

Oxford Lane Capital Corp.  
Form 497  
August 24, 2016

Filed pursuant to Rule 497  
File No. 333-205405

**PROSPECTUS SUPPLEMENT  
(to Prospectus dated August 23, 2016)**

**Oxford Lane Capital Corp.**

**\$25,000,000  
Common Stock**

We are a non-diversified, closed-end management investment company that has registered as an investment company under the Investment Company Act of 1940, or the 1940 Act. Our investment objective is to maximize our portfolio risk-adjusted total return. We have implemented our investment objective by purchasing portions of equity and junior debt tranches of collateralized loan obligation ( CLO ) vehicles. Structurally, CLO vehicles are entities formed to originate and manage a portfolio of loans. The loans within the CLO vehicle are limited to loans which meet established credit criteria and are subject to concentration limitations in order to limit a CLO vehicle s exposure to a single credit.

**An investment in our securities is subject to significant risks and involves a heightened risk of total loss of investment. The price of shares of our common stock may be highly volatile and our common stock may frequently trade at a discount to our net asset value. In addition, the residual interests of the CLO securities in which we invest are subject to a high degree of special risks, including: CLO structures are extremely complicated and may be subject to disadvantageous tax treatment; CLO vehicles are highly levered and are made up of below investment grade loans in which we typically have a residual interest that is much riskier than the loans that make up the CLO vehicle; and the market price for CLO vehicles may fluctuate dramatically (including dramatic declines during certain periods in 2015 and 2016), which may make portfolio valuations unreliable and negatively impact our net asset value and our ability to make distributions to our stockholders. See Risk Factors beginning on page 21 of the accompanying prospectus to read about factors you should consider, including the risk of leverage, before investing in our securities.**

We have entered into an equity distribution agreement, dated March 7, 2016, with Ladenburg Thalmann & Co. Inc. relating to the shares of common stock offered by this prospectus supplement and the accompanying prospectus.

The equity distribution agreement provides that we may offer and sell shares of our common stock having an aggregate offering price of up to \$25,000,000 from time to time through Ladenburg Thalmann & Co. Inc., as our sales agent. Sales of our common stock, if any, under this prospectus supplement and the accompanying prospectus may be made in negotiated transactions or transactions that are deemed to be at the market, as defined in Rule 415 under the Securities Act of 1933, as amended, including sales made directly on the NASDAQ Global Select Market or similar securities exchange or sales made to or through a market maker other than on an exchange, at prices related to the

prevailing market prices or at negotiated prices.

Ladenburg Thalmann & Co. Inc. will receive a commission from us up to 2.0% of the gross sales price of any shares of our common stock sold through Ladenburg Thalmann & Co. Inc. under the equity distribution agreement. Ladenburg Thalmann & Co. Inc. is not required to sell any specific number or dollar amount of common stock, but will use its commercially reasonable efforts consistent with its sales and trading practices to sell the shares of our common stock offered by this prospectus supplement and the accompanying prospectus. See Plan of Distribution beginning on page S-22 of this prospectus supplement. The sales price per share of our common stock offered by this prospectus supplement and the accompanying prospectus, less Ladenburg Thalmann & Co. Inc.'s commission, will not be less than the net asset value per share of our common stock at the time of such sale.

From March 7, 2016 to August 23, 2016, we sold a total of 474,250 shares of common stock pursuant to this offering at the market offering. The total amount of capital raised as a result of these sales of common stock was approximately \$4.2 million and net proceeds were approximately \$4.0 million after deducting the sales agent's commissions and offering expenses.

Our common stock is traded on the NASDAQ Global Select Market under the symbol OXLC. On August 23, 2016, the last reported sales price on the NASDAQ Global Select Market for our common stock was \$11.34 per share. We are required to determine the net asset value per share of our common stock on a quarterly basis. Our net asset value per share of our common stock as of June 30, 2016 was \$8.78.

Please read this prospectus supplement and the accompanying prospectus before investing in our securities and keep each for future reference. This prospectus supplement and the accompanying prospectus contain important information about us that a prospective investor ought to know before investing in our securities. We are required to file annual, semi-annual and quarterly reports, proxy statements and other information about us with the Securities and Exchange Commission, or the SEC. This information is available free of charge by contacting us by mail at 8 Sound Shore Drive, Suite 255, Greenwich, CT 06830, by telephone at (203) 983-5275 or on our website at <http://www.oxfordlanecapital.com>. The SEC also maintains a website at <http://www.sec.gov> that contains such information. Information contained on our website is not incorporated by reference into this prospectus supplement or the accompanying prospectus, and you should not consider that information to be part of this prospectus supplement or the accompanying prospectus.

Neither the SEC nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

## **ABOUT THIS PROSPECTUS SUPPLEMENT**

We have filed with the SEC a registration statement on Form N-2 (File Nos. 333-205405 and 811-22432) utilizing a shelf registration process relating to the securities described in this prospectus supplement, which registration statement was declared effective on August 23, 2016. This document is in two parts. The first part is the prospectus supplement, which describes the terms of this offering of common stock and also adds to and updates information contained in the accompanying prospectus. The second part is the accompanying prospectus, which gives more general information and disclosure. To the extent the information contained in this prospectus supplement differs from or is additional to the information contained in the accompanying prospectus, you should rely only on the information contained in this prospectus supplement. Please carefully read this prospectus supplement and the accompanying prospectus together with the additional information described under the headings Available Information and Risk Factors included in the accompanying prospectus, respectively, before investing in our common stock.

**Neither we nor Ladenburg Thalmann & Co. Inc. has authorized any dealer, salesman or other person to give any information or to make any representation other than those contained in this prospectus supplement or the accompanying prospectus. If anyone provides you with different or inconsistent information, you should not rely on it. This prospectus supplement and the accompanying prospectus do not constitute an offer to sell or a solicitation of any offer to buy any security other than the registered securities to which they relate, nor do they constitute an offer to sell or a solicitation of an offer to buy any securities in any jurisdiction or to any person to whom it is unlawful to make such an offer or solicitation in such jurisdiction. The information contained in this prospectus supplement and the accompanying prospectus is accurate as of the dates on their respective covers. Our financial condition, results of operations and prospects may have changed since those dates. To the extent required by law, we will amend or supplement the information contained in this prospectus supplement and the accompanying prospectus to reflect any material changes subsequent to the date of this prospectus supplement and the accompanying prospectus and prior to the completion of any offering pursuant to this prospectus supplement and the accompanying prospectus.**

TABLE OF CONTENTS

## SUMMARY

*The following summary contains basic information about the offering of shares of our common stock pursuant to this prospectus supplement and the accompanying prospectus. It is not complete and may not contain all the information that is important to you. For a more complete understanding of the offering of shares of our common stock pursuant to this prospectus supplement, we encourage you to read this entire prospectus supplement and the accompanying prospectus, and the documents to which we have referred in this prospectus supplement and the accompanying prospectus. Together, these documents describe the specific terms of the shares we are offering. You should carefully read the sections entitled Risk Factors and Business and our financial statements included in the accompanying prospectus.*

*Except where the context requires otherwise, the terms Oxford Lane Capital, the Company, the Fund, we, us and our refer to Oxford Lane Capital Corp.; Oxford Lane Management and investment adviser refer to Oxford Lane Management, LLC; BDC Partners and administrator refer to BDC Partners, LLC; and Alaric and Alaric Compliance Services refer to Alaric Compliance Services, LLC.*

## Overview

We are a non-diversified closed-end management investment company that has registered as an investment company under the 1940 Act. Our investment objective is to maximize our portfolio's risk-adjusted total return.

We have implemented our investment objective by purchasing portions of equity and junior debt tranches of collateralized loan obligation ( CLO ) vehicles. Our investment objective also includes warehouse facilities, which are financing structures intended to aggregate loans that may be used to form the basis of a CLO vehicle. Substantially all of the CLO vehicles in which we may invest would be deemed to be investment companies under the 1940 Act but for the exceptions set forth in section 3(c)(1) or section 3(c)(7). Structurally, CLO vehicles are entities formed to originate and manage a portfolio of loans. The loans within the CLO vehicle are limited to loans which meet established credit criteria and are subject to concentration limitations in order to limit a CLO vehicle's exposure to a single credit. A CLO vehicle is formed by raising various classes or tranches of debt (with the most senior tranches being rated AAA to the most junior tranches typically being rated BB or B ) and equity. The CLO vehicles which we focus on are collateralized primarily by senior secured loans made to companies whose debt is unrated or is rated below investment grade ( Senior Loans ), and generally have very little or no exposure to real estate, mortgage loans or to pools of consumer-based debt, such as credit card receivables or auto loans. Below investment grade securities are often referred to as junk. We may also invest, on an opportunistic basis, in other corporate credits of a variety of types. We expect that each of our investments will range in size from \$5 million to \$50 million, although the investment size may vary consistent with the size of our overall portfolio. Oxford Lane Management manages our investments and its affiliate arranges for the performance of the administrative services necessary for us to operate.

The structure of CLO vehicles, which are highly levered, is extremely complicated. Since we invest in the residual interests of CLO securities, our investments are much riskier than the risk profile of the Senior Loans by which such CLO vehicles are collateralized. Our investments in CLO vehicles may be riskier and less transparent to us and our stockholders than direct investments in the underlying Senior Loans. Our portfolio of investments may lack diversification among CLO vehicles which may subject us to a risk of significant loss if one or more of these CLO vehicles experience a high level of defaults on its underlying Senior Loans. The CLO vehicles in which we invest have debt that ranks senior to our investment. The market price for CLO vehicles may fluctuate dramatically, which may make portfolio valuations unreliable and negatively impact our net asset value and our ability to make

distributions to our stockholders. Our equity investment distributions from CLO vehicles will likely be materially reduced if three month LIBOR increases. Our financial results may be affected adversely if one or more of our significant equity or junior debt investments in such CLO vehicles defaults on its payment obligations or fails to perform as we expect.

Our investments in CLO vehicles may be subject to special anti-deferral provisions that could result in us incurring tax or recognizing income prior to receiving cash distributions related to such income. Specifically, the CLO vehicles in which we invest generally constitute passive foreign investment companies ( PFICs ).

S-2

---

TABLE OF CONTENTS

Because we acquire investments in PFICs (including equity tranche investments in CLO vehicles that are PFICs), we may be subject to U.S. federal income tax on a portion of any excess distribution or gain from the disposition of such investments even if such income is distributed as a taxable dividend by us to our stockholders. See Risk Factors Risks Related to Our Investments beginning on page 21 of the accompanying prospectus to read about factors you should consider before investing in our securities.

For the fiscal year ended March 31, 2016, our total return based on market value was (28.97)%. Total return based on market value is calculated assuming that shares of the Fund's common stock were purchased at the market price as of the beginning of the period, and that distribution, capital gains and other distributions were reinvested as provided for in the Fund's distribution reinvestment plan, excluding any discounts, and that the total number of shares were sold at the closing market price per share on the last day of the period. The computation does not reflect any sales commission investors may incur in purchasing or selling shares of the Fund. Our total return figures are subject to change and, in the future, may be greater or less than the rates set forth above.

**Distributions**

In order to be subject to pass-through tax treatment as a regulated investment company, or RIC, and to eliminate our liability for corporate-level U.S. federal income tax on the income we distribute to our stockholders, we are required, under Subchapter M of the Internal Revenue Code of 1986, as amended, or the Code, to distribute to our stockholders on an annual basis at least 90% of our ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any.

S-3

---

TABLE OF CONTENTS

The following table reflects the cash distributions, including dividends, distributions reinvested and tax returns of capital, if any, per share that we have declared on our common stock to date as well as our quarterly per share net investment income and distributions in excess of net investment income:

(1) All of our cash distributions to date were funded from taxable income. The tax characterization of cash distributions for a particular year will not be known until the tax return for that year is finalized.

(2) We have not yet reported earnings for the period ended September 30, 2016.

(3) Represents a special dividend for the fiscal year ended March 31, 2014.

S-4

---

TABLE OF CONTENTS

For the fiscal year ended March 31, 2016, we paid dividends totaling \$421,888, \$7,383,791 and \$4,862,802 on the Series 2017 Term Preferred Shares, the Series 2023 Term Preferred Shares and the Series 2024 Term Preferred Shares, respectively. For the fiscal year ended March 31, 2015, we paid \$1,344,083, \$5,286,287 and \$2,912,844 on the Series 2017 Term Preferred Shares, the Series 2023 Term Preferred Shares and the Series 2024 Term Preferred Shares, respectively. For fiscal year 2014, we paid \$1,344,083 and \$2,638,151 in preferred dividends on the Series 2017 Term Preferred Shares and the Series 2023 Term Preferred Shares, respectively. For fiscal year 2013, we paid \$459,228 in preferred dividends on the Series 2017 Term Preferred Shares. The 2017 Term Preferred Shares were fully redeemed in July 2015.

For accounting purposes the distributions declared on our common stock for the fiscal years ended March 31, 2016, 2015, 2014, 2013, 2012 and 2011 were in excess of the reported earnings under Generally Accepted Accounting Principles ( GAAP ). However, as a RIC, earnings and distributions are determined on a tax basis. Furthermore, taxable earnings are determined according to tax regulations and differ from reported income for accounting purposes under GAAP. For the fiscal years ended March 31, 2015, 2014, 2013, 2012 and 2011, taxable earnings exceeded our distributions, and there was no tax return of capital for these years.

The tax characterization of distributions for the year ended March 31, 2016 will not be known until the tax return is finalized. To the extent that taxable earnings for any fiscal year are less than the amount of the distributions paid during the year, there would be a tax return of capital to shareholders. Distributions in excess of current and accumulated taxable earnings and profits will generally not be taxable to the shareholders, because a tax return of capital represents a return of a portion of a shareholder's original investment in our common stock, net of fund fees and expenses, to the extent of a shareholder's basis in our stock. Generally, a tax return of capital will reduce an investor's basis in our stock for federal tax purposes, which will result in the shareholder recognizing additional gain (or less loss) when the stock is sold. Assuming that a shareholder holds our stock as a capital asset, any such additional gain would be a capital gain. Shareholders should not assume that the source of all distributions is from our net profits and shareholders may periodically receive the payment of a distribution consisting of a return of capital. The tax character of any distributions will be determined after the end of the fiscal year. Tax matters are very complicated and the tax consequences to an investor of an investment in our shares will depend on the facts of its particular situation. We encourage investors to consult their own tax advisors regarding the specific consequences of such an investment, including tax reporting requirements, the applicability of federal, state, local and foreign tax laws, eligibility for the benefits of any applicable tax treaty and the effect of any possible changes in the tax laws.

We have elected to be treated, and intend to continue to qualify annually, as a RIC under Subchapter M of the Code beginning with our 2011 taxable year. To maintain RIC tax treatment, we must, among other things, distribute at least 90% of our ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any. In order to avoid certain U.S. federal excise taxes imposed on RICs, we currently intend to distribute during each calendar year an amount at least equal to the sum of: (1) 98% of our ordinary income for the calendar year; (2) 98.2% of our capital gains in excess of capital losses for the one-year period ending on October 31 of the calendar year; and, (3) 100% of any ordinary income and net capital gains for preceding years that were not distributed during such years and on which we paid no U.S. federal income tax. In addition, although we currently intend to distribute realized net capital gains (i.e., net long term capital gains in excess of short term capital losses), if any, at least annually, we may in the future decide to retain such capital gains for investment and elect to treat such gains as deemed distributions to you. If this happens, you will be treated as if you had received an actual distribution of the capital gains we retain and reinvested the net after tax proceeds in us. In this situation, you would be eligible to claim a tax credit (or, in certain circumstances, a tax refund) equal to your allocable share of the tax we paid on the capital gains deemed distributed to you. See Material U.S. Federal Income Tax Considerations in the accompanying prospectus. We can offer no assurance that we will achieve results that will permit the payment of any cash distributions and, to the extent that we issue senior securities, we will be prohibited from making distributions if doing

so causes us to fail to maintain the asset coverage ratios stipulated by the 1940 Act or if distributions are limited by the terms of any of our borrowings.

We may make distributions by issuing additional shares of our common stock under our distribution reinvestment plan, unless you elect to receive your dividends and/or long-term capital gains distributions in

S-5

---

## TABLE OF CONTENTS

cash. We reserve the right to purchase shares in the open market in connection with our implementation of the distribution reinvestment plan. See Distribution Reinvestment Plan in the accompanying prospectus. If you hold shares in the name of a broker or financial intermediary, you should contact the broker or financial intermediary regarding your election to receive distributions in cash. We can offer no assurance that we will achieve results that will permit the payment of any cash distributions and, if we issue senior securities, we will be prohibited from making distributions if doing so causes us to fail to maintain the asset coverage ratios stipulated by the 1940 Act or if distributions are limited by the terms of any of our borrowings.

## **Distribution Policy**

Oxford Lane is subject to significant and variable differences between its accounting income under GAAP and its taxable income particularly as it relates to our CLO equity investments. We invest in CLO entities which generally constitute passive foreign investment companies and which are subject to complex tax rules; the calculation of taxable income attributed to a CLO equity investment can be dramatically different from the calculation of income for financial reporting purposes under GAAP. Taxable income is based upon the distributable share of earnings as determined under tax regulations for each CLO equity investment, which may be consistent with the cash flows generated by those investments (although significant differences are possible), while accounting income is currently based upon an effective yield calculation (this requires the calculation of a yield to expected redemption date based upon an estimation of the amount and timing of future cash flows, including recurring cash flows as well as future principal repayments). The Fund's final taxable earnings for the fiscal year ended March 31, 2016 will not be known until our tax returns are filed but our experience has been that cash flows from CLO equity investments have historically represented a generally reasonable estimate of taxable earnings; however, we can offer no assurance that will be the case in the future, particularly during periods of market disruption and volatility. There may be significant differences between Oxford Lane Capital's GAAP earnings and its taxable earnings, particularly related to CLO equity investments where its taxable earnings are based upon the taxable reported earnings provided by the CLO equity positions in which we invest, while GAAP earnings are based upon an effective yield calculation. In general, the Fund currently expects its taxable earnings to be higher than its reportable GAAP earnings.

While reportable GAAP income from our CLO equity investments for the year ended March 31, 2016 was approximately \$57.2 million, we received or were entitled to receive approximately \$87.1 million in distributions from our CLO equity investments. While the tax characterization of our distributions for the fiscal year ended March 31, 2016 will not be known until our tax returns are finalized, we do not expect to have a tax return of capital for this period. In general, we currently expect our annual taxable income to be higher than our GAAP earnings on the basis of the difference between cash distributions from CLO equity investments actually received or entitled to be received and the effective yield income calculated under GAAP. Our distribution policy is based upon our estimate of our taxable net investment income.

## **Oxford Lane Management**

Our investment activities are managed by Oxford Lane Management, which is an investment adviser that has registered under the Investment Advisers Act of 1940, or the Advisers Act. Under our investment advisory agreement with Oxford Lane Management, which we refer to as our Investment Advisory Agreement, we have agreed to pay Oxford Lane Management an annual base management fee based on our gross assets, as well as an incentive fee based on our performance. See Investment Advisory Agreement in the accompanying prospectus.

We expect to benefit from the ability of our investment adviser's team to identify attractive opportunities, conduct diligence on and value prospective investments, negotiate terms where appropriate, and manage and monitor a diversified portfolio although we do not intend to operate as a diversified investment company within the meaning of the 1940 Act. Our investment adviser's senior investment team members have broad investment backgrounds, with prior experience at investment banks, commercial banks, unregistered investment funds and other financial services companies, and have collectively developed a broad network of contacts to provide us with our principal source of investment opportunities.

Our investment adviser is led by Jonathan H. Cohen, our Chief Executive Officer, and Saul B. Rosenthal, our President. Messrs. Cohen and Rosenthal are assisted by Darryl M. Monasebian, Executive Vice President,

S-6

---

## TABLE OF CONTENTS

and Debdeep Maji and Kevin Yonon, who serve as Managing Directors for Oxford Lane Management. We consider Messrs. Cohen, Rosenthal, Monasebian, Maji and Yonon to be Oxford Lane Management's senior investment team.

Messrs. Cohen, Rosenthal, Monasebian, Maji and Yonon together with the other members of Oxford Lane Management's investment team, have developed an infrastructure that we believe provides Oxford Lane Capital with a competitive advantage in locating and acquiring attractive CLO investments.

Charles M. Royce is a non-managing member of Oxford Lane Management. Mr. Royce serves as Chief Executive Officer and a member of the Board of Managers of Royce & Associates, LLC ( Royce & Associates ). He also manages or co-manages ten of Royce & Associates' open- and closed-end registered funds. Mr. Royce currently serves on the Board of Directors of The Royce Funds and TICC Capital Corp. Mr. Royce is also a non-managing member of TICC Management, LLC, the investment adviser for TICC Capital Corp. Mr. Royce, as a non-managing member of Oxford Lane Management, does not take part in the management or participate in the operations of Oxford Lane Management; however, Mr. Royce may be available from time to time to Oxford Lane Management to provide certain consulting services without compensation. Royce & Associates is a wholly owned subsidiary of Legg Mason, Inc.

In addition, we will reimburse BDC Partners, an affiliate of Oxford Lane Management, our allocable portion of overhead and other expenses incurred by BDC Partners in performing its obligations under an administration agreement by and among us and BDC Partners (the Administration Agreement ), including rent, the fees and expenses associated with performing administrative functions, and our allocable portion of the compensation of our Chief Financial Officer and any administrative support staff, including accounting personnel. We will also pay the costs associated with the functions performed by our Chief Compliance Officer under the terms of an agreement between us and Alaric Compliance Services, a compliance consulting firm. These arrangements could create conflicts of interest that our Board of Directors must monitor.

## **Investment Focus**

Our investment objective is to maximize our portfolio's risk-adjusted total return. Our current focus is to seek that return by investing in structured finance investments, specifically the equity and junior debt tranches of CLO vehicles, which are collateralized primarily by a diverse portfolio of Senior Loans, and which generally have very little or no exposure to real estate loans, or mortgage loans or to pools of consumer-based debt, such as credit card receivables or auto loans. Our investment strategy also includes investing in warehouse facilities, which are financing structures intended to aggregate senior loans that may be used to form the basis of a CLO vehicle. As of June 30, 2016, we held debt investments in three different CLO structures and equity investments in 35 different CLO structures. We may also invest, on an opportunistic basis, in a variety of other types of corporate credits.

The CLO investments we currently hold in our portfolio generally represent either a residual economic interest, in the case of an equity tranche, or a debt investment collateralized by a portfolio of Senior Loans. The value of our CLO investments generally depend on both the quality and nature of the underlying portfolio it references and also on the specific structural characteristics of the CLO itself.

## **CLO Structural Elements**

Structurally, CLO vehicles are entities formed to originate and manage a portfolio of loans. The loans within the CLO vehicle are generally limited to loans which meet established credit criteria and are subject to concentration limitations in order to limit a CLO vehicle's exposure to a single credit.

A CLO vehicle is formed by raising multiple tranches of debt (with the most senior tranches being rated AAA to the most junior tranches typically being rated BB or B ) and equity. As interest payments are received the CLO vehicle makes contractual interest payments to each tranche of debt based on their seniority. If there are funds remaining after each tranche of debt receives its contractual interest rate and the CLO vehicle meets or exceeds required collateral coverage levels (or other similar covenants) the remaining funds may be paid to the equity tranche. The contractual provisions setting out this order of payments are set out in detail in the CLO vehicle's indenture. These provisions are referred to as the priority of payments or the waterfall and determine any other obligations that may be required to be paid ahead of payments of interest and principal on the securities issued by a CLO vehicle. In addition, for payments to be

S-7

---

## TABLE OF CONTENTS

made to each tranche, after the most senior tranche of debt, there are various tests which must be complied with, which are different for each CLO vehicle.

CLO indentures typically provide for adjustments to the priority of payments in the event that certain cashflow or collateral requirements are not maintained. The collateral quality tests that may divert cashflows in the priority of payments are predominantly determined by reference to the par values of the underlying loans, rather than their current market values. Accordingly, we believe that CLO equity and junior debt investments allow investors to gain exposure to the Senior Loan market on a levered basis without being structurally subject to mark-to-market price fluctuations of the underlying loans. As such, although the current valuations of CLO equity and junior debt tranches are expected to fluctuate based on price changes within the loan market, interest rate movements and other macroeconomic factors, those tranches will generally be expected to continue to receive distributions from the CLO vehicle periodically so long as the underlying portfolio does not suffer defaults, realized losses or other covenant violations sufficient to trigger changes in the waterfall allocations. We therefore believe that an investment portfolio consisting of CLO equity and junior debt investments of this type has the ability to provide attractive risk-adjusted rates of return.

The diagram below is for illustrative purposes only. The CLO structure highlighted below is only a hypothetical structure and structures among CLO vehicles in which we may invest may vary substantially from the hypothetical example set forth below.

## **The Syndicated Senior Loan Market**

We believe that while the syndicated leveraged corporate loan market is relatively large, with Standard and Poor's estimating the total par value outstanding at approximately \$881 billion as of August 16, 2016, this market remains largely inaccessible to a significant portion of investors that are not lenders or approved institutions. The CLO market permits wider exposure to syndicated Senior Loans, but this market is almost exclusively private and predominantly institutional.

