similar approach prior to the adoption of this standard.

Table of Contents**4. EARNINGS (LOSS) PER COMMON SHARE:**

Basic net loss per common share is computed by dividing the net loss attributable to common shareholders by the weighted average number of shares of common stock outstanding during the period.

Diluted net loss per common share is computed in the same manner, but also considers the effect of common stock shares underlying the following:

	For the nine months ended	
	September 30, 2009	September 30, 2008
Stock options (Note 8)	2,720,000	2,740,000
Warrants (Note 9)	1,342,857	2,141,855
Convertible Preferred Stock, Series B	4,121,004	

All of the common shares underlying the stock options, warrants and convertible preferred stock, Series B above were excluded from diluted weighted average shares outstanding for the three and nine months ended September 30, 2009 and three months ended September 30, 2008 because their effects were antidilutive.

The following is a reconciliation of the numerator and denominator of our basic and diluted earning per share for the nine months ended September 30, 2008.

	Nine months ended September 30, 2008		
	Income (numerator)	Shares (denominator)	Per-share amount
Basic earnings per share:			
Net income	\$ 965,196	32,413,979	\$ 0.03
Effective of dilutive securities:			
Share-based compensation, treasury method		631,952	
Net income plus assumed conversions	\$ 965,196	\$ 33,045,931	\$ 0.03

5. GAS PROCESSING PLANT

On December 31, 2008, the Company completed the acquisition of a natural gas treatment plant (the Plant) from MGP, in exchange for shares of GeoPetro's common stock, assumption of debt and a cash payment (the Acquisition). The Plant is located in Madison County, Texas and the new owner of the Plant is GeoPetro's wholly-owned indirect subsidiary, Madisonville Midstream LLC (MM).

Edgar Filing: GEOPETRO RESOURCES CO - Form 10-Q

Our results of operations for the three and nine months ended September 30, 2009 include the operating results of the Plant. However, our results of operations for the three and nine months ended September 30, 2008 do not include the operating results of the natural gas treatment plant because such acquisition closed on December 31, 2008. The following condensed pro forma information gives effect to the acquisition as if it had occurred on January 1, 2008. The pro forma information has been included in the notes as required by generally accepted accounting principles and is provided for comparison purposes only. The pro forma financial information is not necessarily indicative of the financial results that would have occurred had the acquisition been effective on the dates indicated and should not be viewed as indicative of operations in the future.

	Three Months Ended September 30, 2008	Nine Months Ended September 30, 2008
Operating revenues	\$ 3,089,035	\$ 13,841,215
Total operating expenses	\$ 3,743,496	\$ 13,102,514
Earnings (loss) applicable to common stock	\$ (512,468)	\$ 492,921
Net earnings (loss) per share - basic	\$ (0.02)	\$ 0.01
Net earnings (loss) per share - diluted	\$ (0.02)	\$ 0.01

Table of Contents**6. DEBT:**

Debt at September 30, 2009 and December 31, 2008 consisted of the following:

	September 30, 2009	December 31, 2008
Promissory notes dated December 23, 2008 (a)	\$ 1,050,000	\$ 1,050,000
Promissory notes dated May 2009(b)	365,000	
Promissory notes dated June 2009(c)	300,000	
Bridge notes dated August and September 2009(d)	380,000	
Bank of Oklahoma loan (e)	5,122,847	6,697,847
	7,217,847	7,747,847
Less current portion of long term debt	(1,280,000)	(600,000)
Less discount on promissory notes	(107,340)	(128,398)
	\$ 5,830,507	\$ 7,019,449

(a) The Company issued four promissory notes totaling \$1,050,000 during December 2008 with maturity dates in December 2011. The notes may be repaid at any time without penalty. The notes bear an annual rate of eight percent (8%), with such interest payable quarterly in arrears. The principal amount and accrued and unpaid interest are due and payable on December 23, 2011. In connection with the notes, the Company paid loan origination fees totaling \$6,000 and granted three-year exercisable warrants to purchase 105,000 Common Shares and reissued 15,000 warrants at \$1.00 per share. We also issued 150,000 warrants as a finder's fee. The fair value of the warrants on the dates of issuance, \$122,764 and the \$6,000 of loan origination fees, was recorded as a debt discount and is being amortized over the life of the promissory note. As of September 30, 2009, the unamortized debt discount was \$96,207.

(b) During the nine months ended September 30, 2009 the Company borrowed \$365,000 pursuant to two separate three-year loans. The notes have maturity dates in May 2012. The notes may be repaid at any time without penalty. The notes bear an annual rate of eight percent (8%), with such interest payable quarterly in arrears. The principal amount and accrued and unpaid interest are due and payable on May 2012. In connection with the notes, the Company granted three-year exercisable warrants to purchase 36,500 Common Shares warrants at \$1.00 per share. The fair value of the warrants on the dates of issuance, \$12,724, was recorded as a debt discount and is being amortized over the life of the promissory note. As of September 30, 2009, the unamortized debt discount was \$12,194.

(c) In June 2009 the Company borrowed \$300,000 pursuant to two separate one-year loans. The two notes have maturity dates in May 2010. The notes may be repaid at any time without penalty. The notes bear an annual rate of eight percent (8%), with such interest payable quarterly in arrears. The principal amount and accrued and unpaid interest are due and payable on May 2010. In connection with the notes, the Company granted three-year exercisable warrants to purchase 30,000 Common Shares warrants at \$1.00 per share. The fair value of the warrants on the dates of issuance, \$7,537, was recorded as a debt discount and is being amortized over the life of the promissory note. As of September 30, 2009, the unamortized debt discount was \$5,652.

(d) During August and September 2009, the Company borrowed \$380,000 pursuant to four separate one-year bridge loans. The notes have maturity date in August 31, 2010. The notes may be repaid at any time without penalty. The note bears an annual rate of ten percent (10%), with such interest payable at maturity. The principal amount and accrued and unpaid interest are due and payable on August 31, 2010. In

Edgar Filing: GEOPETRO RESOURCES CO - Form 10-Q

connection with the notes, the Company granted three-year warrants exercisable to purchase 14,000 Common Shares at \$1.00 per share. The fair value of the warrants on the dates of issuance, \$6,750, was recorded as a debt discount and is being amortized over the life of the bridge note. As of September 30, 2009, the unamortized debt discount was \$6,082. On October 6, 2009, we repaid one of the bridge notes in the principal amount of \$100,000 plus accrued interest.

