CAUTIONARY STATEMENT FOR PURPOSES OF THE SAFE HARBOR PROVISIONS OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

This Quarterly Report on Form 10-Q contains certain forward-looking statements, including, without limitation, statements concerning the conditions in our industry, our operations, our economic performance and financial condition, including, in particular, statements relating to our business and growth strategy and service development efforts. The Private Securities Litigation Reform Act of 1995 provides a safe harbor for certain forward-looking statements so long as such information is identified as forward-looking and is accompanied by meaningful cautionary statements identifying important factors that could cause actual results to differ materially from those projected in the information. When used in this Quarterly Report on Form 10-Q, the words may, might, should, estimate, project, plan, anticipate, expect, intend, outlook, similar expressions are intended to identify forward-looking statements and information. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of their dates. These forward-looking statements are based on estimates and assumptions by our management that, although we believe to be reasonable, are inherently uncertain and subject to a number of risks and uncertainties. These risks and uncertainties include, without limitation, those identified under Risk Factors below, as well as those identified in our Annual Report Form 10-K filed on March 17, 2008 and in our previous interim filings on Form 10-Q filed on May 12, 2008 with the Securities and Exchange Commission (SEC) pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934. We undertake no obligation to publicly update or revise any forward-looking statement as a result of new information, future events or otherwise, except as otherwise required by law. Reference is also made to such risks and uncertainties detailed from time to time in our filings with the SEC.

CAI INTERNATIONAL, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

June 30, 2008 and 2007

(1) The Company and Nature of Operations

CAI International, Inc. operates in the international intermodal marine cargo container leasing business. Within this single industry sector, the Company generates revenue from two reportable segments: container leasing and container management. The container leasing segment specializes primarily in the ownership and leasing of intermodal dry freight standard containers, while the container management segment manages containers for container investors. The Company leases its containers principally to international container shipping lines located throughout the world. The Company sells containers primarily to investor groups and provides management services to those investors in return for a management fee.

On September 12, 2007, the Company formed Container Applications Limited, a wholly owned subsidiary in Barbados, to facilitate the Company's international leasing and related business operations.

On April 30, 2008, the Company acquired Consent Equipment AB (CEAB), a European container and intermodal equipment leasing company, for \$14.6 million in cash (net of \$1.3 million cash acquired) and the assumption of approximately \$25.7 million in debt. CEAB is headquartered in Gothenburg, Sweden, and has operations located in Sweden, Germany and the United Kingdom. (See note 3).

The Company operates its business in 13 offices in 11 countries including the United States, and has agents in Asia, Europe, South Africa, Australia and South America. Its corporate headquarters are located in San Francisco, California.

(2) Accounting Policies and Recent Accounting Pronouncements

(a) Accounting Policies

There have been no changes to the Company's accounting policies during the quarter ended June 30, 2008. Refer to Notes 2(a) through 2(n) to the consolidated financial statements in the Company's Annual Report Form 10-K for the year ended December 31, 2007, filed with the SEC on March 17, 2008.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. The accompanying unaudited interim financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto for the fiscal years ended December 31, 2007 and 2006, included in the Company's Annual Report Form 10-K filed with the U.S. Securities and Exchange Commission on March 17, 2008.

In the opinion of management, the accompanying unaudited consolidated financial statements contain all adjustments necessary to present fairly the Company's financial position as of June 30, 2008 and December 31, 2007, the results of operations for the three-month and six-month periods ended June 30, 2008 and 2007 and cash flows for the six months ended June 30, 2008 and 2007. The results of operations and cash flows for the periods presented are not necessarily indicative of the results of operations or cash flows which may be reported for the remainder of 2008 or in any future period.

(b) Recent Accounting Pronouncements

In December 2007, the FASB issued SFAS No. 141R, *Business Combinations*, to improve the relevance, representational faithfulness, and comparability of the information that a reporting entity provides in its financial reports about a business combination and its effects. To accomplish that objective, SFAS No. 141R establishes principles and requirements for how the acquirer:

Edgar Filing: CAI International, Inc. - Form 10-Q

- a. recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any non-controlling interest in the acquiree;
 - b. recognizes and measures the goodwill acquired in the business combination or a gain from a bargain purchase; and
 - c. determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination.
- SFAS No. 141R applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. An entity may not apply it before that date. The Company does not expect the adoption of SFAS No. 141R to have a material effect on its consolidated financial position or results of operations.

Table of Contents

In December 2007, the FASB issued SFAS No. 160, *Non-Controlling Interests in Consolidated Financial Statements-An Amendment of ARB No. 51*. The objective of this statement is to improve the relevance, comparability and transparency of the financial information that a reporting entity provides in its consolidated financial statements by establishing accounting and reporting standards relating to ownership interests in subsidiaries held by parties other than the parent, the amount of consolidated net income attributable to the parent and to the non-controlling interest, changes in a parent's ownership interest, measurement of gain or loss on the deconsolidation of a subsidiary, and disclosure requirements to clearly identify and distinguish between the interests of the parent and the interests of the non-controlling owners. The statement applies to all entities that prepare consolidated financial statements, except not-for profit organizations, but will affect only those entities that have outstanding non-controlling interests in one or more subsidiaries or that deconsolidate a subsidiary. The statement is effective for fiscal years beginning on or after December 15, 2008. The Company does not expect the adoption of SFAS No. 160 to have a material effect on its consolidated financial position or results of operations.

In December 2007, the Securities and Exchange Commission (SEC) issued Staff Accounting Bulletin (SAB) No. 110. This guidance continues to allow companies, in certain circumstances, to utilize a simplified method in determining the expected term of stock option grants when calculating the compensation expense to be recorded under Statement of Financial Accounting Standards (SFAS) No. 123(R), *Share-Based Payment*. The simplified method can be used after December 31, 2007 only if a company's stock option exercise experience does not provide a reasonable basis upon which to estimate the expected option term. Due to the limited period of time that its common stock has been publicly traded, the Company used the simplified method in determining the expected term of the stock options granted to date.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities- An amendment of SFAS No. 133*. This statement requires enhanced disclosures about an entity's derivative and hedging activities with the objective of improving the transparency of financial reporting. This statement is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged. The adoption of this pronouncement is not expected to have a significant impact on the Company's financial reporting as the amount of the Company's derivative activities is not material. (See Note 5(b)).

(3) Acquisition of Consent Equipment AB (CEAB)

On April 30, 2008, the Company entered into a Stock Purchase Agreement with BNS Consent Holding AS, a Norwegian corporation, pursuant to which the Company purchased all of the issued and outstanding capital stock of Consent Equipment AB (CEAB), a European container and intermodal equipment leasing company, for \$14.6 million in cash (net of \$1.3 million cash acquired) and the assumption of approximately \$25.7 million of CEAB's debt. CEAB is headquartered in Gothenburg, Sweden, and has operations located in Sweden, Germany and the United Kingdom. It owned approximately 4,400 palletwide containers, 1,200 roll trailers and 2,400 German swap bodies as of April 30, 2008. The functional currency of CEAB is the Euro.

The acquisition was recorded during the second quarter of 2008 using the purchase method of accounting as prescribed under SFAS No. 141, *Business Combinations*. Accordingly, assets acquired and liabilities assumed were recorded at their fair value estimated by management as of April 30, 2008. The purchase price for the acquisition has been allocated to the assets acquired and liabilities assumed as follows (in thousands):

Current assets	\$ 3,445
Property, plant and equipment	38,847
Intangible assets	2,395
Other assets	1,156
Total assets acquired	45,843
Current liabilities, excluding current portion of capital lease obligations	2,165
Deferred income tax liability	2,134
Capital lease obligations	25,705
Total liabilities assumed	30,004
Net assets acquired	15,839
Cash acquired (included in current assets above)	(1,273)

Edgar Filing: CAI International, Inc. - Form 10-Q

Debt assumed (included in liabilities assumed above)	25,705
Purchase price and debt assumed, net of cash acquired	\$ 40,271

Table of Contents

Adjustments to record the assets acquired and liabilities assumed at fair values include the recognition of \$2.4 million of intangible assets as follows:

	Amount (In thousands)	Estimated Life
Trademarks	\$ 43	1 year
Software	43	1 year
Contracts and customer relationships- owned equipment	2,137	7 years
Non-compete agreements	172	2-3 years

The Company's results for the three and six months ended June 30, 2008 include the results of CEAB for May and June 2008. Pro forma results are not presented as they are not material to the Company's overall financial statements.

(4) Intangible Assets

The Company amortizes intangible assets on a straight line basis over their estimated useful lives as follows:

Trademarks	1-10 years
Software	1-3 years
Contracts- third party	7 years
Contracts and customer relationships- owned equipment	5-7 years
Non-compete agreements	2-3 years

Total amortization expense for the three months ended June 30, 2008 and 2007 were \$389,000 and \$309,000, respectively, and \$701,000 and \$617,000 for the six months ended June 30, 2008 and 2007, respectively. Intangible assets at June 30, 2008 were as follows (in thousands):

	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Trademarks	\$ 1,285	\$ (222)	\$ 1,063
Software	543	(299)	244
Contracts- third party	3,650	(913)	2,737
Contracts and customer relationships owned equipment	4,307	(803)	3,504
Non-compete agreements	172	(12)	160
	\$ 9,957	\$ (2,249)	\$ 7,708

(5) Revolving Credit Facility, Capital Lease Obligations and Interest Rate Swap

(a) Revolving Credit Facility

The Company has a senior secured line of credit agreement with a consortium of banks to finance the acquisition of assets and for general working capital purposes. This agreement was amended on May 27, 2008 to increase the maximum credit availability. As of June 30, 2008, the maximum credit commitment under the senior secured line of credit was \$290.0 million.

The Company's senior secured credit facility, including any amounts drawn on the facility, is secured by substantially all of the assets of the Company including the containers owned by the Company, the underlying leases thereon and the Company's interest in any money received under such contracts. The facility may be increased under certain conditions described in the agreement governing the facility. In addition, there is a commitment fee on the unused amount of the total commitment, payable quarterly in arrears. The agreement provides that swing line loans

Edgar Filing: CAI International, Inc. - Form 10-Q

(short-term borrowings of up to \$10.0 million in the aggregate that are payable within 10 business days or at maturity date, whichever comes earlier) and standby letters of credit (up to \$15.0 million in the aggregate) will be available to the Company. These credit commitments are part of, and not in addition to, the total commitment provided under the agreement. The interest rates

Table of Contents

vary depending upon whether the loans are characterized as Base Rate loans or Eurodollar rate loans, as defined in the senior secured credit facility. As of June 30, 2008, the interest rate under the amended agreement was approximately 3.4%. The agreement governing the Company's senior secured credit facility also contains various financial and other covenants. It also includes certain restrictions on the Company's ability to incur other indebtedness or pay dividends to stockholders. As of June 30, 2008, the Company was in compliance with the terms of the senior secured credit facility.