The Senior Loan market is characterized by various factors, including:

***Floating rate instruments.*** A Senior Loan typically contains a floating versus a fixed interest rate, which we believe provides some measure of protection against the risk of interest rate fluctuation. However, all of our CLO investments have many Senior Loans which are subject to interest rate floors and since interest rates on Senior Loans may only reset periodically and the amount of the increase following an interest rate reset may be below the interest rate floors of such Senior Loans, our ability to benefit from rate resets following an increase in interest rates may be limited.

***Frequency of interest payments.*** A Senior Loan typically provides for scheduled interest payments no less frequently than quarterly.

In the current environment, we believe the above attributes seem particularly desirable.

TABLE OF CONTENTS

## Investment Opportunity

We believe that the market for CLO-related assets continues to provide us with the opportunities to generate attractive risk-adjusted returns within our strategies over the long term. We believe that a number of factors support this conclusion, including:

We believe that the long-term and relatively low-cost capital that many CLO vehicles have secured, compared with current asset spreads and associated LIBOR floors have created opportunities to purchase certain CLO equity and junior debt instruments that may produce attractive risk-adjusted returns. Although the senior secured corporate loan market has been volatile recently due in part to the oil and gas and commodities related sectors, this volatility may be beneficial as it has allowed some collateral managers of CLO vehicles to invest in loans at greater discounts to par and at wider loan spreads. Additionally, given that the CLO vehicles we invest in are cash flow-based vehicles, this term financing may be extremely beneficial in periods of market volatility.

We believe that the market to invest in warehouse facilities, which are short and medium-term facilities that are generally expected to form the basis of CLO vehicles (which the Fund may participate in or be repaid by), has created additional attractive risk-adjusted investment opportunities for us.

We believe that investing in CLO securities, and CLO equity instruments and warehouse facilities in particular, requires a high level of research and analysis. We believe that transactions in this market can only be adequately conducted by knowledgeable market participants since this market and these structures tend to be highly specialized. We believe that the U.S. risk retention requirements imposed for CLO managers under Section 941 of the Dodd-Frank Act has created some uncertainty in the market in regards to future CLO issuances. Given that certain CLO managers may require capital provider partners to satisfy this requirement when it becomes effective on December 24, 2016, we believe that this may create additional opportunities (and additional risks) for us in the future.

We believe that the U.S. CLO market is relatively large with total assets under management of approximately \$425 billion.<sup>(1)</sup> We estimate that the amount outstanding of the junior-most debt tranches (specifically the tranches originally rated BB and B ) and equity tranches together are approximately \$70 billion.

We continue to review a large number of CLO investment vehicles in the current market environment, and we expect that the majority of our portfolio holdings, over the near to intermediate-term, will continue to be focused on CLO debt and equity securities, with the more significant focus over the near-term likely to be on CLO equity securities and warehouse facilities.

## Summary Risk Factors

The value of our assets, as well as the market price of our securities, will fluctuate. Our investments may be risky, and you may lose all or part of your investment in us. Investing in Oxford Lane Capital involves other risks, including the following:

Our equity investment distributions from CLO vehicles will likely be materially reduced if three month LIBOR increases;

Our portfolio of investments may lack diversification among CLO vehicles which may subject us to a risk of significant loss if one or more of these CLO vehicles experiences a high level of defaults on its underlying Senior Loans;

The Senior Loan portfolios of the CLO vehicles in which we will invest may be concentrated in a limited number of industries, which may subject those vehicles, and in turn us, to a risk of significant loss if there is a downturn in a particular industry in which a number of our CLO vehicles' investments are concentrated;

1. As of August 3, 2016. Source: Wells Fargo Securities, LLC.

2. Oxford Lane has estimated this amount based on Guggenheim CLO new issue summary, dated July 29, 2016.

S-9

---

TABLE OF CONTENTS

The application of the risk retention rules to CLOs may have broader effects on the CLO and loan markets in general, potentially resulting in fewer or less desirable investment opportunities for the Company.

Our financial results may be affected adversely if one or more of our significant equity or junior debt investments in such CLO vehicles defaults on its payment obligations or fails to perform as we expect;

Investing in CLO vehicles, Senior Loans and other high-yield corporate credits involves a variety of risks, any of which may adversely impact our performance;

The CLO equity market has recently experienced a significant downturn, which has negatively impacted our net asset value per share and, if those reduced values are realized over time, you may not receive dividends or our dividends may decline or may not grow over time;

We have a limited operating history as a closed-end investment company;

Our investment portfolio is recorded at fair value, with our Board of Directors having final responsibility for overseeing, reviewing and approving, in good faith, its estimate of fair value and, as a result, there will be uncertainty as to the value of our portfolio investments;

We are dependent upon Oxford Lane Management's key personnel for our future success;

Our incentive fee structure and the formula for calculating the fee payable to Oxford Lane Management may incentivize Oxford Lane Management to pursue speculative investments, use leverage when it may be unwise to do so, or refrain from de-levering when it would otherwise be appropriate to do so;

A general increase in interest rates may have the effect of making it easier for our investment adviser to receive incentive fees, without necessarily resulting in an increase in our net earnings;

A disruption or downturn in the capital markets and the credit markets could impair our ability to raise capital and negatively affect our business;

Regulations governing our operation as a registered closed-end management investment company affect our ability to raise additional capital and the way in which we do so. The raising of debt capital may expose us to risks, including the typical risks associated with leverage;

We may borrow money and/or issue preferred stock to leverage our portfolio, which would magnify the potential for gain or loss on amounts invested and will increase the risk of investing in us;

We may experience fluctuations in our quarterly results;

We will be subject to corporate-level U.S. federal income tax if we are unable to maintain our RIC status under Subchapter M of the Code;

There is a risk that our stockholders may not receive distributions or that our distributions may not grow or may be reduced over time, including on a per share basis as a result of the dilutive effects of this offering;

Common shares of closed-end management investment companies, including Oxford Lane Capital, have in the past frequently traded at discounts to their net asset values, and we cannot assure you that the market price of shares of our common stock will not decline below our net asset value per share;

Our common stock price may be volatile and may decrease substantially;

Any amounts that we use to service our indebtedness or preferred dividends, or that we use to redeem our preferred stock, will not be available for distributions to our common stockholders;

Our common stock is subject to a risk of subordination relative to holders of our debt instruments and holders of our preferred stock; and

S-10

TABLE OF CONTENTS

## Operating and Regulatory Structure

Oxford Lane Capital is a Maryland corporation that is a non-diversified closed-end management investment company that has registered as an investment company under the 1940 Act. As a registered closed-end fund, we are required to meet regulatory tests. See **Regulation as a Registered Closed-End Investment Company** in the accompanying prospectus. We may also borrow funds to make investments. In addition, we have elected to be treated for U.S. federal income tax purposes, and intend to qualify annually, as a RIC under Subchapter M of the Code. See **Material U.S. Federal Income Tax Considerations** in the accompanying prospectus.

Our investment activities are managed by Oxford Lane Management and supervised by our Board of Directors. Oxford Lane Management is an investment adviser that is registered under the Advisers Act. Under our Investment Advisory Agreement, we have agreed to pay Oxford Lane Management an annual base management fee based on our gross assets as well as an incentive fee based on our performance. See **Investment Advisory Agreement** in the accompanying prospectus. We have also entered into an administration agreement with BDC Partners, which we refer to as the Administration Agreement, under which we have agreed to reimburse BDC Partners for our allocable portion of overhead and other expenses incurred by BDC Partners in performing its obligations under the Administration Agreement, including furnishing us with office facilities, equipment and clerical, bookkeeping and record keeping services at such facilities, as well as providing us with other administrative services. See **Administration Agreement** in the accompanying prospectus.

BDC Partners also serves as the managing member of Oxford Lane Management. Messrs. Cohen and Rosenthal, in turn, serve as the managing member and non-managing member, respectively, of BDC Partners.

## Recent Developments

### Prior Sales Pursuant to the **At the Market** Offering

From March 7, 2016 to August 23, 2016, we sold a total of 474,250 shares of common stock pursuant to this **at the market** offering. The total amount of capital raised as a result of these sales of common stock was approximately \$4.2 million and net proceeds were approximately \$4.0 million after deducting the sales agent's commissions and offering expenses. See **Plan of Distribution**.

### Financial Results as of June 30, 2016

Net asset value per share as of June 30, 2016 was \$8.78 compared with a net asset value per share at March 31, 2016 of \$7.04.

Net investment income, calculated in accordance with GAAP, was approximately \$5.7 million, or \$0.30 per share, for the quarter ended June 30, 2016.

For the quarter ended June 30, 2016, we recorded approximately \$618,000 of non-recurring expenses, or \$0.03 per common share, in conjunction with our preferred share repurchase program.

Our core net investment income ( **Core NII** ) was approximately \$19.5 million, or \$1.04 per share, for the quarter ended June 30, 2016.

Core NII represents net investment income adjusted for additional cash distributions received, or entitled to be received (if any, in either case), on our CLO equity investments. (See additional information under **Supplemental Information Regarding Core Net Investment Income** below).

Total investment income, calculated in accordance with GAAP, amounted to approximately \$12.4 million for the quarter ended June 30, 2016.

- For the quarter ended June 30, 2016, we recorded GAAP investment income from our portfolio as follows:
  - approximately \$12.0 million from our CLO equity investments,
  - approximately \$0.2 million from our CLO debt investments, and

S-12

---

TABLE OF CONTENTS

approximately \$0.2 million from all other sources.

While reportable GAAP earnings from our CLO equity class investments for the three months ended June 30, 2016 was approximately \$12.0 million, we received or were entitled to receive approximately \$25.8 million in distributions from these investments. While our experience has been that cash flows have historically represented our view of a reasonable estimate of CLO equity investment taxable income, we believe there to be significantly less certainty as to the final determination of taxable income with respect to our CLO equity investments in light of recent volatility in the corporate loan market. In general, we currently expect our annual taxable income to be higher than our GAAP earnings on the basis of the difference between cash distributions actually received (and record date distributions to be received) and the effective yield income.

◦ The weighted average GAAP yield of our CLO debt investments at current cost was approximately 8.9% as of June 30, 2016.

◦ The weighted average GAAP effective yield of our CLO equity investments at current cost was approximately 15.4% as of June 30, 2016.

◦ The weighted average cash distribution yield of our cash income producing CLO equity investments at current cost was approximately 33.9% as of June 30, 2016.

Net increase in net assets from operations was approximately \$44.0 million, or \$2.34 per share, for the quarter ended June 30, 2016, including:

- Net investment income of approximately \$5.7 million;
- Net realized losses of approximately \$3.3 million; and
- Net unrealized appreciation of approximately \$41.6 million.

During the quarter ended June 30, 2016 we made additional CLO equity investments of approximately \$20.5 million.

◦ Also, during the quarter ended June 30, 2016, we sold approximately \$21.0 million of our investments.

During the quarter ended June 30, 2016, we issued a total of 54,975 shares of common stock pursuant to an at the market offering, resulting in net proceeds of approximately \$458,000.

For the quarter ended June 30, 2016, we repurchased 609,537 shares of our Series 2023 Term Preferred Stock and 2,712 shares of our Series 2024 Term Preferred Stock pursuant to a previously announced Preferred Stock Repurchase Program. We currently have 3,016,001 shares of our Series 2023 Term Preferred Stock and 2,018,879 shares of our Series 2024 Term Preferred Stock issued and outstanding. In connection with the repurchased Series 2023 Term Preferred Shares and Series 2024 Term Preferred Shares, we recognized as interest expense a net extinguishment loss of approximately \$618,000, consisting of previously unamortized issuance costs of approximately \$492,000 and repurchases at a premium to par of approximately \$126,000.

Our Board of Directors declared a distribution for the quarter ending September 30, 2016 of \$0.60 per common share.

Record date is September 16, 2016

Payable on September 30, 2016

Our Board of Directors has also declared the required monthly dividends on our Series 2023 Term Preferred Shares and Series 2024 Term Preferred Shares (each, a Share ), as follows:

	Per Share Dividend Amount Declared	2016 Record Dates	2016 Payable Dates
Series 2023	\$0.15625	September 16, October 14, November 16	September 30, October 28, November 30
Series 2024	\$0.16930	September 16, October 14, November 16	September 30, October 28, November 30

TABLE OF CONTENTS

In accordance with their terms, each of the Series 2023 Shares and Series 2024 Shares will pay a monthly dividend at a fixed rate of 7.50% and 8.125%, respectively, of the \$25.00 per share liquidation preference, or \$1.875 and \$2.03125 per share per year, respectively. This fixed annual dividend rate is subject to adjustment under certain circumstances, but will not in any case be lower than 7.50% and 8.125% per year, respectively, for each of the Series 2023 Shares and Series 2024 Shares.

**Supplemental Information Regarding Core Net Investment Income**

On a supplemental basis, we provide information relating to core net investment income, which is a non-GAAP measure. This measure is provided in addition to, but not as a substitute for, net investment income. Our non-GAAP measure may differ from similar measures by other companies, even if similar terms are used to identify such measures. Core net investment income represents net investment income adjusted for additional cash distributions received, or entitled to be received (if any, in either case), on our CLO equity investments.

Income from investments in the equity class securities of CLO vehicles, for GAAP purposes, is recorded using the effective interest method based upon an effective yield to the expected redemption utilizing estimated cash flows, compared to the cost resulting in an effective yield for the investment; the difference between the actual cash received or distributions entitled to be received and the effective yield calculation is an adjustment to cost. Accordingly, investment income recognized on CLO equity securities in the GAAP statement of operations differs from the cash distributions actually received by us during the period (referred to below as CLO equity additional distributions).

Further, as the RIC requirements are to distribute taxable earnings, core net investment income may provide a better indication of estimated taxable income for a reporting period than does GAAP net investment income, although we can offer no assurance that will be the case as the ultimate tax character of our earnings cannot be determined until tax returns are prepared after the end of a fiscal year. We note that these non-GAAP measures may not be useful indicators of taxable earnings, particularly during periods of market disruption and volatility.

The following table provides a reconciliation of net investment income to Core NII for the three months ended June 30, 2016:

Three Months Ended  
June 30, 2016

	Amount	Per Share Amounts
Net investment income	\$ 5,666,503	\$ 0.30
CLO equity additional distributions	13,835,449	0.74
Core net investment income	\$ 19,501,952	\$ 1.04

**Our Corporate Information**

Our offices are located at 8 Sound Shore Drive, Suite 255, Greenwich, CT 06830, and our telephone number is (203) 983-5275.

TABLE OF CONTENTS

## THE OFFERING

Common stock offered by us

Shares of our common stock having an aggregate offering price of up to \$25,000,000.

Common stock outstanding as of August 23, 2016

18,806,671 shares

Manner of offering

At the market offering that may be made from time to time through Ladenburg Thalmann & Co. Inc., as sales agent using commercially reasonable efforts. See Plan of Distribution.

Use of proceeds

We intend to use the net proceeds from this offering for acquiring investments in accordance with our investment objective and strategies described in this prospectus supplement, possibly repurchasing our outstanding preferred stock and for general working capital purposes. Pending these uses, we will invest such net proceeds primarily in cash, cash equivalents, and U.S. government securities or other high-quality debt investments that mature in one year or less from the date of investment. The management fee payable by us to our investment adviser will not be reduced while our assets are invested in such securities. See Use of Proceeds.

Distribution

To the extent that we have income available, we intend to distribute quarterly distributions to our stockholders. The amount of our distributions, if any, will be determined by our Board of Directors. Any distributions to our stockholders will be declared out of assets legally available for distribution. See Price Range of Common Stock and Distributions in the accompanying prospectus.

Taxation

We have elected to be treated for federal income tax purposes as a RIC under Subchapter M of the Code. As a RIC, we generally do not have to pay corporate-level federal income taxes on any ordinary income or capital gains that we distribute to our stockholders as dividends. To maintain our RIC tax status, we must meet specified source-of-income and asset diversification requirements and distribute annually at least 90% of our ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any. See Price Range of Common Stock and Distributions in the accompanying prospectus and Material U.S. Federal Income Tax Considerations in the accompanying prospectus.

NASDAQ Global Select Market symbol of common stock

OXLC

Risk factors

An investment in our common stock is subject to risks and involves a heightened risk of total loss of investment. In addition, the companies in which we invest are subject to special risks. See Risk Factors beginning on page 21 of the accompanying prospectus to read about factors you should consider, including the risk of leverage, before investing in our common stock.

S-15

---

TABLE OF CONTENTS**FEES AND EXPENSES**

The following table is intended to assist you in understanding the costs and expenses that you will bear directly or indirectly. We caution you that some of the percentages indicated in the table below are estimates and may vary. Except where the context suggests otherwise, whenever this prospectus supplement and the accompanying prospectus contains a reference to fees or expenses paid by us or Oxford Lane Capital, or that we will pay fees or expenses, you will indirectly bear such fees or expenses as an investor in Oxford Lane Capital Corp.

Stockholder transaction expenses:	
Sales load (as a percentage of offering price)	2.00 % <sup>(1)</sup>
Offering expenses borne by us (as a percentage of offering price)	0.74 % <sup>(2)</sup>
Distribution reinvestment plan expenses	None <sup>(3)</sup>
Total stockholder transaction expenses (as a percentage of offering price)	2.74 %
Annual expenses (as a percentage of net assets attributable to common stock):	
Base management fee	3.27 % <sup>(4)</sup>
Incentive fees payable under our investment advisory agreement (20% of net investment income)	3.46 % <sup>(5)</sup>
Interest payments on borrowed funds	0.00 % <sup>(6)</sup>
Preferred stock dividend payment	5.13 % <sup>(7)</sup>
Other expenses (estimated)	1.09 % <sup>(8)</sup>
Acquired fund fees and expenses	22.27 % <sup>(9)</sup>
Total annual expenses (estimated)	35.22 %

**Example**

The following example demonstrates the projected dollar amount of total cumulative expenses that would be incurred over various periods with respect to a hypothetical investment in our common stock. In calculating the following expense amounts, we have assumed that our annual operating expenses would remain at the levels set forth in the table above, and that we pay the transaction expenses set forth in the table above, including a sales load of 2.00% paid by you (the commission to be paid by us with respect to common stock sold by us in this offering).

	1 Year	3 Years	5 Years	10 Years
You would pay the following expenses on a \$1,000 investment, assuming a 5% annual return	\$ 336	\$ 681	\$ 836	\$ 946

**The example and the expenses in the tables above should not be considered a representation of our future expenses, and actual expenses may be greater or less than those shown.** While the example assumes, as required by the SEC, a 5.0% annual return, our performance will vary and may result in a return greater or less than 5.0%. The incentive fee under the Investment Advisory Agreement, which, assuming a 5.0% annual return, would either not be payable or would have an insignificant impact on the expense amounts shown above, is included in the example. Also, while the example assumes reinvestment of all distributions at net asset value, participants in our distribution reinvestment plan will receive a number of shares of our common stock, determined by dividing the total dollar amount of the distribution payable to a participant by the market price per share of our common stock at the close of trading on the distribution payment date, which may be at, above or below net asset value. See Distribution Reinvestment Plan for additional information regarding our distribution reinvestment plan.

- Represents the commission with respect to the shares of our common stock being sold in this offering, which we will pay to Ladenburg Thalmann & Co. Inc. in connection with sales of shares of our common stock effected by
- (1) Ladenburg Thalmann & Co. Inc. under the equity distribution agreement. There is no guaranty that there will be any sales of our common stock pursuant to this prospectus supplement and the accompanying prospectus.
- (2) The offering expenses of this offering are estimated to be approximately \$185,000.

S-16

---

TABLE OF CONTENTS

- (3) The expenses of the distribution reinvestment plan are included in other expenses. Assumes gross assets of \$310.6 million and \$125.9 million of leverage, which reflects \$125.9 million of preferred stock issued and outstanding as of June 30, 2016, and assumes net assets of \$190.1 million (which has been adjusted to reflect the issuance of an additional \$25.0 million of common stock). The above calculation presents our base management fee as a percentage of our net assets. Our base management fee under the Investment Advisory Agreement, however, is based on our gross assets, which is defined as all the assets of Oxford Lane Capital, including those acquired using borrowings for investment purposes. As a result, to the extent we use additional leverage, it would have the effect of increasing our base management fee as a percentage of our net assets. See Investment Advisory Agreement in the accompanying prospectus.
- (4) Amount reflects the estimated annual incentive fees payable to our investment adviser, Oxford Lane Management, during the fiscal year following this offering. The estimate assumes that the incentive fee earned will be proportional to the fee earned during the quarter ended June 30, 2016. Based on our current business plan, we anticipate that substantially all of the net proceeds of this offering will be invested within three months after completion of this offering depending on the availability of investment opportunities that are consistent with our investment objective and other market conditions and/or to meet working capital needs. We expect that it will take up to three months to invest all of the proceeds of this offering, in part because equity and junior debt investments in CLO vehicles require substantial due diligence prior to investment.
- (5) The incentive fee, which is payable quarterly in arrears, equals 20.0% of the excess, if any, of our Pre-Incentive Fee Net Investment Income that exceeds a 1.75% quarterly (7.0% annualized) hurdle rate, which we refer to as the Hurdle, subject to a catch-up provision measured at the end of each calendar quarter. The incentive fee is computed and paid on income that may include interest that is accrued but not yet received in cash. The operation of the incentive fee for each quarter is as follows:

no incentive fee is payable to our investment adviser in any calendar quarter in which our Pre-Incentive Fee Net Investment Income does not exceed the Hurdle of 1.75%;

100% of our Pre-Incentive Fee Net Investment Income with respect to that portion of such Pre-Incentive Fee Net Investment Income, if any, that exceeds the Hurdle but is less than 2.1875% in any calendar quarter (8.75% annualized) is payable to our investment adviser. We refer to this portion of our Pre-Incentive Fee Net Investment Income (which exceeds the Hurdle but is less than 2.1875%) as the catch-up. The catch-up is meant to provide our investment adviser with 20.0% of our Pre-Incentive Fee Net Investment Income, as if a Hurdle did not apply when our Pre-Incentive Fee Net Investment Income exceeds 2.1875% in any calendar quarter; and

20.0% of the amount of our Pre-Incentive Fee Net Investment Income, if any, that exceeds 2.1875% in any calendar quarter (8.75% annualized) is payable to our investment adviser (once the Hurdle is reached and the catch-up is achieved, 20.0% of all Pre-Incentive Fee Investment Income thereafter is allocated to our investment adviser).

No incentive fee is payable to our investment adviser on realized capital gains. For a more detailed discussion of the calculation of this fee, see Investment Advisory Agreement in the accompanying prospectus.

Assumes that we maintain our current level of no outstanding borrowings as of June 30, 2016 other than preferred stock, which is considered a form of leverage. We may issue additional shares of preferred stock pursuant to the registration statement of which this prospectus forms a part. In the event we were to issue additional preferred stock, our borrowing costs, and correspondingly our total annual expenses, including our base management fee as a percentage of our net assets, would increase. See also note 7 below.

Assumes that we continue to have an aggregate of \$75.4 million of preferred stock with a preferred rate of 7.50% per annum, and an aggregate of \$50.5 million of preferred stock with a preferred rate of 8.125% per annum, which were the amounts outstanding as of June 30, 2016.

S-17

TABLE OF CONTENTS

(8). Other expenses (\$2.1 million) assumes that other expenses for the year will be proportional to other expenses incurred during the quarter ended June 30, 2016.

Reflects the estimated annual collateral manager fees that will be indirectly incurred by us in connection with our investments in CLO equity tranches during the twelve months following the date of this prospectus supplement, assuming the CLO equity investments held as of June 30, 2016 and net assets of \$190.1 million. Collateral manager fees are charged on the total assets of the CLO vehicle, including the assets acquired with borrowed funds, but are assumed to be paid from the residual cash flows after interest payments to the senior debt tranches. Therefore, these collateral manager fees (which are generally 0.40% to 0.50% of total assets) are effectively much higher when allocated only to the equity tranches. The debt tranches that we hold generally are not deemed to pay (9) any such collateral manager fees. The calculation also includes operating expense ratios of the CLO vehicles of approximately 0.5%. These are only estimates of such operating expenses, as we generally do not have specific expense information on the CLO vehicles in which we invest and the actual amount of such expenses may be significantly different. Operating expenses of CLO vehicles are not routinely reported to shareholders on a basis consistent with the methodology employed for other estimates. As a result of our investments in such CLO equity investments, our stockholders will be required to pay two levels of fees and expenses in connection with their investment in our common stock, including fees payable under our Investment Advisory Agreement and fees and expenses charged to us on the CLO equity tranches in which we are invested.

TABLE OF CONTENTS

## CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This prospectus supplement and the accompanying prospectus contain forward-looking statements that involve substantial risks and uncertainties. These forward-looking statements are not historical facts, but rather are based on current expectations, estimates and projections about our company, our current and prospective portfolio investments, our industry, our beliefs, and our assumptions. Words such as anticipates, expects, intends, plans, will, may, believes, seeks, estimates, would, could, should, targets, projects, and variations of these words and expressions are intended to identify forward-looking statements.