Table of Contents

(e) Effective December 31, 2008, the Company assumed \$7,697,847 of Madisonville Gas Processing LP's (MGP) bank debt related to the Company's acquisition of the Madisonville Gas Treatment Plant (the Plant) via a (i) \$1 million cash payment applied directly towards debt principal reduction, and (ii) a refinancing by GeoPetro of the \$6,697,847 remaining balance in the form of a 3 year Amended and Restated Term Loan Agreement with the lender, Bank of Oklahoma (BOK). The terms of the three year loan provide for minimum quarterly principal payments of \$150,000 and interest payable quarterly in arrears at prime plus 4% or Libor plus 5.5% at the option of the Company. At September 30, 2009, the interest rate was approximately 6% (LIBOR + 5.5%). Additional principal will be payable upon GeoPetro meeting certain net operating cash flow thresholds during the three year term of the loan. The loan is secured by a first lien on the Madisonville Midstream Plant and all of the Company's proved natural gas reserves located at the Madisonville Project. In addition, GeoPetro has agreed to pay, at the time the loan is repaid in full, a loan origination fee of \$60,000 for any annual period during which the loan principal remains outstanding. There is no prepayment penalty. The Amended and Restated Term Loan Agreement contains customary affirmative and negative covenants including restrictions on incurring additional debt and requiring that the Company maintain a minimum tangible net worth of at least \$35,000,000. On September 30, 2009, GeoPetro sold certain idle equipment to an unrelated party in the amount of \$2.5 million. GeoPetro used a portion of the proceeds to repay \$1.125 million principal to Bank of Oklahoma.

7. INCOME TAXES:

The Company files income tax returns in the U.S. federal jurisdiction and various states. There are currently no federal or state income tax examinations underway. Furthermore, the Company is no longer subject to U.S. federal income tax examinations by the Internal Revenue Service for tax years before 2005 and for state and local tax authorities for tax years before 2004. The Company does, however, have net operating losses generated in tax years 1997 and after, which remain open for examination.

The Company adopted the provisions of ASC 740-10 (formerly FASB Interpretation No. 48), Accounting for Uncertainty in Income Taxes, on January 1, 2007. As of December 31, 2008 the Company had no unrecognized tax benefits. There have been no changes during the year with respect to unrecognized tax benefits. The Company does not foresee the total amounts of unrecognized tax benefits significantly increasing within the next 12 months. Furthermore, no corresponding interest and penalties have been accrued as the Company is in a net operating loss position.

The Company provides for income taxes in accordance with ASC 740-10 (formerly Statement of Financial Accounting Standards No. 109, Accounting for Income Taxes). ASC 740-10 requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the financial statement carrying amounts and the tax basis of the assets and liabilities. Where it is more likely than not that a tax benefit will not be realized, a valuation allowance is recorded to reduce the deferred tax asset to its realizable value.

A valuation allowance has been provided against the Company's net deferred tax assets as the Company believes that it is more likely than not that the net deferred tax assets will not be realized.

The effective tax rate for the nine month period ended September 30, 2009 was 0%, and for the year ended December 31, 2008 was (7.9) percent, and differs from statutory rates primarily due to changes in the valuation allowance.

8. COMMON STOCK OPTIONS:

There were no material changes to common stock options from those disclosed in the audited annual consolidated financial statements for the year ended December 31, 2008 except the following.

On June 26, 2009, the Company granted a total of 60,000 5 year options to four non-management directors. The weighted average fair value of options granted as calculated under the Black-Scholes pricing model was \$0.33 per share with the following weighted-average assumptions: risk-free, weighted-average interest rate of 2.53 percent based on the U.S. Treasury yield curve in effect at the time of grant, expected dividend yield of 0 percent, expected life of 5 years from the date of grant, and expected volatility of 113 percent based on the Company's historical daily stock trading since February 16, 2007.

On April 27, 2009, the Company reduced the option price previously granted to an officer from \$2.10 per share to \$1.00 per share based on the new employment agreement. The fair value of the repricing options was insignificant.

Table of Contents

The options outstanding as of September 30, 2009 have the following contractual lives:

Number of Options Outstanding	Number of Options Exercisable	Exercise Prices	Weighted Average Remaining Contractual Life
210,000	150,000	1.00	4.51
1,600,000	1,600,000	2.10	3.68
150,000	90,000	3.85	1.54
10,000	8,000	4.25	0.25
740,000	148,000	4.28	3.74
10,000	8,000	6.25	0.69
2,720,000	2,004,000		

The total intrinsic value of options outstanding was approximately \$0 and \$332,500 at September 30, 2009 and 2008 respectively. The intrinsic value for exercisable options was \$0 and \$332,500 at September 30, 2009 and 2008, respectively.

As of September 30, 2009, there are 2,004,000 options which are exercisable. The remaining 716,000 options will become exercisable over the next four years. The stock compensation expense related to the unvested awards is \$1,305,418.

9. COMMON STOCK WARRANTS:

On April 10, 2009, the Company extended the expiration date on a warrant to purchase 114,000 shares of common stock (exercisable at \$3.50 per share) to December 15, 2011. The fair value of the warrant extension was insignificant.

On March 31, 2009, the Company extended the expiration date on a warrant to purchase 100,000 shares of common stock (exercisable at \$5.25 per share) to March 31, 2014. The fair value of the warrant extension was insignificant.

On February 23, 2009, the Company issued 50,000 shares of the common stock warrants to a non-related party expiring February 22, 2012 with a strike price of \$1.00 per share. Warrants granted shall vest according the following schedule: 25% immediately; 25% at the three month anniversary of the signing of the agreement; 25% at the six month anniversary of the signing of the agreement; and 25% at the nine month anniversary of the signing of the agreement. The grant-date fair value of the warrants amounted to \$8,106, using the Black-Scholes valuation method, which is recognized in general and administrative expense on our consolidated statement of operations ratably over the requisite service period as defined by the vesting schedule above.

10. GAIN ON SALE OF EQUIPMENT:

Edgar Filing: GEOPETRO RESOURCES CO - Form 10-Q

On September 10, 2009, the Company's subsidiary, Madisonville Midstream, LLC entered into an agreement to sell certain idle equipment related to the plant to an unrelated third party, Gas Processors, Inc., for a purchase price of \$2.5 million. A nonrefundable deposit of \$250,000 was received on September 10, 2009 and the remaining balance of \$2.25 million was tendered to Madisonville Midstream on the closing date of September 30, 2009. Concurrent with the receipt of the sales proceeds, the Company paid \$1,125,000 to reduce the principal balance on the Bank of Oklahoma loan. The Company recorded a gain of \$1,488,687 on the sale.