As of June 30, 2008, the outstanding balance under the Company's senior secured revolving credit facility was \$193.1 million compared to an outstanding balance of \$147.6 million as of December 31, 2007. As of June 30, 2008, the Company had \$96.6 million in availability under the senior secured credit facility (net of \$300,000 in letters of credit) subject to our ability to meet the collateral requirements under the agreement governing the facility. The entire amount of the facility drawn at any time plus accrued interest and fees is callable on demand in the event of certain specified events of default.

(b) Capital Lease Obligations

Upon the acquisition of CEAB, the Company assumed CEAB's capital lease obligations of \$25.7 million. As of June 30, 2008, the capital lease obligations had a balance of \$24.5 million. The underlying obligations are denominated in U.S. Dollars and Euros at fixed and floating interest rates averaging between 5.5 % to 6.3% as of June 30, 2008 and maturity dates between June 2009 and December 2017. The liability under each lease is secured by the underlying equipment on the lease.

(c) Interest Rate Swap

In conjunction with its acquisition of CEAB, the Company assumed an interest rate swap agreement with a European bank. The interest rate swap contract with the bank is based on a notional amount in Euros equivalent to approximately \$4.7 million as of June 30, 2008, with a fixed rate cap of 4.07% against the three-month Euribor rate. The contract expires on July 1, 2010. As of June 30, 2008, the interest rate swap agreement had a fair market value of approximately \$101,000. The Company records the monthly change in the fair value of the agreement as an increase or decrease in interest income. The purpose of the interest rate swap agreement is to manage the risk associated with fluctuations in interest rates.

(6) Capital Stock

Prior to the Company's IPO on May 16, 2007, approximately 8.9 million shares, or 84% of the Company's common stock, was owned by its founder and Executive Chairman, Hiromitsu Ogawa. In addition, two employees owned 724,920 shares of convertible preferred stock which were subsequently converted to common stock upon the IPO. The Company recorded \$5.6 million of accretion for the six months ended June 30, 2007 relating to the increase in fair value of the convertible preferred stock.

In connection with its IPO on May 16, 2007, the Company sold 5.8 million shares of common stock at \$15.00 per share and generated net proceeds of approximately \$78.1 million, after deducting underwriting discounts and other offering expenses. The Company used part of the net proceeds from the IPO to pay off its \$37.5 million convertible subordinated note payable and its \$17.5 million term loan outstanding under its senior secured credit facility. The remaining \$23.1 million in net proceeds was used to pay a portion of the amount outstanding under the Company's revolving line of credit under its senior secured credit facility. After the Company's IPO, Mr. Ogawa's ownership of the Company was reduced to approximately 52% of the Company's outstanding common stock.

Table of Contents**(7) Stock Based Compensation Plan****(a) Stock Options**

The following table summarizes activity in the Company's stock option plan for the six-month period ended June 30, 2008:

	No. of Shares	Weighted Average Exercise Price
Outstanding options, December 31, 2007	546,120	\$ 15.00
Option grants	22,500	\$ 15.30
Forfeitures	(88,830)	\$ 15.00
Balance, June 30, 2008	479,790	\$ 15.01
Weighted-average remaining term	8.9 years	
Options vested and exercisable at:		
December 31, 2007	None	
June 30, 2008	172,784	\$ 15.00
Options exercised	None	

The fair value of the stock options granted by the Company is amortized on a straight-line over vesting periods for the option and recorded as compensation expense. For the three months ended June 30, 2008 and 2007, the Company recorded stock based compensation expense of \$258,000 and \$149,000, respectively. For the six months ended June 30, 2008 and 2007, the Company recorded stock-based compensation expense of \$554,000 and \$149,000, respectively. As of June 30, 2008, the remaining unamortized stock-based compensation cost relating to stock options granted to the Company's executive officers was approximately \$1.8 million which is to be recognized over the remaining vesting period of 34.5 months. Unamortized stock-based compensation cost relating to independent directors' options at June 30, 2008 was approximately \$105,000 which is to be recognized over remaining vesting period of 10.5 months.

(b) Restricted Stock Grant

The Company granted certain management employees stock bonuses aggregating 36,876 shares of restricted common stock on May 15, 2007 at a fair value of \$15.00 per share. The restricted stock awards vest over three years and are amortized from grant date over three years on a straight line basis. If an employee resigns voluntarily or is terminated for cause (as defined in the stock grant documents), the employee will forfeit any unvested portion of the restricted stock award and the amortization of stock-based compensation expense will be adjusted prospectively and amortized over the remaining vesting period.

During the quarter ended June 30, 2008, no additional shares of restricted stock were granted and 11,352 shares were vested, net of 3,081 shares forfeited by employees to cover withholding taxes. The Company retired these 3,081 shares and paid the applicable taxes to federal and state taxing authorities. Compensation expense relating to restricted stock for the three and six months ended June 30, 2008 was approximately \$45,000 and \$90,000, respectively. As of June 30, 2008, unrecognized compensation cost related to the restricted stock grants was approximately \$338,000 which is expected to be recognized over a weighted average remaining vesting period of 22.6 months.

Compensation expense relating to stock options and restricted stock is recorded as a component of administrative expenses in the Company's consolidated statements of income.

(8) Income Taxes

The consolidated income tax expense for the three-month and six-month periods ended June 30, 2008 and 2007 was determined based upon estimates of the Company's consolidated effective income tax rates for the years ending December 31, 2008 and 2007, respectively. The difference between the consolidated effective income tax rate and the U.S. federal statutory rate is primarily attributable to state income taxes, foreign income taxes and the effect of certain permanent differences.

In June 2006, the FASB issued FASB Interpretation No. (FIN) 48, *Accounting for Uncertainty in Income Taxes*, which clarifies the accounting for uncertainty in income taxes. FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 requires that the Company recognizes in the financial

Edgar Filing: CAI International, Inc. - Form 10-Q

statements a tax uncertainty if it is more likely than not that the position will be sustained on audit, based on the technical merits of the position. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods and disclosure. The Company adopted FIN 48 during fiscal 2007, evaluated its tax positions and determined the cumulative effect of all uncertain tax positions, resulting in unrecognized tax benefits of approximately \$1.8 million for the year ended December 31, 2007. There have been no material changes in unrecognized tax benefits at June 30, 2008. The Company does not believe the total amount of unrecognized tax benefits will increase or decrease significantly for the remainder of fiscal 2008.

The Company has included an estimated FIN 48 provision for interest and penalties of \$120,000 in its calculation of effective tax rate for fiscal 2008. The impact of FIN 48 on the company's financial results for the quarter ended June 30, 2008 is not material and is included in the calculation of the Company's effective tax rate of 33.9%. The lower effective tax rate for the three months ended June 30, 2008 as compared to 36.9% effective tax rate for the three months ended June 30, 2007 is due primarily to greater income before taxes from foreign operations where statutory rates are significantly lower than the U.S. income tax rates.

Table of Contents

The Company's income tax returns are subject to examination by federal, state and foreign taxing authorities for the years covered by each jurisdiction's statute of limitations. The Company accrues for unrecognized tax benefits based upon its best estimate of the additional taxes, interest and penalties expected to be paid. The estimates are updated over time as more definitive information becomes available from taxing authorities, completion of tax audits, expiration of statute of limitations, or upon occurrence of other events. At June 30, 2008, the years potentially open to tax examinations in the United States, California, New Jersey and South Carolina vary from 2003 to 2007.

(9) Commitments and Contingencies

The Company had commitments to purchase approximately \$58.3 million of container equipment as of June 30, 2008.

(10) Segment Information

The Company operates in one industry segment, container leasing, but has two reportable business segments: container leasing and container management. The container leasing segment derives its revenue from the ownership and leasing of containers to container shipping lines. The container management segment derives its revenue from management fees earned from portfolios of containers and associated leases which are managed on behalf of container investors. It also derives revenue from the sale of containers, previously owned by the Company, to container investors who in turn enter into management agreements with the Company. There are no inter-segment revenues.

The following tables show condensed segment information for the Company's container leasing and container management segments for the three and six months ended June 30, 2008 and 2007, reconciled to the Company's income before taxes as shown in its consolidated statements of income for such periods (in thousands). The Company makes its management decisions based on pre tax income, and as such does not allocate income tax expense/benefit to its segments.

	Three Months Ended June 30, 2008				Three Months Ended June 30, 2007			
	Container Leasing	Container Management	Unallocated	Total	Container Leasing	Container Management	Unallocated	Total
Total revenue	\$ 14,317	\$ 6,325	\$	\$ 20,642	\$ 8,570	\$ 5,464	\$	\$ 14,034
Operating expenses	5,936	3,275		9,211	2,310	3,217		5,527
Operating income	8,381	3,050		11,431	6,260	2,247		8,507
Net interest expense and gain on extinguishment of debt	2,080		(123)	1,957	2,007		(11)	1,996
Net income before income taxes	6,301	3,050	123	9,474	4,253	2,247	11	6,511
Income tax expense			3,210	3,210			2,400	2,400
Net income	\$ 6,301	\$ 3,050	\$ (3,087)	\$ 6,264	\$ 4,253	\$ 2,247	\$ (2,389)	\$ 4,111
Total assets at end of period	\$ 388,767	\$ 64,355	\$	\$ 453,122	\$ 228,255	\$ 65,462	\$	\$ 293,717

	Six Months Ended June 30, 2008				Six Months Ended June 30, 2007			
	Container Leasing	Container Management	Unallocated	Total	Container Leasing	Container Management	Unallocated	Total
Total revenue	\$ 26,136	\$ 12,157	\$	\$ 38,293	\$ 16,769	\$ 11,778	\$	\$ 28,547
Operating expenses	10,583	6,523		17,106	5,250	5,757		11,007
Operating income	15,553	5,634		21,187	11,519	6,021		17,540
Net interest expense and gain on extinguishment of debt	4,103		(170)	3,933	5,246		(20)	5,226

Edgar Filing: CAI International, Inc. - Form 10-Q

Net income before income taxes	11,450	5,634	170	17,254	6,273	6,021	20	12,314
Income tax expense			5,701	5,701			4,591	4,591
Net income	\$ 11,450	\$ 5,634	\$ (5,531)	\$ 11,553	\$ 6,273	\$ 6,021	\$ (4,571)	\$ 7,723
Total assets at end of period	\$ 388,767	\$ 64,355		\$ 453,122	\$ 228,255	\$ 65,462		\$ 293,717

The Company's container lessees use containers for their global trade utilizing many worldwide trade routes. The Company earns its revenue from international carriers when the containers are in use and carrying cargo around the world. Most of the Company's leasing related revenue is denominated in U.S. dollars. Since all of the Company's containers are used internationally and typically no container is domiciled in one particular place for a prolonged period of time, all of the Company's long-lived assets are considered to be international with no single country of use.