The forward-looking statements contained in this prospectus supplement and the accompanying prospectus involve risks and uncertainties, including statements as to:

- our future operating results;
- our business prospects and the prospects of a CLO vehicle's portfolio companies;
- the impact of investments that we expect to make;
- our contractual arrangements and relationships with third parties;
- the dependence of our future success on the general economy and its impact on the industries in which we invest;
- the ability of a CLO vehicle's portfolio companies to achieve their objectives;
- our expected financings and investments;
- the adequacy of our cash resources and working capital; and
- the timing of cash flows, if any, from our investments.

These statements are not guarantees of future performance and are subject to risks, uncertainties, and other factors, some of which are beyond our control and difficult to predict and could cause actual results to differ materially from those expressed or forecasted in the forward-looking statements, including without limitation:

- an economic downturn could impair the ability of a CLO vehicle's portfolio companies to continue to operate, which could lead to the loss of some or all of our investment in such CLO vehicle;
- a contraction of available credit and/or an inability to access the equity markets could impair our investment activities;
- interest rate volatility could adversely affect our results, particularly if we elect to use leverage as part of our investment strategy;
- currency fluctuations could adversely affect the results of our investments in foreign companies, particularly to the extent that we receive payments denominated in foreign currency rather than U.S. dollars; and
- the risks, uncertainties and other factors we identify in Risk Factors in the accompanying prospectus and elsewhere in this prospectus supplement, the accompanying prospectus and in our filings with the SEC.

Although we believe that the assumptions on which these forward-looking statements are based are reasonable, any of those assumptions could prove to be inaccurate, and as a result, the forward-looking statements based on those assumptions also could be inaccurate. Important assumptions include our ability to originate new loans and investments, certain margins and levels of profitability and the availability of additional capital. In light of these and other uncertainties, the inclusion of a projection or forward-looking statement in this prospectus supplement or the accompanying prospectus should not be regarded as a representation by us that our plans and objectives will be achieved. These risks and uncertainties include those described or identified in Risk Factors in the accompanying prospectus and elsewhere in this prospectus supplement and the accompanying prospectus. You should not place undue reliance on these forward-looking

TABLE OF CONTENTS

statements, which apply only as of the respective dates of this prospectus supplement and the accompanying prospectus. However, we will update this prospectus supplement and the accompanying prospectus to reflect any material changes to the information contained herein. The forward-looking statements contained in this prospectus supplement and the accompanying prospectus are excluded from the safe harbor protection provided by Section 27A of the Securities Act of 1933, as amended, or the Securities Act.

TABLE OF CONTENTS

## USE OF PROCEEDS

Sales of our common stock, if any, under this prospectus supplement and the accompanying prospectus may be made in negotiated transactions or transactions that are deemed to be at the market, as defined in Rule 415 under the Securities Act, including sales made directly on the NASDAQ Global Select Market or similar securities exchange or sales made to or through a market maker other than on an exchange, at prices related to the prevailing market prices or at negotiated prices. There is no guarantee that there will be any sales of our common stock pursuant to this prospectus supplement and the accompanying prospectus. Actual sales, if any, of our common stock under this prospectus supplement and the accompanying prospectus may be less than the amount set forth in this paragraph depending on, among other things, the market price of our common stock at the time of any such sale. As a result, the actual net proceeds we receive may be more or less than the amount of net proceeds estimated in this prospectus supplement. However, the sales price per share of our common stock offered by this prospectus supplement and the accompanying prospectus, less Ladenburg Thalmann & Co. Inc.'s commission, will not be less than the net asset value per share of our common stock at the time of such sale. If we sell shares of our common stock with an aggregate offering price of \$25 million, we anticipate that our net proceeds, after deducting sales agent commissions and estimated expenses payable by us, will be approximately \$24.3 million.

From March 7, 2016 to August 23, 2016, we sold a total of 474,250 shares of common stock pursuant to this at the market offering. The total amount of capital raised as a result of these sales of common stock was approximately \$4.2 million and net proceeds were approximately \$4.0 million after deducting the sales agent's commissions and offering expenses. See Plan of Distribution.

We intend to use the net proceeds from the sale of our securities pursuant to this prospectus supplement for acquiring investments in accordance with our investment objective and strategies described in this prospectus supplement, possibly repurchasing our outstanding preferred stock and for general working capital purposes. Based on our current business plan, we anticipate that substantially all of the net proceeds of this offering will be invested within three months after completion of this offering depending on the availability of investment opportunities that are consistent with our investment objective and other market conditions. We expect that it will take approximately one to three months to invest all of the proceeds of this offering, in part because equity and junior debt investments in CLO vehicles require substantial due diligence prior to investment. We may also pay operating expenses, including advisory and administrative fees and expenses, and may pay other expenses such as due diligence expenses of potential new investments, from the net proceeds of this offering.

Pending such investments, we will invest the net proceeds primarily in cash, cash equivalents, U.S. government securities and other high-quality investments that mature in one year or less from the date of investment. The management fee payable by us will not be reduced while our assets are invested in such securities. See Regulation as a Closed-End Investment Company Temporary Investments in the accompanying prospectus for additional information about temporary investments we may make while waiting to make longer-term investments in pursuit of our investment objective.

TABLE OF CONTENTS

## **PLAN OF DISTRIBUTION**

Ladenburg Thalmann & Co. Inc. is acting as our sales agent in connection with the offer and sale of shares of our common stock pursuant to this prospectus supplement and the accompanying prospectus. Upon written instructions from us, Ladenburg Thalmann & Co. Inc. will use its commercially reasonable efforts consistent with its sales and trading practices to sell, as our sales agent, our common stock under the terms and subject to the conditions set forth in our equity distribution agreement with Ladenburg Thalmann & Co. Inc. dated March 7, 2016. We will instruct Ladenburg Thalmann & Co. Inc. as to the amount of common stock to be sold by it. We may instruct Ladenburg Thalmann & Co. Inc. not to sell common stock if the sales cannot be effected at or above the price designated by us in any instruction. The sales price per share of our common stock offered by this prospectus supplement and the accompanying prospectus, less Ladenburg Thalmann & Co. Inc.'s commission, will not be less than the net asset value per share of our common stock at the time of such sale. We or Ladenburg Thalmann & Co. Inc. may suspend the offering of shares of common stock upon proper notice and subject to other conditions.

Sales of our common stock, if any, under this prospectus supplement and the accompanying prospectus may be made in negotiated transactions or transactions that are deemed to be at the market, as defined in Rule 415 under the Securities Act, including sales made directly on the NASDAQ Global Select Market or similar securities exchange or sales made to or through a market maker other than on an exchange at prices related to the prevailing market prices or at negotiated prices.

Ladenburg Thalmann & Co. Inc. will provide written confirmation of a sale to us no later than the opening of the trading day on the NASDAQ Global Select Market following each trading day in which shares of our common stock are sold under the equity distribution agreement. Each confirmation will include the number of shares of common stock sold on the preceding day, the net proceeds to us and the compensation payable by us to Ladenburg Thalmann & Co. Inc. in connection with the sales.

Ladenburg Thalmann & Co. Inc. will receive a commission from us equal to the lesser of (i) 2.0% of the gross sales price per share from such sale and (ii) the difference between the gross sale price per share from such sale and our most recently determined net asset value per share, with respect to any shares of our common stock sold through Ladenburg Thalmann & Co. Inc. under the equity distribution agreement. We estimate that the total expenses for the offering, excluding compensation payable to Ladenburg Thalmann & Co. Inc. under the terms of the equity distribution agreement, will be approximately \$185,000. In addition to the commission payable to Ladenburg Thalmann & Co. Inc., we have agreed to reimburse Ladenburg Thalmann & Co. Inc. for its reasonable out-of-pocket expenses, including fees and disbursements of counsel, incurred by Ladenburg Thalmann & Co. Inc. in connection with this offering; provided that such reimbursements shall not exceed \$50,000.

Settlement for sales of shares of common stock will occur on the third trading day following the date on which such sales are made, or on some other date that is agreed upon by us and Ladenburg Thalmann & Co. Inc. in connection with a particular transaction, in return for payment of the net proceeds to us. There is no arrangement for funds to be received in an escrow, trust or similar arrangement.

We will report at least quarterly the number of shares of our common stock sold through Ladenburg Thalmann & Co. Inc. under the equity distribution agreement and the net proceeds to us.

In connection with the sale of the common stock on our behalf, Ladenburg Thalmann & Co. Inc. may be deemed to be an underwriter within the meaning of the Securities Act, and the compensation of Ladenburg Thalmann & Co. Inc. may be deemed to be underwriting commissions or discounts. We have agreed to provide indemnification and

contribution to Ladenburg Thalmann & Co. Inc. against certain civil liabilities, including liabilities under the Securities Act.

The offering of our shares of common stock pursuant to the equity distribution agreement will terminate upon the earlier of (i) the sale of the dollar amount of common stock subject to the equity distribution agreement or (ii) the termination of the equity distribution agreement. The equity distribution agreement may be terminated by us in our sole discretion under the circumstances specified in the equity distribution

S-22

---

TABLE OF CONTENTS

agreement by giving notice to Ladenburg Thalmann & Co. Inc.. In addition, Ladenburg Thalmann & Co. Inc. may terminate the equity distribution agreement under the circumstances specified in the equity distribution agreement by giving notice to us.

## **Potential Conflicts of Interest**

Ladenburg Thalmann & Co. Inc. and its affiliates have provided, or may in the future provide, various investment banking, commercial banking, financial advisory, brokerage and other services to us and our affiliates for which services they have received, and may in the future receive, customary fees and expense reimbursement. In connection with our initial public offering of common stock, which was consummated on January 25, 2011, Ladenburg Thalmann & Co. Inc. served as the sole book running manager. We paid underwriting discounts and commissions of \$2,555,000 to the underwriters. In connection with our rights offering consummated in August 2011, Ladenburg Thalmann & Co. Inc. served as dealer manager, and we paid fees of \$355,163 to Ladenburg Thalmann & Co. Inc. In connection with our rights offering consummated in April 2012, Ladenburg Thalmann & Co. Inc. served as co-dealer manager, and we paid fees of an aggregate of \$1,379,549 to the co-dealer managers. In connection with our Series 2017 Term Preferred Shares offering consummated in November 2012, Ladenburg Thalmann & Co. Inc. served as joint book-running manager, and we paid fees of an aggregate of \$711,506 to the joint book-running managers. In connection with our rights offering consummated in February 2013, Ladenburg Thalmann & Co. Inc. served as dealer manager, and we paid fees of an aggregate of \$1,462,805 to the dealer manager. In connection with our preferred stock offering consummated in June 2013, Ladenburg Thalmann & Co. Inc. served as joint book-running manager, and we paid fees of an aggregate of \$862,000 to the joint book-running managers. In connection with our 2013 at the market offering, which commenced in August 2013, Ladenburg Thalmann & Co. Inc. served as our sales agent, and we agreed to pay Ladenburg Thalmann & Co. Inc. a commission equal to 2.0% of the gross sales price of any shares of our common stock sold through Ladenburg Thalmann & Co. Inc. pursuant to such offering and to reimburse Ladenburg Thalmann & Co. Inc. up to \$50,000 for reasonable out-of-pocket expenses. No sales were made pursuant to our 2013 at the market offering. In connection with our preferred stock offering consummated in November 2013, Ladenburg Thalmann & Co. Inc. served as joint book-running manager, and we paid fees of an aggregate of \$1,590,993 to the joint book-running managers. In connection with our rights offering that expired on March 3, 2014, Ladenburg Thalmann & Co. Inc. served as co-dealer manager, and we paid fees of an aggregate of \$2,734,534 to the co-dealer managers. In connection with our common stock offering consummated in March 2014, Ladenburg Thalmann & Co. Inc. served as joint book-running manager, and we paid fees of an aggregate of \$930,000 to the joint book-running managers. In connection with our preferred stock offering consummated in May 2014, Ladenburg Thalmann & Co. Inc. served as joint book-running manager, and we paid fees of an aggregate of \$1,070,000 to the joint book-running managers. In connection with our at the market offering consummated in August 2014, Ladenburg Thalmann & Co. Inc. served as our sales agent, we have agreed to pay Ladenburg Thalmann & Co. Inc. a commission equal to 2.0% of the gross sales price of any shares of our common stock sold through Ladenburg Thalmann & Co. Inc. pursuant to such offering and to reimburse Ladenburg Thalmann & Co. Inc. up to \$50,000 for reasonable out-of-pocket expenses. In connection with our preferred stock offering in September 2014, Ladenburg Thalmann & Co. Inc. served as a financial advisor, and we paid fees of an aggregate of \$61,250 to Ladenburg Thalmann & Co. Inc. In connection with our preferred stock offering in November 2014, Ladenburg Thalmann & Co. Inc. served as joint book-running manager, and we paid fees of an aggregate of \$1,000,000 to the joint book-running managers. In connection with our common stock offering in June 2015, Ladenburg Thalmann & Co. Inc. served as joint book-running manager, and we paid fees of an aggregate of \$1,008,000 to the joint book-running managers. In connection with our Series 2023 Term Preferred Shares offering consummated in June 2015, Ladenburg Thalmann & Co. Inc. served as joint book-running manager, and we paid fees of an aggregate of \$1,200,000 to the joint book-running managers. In connection with this at the market offering consummated in March 2016, Ladenburg Thalmann & Co. Inc. is serving as our sales agent, we have agreed to pay Ladenburg Thalmann & Co. Inc. a commission equal to 2.0% of the gross sales price of any shares

of our common stock sold through Ladenburg Thalmann & Co. Inc. pursuant to such offering and to reimburse Ladenburg Thalmann & Co. Inc. up to \$50,000 for reasonable out-of-pocket expenses. In connection with this at the market offering from March 7, 2016 to August 23, 2016 we paid fees of an aggregate of \$85,000 to Ladenburg Thalmann & Co. Inc.

## TABLE OF CONTENTS

Ladenburg Thalmann & Co. Inc. and its affiliates may, from time to time, engage in transactions with and perform services for us in the ordinary course of their business for which they may receive customary fees and reimbursement of expenses. In the ordinary course of their various business activities, Ladenburg Thalmann & Co. Inc. and its affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers and such investment and securities activities may involve securities and/or instruments of our company. Ladenburg Thalmann & Co. Inc. and its affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or instruments and may at any time hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

The principal business address of Ladenburg Thalmann & Co. Inc. is 570 Lexington Avenue, 12th Floor, New York, NY 10022.

## **LEGAL MATTERS**

Certain legal matters in connection with the securities offered hereby will be passed upon for us by Sutherland Asbill & Brennan LLP, Washington, DC. Certain legal matters in connection with the offering will be passed upon for the sales agent by Blank Rome LLP, New York, New York.

## **EXPERTS**

The statement of assets and liabilities, including the schedule of investments, as of March 31, 2016, the related statements of operations and of cash flows for the year then ended, the statement of changes in net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended included in the accompanying prospectus have been so included in reliance on the report of PricewaterhouseCoopers LLP, an independent registered public accounting firm, given on the authority of said firm as experts in auditing and accounting.

## **AVAILABLE INFORMATION**

We have filed with the SEC a registration statement on Form N-2 together with all amendments and related exhibits under the Securities Act. The registration statement contains additional information about us and the securities being offered by this prospectus supplement and the accompanying prospectus.

We are required to file with or submit to the SEC annual, semi-annual and quarterly reports, proxy statements and other information meeting the informational requirements of the Exchange Act. You may inspect and copy these reports, proxy statements and other information, as well as the registration statement and related exhibits and schedules, at the Public Reference Room of the SEC at 100 F Street, NE, Washington, D.C. 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains an Internet site that contains reports, proxy and information statements and other information filed electronically by us with the SEC which are available on the SEC's website at <http://www.sec.gov>. Copies of these reports, proxy and information statements and other information may be obtained, after paying a duplicating fee, by electronic request at the following e-mail address: [publicinfo@sec.gov](mailto:publicinfo@sec.gov), or by writing to the SEC's Public Reference Section, Washington, D.C. 20549. This information is also available free of charge by contacting us at Oxford Lane Capital Corp., 8 Sound Shore Drive, Suite 255, Greenwich, CT 06830, by telephone at (203) 983-5275, or on our

TABLE OF CONTENTS

**Oxford Lane Capital Corp.**

**Common Stock  
Preferred Stock  
Subscription Rights  
Debt Securities**

We are a non-diversified, closed-end management investment company that has registered as an investment company under the Investment Company Act of 1940, or the 1940 Act. Our investment objective is to maximize our portfolio risk-adjusted total return. We have implemented our investment objective by purchasing portions of equity and junior debt tranches of collateralized loan obligation ( CLO ) vehicles. Structurally, CLO vehicles are entities formed to originate and manage a portfolio of loans.

**An investment in our securities is subject to significant risks and involves a heightened risk of total loss of investment. The price of shares of our common stock may be highly volatile and our common stock may frequently trade at a discount to our net asset value. In addition, the residual interests of the CLO securities in which we invest are subject to a high degree of special risks, including: CLO structures are extremely complicated and may be subject to disadvantageous tax treatment; CLO vehicles are highly levered and are made up of below investment grade loans in which we typically have a residual interest that is much riskier than the loans that make up the CLO vehicle; and the market price for CLO vehicles may fluctuate dramatically (including dramatic declines during certain periods in 2015 and 2016), which may make portfolio valuations unreliable and negatively impact our net asset value and our ability to make distributions to our stockholders. See Risk Factors beginning on page 21 to read about factors you should consider, including the risk of leverage, before investing in our securities.**

We may offer, from time to time, in one or more offerings or series, up to \$500,000,000 of our common stock, preferred stock, subscription rights to purchase shares of our common stock or debt securities, which we refer to, collectively, as our securities. The preferred stock and subscription rights offered hereby may be convertible or exchangeable into shares of our common stock. The securities may be offered at prices and on terms to be described in one or more supplements to this prospectus.

In the event we offer common stock, the offering price per share of our common stock less any underwriting discounts or commissions will generally not be less than the net asset value per share of our common stock at the time we make the offering. However, we may issue shares of our common stock pursuant to this prospectus at a price per share that is less than our net asset value per share (i) in connection with a rights offering to our existing stockholders, (ii) with the prior approval of the majority of our common stockholders or (iii) under such other circumstances as the Securities and Exchange Commission ( SEC ) may permit.

Our securities may be offered directly to one or more purchasers, or through agents designated from time to time by us, or to or through underwriters or dealers. Each prospectus supplement relating to an offering will identify any agents or underwriters involved in the sale of our securities, and will disclose any applicable purchase price, fee, discount or commissions arrangement between us and our agents or underwriters or among our underwriters or the basis upon which such amount may be calculated. See Plan of Distribution. We may not sell any of our securities through agents, underwriters or dealers without delivery of this prospectus and a prospectus supplement describing the method and terms of the offering of such securities.

**Our common stock is traded on the NASDAQ Global Select Market under the symbol OXLC. On August 17, 2016, the last reported sales price on the NASDAQ Global Select Market for our common stock was \$10.95 per share. Our Series 2023 Term Preferred Shares and our Series 2024 Term Preferred Shares are also traded on the NASDAQ Global Select Market under the symbols OXLCO and OXLGN, respectively. On August 17, 2016, the last reported sales prices on the NASDAQ Global Select Market of our Series 2023 Term Preferred Shares and our Series 2024 Term Preferred Shares were \$25.73 and \$25.80 per share, respectively. We are required to determine the net asset value per share of our common stock on a quarterly basis. Our net asset value per share of our common stock as of June 30, 2016 was \$8.78.**

This prospectus and any accompanying prospectus supplement contains important information about us that a prospective investor should know before investing in our securities. Please read this prospectus and any accompanying prospectus supplement before investing and keep it for future reference. We are required to file annual, semi-annual and quarterly reports, proxy statements and other information about us with the Securities and Exchange Commission, or the SEC. This information is available free of charge by contacting us by mail at 8 Sound Shore Drive, Suite 255, Greenwich, CT 06830, by telephone at (203) 983-5275 or on our website at <http://www.oxfordlanecapital.com>. The SEC also maintains a website at <http://www.sec.gov> that contains such information. Information contained on our website is not incorporated by reference into this prospectus, and you should not consider that information to be part of this prospectus.

Neither the SEC nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

This prospectus may not be used to consummate sales of our securities unless accompanied by a prospectus supplement. This prospectus and any accompanying prospectus supplement will together constitute the prospectus for an offering of the Company's securities.

The date of this prospectus is August 23, 2016.

TABLE OF CONTENTS

## **ABOUT THIS PROSPECTUS**

This prospectus is part of a registration statement that we have filed with the SEC, using the shelf registration process. Under the shelf registration process, we may offer, from time to time, in one or more offerings up to \$500,000,000 of our common stock, preferred stock, subscription rights to purchase shares of our common stock or debt securities, on terms to be determined at the time of the offering. The securities may be offered at prices and on terms described in one or more supplements to this prospectus. This prospectus provides you with a general description of the securities that we may offer. Each time we use this prospectus to offer securities, we will provide a prospectus supplement that will contain specific information about the terms of that offering. The prospectus supplement may also add, update or change information contained in this prospectus. If there is any inconsistency between information in this prospectus and any accompanying prospectus supplement, you should rely only on the information contained in the prospectus supplement. Please carefully read this prospectus and the prospectus supplement together with any exhibits and the additional information described under the headings **Available Information** and **Risk Factors** before you make an investment decision.

TABLE OF CONTENTS

## SUMMARY

*The following summary contains basic information about this offering. It may not contain all the information that is important to an investor. For a more complete understanding of this offering, you should read this entire document and the documents to which we have referred.*

*Except where the context requires otherwise, the terms Oxford Lane Capital, the Company, the Fund, we, us and our refer to Oxford Lane Capital Corp.; Oxford Lane Management and investment adviser refer to Oxford Lane Management, LLC; BDC Partners and administrator refer to BDC Partners, LLC; and Alaric and Alaric Compliance Services refer to Alaric Compliance Services, LLC.*

## Overview

We are a non-diversified closed-end management investment company that has registered as an investment company under the 1940 Act. Our investment objective is to maximize our portfolio's risk-adjusted total return.

We have implemented our investment objective by purchasing portions of equity and junior debt tranches of collateralized loan obligation (CLO) vehicles. Our investment objective also includes investing in warehouse facilities, which are financing structures intended to aggregate senior secured corporate loans that may be used to form the basis of a CLO vehicle. Substantially all of the CLO vehicles in which we may invest would be deemed to be investment companies under the 1940 Act but for the exceptions set forth in section 3(c)(1) or section 3(c)(7). Structurally, CLO vehicles are entities formed to originate and manage a portfolio of loans. The loans within the CLO vehicle are limited to loans which meet established credit criteria and are subject to concentration limitations in order to limit a CLO vehicle's exposure to a single credit. A CLO vehicle is formed by raising various classes or tranches of debt (with the most senior tranches being rated AAA to the most junior tranches typically being rated BB or B) and equity. The CLO vehicles which we focus on are collateralized primarily by senior secured loans made to companies whose debt is unrated or is rated below investment grade (Senior Loans), and generally have very little or no exposure to real estate, mortgage loans or to pools of consumer-based debt, such as credit card receivables or auto loans. Below investment grade securities are often referred to as junk. We may also invest, on an opportunistic basis, in other corporate credits of a variety of types. We expect that each of our investments will range in size from \$5 million to \$50 million, although the investment size may vary consistent with the size of our overall portfolio. Oxford Lane Management manages our investments and its affiliate arranges for the performance of the administrative services necessary for us to operate.

The structure of CLO vehicles, which are highly levered, is extremely complicated. Since we invest in the residual interests of CLO securities, our investments are much riskier than the risk profile of the Senior Loans by which such CLO vehicles are collateralized. Our investments in CLO vehicles may be riskier and less transparent to us and our stockholders than direct investments in the underlying Senior Loans. Our portfolio of investments may lack diversification among CLO vehicles which may subject us to a risk of significant loss if one or more of these CLO vehicles experience a high level of defaults on its underlying Senior Loans. The CLO vehicles in which we invest have debt that ranks senior to our investment. The market price for CLO vehicles may fluctuate dramatically, which may make portfolio valuations unreliable and negatively impact our net asset value and our ability to make distributions to our stockholders. Our equity investment distributions from CLO vehicles will likely be materially reduced if three month LIBOR increases. Our financial results may be affected adversely if one or more of our significant equity or junior debt investments in such CLO vehicles defaults on its payment obligations or fails to perform as we expect.

Our investments in CLO vehicles may be subject to special anti-deferral provisions that could result in us incurring tax or recognizing income prior to receiving cash distributions related to such income. Specifically, the CLO vehicles in which we invest generally constitute passive foreign investment companies ( PFICs ). Because we acquire investments in PFICs (including equity tranche investments in CLO vehicles that are PFICs), we may be subject to U.S. federal income tax on a portion of any excess distribution or gain from the disposition of such investments even if such income is distributed as a taxable dividend by us to our stockholders. See Risk Factors Risks Related to Our Investments beginning on page 21 to read about factors you should consider before investing in our securities.

