EXPLANATORY NOTE

Due to the circumstances described in Part I, Item 3 regarding internal control procedures and deficiencies relating to payroll disbursements, our predecessor independent registered public accounting firm was unable to complete a review of the interim unaudited financial statements included in the Form 10-QSB for the quarter ended June 30, 2005 that was previously filed on August 22, 2005. The accompanying financial statements filed with this amended 10-QSB/A now comply with the requirements of Item 310(b) of Regulation S-B as it relates to interim financial statements. This form 10-QSB/A contains no changes in the financial statements from the previously filed 10-QSB for period ended June 30, 2005.

PART I.
FINANCIAL INFORMATION

Item 1. FINANCIAL STATEMENTS (UNAUDITED)

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders
Servotronics, Inc.

We have reviewed the accompanying balance sheet of Servotronics, Inc. as of June 30, 2005 and the related consolidated statement of operations for the three and

Edgar Filing: SERVOTRONICS INC /DE/ - Form 10QSB/A

six month periods ended June 30, 2005, and the related consolidated statement of cash flows for the six months ended June 30, 2005. These interim financial statements are the responsibility of the Company's management.

We conducted our review in accordance with standards established by the Public Company Accounting Oversight Board. A review of interim financial information consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with accounting principles generally accepted in the United States of America.

/s/Freed Maxick & Battaglia, CPAs, P.C.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(\$000 omitted in tables except for per share data)

1. Basis of presentation

The consolidated financial statements include the accounts of Servotronics, Inc. (the "Company") and its majority owned subsidiaries.

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with the instructions to Form 10-QSB and Item 310 of Regulation S-B. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements.

The accompanying financial statements reflect all adjustments which are, in the opinion of management, necessary for a fair statement of the results for the interim periods presented. All such adjustments are of a normal recurring nature. Operating results for the six months ended June 30, 2005 are not necessarily indicative of the results that may be expected for the year ended December 31, 2005. The financial statements should be read in conjunction with the annual report and the notes thereto.

2. Summary of risk factors and significant accounting policies

Risk factors

The aviation and aerospace industries as well as markets for the Company's consumer products are facing new and evolving challenges on a global basis. The success of the Company depends upon the trends of the economy, including interest rates, income tax laws, governmental regulation, legislation, and other risk factors. In addition, uncertainties in today's global economy, global competition, the effect of terrorism, difficulty in predicting defense and other government appropriations, the vitality of the commercial aviation industry and

Edgar Filing: SERVOTRONICS INC /DE/ - Form 10QSB/A

its ability to purchase new aircraft, the willingness and ability of the Company's customers to fund long-term purchase programs, volatile market demand and the continued market acceptance of the Company's advanced technology and cutlery products make it difficult to predict the impact on future financial results.

Revenue recognition

The Company's revenues are recognized when the risks and rewards of ownership and title to the product are transferred to the customer as units are shipped and as terms and conditions of purchase orders are met.

3. Inventories

	June 30, 2005
Raw materials and common parts	\$ 3,271
Work-in-process	2,457
Finished goods	955
	6,683
Less common parts expected to be used after one year	(248)
	\$ 6,435

Inventories are stated at the lower of standard cost or net realizable value. Cost includes all cost incurred to bring each product to its present location and condition, which approximates actual cost (first-in, first-out). Market provisions in respect of net realizable value and obsolescence are applied to the gross value of the inventory. Pre-production and start-up costs are expensed as incurred.

-7-

4. Property, plant and equipment

	June 30, 2005
Land	\$ 25
Buildings	6,487
Machinery, equipment and tooling	10,563
	17,075
Less accumulated depreciation	(10,668)
	\$ 6,407

Property, plant and equipment includes land and building under a \$5,000,000 capital lease which can be purchased for a nominal amount at the end of the lease term. As of June 30, 2005, accumulated amortization on the building amounted to approximately \$1,450,000. The associated current and long-term liabilities are discussed in footnote 5 to the consolidated financial statements. The Company believes that it maintains property and casualty insurance in amounts adequate for the risk and nature of its assets and operations and which are generally customary in its industry.