Table of Contents**(11) Earnings per Share**

Basic earnings per share is computed by dividing income available to common shareholders by the weighted average number of common shares outstanding for the period. Diluted earnings per share reflects the potential dilution that would occur if securities or other contracts to issue common stock were exercised or converted into common stock; however, potential common equivalent shares are excluded if their effect is anti-dilutive.

The following table sets forth the reconciliation of basic and diluted net income per share for the three and six months ended June 30, 2008 and 2007 (in thousands, except per share data).

	Three months ended June 30,		Six months ended June 30,	
	2008	2007	2008	2007
Numerator:				
Net income available to common shareholders	\$ 6,264	\$ 4,106	\$ 11,553	\$ 2,146
Accretion (decretion) of preferred stock		5		
Interest expense (credit) on \$37.5 million convertible note, net of tax		(139)		
Net income used in calculation of diluted earnings per share	\$ 6,264	\$ 3,972	\$ 11,553	\$ 2,146
Denominator:				
Weighted-average shares used in the calculation of basic earnings per share	17,113	13,954	17,111	12,278
Dilutive effect of stock options and restricted stock	9		7	
Effect of dilutive securities:				
Convertible preferred stock prior to IPO		312		
\$37.5 million convertible note		2,870		
Weighted-average shares used in the calculation of diluted earnings per share	17,122	17,136	17,118	12,278
Net income per share:				
Basic	\$ 0.37	\$ 0.29	\$ 0.68	\$ 0.17
Diluted	\$ 0.37	\$ 0.23	\$ 0.67	\$ 0.17

The calculation of diluted earnings per share for the three and six months ended June 30, 2008 excluded from the denominator 480,000 shares of stock options granted to officers and directors because their effect would have been anti-dilutive. The calculation of diluted earnings per share for the six months ended June 30, 2007 excluded \$5.6 million in accretion of preferred stock and \$548,000 in interest expense, net of tax, related to the convertible subordinated note in the numerator, and 4.5 million shares of common stock in the denominator because their effect would have been anti-dilutive. The calculation of diluted earnings per share for the three and six months ended June 30, 2007 excludes 546,000 stock options and 36,876 restricted shares in the denominator because their effect would have been anti-dilutive.

ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our audited consolidated financial statements and related notes thereto, included in our Annual Report on Form 10-K for the year ended December 31, 2007 filed with the SEC on March 17, 2008. In addition to historical consolidated financial information, the following discussion contains forward-looking statements that reflect our plans, estimates and beliefs. Our actual results may differ materially from those contained in or implied by any forward-looking statements. The factors that could cause or contribute to these differences include those discussed below and those discussed in the Risk Factors section of our aforementioned 10-K filing, and Part II, Item 1A of this 10-Q filing.

The financial information included in this discussion and in our consolidated financial statements may not be indicative of our consolidated financial position, operating results, changes in equity and cash flows in the future, or what they would have been had our equity structure not changed during the periods presented.

Table of Contents**Overview**

We are one of the world's leading container leasing and management companies. We purchase new containers, lease them to container shipping lines and either retain them as part of our owned fleet or sell them to container investors for whom we then provide management services. In operating our fleet, we lease, re-lease and dispose of containers and contract for the repair, repositioning and storage of containers. As of June 30, 2008, our fleet comprised 791,000 twenty-foot equivalent units (TEUs) of containers. The following table shows the composition of our fleet as of June 30, 2008 and 2007 and our average fleet utilization for the three months ended June 30, 2008 and 2007:

	As of June 30, 2008 (unaudited)	As of June 30, 2007 (unaudited)
Managed fleet in TEUs	530,945	514,120
Owned fleet in TEUs	260,519	175,325
Total	791,464	689,445
Percentage of on-lease fleet on long-term leases	69.6%	70.7%
Percentage of on-lease fleet on short-term leases	27.9	27.5
Percentage of on-lease fleet on finance leases	2.5	1.8
Total	100.0%	100.0%

	Three Months Ended June 30, 2008 2007 (unaudited)		Six Months Ended June 30, 2008 2007 (unaudited)	
Average fleet utilization rate for the period	95.5%	93.7%	95.6%	93.1%

Average fleet utilization reflects the average number of TEUs in our fleet on lease as a percentage of total TEUs available for lease. In calculating TEUs available for lease, we exclude units held for sale and units we have purchased that are held at the manufacturer. The utilization rate for a period is calculated by averaging the utilization rates at the end of each calendar month during the period.

We plan to increase both the number of owned containers as well as the number of managed containers in our fleet. During the three and six months ended June 30, 2008, we purchased approximately \$37.7 million and \$92.1 million, respectively, of new containers. We believe it is important to maintain a balance between the size of our owned fleet and our managed fleet in order to have multiple sources of revenue. In addition, with the acquisition of CEAB on April 30, 2008, we have added palletwide containers, roll trailers and German swap bodies to our fleet to serve the European market (see Note 3 to our unaudited consolidated financial statements).

Results of Operations**Three Months Ended June 30, 2008 Compared to Three Months Ended June 30, 2007**

The following table summarizes our operating results for the three-month periods ended June 30, 2008 and 2007 (dollars in thousands):

	Three Months Ended June 30, 2008 2007 (unaudited)		Increase (Decrease) Amount Percent	
Total revenue	\$ 20,642	\$ 14,034	\$ 6,608	47.1%

Edgar Filing: CAI International, Inc. - Form 10-Q

Operating expenses	9,211	5,527	3,684	66.7
Net income	6,264	4,111	2,153	52.4

Total revenue of \$20.6 million for the three months ended June 30, 2008 increased \$6.6 million, or 47.1%, from total revenue of \$14.0 million for the three months ended June 30, 2007. The increase was due primarily to higher container rental revenue, finance lease income and gain on sale of container portfolios, partly offset by lower management fee revenue. Revenue from CEAB's operations which we acquired on April 30, 2008, represented \$2.3 million of the increase in total revenue. Operating expenses of \$9.2 million for the quarter ended June 30, 2008 increased \$3.7 million, or 66.7%, from \$5.5 million for the same three-month period in 2007. Our net income increased \$2.2 million, or 52.4%, to \$6.3 million for the three months ended June 30, 2008 from \$4.1 million for the three months ended June 30, 2007. The increase in net income was primarily attributable to the higher revenue from operating a larger owned fleet and higher utilization, and lower interest expense, partly offset by higher operating expenses and income tax expense compared to the three months ended June 30, 2007.

Table of Contents

Revenue. The composition of our revenue is shown on our unaudited financial statements included in this filing. The following discussion explains the significant changes in the composition of our total revenue for the three months ended June 30, 2008 as compared to the three months ended June 30, 2007:

Container Rental Revenue. Container rental revenue increased \$5.5 million, or 66.9%, to \$13.8 million for the three months ended June 30, 2008 from \$8.3 million for the three months ended June 30, 2007. The increase in container rental revenue was principally due to an increase in the average number of TEUs on lease in our owned fleet (including the acquisition of CEAB's fleet) and an increase in average utilization during the three months ended June 30, 2008 as compared to the three months ended June 30, 2007. CEAB's operations represented \$2.2 million of the increase in container rental revenue.

Management Fee Revenue. Management fee revenue for the three months ended June 30, 2008 was \$3.0 million, a decline of \$338,000, or 10.0%, from \$3.4 million for the same period in 2007. The decrease was primarily attributable to the lower fee income due to lower volume of used containers sold on behalf of our investors during the second quarter of 2008 compared to the same quarter last year.

Gain on Sale of Container Portfolios. Gain on sale of container portfolios of \$3.3 million for the three months ended June 30, 2008 was \$1.2 million, or 57.2 %, higher than the gain realized for the three months ended June 30, 2007. The increase was due to the higher number of TEUs of containers sold and higher margin on sales during the second quarter of 2008 compared to the same quarter in 2007.

Finance Lease Income. Finance lease income increased \$205,000, or 70.7%, to \$495,000 for the three months ended June 30, 2008 from \$290,000 for the three months ended June 30, 2007. This increase was primarily due to entering into new contracts for direct finance leases, partly offset by a reduction in the principal balance of existing direct finance leases.

Expenses. Details of our operating expenses for the three-month periods ended June 30, 2008 and 2007 are shown on our unaudited statements of income included in this filing. The following discussion explains the significant changes in expenses for the three months ended June 30, 2008 as compared to the three months ended June 30, 2007:

Depreciation of Container Rental Equipment. Depreciation of container rental equipment increased by \$2.0 million, or 111.2%, to \$3.7 million for the three months ended June 30, 2008, from \$1.8 million for the three months ended June 30, 2007. This increase was primarily attributable to our fleet growth, greater percentage of newer containers in our owned fleet and depreciation resulting from the acquisition of CEAB.

Amortization of Intangible Assets. Amortization expense relating to intangible assets for the three months ended June 30, 2008 increased \$80,000, or 25.9%, to \$389,000 from \$309,000 during the same period last year. The increase resulted primarily from the intangible assets recorded in connection with the acquisition of CEAB on April 30, 2008.

Impairment of Container Rental Equipment. Impairment charges for the three months ended June 30, 2008 was unchanged from the three months ended June 30, 2007.

Gain on Disposition of Used Container Equipment. Gain on disposition of used container equipment increased by \$429,000, or 41.1%, to \$1.5 million for the three months ended June 30, 2008 from \$1.0 million for the three months ended June 30, 2007. The increase was due primarily to the higher number of TEUs of used containers sold during the second quarter ended June 30, 2008 as compared to the same quarter in 2007.

Gain on Settlement of Lease Obligation. During the three months ended June 30, 2007 the Company recognized a gain of \$694,000 upon settling its liabilities related to lost, damaged or sold equipment that had been on operating leases with a lessor. The settlement amount related to the early termination of the operating leases with the lessor. No such settlement occurred during the three months ended June 30, 2008. Included within the gain on settlement of lease obligation were gains totaling \$153,000 that arose in prior periods but had not been previously recorded.

Equipment Rental Expense. No equipment rental expense was incurred for the three months ended June 30, 2008, compared to \$423,000 of equipment rental expense incurred for the three months ended June 30, 2007. We terminated all of our operating leases and purchased the last of the rented units in February 2008.

Storage, Handling and Other Expenses. Storage, handling and other expenses increased by \$631,000, or 87.8%, to \$1.4 million for the three months ended June 30, 2008, from \$719,000 for the three months ended June 30, 2007. The increase was primarily attributable to the operations of CEAB and to the increase in our owned fleet, and higher overseas storage and handling costs due to the weakening of the U.S. dollar, partly offset by the impact of higher utilization of containers compared to the same quarter last year.