---

TABLE OF CONTENTS

For the fiscal year ended March 31, 2016, our total return based on market value was (28.97)%. Total return based on market value is calculated assuming that shares of the Fund's common stock were purchased at the market price as of the beginning of the period, and that distribution, capital gains and other distributions were reinvested as provided for in the Fund's distribution reinvestment plan, excluding any discounts, and that the total number of shares were sold at the closing market price per share on the last day of the period. The computation does not reflect any sales commission investors may incur in purchasing or selling shares of the Fund. Our total return figures are subject to change and, in the future, may be greater or less than the rates set forth above.

**Distributions**

In order to be subject to pass-through tax treatment as a regulated investment company, or RIC, and to eliminate our liability for corporate-level U.S. federal income tax on the income we distribute to our stockholders, we are required, under Subchapter M of the Internal Revenue Code of 1986, as amended, or the Code, to distribute to our stockholders on an annual basis at least 90% of our ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any.

TABLE OF CONTENTS

The following table reflects the cash distributions, including dividends and tax returns of capital, if any, per share that we have declared on our common stock to date as well as our quarterly per share net investment income and distributions in excess of net investment income:

Three Months Ended	Record Date	Payment Date	Distributions <sup>(1)</sup>	GAAP Net Investment Income	Distributions in excess of Net Investment Income

(1) All of our cash distributions to date were funded from taxable income. The tax characterization of cash distributions for a particular year will not be known until the tax return for that year is finalized.

(2) We have not yet reported earnings for the period ended September 30, 2016.

(3) Represents a special dividend for the fiscal year ended March 31, 2014.

3

---

TABLE OF CONTENTS

For the fiscal year ended March 31, 2016, we paid dividends totaling \$421,888, \$7,383,791 and \$4,862,802 on the Series 2017 Term Preferred Shares, the Series 2023 Term Preferred Shares and the Series 2024 Term Preferred Shares, respectively. For the fiscal year ended March 31, 2015, we paid \$1,344,083, \$5,286,287 and \$2,912,844 on the Series 2017 Term Preferred Shares, the Series 2023 Term Preferred Shares and the Series 2024 Term Preferred Shares, respectively. For the fiscal year ended March 31, 2014, we paid \$1,344,083 and \$2,638,151 in preferred dividends on the Series 2017 Term Preferred Shares and the Series 2023 Term Preferred Shares, respectively. For the fiscal year ended March 31, 2013, we paid \$459,228 in preferred dividends on the Series 2017 Term Preferred Shares. The 2017 Term Preferred Shares were fully redeemed in July 2015.

For accounting purposes the distributions declared on our common stock for the fiscal periods ended March 31, 2016, 2015, 2014, 2013 and 2012 were in excess of the reported earnings under Generally Accepted Accounting Principals ( GAAP ). However, as a RIC, earnings and distributions are determined on a tax basis. Furthermore, taxable earnings are determined according to tax regulations and differ from reported income for accounting purposes under GAAP. For the fiscal periods ended March 31, 2015, 2014, 2013 and 2012, taxable earnings exceeded our distributions, and there was no tax return of capital for these years.

The tax characterization of distributions for the year ended March 31, 2016 will not be known until the tax return is finalized. To the extent that taxable earnings for any fiscal year are less than the amount of the distributions paid during the year, there would be a tax return of capital to shareholders. Distributions in excess of current and accumulated taxable earnings and profits will generally not be taxable to the shareholders, because a tax return of capital represents a return of a portion of a shareholder's original investment in our common stock, net of fund fees and expenses, to the extent of a shareholder's basis in our stock. Generally, a tax return of capital will reduce an investor's basis in our stock for federal tax purposes, which will result in the shareholder recognizing additional gain (or less loss) when the stock is sold. Assuming that a shareholder holds our stock as a capital asset, any such additional gain would be a capital gain. Shareholders should not assume that the source of all distributions is from our net profits and shareholders may periodically receive the payment of a distribution consisting of a return of capital. The tax character of any distributions will be determined after the end of the fiscal year. Tax matters are very complicated and the tax consequences to an investor of an investment in our shares will depend on the facts of its particular situation. We encourage investors to consult their own tax advisors regarding the specific consequences of such an investment, including tax reporting requirements, the applicability of federal, state, local and foreign tax laws, eligibility for the benefits of any applicable tax treaty and the effect of any possible changes in the tax laws.

We have elected to be treated, and intend to continue to qualify annually, as a RIC under Subchapter M of the Code beginning with our 2011 taxable year. To maintain RIC tax treatment, we must, among other things, distribute at least 90% of our ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any. In order to avoid certain U.S. federal excise taxes imposed on RICs, we currently intend to distribute during each calendar year an amount at least equal to the sum of: (1) 98% of our ordinary income for the calendar year; (2) 98.2% of our capital gains in excess of capital losses for the one-year period ending on October 31 of the calendar year; and, (3) 100% of any ordinary income and net capital gains for preceding years that were not distributed during such years and on which we paid no U.S. federal income tax. In addition, although we currently intend to distribute realized net capital gains (i.e., net long term capital gains in excess of short term capital losses), if any, at least annually, we may in the future decide to retain such capital gains for investment and elect to treat such gains as deemed distributions to you. If this happens, you will be treated as if you had received an actual distribution of the capital gains we retain and reinvested the net after tax proceeds in us. In this situation, you would be eligible to claim a tax credit (or, in certain circumstances, a tax refund) equal to your allocable share of the tax we paid on the capital gains deemed distributed to you. See Material U.S. Federal Income Tax Considerations. We can offer no assurance that we will achieve results that will permit the payment of any cash distributions and, to the extent that we issue senior securities, we will be prohibited from making distributions if doing so causes us to fail to maintain the asset

coverage ratios stipulated by the 1940 Act or if distributions are limited by the terms of any of our borrowings.

We may make distributions by issuing additional shares of our common stock under our distribution reinvestment plan, unless you elect to receive your dividends and/or long-term capital gains distributions in cash. We reserve the right to purchase shares in the open market in connection with our implementation of the

4

---

## TABLE OF CONTENTS

distribution reinvestment plan. See Distribution Reinvestment Plan. If you hold shares in the name of a broker or financial intermediary, you should contact the broker or financial intermediary regarding your election to receive distributions in cash. We can offer no assurance that we will achieve results that will permit the payment of any cash distributions and, if we issue senior securities, we will be prohibited from making distributions if doing so causes us to fail to maintain the asset coverage ratios stipulated by the 1940 Act or if distributions are limited by the terms of any of our borrowings.

## **Distribution Policy**

Oxford Lane is subject to significant and variable differences between its accounting income under GAAP and its taxable income particularly as it relates to our CLO equity investments. We invest in CLO entities which generally constitute PFICs and which are subject to complex tax rules; the calculation of taxable income attributed to a CLO equity investment can be dramatically different from the calculation of income for financial reporting purposes under GAAP. Taxable income is based upon the distributable share of earnings as determined under tax regulations for each CLO equity investment, which may be consistent with the cash flows generated by those investments (although significant differences are possible), while accounting income is currently based upon an effective yield calculation (this requires the calculation of a yield to expected redemption date based upon an estimation of the amount and timing of future cash flows, including recurring cash flows as well as future principal repayments). The Fund's final taxable earnings for the fiscal year ended March 31, 2016 will not be known until our tax returns are filed but our experience has been that cash flows from CLO equity investments have historically represented a generally reasonable estimate of taxable earnings; however, we can offer no assurance that will be the case in the future, particularly during periods of market disruption and volatility. There may be significant differences between Oxford Lane Capital's GAAP earnings and its taxable earnings, particularly related to CLO equity investments where its taxable earnings are based upon the taxable reported earnings provided by the CLO equity positions in which we invest, while GAAP earnings are based upon an effective yield calculation. In general, the Fund currently expects its taxable earnings to be higher than its reportable GAAP earnings.

While reportable GAAP income from our CLO equity investments for the year ended March 31, 2016 was approximately \$57.2 million, we received or were entitled to receive approximately \$87.1 million in distributions from our CLO equity investments. While the tax characterization of our distributions for the fiscal year ended March 31, 2016 will not be known until our tax returns are finalized, we do not expect to have a tax return of capital for this period. In general, we currently expect our annual taxable income to be higher than our GAAP earnings on the basis of the difference between cash distributions from CLO equity investments actually received or entitled to be received and the effective yield income calculated under GAAP. Our distribution policy is based upon our estimate of our taxable income.

## **Oxford Lane Management**

Our investment activities are managed by Oxford Lane Management, which is an investment adviser that has registered under the Investment Advisers Act of 1940, or the Advisers Act. Under our investment advisory agreement with Oxford Lane Management, which we refer to as our Investment Advisory Agreement, we have agreed to pay Oxford Lane Management an annual base management fee based on our gross assets, as well as an incentive fee based on our performance. See Investment Advisory Agreement.

We expect to benefit from the ability of our investment adviser's team to identify attractive opportunities, conduct diligence on and value prospective investments, negotiate terms where appropriate, and manage and monitor a

diversified portfolio although we do not intend to operate as a diversified investment company within the meaning of the 1940 Act. Our investment adviser's senior investment team members have broad investment backgrounds, with prior experience at investment banks, commercial banks, unregistered investment funds and other financial services companies, and have collectively developed a broad network of contacts to provide us with our principal source of investment opportunities.

Our investment adviser is led by Jonathan H. Cohen, our Chief Executive Officer, and Saul B. Rosenthal, our President. Messrs. Cohen and Rosenthal are assisted by Darryl M. Monasebian, Executive Vice President, and Debdeep Maji and Kevin Yonon, who serve as Managing Directors for Oxford Lane Management. We consider Messrs. Cohen, Rosenthal, Monasebian, Maji and Yonon to be Oxford Lane Management's senior investment team.

## TABLE OF CONTENTS

Messrs. Cohen, Rosenthal, Monasebian, Maji and Yonon together with the other members of Oxford Lane Management's investment team, have developed an infrastructure that we believe provides Oxford Lane Capital with a competitive advantage in locating and acquiring attractive CLO investments.

Charles M. Royce is a non-managing member of Oxford Lane Management. Mr. Royce serves as Chief Executive Officer and a member of the Board of Managers of Royce & Associates, LLC ( Royce & Associates ). He also manages or co-manages ten of Royce & Associates' open- and closed-end registered funds. Mr. Royce currently serves on the Board of Directors of The Royce Funds and TICC Capital Corp. Mr. Royce is also a non-managing member of TICC Management, LLC, the investment adviser for TICC Capital Corp. Mr. Royce, as a non-managing member of Oxford Lane Management, does not take part in the management or participate in the operations of Oxford Lane Management; however, Mr. Royce may be available from time to time to Oxford Lane Management to provide certain consulting services without compensation. Royce & Associates is a wholly owned subsidiary of Legg Mason, Inc.

In addition, we will reimburse BDC Partners, an affiliate of Oxford Lane Management, our allocable portion of overhead and other expenses incurred by BDC Partners in performing its obligations under an administration agreement by and among us and BDC Partners (the Administration Agreement ), including rent, the fees and expenses associated with performing administrative functions, and our allocable portion of the compensation of our Chief Financial Officer and any administrative support staff, including accounting personnel. We will also pay the costs associated with the functions performed by our Chief Compliance Officer under the terms of an agreement between us and Alaric Compliance Services, a compliance consulting firm. These arrangements could create conflicts of interest that our Board of Directors must monitor.

## **Investment Focus**

Our investment objective is to maximize our portfolio's risk-adjusted total return. Our current focus is to seek that return by investing in structured finance investments, specifically the equity and junior debt tranches of CLO vehicles, which are collateralized primarily by a diverse portfolio of Senior Loans, and which generally have very little or no exposure to real estate loans, or mortgage loans or to pools of consumer-based debt, such as credit card receivables or auto loans. Our investment strategy also includes investing in warehouse facilities, which are financing structures intended to aggregate Senior Loans that may be used to form the basis of a CLO vehicle. As of June 30, 2016, we held debt investments in 3 different CLO structures and equity investments in 35 different CLO structures. We may also invest, on an opportunistic basis, in a variety of other types of corporate credits.

The CLO investments we currently hold in our portfolio generally represent either a residual economic interest, in the case of an equity tranche, or a debt investment collateralized by a portfolio of Senior Loans. The value of our CLO investments generally depend on both the quality and nature of the underlying portfolio it references and also on the specific structural characteristics of the CLO itself.

## **CLO Structural Elements**

Structurally, CLO vehicles are entities formed to originate and manage a portfolio of loans. The loans within the CLO vehicle are generally limited to loans which meet established credit criteria and are subject to concentration limitations in order to limit a CLO vehicle's exposure to a single credit.

A CLO vehicle is formed by raising multiple tranches of debt (with the most senior tranches being rated AAA to the most junior tranches typically being rated BB or B ) and equity. As interest payments are received the CLO vehicle makes contractual interest payments to each tranche of debt based on their seniority. If there are funds remaining after

each tranche of debt receives its contractual interest rate and the CLO vehicle meets or exceeds required collateral coverage levels (or other similar covenants) the remaining funds may be paid to the equity tranche. The contractual provisions setting out this order of payments are set out in detail in the CLO vehicle's indenture. These provisions are referred to as the priority of payments or the waterfall and determine any other obligations that may be required to be paid ahead of payments of interest and principal on the securities issued by a CLO vehicle. In addition, for payments to be made to each tranche, after the most senior tranche of debt, there are various tests which must be complied with, which are different for each CLO vehicle.

## TABLE OF CONTENTS

CLO indentures typically provide for adjustments to the priority of payments in the event that certain cashflow or collateral requirements are not maintained. The collateral quality tests that may divert cashflows in the priority of payments are predominantly determined by reference to the par values of the underlying loans, rather than their current market values. Accordingly, we believe that CLO equity and junior debt investments allow investors to gain exposure to the Senior Loan market on a levered basis without being structurally subject to mark-to-market price fluctuations of the underlying loans. As such, although the current valuations of CLO equity and junior debt tranches are expected to fluctuate based on price changes within the loan market, interest rate movements and other macroeconomic factors, those tranches will generally be expected to continue to receive distributions from the CLO vehicle periodically so long as the underlying portfolio does not suffer defaults, realized losses or other covenant violations sufficient to trigger changes in the waterfall allocations. We therefore believe that an investment portfolio consisting of CLO equity and junior debt investments of this type has the ability to provide attractive risk-adjusted rates of return.

The diagram below is for illustrative purposes only. The CLO structure highlighted below is only a hypothetical structure and structures among CLO vehicles in which we may invest may vary substantially from the hypothetical example set forth below.

### **The Syndicated Senior Loan Market**

We believe that while the syndicated leveraged corporate loan market is relatively large, with Standard and Poor's estimating the total par value outstanding at approximately \$881 billion as of August 16, 2016, this market remains largely inaccessible to a significant portion of investors that are not lenders or approved institutions. The CLO market permits wider exposure to syndicated Senior Loans, but this market is almost exclusively private and predominantly institutional.

The Senior Loan market is characterized by various factors, including:

***Floating rate instruments.*** A Senior Loan typically contains a floating versus a fixed interest rate, which we believe provides some measure of protection against the risk of interest rate fluctuation. However, all of our CLO investments have many Senior Loans which are subject to interest rate floors and since interest rates on Senior Loans may only reset periodically and the amount of the increase following an interest rate reset may be below the interest rate floors of such Senior Loans, our ability to benefit from rate resets following an increase in interest rates may be limited.

***Frequency of interest payments.*** A Senior Loan typically provides for scheduled interest payments no less frequently than quarterly.

In the current environment, we believe the above attributes seem particularly desirable.

TABLE OF CONTENTS

## Investment Opportunity

We believe that the market for CLO-related assets continues to provide us with the opportunities to generate attractive risk-adjusted returns within our strategies over the long term. We believe that a number of factors support this conclusion, including:

We believe that the long-term and relatively low-cost capital that many CLO vehicles have secured, compared with current asset spreads and associated LIBOR floors have created opportunities to purchase certain CLO equity and junior debt instruments that may produce attractive risk-adjusted returns. Although the senior secured corporate loan market has been volatile recently due in part to the oil and gas and commodities related sectors, this volatility may be beneficial as it has allowed some collateral managers of CLO vehicles to invest in loans at greater discounts to par and at wider loan spreads. Additionally, given that the CLO vehicles we invest in are cash flow-based vehicles, this term financing may be extremely beneficial in periods of market volatility.

We believe that the market to invest in warehouse facilities, which are short and medium-term facilities that are generally expected to form the basis of CLO vehicles (which the Fund may participate in or be repaid by), has created additional attractive risk-adjusted investment opportunities for us.

We believe that investing in CLO securities, and CLO equity instruments and warehouse facilities in particular, requires a high level of research and analysis. We believe that transactions in this market can only be adequately conducted by knowledgeable market participants since this market and these structures tend to be highly specialized. We believe that the U.S. risk retention requirements imposed for CLO managers under Section 941 of the Dodd-Frank Act has created some uncertainty in the market in regards to future CLO issuances. Given that certain CLO managers may require capital provider partners to satisfy this requirement when it becomes effective on December 24, 2016, we believe that this may create additional opportunities (and additional risks) for us in the future.

We believe that the U.S. CLO market is relatively large with total assets under management of approximately \$425 billion.<sup>(1)</sup> We estimate that the amount outstanding of the junior-most debt tranches (specifically the tranches originally rated BB and B ) and equity tranches together are approximately \$70 billion.

We continue to review a large number of CLO investment vehicles in the current market environment, and we expect that the majority of our portfolio holdings, over the near to intermediate-term, will continue to be focused on CLO debt and equity securities, with the more significant focus over the near-term likely to be on CLO equity securities and warehouse facilities.

## Summary Risk Factors

The value of our assets, as well as the market price of our securities, will fluctuate. Our investments may be risky, and you may lose all or part of your investment in us. Investing in Oxford Lane Capital involves other risks, including the following:

Our equity investment distributions from CLO vehicles will likely be materially reduced if three month LIBOR increases;

Our portfolio of investments may lack diversification among CLO vehicles which may subject us to a risk of significant loss if one or more of these CLO vehicles experiences a high level of defaults on its underlying Senior Loans;

The Senior Loan portfolios of the CLO vehicles in which we will invest may be concentrated in a limited number of industries, which may subject those vehicles, and in turn us, to a risk of significant loss if there is a downturn in a particular industry in which a number of our CLO vehicles' investments are concentrated;

1. As of August 3, 2016. Source: Wells Fargo Securities, LLC.
  2. Oxford Lane has estimated this amount based on Guggenheim CLO new issue summary, dated July 29, 2016.
-

TABLE OF CONTENTS

The application of the risk retention rules to CLOs may have broader effects on the CLO and loan markets in general, potentially resulting in fewer or less desirable investment opportunities for the Company.

Our financial results may be affected adversely if one or more of our significant equity or junior debt investments in such CLO vehicles defaults on its payment obligations or fails to perform as we expect;

Investing in CLO vehicles, Senior Loans and other high-yield corporate credits involves a variety of risks, any of which may adversely impact our performance;

The CLO equity market recently experienced a significant downturn, which negatively impacted our net asset value per share and, if these reduced values are realized over time, you may not receive dividends or our dividends may decline or may not grow over time;

We have a limited operating history as a closed-end investment company;

Our investment portfolio is recorded at fair value, with our Board of Directors having final responsibility for overseeing, reviewing and approving, in good faith, its estimate of fair value and, as a result, there will be uncertainty as to the value of our portfolio investments;

We are dependent upon Oxford Lane Management's key personnel for our future success;

Our incentive fee structure and the formula for calculating the fee payable to Oxford Lane Management may incentivize Oxford Lane Management to pursue speculative investments, use leverage when it may be unwise to do so, or refrain from de-levering when it would otherwise be appropriate to do so;

A general increase in interest rates may have the effect of making it easier for our investment adviser to receive incentive fees, without necessarily resulting in an increase in our net earnings;

A disruption or downturn in the capital markets and the credit markets could impair our ability to raise capital and negatively affect our business;

Regulations governing our operation as a registered closed-end management investment company affect our ability to raise additional capital and the way in which we do so. The raising of debt capital may expose us to risks, including the typical risks associated with leverage;

We may borrow money and/or issue preferred stock to leverage our portfolio, which would magnify the potential for gain or loss on amounts invested and will increase the risk of investing in us;

We may experience fluctuations in our quarterly results;

We will be subject to corporate-level U.S. federal income tax if we are unable to maintain our RIC status under Subchapter M of the Code;

There is a risk that our stockholders may not receive distributions or that our distributions may not grow or may be reduced over time, including on a per share basis as a result of the dilutive effects of this offering;

Common shares of closed-end management investment companies, including Oxford Lane Capital, have in the past frequently traded at discounts to their net asset values, and we cannot assure you that the market price of shares of our common stock will not decline below our net asset value per share;

Our common stock price may be volatile and may decrease substantially;

Any amounts that we use to service our indebtedness or preferred dividends, or that we use to redeem our preferred stock, will not be available for distributions to our common stockholders;

Our common stock is subject to a risk of subordination relative to holders of our debt instruments and holders of our preferred stock; and

## TABLE OF CONTENTS

Holders of our preferred stock have the right to elect members of our Board of Directors and class voting rights on certain matters.

See **Risk Factors** beginning on page 21, and the other information included in this prospectus and any accompanying prospectus supplement, for additional discussion of factors you should carefully consider before investing in our securities.

## **Operating and Regulatory Structure**

Oxford Lane Capital is a Maryland corporation that is a non-diversified closed-end management investment company that has registered as an investment company under the 1940 Act. As a registered closed-end fund, we are required to meet regulatory tests. See **Regulation as a Registered Closed-End Investment Company**. We may also borrow funds to make investments. In addition, we have elected to be treated for U.S. federal income tax purposes, and intend to qualify annually, as a RIC under Subchapter M of the Code. See **Material U.S. Federal Income Tax Considerations**.

Our investment activities are managed by Oxford Lane Management and supervised by our Board of Directors. Oxford Lane Management is an investment adviser that is registered under the Advisers Act. Under our Investment Advisory Agreement, we have agreed to pay Oxford Lane Management an annual base management fee based on our gross assets as well as an incentive fee based on our performance. See **Investment Advisory Agreement**. We have also entered into an administration agreement with BDC Partners, which we refer to as the Administration Agreement, under which we have agreed to reimburse BDC Partners for our allocable portion of overhead and other expenses incurred by BDC Partners in performing its obligations under the Administration Agreement, including furnishing us with office facilities, equipment and clerical, bookkeeping and record keeping services at such facilities, as well as providing us with other administrative services. See **Administration Agreement**.

BDC Partners also serves as the managing member of Oxford Lane Management. Messrs. Cohen and Rosenthal, in turn, serve as the managing member and non-managing member, respectively, of BDC Partners.

## **Recent Developments**

### **Financial Results as of June 30, 2016**

Net asset value per share as of June 30, 2016 was \$8.78 compared with a net asset value per share at March 31, 2016 of \$7.04.

Net investment income, calculated in accordance with GAAP, was approximately \$5.7 million, or \$0.30 per share, for the quarter ended June 30, 2016.

For the quarter ended June 30, 2016, we recorded approximately \$618,000 of non-recurring expenses, or \$0.03 per common share, in conjunction with our preferred share repurchase program.

Our core net investment income ( **Core NII** ) was approximately \$19.5 million, or \$1.04 per share, for the quarter ended June 30, 2016.

Core NII represents net investment income adjusted for additional cash distributions received, or entitled to be received (if any, in either case), on our CLO equity investments. (See additional information under **Supplemental Information Regarding Core Net Investment Income** below).

Total investment income, calculated in accordance with GAAP, amounted to approximately \$12.4 million for the quarter ended June 30, 2016.

For the quarter ended June 30, 2016, we recorded GAAP investment income from our portfolio as follows: approximately \$12.0 million from our CLO equity investments,

approximately \$0.2 million from our CLO debt investments, and

TABLE OF CONTENTS

approximately \$0.2 million from all other sources.

While reportable GAAP earnings from our CLO equity class investments for the three months ended June 30, 2016 was approximately \$12.0 million, we received or were entitled to receive approximately \$25.8 million in distributions from these investments. While our experience has been that cash flows have historically represented our view of a reasonable estimate of CLO equity investment taxable income, we believe there to be significantly less certainty as to the final determination of taxable income with respect to our CLO equity investments in light of recent volatility in the corporate loan market. In general, we currently expect our annual taxable income to be higher than our GAAP earnings on the basis of the difference between cash distributions actually received (and record date distributions to be received) and the effective yield income.

◦ The weighted average GAAP yield of our CLO debt investments at current cost was approximately 8.9% as of June 30, 2016.

◦ The weighted average GAAP effective yield of our CLO equity investments at current cost was approximately 15.4% as of June 30, 2016.

◦ The weighted average cash distribution yield of our cash income producing CLO equity investments at current cost was approximately 33.9% as of June 30, 2016.