11. COMMITMENTS AND CONTINGENCIES:

There are no material changes to commitments and contingencies from those disclosed in the audited annual consolidated financial statements for the year ended December 31, 2008.

On September 11, 2009, the Company's subsidiary, Redwood Energy Production, L.P. filed an Original Petition for Declaratory Judgment against Devon Energy Production Company (Devon) regarding certain overriding royalty interests and related revenue amounts claimed by Devon. The Company previously accrued all amounts owed pursuant to these overriding royalty interests as royalty owners payable. In the opinion of management based on consultation with legal counsel, these proceedings are not expected to have a material adverse effect on our financial condition or results of operations.

Table of Contents

12. SUBSEQUENT EVENTS THROUGH NOVEMBER 9, 2009.

On October 23, 2009, we issued a promissory note for total gross proceeds of \$720,000 (net proceeds of \$691,200). The note has a maturity date of October 31, 2010 and bears interest at 10% per annum, payable at maturity. We issued to the note holder warrants exercisable to purchase 36,000 shares of our common stock. Each warrant is exercisable for a three year term to purchase one share of our common stock at a price of \$1.00 per share.

On October 8, 2009, the Company filed a Certificate of Amendment with the California Secretary of State for the purpose of amending its Articles of Incorporation to increase the total number of authorized shares of Series B Preferred Stock from 6,800,000 to 7,523,000 shares of Series B Preferred Stock. During October 2009, we issued an additional 3,395,000 shares of Series B Preferred Stock for total gross proceeds of \$2,546,250.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read in conjunction with accompanying financial statements and related notes included elsewhere in this report. It contains forward looking statements that reflect our future plans, estimates, beliefs and expected performance. The forward looking statements are dependent upon events, risks and uncertainties that may be outside our control. Our actual results could differ materially from those discussed in these forward looking statements.

Factors that could cause or contribute to such differences include, but are not limited to, market prices for natural gas and oil, economic and competitive conditions, regulatory changes, estimates of proved reserves, potential failure to achieve production from development drilling projects, capital expenditures and other uncertainties, as well as those factors discussed below and elsewhere in this report, particularly in

Risk Factors , all of which are difficult to predict and which expressly qualify all subsequent oral and written forward-looking statements attributable to us or persons acting on our behalf. In light of these risks, uncertainties and assumptions, the forward looking events discussed may not occur. We do not have any intention or obligation to update forward-looking statements included in this report after the date of this report, except as required by law.

Overview

We are an oil and gas company in the business of exploring and developing oil and natural gas reserves on a worldwide basis. Since inception, we have conducted leasehold acquisition, exploration and drilling activities on our North American, Australian and Indonesian prospects. These projects currently encompass approximately 379,547 gross (161,171 net) acres, consisting of mineral leases, production sharing contracts and exploration permits that give us the right to explore for, develop and produce oil and natural gas. Most of these properties are in the exploration, appraisal or development drilling phase and have not begun to produce revenue from the sale of oil and natural gas. Excluding minor interest and dividend income, our only significant cash inflows until 2003 were the recovery of capital invested in projects through sale or other divestiture of interests in oil and gas prospects to industry partners.

Since 2003, substantially all of our revenue has been generated from natural gas sales derived from the Magness #1, the Fannin #1, and the Mitchell #1 wells in the Madisonville Field in East Texas under spot gas purchase contracts at market prices. Natural gas sales from the Madisonville Field are expected to account for substantially all of our revenues for 2009. We expect the majority of our capital expenditures in 2009 and 2010 will be for the Madisonville Project.

Table of Contents**Results of Operations**

The financial information with respect to the nine months ended September 30, 2009 and 2008 that is discussed below is unaudited. In the opinion of management, such information contains all adjustments, consisting only of normal recurring accruals, necessary for a fair presentation of the results for such periods. The results of operations for interim periods are not necessarily indicative of the results of operations for the full fiscal years.

	Nine Months Ended	
	September 30, 2009	September 30, 2008
	(unaudited)	(unaudited)
Consolidated Statement of Operations:		
Revenues	\$ 2,919,923	\$ 6,106,898
Plant operating expense	3,749,484	
Lease operating expense	478,187	1,287,309
General and administrative	2,026,821	1,921,270
Net profits expense		601,237
Impairment expense	939,703	63,766
Depreciation and depletion expense	1,159,050	1,326,099
Earnings (loss) from operations	(5,433,322)	907,217
Net income (loss)	(4,502,686)	965,196
Net income (loss) attributable to common shareholders	(4,571,269)	\$ 965,196

Revenue and Operating Trends in 2009

We developed an onsite plan to treat and remove impurities from the Madisonville Project natural gas in order to meet pipeline-quality specifications. The Madisonville Project is located in East Texas. In 2003, the construction and installation of a natural gas treatment plant with a designed capacity of 18 million cubic feet of gas per day (MMcf/d) and associated pipeline and gathering facilities were completed. The treatment plant and associated gathering facilities were owned by an unaffiliated third party.

In 2005 we secured a commitment from MGP to install and make operational additional treating facilities capable of treating 50 MMcf/d, which combined with the capacity of the current in-service treating facilities will represent a total designed treating capacity of 68 MMcf/d for the Madisonville treatment plant. In early November 2007, MGP began testing the additional treatment facilities by accepting 20 MMcf/d at the inlet. Subsequently in December 2007, MGP temporarily suspended the operations of the additional treatment facilities in order to make modifications to more effectively deal with the presence of diamondoids in the gas stream produced from the Rodessa Formation.

During 2008, MGP analyzed various options for removing the diamondoids; however, they did not complete the necessary plant system modifications. On December 31, 2008, we purchased the gas treatment plant (the Plant) and related gathering pipeline from MGP in exchange for assumption of secured debt, payment of certain outstanding payables of MGP and shares of GeoPetro's common stock. The effective date of the acquisition was December 31, 2008 and the new owner of the Plant is GeoPetro's wholly-owned, indirect subsidiary, Madisonville Midstream LLC (MM). We anticipate completing installation of the system modifications required in the plant in 2010. In the meantime, the existing, in service portion of the plant continues to operate with an effective capacity of approximately 15 MMcf/d of inlet gas.

Edgar Filing: GEOPETRO RESOURCES CO - Form 10-Q

While there can be no assurance we will be successful, our goal is to make the necessary upgrades to the acquired gas treatment plant and increase the production rates from our wells which may result in higher net production and increased revenue during the later quarterly periods in 2010 as compared to the nine months ended September 30, 2009. To accomplish the plant upgrades, we will need to raise capital in 2009 and 2010. While we have been successful in raising some of the needed capital in 2009 year to date, additional needed funds may not be available, or may not be available on favorable terms due to the tight credit markets and persisting weakness in the stock market,.