Table of Contents

Marketing, General and Administrative Expenses. Marketing, general and administrative expenses increased by \$1.2 million, or 29.6%, to \$5.1 million for the three months ended June 30, 2008 from \$3.9 million for the three months ended June 30, 2007. The increase in marketing, general and administrative expenses was driven primarily by higher employee related expenses resulting from an increase in personnel and incentive compensation. Additionally, costs relating to our foreign operations have increased due to the weakening of the U.S. dollar and from additional expenses attributable to the operations of CEAB.

Net Interest Expense. Net interest expense of \$2.0 million for the three months ended June 30, 2008 decreased \$39,000, or 2.0%, from net interest expense incurred during the three months ended June 30, 2007. The decrease in interest expense was due primarily to the decrease in Eurodollar indexed interest rates during the first quarter of 2008 and the repayment of the Company's subordinated convertible note (which had a higher interest rate) in May 2007. Additionally, during the three months ended June 30, 2007 we recorded a gain related to accrued interest that was extinguished with the repayment of the Interpool subordinated note.

Income Tax Expense. Income tax expense increased \$810,000, or 33.8%, to \$3.2 million for the three months ended June 30, 2008 from \$2.4 million for the three months ended June 30, 2007. The increase was primarily driven by a 45.5% increase in pretax income for the three months ended June 30, 2008 as compared to the three months ended June 30, 2007. The effective tax rate for the three months ended June 30, 2008 was 33.9% compared to 36.9% for the three months ended June 30, 2007. The lower effective tax rate for the three months ended June 30, 2008 as compared to the three months ended June 30, 2007 is due primarily to greater income before taxes from foreign operations where statutory rates are lower than the U.S. income tax rates.

Segment Information. The following table summarizes our results of operations for each of our business segments for the three-month periods ended June 30, 2008 and 2007:

	Three Months Ended June 30,		Increase (Decrease)	
	2008	2007	Amount	Percent
	(in thousands)			
	(unaudited)			
Container Leasing				
Total revenue	\$ 14,317	\$ 8,570	\$ 5,747	67.1%
Operating expenses	5,936	2,310	3,626	157.0
Interest expense	2,080	2,688	(608)	(22.6)
Gain on extinguishment of debt		(681)	681	(100.0)
Income before taxes attributable to segment	\$ 6,301	\$ 4,253	\$ 2,048	48.2
Container Management				
Total revenue	\$ 6,325	\$ 5,464	\$ 861	15.8%
Operating expenses	3,275	3,217	58	1.8
Income before taxes attributable to segment	\$ 3,050	\$ 2,247	\$ 803	35.7

Container Leasing. Total revenue from our container leasing segment increased \$5.7 million, or 67.1%, to \$14.3 million for the three months ended June 30, 2008 from \$8.6 million during the three months ended June 30, 2007. The increase was primarily due to greater average number of TEUs on lease in our owned fleet and higher average utilization during the three months ended June 30, 2008 compared to the three months ended June 30, 2007. In addition, CEAB's operations represented \$2.3 million of the increase in revenue.

Total operating expenses for the container leasing segment increased \$3.6 million, or 157.0%, to \$5.9 million for the three months ended June 30, 2008 from \$2.3 million for the three months ended June 30, 2007. The increase was primarily due to higher depreciation of container rental equipment arising from our fleet growth and greater percentage of newer containers in our owned fleet. In addition, all of CEAB's operating expenses were allocated to the container leasing segment since CEAB does not manage equipment for third parties. The higher percentage of owned average TEUs also resulted in a higher allocation of marketing, general and administrative expense to the container leasing segment.

Interest expense, which is fully allocated to the container leasing segment, was \$608,000 lower in the three months ended June 30, 2008 compared to the same period than last year due primarily to the lower Eurodollar indexed interest rates. However, during the three months ended

Edgar Filing: CAI International, Inc. - Form 10-Q

June 30, 2007, we recorded a gain of \$681,000 on the extinguishment of our \$37.5 million convertible note to Interpool, which offset part of 2007 interest expense for the three months ended June 30, 2007.

Container Management. Total revenue of \$6.3 million from our container management segment for the three months ended June 30, 2008 was \$861,000, or 15.8%, higher than the \$5.5 million revenue from our container management segment for the three months ended June 30, 2007. This increase in revenue was primarily due to a \$1.2 million, or 57.2%, increase in gain on sale of container portfolios, partly offset by a \$338,000, or 10%, decrease in management fee revenue compared to the three months ended June 30, 2007 attributable primarily to lower fee income due to lower volume of used containers sold on behalf of our investors.

Table of Contents

Total operating expenses for the container management segment increased \$58,000, or 1.8%, for the three months ended June 30, 2008 as compared to the three months ended June 30, 2007 as a result of higher marketing, general and administrative expense driven primarily by an increase in personnel and incentive compensation. Additionally, costs relating to our foreign operations have increased due to the weakening of the U.S. dollar.

Six Months Ended June 30, 2008 Compared to Six Months Ended June 30, 2007

The following table summarizes our operating results for the six-month periods ended June 30, 2008 and 2007 (dollars in thousands):

	Six months Ended June 30,		Increase (Decrease)	
	2008	2007	Amount	Percent
	(unaudited)			
Total revenue	\$ 38,293	\$ 28,547	\$ 9,746	34.1%
Operating expenses	17,106	11,007	6,099	55.4
Net income	11,553	7,723	3,830	49.6

Total revenue of \$38.3 million for the six months ended June 30, 2008, increased \$9.7 million, or 34.1%, from total revenue of \$28.5 million reported for the six months ended June 30, 2007. The increase was due primarily to higher container rental revenue, finance lease income and gain on sale of container portfolios, partly offset by lower management fee revenue. Revenue from CEAB's operations accounted for \$2.3 million of the increase in total revenue. Operating expenses for the six months ended June 30, 2008 increased \$6.1 million, or 55.4%, to \$17.1 million from \$11.0 million for the same six-month period in 2007. Our net income increased \$3.8 million, or 49.6%, to \$11.6 million for the six months ended June 30, 2008 from \$7.7 million for the six months ended June 30, 2007. The increase in net income was primarily attributable to the higher revenue and lower interest expense, partly offset by higher operating expenses and income tax expense compared to the six months ended June 30, 2007.

Revenue. The composition of our revenue is shown on our unaudited financial statements included in this filing. The following discussion explains the significant changes in the composition of our total revenue for the six months ended June 30, 2008 as compared to the six months ended June 30, 2007:

Container Rental Revenue. Container rental revenue increased \$9.1 million, or 56.4%, to \$25.3 million for the six months ended June 30, 2008 from \$16.2 million for the six months ended June 30, 2007. The increase in container rental revenue was principally due to an increase in the average number of TEUs on lease in our owned fleet (including the acquisition of CEAB's fleet) and an increase in average utilization during the six months ended June 30, 2008 as compared to the six months ended June 30, 2007. CEAB's operations represented \$2.2 million of the increase in container rental revenue.

Management Fee Revenue. Management fee revenue for the six months ended June 30, 2008 was \$5.9 million, a decline of \$847,000, or 12.5%, from \$6.8 million for the same period in 2007. The decrease was primarily attributable to the lower fee income due to lower volume of used containers sold on behalf of our investors compared to the first six months of 2007.

Gain on Sale of Container Portfolios. Gain on sale of container portfolios for the six months ended June 30, 2008 was \$6.2 million, a \$1.2 million, or 24.6%, increase from the gain realized for the six months ended June 30, 2007. The increase was due primarily to higher margin on sales during the first six months of 2008 compared to the same period in 2007.

Finance Lease Income. Finance lease income increased \$259,000, or 42.5%, to \$868,000 for the six months ended June 30, 2008 from \$609,000 for the six months ended June 30, 2007. This increase was primarily due to entering into new contracts for direct finance leases, partly offset by reduction in the principal balance of existing direct finance leases.

Expenses. Details of our operating expenses for the six months ended June 30, 2008 and 2007 are shown on our unaudited statements of income included in this filing. The following discussion explains the significant changes in expenses for the six months ended June 30, 2008 as compared to the six months ended June 30, 2007:

Depreciation of Container Rental Equipment. Depreciation of container rental equipment increased by \$3.3 million, or 95.1%, to \$6.7 million for the six months ended June 30, 2008, from \$3.5 million for the six months ended June 30, 2007. This increase was primarily attributable to our fleet growth, greater percentage of newer containers in our owned fleet and the acquisition of CEAB's fleet during the second quarter of 2008.

Table of Contents

Amortization of Intangible Assets. Amortization expense relating to intangible assets for the six months ended June 30, 2008 increased \$84,000, or 13.6%, to \$701,000 from \$617,000 during the same period last year. The increase resulted primarily from the intangible assets recorded in connection with the acquisition of CEAB on April 30, 2008.

Impairment of Container Rental Equipment. Impairment of container rental equipment held for sale decreased \$22,000, or 9.8%, to \$202,000 for the six months ended June 30, 2008 from \$224,000 during the six months ended June 30, 2007. The decrease was due primarily to the lower number of TEUs of containers subject to impairment during the first six months of 2008 as compared to the first six months of 2007.

Gain on Disposition of Used Container Equipment. Gain on disposition of used container equipment increased \$246,000, or 12.0%, to \$2.3 million for the six months ended June 30, 2008 from \$2.0 million for the six months ended June 30, 2007. The increase was due primarily to the higher number of TEUs of used containers sold during the six months ended June 30, 2008 as compared to the same period in 2007.

Gain on Settlement of Lease Obligation. During the second quarter of 2007, the Company recognized a gain of \$694,000 upon settling its liabilities related to lost, damaged or sold equipment that had been on operating leases with a lessor. The settlement amount related to the termination of the operating leases with the lessor. No such settlement occurred during the three months ended June 30, 2008. Included within the gain on settlement of lease obligation in 2007 were gains totaling \$153,000 that arose in prior periods but had not been previously recorded.

Equipment Rental Expense. Equipment rental expense was \$20,000 for the six months ended June 30, 2008, a \$798,000, or 97.6%, decrease from \$818,000 expense for the six months ended June 30, 2007. We terminated all of our operating leases and purchased the last of the rented units in February 2008.

Storage, Handling and Other Expenses. Storage, handling and other expenses increased by \$834,000, or 60.0%, to \$2.2 million for the six months ended June 30, 2008, compared to \$1.4 million for the six months ended June 30, 2007. The increase was primarily attributable to the operations of CEAB, the increase in our owned fleet and the higher overseas storage and handling costs due to the weakening of the U.S. dollar, partly offset by the impact of higher utilization of containers compared to the same period last year.