Net increase in net assets from operations was approximately \$44.0 million, or \$2.34 per share, for the quarter ended June 30, 2016, including:

- Net investment income of approximately \$5.7 million;
- Net realized losses of approximately \$3.3 million; and
- Net unrealized appreciation of approximately \$41.6 million.

During the quarter ended June 30, 2016 we made additional CLO equity investments of approximately \$20.5 million.

◦ Also, during the quarter ended June 30, 2016, we sold approximately \$21.0 million of our investments.

During the quarter ended June 30, 2016, we issued a total of 54,975 shares of common stock pursuant to an at the market offering, resulting in net proceeds of approximately \$458,000.

For the quarter ended June 30, 2016, we repurchased 609,537 shares of our Series 2023 Term Preferred Stock and 2,712 shares of our Series 2024 Term Preferred Stock pursuant to a previously announced Preferred Stock Repurchase Program. We currently have 3,016,001 shares of our Series 2023 Term Preferred Stock and 2,018,879 shares of our Series 2024 Term Preferred Stock issued and outstanding. In connection with the repurchased Series 2023 Term Preferred Shares and Series 2024 Term Preferred Shares, we recognized as interest expense a net extinguishment loss of approximately \$618,000, consisting of previously unamortized issuance costs of approximately \$492,000 and repurchases at a premium to par of approximately \$126,000.

Our Board of Directors declared a distribution for the quarter ending September 30, 2016 of \$0.60 per common share.

Record date is September 16, 2016

Payable on September 30, 2016

TABLE OF CONTENTS

Our Board of Directors has also declared the required monthly dividends on our Series 2023 Term Preferred Shares and Series 2024 Term Preferred Shares (each, a Share ), as follows:

	Per Share Dividend Amount Declared	2016 Record Dates	2016 Payable Dates
Series 2023	\$0.15625	September 16, October 14, November 16	September 30, October 28, November 30
Series 2024	\$0.16930	September 16, October 14, November 16	September 30, October 28, November 30

In accordance with their terms, each of the Series 2023 Shares and Series 2024 Shares will pay a monthly dividend at a fixed rate of 7.50% and 8.125%, respectively, of the \$25.00 per share liquidation preference, or \$1.875 and \$2.03125 per share per year, respectively. This fixed annual dividend rate is subject to adjustment under certain circumstances, but will not in any case be lower than 7.50% and 8.125% per year, respectively, for each of the Series 2023 Shares and Series 2024 Shares.

### Supplemental Information Regarding Core Net Investment Income

On a supplemental basis, we provide information relating to core net investment income, which is a non-GAAP measure. This measure is provided in addition to, but not as a substitute for, net investment income. Our non-GAAP measure may differ from similar measures by other companies, even if similar terms are used to identify such measures. Core net investment income represents net investment income adjusted for additional cash distributions received, or entitled to be received (if any, in either case), on our CLO equity investments.

Income from investments in the equity class securities of CLO vehicles, for GAAP purposes, is recorded using the effective interest method based upon an effective yield to the expected redemption utilizing estimated cash flows, compared to the cost resulting in an effective yield for the investment; the difference between the actual cash received or distributions entitled to be received and the effective yield calculation is an adjustment to cost. Accordingly, investment income recognized on CLO equity securities in the GAAP statement of operations differs from the cash distributions actually received by us during the period (referred to below as CLO equity additional distributions ).

Further, as the RIC requirements are to distribute taxable earnings, core net investment income may provide a better indication of estimated taxable income for a reporting period than does GAAP net investment income, although we can offer no assurance that will be the case as the ultimate tax character of our earnings cannot be determined until tax returns are prepared after the end of a fiscal year. We note that these non-GAAP measures may not be useful indicators of taxable earnings, particularly during periods of market disruption and volatility.

The following table provides a reconciliation of net investment income to Core NII for the three months ended June 30, 2016:

Three Months Ended June 30, 2016	Amount	Per Share Amounts
Net investment income	\$ 5,666,503	\$ 0.30

CLO equity additional distributions	13,835,449	0.74
Core net investment income	\$ 19,501,952	\$ 1.04

## Our Corporate Information

Our offices are located at 8 Sound Shore Drive, Suite 255, Greenwich, CT 06830, and our telephone number is (203) 983-5275.

TABLE OF CONTENTS

## OFFERINGS

We may offer, from time to time, up to \$500,000,000 of our common stock, preferred stock, subscription rights to purchase shares of our common stock or debt securities, on terms to be determined at the time of the offering. We will offer our securities at prices and on terms to be set forth in one or more supplements to this prospectus. The offering price per share of our securities, less any underwriting commissions or discounts, generally will not be less than the net asset value per share of our securities at the time of an offering. However, we may issue shares of our securities pursuant to this prospectus at a price per share that is less than our net asset value per share (i) in connection with a rights offering to our existing stockholders, (ii) with the prior approval of the majority of our common stockholders or (iii) under such other circumstances as the SEC may permit. Any such issuance of shares of our common stock below net asset value may be dilutive to the net asset value of our common stock. See Risk Factors Risks Relating to an Investment in our Common Stock.

Our securities may be offered directly to one or more purchasers, or through agents designated from time to time by us, or to or through underwriters or dealers. The prospectus supplement relating to an offering will identify any agents or underwriters involved in the sale of our securities, and will disclose any applicable purchase price, fee, commission or discount arrangement between us and our agents or underwriters or among our underwriters or the basis upon which such amount may be calculated. See Plan of Distribution. We may not sell any of our securities through agents, underwriters or dealers without delivery of this prospectus and a prospectus supplement describing the method and terms of the offering of such securities.

Set forth below is additional information regarding offerings of our securities:

### Use of Proceeds

We intend to use the net proceeds from the sale of our securities pursuant to this prospectus for acquiring investments in accordance with our investment objective and strategies described in this prospectus and/or for general working capital purposes. Each supplement to this prospectus relating to an offering will more fully identify the use of the proceeds from such offering. See Use of Proceeds.

### NASDAQ Global Select Market symbols

OXLC (common stock)  
OXLCO (Series 2023 Term Preferred Shares)  
OXLCN (Series 2024 Term Preferred Shares)

### Distributions

To the extent that we have income available, we intend to distribute quarterly distributions to our common stockholders. The amount of our distributions, if any, will be determined by our Board of Directors. Any distributions to our stockholders will be declared out of assets legally available for distribution. The specific tax characteristics of our distributions will be reported to shareholders after the end of each calendar year.

### Taxation

We have elected to be treated for U.S. federal income tax purposes as a RIC under Subchapter M of the Code. As a RIC, we generally do not have to pay corporate-level U.S. federal income taxes on any ordinary income or capital gains that we distribute to our stockholders as dividends. To maintain our RIC tax treatment, we must meet specified source-of-income and asset diversification requirements and distribute annually at least 90% of our ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any. See Price Range of Common Stock and Distributions and Material U.S. Federal Income Tax Considerations.

TABLE OF CONTENTS

Investment Advisory Fees

We pay Oxford Lane Management a fee for its services under the Investment Advisory Agreement consisting of two components – a base management fee and an incentive fee. The base management fee is calculated at an annual rate of 2.00% of our gross assets, which includes any borrowings for investment purposes. The incentive fee is calculated and payable quarterly in arrears and equals 20.0% of our pre-incentive fee net investment income for the immediately preceding quarter, subject to a preferred return, or hurdle, and a catch up feature. No incentive fees are payable to our investment adviser on any realized capital gains. See Investment Advisory Agreement.

Administration Agreement

We reimburse BDC Partners for our allocable portion of overhead and other expenses it incurs in performing its obligations under the Administration Agreement, including furnishing us with office facilities, equipment and clerical, bookkeeping and record keeping services at such facilities, as well as providing us with other administrative services. In addition, we reimburse BDC Partners for our allocable portion of the compensation of our Chief Financial Officer and any administrative support staff, including accounting personnel. See Administration Agreement. We will also pay the costs associated with the functions performed by our Chief Compliance Officer under the terms of an agreement between us and Alaric Compliance Services.

Leverage

Other than our currently outstanding preferred stock, which is considered a form of leverage, we do not currently anticipate incurring indebtedness on our portfolio or paying any interest during the twelve months following completion of this offering. However, we may issue additional shares of preferred stock pursuant to the registration statement of which this prospectus forms a part. Although we have no current intention to do so, we may borrow funds to make investments. As a result, we may be exposed to the risks of leverage, which may be considered a speculative investment technique. In addition, the CLO vehicles in which we invest will be leveraged, which will indirectly expose us to the risks of leverage. The use of leverage magnifies the potential gain and loss on amounts invested and therefore increases the risks associated with investing in our securities. In addition, the costs associated with our borrowings, including any increase in the management fee payable to our investment adviser, Oxford Lane Management, will be borne by our common stockholders. Under the 1940 Act, we are only permitted to incur additional indebtedness to the extent our asset coverage, as defined under the 1940 Act, is at least 300% immediately after each such borrowing. In addition, with respect to our outstanding preferred stock, we will generally be required to meet an asset coverage ratio, as defined under the 1940 Act, of at least 200% immediately after each issuance of such preferred stock. See Regulation as a Registered Closed-End Investment Company.

Trading

Shares of closed-end investment companies frequently trade at a discount to their net asset value. The risk that our shares may trade at a discount to our net asset value is separate and distinct from the

TABLE OF CONTENTS

risk that our net asset value per share may decline. We cannot predict whether our shares will trade above, at or below net asset value.

**Distribution Reinvestment Plan**

We have adopted an opt out distribution reinvestment plan. If your shares of common stock are registered in your own name, your distributions will automatically be reinvested under our distribution reinvestment plan in additional whole and fractional shares of common stock, unless you opt out of our distribution reinvestment plan so as to receive cash distributions by delivering a written notice to our distribution paying agent. If your shares are held in the name of a broker or other nominee, you should contact the broker or nominee for details regarding opting out of our distribution reinvestment plan. Stockholders who receive distributions in the form of stock will be subject to the same federal, state and local tax consequences as stockholders who elect to receive their distributions in cash. See

Distribution Reinvestment Plan.

**Certain Anti-Takeover Measures**

Our charter and bylaws, as well as certain statutory and regulatory requirements, contain certain provisions that may have the effect of discouraging a third party from making an acquisition proposal for us. These anti-takeover provisions may inhibit a change in control in circumstances that could give the holders of our common stock the opportunity to realize a premium over the market price for our common stock. See Description of Securities.

**Available Information**

We are required to file periodic reports, proxy statements and other information with the SEC. This information is available at the SEC's public reference room at 100 F Street, NE, Washington, D.C. 20549 and on the SEC's website at <http://www.sec.gov>. The public may obtain information on the operation of the SEC's public reference room by calling the SEC at (202) 551-8090. This information is available free of charge by contacting us at Oxford Lane Capital Corp., 8 Sound Shore Drive, Suite 255, Greenwich, CT 06830, by telephone at (203) 983-5275, or on our website at <http://www.oxfordlanecapital.com>.

TABLE OF CONTENTS**FEES AND EXPENSES**

The following table is intended to assist you in understanding the costs and expenses that you will bear directly or indirectly. We caution you that some of the percentages indicated in the table below are estimates and may vary. Except where the context suggests otherwise, whenever this prospectus contains a reference to fees or expenses paid by us or Oxford Lane Capital, or that we will pay fees or expenses, you will indirectly bear such fees or expenses as an investor in Oxford Lane Capital Corp.

Stockholder transaction expenses:	
Sales load (as a percentage of offering price)	%(1)
Offering expenses borne by us (as a percentage of offering price)	%(2)
Distribution reinvestment plan expenses (as a percentage of offering price)	%(3)
Total stockholder transaction expenses (as a percentage of offering price)	%
Annual expenses (as a percentage of net assets):	
Base management fee (as a percentage of net assets)	3.27 %(4)
Incentive fees payable under our investment advisory agreement (20% of net investment income)	3.46 %(5)
Interest payments on borrowed funds	0.00 %(6)
Preferred stock dividend payment	5.13 %(7)
Other expenses (estimated)	1.09 %(8)
Acquired fund fees and expenses	22.27 %(9)
Total annual expenses (estimated)	35.22 %

**Example**

The following example demonstrates the projected dollar amount of total cumulative expenses that would be incurred over various periods with respect to a hypothetical investment in our common stock. In calculating the following expense amounts, we have assumed that our annual operating expenses would remain at the levels set forth in the table above. See Note 6 below for additional information regarding certain assumptions regarding our level of leverage subsequent to this offering.

In the event that shares to which this prospectus relates are sold to or through underwriters, a corresponding prospectus supplement will restate this example to reflect the applicable sales load.

	1 Year	3 Years	5 Years	10 Years
You would pay the following expenses on a \$1,000 investment, assuming a 5% annual return	\$ 299	\$ 653	\$ 826	\$ 962

**The example and the expenses in the tables above should not be considered a representation of our future expenses, and actual expenses may be greater or less than those shown.** While the example assumes, as required by the SEC, a 5.0% annual return, our performance will vary and may result in a return greater or less than 5.0%. The incentive fee under the Investment Advisory Agreement, which, assuming a 5.0% annual return, would either not be payable or would have an insignificant impact on the expense amounts shown above, is included in the example. Also, while the example assumes reinvestment of all distributions at net asset value, participants in our distribution reinvestment plan will receive a number of shares of our common stock, determined by dividing the total dollar

amount of the distribution payable to a participant by the market price per share of our common stock at the close of trading on the distribution payment date, which may be at, above or below net asset value. See [Distribution Reinvestment Plan](#) for additional information regarding our distribution reinvestment plan.

- (1) In the event that the securities to which this prospectus relates are sold to or through underwriters, a corresponding prospectus supplement will disclose the applicable sales load and the [Example](#) will be updated accordingly.
- (2) The prospectus supplement corresponding to each offering will disclose the applicable offering expenses and total stockholder transaction expenses as a percentage of the offering price.

16

---

TABLE OF CONTENTS

- (3) The expenses of the distribution reinvestment plan are included in other expenses. Assumes gross assets of \$310.6 million and \$125.9 million of leverage, which reflects \$125.9 million of preferred stock issued and outstanding as of June 30, 2016, and assumes net assets of \$190.1 million (which has been adjusted to reflect the issuance of an additional \$25.0 million of common stock). The above calculation presents our base management fee as a percentage of our net assets. Our base management fee under the Investment Advisory Agreement, however, is based on our gross assets, which is defined as all the assets of Oxford Lane Capital, including those acquired using borrowings for investment purposes. As a result, to the extent we use additional leverage, it would have the effect of increasing our base management fee as a percentage of our net assets. See Investment Advisory Agreement for additional information.
- (4) Amount reflects the estimated annual incentive fees payable to our investment adviser, Oxford Lane Management, during the fiscal year following this offering. The estimate assumes that the incentive fee earned will be proportional to the fee earned during the quarter ended June 30, 2016. Based on our current business plan, we anticipate that substantially all of the net proceeds of any offerings conducted pursuant to this prospectus will be invested within three months depending on the availability of investment opportunities that are consistent with our investment objective and other market conditions. We expect that it will take approximately one to three months to invest all of the proceeds of any offerings conducted pursuant to this prospectus, in part because equity and junior debt investments in CLO vehicles require substantial due diligence prior to investment.
- (5) The incentive fee, which is payable quarterly in arrears, equals 20.0% of the excess, if any, of our Pre-Incentive Fee Net Investment Income that exceeds a 1.75% quarterly (7.0% annualized) hurdle rate, which we refer to as the Hurdle, subject to a catch-up provision measured at the end of each calendar quarter. The incentive fee is computed and paid on income that may include interest that is accrued but not yet received in cash. The operation of the incentive fee for each quarter is as follows:
- no incentive fee is payable to our investment adviser in any calendar quarter in which our Pre-Incentive Fee Net Investment Income does not exceed the Hurdle of 1.75%;
- 100% of our Pre-Incentive Fee Net Investment Income with respect to that portion of such Pre-Incentive Fee Net Investment Income, if any, that exceeds the Hurdle but is less than 2.1875% in any calendar quarter (8.75% annualized) is payable to our investment adviser. We refer to this portion of our Pre-Incentive Fee Net Investment Income (which exceeds the Hurdle but is less than 2.1875%) as the catch-up. The catch-up is meant to provide our investment adviser with 20.0% of our Pre-Incentive Fee Net Investment Income, as if a Hurdle did not apply when our Pre-Incentive Fee Net Investment Income exceeds 2.1875% in any calendar quarter; and
- 20.0% of the amount of our Pre-Incentive Fee Net Investment Income, if any, that exceeds 2.1875% in any calendar quarter (8.75% annualized) is payable to our investment adviser (once the Hurdle is reached and the catch-up is achieved, 20.0% of all Pre-Incentive Fee Investment Income thereafter is allocated to our investment adviser).
- No incentive fee is payable to our investment adviser on realized capital gains. For a more detailed discussion of the calculation of this fee, see Investment Advisory Agreement.
- Assumes that we maintain our current level of no outstanding borrowings as of June 30, 2016 other than preferred stock, which is considered a form of leverage. We may issue additional shares of preferred stock pursuant to the registration statement of which this prospectus forms a part. In the event we were to issue additional preferred stock, our borrowing costs, and correspondingly our total annual expenses, including our base management fee as a percentage of our net assets, would increase. See also note 7 below.
- (6) Assumes that we continue to have an aggregate of \$75.4 million of preferred stock with a preferred rate of 7.50% per annum and an aggregate of \$50.5 million of preferred stock with a preferred rate of 8.125% per annum, which were the amounts outstanding as of June 30, 2016.
- (7) Other expenses (\$2.1 million) assumes that other expenses for the year will be proportional to other expenses incurred during the quarter ended June 30, 2016.
- (8)
- (9)

Reflects the estimated annual collateral manager fees that will be indirectly incurred by us in connection with our investments in CLO equity tranches during the twelve months following the date of this prospectus,

17

---

TABLE OF CONTENTS

assuming the CLO equity investments held as of June 30, 2016 and net assets of \$190.1 million. Collateral manager fees are charged on the total assets of the CLO vehicle, including the assets acquired with borrowed funds, but are assumed to be paid from the residual cash flows after interest payments to the senior debt tranches. Therefore, these collateral manager fees (which are generally 0.40% to 0.50% of total assets) are effectively much higher when allocated only to the equity tranches. The debt tranches that we hold generally are not deemed to pay any such collateral manager fees. The calculation also includes operating expense ratios of the CLO vehicles of approximately 0.5%. These are only estimates of such operating expenses, as we generally do not have specific expense information on the CLO vehicles in which we invest and the actual amount of such expenses may be significantly different. Operating expenses of CLO vehicles are not routinely reported to shareholders on a basis consistent with the methodology employed for other estimates. As a result of our investments in such CLO equity investments, our stockholders will be required to pay two levels of fees and expenses in connection with their investment in our common stock, including fees payable under our Investment Advisory Agreement and fees and expenses charged to us on the CLO equity tranches in which we are invested.

(2) Net realized and unrealized capital gains and losses based upon average shares outstanding, include rounding adjustments to reconcile change in net asset value per share.

19

---

TABLE OF CONTENTS

Management monitors estimated taxable earnings, including net investment income and realized capital gains, to determine if a tax return of capital may occur for the year. To the extent the Fund's taxable earnings fall below the (3) total amount of the Fund's distributions for that fiscal year, a portion of those distributions may be deemed a tax return of capital to the Fund's stockholders. The final determination of the nature of our distributions can only be made upon the filing of our tax return.

(4) Based on actual shares outstanding for the period end.

Total return based on market value is calculated assuming that shares of the Fund's common stock were purchased at the market price as of the beginning of the period, and that distribution, capital gains and other distributions were (5) reinvested as provided for in the Fund's distribution reinvestment plan, excluding any discounts, and that the total number of shares were sold at the closing market price per share on the last day of the period. The computation does not reflect any sales commission investors may incur in purchasing or selling shares of the Fund.

TABLE OF CONTENTS

## RISK FACTORS

*Investing in our securities involves a number of significant risks. In addition to the other information contained in this prospectus and any accompanying prospectus supplement, you should consider carefully the following information before making an investment in our securities. The risks set out below are not the only risks we face. Additional risks and uncertainties not presently known to us or not presently deemed material by us might also impair our operations and performance. If any of the following events occur, our business, financial condition and results of operations could be materially and adversely affected. In such case, our net asset value and the trading price of our common stock could decline, and you may lose all or part of your investment.*

### Risks Related to Our Investments

#### **Our equity investment distributions from CLO vehicles will likely be materially reduced if three month LIBOR increases.**

An increase in LIBOR would materially increase the CLO vehicles' financing costs. Since most of the collateral positions within the CLO investments have LIBOR floors, there may not be corresponding increases in investment income (if LIBOR increases but stays below the LIBOR floor rate of such investments) resulting in materially smaller distribution payments to the equity investors.

To illustrate the potential impact of a change in the underlying interest rate on our total estimated taxable income as it pertains to our CLO investments, we have assumed a 1% increase in the underlying three-month LIBOR, and no other change in our CLO portfolio, or to any of the credit, spread, default rate or other factors, as of June 30, 2016. Under this analysis, we currently estimate the effect on total estimated taxable income to equal a decrease of approximately \$13.1 million on an annualized basis, reflecting the portfolio assets held within these CLO vehicles which have implied floors that would be partially affected by a 1% change in the underlying interest rate, compared to the debt carried by those CLO vehicles which are at variable rates and which would be fully affected by a change in three-month LIBOR. Although management believes that this analysis is broadly indicative of our existing LIBOR sensitivity, it does not adjust for changes in any of the other assumptions that could effect the return on CLO equity investments, both positively and negatively (and which could accompany changes to the three-month LIBOR rate), such as default rates, recovery rates, prepayment rates, reinvestment rates, and other factors that could affect the net increase (or decrease) in net assets resulting from operations. Accordingly, it is highly probable that actual results would differ materially from the results under this hypothetical analysis.

We may in the future hedge against interest rate fluctuations by using hedging instruments such as futures, options and forward contracts. While hedging activities may insulate us against adverse changes in interest rates, they may also limit our ability to participate in the benefits of lower interest rates with respect to the investments in our portfolio with fixed interest rates.

#### **Our investments in CLO vehicles may be riskier and less transparent to us and our stockholders than direct investments in the underlying Senior Loans.**

We have initially invested principally in equity and junior debt tranches issued by CLO vehicles. Generally, there may be less information available to us regarding the underlying debt investments held by such CLO vehicles than if we had invested directly in the debt of the underlying companies. As a result, our stockholders will not know the details

of the underlying securities of the CLO vehicles in which we will invest. Our CLO investments will also be subject to the risk of leverage associated with the debt issued by such CLOs and the repayment priority of senior debt holders in such CLO vehicles.

The accounting and tax implications of such investments are complicated. In particular, reported earnings from the equity tranche investments of these CLO vehicles are recorded under GAAP based upon an effective yield calculation. Current taxable earnings on these investments, however, will generally not be determinable until after the end of the fiscal year of each individual CLO vehicle that ends within the Company's fiscal year, even though the investments are generating cash flow. In general, the tax treatment of these investments may result in higher distributable earnings in the early years and a capital loss at maturity, while for reporting purposes the totality of cash flows are reflected in a constant yield to maturity.

TABLE OF CONTENTS

**Our portfolio of investments may lack diversification among CLO vehicles which may subject us to a risk of significant loss if one or more of these CLO vehicles experience a high level of defaults on its underlying Senior Loans.**

Our portfolio may hold investments in a limited number of CLO vehicles. Beyond the asset diversification requirements associated with our qualification as a RIC under the Code, we will not have fixed guidelines for diversification, we will not have any limitations on the ability to invest in any one CLO vehicle, and our investments may be concentrated in relatively few CLO vehicles. As our portfolio is less diversified than the portfolios of some larger funds, we are more susceptible to failure if one or more of the CLO vehicles in which we are invested experiences a high level of defaults on its underlying Senior Loans. Similarly, the aggregate returns we realize may be significantly adversely affected if a small number of investments perform poorly or if we need to write down the value of any one investment.

**The Senior Loan portfolios of the CLO vehicles in which we invest may be concentrated in a limited number of industries or borrowers, which may subject those vehicles, and in turn us, to a risk of significant loss if there is a downturn in a particular industry in which a number of a CLO vehicle's investments are concentrated.**

The CLO vehicles in which we invest may have Senior Loan portfolios that are concentrated in a limited number of industries or borrowers. A downturn in any particular industry or borrower in which a CLO vehicle is heavily invested may subject that vehicle, and in turn us, to a risk of significant loss and could significantly impact the aggregate returns we realize. If an industry in which a CLO vehicle is heavily invested suffers from adverse business or economic conditions, a material portion of our investment in that CLO vehicle could be affected adversely, which, in turn, could adversely affect our financial position and results of operations.