During the nine months ended September 30, 2009, we did not generate sufficient revenues to cover the plant operating expenses and lease operating expenses in our Madisonville Project. This was due to low production volumes, high shrinkage rates in the gas plant and low natural gas prices. In order to address this shortfall, we have implemented measures to increase production volumes and reduce operating expenses earlier in 2009. We utilized idle equipment and implemented operating efficiencies in the Plant to reduce the Plant inlet pressure in June 2009. This measure increased the combined production from the Magness #1 and Fannin #1 wells from previous levels. In addition, subject to capital availability, we plan to workover the Mitchell #1 well and to frac and connect via gathering line the Wilson #1 well. Once the above production enhancements are completed, the Company expects the combined Rodessa formation production to increase from current rates. The Company hopes to realize both intermediate and long term cost and operating efficiencies by consolidating the upstream and midstream portions of Madisonville under common ownership. Prior to the consolidation, MGP and GeoPetro employed a combined total of 30 persons, whereas subsequent to the consolidation, GeoPetro and MM now employ a combined total of 21 persons, representing a net reduction of 9 persons (30% of the combined pre-consolidation workforce). Despite the challenges of the current environment, we accomplished the necessary goal of vertically integrating our position in the Madisonville field. We continue to explore other longer term cost saving and efficiency measures in the Plant.

Table of Contents

Industry Overview for the nine months ended September 30, 2009

The nine months ended September 30, 2009 saw weaker natural gas prices. The Houston Ship Channel price, the index price prevailing in the locale of our Madisonville Project in Madison County, Texas, as quoted in Gas Daily as of September 30, 2009, was \$3.41 per Mcf versus \$5.25 per Mcf as of December 31, 2008. Natural gas prices have been very volatile during 2008 and 2009 due to supply concerns earlier in 2008, and more recently due to recession concerns arising from the current global financial crisis and a resultant decline in demand for natural gas.

Company Overview for the nine months ended September 30, 2009

Our net loss for the nine months ended September 30, 2009 was \$4,502,686. From our inception, through mid-2003, we only received nominal revenues from our oil and natural gas activities, while incurring substantial acquisition and exploration costs and overhead expenses which have resulted in an accumulated deficit through September 30, 2009 of \$16,756,883. Commencing in May 2003, we placed our Madisonville Project into production. All of our natural gas sales for nine months ended September 30, 2009 were derived from our Madisonville Project, from three producing wells, the Magness #1 well (the Magness Well), the Fannin #1 well (the Fannin Well), and the Mitchell #1 well (the Mitchell Well).

Comparison of Results of Operations for the three months ended September 30, 2009 and 2008

During the three months ended September 30, 2009, we had gross natural gas revenues from the treatment plant of \$971,354 and revenues from treating third party gas in the Plant of \$2,299. During this period, our gross production from our wells was 374,697 Mcf (production net of royalties of 269,900 Mcf) and our average natural gas price realized was \$2.59 per Mcf. During the three months ended September 30, 2008, we had net oil and natural gas revenues of \$1,313,308. Our net production for the three months ended September 30, 2008 was 281,337 Mcf and our average natural gas price realized was \$4.67 per Mcf. Revenues decreased in the three months ended September 30, 2009 as compared to the prior year period due to lower natural gas prices and 4% lower net production volumes. Net natural gas prices were approximately 45% lower for the three months ended September 30, 2009 versus the same period in 2008. The average natural gas price of \$4.67 per Mcf for the 2008 period was net of treating, gathering, marketing and transportation fees (collectively the Fees) in accordance with our contracts with MGP and Gateway ADAC Pipeline, LLC. The average natural gas price of \$2.59 per Mcf for the 2009 period was not net of the aforementioned Fees since the contracts that were in place with MGP were terminated as of December 31, 2008.

Prior to December 31, 2008, revenue was recognized upon delivery of oil and gas production and was shown net of applicable royalty payments, as well as processing, gathering, transportation and marketing fees. As indicated in the preceding paragraph, the Company recognized revenue from the Madisonville Field net of applicable fees to treat, gather, transport and market the Company's natural gas production. The applicable fees were paid to unrelated third parties. On December 31, 2008, the Company completed the acquisition of the Plant from MGP. Commencing January 1, 2009, revenue is being recognized without the netting of applicable royalty payments, as well as processing, gathering, transportation and marketing fees since we have acquired the Plant. For all periods presented, revenue from the Madisonville Field is recognized when the price for gas delivered became fixed and determinable.

Our results of operations for the three months ended September 30, 2009 include the operating results of the Plant, but our results of operations for the three months ended September 30, 2008 do not include the operating results of the natural gas treatment plant because such acquisition closed on December 31, 2008. The following condensed pro forma information gives effect to the acquisition as if it had occurred on January 1,

Edgar Filing: GEOPETRO RESOURCES CO - Form 10-Q

2008. The pro forma information has been included in the notes to the financial statements included elsewhere in this document as required by generally accepted accounting principles and is provided for comparison purposes only. The pro forma financial information is not necessarily indicative of the financial results that would have occurred had the acquisition been effective on the dates indicated and should not be viewed as indicative of operations in the future.

	Three Months Ended September 30, 2008
Operating revenues	\$ 3,089,035
Total operating expenses	\$ 3,743,496
Loss applicable to common stock	\$ (512,468)
Net loss per share basic	\$ (0.02)
Net loss per share diluted	\$ (0.02)

Table of Contents

During the three months ended September 30, 2009, we incurred plant operating expenses of \$1,396,346. Our average plant operating cost for the 2009 period was \$3.72 per Mcf on net throughput of 375,554 Mcf. We purchased the gas treatment plant effective on December 31, 2008, thus there was no plant operating expense for the comparable 2008 period.

During the three months ended September 30, 2009, we incurred lease operating expense of \$93,773. Our net average lifting cost for the 2009 period was \$0.35 per Mcf. During the three months ended September 30, 2008, we incurred lease operating expense of \$296,927. Our net average lifting cost for the 2008 period was \$1.06 per Mcf. The average lifting cost per Mcf in 2009 was lower due to cost cutting efforts and a reduction of ad valorem property taxes applicable to the wells.