5. Long-term debt

Industrial Development Revenue Bonds; secured by a letter of credit from a bank with interest payable monthly at a floating rate (2.48% at June 30, 2005)
 Term loan payable to a financial institution interest at LIBOR plus 2% (5.10% at June 30, 2005); quarterly principal payments of \$17,500 commencing January 1, 2005; payable in full in the fourth quarter of 2009
 Term loan payable to a financial institution interest at LIBOR plus 2% (5.39% at June 30, 2005) quarterly principal payments of \$26,786 through the fourth quarter of 2011
 Secured term loan payable to a government agency, monthly payments of approximately \$1,455 with interest waived payable through second quarter of 2012
 Secured term loan payable to a government agency monthly payments of \$1,950 including interest fixed at 3% payable through fourth quarter of 2015

Less current portion

Industrial Development Revenue Bonds were issued by a government agency to finance the construction of the Company's headquarters/Advanced Technology facility. Annual sinking fund payments of \$170,000 commenced December 1, 2000 and continue through 2013, with a final payment of \$2,620,000 due December 1, 2014. The Company has agreed to reimburse the issuer of the letter of credit if there are draws on that letter of credit. The Company pays the letter of credit bank an annual fee of 1% of the amount secured thereby and pays the remarketing agent for the bonds an annual fee of .25% of the principal amount outstanding. The Company's interest under the facility capital lease has been pledged to secure its obligations to the government agency, the bank and the bondholders.

-8-

The Company also has a \$1,000,000 line of credit on which there was no balance outstanding at June 30, 2005.

Earnings per share

Basic earnings per share are computed by dividing net earnings by the weighted average number of shares outstanding during the period. Diluted earnings per share are computed by dividing net earnings by the weighted average number of shares outstanding during the period plus the number of shares of common stock that would be issued assuming all contingently issuable shares having a dilutive effect on earnings per share were outstanding for the period.

7. Business segments

The Company operates in two business segments, Advanced Technology Group (ATG) and Consumer Products Group (CPG). The Company's reportable segments are strategic business units that offer different products and services. The segments are composed of separate corporations and are managed separately. Operations in ATG involve the design, manufacture, and marketing of servo-control components (i.e., control valves, actuators, etc.) for government and commercial industrial applications. CPG's operations involve the design, manufacture and marketing of a variety of cutlery products for use by consumers

Edgar Filing: SERVOTRONICS INC /DE/ - Form 10QSB/A

and government agencies. The Company derives its primary sales revenue from domestic customers, although a significant portion of finished products are for foreign end use.

Net income	3.2%	3.8%	(9.3%)	2.8%
	====	====	-----	====

Management Discussion

During the six month period ended June 30, 2005 and for the comparable period ended June 30, 2004, approximately 47% of the Company's revenues were derived from contracts with agencies of the U.S. Government or their prime contractors and their subcontractors. Total government sales are anticipated to decrease in 2005 as a result of the scheduled completion of a significant government order to the CPG as previously reported. The Company's business is performed under fixed price contracts. Allocations of defense expenditures and government involvement in overseas military operations have had an impact on the Company's financial results. Sales of products sold for government applications have increased approximately 9% for the six month period ended June 30, 2005 compared to the corresponding period of 2004. While the Company remains optimistic in relation to these opportunities, it recognizes that sales to the government are affected by defense budgets, the foreign policies of the U.S. and other nations, the level of military operations and other factors and, as such, it is difficult to predict the impact on future financial results. The Company's commercial business is affected by such factors as uncertainties in today's global economy, global competition, the vitality and ability of the commercial aviation industry to purchase new aircraft, market demand and acceptance both for the Company's products and its customers' products which incorporate Company-made components.