**The application of the risk retention rules to CLOs may have broader effects on the CLO and loan markets in general, potentially resulting in fewer or less desirable investment opportunities for the Company.**

Section 941 of the Dodd-Frank Act added a provision to the Securities Exchange Act of 1934, as amended, requiring the seller, sponsor or securitizer of a securitization vehicle to retain no less than five percent of the credit risk in assets it sells into a securitization and prohibits such securitizer from directly or indirectly hedging or otherwise transferring the retained credit risk. The responsible federal agencies adopted final rules implementing these restrictions on October 22, 2014. These rules will become effective with respect to CLOs two years after publication in the Federal Register. Under the final rules, the asset manager of a CLO would be considered the sponsor of a securitization vehicle and would be required to retain five percent of the credit risk in the CLO, which may be retained horizontally in the equity tranche of the CLO or vertically as a five percent interest in each tranche of the securities issued by the CLO. Although the final rules contain an exemption from such requirements for the asset manager of a CLO if, among other things, the originator or lead arranger of all of the loans acquired by the CLO retain such risk at the asset level and, at origination of such asset, takes a loan tranche of at least 20% of the aggregate principal balance, it is possible that the originators and lead arrangers of loans in this market will not agree to assume this risk or provide such retention at origination of the asset in a manner that would provide meaningful relief from the risk retention requirements for CLO managers.

Our portfolio of investments may lack diversification among CLO vehicles which may subject us to a risk of significant

We believe that the U.S. risk retention requirements imposed for CLO managers under Section 941 of the Dodd-Frank Act has created some uncertainty in the market in regard to future CLO issuance. Given that certain CLO managers may require capital provider partners to satisfy this requirement when it becomes effective on December 24, 2016, we believe that this may create additional opportunities (and additional risks) for us in the future.

**The CLO vehicles in which we invest have debt that ranks senior to our investment.**

We intend to invest primarily in equity and junior debt tranches issued by CLO vehicles. As a result, the CLO vehicles in which we invest will issue and sell or have already issued and sold debt tranches that will rank senior to the tranches in which we invest. By their terms, such tranches may entitle the holders to receive payment of interest or principal on or before the dates on which we are entitled to receive payments with respect to the tranches in which we invest. Also, in the event of insolvency, liquidation, dissolution,

## TABLE OF CONTENTS

reorganization or bankruptcy of a CLO vehicle, holders of senior debt instruments would typically be entitled to receive payment in full before we receive any distribution. After repaying such senior creditors, such CLO vehicle may not have any remaining assets to use for repaying its obligation to us. In the case of tranches ranking equally with the tranches in which we invest, we would have to share on an equal basis any distributions with other creditors holding such securities in the event of an insolvency, liquidation, dissolution, reorganization or bankruptcy of the relevant CLO vehicle. Therefore, we may not receive back the full amount of our investment in a CLO vehicle.

### **Failure by a CLO vehicle in which we are invested to satisfy certain tests will harm our operating results.**

The failure by a CLO vehicle in which we invest to satisfy certain financial covenants, specifically those with respect to adequate collateralization and/or interest coverage tests, could lead to a reduction in its payments to us. In the event that a CLO vehicle failed these certain tests, senior debt holders may be entitled to additional payments that would, in turn, reduce the payments we would otherwise be entitled to receive. Separately, we may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms, which may include the waiver of certain financial covenants, with a defaulting CLO vehicle or any other investment we may make. If any of these occur, it could materially and adversely affect our operating results and cash flows.

### **Our financial results may be affected adversely if one or more of our significant equity or junior debt investments in such CLO vehicles defaults on its payment obligations or fails to perform as we expect.**

Our portfolio consists primarily of equity and junior debt investments in CLO vehicles, which involve a number of significant risks. CLO vehicles are typically very highly levered, and therefore the junior debt and equity tranches that we will invest in are subject to a higher degree of risk of total loss. As of March 31, 2016, the CLO vehicles in which we were invested had average leverage of 10.5 times and ranged from approximately 7.0 times to 14.0 times levered. In particular, investors in CLO vehicles indirectly bear risks of the underlying debt investments held by such CLO vehicles. We generally have the right to receive payments only from the CLO vehicles, and generally do not have direct rights against the underlying borrowers or the entity that sponsored the CLO vehicle. While the CLO vehicles we target generally enable the investor to acquire interests in a pool of Senior Loans without the expenses associated with directly holding the same investments, we will generally pay a proportionate share of the CLO vehicles administrative and other expenses. Although it is difficult to predict whether the prices of indices and securities underlying CLO vehicles will rise or fall, these prices (and, therefore, the prices of the CLO vehicles) will be influenced by the same types of political and economic events that affect issuers of securities and capital markets generally. The failure by a CLO vehicle in which we invest to satisfy certain financial covenants, specifically those with respect to adequate collateralization and/or interest coverage tests, could lead to a reduction in its payments to us. In the event that a CLO vehicle failed those tests, holders of debt senior to us may be entitled to additional payments that would, in turn, reduce the payments we would otherwise be entitled to receive. Separately, we may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms with a defaulting CLO vehicle or any other investment we may make. If any of these occur, it could materially and adversely affect the our operating results and cash flows.

The interests we have acquired in CLO vehicles are generally thinly traded or have only a limited trading market. CLO vehicles are typically privately offered and sold, even in the secondary market. As a result, investments in CLO vehicles may be characterized as illiquid securities. In addition to the general risks associated with investing in debt securities, CLO vehicles carry additional risks, including, but not limited to: (i) the possibility that distributions from

collateral securities will not be adequate to make interest or other payments; (ii) the quality of the collateral may decline in value or default; (iii) the fact that our investments in CLO tranches will likely be subordinate to other senior classes of note tranches thereof; and (iv) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the CLO vehicle or unexpected investment results. Our net asset value may also decline over time if our principal recovery with respect to CLO equity investments is less than the price we paid for those investments.

TABLE OF CONTENTS

**Investing in CLO vehicles, Senior Loans and other high-yield corporate credits involves a variety of risks, any of which may adversely impact our performance.**

**Investment Risk.** An investment in our securities is subject to investment risk, including the possible loss of your entire investment. An investment in our securities represents an indirect investment in the portfolio of equity and junior tranches issued by CLO vehicles and other securities owned by us, and the value of these securities may fluctuate, sometimes rapidly and unpredictably. At any point in time an investment in our securities may be worth less than the original amount invested, even after taking into account distributions paid by us and the ability of shareholders to reinvest dividends. Because of their security features, we believe that certain Senior Loans that are experiencing, or are more likely to experience financial difficulty may represent attractive investment opportunities. We may invest in certain Senior Loans of borrowers that have filed for bankruptcy protection. Because of the security provided in certain Senior Loans, we believe that we may be able to recover more of our investment in certain defaulted Senior Loans than would be the case for some other types of defaulted debt securities. Nevertheless, there is no assurance that the sale of collateral (which was pledged against the Senior Loan) would raise enough cash to satisfy the borrower's obligation or that the collateral can or will be liquidated.

**Market Risk.** Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices and includes interest rate risk, foreign currency risk and other price risks, such as index price risk. We may use derivative instruments to hedge the investment portfolio against currency risks. Our investments in CLO vehicles typically have no significant assets other than the collateral. Accordingly, payments on the equity and junior debt instruments we intend to initially target are payable solely from the cash flows from the collateral, net of all management fees and other expenses. Quarterly distributions or interest payments to us as a holder of equity or junior debt instruments, respectively, will only be made after payments due on any outstanding senior debt tranches have been made in full for such quarter.

**Rating Risk.** Rating agencies, including Moody's and Standard and Poor's, have and may continue to downgrade the tranches of CLO vehicles that we are targeting and, therefore, these investments may be seen as riskier than they were previously thought to be. We cannot assure you that the CLO vehicles in which we invest, or the tranches of those CLO vehicles that we hold, will not experience downgrades. To the extent our portfolio experiences such downgrades, the value of our investments, and our ability to liquidate such investments, would likely be impaired. A significant impairment of any of our investments may have a material adverse effect on our financial results and operations.

**Interest Rate Risk.** Our investments have initially been focused on investments in equity and junior debt tranches issued by CLO vehicles. Our investments have some exposure to interest rate risk and our investments in equity tranches of CLO vehicles have dollar-for-dollar interest rate risk on the equity portion. We expect to have less significant interest rate-related fluctuations in our net asset value per share than investment companies investing primarily in fixed income securities. When interest rates decline, the value of a fixed income portfolio can normally be expected to rise. Conversely, when interest rates rise, the value of a fixed income portfolio can normally be expected to decline. Currently, LIBOR rates are at historic lows. Although the income available to us will vary, we expect that our acquisition of interests in CLO vehicles may minimize fluctuations in our net asset value resulting from changes in market interest rates.

However, because floating or variable rates only reset periodically, changes in prevailing interest rates can be expected to cause some fluctuations in our net asset value. Similarly, a sudden and significant increase in market interest rates may cause a decline in our net asset value. In addition, any debt instruments that allow the borrower to opt between LIBOR-based interest rates and interest rates based on bank prime rates may have an impact on our net

Investing in CLO vehicles, Senior Loans and other high-yield corporate credits involves a variety of risks, any of wh

asset value. A material decline in our net asset value may impair our ability to maintain required levels of asset coverage, to the extent we elect to use debt to finance investments.

**Credit Risk.** Credit risk is the risk that one or more investments in a portfolio will decline in price or fail to pay interest or principal when due because the issuer of the security experiences a decline in its financial condition. While a senior position in the capital structure of a corporate borrower may provide some protection to the CLO vehicles in which we invest, losses or other reductions in collateral may still occur in the portfolios of such CLO vehicles because the market value of such loans is affected by the creditworthiness

## TABLE OF CONTENTS

of borrowers and by general economic and specific industry conditions. As we invest in equity and junior debt tranches of CLO vehicles, we are exposed to a greater amount of credit risk than a fund which invests in senior debt or investment grade securities. The prices of primarily non-investment grade securities are more sensitive to negative developments, such as a decline in a CLO vehicle's collateral or cash flows or a general economic downturn, than are the prices of more senior debt securities. Securities of below investment grade quality, which are often referred to as junk, are predominantly speculative with respect to the issuer's capacity to pay interest and repay principal when due and therefore involve a greater risk of default. We will typically be in a first loss or subordinated position with respect to realized losses on the collateral of each investment we make in a CLO vehicle. The leveraged nature of the CLO vehicle, in particular, magnifies the adverse impact of collateral defaults. In addition, we may purchase participations in leveraged corporate loans. Such participations have rights that are more limited than the rights provided under assignments. In a participation the contractual relationship is typically with the lender selling the participation, but not with the borrower. As a result, a participant assumes the credit risk of the lender selling the participation in addition to the credit risk of the borrower. In the event of the insolvency of the lender selling the participation, a participant may be treated as a general creditor of the lender and may not have a senior claim to the lender's interest in the Senior Loan.

**Liquidity Risk.** Liquidity risk is defined as the risk that we may not be able to settle or meet our obligations on time or at a reasonable price. We may invest up to 100% of our portfolio in securities that are considered illiquid. Illiquid securities are securities which cannot be sold within seven days in the ordinary course of business at approximately the value used by us in determining our net asset value. We may not be able to readily dispose of such securities at prices that approximate those at which we could sell such securities if they were more widely-traded and, as a result of such illiquidity, we may have to sell other investments or engage in borrowing transactions to raise cash to meet our obligations. Limited liquidity can also affect the market price of securities, thereby adversely affecting our net asset value and ability to make dividend distributions. Some instruments issued by CLO vehicles may not be readily marketable and may be subject to restrictions on resale. Securities issued by CLO vehicles are generally not listed on any U.S. national securities exchange and no active trading market may exist for the securities in which we invest.

Although a secondary market may exist for our investments, the market for our investments may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods. As a result, these types of investments may be more difficult to value. In addition, we believe that ownership of CLO equity and junior debt instruments has generally been distributed across a wide range of holders, some of whom we believe may continue to face near- to intermediate-term liquidity issues. Further, we believe that larger institutional investors with sufficient resources to source, analyze and negotiate the purchase of these assets may refrain from purchases of the size that we are targeting, thereby reducing the prospective investor population, which would limit our ability to sell our position in a CLO vehicle if we choose to or need to do so. We have no limitation on the amount of our assets which may be invested in securities that are not readily marketable or are subject to restrictions on resale. Further, Senior Loans generally are not listed on any national securities exchange or automated quotation system and no active trading market exists for many Senior Loans. As a result, many Senior Loans are illiquid, meaning that we may not be able to sell them quickly at a fair price. The market for illiquid securities is more volatile than the market for liquid securities.

### **Investments in foreign securities may involve significant risks in addition to the risks inherent in U.S. investments.**

Most if not all, of our investments are in securities issued by foreign entities, including CLO vehicles that are formed in foreign tax havens. Investing in foreign entities may expose us to additional risks not typically associated with investing in U.S. issues. These risks include changes in exchange control regulations, political and social instability, expropriation, imposition of foreign taxes, less liquid markets and less available information than is generally the case in the United States, higher transaction costs, less government supervision of exchanges, brokers and issuers, less developed bankruptcy laws, difficulty in enforcing contractual obligations, lack of uniform accounting and auditing

standards and greater price volatility. Further, we, and the CLO vehicles in which we invest, may have difficulty enforcing creditor's rights in foreign jurisdictions. In addition, the underlying companies of the CLO vehicles in which we invest may be foreign, which may create greater exposure for us to foreign economic developments.

## TABLE OF CONTENTS

Although we expect that most of our investments will be U.S. dollar-denominated, any investments denominated in a foreign currency will be subject to the risk that the value of a particular currency will change in relation to one or more other currencies. Among the factors that may affect currency values are trade balances, the level of short-term interest rates, differences in relative values of similar assets in different currencies, long-term opportunities for investment and capital appreciation, and political developments. We may employ hedging techniques to minimize these risks, but we can offer no assurance that we will, in fact, hedge currency risk, or that if we do, such strategies will be effective.

### **We may expose ourselves to risks if we engage in hedging transactions.**

While we do not currently engage in hedging transactions, if we engage in hedging transactions, we may expose ourselves to risks associated with such transactions. We may utilize instruments such as forward contracts, currency options and interest rate swaps, caps, collars and floors to seek to hedge against fluctuations in the relative values of our portfolio positions from changes in currency exchange rates and market interest rates. Hedging against a decline in the values of our portfolio positions does not eliminate the possibility of fluctuations in the values of such positions or prevent losses if the values of such positions decline. However, such hedging can establish other positions designed to gain from those same developments, thereby offsetting the decline in the value of such portfolio positions. Such hedging transactions may also limit the opportunity for gain if the values of the underlying portfolio positions increase. It may not be possible to hedge against an exchange rate or interest rate fluctuation that is so generally anticipated that we are not able to enter into a hedging transaction at an acceptable price. Moreover, for a variety of reasons, we may not seek to establish a perfect correlation between such hedging instruments and the portfolio holdings being hedged. Any such imperfect correlation may prevent us from achieving the intended hedge and expose us to risk of loss. In addition, it may not be possible to hedge fully or perfectly against currency fluctuations affecting the value of securities denominated in non-U.S. currencies because the value of those securities is likely to fluctuate as a result of factors not related to currency fluctuations.

### **Any unrealized losses we experience on our portfolio may be an indication of future realized losses, and could reduce our income available for distribution.**

As a registered closed-end management investment company, we are required to carry our investments at market value or, if no market value is ascertainable, at the fair value as determined in good faith by our Board of Directors. Decreases in the market values or fair values of our investments will be recorded as unrealized depreciation. Any unrealized losses in our portfolio could be an indication of an issuer's inability to meet its repayment obligations or distribution expectations to us with respect to the affected investments. This could result in realized losses in the future and also in reductions of our income available for distribution in future periods.

### **Our investments in CLO vehicles may be subject to special anti-deferral provisions that could result in us incurring tax or recognizing income prior to receiving cash distributions related to such income.**

The CLO vehicles in which we invest generally constitute PFICs. Because we acquire investments in PFICs (including equity tranche investments in CLO vehicles that are PFICs), we may be subject to U.S. federal income tax on a portion of any excess distribution or gain from the disposition of such investments even if such income is distributed as a taxable dividend by us to our stockholders. Certain elections may be available to mitigate or eliminate such tax on excess distributions, but such elections (if available) will generally require us to recognize our share of the PFIC's income for each year regardless of whether we receive any distributions from such PFIC. We must nonetheless distribute such income to maintain our status as a RIC.

If we hold more than 10% of the shares in a foreign corporation that is treated as a controlled foreign corporation ( CFC ) (including equity tranche investments in a CLO vehicle treated as a CFC), we may be treated as receiving a deemed distribution (taxable as ordinary income) each year from such foreign corporation in an amount equal to our pro rata share of the corporation's income for the tax year (including both ordinary earnings and capital gains). If we are required to include such deemed distributions from a CFC in our income, we will be required to distribute such income to maintain our RIC status regardless of whether or not the CFC makes an actual distribution during such year.

TABLE OF CONTENTS

If we are required to include amounts in income prior to receiving distributions representing such income, we may have to sell some of our investments at times and/or at prices we would not consider advantageous, raise additional debt or equity capital or forgo new investment opportunities for this purpose. If we are not able to obtain cash from other sources, we may fail to qualify for RIC tax treatment and thus become subject to corporate-level U.S. federal income tax. For additional discussion regarding the tax implications of a RIC, see Material U.S. Federal Income Tax Considerations Taxation as a Regulated Investment Company.

**If a CLO vehicle in which we invest fails to comply with certain U.S. tax disclosure requirements, such CLO may be subject to withholding requirements that could materially and adversely affect our operating results and cash flows.**

Legislation commonly referred to as the Foreign Account Tax Compliance Act, or FATCA, imposes a withholding tax of 30% on payments of U.S. source interest and dividends, or gross proceeds from the disposition of an instrument that produces U.S. source interest or dividends paid after December 31, 2018, to certain non-U.S. entities, including certain non-U.S. financial institutions and investment funds, unless such non-U.S. entity complies with certain reporting requirements regarding its United States account holders and its United States owners. Most CLO vehicles in which we invest will be treated as non-U.S. financial entities for this purpose, and therefore will be required to comply with these reporting requirements to avoid the 30% withholding. If a CLO vehicle in which we invest fails to properly comply with these reporting requirements, it could reduce the amounts available to distribute to equity and junior debt holders in such CLO vehicle, which could materially and adversely affect our operating results and cash flows.

**Uncertainty relating to the LIBOR calculation process may adversely affect the value of our portfolio of the LIBOR-indexed, floating-rate debt securities.**

Concerns have been publicized that some of the member banks surveyed by the British Bankers Association ( BBA ) in connection with the calculation of LIBOR across a range of maturities and currencies may have been under-reporting or otherwise manipulating the inter-bank lending rate applicable to them in order to profit on their derivatives positions or to avoid an appearance of capital insufficiency or adverse reputational or other consequences that may have resulted from reporting inter-bank lending rates higher than those they actually submitted. A number of BBA member banks have entered into settlements with their regulators and law enforcement agencies with respect to alleged manipulation of LIBOR, and investigations by regulators and governmental authorities in various jurisdictions are ongoing.

Actions by the BBA, regulators or law enforcement agencies may result in changes to the manner in which LIBOR is determined. Uncertainty as to the nature of such potential changes may adversely affect the market for LIBOR-based securities, including our portfolio of LIBOR-indexed, floating-rate debt securities. In addition, any further changes or reforms to the determination or supervision of LIBOR may result in a sudden or prolonged increase or decrease in reported LIBOR, which could have an adverse impact on the market for LIBOR-based securities or the value of our portfolio of LIBOR-indexed, floating-rate debt securities.

**The CLO equity market recently experienced a significant downturn, which negatively impacted our net asset value per share and, if these reduced values are realized over time, you may not receive dividends or our dividends may**

If a CLO vehicle in which we invest fails to comply with certain U.S. tax disclosure requirements, such CLO may be

**decline or may not grow over time.**

There has been a significant recent price decline in the CLO equity market, in which we are an active participant. As a result, our financial performance, including the fair value of our portfolio and our net asset value per share, declined significantly and our total return based on market value was (28.97)% for the fiscal year ended March 31, 2016. Due to the continued uncertainty in the CLO equity market, we cannot assure you that we will achieve expected investment results and/or maintain our current level of cash distributions. Our future dividends are dependent upon the investment income we receive on our portfolio investments, including our CLO equity investments. To the extent such CLO investments are terminated prior to the specified maturity date such proceeds derived from a termination may be less than originally contemplated at that time of such investment. This may result in proceeds which may not be of a sufficient amount to invest in future CLO investments in order to generate cash returns that will enable us to maintain the same level of dividends. This may result in a meaningful reduction in, or complete cessation of, our dividends going

TABLE OF CONTENTS

forward. In addition, due to the asset coverage test applicable to us as a registered closed-end management investment company, a reduction in the fair value of our investments may limit our ability to make distributions.

## **Risks Relating to Our Business and Structure**

### **We have a limited operating history as a closed-end investment company.**

We are a non-diversified, closed-end management investment company with a limited operating history of only four years. As a result, there is limited historical financial information on which you can evaluate an investment in our company or our prior performance. We are subject to all of the business risks and uncertainties associated with any business with a limited operating history, including the risk that we will not achieve our investment objective and that the value of your investment could decline substantially or become worthless. We anticipate that it may take approximately one to three months to invest substantially all of the net proceeds of this offering in our targeted investments. During this period, we will invest in temporary investments, such as cash, cash equivalents, U.S. government securities and other high-quality debt investments that mature in one year or less, which we expect will earn yields substantially lower than the interest or other income that we anticipate receiving in respect of investments in CLO vehicles or other debt securities. As a result, our dividends may be substantially lower than the dividends that we expect to pay when the proceeds of this offering have been fully invested in accordance with our investment objective.

### **Our investment portfolio is recorded at fair value, with our Board of Directors having final responsibility for overseeing, reviewing and approving, in good faith, its estimate of fair value and, as a result, there will be uncertainty as to the value of our portfolio investments.**

Under the 1940 Act, we are required to carry our portfolio investments at market value or, if there is no readily available market value, at fair value as determined by us in accordance with our written valuation policy with our Board of Directors having final responsibility for overseeing, reviewing and approving, in good faith, its estimate of fair value. Typically, there will not be a public market for the type of investments we target. As a result, we will value these securities quarterly at fair value based on relevant information compiled by our investment adviser, third-party pricing services (when available) and our Valuation Committee and with the oversight, review and approval of our Board of Directors.

The determination of fair value and, consequently, the amount of unrealized gains and losses in our portfolio, are to a certain degree subjective and dependent on a valuation process approved by our Board of Directors. Certain factors that may be considered in determining the fair value of our investments include available indicative bids or quotations, as well as external events, such as private mergers, sales and acquisitions involving comparable companies. Because such valuations, and particularly valuations of private securities, are inherently uncertain, they may fluctuate over short periods of time and may be based on estimates. The fair value of our investments may differ materially from the values that would have been used if an active public market for these securities existed. The fair value of our investments have a material impact on our net earnings through the recording of unrealized appreciation or depreciation of investments and may cause our net asset value on a given date to materially understate or overstate the value that we may ultimately realize on one or more of our investments. Investors purchasing our securities based on an overstated net asset value may pay a higher price than the value of our investments might warrant. Conversely, investors selling shares during a period in which the net asset value understates the value of our investments may receive a lower price for their shares than the value of our investments might warrant.

**Our financial condition and results of operations depend on our ability to effectively manage and deploy capital.**

Our ability to achieve our investment objective depends on our ability to effectively manage and deploy capital, which depends, in turn, on our investment adviser's ability to identify, evaluate and monitor, and our ability to acquire, investments that meet our investment criteria.

Accomplishing our investment objective on a cost-effective basis is largely a function of our investment adviser's handling of the investment process, its ability to provide competent, attentive and efficient services and our access to investments offering acceptable terms, either in the primary or secondary markets. Even if

## TABLE OF CONTENTS

we are able to grow and build upon our investment operations, any failure to manage our growth effectively could have a material adverse effect on our business, financial condition, results of operations and prospects. The results of our operations will depend on many factors, including the availability of opportunities for investment, readily accessible short and long-term funding alternatives in the financial markets and economic conditions. Furthermore, if we cannot successfully operate our business or implement our investment policies and strategies as described herein, it could negatively impact our ability to pay distributions.

### **We may face increasing competition for investment opportunities.**

We may compete for investments with other investment funds (potentially including private equity funds, mezzanine funds and business development companies), as well as traditional financial services companies, which could include commercial banks, investment banks, finance companies and other sources of funding. Many of our competitors are substantially larger and have considerably greater financial, technical and marketing resources than us. For example, some competitors may have a lower cost of capital and access to funding sources that may not be available to us, including from federal government agencies through federal rescue programs such as the U.S. Department of Treasury's Financial Stability Plan (formerly known as the Troubled Asset Relief Program). In addition, some of our competitors may have higher risk tolerances or different risk assessments than we have. These characteristics could allow our competitors to consider a wider variety of investments, establish more relationships and offer higher pricing than we are willing to offer to potential sellers. We may lose investment opportunities if our competitors are willing to pay more for the types of investments that we intend to target. If we are forced to pay more for our investments, we may not be able to achieve acceptable returns on our investments or may bear substantial risk of capital loss. An increase in the number and/or the size of our competitors in our target markets could force us to accept less attractive investments. Furthermore, many of our competitors have greater experience operating under, or are not be subject to, the regulatory restrictions that the 1940 Act imposes on us as a closed-end management investment company.