During the three months ended September 30, 2009, we incurred no net profits interest expense associated with the Magness, the Fannin, and the Mitchell wells as compared to \$112,308 during the three months ended September 30, 2008. The decrease resulted from lower gas prices and production volumes in the three months ended September 30, 2009 versus 2008. The net profit interest is 12.5% of the net operating profit from our Magness, Fannin, and Mitchell wells.

General and administrative (G&A) expenses for the three months ended September 30, 2009 were \$561,227 compared to \$601,757 for the three months ended September 30, 2008. This represents a \$40,530 or 7% decrease over the prior year period. The lower G&A expense incurred in 2009 was due primarily to the reduced costs associated with Canadian filings and with SOX compliance in 2009.

For the three months ended September 30, 2009, the impairment expense was \$939,703 versus \$0 for the same period of 2008. The 2009 impairment write-downs were due to cost of certain wells drilled on our Canadian oil and gas properties which were deemed to be fully evaluated during the latest quarter resulting in ceiling test write downs. We determined during the quarter that the reserve potential associated with these wells did not merit further expenditures.

Depreciation, depletion and amortization expense (DD&A) for the three months ended September 30, 2009 was \$432,559 as compared to \$343,364 in the same period of 2008, which amounts primarily represent amortization of the oil and gas properties for the three months ended September 30, 2009 and 2008, respectively. The 26% increase was due primarily to the plant depreciation expense associated with the gas treatment plant acquired on December 31, 2008.

Loss from operations totaled \$2,449,955 for the three months ended September 30, 2009 as compared to \$41,048 for the three months ended September 30, 2008. The increase in the loss from operations was due primarily to lower gas prices, lower production volume, and higher expenses.

Other income for the three months ended September 30, 2009 and 2008 consisted of interest income in the amount of \$976 and \$25,741, respectively. Interest income decreased due primarily to lower average cash and cash equivalent balances resulting from the acquisition of the gas treatment plant on December 31, 2008 and lower income during the respective period of 2009. During the three months ended September 30, 2009, we realized a gain on the sale of equipment of \$1,488,687 relating to the sale of idle equipment in our Madisonville Plant.

Comparison of Results of Operations for the nine months ended September 30, 2009 and 2008

During the nine months ended September 30, 2009, we had gross natural gas revenues from the treatment plant of \$2,849,507 and revenues from treating third party gas in the Plant of \$70,416. During this period, our gross production from our wells was 985,563 Mcf (production net of royalties of 711,177 Mcf) and our average natural gas price realized was \$2.89 per Mcf. During the nine months ended September 30, 2008, we had net oil and natural gas revenues of \$6,106,898. Our net production for the nine months ended September 30, 2008 was 1,106,521 Mcf and our average natural gas price realized was \$5.52 per Mcf. Revenues decreased in the nine months ended September 30, 2009 as compared to the prior year period due to lower natural gas prices and 36% lower net production volumes due to i) higher shrinkage rates in the plant and, ii) natural decline reserve in the wells. Net natural gas prices were approximately 48% lower for the nine months ended September 30, 2009 versus the same period in 2008. The average natural gas price of \$5.52 per Mcf for the 2008 period was net of treating, gathering, marketing and transportation fees (collectively the Fees) in accordance with our contracts with MGP and Gateway ADAC Pipeline, LLC. The average natural gas price of \$2.89 per Mcf for the 2009 period was not net of the aforementioned Fees since the contracts that were in place with MGP were terminated as of December 31, 2008.

Table of Contents

Prior to December 31, 2008, revenue was recognized upon delivery of oil and gas production and was shown net of applicable royalty payments, as well as processing, gathering, transportation and marketing fees. As indicated in the preceding paragraph, the Company recognized revenue from the Madisonville Field net of applicable fees to treat, gather, transport and market the Company's natural gas production. The applicable fees were paid to unrelated third parties. On December 31, 2008, the Company completed the acquisition of the Plant from MGP. Commencing January 1, 2009, revenue is being recognized without the netting of applicable royalty payments, as well as processing, gathering, transportation and marketing fees since we have acquired the Plant. For all periods presented, revenue from the Madisonville Field is recognized when the price for gas delivered became fixed and determinable.

Our results of operations for the nine months ended September 30, 2009 include the operating results of the Plant, but our results of operations for the nine months ended September 30, 2008 do not include the operating results of the natural gas treatment plant because such acquisition closed on December 31, 2008. The following condensed pro forma information gives effect to the acquisition as if it had occurred on January 1, 2008. The pro forma information has been included in the notes to the financial statements included elsewhere in this document as required by generally accepted accounting principles and is provided for comparison purposes only. The pro forma financial information is not necessarily indicative of the financial results that would have occurred had the acquisition been effective on the dates indicated and should not be viewed as indicative of operations in the future.

	Nine Months Ended September 30, 2008	
Operating revenues	\$	13,841,215
Total operating expenses	\$	13,102,514
Earnings applicable to common stock	\$	492,921
Net earnings per share basic	\$	0.01
Net earnings per share diluted	\$	0.01

During the nine months ended September 30, 2009, we incurred plant operating expenses of \$3,749,484. Our average plant operating cost for the 2009 period was \$3.71 per Mcf on net throughput of 1,009,746 Mcf. We purchased the gas treatment plant effective on December 31, 2008, thus there was no plant operating expense for the comparable 2008 period.

During the nine months ended September 30, 2009, we incurred lease operating expense of \$478,187. Our net average lifting cost for the 2009 period was \$0.67 per Mcf. During the nine months ended September 30, 2008, we incurred lease operating expense of \$1,287,309. Our net average lifting cost for the 2008 period was \$1.16 per Mcf. The average lifting cost per Mcf in 2009 was lower due to cost cutting efforts and a reduction of ad valorem taxes applicable to the wells.

During the nine months ended September 30, 2009, we incurred no net profits interest expense associated with the Magness, the Fannin, and the Mitchell wells as compared to \$601,237 during the nine months ended September 30, 2008. The decrease resulted from lower gas prices and production volumes in the nine months ended September 30, 2009 versus 2008. The net profit interest is 12.5% of the net operating profit from our Magness, Fannin, and Mitchell wells.

General and administrative (G&A) expenses for the nine months ended September 30, 2009 were \$2,026,821 compared to \$1,921,270 for the nine months ended September 30, 2008. This represents a \$105,551 or 5% increase over the prior year period. The higher G&A expense incurred in 2009 was due primarily to the amortization of stock compensation expense associated with common stock options issued in June 2008 and June 2009.