Marketing, General and Administrative Expenses. Marketing, general and administrative expenses increased by \$2.3 million, or 31.3%, to \$9.5 million for the six months ended June 30, 2008, from \$7.2 million for the six months ended June 30, 2007. The increase in marketing, general and administrative expenses was driven primarily by higher employee related expenses resulting from an increase in personnel and incentive compensation. Additionally, costs relating to our foreign operations have increased due to the weakening of the U.S. dollar and additional expenses associated with the operations of CEAB.

Net Interest Expense. Net interest expense for the six months ended June 30, 2008 was \$3.9 million, a decrease of \$1.3 million, or 24.7%, from \$5.2 million of net interest expense for the six months ended June 30, 2007. The decrease in interest expense was due primarily to the decrease in Eurodollar indexed interest rates and the repayment of the Company's subordinated convertible note (which had a higher interest rate) in May 2007. Additionally, during second quarter ended June 30, 2007 we recorded a gain related to accrued interest that was extinguished with the repayment of the Interpool subordinated note.

Income Tax Expense. Income tax expense increased \$1.1 million, or 24.2%, to \$5.7 million for the six months ended June 30, 2008 from \$4.6 million for the six months ended June 30, 2007. The increase was primarily driven by a 40.1% increase in pretax income for the six months ended June 30, 2008 as compared to the six months ended June 30, 2007. The effective tax rate for the six months ended June 30, 2008 was 33.0% compared to 37.3% for the six months ended June 30, 2007. The lower effective tax rate for the six months ended June 30, 2008 as compared to the six months ended June 30, 2007 is due primarily to greater income before taxes from foreign operations where statutory rates are lower than the U.S. income tax rates.

Table of Contents

Segment Information. The following table summarizes our results of operations for each of our business segments for the six-month periods ended June 30, 2008 and 2007:

	Six Months Ended June 30,		Increase (Decrease)	
	2008	2007	Amount	Percent
	(in thousands)			
	(unaudited)			
Container Leasing				
Total revenue	\$ 26,136	\$ 16,769	\$ 9,367	55.9%
Operating expenses	10,583	5,250	5,333	101.6
Interest expense	4,103	5,927	(1,824)	(30.8)
Gain on extinguishment of debt		(681)	681	(100.0)
Income before taxes attributable to segment	\$ 11,450	\$ 6,273	\$ 5,177	82.5
Container Management				
Total revenue	\$ 12,157	\$ 11,778	\$ 379	3.2%
Operating expenses	6,523	5,757	766	13.3
Income before taxes attributable to segment	\$ 5,634	\$ 6,021	\$ (387)	(6.4)

Container Leasing. Total revenue from our container leasing segment increased \$9.4 million, or 55.9%, to \$26.1 million for the six months ended June 30, 2008 from \$16.8 million during the six months ended June 30, 2007. The increase was primarily due to a greater average number of TEUs on lease in our owned fleet and higher average utilization during the six months ended June 30, 2008 compared to the six months ended June 30, 2007. In addition, CEAB's operations represented \$2.3 million of the increase in revenue.

Total operating expenses for the container leasing segment increased \$5.3 million, or 101.6%, to \$10.6 million for the six months ended June 30, 2008 from \$5.3 million for the six months ended June 30, 2007. The increase was primarily due to higher depreciation of container rental equipment arising from our fleet growth and greater percentage of newer containers in our owned fleet. In addition, CEAB's operating expenses were allocated to the container leasing segment. The higher percentage of owned average TEU's also resulted in a higher allocation of marketing, general and administrative expense to the container leasing segment.

Interest expense, which is fully allocated to the container leasing segment, declined by \$1.8 million, or 30.8%, to \$4.1 million during the quarter ended June 30, 2008 from \$5.9 million during the same period last year. The decrease was due primarily to the lower Eurodollar indexed interest rates and the repayment of the Company's subordinated convertible note (which had a higher interest rate) in May 2007. The decrease was partly offset by a gain related to accrued interest that was extinguished with the repayment of the Interpool subordinated note during the quarter ended June 30, 2008.

Container Management. Total revenue from our container management segment for the six months ended June 30, 2008 was \$12.2 million, which was \$379,000, or 3.2%, higher than the \$11.8 million of revenue from our container management segment for the six months ended June 30, 2007. This increase in revenue was primarily due to a \$1.2 million, or 24.6%, increase in gain on sale of container portfolios, partly offset by a \$847,000, or 12.5%, decrease in management fee revenue compared to the six months ended June 30, 2007 attributable primarily to lower fee income due to lower volume of used containers sold on behalf of our investors.

Total operating expenses for the container management segment increased \$766,000, or 13.3%, for the six months ended June 30, 2008 as compared to the six months ended June 30, 2007 as a result of higher marketing, general and administrative expense driven primarily by an increase in personnel and incentive compensation. Additionally, costs relating to our foreign operations have increased due to the weakening of the U.S. dollar.

Liquidity and Capital Resources

Our principal sources of liquidity have been cash flows from operations, sales of container portfolios, borrowings under our senior secured credit facility and sale of our common stock. We believe that cash flow from operations, future sales of container portfolios and borrowing availability under our senior secured credit facility are sufficient to meet our liquidity needs for at least the next 12 months.

Edgar Filing: CAI International, Inc. - Form 10-Q

We have typically funded a significant portion of the purchase price for new containers through borrowings under our senior secured credit facility. However, from time to time we have funded new container acquisitions through the use of working capital.

Table of Contents

On May 27, 2008, we increased our maximum credit available under our existing senior secured credit agreement to \$290.0 million. All other terms and conditions of the agreement remain the same as the agreement signed on September 25, 2007 (see Note 5 to our consolidated financial statements contained herein). Our senior secured credit facility is secured by substantially all of our assets, including our containers and the underlying leases thereon and our interest in any money received under such contracts. The facility may be increased under certain conditions described in the agreement. In addition, there is a commitment fee on the unused amount of the total commitment, payable quarterly in arrears. The amended agreement provides that swing line loans (short-term borrowings of up to \$10.0 million in the aggregate that are payable within 10 business days or at maturity date, whichever comes earlier) and standby letters of credit (up to \$15.0 million in the aggregate) will be available to us. These credit commitments are part of, and not in addition to, the total commitment of \$290.0 million. The interest rates vary depending upon whether the loans are characterized as Base Rate loans or Eurodollar Rate loans as defined in the senior secured credit facility. As of June 30, 2008 the interest rate on our senior secured credit facility was 3.4%.

As of June 30, 2008, we had \$96.6 million (net of \$300,000 in letters of credit) in availability under our senior secured credit facility, subject to our ability to meet the collateral requirements under the agreement governing our senior secured credit facility. The entire amount of the facility drawn at any time plus accrued interest and fees is callable on demand in the event of certain specified events of default.

We intend to use our senior secured credit facility primarily to fund the purchase of containers in the future. We have typically used the proceeds from sales of container portfolios to container investors to repay our senior secured credit facility. As we expand our owned fleet, our senior secured credit facility balance will be higher, which will result in higher interest expense.

In addition to customary events of default, our senior secured credit facility contains financial covenants that require us to maintain certain ratios in our financial statements. At June 30, 2008, we were in compliance with the financial covenants in our senior secured credit facility.

Cash Flow

The following table sets forth certain cash flow information for the six-month periods ended June 30, 2008 and 2007:

	Six Months Ended June 30,	
	2008	2007
	(in thousands) (unaudited)	
Net income	\$ 11,553	\$ 7,723
Adjustments to income	177	(15,355)
Net cash provided by (used in) operating activities	11,730	(7,632)
Net cash used in investing activities	(46,265)	(21,215)
Net cash provided by financing activities	43,996	18,017
Effect on cash of foreign currency translation	335	7
Net increase (decrease) in cash	9,796	(10,823)
Cash at beginning of period	8,433	20,359
Cash at end of period	\$ 18,229	\$ 9,536

Cash Flows From Operating Activities

Net cash provided by operating activities was \$11.7 million for the six months ended June 30, 2008 as compared to \$7.6 million net cash used in operating activities for the six months ended June 30, 2007. The increase in cash attributable to operating activities during the six months ended June 30, 2008 was primarily due to a \$3.8 million increase in net income for the six months ended June 30, 2008 as compared to same period in 2007 plus the effect of a \$3.3 million increase in depreciation for the six months ended June 30, 2008 as compared to same period in 2007. In addition, amount due to investors increased by \$2.3 million compared to a decrease of \$496,000 during the six months ended June 30, 2007. The increase in accounts payable, accrued expenses and other current liabilities for the six month ended June 30, 2008 increased cash by \$84,000 compared to a decrease of \$9.2 million during the six months ended June 30, 2007, which resulted primarily from a \$9.5 million payment of estimated federal and state income taxes relating to the year ended December 31, 2006.

Table of Contents**Cash Flows From Investing Activities**

Net cash used in investing activities was \$46.3 million for the six months ended June 30, 2008 compared to \$21.2 million for the six months ended June 30, 2007. We continue to invest heavily in containers and, with the acquisition of CEAB, will be investing in other specialized equipment. Cash usage during the six months ended June 30, 2008 from purchases of containers was \$87.2 million compared to \$77.2 million during the same period in 2007. Additionally, we spent \$14.6 million (net of cash acquired) to purchase CEAB in April 2008. Cash used to purchase containers and acquire CEAB was partly offset by net proceeds from the sale of container portfolios and from the disposition of used container equipment aggregating \$53.1 million and \$54.2 million for the six months ended June 30, 2008 and 2007, respectively.

Cash Flows From Financing Activities

Net cash provided by financing activities for the six months ended June 30, 2008 was \$44.0 million compared to \$18.0 million for the six months ended June 30, 2007. For the six months ended June 30, 2008, we borrowed \$55.5 million from our senior secured credit facility and made payments of \$10.0 million thereof. We also made principal payments totaling \$1.2 million on our capital leases. For the six months ended June 30, 2007, cash from investing activities was provided primarily by the proceeds of \$78.1 million from our initial public offering, \$51.0 million from bank debt and \$1.2 million from collection of note receivable on preferred stock, reduced by the \$73.7 million payment of our bank debt and the payment of our \$37.5 million convertible note payable to Interpool.