Results of Operations

The Company's consolidated results of operations for the six month period ended June 30, 2005 showed an approximate \$851,000 or 7.8% increase in net revenues to \$11,819,000 with a decrease in net income of approximately \$44,000 or 11.8% when compared to the same six month period of 2004. The Company's consolidated results of operations for the three month period ended June 30, 2005 showed an approximate \$496,000 or 8.8% increase in net revenues to \$6,136,000 with a decrease in net income of approximately \$20,000 or 9.3% when compared to the same three month period of 2004. The increase in revenues is primarily attributed to both increased government shipments and commercial shipments at the Advanced Technology Group.

-11-

Gross profit for the six and three month periods ended June 30, 2005 remained consistent as a percentage of sales when compared to the same period in 2004. The Company continues to incur costs associated with prototype and preproduction activities that are expensed in the period incurred. These costs as well as product mix can contribute to fluctuations in gross profit from period to period.

Selling, general and administrative (SG&A) costs increased approximately 9.0% when compared to the same six month period in 2004 and increased 4.1% for the three month period ended June 30, 2005 when compared to the same three month period in 2004. The increase is primarily attributable to costs incurred for professional services and corporate governance necessitated by the Sarbanes-Oxley Act as well as increased marketing of the expanded sales effort of the Company. The Company expects these costs to continue to be significant components of SG&A in the future.

Interest expense increased for the six months and quarter ended June 30, 2005 when compared to the same period in 2004 primarily due to an increase in institutional debt and market driven interest rates.

Edgar Filing: SERVOTRONICS INC /DE/ - Form 10QSB/A

The Company continues to take advantage of the tax benefit for extraterritorial sales as well as the new manufacturing deductions allowable under the American Jobs Creation Act of 2004, which is reflected in the effective tax rate of approximately 37%.

Liquidity and Capital Resources

The Company's primary liquidity and capital requirements relate to the Company's working capital needs; primarily inventory, accounts receivable, capital investments in facilities, machinery, tools/dies and equipment and principal/interest payments on indebtedness. The Company's primary sources of liquidity in 2005 have been from positive cash flows from operations. These cash flows have been positively affected by efforts in inventory control and satisfactory payment terms with suppliers and customers.

As of June 30, 2005 there are no material commitments for capital expenditures.

The Company also has a \$1,000,000 line of credit on which there was no balance outstanding at June 30, 2005.

Item 3. CONTROLS AND PROCEDURES

(a) EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES. As of June 30, 2005, we carried out an evaluation under the supervision and with the participation of our management, including our Chief Executive Officer ("CEO") and Interim Chief Financial Officer ("ICFO"), of the effectiveness of our disclosure controls and procedures. Based upon that evaluation, the CEO and ICFO concluded that as more fully described below, as of June 30, 2005, our disclosure controls and procedures were not effective in timely alerting them to the material information relating to the Company (or the Company's consolidated subsidiaries) required to be included in our periodic filings with the SEC, such that the information relating to the Company, required to be disclosed in SEC reports (i) is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and (ii) is accumulated and communicated to the Company's management, including our CEO and ICFO, as appropriate to allow timely decisions regarding required disclosure.

(b) CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING. Other than as described below, there has been no change in our internal control over financial reporting that occurred during the fiscal quarter ended June 30, 2005 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

-12-

(c) IDENTIFIED CONTROLS AND PROCEDURE WEAKNESSES FOR PAYROLL DISBURSEMENTS. As previously reported the Company discovered certain unauthorized disbursements by a senior finance officer and reported this discovery to all appropriate parties including the Company's Attorney, the Audit Committee, the Company's Independent Auditors, the SEC, the AMEX and the District Attorney of Erie County, New York. An investigation was immediately initiated and is continuing.