For the nine months ended September 30, 2009, impairment expense was \$939,703 versus \$63,766 for the same period of 2008. The impairment write-downs were due to cost of certain wells drilled on our Canadian oil and gas properties which were deemed to be fully evaluated during the respective periods resulting in ceiling test write downs. We determined during the quarter that the reserve potential associated with these wells did not merit further expenditures.

Depreciation, depletion and amortization expense (DD&A) for the nine months ended September 30, 2009 was \$1,159,050 as compared to \$1,326,099 in the same period of 2008, which amounts primarily represent amortization of the oil and gas properties for the nine months ended September 30, 2009 and 2008, respectively. The 13% decrease was due to lower net production in the nine months ended September 30, 2009 offset by added depreciation from plant of \$164,282.

Table of Contents

Loss from operations totaled \$5,433,322 for the nine months ended September 30, 2009 as compared to income from operations of \$907,217 for the nine months ended September 30, 2008. The increase in the loss from operations was due primarily to lower gas prices, lower production volume, and higher expenses.

Other income for the nine months ended September 30, 2009 and 2008 consisted of interest income in the amount of \$4,949 and \$73,609, respectively. Interest income decreased due primarily to lower average cash and cash equivalent balances because of the acquisition of the gas treatment plant in December 31, 2008. During the nine months ended September 30, 2009, we realized a gain on the sale of equipment of \$1,488,687 relating to the sale of idle equipment in our Madisonville Plant.

During the nine months ended September 30, 2009 and 2008, we incurred interest expense of \$563,991 and \$0, respectively. We borrowed funds in late December 2008 and during the nine months ended September 30, 2009 to fund the plant acquisition and working capital requirements. There were no borrowings outstanding in the same period of 2008.

Recent Developments

During the nine months ended September 30, 2009 we borrowed \$850,000 pursuant to five separate three year loans which were convertible into a newly designated class of preferred stock of GeoPetro, Series B Convertible Preferred Stock (the "Series B Preferred Stock") and \$1,177,000 pursuant to eleven separate loans. The \$850,000 in loans converted into Series B Preferred Stock on April 30, 2009, along with an additional \$1,000,000 which was advanced during April for a total subscription in the private placement of 2,466,670 shares for a purchase price of \$0.75 per share and an aggregate investment of \$1,850,000. The holders of Series B Stock are entitled to receive an annual dividend at the rate of \$0.06 per share and are entitled to such number of votes per share as equals the number of common shares into which each share of Series B Stock is convertible. Each share of Series B Stock is convertible, at the option of the holder, into fully paid and non-assessable common shares on a one-for-one basis, subject to certain adjustments. The Series B Stock will automatically convert into common shares on a one-for-one share basis effective the first trading day after the reported high selling price for the Company's common shares on any international, national or regional securities exchange or inter-dealer quotation system including but not limited to, NASDAQ, the Pink Sheets or the Over-the-Counter Bulletin Board, is at least \$1.50 per share for any ten consecutive trading days. If an automatic conversion occurs within one year after the Series B Stock was purchased from the Company, a holder will receive, on the one-year anniversary date of his, her or its purchase, a cash dividend equivalent to a full year of dividends less any dividends paid before such conversion.

In accordance with the provisions of an agreement with Adelphi Energy Limited ("Adelphi") and our wholly owned subsidiary, GeoPetro Resources (South Bengara-II) Pte. Ltd., we relinquished our interest in the recently awarded South Bengara-II production sharing contract, onshore Indonesia. On May 18, 2009, we received repayment of an advance we had previously made to Adelphi in the amount of \$95,000 in connection with the acquisition of the production sharing contract.

On September 10, 2009, the Company's subsidiary, Madisonville Midstream, LLC reached an agreement to sell certain idle equipment related to the plant to Gas Processors, Inc. for a sale price of \$2.5 million. A nonrefundable deposit of \$250,000 was received on September 10, 2009. The remaining balance of \$2.25 million was received on September 30, 2009. Of the \$2,500,000 sales proceeds, \$1,125,000 was applied toward a reduction of the principal balance on the Bank of Oklahoma term loan.

Edgar Filing: GEOPETRO RESOURCES CO - Form 10-Q

Between August 3, 2009 and October 13, 2009, we entered into preferred stock purchase agreements for the private placement of 5,049,333 shares of Series B Preferred Stock for a purchase price of \$0.75 per share and an aggregate investment, before offering costs, of \$3,787,000. Significant rights and preferences attaching to the Series B Preferred Stock are described above.

Edgar Filing: GEOPETRO RESOURCES CO - Form 10-Q

Table of Contents

Between August 3, 2009 and October 23, 2009, we issued promissory notes for total gross proceeds of \$1,000,000 (net proceeds of \$960,000). We issued to the note holders warrants exercisable to purchase 50,000 shares of our common stock. Each warrant is exercisable for a three year term to purchase one share of our common stock at a price of \$1.00 per share. The issuance dates, maturity dates and interest rates for these promissory notes are as follows:

DATE OF NOTE	MATURITY DATE	INTEREST RATE	PRINCIPAL AMOUNT
08/13/09	08/30/10	10%	\$ 100,000
08/21/09	08/30/10	10%	100,000
09/01/09	08/30/10	10%	30,000
09/16/09	08/30/10	10%	50,000
10/23/09	10/31/10	10%	720,000
			\$ 1,000,000

On September 11, 2009, our subsidiary, Redwood Energy Production, L.P. filed an Original Petition for Declaratory Judgment against Devon Energy Production Company (Devon) regarding certain overriding royalty interests and related revenue amounts claimed by Devon. We have previously accrued all amounts owed pursuant to these overriding royalty interests as royalty owners payable. In the opinion of management based on consultation with legal counsel, these proceedings are not expected to have a material adverse effect on our financial condition or results of operations.

Liquidity and Capital Resources

We had a working capital deficit of \$2,716,389 at September 30, 2009 versus \$2,151,652 at December 31, 2008. Our working capital decreased during nine months ended September 30, 2009 due primarily to weaker gas prices and lower production.

We have historically financed our business activities through September 30, 2009 principally through issuances of common shares, promissory notes and common share purchase warrants in private placements and an initial public offering. These financings are summarized as follows:

	Nine Months Ended	
	September 30, 2009	September 30, 2008
Proceeds from sale of common shares and warrant exercises, net	\$	\$ 375,000
Proceeds from sale of Preferred Series B		3,031,710
Proceeds from promissory notes		1,177,000
Payments of loan fee		(15,200)
Repayment of notes payable		(1,707,000)
Net cash provided by financing activities	\$	\$ 2,486,510

The net proceeds of our equity financings have been primarily used in the working capital requirement and invested in oil and natural gas properties and the gas treatment plant totaling \$761,449 and \$5,345,519 in oil and natural gas properties for the nine months ended September 30, 2009 and 2008, respectively.