Contractual Obligations and Commercial Commitments

The following table sets forth our contractual obligations and commercial commitments by due date as of June 30, 2008:

	Total	1 year	Payments Due by Period					
			1-2 years	2-3 years	3-4 years	4-5 years	>5 years	
Total debt obligations:								
Senior secured credit facility	\$ 193,100	\$	\$	\$	\$	\$ 193,100	\$	
Interest expense (1)	32,928	8,050	7,776	7,489	7,217	1,976	420	
Rental equipment payable	30,216	30,216						
Rent, office facilities and equipment	2,196	972	808	328	88			
Capital lease obligations	24,541	4,679	4,155	4,613	3,719	2,960	4,415	
Container purchases commitments	58,347	58,347						
Total contractual obligations	\$ 341,328	\$ 102,264	\$ 12,739	\$ 12,430	\$ 11,024	\$ 198,036	\$ 4,835	

(1) Our estimate of interest expense commitment includes \$28.2 million relating to our senior secured credit facility and \$4.7 million relating to our capital lease obligations. The calculation of interest related to our senior secured credit facility assumes that the interest rate of 3.4% at June 30, 2008 on our senior secured credit facility will remain at the same interest level over the next five years. We expect that the interest rate will vary over time based upon fluctuations in the underlying indexes upon which this interest rate is based. The interest relating to our capital lease obligations was based on an assumed average interest rate ranging from 5.5% to 6.3% over the above periods. Our senior secured credit facility provides for a maximum total commitment amount of up to \$290.0 million in revolving line of credit. Loans under our senior secured credit facility bear interest at variable rates based on the Eurodollar rate or a Base Rate as defined in the agreement governing our senior secured credit facility, plus a margin that adjusts depending on a certain financial criterion. In addition, there is a commitment fee on the unused amount of the total commitment which is payable quarterly in arrears. The senior secured credit facility provides that swing line loans (up to \$10.0 million in the aggregate) and standby letters of credit (up to \$15.0 million in the aggregate) will be available to us. These credit commitments are part of, and not in addition to, the total commitment of \$290.0 million under our senior secured credit facility. As of June 30, 2008, our senior secured credit facility had a balance of \$193.4 million (including \$300,000 of letters of credit). This loan agreement will terminate on September 25, 2012.

As part of the acquisition of CEAB, we assumed additional obligations of approximately \$25.7 million related to capital leases. These capital lease obligations are denominated in U.S. dollars and Euros and had a balance of \$24.5 million as of June 30, 2008.

Table of Contents

Off-Balance Sheet Arrangements

At June 30, 2008, we had no significant off-balance sheet arrangements or obligations. An off-balance sheet arrangement includes any contractual obligation, agreement or transaction arrangement involving an unconsolidated entity under which we would have: (1) retained a contingent interest in transferred assets; (2) an obligation under derivative instruments classified as equity; (3) any obligation arising out of a material variable interest in an unconsolidated entity that provides financing, liquidity, market risk or credit risk support to us, or that engages in leasing, hedging or research and development services with us; or (4) made guarantees.

Critical Accounting Policies and Estimates

There have been no material changes to our critical accounting policies and estimates from the disclosures made in Management's Discussion and Analysis of Financial Conditions and Results of Operations included in our Annual Report Form 10-K at December 31, 2007 filed with the SEC on March 17, 2008.

Recent Accounting Pronouncements

The most recent accounting pronouncements that are relevant to our business are described in Note 2(b) to unaudited consolidated financial statements included in this filing.

ITEM 3: Quantitative and Qualitative Disclosures About Market Risk

Market risk represents the risk of changes in value of a financial instrument, derivative or non-derivative, caused by fluctuations in foreign exchange rates and interest rates. Changes in these factors could cause fluctuations in our results of operations and cash flows. We are exposed to the market risks described below.

Foreign Exchange Rate Risk. Although we have significant foreign-based operations, the U.S. dollar is our primary operating currency. Thus, substantially all of our revenue and expenses are denominated in U.S. dollars. We had equipment sales in British Pounds, Euros and Japanese Yen and incurred overhead costs in foreign currencies, primarily in British pounds and Euros. CEAB has a significant amount of revenue as well as expenses denominated in Euro, Swedish Kroner and Norwegian Kroner. The U.S. dollar has declined in value in relation to other major foreign currencies (such as the Euro). The decline in the U.S. dollars increased our revenues and expenses denominated in foreign currencies. If the U.S. dollar continues to decline in relation to foreign currencies, such decline may have a significant impact on our future operating results.

Interest Rate Risk. The nature of our business exposes us to market risk arising from changes in interest rates to which our variable-rate debt is linked. In connection with the acquisition of CEAB, we assumed an interest rate swap agreements to manage the risk associated with fluctuations in interest rates. This interest rate swap agreement had a value of \$101,000 as of June 30, 2008.

As of June 30, 2008 the principal amount of debt outstanding under the variable-rate arrangement of our senior secured credit facility was \$193.1 million. In addition, the capital lease obligations we assumed in conjunction with the acquisition of CEAB had a balance of \$24.5 million at June 30, 2008 and have variable interest rates. A 1.0% increase or decrease in underlying interest rates for these obligations will increase or decrease interest expense by approximately \$2.1 million annually assuming debt remains constant at June 30, 2008 levels.

Credit Risk

We maintain detailed credit records about the container lessees for our total fleet. Our credit policy sets different maximum exposure limits for our container lessees. Credit criteria may include, but are not limited to, container lessee trade route, country, social and political climate, assessments of net worth, asset ownership, bank and trade credit references, credit bureau reports, including those from Dynamar, operational history and financial strength. We monitor container lessees' performance and lease exposures on an ongoing basis, and our credit management processes are aided by the long payment experience we have with most of the container lessees for our total fleet and our broad network of long-standing relationships in the shipping industry that provide current information about the container lessees for our total fleet. In managing this risk we also make an allowance for doubtful accounts. The allowance for doubtful accounts is developed based on two key components: (1) specific reserves for receivables where management believes full collection is doubtful; and (2) a general reserve for estimated losses inherent in the receivables. The general reserve is estimated by applying certain percentage ranging from 1.0% on accounts that are one to thirty days overdue, to 100% on accounts that are one year overdue. An allowance of \$457,000 has been established against non-performing receivables as of June 30, 2008. For the six months ended June 30, 2008, receivable write-offs, totaled \$85,000.

Edgar Filing: CAI International, Inc. - Form 10-Q

The credit risk on accounts receivable related to the containers we manage is the responsibility of the container investors. We hold back a percentage of lease payments relating to managed containers to be applied against future lessee defaults. Under our management agreements, if we are unable to ultimately collect any amount due from a managed container lessee, the container investors are obligated to reimburse us for any amounts we have previously paid to them in advance of receiving the amount from the container lessee. We typically pay container investors the amounts due to them under the leases we manage within 60 days after

Table of Contents

invoicing lessees. Accordingly, we have credit risk exposure on amounts that we have paid to container investors in advance of receiving the funds from the lessees. Although our container investors are obligated under the terms of our management agreements to reimburse us for amounts advanced that are subsequently not collected from the managed container lessees, we bear the credit risk if the container investor cannot reimburse us, and if one or more of our managed container lessees will become insolvent or otherwise be unable to pay us the amounts due under the lease. We receive all funds from our managed container lessees directly and if we determine that a payment due from a container lessee is not collectible, we deduct that amount from future payments to the relevant container investors to the extent that amount exceeds amounts we have previously held back. We monitor our managed fleet credit risk exposure to managed container lessees and cease making payments to container investors with respect to containers leased to a lessee that we have determined is unlikely to make payment under the lease.

ITEM 4. CONTROLS AND PROCEDURES.

Based upon the required evaluation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities and Exchange Act of 1934, as amended (the "Exchange Act")), our President and Chief Executive Officer and our Senior Vice President and Chief Financial Officer concluded that as of June 30, 2008 our disclosure controls and procedures were adequate and effective to ensure that information was gathered, analyzed and disclosed on a timely basis.

There has been no change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during our fiscal quarter ended June 30, 2008, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

From time to time we may be a party to litigation matters or disputes arising in the ordinary course of business, including in connection with enforcing our rights under our leases. Currently, we are not a party to any legal proceedings which are material to our business, financial condition or results of operations.

ITEM 1A. RISK FACTORS.

Before making an investment decision, investors should carefully consider the risks described below as well as the risk factors in Part 1: Item 1A of our Annual Report Form 10-K for the year ended December 31, 2008 filed with the SEC on March 17, 2008. The risks described in our Form 10-K and the risks described below are not the only ones facing our company. Additional risks not currently known to us or that we currently believe are immaterial may also impair our business operations. Any of these risks could adversely affect our business, cash flows, financial condition and results of operations. The trading price of our common stock could decline due to any of these risks, and investors may lose all or part of their investment. In assessing these risks, investors should also refer to the other information contained or incorporated by reference in this 10-Q filing.

The demand for leased containers depends on many political, economic and other factors beyond our control.

Substantially all of our revenue comes from activities related to the leasing of containers. Our ability to continue successfully leasing containers to container shipping lines, earning management fees on leased containers and attracting container investors to purchase container portfolios from us depends in part upon the continued demand for leased containers. The demand for containers is affected by numerous factors.

Demand for containers depends largely on the rate of world trade and economic growth, with consumer demand being one of the most critical factors affecting this growth. Economic downturns in one or more countries, particularly in the United States and other countries with consumer-oriented economies, could result in a reduction in world trade volume or in demand by container shipping lines for leased containers. Thus, a decrease in the volume of world trade may adversely affect our utilization and per diem rates and lead to reduced revenue, increased operating expenses (such as storage and repositioning costs) and have an adverse effect on our financial performance. We cannot predict whether, or when, such downturns will occur.

Edgar Filing: CAI International, Inc. - Form 10-Q

Much of our leasing business involves shipments of goods exported from Asia. From time to time, there have been economic disruptions, health scares, such as SARS and avian flu, financial turmoil, natural disasters and political instability in Asia. If these events were to occur in the future, they could adversely affect our container lessees and the general demand for shipping and lead to reduced demand for leased containers or otherwise adversely affect us. Other general factors affecting demand for leased containers, utilization and per diem rates include the following:

prices of new and used containers;

economic conditions and competitive pressures in the shipping industry;

shifting trends and patterns of cargo traffic;

the availability and terms of container financing;

fluctuations in interest rates and foreign currency values;

overcapacity or undercapacity of the container manufacturers;

Table of Contents

the lead times required to purchase containers;

the number of containers purchased by competitors and container lessees;

container ship fleet overcapacity or undercapacity;

increased repositioning by container shipping lines of their own empty containers to higher-demand locations in lieu of leasing containers from us;

consolidation or withdrawal of individual container lessees in the container shipping industry;

import/export tariffs and restrictions;

customs procedures, foreign exchange controls and other governmental regulations;

natural disasters that are severe enough to affect local and global economies; and

political and economic factors.

All of these factors are inherently unpredictable and beyond our control. These factors will vary over time, often quickly and unpredictably, and any change in one or more of these factors may have a material adverse effect on our business and results of operations. Many of these factors also influence the decision by container shipping lines to lease or buy containers. Should one or more of these factors influence container shipping lines to buy a larger percentage of the containers they operate, our utilization rate would decrease, resulting in decreased revenue and increased storage and repositioning costs.