Although the Company has not yet received a definitive investigation report it appears that such unauthorized disbursements by this individual have occurred over a period of 22 1/2 years and amounts to, on average, approximately \$107,000 per year after tax, for a total of approximately \$2,400,000 after tax or \$4,000,000 before tax. The above amounts were expensed as incurred and the associated tax benefits were received. Therefore, all future restitution, net of

Edgar Filing: SERVOTRONICS INC /DE/ - Form 10QSB/A

recovery costs, will be reflected as additional income in the time periods they are received. The subject individual, through his attorney, has offered to make restitution to the extent possible. The Company has a \$1,000,000 crime policy with a \$10,000 deductible. The individual is no longer an employee of the Company and, to date, has cooperated with the investigation. At this stage, the Company cannot reliably forecast its total net recovery.

We are currently not aware of any other weaknesses in our internal controls and procedures, other than the weakness relative to payroll disbursements as described above. In connection with this investigation, we will perform further evaluation and implement the appropriate remedial action. Notwithstanding the weakness in our controls and procedures relative to payroll disbursements, management believes that the information contained in this Form 10-QSB/A, including the financial statements contained herein, present, in all material respects, our financial condition and results of operations as of the dates so indicated.

We are only in the initial phases of establishing compliance under Section 404 of the Sarbanes-Oxley Act, which now will not be effective for our Company until our fiscal year ending December 31, 2007. We anticipate expending significant additional resources to evaluate and maintain appropriate controls and procedures and to prepare the required financial and other information during the process of establishing our Section 404 Sarbanes-Oxley controls and procedures.

(d) LIMITATIONS ON THE EFFECTIVENESS OF INTERNAL CONTROLS. Our management, including the CEO and ICFO, does not expect that our disclosure controls and procedures or our internal control over financial reporting will necessarily prevent all fraud and material error. An internal control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of the control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the internal control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, control may become inadequate because of changes in conditions, and/or the degree of compliance with the policies or procedures may change.

PART II

OTHER INFORMATION

Item 6. EXHIBITS

10(A)(1) Employment contract for Dr. Nicholas D. Trbovich, Chief Executive Officer (Incorporated by reference to Exhibit 10(A)(1) to the Company's current report on Form 8-K filed on August 18, 2005).

10(A)(4) Employment contract for Nicholas D. Trbovich, Jr., Vice President (Incorporated by reference to Exhibit 10(A)(4) to

Edgar Filing: SERVOTRONICS INC /DE/ - Form 10QSB/A

the Company's current report on Form 8-K filed on August 18, 2005).

- 31.1 Certification of Interim Chief Financial Officer pursuant to Rule 13a-14 or 15d-14 of the Securities Exchange act of 1934, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 31.2 Certification of Chief Executive Officer pursuant to Rule 13a-14 or 15d-14 of the Securities Exchange act of 1934, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 32.1 Certification of Interim Chief Financial Officer pursuant to 18 U.S.C. 1350 as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
- 32.2 Certification of Chief Executive Officer pursuant to 18 U.S.C. 1350 as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

FORWARD-LOOKING STATEMENTS

In addition to historical information, certain sections of this Form 10-QSB/A contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, such as those pertaining to the Company's capital resources and profitability. Forward-looking statements involve numerous risks and uncertainties. The Company derives a material portion of its revenues from contracts with agencies of the U.S. Government or their prime contractors. The Company's business is performed under fixed price contracts and the following factors, among others discussed herein, could cause actual results and future events to differ materially from those set forth or contemplated in the forward-looking statements: uncertainties in today's global economy and global competition, and difficulty in predicting defense appropriations, the vitality of the commercial aviation industry and its ability to purchase new aircraft, the willingness and ability of the Company's customers to fund long-term purchase programs, and market demand and acceptance both for the Company's products and its customers' products which incorporate Company-made components. The success of the Company also depends upon the trends of the economy, including interest rates, income tax laws, governmental regulation, legislation, population changes and those risk factors discussed elsewhere in this Form 10-QSB/A. Readers are cautioned not to place undue reliance on forward-looking statements, which reflect management's analysis only as of the date hereof. The Company assumes no obligation to update forward-looking statements.