### **We are dependent upon Oxford Lane Management's key personnel for our future success.**

We depend on the diligence, skill and network of business contacts of Messrs. Cohen, Rosenthal and Monasebian, who serve as the investment committee of Oxford Lane Management, and who lead Oxford Lane Management's investment team. Messrs. Cohen, Rosenthal and Monasebian, together with the other investment professionals available to Oxford Lane Management, evaluate, acquire and monitor our investments. Our future success depends on the continued service of Messrs. Cohen, Rosenthal and Monasebian and the other members of Oxford Lane Management's investment team. We cannot assure you that unforeseen business, medical, personal or other circumstances would not lead any such individual to terminate his relationship with us. The loss of Messrs. Cohen, Rosenthal or Monasebian, or any of the other investment professionals who serve on Oxford Lane Management's investment team, could have a material adverse effect on our ability to achieve our investment objective as well as on our financial condition and results of operations. In addition, we can offer no assurance that Oxford Lane Management will continue indefinitely as our investment adviser.

The members of Oxford Lane Management's investment team are and may in the future become affiliated with entities engaged in business activities similar to those intended to be conducted by us, and may have conflicts of interest in allocating their time. In particular, the members of Oxford Lane Management's investment team, including Messrs. Cohen, Rosenthal and Monasebian, are currently actively involved in the management of the portfolios of TICC Capital Corp., a publicly-traded business development company that invests principally in the debt of U.S.-based companies, and TICC CLO 2012-1 LLC, a CLO structured finance vehicle that invests in a diversified portfolio of Senior Loans, the assets of which are included in the gross assets of TICC Capital Corp. Additionally, Oxford Lane

Management's investment team also manages the portfolio of Oxford Bridge, LLC, a private fund that invests principally in the equity of CLOs. Neither Messrs. Cohen, Rosenthal or Monasebian, or the investment team, is required to dedicate any specific portion of their time to the activities of Oxford Lane Capital; moreover, they are engaged in other business activities which divert their time and attention.

TABLE OF CONTENTS

**Our success depends on the ability of Oxford Lane Management to retain qualified personnel in a competitive environment.**

Our success requires that Oxford Lane Management retain investment and administrative personnel in a competitive market. Its ability to attract and retain personnel with the requisite credentials, experience and skills depends on several factors including, but not limited to, its ability to offer competitive wages, benefits and professional growth opportunities. Many of the entities, including investment funds (such as private equity funds, mezzanine funds and business development companies) and traditional financial services companies, with which we compete for experienced personnel have greater resources than we have.

**There are significant potential conflicts of interest which could impact our investment returns.**

Oxford Lane Management's investment team presently manages the portfolios of TICC Capital Corp., a publicly-traded business development company that invests principally in the debt of U.S.-based companies, and TICC CLO 2012-1 LLC, a CLO structured finance vehicle that invests in a diversified portfolio of Senior Loans, the assets of which are included in the gross assets of TICC Capital Corp. Additionally, Oxford Lane Management's investment team also manages the portfolio of Oxford Bridge, LLC, a private fund that invests principally in the equity of CLOs. In addition, our executive officers and directors, as well as the current and future members of our investment adviser, Oxford Lane Management, may serve as officers, directors or principals of other entities that operate in the same or a related line of business as we do. Accordingly, they may have obligations to investors in those entities, the fulfillment of which obligations may not be in the best interests of us or our stockholders. Each of TICC Capital Corp., TICC CLO 2012-1 LLC and Oxford Bridge, LLC, as well as any affiliated investment vehicle formed in the future and managed by our investment adviser or its affiliates may, notwithstanding different stated investment objectives, have overlapping investment objectives with our own and, accordingly, may invest in asset classes similar to those targeted by us. As a result, Oxford Lane Management's investment team may face conflicts in allocating investment opportunities between us and such other entities. Although Oxford Lane Management's investment team will endeavor to allocate investment opportunities in a fair and equitable manner, it is possible that, in the future, we may not be given the opportunity to participate in investments made by investment funds, including TICC Capital Corp., TICC CLO 2012-1 LLC and Oxford Bridge, LLC, managed by our investment adviser or an investment manager affiliated with our investment adviser. In any such case, when Oxford Lane Management's investment team identifies an investment, it will be required to choose which investment fund should make the investment, although BDC Partners maintains an allocation policy to ensure the equitable distribution of such investment opportunities, consistent with the requirements of the 1940 Act.

In certain instances, we may co-invest on a concurrent basis with affiliates of our investment adviser, subject to compliance with applicable regulations and regulatory guidance and our written allocation procedures. Such co-investment may require exemptive relief from the SEC. If we elect to seek such relief, there can be no assurance when, or if, such relief may be obtained.

In addition, we will reimburse BDC Partners, an affiliate of Oxford Lane Management, our allocable portion of overhead and other expenses incurred by BDC Partners in performing its obligations under the Administration Agreement, including rent, the fees and expenses associated with performing administrative functions, and our allocable portion of the compensation of our Chief Financial Officer and any administrative support staff, including accounting personnel. We will also pay the costs associated with the functions performed by our Chief Compliance Officer under the terms of an agreement between us and Alaric. These arrangements may create conflicts of interest that our Board of Directors must monitor. Oxford Lane Management will not be reimbursed for any

performance-related compensation of its employees.

**Our incentive fee structure and the formula for calculating the fee payable to Oxford Lane Management may incentivize Oxford Lane Management to pursue speculative investments, use leverage when it may be unwise to do so, or refrain from de-levering when it would otherwise be appropriate to do so.**

The incentive fee payable by us to Oxford Lane Management may create an incentive for Oxford Lane Management to pursue investments on our behalf that are riskier or more speculative than would be the case in the absence of such compensation arrangement. Such a practice could result in our investing in more speculative securities than would otherwise be the case, which could result in higher investment losses,

30

---

TABLE OF CONTENTS

particularly during economic downturns. The incentive fee payable to our investment adviser is based on our pre-incentive net investment income, as calculated in accordance with our Investment Advisory Agreement. In addition, our base management fee is calculated on the basis of our gross assets, including assets acquired through the use of leverage. This may encourage our investment adviser to use leverage to increase the aggregate amount of and the return on our investments, even when it may not be appropriate to do so, and to refrain from de-levering when it would otherwise be appropriate to do so. Under certain circumstances, the use of leverage may increase the likelihood of default, which would impair the value of our securities.

We may invest, to the extent permitted by law, in the securities and other instruments of other investment companies, including private funds, and, to the extent we so invest, will bear our ratable share of any such investment company's expenses, including management and performance fees. We will also remain obligated to pay management and incentive fees to Oxford Lane Management with respect to the assets invested in the securities and other instruments of other investment companies. With respect to each of these investments, each of our stockholders will bear his or her share of the management and incentive fee of Oxford Lane Management as well as indirectly bearing the management and performance fees and other expenses of any investment companies in which we invest.

In the course of our investing activities, we will pay management and incentive fees to Oxford Lane Management and reimburse Oxford Lane Management for certain expenses it incurs. As a result, investors in our common stock will invest on a gross basis and receive distributions on a net basis after expenses, resulting in a lower rate of return than an investor might achieve through direct investments.

**A general increase in interest rates may have the effect of making it easier for our investment adviser to receive incentive fees, without necessarily resulting in an increase in our net earnings.**

Given the structure of our Investment Advisory Agreement with Oxford Lane Management, any general increase in interest rates will likely have the effect of making it easier for Oxford Lane Management to meet the quarterly hurdle rate for payment of income incentive fees under the Investment Advisory Agreement without any additional increase in relative performance on the part of our investment adviser. In addition, in view of the catch-up provision applicable to income incentive fees under the Investment Advisory Agreement, our investment adviser could potentially receive a significant portion of the increase in our investment income attributable to such a general increase in interest rates. If that were to occur, our increase in net earnings, if any, would likely be significantly smaller than the relative increase in our investment adviser's income incentive fee resulting from such a general increase in interest rates.

**Our investment adviser has the right to resign on 60 days' notice, and we may not be able to find a suitable replacement within that time, resulting in a disruption in our operations that could adversely affect our financial condition, business and results of operations.**

Our investment adviser has the right, under the Investment Advisory Agreement, to resign at any time upon 60 days' written notice, whether we have found a replacement or not. If our investment adviser resigns, we may not be able to find a new investment adviser or hire internal management with similar expertise and ability to provide the same or equivalent services on acceptable terms within 60 days, or at all. If we are unable to do so quickly, our operations are likely to experience a disruption, our financial condition, business and results of operations as well as our ability to pay distributions are likely to be adversely affected and the market price of our shares may decline. In addition, the coordination of our internal management and investment activities is likely to suffer if we are unable to identify and

Our incentive fee structure and the formula for calculating the fee payable to Oxford Lane Management may be incentive

reach an agreement with a single institution or group of executives having the expertise possessed by our investment adviser and its affiliates. Even if we are able to retain comparable management, whether internal or external, the integration of such management and their lack of familiarity with our investment objective may result in additional costs and time delays that may adversely affect our financial condition, business and results of operations.

**Our investment adviser may not be able to achieve the same or similar returns as those achieved by Messrs. Cohen and Rosenthal while managing other portfolios.**

Although Messrs. Cohen and Rosenthal have experience managing other investment portfolios, including those of TICC Capital Corp., a publicly traded business development company that invests principally in the debt of U.S.-based companies, TICC CLO 2012-1 LLC, a CLO structured finance vehicle that invests in a

TABLE OF CONTENTS

diversified portfolio of Senior Loans, the assets of which are included in the gross assets of TICC Capital Corp. and Oxford Bridge, LLC, a private fund that invests principally in the equity of CLOs, their track record and prior achievements are not necessarily indicative of future results that will be achieved by our investment adviser. We cannot assure you that we will be able to achieve the results realized by other vehicles managed by Messrs. Cohen and Rosenthal, including TICC Capital Corp.

**Regulations governing our operation as a registered closed-end management investment company affect our ability to raise additional capital and the way in which we do so. The raising of debt capital may expose us to risks, including the typical risks associated with leverage.**

Although we have no current intention to do so, we may in the future issue debt securities or additional shares of preferred stock and/or borrow money from banks or other financial institutions, which we refer to collectively as senior securities, up to the maximum amount permitted by the 1940 Act. Under the provisions of the 1940 Act, we will be permitted, as a registered closed-end management investment company, to issue senior securities representing indebtedness so long as our asset coverage ratio with respect thereto, defined under the 1940 Act as the ratio of our gross assets (less all liabilities and indebtedness not represented by senior securities) to our outstanding senior securities representing indebtedness, is at least 300% after each issuance of such senior securities. In addition, we will be permitted to issue additional shares of preferred stock so long as our asset coverage ratio with respect thereto, defined under the 1940 Act as the ratio of our gross assets (less all liabilities and indebtedness not represented by senior securities) to our outstanding senior securities representing indebtedness, plus the aggregate involuntary liquidation preference of our outstanding preferred stock, is at least 200% after each issuance of such preferred stock. If the value of our assets declines, we may be unable to satisfy this test. If that happens, we may be required to sell a portion of our investments and, depending on the nature of our leverage, repay a portion of our indebtedness or redeem outstanding shares of preferred stock, in each case at a time when doing so may be disadvantageous. Also, any amounts that we use to service our indebtedness or preferred dividends would not be available for distributions to our common stockholders. Furthermore, as a result of issuing senior securities, we would also be exposed to typical risks associated with leverage, including an increased risk of loss. If we issue additional preferred stock, the preferred stock would continue to rank senior to common stock in our capital structure, preferred stockholders would continue to have separate voting rights on certain matters and might have other rights, preferences, or privileges more favorable than those of our common stockholders, and the issuance of additional shares of preferred stock could have the effect of delaying, deferring or preventing a transaction or a change of control that might involve a premium price for holders of our common stock or otherwise be in your best interest.

We are not generally able to issue and sell our common stock at a price below net asset value per share, other than in connection with a rights offering to our existing stockholders. We may, however, sell our common stock at a price below the then-current net asset value per share of our common stock if our Board of Directors determines that such sale is in the best interests of Oxford Lane Capital and our stockholders, and our stockholders approve such sale. In any such case, the price at which our securities are to be issued and sold may not be less than a price that, in the determination of our Board of Directors, closely approximates the market value of such securities (less any distributing commission or discount). If we raise additional funds by issuing more common stock, then the percentage ownership of our stockholders at that time will decrease, and you may experience dilution.

**We may borrow money and/or issue preferred stock to leverage our portfolio, which would magnify the potential for gain or loss on amounts invested and will increase the risk of investing in us.**

Our investment adviser may not be able to achieve the same or similar returns as those achieved by Messrs. Cohen and Rosenthal.

The use of leverage magnifies the potential for gain or loss on amounts invested and, therefore, increases the risks associated with investing in our securities. We presently have an aggregate of \$75.4 million of preferred stock with a preferred rate of 7.50% per annum and an aggregate of \$50.5 million of preferred stock with a preferred rate of 8.125% per annum. Although we have no current intention to do so, we may borrow from and issue senior securities, including additional shares of preferred stock, to banks, insurance companies and other lenders in the future. Holders of these senior securities will have fixed dollar claims on our assets that are superior to the claims of our common stockholders, and we would expect such lenders to seek recovery against our assets in the event of a default. If the value of our assets decreases, leveraging would

TABLE OF CONTENTS

cause net asset value to decline more sharply than it otherwise would have had we not leveraged. Similarly, any decrease in our income would cause net income to decline more sharply than it would have had we not borrowed. Such a decline could also negatively affect our ability to make dividend payments on our common stock. Leverage is generally considered a speculative investment technique. Our ability to service any debt that we incur will depend largely on our financial performance and will be subject to prevailing economic conditions and competitive pressures.

Moreover, as the management fee payable to our investment adviser, Oxford Lane Management, will be payable based on our gross assets, including those assets acquired through the use of leverage, Oxford Lane Management will have a financial incentive to incur leverage which may not be consistent with our stockholders' interests. In addition, our common stockholders will bear the burden of any increase in our expenses as a result of leverage, including any increase in the management fee payable to Oxford Lane Management.

As a registered closed-end management investment company, we will generally be required to meet an asset coverage ratio with respect to our outstanding senior securities representing indebtedness, defined under the 1940 Act as the ratio of our gross assets (less all liabilities and indebtedness not represented by senior securities) to our outstanding senior securities representing indebtedness, of at least 300% after each issuance of senior securities representing indebtedness. In addition, we will generally be required to meet an asset coverage ratio with respect to our outstanding preferred stock, as defined under the 1940 Act as the ratio of our gross assets (less all liabilities and indebtedness not represented by senior securities) to our outstanding senior securities representing indebtedness, plus the aggregate involuntary liquidation preference of our outstanding preferred stock, of at least 200% immediately after each issuance of such preferred stock. If this ratio declines, we may not be able to incur additional debt or issue additional shares of preferred stock and could be required by law to sell a portion of our investments to repay some debt or redeem some preferred stock when it is disadvantageous to do so, which could have a material adverse effect on our operations, and we may not be able to make distributions. The amount of leverage that we employ will depend on our investment adviser's and our Board of Directors' assessment of market and other factors at the time of any proposed borrowing. We cannot assure you that we will be able to obtain credit at all or on terms acceptable to us.

In addition, any debt facility into which we may enter would likely impose financial and operating covenants that restrict our business activities, including limitations that could hinder our ability to finance additional loans and investments or to make the distributions required to maintain our status as a RIC under Subchapter M of the Code.

**Illustration.** The following table illustrates the effect of leverage on returns from an investment in our common stock assuming various annual returns, net of expenses. The calculations in the table below are hypothetical and actual returns may be higher or lower than those appearing below.

Assumed Return on Our Portfolio <sup>(1)</sup> (net of expenses)	-10.0%	-5.0%	0.0%	5.0%	10.0%
Corresponding net return to common stockholder	(21.6)%	(13.3)%	(5.1)%	3.2%	11.5%

(1) Assumes gross assets of \$318.7 million and \$125.9 million of leverage (which reflects \$125.9 million of preferred stock issued and outstanding as of June 30, 2016, and assumes net assets of \$190.1 million (which has been adjusted to reflect the issuance of an additional \$25.0 million of common stock) and a cost of funds of approximately 7.75%.

Our portfolio must have an annual return of at least 3.58% in order to cover the annual dividend payments on the 7.50% Series 2023 Term Preferred Shares and the 8.125% Series 2024 Term Preferred Shares that are outstanding as of June 30, 2016.

## **We may experience fluctuations in our quarterly results.**

We could experience fluctuations in our quarterly operating results due to a number of factors, including our ability or inability to make investments that meet our investment criteria, the interest rate payable on the debt securities we acquire, the level of portfolio dividend and fee income, the level of our expenses, variations in and the timing of the recognition of realized and unrealized gains or losses, the degree to which we encounter competition in our markets and general economic conditions. As a result of these factors, results for any period should not be relied upon as being indicative of performance in future periods.

---

TABLE OF CONTENTS

**Our Board of Directors is authorized to reclassify any unissued shares of common stock into one or more classes of preferred stock, which could convey special rights and privileges to its owners.**

Under Maryland General Corporation Law and our charter, our Board of Directors is authorized to classify and reclassify any authorized but unissued shares of stock into one or more classes of stock, including preferred stock. Prior to issuance of shares of each class or series, the Board of Directors will be required by Maryland law and our charter to set the terms, preferences, conversion or other rights, voting powers, restrictions, limitations as to dividends or other distributions, qualifications and terms or conditions of redemption for each class or series. Thus, the Board of Directors could authorize the issuance of shares of preferred stock with terms and conditions which could have the effect of delaying, deferring or preventing a transaction or a change in control that might involve a premium price for holders of our common stock or otherwise be in their best interest. The cost of any such reclassification would be borne by our common stockholders. Certain matters under the 1940 Act require the separate vote of the holders of any issued and outstanding preferred stock. For example, holders of preferred stock would vote separately from the holders of common stock on a proposal to cease operations as a registered closed-end management investment company. In addition, the 1940 Act provides that holders of preferred stock are entitled to vote separately from holders of common stock to elect two preferred stock directors. We have issued preferred stock and may issue additional shares of preferred stock in the future. These effects, among others, could have an adverse effect on your investment in our common stock.

**Our Board of Directors may change our operating policies and strategies without prior notice or stockholder approval, the effects of which may be adverse.**

Our Board of Directors will have the authority to modify or waive our current operating policies, investment criteria and strategies, other than those that we have deemed to be fundamental, without prior notice and without stockholder approval. We cannot predict the effect any changes to our current operating policies, investment criteria and strategies would have on our business, net asset value, operating results and value of our stock. However, the effects might be adverse, which could negatively impact our ability to pay you dividends and cause you to lose all or part of your investment. See Regulation as a Registered Closed-End Management Investment Company Fundamental Investment Policies.

**We will be subject to corporate-level U.S. federal income tax if we are unable to maintain our RIC status under Subchapter M of the Code.**

Although we have elected to be treated as a RIC under Subchapter M of the Code beginning with our 2011 tax year and succeeding tax years, no assurance can be given that we will be able to continue to maintain RIC status. To obtain and maintain RIC tax treatment under the Code, we must meet the following annual distribution, income source and asset diversification requirements.

The annual distribution requirement for a RIC will be satisfied if we distribute to our stockholders on an annual basis at least 90% of our net ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any. Because we may use debt financing, we are subject to certain asset coverage ratio requirements under the 1940 Act and financial covenants under loan and credit agreements that could, under certain circumstances, restrict us from making distributions necessary to satisfy the distribution requirement. If we are unable to obtain cash from other sources, we could fail to qualify for RIC tax treatment and thus become subject to corporate-level U.S.

Our Board of Directors is authorized to reclassify any unissued shares of common stock into one or more classes of

federal income tax.

The income source requirement will be satisfied if we obtain at least 90% of our income for each year from dividends, interest, gains from the sale of stock or securities or similar sources.

The asset diversification requirement will be satisfied if we meet certain asset diversification requirements at the end of each quarter of our taxable year. Failure to meet those requirements may result in our having to dispose of certain investments quickly in order to prevent the loss of RIC status. Because most of our investments will be in CLO vehicles for which there will likely be no active public market, any such dispositions could be made at disadvantageous prices and could result in substantial losses.

If we fail to qualify for RIC tax treatment for any reason and remain or become subject to corporate income tax, the resulting corporate taxes could substantially reduce our net assets, the amount of income available for distribution and the amount of our distributions.

TABLE OF CONTENTS

**There is a risk that our stockholders may not receive distributions or that our distributions may not grow or may be reduced over time, including on a per share basis as a result of the dilutive effects of this offering.**

We intend to make distributions on a quarterly basis to our stockholders out of assets legally available for distribution.

We cannot assure you that we will achieve investment results that will allow us to make a specified level of cash distributions or year-to-year increases in cash distributions. In addition, due to the asset coverage test applicable to us as a registered closed-end management investment company, we may be limited in our ability to make distributions.

See Regulation as a Registered Closed-End Management Investment Company.

**We may have difficulty paying our required distributions if we recognize income before or without receiving cash representing such income.**

For U.S. federal income tax purposes, we will include in income certain amounts that we have not yet received in cash, such as original issue discount or market discount, which may arise if we acquire a debt security at a significant discount to par. Such discounts will be included in income before we receive any corresponding cash payments. We also may be required to include in income certain other amounts that we will not receive in cash.

Since, in certain cases, we may recognize income before or without receiving cash representing such income, we may have difficulty meeting the annual distribution requirement necessary to maintain RIC tax treatment under the Code.

In addition, since our incentive fee is payable on our income recognized, rather than cash received, we may be required to pay advisory fees on income before or without receiving cash representing such income. Accordingly, we may have to sell some of our investments at times and/or at prices we would not consider advantageous, raise additional debt or equity capital or forgo new investment opportunities for this purpose. If we are not able to obtain cash from other sources, we may fail to qualify for RIC tax treatment and thus become subject to corporate-level U.S. federal income tax. For additional discussion regarding the tax implications of a RIC, please see Material U.S. Federal Income Tax Considerations Taxation as a Regulated Investment Company.

**We may in the future choose to pay dividends in our own stock, in which case you may be required to pay tax in excess of the cash you receive.**

We may distribute taxable dividends that are payable in cash or shares of our common stock at the election of each stockholder. Under certain applicable provision of the Code and the Treasury regulations, distributions payable in cash or in shares of stock at the election of stockholders are treated as taxable dividends. The Internal Revenue Service has issued private rulings indicating that this rule will apply even where the total amount of cash that may be distributed is

limited to no more than 20% of the total distribution. Under these rulings, if too many stockholders elect to receive their distributions in cash, each such stockholder would receive a pro rata share of the total cash to be distributed and would receive the remainder of their distribution in shares of stock. If we decide to make any distributions consistent with these rulings that are payable in part in our stock, taxable stockholders receiving such dividends will be required to include the full amount of the dividend (whether received in cash, our stock, or combination thereof) as ordinary income (or as long-term capital gain to the extent such distribution is properly reported as a capital gain dividend) to the extent of our current and accumulated earnings and profits for U.S. federal income tax purposes. As a result, a U.S.

stockholder may be required to pay tax with respect to such dividends in excess of any cash received. If a U.S. stockholder sells the stock it receives as a dividend in order to pay this tax, the sales proceeds may be less than the amount included in income with respect to the dividend, depending on the market price of our stock at the time of the sale. Furthermore, with respect to non-U.S. stockholders, we may be required to withhold U.S. tax with respect to

There is a risk that our stockholders may not receive distributions or that our distributions may not grow ~~106~~ may be r

such dividends, including in respect of all or a portion of such dividend that is payable in stock. In addition, if a significant number of our stockholders determine to sell shares of our stock in order to pay taxes owed on dividends, it may put downward pressure on the trading price of our stock.

TABLE OF CONTENTS

**Changes in laws or regulations governing our operations may adversely affect our business or cause us to alter our business strategy.**

We, the CLO vehicles in which we intend to invest, and the portfolio companies whose securities are held by such CLO vehicles will be subject to applicable local, state and federal laws and regulations, including, without limitation, federal immigration laws and regulations. New legislation may be enacted or new interpretations, rulings or regulations could be adopted, including those governing the types of investments we are permitted to make, any of which could harm us and our stockholders, potentially with retroactive effect. Additionally, any changes to the laws and regulations governing our operations may cause us to alter our investment strategy in order to avail ourselves of new or different opportunities. Such changes could result in material differences to the strategies and plans set forth herein and may result in our investment focus shifting from the areas of expertise of our investment adviser's senior investment team to other types of investments in which the investment team may have less expertise or little or no experience. Thus, any such changes, if they occur, could have a material adverse effect on our results of operations and the value of your investment.