Edgar Filing: GEOPETRO RESOURCES CO - Form 10-Q

Our cash balance at September 30, 2009 was \$1,645,006 compared to a cash balance of \$770,779 at December 31, 2008. The change in our cash balance is summarized as follows:

Cash balance at December 31, 2008	\$	770,779
Sources of cash:		
Cash provided by investment activities		1,738,551
Cash provided by financing activities		2,486,510
Total sources of cash including cash on hand		4,995,840
Uses of cash:		
Cash used in operating activities		(3,350,834)
Total uses of cash		(3,350,834)
Cash balance at September 30, 2009	\$	1,645,006

Table of Contents

During the nine months ended September 30, 2009, we raised \$850,000 from the issuance of convertible loans and \$1,177,000 from the issuance of promissory notes to accredited investors all of which were subordinated to the Bank of Oklahoma loan and unsecured. The \$850,000 promissory notes converted to Series B Preferred Stock effective April 30, 2009. We raised an additional \$2,181,710 from the issuance of Series B Preferred Stock during nine months ended September 30, 2009.

Our current cash and cash equivalents and anticipated cash flow from operations may not be sufficient to meet our working capital, capital expenditures and growth strategy requirements for the foreseeable future. See Outlook for 2009/2010 for a description of our expected capital expenditures for 2009/2010. If we are unable to generate revenues necessary to finance our operations over the long-term, we may have to seek additional capital through the sale of our equity or borrowing. As noted in Recent Developments, we periodically borrow funds pursuant to short and long term promissory notes to finance our activities.

As of September 30, 2009, we have a working capital deficit of \$2,716,389, and for the nine months ended September 30, 2009, our cash used in operating activities amounted to \$3,350,834. Further, we estimate our minimum investment needs during the remainder of 2009 and calendar 2010 to be \$4,500,000 related to our natural gas processing plant and our natural gas properties within the Madisonville field. Due to the current natural gas commodity price environment, our results of natural gas operations amounted to a loss of \$1,307,748 for the nine months ended September 30, 2009. Further, we have debt service and dividend requirements that will require cash payments. We hold working interests in undeveloped leases, seismic options, lease options and foreign concessions and we have participated in seismic surveys and the drilling of test wells on undeveloped properties. We plan further leasehold acquisitions and seismic operations for the remainder of 2009 and future periods. Exploratory and developmental drilling is scheduled during 2009 and future periods on our undeveloped properties. Subsequent to September 30, 2009, we have raised additional capital through a bridge loan financing and through issuance of additional shares of our Series B Preferred Stock. We are also attempting to raise additional cash through the sale or farmout of certain of our unproved properties. In addition to these items, we need to raise additional equity or enter into new borrowing arrangements to finance our operating deficit and our continued participation in planned activities. If additional financing is not available, we will be compelled to reduce the scope of our business activities. If we are unable to fund our operating cash flow needs and planned capital investments, it will be necessary to farm-out our interest in proposed wells, sell a portion of our interest in prospects, sell a portion of our interest in our producing oil and gas properties, sell all or a portion of our gas plant, reduce general and administrative expenses, or a combination of all of these factors.

As discussed in the Outlook for 2009/2010, we are forecasting capital expenditures of \$6.8 million during 2009/2010. We will need to obtain adequate sources of cash to fund our anticipated capital expenditures through the end of 2009 and to follow through with plans for continued investments in oil and gas properties. Our success, in part, depends on our ability to generate additional financing and farmout certain of our projects. Additionally, as a result of the 2008 economic downturn, the Company may have difficulty raising sufficient funds to meet our projected funding requirements. The tight credit markets and downturn in the stock market may impair our ability to generate additional financing.

We will continue to analyze the potential effects of the global economic downturn on our business and prospects and our ability to generate additional financing.

Table of Contents

Contractual Obligations

We have assumed various contractual obligations and commitments in the normal course of our operations and financing activities. We have described these obligations and commitments in our Management's Discussion and Analysis of Financial Condition and Results of Operations section in our Annual Report on Form 10-K for the year ended December 31, 2008. There were no material changes to our contractual obligations since December 31, 2008 except the borrowings described in Recent Developments .

Off Balance Sheet Arrangements

From time to time, we enter into off-balance sheet arrangements and transactions that can give rise to off-balance sheet obligations. As of September 30, 2009, our off-balance sheet arrangements and transactions include operating lease agreements. We do not believe that these arrangements are reasonably likely to materially affect our liquidity or availability of, or requirements for, capital resources.

Financial Instruments

We currently have no natural gas price financial instruments or hedges in place. Similarly, we have no financial derivatives. Our natural gas marketing contracts use spot market prices. Given the uncertainty of the timing and volumes of our natural gas production this year, we do not currently plan to enter into any long term fixed-price natural gas contracts, swap or hedge positions, other gas financial instruments or financial derivatives in 2009.

Outlook for 2009/2010

Depending on capital availability, we are forecasting capital spending of up to approximately \$6.8 million during the year 2009 and 2010, allocated as follows:

1. Madisonville Project, Madison County, Texas Approximately \$5.5 million may be expended in the Madisonville Field area as follows: \$3 million for capital maintenance and repair on new gas treatment plant; \$2 million toward the fracture stimulation and hook up costs of the Wilson Well; and \$500,000 for the Mitchell well workover.

2. Cook Inlet, Alaska Approximately \$1.0 million to be utilized for land delay rentals, geologic and geophysical costs, wellsite preparation, permitting, and logistics.

3. California and Indonesia Approximately \$0.3 million to be utilized for land, geologic and geophysical costs.

We may, in our discretion, decide to allocate resources towards other projects in addition to or in lieu of, those listed above should other opportunities arise and as circumstances warrant. We currently do not have sufficient working capital to fund all of the capital expenditure listed above. See Liquidity and Capital Resources.

We expect commodity prices to be volatile, reflecting the current supply and demand fundamentals for North American natural gas and world crude oil. Political events around the world, which are difficult to predict, will continue to influence both oil and gas prices. Higher prices for oil and gas often lead to higher levels of drilling activity which in turn lead to higher costs to explore, develop and acquire oil and gas reserves due to greater competition for resources and supplies. These higher costs could affect the returns on our capital expenditures. Higher crude prices could also help keep natural gas prices high by keeping alternative fuels, such as heating oil and residual fuel, expensive.

