Notes to Schedule of Investments (amounts in thousands, except number of contracts):

(a) Coupon represents a weighted average rate.

(b) Securities purchased under Rule 144A of the 1933 Securities Act and, unless registered under the Act or exempt from registration, may only be sold to qualified institutional investors.

(c) As of September 30, 2006, portfolio securities with an aggregate market value of \$5,503 were valued in good faith and pursuant to guidelines established by the Board of Directors.

(d) Security is in default.

(e) Interest only security.

(f) The average amount of borrowings outstanding during the Nine-months ended September 30, 2006 was \$68,072 at a weighted average interest rate of 5.05%. On September 30, 2006, securities valued at \$74,811 were pledged as collateral for reverse repurchase agreements. The Fund is authorized to borrow funds and utilize leverage in amounts not exceeding thirty-three and one-third percent of its total assets. The Fund's ability to leverage creates an opportunity for increased net income, but at the same time poses special risks. If the income from the securities purchased with borrowed funds is not sufficient to cover the cost of borrowing, the net income of the Fund will be less than if borrowing had not been used, reducing the amount available for distribution to shareholders.

(g) Securities with an aggregate market value of \$89 have been segregated with the custodian to cover margin requirements for the following open futures contracts on September 30, 2006:

Description	Type	Expiration Month	# of Contracts	Unrealized (Depreciation)
U.S. Treasury 30-Year Bond December Futures	Long	12/2006	89	\$ (129)