Our operating results have fluctuated significantly in the past and may fluctuate significantly in the future.

Our revenue comes primarily from the leasing of containers owned by us, management fees earned on containers owned by container investors and gain on sale of container portfolios to container investors. Historically, our annual and quarterly total revenues, net income and cash flows have fluctuated significantly as a result of fluctuations in our gain on sale of container portfolios. Selling containers to container investors has very little associated incremental expense, which means that our quarterly results may fluctuate significantly depending upon the amount of gain on sale of container portfolios, if any, we realize in a quarter. Due to seasonal increased demand for containers in the several months leading up to the holiday season in the United States and Europe and higher demand for purchasing containers by container investors toward the end of the calendar year, a higher proportion of our container sales to investors has typically occurred in the second half of each calendar year. Although by comparison our container rental revenue and management fee revenue have historically fluctuated much less than our gain on sale of container portfolios, container rental revenue and management revenue may also fluctuate significantly in future periods based upon the level of demand by container shipping lines for leased containers, our ability to maintain a high utilization rate of containers in our total fleet, changes in per diem rates for leases and fluctuations in operating expenses.

A large part of our revenue comes from gain on sale of container portfolios and our container sale activities in the future may result in lower gains or losses on sales of containers.

Our revenue from gain on sale of container portfolios depends on our ability to make a profit on containers that we purchase and then resell to container investors. We typically enter into firm purchase orders for containers before we begin finding lessees for the containers, and the time necessary to lease these containers may be much longer than we anticipate. The price that a container investor is willing to pay for a portfolio of containers depends on a number of factors, including the historical and future expected cash flows from the portfolio to the container investor, the credit ratings of the lessees, the mix of short-term and long-term leases, the number of TEUs in the portfolio, the timing of the sale and

Edgar Filing: CAI International, Inc. - Form 10-Q

alternative investment opportunities available to the container investor. If any of these factors changes unexpectedly during the period between the date of our purchase order to the date a container investor purchases the container from us, we may recognize a lower gain on sale of the containers to investors, sell them to container investors at a loss or retain them as part of our owned fleet.

We derive a substantial portion of our revenue for each of our container management and container leasing segments from a limited number of container investors and container lessees, respectively. The loss of, or reduction in business by, any of these container investors or container lessees could result in a significant loss of revenue and cash flow.

We have derived, and believe that we will continue to derive, a significant portion of our revenue and cash flow from a limited number of container investors and container lessees. Our business comprises two reportable segments for financial statement reporting purposes: container management and container leasing. Revenue for our container management segment comes primarily from container investors that purchase portfolios of containers and then pay us to manage the containers for them. Revenue for our container leasing segment comes primarily from container lessees that lease containers from our owned fleet.

Revenue from our ten largest container lessees represented 62.9% of the revenue from our container leasing segment for the year ended December 31, 2007, with revenue from our single largest container lessee accounting for 11.8%, or \$4.7 million, of revenue from our container leasing segment during such period. This \$4.7 million of revenue represented 7.2% of our total revenue for this period. We do not distinguish between our owned fleet and our managed fleet when we enter into leases with container shipping lines. Accordingly, the largest lessees of our owned fleet are typically among the largest lessees of our managed fleet, and our management

Table of Contents

fee revenue is based in part on the number of managed containers on lease to container lessees. As a result, the loss of, or default by, any of our largest container lessees could have a material adverse effect on the revenue for both our container management segment

and our container leasing segment. In addition, many of the management agreements with our container investors contain performance criteria, such as minimum per diem net income per container or minimum utilization rates for the pool of containers owned by the container investors. In the event we fail to meet one or more of these criteria in a management agreement, the independent investment arrangers who typically act on behalf of container investors may have the right to terminate the management agreement. In the year ended December 31, 2007, container investors associated with five independent investment arrangers represented 95.4% of our container management revenue. If we were to not perform our obligations as a container manager under the management agreements controlled by an independent investment arranger, the independent investment manager could decide to terminate all of the management agreements under which we have not performed our obligations. Managed containers associated with our single largest container investor accounted for 48.0%, or \$12.2 million, of revenue from our container management segment during the year ended December 31, 2007. This \$12.2 million of revenue represented 18.8% of our total revenue for this period. The termination of the management agreements under the control of a single investment arranger or the loss of our largest container investor as a management services customer could have a material adverse effect on the revenue for our container management segment.

Consolidation and concentration in the container shipping industry could decrease the demand for leased containers.

We primarily lease containers to container shipping lines. We believe container shipping lines require two TEUs of available containers for every TEU of capacity on their container ships. The container shipping lines have historically relied on a large number of leased containers to satisfy their needs. Consolidation of major container shipping lines could create efficiencies and decrease the demand that container shipping lines have for leased containers because they may be able to fulfill a larger portion of their needs through their owned container fleets. It could also create concentration of credit risk if the number of our container lessees decreases due to consolidation. Additionally, large container shipping lines with significant resources could choose to manufacture their own containers, which would decrease their demand for leased containers and could have an adverse impact on our business.

Per diem rates for our leased containers may decrease, which would have a negative effect on our business and results of operations.

Per diem rates for our leased containers depend on a large number of factors, including the following:

the type and length of the lease;

embedded residual assumptions;

the type and age of the container;

the number of new containers available for lease by our competitors;

the location of the container being leased; and

the price of new containers.

Because steel is the major component used in the construction of new containers, the price of new containers and per diem rates on new containers are highly correlated with the price of raw steel. In the late 1990s, new container prices and per diem rates declined because of, among other factors, a drop in worldwide steel prices and a shift in container manufacturing from Taiwan and Korea to areas in mainland China with lower labor costs. From 2003 to 2004, and again in the second half of 2006, container prices and leasing rates increased partially due to an increase in worldwide steel prices. Similarly, container prices during the first six months of 2008 have risen from their 2007 levels partially due to higher commodity prices. We cannot predict if recent price increases will be sustained or if container prices and per diem rates may fall again.

Edgar Filing: CAI International, Inc. - Form 10-Q

If container prices decline, we may need to lease the containers at low return rates or at a loss. Per diem rates may be negatively impacted by the entrance of new leasing companies, overproduction of new containers by manufacturers and over-buying of containers by container shipping lines and leasing competitors. For example, during 2001 and again in 2005, overproduction of new containers, coupled with a build-up of container inventories in Asia by leasing companies and container shipping lines, led to decreasing per diem rates and utilization rates. In 2007, competitive pressures also reduced per diem rates. In the event that the container shipping industry were to be characterized by overcapacity in the future, or if available supply of containers were to increase significantly as a result of, among other factors, new companies entering the business of leasing and selling containers, both utilization and per diem rates may decrease, adversely affecting our revenue and operating results.

We face extensive competition in the container leasing industry.

We may be unable to compete favorably in the highly competitive container leasing and container management businesses. We compete with a number of major leasing companies, many smaller lessors, manufacturers of container equipment, companies and financial institutions offering finance leases, promoters of container ownership and leasing as a tax-efficient investment, container shipping lines, which sometimes lease their excess container stocks, and suppliers of alternative types of containers for freight transport. Some of these competitors have greater financial resources and access to capital than we do. Additionally, some of these

Table of Contents

competitors may have large, underutilized inventories of containers, which could lead to significant downward pressure on per diem rates, margins and prices of containers. Competition among container leasing companies depends upon many factors, including among others, per diem rates; lease terms, including lease duration, drop-off restrictions and repair provisions; customer service; and the location, availability, quality and individual characteristics of containers. New entrants into the leasing business have been attracted by the high rate of containerized trade growth in recent years. New entrants may be willing to offer pricing or other terms that we are unwilling or unable to match. As a result, we may not be able to maintain a high utilization rate or achieve our growth plans.

A reduction in the willingness of container investors to have us manage their containers could adversely affect our business, results of operations and financial condition.

A significant percentage of our revenue is attributable to management fees earned on services related to the leasing of containers owned by container investors. This revenue has very low direct operating costs associated with it. Accordingly, fluctuations in our management fee revenue in any period will have a significant impact on our profitability in that period. If we fail to meet performance requirements contained in our management agreements, container investors may seek to terminate these agreements. Moreover, our ability to continue to attract new management contracts depends upon a number of factors, including our ability to lease containers on attractive lease terms and to efficiently manage the repositioning and disposition of containers. In the event container investors perceive another container leasing company as better able to provide them with a stable and attractive rate of return, existing contracts may not be renewed, and we may lose management contract opportunities in the future, which could affect our business, results of operations and financial condition.

As we increase the number of containers in our owned fleet, we will be subject to significantly greater ownership risks.

The number of containers in our owned fleet fluctuates over time as we purchase new containers and sell containers to container investors or into the secondary resale market. As part of our strategy, we plan to increase both the number of owned containers as well as the number of managed containers in our fleet. We believe we will be able to find container investors to purchase the desired portion of the new containers that we purchase and lease. If we are unable to locate container investors to purchase these containers, we will operate the containers as part of our owned fleet. Ownership of containers entails greater risk than management of containers for container investors, meaning that as we increase the number of containers in our owned fleet, we are subject to an increased level of risk from loss or damage to equipment, financing costs, changes in per diem rates, re-leasing risk, changes in utilization rates, lessee defaults, repositioning costs, storage expenses, impairment charges and changes in sales price upon disposition of containers.

As we increase the number of containers in our owned fleet we will have significantly more capital at risk and may not be able to satisfy the future capital requirements of our container management business.

As we increase the number of containers in our owned fleet, either as a result of planned growth in our owned fleet or as a result of our inability to sell containers to container investors, we may need to maintain higher debt balances which may adversely affect our return on equity and reduce our capital resources, including our ability to borrow money to continue expanding our managed fleet. Future borrowings may not be available under our senior secured credit facility or we may not be able to refinance the facility, if necessary, on commercially reasonable terms or at all. We may need to raise additional debt or equity capital in order to fund our business, expand our sales activities and/or respond to competitive pressures. We may not have access to the capital resources we desire or need to fund our business. These effects, among others, may reduce our profitability and adversely affect our plans to continue the expansion of the container management portion of our business. Our container lessees prefer newer containers, so to stay competitive we must continually add new containers to our fleet. If we are unable to make necessary capital expenditures, our fleet of containers may be less attractive to our container lessees and our profitability could suffer.

Gains and losses associated with the disposition of used equipment may fluctuate and adversely affect our results of operations.

We regularly sell used, older containers upon lease expiration. The residual values of these containers therefore affect our profitability. The volatility of the residual values of such containers may be significant. These values depend upon, among other factors, raw steel prices, applicable maintenance standards, refurbishment needs, comparable new container costs, used container availability, used container demand, inflation rates, market conditions, materials and labor costs and equipment obsolescence. Most of these factors are outside of our control.