Impact of Inflation & Changing Prices

We are highly dependent upon natural gas pricing. A material decrease in current and projected natural gas prices could impair our ability to raise additional capital on acceptable terms. Likewise, a material decrease in current and projected natural gas prices could also impact our revenues and cash flows. This could impact our ability to fund future activities.

GeoPetro anticipates significantly lower average natural gas prices in 2009 compared to 2008. This will likely have a material negative impact on our cash flow and revenues.

Table of Contents

Changing prices have had a significant impact on costs of drilling and completing wells, particularly in the Madisonville Field area where we are currently the most active. The estimated cost of drilling and completing a Rodessa formation well at approximately 12,300 feet of depth has increased from \$3.0 million in 2001 to \$7.5 million in 2008 due to higher costs associated with tubular goods, well equipment, and day rates for drilling contracts, among other factors. These higher costs have impacted and will continue to impact our income from operations in the form of higher depletion expense. We have not recently updated our cost estimates for drilling these wells but expect that current costs are lower than those prevailing in 2008.

Critical Accounting Estimates

Our consolidated financial statements have been prepared by management in accordance with U.S. GAAP. We refer you to the corresponding section in Part II, Item 7 and the notes to the consolidated financial statements of our Annual Report on Form 10-K for the year ended December 31, 2008 for the description of critical accounting policies and estimates.

Risks and Uncertainties

There are a number of risks that face participants in the U.S., Canadian and international oil and natural gas industry, including a number of risks that face us in particular. Accordingly, there are risks involved in an ownership of our securities. See **Risk Factors** in our Annual Report on Form 10-K for the year ended December 31, 2008 for a description of the principal risks faced by us.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to market risks arising from fluctuating prices of crude oil, natural gas and interest rates as discussed below.

Commodity Risk. Our major commodity price risk exposure is to the prices received for our natural gas production. Realized commodity prices received for our production are the spot prices applicable to natural gas in the East Texas region. Prices received for natural gas are volatile and unpredictable and are beyond our control.

Currency Translation Risk. Because our revenues and expenses are primarily in U.S. dollars, we have little exposure to currency translation risk, and, therefore, we have no plans in the foreseeable future to implement hedges or financial instruments to manage international currency changes.

Hedging. We did not enter into any hedging transactions during the nine months ended September 30, 2009 and 2008.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Based on their evaluation as of nine months ended September 30, 2009, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) are effective to ensure that information required to be disclosed in reports that we file or submit under the Exchange Act are recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and in providing reasonable assurance that information required to be disclosed by the Company in such reports is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosures.

During the most recent fiscal quarter, there have been no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings.

From time to time, we are party to litigation or other legal and administrative proceedings that we consider to be a part of the ordinary course of our business. Currently, On September 11, 2009, our subsidiary, Redwood Energy Production, L.P. filed an Original Petition for Declaratory Judgment against Devon Energy Production Company (Devon) regarding certain overriding royalty interests and related revenue amounts claimed by Devon. The Company previously accrued all amounts owed pursuant to these overriding royalty interests as royalty owners payable. In the opinion of management based on consultation with legal counsel, these proceedings are not expected to have a material adverse effect on our financial condition or results of operations.

Item 1A. Risk Factors.

As of the date of this filing, there have been no material changes from the risk factors previously disclosed in our Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2008, referred to as our 2008 Annual Report. An investment in our securities involves various risks. When considering an investment in our company, you should consider carefully all of the risk factors described in our 2008 Annual Report. These risks and uncertainties are not the only ones facing us and there may be additional matters that we are unaware of or that we currently consider immaterial.

Item 2. Unregistered Sales of Securities and Use of Proceeds.

Unregistered Sales of Securities

During the quarter ended September 30, 2009, we entered into preferred stock purchase agreements with 49 accredited investors for the private placement of 1,654,337 shares of newly designated Series B Convertible Preferred Stock, for a purchase price of \$0.75 per share and an aggregate investment of \$1,240,753. We issued the Series B Convertible Preferred Stock in reliance on the exemption from registration provided for under Section 4(2) of the Securities Act, and Rule 506 of Regulation D thereunder. We relied on the exemption from registration provided for under Section 4(2) of the Securities Act based in part on the representations made by the investors, including the representations with respect to the investors status as accredited investors, as such term is defined in Rule 501(a) of the Securities Act, and the their investment intent with respect to the shares purchased. We paid \$59,043 as finders fees and commissions in connection with this offering.

Use of Proceeds

Edgar Filing: GEOPETRO RESOURCES CO - Form 10-Q

On our registration statement on Form S-1 (Reg. No. 333-135485) we registered up to 16,499,991 shares of our common stock, no par value per share, including 4,301,355 shares of common stock issuable upon exercise of warrants and options, for resale by selling shareholders. The registration statement was declared effective by the Securities and Exchange Commission in February 2007. The offering commenced on in February 2007 and has not terminated. On our registration statement on Form S-1 (Reg. No. 333-146557) we registered up to 2,002,599 shares of outstanding common stock and the resale of up to 780,857 shares of common stock issuable upon exercise of warrants, for resale by selling shareholders. The registration statement was declared effective by the Securities and Exchange Commission in October 2007. The offering commenced in October 2007 and has not terminated. We will not receive any proceeds from the sale of our common stock by the selling shareholders under the registration statements; however if all warrants and options to acquire our common stock being registered thereunder are exercised, we will realize cash proceeds of approximately \$12 million, which we expect to use for general working capital purposes and the drilling of wells in our Texas, Alaska, California and Indonesian prospects.

If less than the \$12 million proceeds are realized from the exercise of such warrants and options, the proceeds will be spent in the following order of priority:

1. Madisonville Project, Madison County, Texas. Up to approximately \$8 million will be expended in the Madisonville Field area towards the drilling and completion of one deep exploratory well location to an estimated depth of 18,000 feet.
2. Alaska Cook Inlet Project, up to approximately \$2.0 million will be expended for the drilling of pilot program wells.
3. General working capital.

Table of Contents

We do not know if, or how many, of the warrants or options will be exercised. This is our best estimate of our use of proceeds generated from the possible exercise of warrants or options based on the current state of our business operations, our current plans and current economic and industry conditions. Any changes in the projected use of proceeds will be made at the sole discretion of our board of directors.

Item 3. Defaults Upon Senior Securities

Not applicable.

Item 4. Submission of Matters to a Vote of the Security Holders.

Not applicable.

Item 5. Other Information.

Not applicable

Item 6. Exhibits
