The Company believes that its inclusion of non-GAAP financial measures provides useful supplementary information to and facilitates analysis by investors in evaluating the Company’s performance and trends. The determination of significant charges or credits may not be comparable to similar measures used by other companies and may vary from period to period. The Company uses both GAAP financial measures and the disclosed non-GAAP financial measures internally to evaluate and manage the Company’s operations and to better understand its business. Non-GAAP net income, non-GAAP earnings per share, adjusted EBITDA, non-GAAP operating income, adjusted gross margin as a percentage of adjusted net revenues, adjusted SG&A as a percentage of adjusted net revenues, and adjusted R&D expense are supplemental measures of our performance that are not required by, or presented in accordance with, GAAP. We define non-GAAP net income as consolidated net income / (loss) for such period adjusted for the following net of tax: (i) amortization expenses, (ii) global supply chain initiative, (iii) acquisition, integration and licensing, (iv) accretion on contingent liabilities, (v) impairment/asset sales and related costs, including the exclusion of discontinued operations, (vi) legal settlements and (vii) other unusual charges or expenses. We define non-GAAP operating income as adjusted EBITDA including depreciation and certain stock-based compensation charges.