**The SEC has raised questions regarding certain non-traditional investments, including investments in CLOs.**

The staff of the Division of Investment Management has, in correspondence with registered management investment companies, raised questions about the level and special risks of investments in CLOs. While it is not possible to predict what conclusions the staff will reach in these areas, or what recommendations the staff might make to the SEC, the imposition of limitations on investments by registered management investment companies in CLOs could adversely impact our ability to implement our investment strategy and/or our ability to raise capital through public offerings, or cause us to take certain actions with potential negative impacts on our financial condition and results of operations. We are unable at this time to assess the likelihood or timing of any such regulatory development.

**We incur significant costs as a result of being a publicly traded company.**

As a publicly traded company, we incur legal, accounting and other expenses, including the costs associated with periodic reporting requirements, as well as additional corporate governance requirements and other rules implemented by the SEC.

**Global capital markets could enter a period of severe disruption and instability. These market conditions have historically and could again have a materially adverse effect on debt and equity capital markets in the U.S., which could have a materially negative impact on our business, financial condition and results of operations.**

The U.S. and global capital markets have experienced periods of disruption characterized by the freezing of available credit, a lack of liquidity in the debt capital markets, significant losses in the principal value of investments, the re-pricing of credit risk, the failure of certain major financial institutions and general volatility in the financial markets. During these periods of disruption, general economic conditions deteriorated with material and adverse consequences for the broader financial and credit markets, and the availability of debt and equity capital for the market as a whole, and financial services firms in particular, was reduced significantly. These conditions may reoccur for a prolonged period of time or materially worsen in the future. In addition, signs of deteriorating sovereign debt

Changes in laws or regulations governing our operations may adversely affect our business or cause us to alter our

conditions in Europe and concerns of economic slowdown in China create uncertainty that could lead to further disruptions and instability. We may in the future have difficulty accessing debt and equity capital, and a severe disruption in the global financial markets, deterioration in credit and financing conditions or uncertainty regarding U.S. government spending and deficit levels, European sovereign debt, Chinese economic slowdown or other global economic conditions could have a material adverse effect on our business, financial condition and results of operations.

**Global economic, political and market conditions may adversely affect our business, results of operations and financial condition, including our revenue growth and profitability.**

The current worldwide financial market situation, as well as various social and political tensions in the U.S. and around the world, may contribute to increased market volatility, may have long-term effects on the

## TABLE OF CONTENTS

U.S. and worldwide financial markets, and may cause economic uncertainties or deterioration in the U.S. and worldwide. Since 2010, several European Union ( EU ) countries, including Greece, Ireland, Italy, Spain, and Portugal, have faced budget issues, some of which may have negative long-term effects for the economies of those countries and other EU countries. There is continued concern about national-level support for the Euro and the accompanying coordination of fiscal and wage policy among European Economic and Monetary Union member countries. In addition, the fiscal policy of foreign nations, such as Russia and China, may have a severe impact on the worldwide and U.S. financial markets. We cannot predict the effects of these or similar events in the future on the U.S. economy and securities markets or on our investments. We monitor developments and seek to manage our investments in a manner consistent with achieving our investment objective, but there can be no assurance that we will be successful in doing so.

### **Our business is subject to increasingly complex corporate governance, public disclosure and accounting requirements that could adversely affect our business and financial results.**

We are subject to changing rules and regulations of federal and state government as well as the stock exchange on which our common stock is listed. These entities, including the Public Company Accounting Oversight Board, the SEC and the NASDAQ Stock Market, have issued a significant number of new and increasingly complex requirements and regulations over the course of the last several years and continue to develop additional regulations and requirements in response to laws enacted by Congress. On July 21, 2010, the Dodd-Frank Wall Street Reform and Protection Act, or the Dodd-Frank Act, was enacted. There are significant corporate governance-related provisions in the Dodd-Frank Act, and the SEC has adopted additional rules and regulations that may impact us. Our efforts to comply with these requirements have resulted in, and are likely to continue to result in, an increase in expenses and a diversion of management's time from other business activities.

### **We may be more susceptible than a diversified fund to being adversely affected by any single corporate, economic, political or regulatory occurrence.**

We are classified as non-diversified under the 1940 Act. As a result, we can invest a greater portion of our assets in obligations of a single issuer than a diversified fund. We may therefore be more susceptible than a diversified fund to being adversely affected by any single corporate, economic, political or regulatory occurrence. We intend to continue to qualify as a RIC under Subchapter M of the Code, and thus we intend to satisfy the diversification requirements of Subchapter M, including its less stringent diversification requirements that apply to the percentage of our total assets that are represented by cash and cash items (including receivables), U.S. government securities, the securities of other regulated investment companies and certain other securities.

### **Terrorist attacks, acts of war or natural disasters may affect any market for our common stock, impact the businesses in which we invest and harm our business, operating results and financial condition.**

Terrorist acts, acts of war or natural disasters may disrupt our operations, as well as the operations of the businesses in which we intend to invest. Such acts have created, and continue to create, economic and political uncertainties and have contributed to global economic instability. Future terrorist activities, military or security operations, or natural disasters could further weaken the domestic/global economies and create additional uncertainties, which may negatively impact the businesses in which we invest either directly or indirectly and, in turn, could have a material adverse impact on our business, operating results and financial condition. Losses from terrorist attacks and natural

Global economic, political and market conditions may adversely affect our business, results of operations and financial

disasters are generally uninsurable.

**The failure in cyber security systems, as well as the occurrence of events unanticipated in our disaster recovery systems and management continuity planning could impair our ability to conduct business effectively.**

The occurrence of a disaster such as a cyber attack, a natural catastrophe, an industrial accident, a terrorist attack or war, events unanticipated in our disaster recovery systems, or a support failure from external providers, could have an adverse effect on our ability to conduct business and on our results of operations and financial condition, particularly if those events affect our computer-based data processing, transmission, storage, and retrieval systems or destroy data. If a significant number of our managers were unavailable in the event of a disaster, our ability to effectively conduct our business could be severely compromised.

We depend heavily upon computer systems to perform necessary business functions. Despite our implementation of a variety of security measures, our computer systems could be subject to cyber attacks and

## TABLE OF CONTENTS

unauthorized access, such as physical and electronic break-ins or unauthorized tampering. Like other companies, we may experience threats to our data and systems, including malware and computer virus attacks, unauthorized access, system failures and disruptions. If one or more of these events occurs, it could potentially jeopardize the confidential, proprietary and other information processed and stored in, and transmitted through, our computer systems and networks, or otherwise cause interruptions or malfunctions in our operations, which could result in damage to our reputation, financial losses, litigation, increased costs, regulatory penalties and/or customer dissatisfaction or loss.

### **We are highly dependent on information systems and systems failures could significantly disrupt our business, which may, in turn, negatively affect the market price of our common stock and our ability to pay distributions.**

Our business is highly dependent on our and third parties' communications and information systems. Any failure or interruption of those systems, including as a result of the termination of an agreement with any third-party service providers, could cause delays or other problems in our activities. Our financial, accounting, data processing, backup or other operating systems and facilities may fail to operate properly or become disabled or damaged as a result of a number of factors including events that are wholly or partially beyond our control and adversely affect our business.

There could be:

- sudden electrical or telecommunications outages;
- natural disasters such as earthquakes, tornadoes and hurricanes;
- disease pandemics;
- events arising from local or larger scale political or social matters, including terrorist acts; and
- cyber attacks.

These events, in turn, could have a material adverse effect on our operating results and negatively affect the market price of our common stock and our ability to pay distributions to our stockholders.

## **Risks Relating to an Investment in our Securities**

### **Common shares of closed-end management investment companies, including Oxford Lane Capital, have in the past frequently traded at discounts to their net asset values, and we cannot assure you that the market price of shares of our common stock will not decline below our net asset value per share.**

Common shares of closed-end management investment companies have in the past frequently traded at discounts to their net asset values and our stock may also be discounted in the market. This characteristic of closed-end management investment companies is separate and distinct from the risk that our net asset value per share may decline. We cannot predict whether shares of our common stock will trade above, at or below our net asset value. The risk of loss associated with this characteristic of closed-end management investment companies may be greater for investors expecting to sell shares of common stock purchased in the offering soon after the offering. In addition, if our common stock trades below its net asset value, we will generally not be able to sell additional shares of our common stock to the public at its market price without first obtaining the approval of our stockholders (including our unaffiliated stockholders) and our independent directors for such issuance.

**Our common stock price may be volatile and may decrease substantially.**

The trading price of our common stock may fluctuate substantially. The price of our common stock that will prevail in the market after this offering may be higher or lower than the price you pay, depending on many factors, some of which are beyond our control and may not be directly related to our operating performance. These factors include, but are not limited to, the following:

price and volume fluctuations in the overall stock market from time to time;  
investor demand for our shares;

significant volatility in the market price and trading volume of securities of registered closed-end management investment companies or other companies in our sector, which are not necessarily related to the operating performance of these companies;

38

---

TABLE OF CONTENTS

changes in regulatory policies or tax guidelines with respect to RICs or registered closed-end management investment companies;

failure to continue to qualify as a RIC, or the loss of RIC status;

any shortfall in revenue or net income or any increase in losses from levels expected by investors or securities analysts;

changes, or perceived changes, in the value of our portfolio investments;

departures of any members of Oxford Lane Management's senior investment team;

operating performance of companies comparable to us; or

general economic conditions and trends and other external factors.

In the past, following periods of volatility in the market price of a company's securities, securities class action litigation has often been brought against that company. Due to the potential volatility of our stock price, we may become the target of securities litigation in the future. Securities litigation could result in substantial costs and divert management's attention and resources from our business.

**We cannot assure you that we will be able to successfully deploy the proceeds of any offering conducted pursuant to this prospectus within the timeframe we have contemplated.**

We currently anticipate that substantially all of the net proceeds of any offering conducted pursuant to this prospectus will be invested in accordance with our investment objective within approximately one to three months after the consummation of such offering. We cannot assure you, however, that we will be able to locate a sufficient number of suitable investment opportunities to allow us to successfully deploy substantially all of the net proceeds of any such offering in that timeframe. To the extent we are unable to invest substantially all of the net proceeds of any such offering within our contemplated timeframe after the completion of such offering, our investment income, and in turn our results of operations, will likely be materially adversely affected.

**We will have broad discretion over the use of proceeds of any offering conducted pursuant to this prospectus and will use proceeds in part to satisfy operating expenses.**

We will have significant flexibility in applying the proceeds of any offering conducted pursuant to this prospectus and may use the net proceeds from any such offering in ways with which you may not agree, or for purposes other than those contemplated at the time of such offering. We will also pay operating expenses, and may pay other expenses such as due diligence expenses of potential new investments, from net proceeds. Our ability to achieve our investment objective may be limited to the extent that net proceeds of any such offering, pending full investment, are used to pay operating expenses.

**Your interest in us may be diluted if you do not fully exercise your subscription rights in any rights offering.**

In the event we issue subscription rights to purchase shares of our common stock, stockholders who do not fully exercise their rights should expect that they will, at the completion of the offer, own a smaller proportional interest in us than would otherwise be the case if they fully exercised their rights. We cannot state precisely the amount of any such dilution in share ownership because we do not know at this time what proportion of the shares will be purchased as a result of the offer.

We cannot assure you that we will be able to successfully deploy the proceeds of any offering conducted pursuant to

In addition, if the subscription price is less than our net asset value per share, then our stockholders would experience an immediate dilution of the aggregate net asset value of their shares as a result of the offer. The amount of any decrease in net asset value is not predictable because it is not known at this time what the subscription price and net asset value per share will be on the expiration date of the rights offering or what proportion of the shares will be purchased as a result of the offer. Such dilution could be substantial.

**If we issue additional preferred stock, the net asset value and market value of our common stock will likely become more volatile.**

We cannot assure you that the issuance of additional preferred stock would result in a higher yield or return to the holders of the common stock. The issuance of additional preferred stock would likely cause the

## TABLE OF CONTENTS

net asset value and market value of the common stock to become more volatile. If the dividend rate on the preferred stock were to approach the net rate of return on our investment portfolio, the benefit of leverage to the holders of the common stock would be reduced. If the dividend rate on the preferred stock were to exceed the net rate of return on our portfolio, the leverage would result in a lower rate of return to the holders of common stock than if we had not issued preferred stock. Any decline in the net asset value of our investments would be borne entirely by the holders of common stock. Therefore, if the market value of our portfolio were to decline, the leverage would result in a greater decrease in net asset value to the holders of common stock than if we were not leveraged through the issuance of preferred stock. This greater net asset value decrease would also tend to cause a greater decline in the market price for the common stock. We might be in danger of failing to maintain the required asset coverage of the preferred stock or of losing our ratings, if any, on the preferred stock or, in an extreme case, our current investment income might not be sufficient to meet the dividend requirements on the preferred stock. In order to counteract such an event, we might need to liquidate investments in order to fund a redemption of some or all of the preferred stock. In addition, we would pay (and the holders of common stock would bear) all costs and expenses relating to the issuance and ongoing maintenance of the preferred stock, including higher advisory fees if our total return exceeds the dividend rate on the preferred stock. Holders of preferred stock may have different interests than holders of common stock and may at times have disproportionate influence over our affairs.

### **Any amounts that we use to service our indebtedness or preferred dividends, or that we use to redeem our preferred stock, will not be available for distributions to our common stockholders.**

Although we have no current intention to do so, we may in the future issue debt securities or additional shares of preferred stock and/or borrow money from banks or other financial institutions, which we refer to collectively as senior securities, up to the maximum amount permitted by the 1940 Act. Under the provisions of the 1940 Act, we will be permitted, as a registered closed-end management investment company, to issue senior securities representing indebtedness so long as our asset coverage ratio with respect thereto, defined under the 1940 Act as the ratio of our gross assets (less all liabilities and indebtedness not represented by senior securities) to our outstanding senior securities representing indebtedness, is at least 300% after each issuance of such senior securities. In addition, we will be permitted to issue additional shares of preferred stock so long as our asset coverage ratio with respect thereto, defined under the 1940 Act as the ratio of our gross assets (less all liabilities and indebtedness not represented by senior securities) to our outstanding senior securities representing indebtedness, plus the aggregate involuntary liquidation preference of our outstanding preferred stock, is at least 200% after each issuance of such preferred stock. If the value of our assets declines, we may be unable to satisfy these tests. If that happens, we may be required to sell a portion of our investments and, depending on the nature of our leverage, repay a portion of our indebtedness or redeem outstanding shares of preferred stock, in each case at a time when doing so may be disadvantageous. Any amounts that we use to service our indebtedness or preferred dividends, or that we use to redeem our preferred stock, would not be available for distributions to our common stockholders.

### **Our common stock is subject to a risk of subordination relative to holders of our debt instruments and holders of our preferred stock.**

Rights of holders of our common stock are subordinated to the rights of holders of our indebtedness and to the rights of holders of our preferred stock. Therefore, dividends, distributions and other payments to holders of our common stock in liquidation or otherwise may be subject to prior payments due to the holders of our indebtedness or our preferred stock. In addition, under some circumstances the 1940 Act may provide debt holders with voting rights that are superior to the voting rights of holders of our equity securities.

If we issue additional preferred stock, the net asset value and market value of our common stock will likely become

**Holders of our preferred stock have the right to elect members of our Board of Directors and class voting rights on certain matters.**

Except as otherwise provided in our Articles of Amendment and Restatement, as amended by the Articles Supplementary, or as otherwise required by law, (1) each holder of our preferred stock is entitled to one vote for each share of preferred stock held by such holder on each matter submitted to a vote of our stockholders and (2) the holders of all outstanding preferred stock and common stock will vote together as a single class; provided that holders of preferred stock, voting separately as a class, will elect two of our directors and will

TABLE OF CONTENTS

be entitled to elect a majority of our directors if we fail to pay dividends on any outstanding shares of preferred stock in an amount equal to two full years of dividends and continuing during that period until we correct that failure. Preferred stock holders will also vote separately as a class on any matter that materially and adversely affects any preference, right or power of holders of preferred stock.

**Provisions of the Maryland General Corporation Law and of our charter and bylaws could deter takeover attempts and have an adverse impact on the price of our common stock.**

The Maryland General Corporation Law and our charter and bylaws contain provisions that may discourage, delay or make more difficult a change in control of Oxford Lane Capital or the removal of our directors. We are subject to the Maryland Business Combination Act, subject to any applicable requirements of the 1940 Act. Our Board of Directors has adopted a resolution exempting from the Business Combination Act any business combination between us and any other person, subject to prior approval of such business combination by our Board of Directors, including approval by a majority of our independent Directors. If the resolution exempting business combinations is repealed or our Board of Directors does not approve a business combination, the Business Combination Act may discourage third parties from trying to acquire control of us and increase the difficulty of consummating such an offer. Our bylaws exempt from the Maryland Control Share Acquisition Act acquisitions of our stock by any person. If we amend our bylaws to repeal the exemption from the Control Share Acquisition Act, the Control Share Acquisition Act also may make it more difficult for a third party to obtain control of us and increase the difficulty of consummating such a transaction.

We have also adopted measures that may make it difficult for a third party to obtain control of us, including provisions of our charter classifying our Board of Directors in three classes serving staggered three-year terms, and authorizing our Board of Directors to classify or reclassify shares of our stock in one or more classes or series, to cause the issuance of additional shares of our stock, to amend our charter without stockholder approval and to increase or decrease the number of shares of stock that we have authority to issue. These provisions, as well as other provisions of our charter and bylaws, may delay, defer or prevent a transaction or a change in control that might otherwise be in the best interests of our stockholders.

**You may not receive dividends or our dividends may decline or may not grow over time.**

We cannot assure you that we will achieve investment results or maintain a tax status that will allow or require any specified level of cash distributions or year-to-year increases in cash distributions. In particular, our future dividends are dependent upon the investment income we receive on our portfolio investments. To the extent such investment income declines, our ability to pay future dividends may be harmed.

## CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This prospectus contains forward-looking statements that involve substantial risks and uncertainties. These forward-looking statements are not historical facts, but rather are based on current expectations, estimates and projections about Oxford Lane Capital Corp., our current and prospective portfolio investments, our industry, our beliefs, and our assumptions. Words such as anticipates, expects, intends, plans, will, may, continue, be estimates, would, could, should, targets, projects, and variations of these words and similar expressions are intended to identify forward-looking statements.

The forward-looking statements contained in this prospectus involve risks and uncertainties, including statements as to:

- our future operating results;
- our business prospects and the prospects of a CLO vehicle's portfolio companies;
- the impact of investments that we expect to make;
- our contractual arrangements and relationships with third parties;
- the dependence of our future success on the general economy and its impact on the industries in which we invest;
- the ability of a CLO vehicle's portfolio companies to achieve their objectives;
- our expected financings and investments;
- the adequacy of our cash resources and working capital; and
- the timing of cash flows, if any, from our investments.

These statements are not guarantees of future performance and are subject to risks, uncertainties, and other factors, some of which are beyond our control and difficult to predict and could cause actual results to differ materially from those expressed or forecasted in the forward-looking statements, including without limitation:

- an economic downturn could impair the ability of a CLO vehicle's portfolio companies to continue to operate, which could lead to the loss of some or all of our investment in such CLO vehicle;
- a contraction of available credit and/or an inability to access the equity markets could impair our investment activities;
- interest rate volatility could adversely affect our results, particularly if we elect to use leverage as part of our investment strategy;
- currency fluctuations could adversely affect the results of our investments in foreign companies, particularly to the extent that we receive payments denominated in foreign currency rather than U.S. dollars; and
- the risks, uncertainties and other factors we identify in Risk Factors and elsewhere in this prospectus and in our filings with the SEC.

Although we believe that the assumptions on which these forward-looking statements are based are reasonable, any of those assumptions could prove to be inaccurate, and as a result, the forward-looking statements based on those assumptions also could be inaccurate. Important assumptions include our ability to originate new investments, certain margins and levels of profitability and the availability of additional capital. In light of these and other uncertainties, the inclusion of a projection or forward-looking statement in this prospectus should not be regarded as a representation by us that our plans and objectives will be achieved. These risks and uncertainties include those described or identified in Risk Factors and elsewhere in this prospectus. You should not place undue reliance on these forward-looking statements, which apply only as of the date of this prospectus. However, we will update this prospectus to reflect any material changes to the information contained herein. The forward-looking statements contained in this prospectus are excluded from the safe harbor protection provided by Section 27A of the Securities Act of 1933, as amended, or the Securities Act.

TABLE OF CONTENTS

## **USE OF PROCEEDS**

We intend to use the net proceeds from the sale of our securities pursuant to this prospectus for acquiring investments in accordance with our investment objective and strategies described in this prospectus and for general working capital purposes. We may also pay operating expenses, including advisory and administrative fees and expenses, and may pay other expenses such as due diligence expenses of potential new investments, from the net proceeds of any offering conducted pursuant to this prospectus. We anticipate that substantially all of the net proceeds of any such offering will be used for the above purposes within approximately three months from the consummation of such offering, depending on the availability of appropriate investment opportunities consistent with our investment objective and market conditions. We cannot assure you we will achieve our targeted investment pace.

Pending such investments, we will invest the net proceeds primarily in cash, cash equivalents, U.S. government securities and other high-quality investments that mature in one year or less from the date of investment. The management fee payable by us will not be reduced while our assets are invested in such securities. See Regulation as a Closed-End Investment Company Temporary Investments for additional information about temporary investments we may make while waiting to make longer-term investments in pursuit of our investment objective. Any supplement to this prospectus relating to an offering conducted pursuant to this prospectus will more fully identify the use of the proceeds from such offering.

TABLE OF CONTENTS**PRICE RANGE OF COMMON STOCK AND DISTRIBUTIONS**

Our common stock is traded on the NASDAQ Global Select Market under the symbol OXLC. The following table sets forth, for each fiscal quarter since our initial public offering, the net asset value ( NAV ) per share of our common stock, the high and low intraday sales prices for our common stock, such sales prices as a percentage of NAV per share and quarterly distributions per share.

	Price Range			Premium/	Premium/	Distributions Per Share <sup>(3)</sup>
	NAV <sup>(1)</sup>	High	Low	Discount of High Sales Price to NAV <sup>(2)</sup>	Discount of Low Sales Price to NAV <sup>(2)</sup>	
Fiscal 2017						
Second Quarter (through August 17, 2016)	*	\$ 11.80	\$ 8.32	*	*	\$ 0.60
First Quarter	\$ 8.78	\$ 10.11	\$ 7.53	15 %	(14 %)	\$ 0.60
Fiscal 2016						
Fourth Quarter	\$ 7.04	\$ 10.33	\$ 5.70	47 %	(19 %)	\$ 0.60
Third Quarter	\$ 8.13	\$ 12.51	\$ 8.85	54 %	9 %	\$ 0.60
Second Quarter	\$ 11.33	\$ 15.00	\$ 10.50	32 %	(7 %)	\$ 0.60
First Quarter	\$ 13.88	\$ 16.07	\$ 13.90	16 %	0 %	\$ 0.60
Fiscal 2015						
Fourth Quarter	\$ 14.08	\$ 16.18	\$ 14.53	15 %	3 %	\$ 0.60
Third Quarter	\$ 14.09	\$ 16.50	\$ 13.02	17 %	(8 %)	\$ 0.60
Second Quarter	\$ 15.54	\$ 17.20	\$ 15.11	11 %	(3 %)	\$ 0.60
First Quarter	\$ 16.07	\$ 17.78	\$ 16.51	11 %	3 %	\$ 0.60

Net asset value per share is determined as of the last day in the relevant quarter and therefore may not reflect the (1) net asset value per share on the date of the high and low sales prices. The net asset values shown are based on outstanding shares at the end of each period.

(2) Calculated as the respective high or low intraday sales price divided by NAV and subtracting 1.

(3) Represents the cash distributions, including dividends, dividends reinvested and returns of capital, if any, per share that we have declared on our common stock in the specified quarter.

\*

Not determinable at the time of filing.

On August 17, 2016, the last reported sales price of our common stock was \$10.95 per share. As of August 17, 2016, we had 91 holders of record of our common stock.

Shares of closed-end management investment companies may trade at a market price that is less than the value of the net assets attributable to those shares. The possibility that our shares of common stock will trade at a discount from net asset value or at premiums that are unsustainable over the long term are separate and distinct from the risk that our net asset value will decrease. Since our initial public offering, shares of our common stock have traded at a discount and

at a premium to the net assets attributable to those shares. As of August 17, 2016, our shares of common stock traded at a premium equal to approximately 24.7% of our net asset value per share as of June 30, 2016. It is not possible to predict whether the shares offered hereby will trade at, above, or below net asset value.

TABLE OF CONTENTS

To the extent that we have income available, we intend to distribute quarterly distributions to our stockholders. Our quarterly distributions, if any, will be determined by our Board of Directors. Any distributions to our stockholders will be declared out of assets legally available for distribution. The following table reflects the cash distributions, including dividends, distributions reinvested and tax returns of capital, if any, per share that we have declared on our common stock to date as well as our quarterly per share net investment income and distribution in excess of net investment income:

Three Months Ended	Record Date	Payment Date	Distributions <sup>(f)</sup>	GAAP Net Investment Income	Distributions in excess of Net Investment Income