Containers are typically sold if it is in the best interest of the owner to do so after taking into consideration earnings prospects, book value, remaining useful life, repair condition, suitability for leasing or other uses and the prevailing local sales price for containers. Gains or losses on the disposition of used container equipment and the sales fees earned on the disposition of managed containers will also fluctuate and may be significant if we sell large quantities of used containers.

Table of Contents

We may incur significant costs to reposition containers.

When lessees return containers to locations where supply exceeds demand, we routinely reposition containers to higher demand areas. Repositioning expenses vary depending on geographic location, distance, freight rates and other factors, and may not be fully covered by drop-off charges collected from the last lessee of the containers or pick-up charges paid by the new lessee. We seek to limit the number of containers that can be returned and impose surcharges on containers returned to areas where demand for such containers is not expected to be strong. However, market conditions may not enable us to continue such practices. In addition, we may not accurately anticipate which port locations will be characterized by high or low demand in the future, and our current contracts will not protect us from repositioning costs if ports that we expect to be high-demand ports turn out to be low-demand ports at the time leases expire.

Lessee defaults may adversely affect our business, results of operations and financial condition by decreasing revenue and increasing storage, repositioning, collection and recovery expenses.

Our containers are leased to numerous container lessees. Lessees are required to pay rent and indemnify us for damage to or loss of containers. Lessees may default in paying rent and performing other obligations under their leases. A delay or diminution in amounts received under the leases (including leases on our managed containers), or a default in the performance of maintenance or other lessee obligations under the leases could adversely affect our business, results of operations and financial condition and our ability to make payments on our debt.

Our cash flows from containers, principally container rental revenue, management fee revenue, gain on sale of container portfolios, gain on disposition of used equipment and commissions earned on the sale of containers on behalf of container investors, are affected significantly by the ability to collect payments under leases and the ability to replace cash flows from terminating leases by re-leasing or selling containers on favorable terms. All of these factors are subject to external economic conditions and the performance by lessees and service providers that are not within our control.

When lessees default, we may fail to recover all of our containers and the containers we do recover maybe returned to locations where we will not be able to quickly re-lease or sell them on commercially acceptable terms. We may have to reposition these containers to other places where we can re-lease or sell them, which could be expensive depending on the locations and distances involved. Following repositioning, we may need to repair the containers and pay container depots for storage until the containers are re-leased. For our owned containers these costs will directly reduce our income before taxes and for our managed containers, lessee defaults will increase operating expenses, and thus reduce our management fee revenue. While we maintain insurance to cover such defaults, it is subject to large deductible amounts and significant exclusions and, therefore, may not be sufficient to prevent us from suffering material losses. Additionally, this insurance might not be available to us in the future on commercially reasonable terms, or at all. While in recent years defaults by lessees on our owned fleet, as measured by our experience and reflected on our financial statements as an allowance for doubtful accounts, have not constituted a significant percentage of our assets, future defaults could have a material adverse effect on our business, results of operations and financial condition.

Changes in market price, availability or transportation costs of containers could adversely affect our ability to maintain our supply of containers.

We currently purchase almost all of our containers from manufacturers based in China. If it were to become more expensive for us to procure containers in China or to transport these containers at a low cost from China to the locations where they are needed by our container lessees because of changes in exchange rates between the U.S. Dollar and Chinese Yuan, further consolidation among container suppliers, increased tariffs imposed by the United States or other governments or for any other reason, we may have to seek alternative sources of supply. While we are not currently dependent on any single current manufacturer of our containers, we may not be able to make alternative arrangements quickly enough to meet our container needs, and the alternative arrangements may increase our costs. The availability of containers depends significantly on the availability and cost of steel in China. If a shortage of steel develops either in China or worldwide, container manufacturers may not be able to meet our demand for new containers which would limit our ability to add new containers to our fleet.

The price of containers has been rising and we could incur significant losses if container prices decline in the future.

We continue to build our owned container portfolios and have been purchasing containers at a higher price during the first half of 2008 as compared to 2007. Should the market price for containers suddenly fall in the near future, we could sustain significant losses from the impairment of our containers for sale and from the write-down of containers on lease to our customers or increased depreciation expense. We may also need to lease the containers at low returns or at a loss.

Table of Contents

Terrorist attacks, the threat of such attacks or the outbreak of war and hostilities could negatively impact our operations and profitability and may expose us to liability.

Terrorist attacks and the threat of such attacks have contributed to economic instability in the United States and elsewhere, and further acts or threats of terrorism, violence, war or hostilities could similarly affect world trade and the industries in which we and our container lessees operate. For example, worldwide containerized trade dramatically decreased in the immediate aftermath of the September 11, 2001 terrorist attacks in the United States, which affected demand for leased containers. In addition, terrorist attacks, threats of terrorism, violence, war or hostilities may directly impact ports, depots, our facilities or those of our suppliers or container lessees and could impact our sales and our supply chain. A severe disruption to the worldwide ports system and flow of goods could result in a reduction in the level of international trade and lower demand for our containers.

We maintain liability insurance that we believe would apply to claims arising from a terrorist attack, and our lease agreements require our lessees to indemnify us for all costs, liabilities and expenses arising out of the use of our containers, including property damage to the containers, damage to third-party property and personal injury. However, our lessees may not have adequate resources to honor their indemnity obligations and our insurance coverage is subject to large deductibles, a \$15.0 million limit on coverage and significant exclusions. Accordingly, we may not be protected from liability (and expenses in defending against claims of liability) arising from a terrorist attack.

Our senior executives are critical to the success of our business and our inability to retain them or recruit new personnel could adversely affect our business.

Most of our senior executives and other management-level employees have over ten years of industry experience. We rely on this knowledge and experience in our strategic planning and in our day-to-day business operations. Our success depends in large part upon our ability to retain our senior management, the loss of one or more of whom could have a material adverse effect on our business. Our success also depends on our ability to retain our experienced sales force and technical personnel as well as recruiting new skilled sales, marketing and technical personnel. Competition for these individuals in our industry is intense and we may not be able to successfully recruit, train or retain qualified personnel. If we fail to retain and recruit the necessary personnel, our business and our ability to obtain new container lessees and provide acceptable levels of customer service could suffer.

We rely on our proprietary information technology system to conduct our business. If this system fails to adequately perform its functions, or if we experience an interruption in its operation, our business, results of operations and financial prospects could be adversely affected.

The efficient operation of our business is highly dependent on our proprietary information technology system. We rely on our system to track transactions, such as repair and depot charges and changes to book value, and movements associated with each of our owned or managed containers. We use the information provided by this system in our day-to-day business decisions in order to effectively manage our lease portfolio and improve customer service. We also rely on it for the accurate tracking of the performance of our managed fleet for each container investor. The failure of our system to perform as we expect could disrupt our business, adversely affect our results of operations and cause our relationships with lessees and container investors to suffer. In addition, our information technology system is vulnerable to damage or interruption from circumstances beyond our control, including fire, natural disasters, power loss and computer systems failures and viruses. Any such interruption could have a material adverse effect on our business, results of operations and financial prospects.

Our level of indebtedness reduces our financial flexibility and could impede our ability to operate.

We intend to borrow additional amounts under our senior secured credit facility and other debt facilities to purchase containers and make acquisitions and other investments. We expect that we will maintain a significant amount of indebtedness on an ongoing basis. All of our borrowings under our senior secured credit facility are due and payable on September 25, 2012, and there is no assurance that we will be able to refinance our outstanding indebtedness, or if refinancing is available, that it can be obtained on terms that we can afford.

Our senior secured credit facility requires us to pay a variable rate of interest, which will increase or decrease based on variations in certain financial indexes, and fluctuations in interest rates can significantly decrease our profits. We do not have any material amounts of hedge or similar contracts that would protect us against changes in interest rates.

The amount of our indebtedness could have important consequences for you, including the following:

Edgar Filing: CAI International, Inc. - Form 10-Q

requiring us to dedicate a substantial portion of our cash flow from operations to make payments on our debt, thereby reducing funds available for operations, future business opportunities and other purposes;

limiting our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate;

Table of Contents

making it more difficult for us to satisfy our debt obligations, and any failure to comply with such obligations, including financial and other restrictive covenants, could result in an event of default under the agreements governing such indebtedness, which could lead to, among other things, an acceleration of our indebtedness or foreclosure on the assets securing our indebtedness, which could have a material adverse effect on our business or financial condition;

limiting our ability to borrow additional funds, or to sell assets to raise funds, if needed, for working capital, capital expenditures, acquisitions or other purposes; and

increasing our vulnerability to general adverse economic and industry conditions, including changes in interest rates.

Our long-term debt and capital lease obligations were \$217.6 million at June 30, 2008. We may not generate sufficient cash flow from operations to service and repay our debt and related obligations and have sufficient funds left over to achieve or sustain profitability in our operations, meet our working capital and capital expenditure needs or compete successfully in our industry.

We will require a significant amount of cash to service and repay our outstanding indebtedness and our ability to generate cash depends on many factors beyond our control.

Our ability to make payments on and repay our indebtedness and to fund planned capital expenditures will depend on our ability to generate cash in the future. Based on the balance of our long-term debt and capital lease obligations at June 30, 2008, we will require approximately \$12.7 million in the 12 months ending June 30, 2009 to service our indebtedness as of June 30, 2008. It is possible that:

our business will not generate sufficient cash flow from operations to service and repay our debt and to fund working capital requirements and planned capital expenditures;

future borrowings will not be available under our current or future credit facilities in an amount sufficient to enable us to refinance our debt; or

we will not be able to refinance any of our debt on commercially reasonable terms or at all.

Our senior secured credit facility imposes, and the terms of any future indebtedness may impose, significant operating, financial and other restrictions on us and our subsidiaries.

Restrictions imposed by our senior secured credit facility will limit or prohibit, among other things, our ability to:

incur additional indebtedness;

pay dividends on or redeem or repurchase our stock;

enter into new lines of business;

issue capital stock of our subsidiaries;

make loans and certain types of investments;

create liens;

sell certain assets or merge with or into other companies;

enter into certain transactions with stockholders and affiliates; and

restrict dividends, distributions or other payments from our subsidiaries.

These restrictions could adversely affect our ability to finance our future operations or capital needs and pursue available business opportunities. A breach of any of these restrictions, including breach of financial covenants, could result in a default in respect of the related indebtedness. If a default occurs, the relevant lenders could elect to declare the indebtedness, together with accrued interest and fees, to be immediately due and payable and proceed against any collateral securing that indebtedness, which will constitute substantially all of our container assets.

The international nature of our business exposes us to numerous risks.

Our ability to enforce lessees' obligations will be subject to applicable law in the jurisdiction in which enforcement is sought. As containers are predominantly located on international waterways, it is not possible to predict, with any degree of certainty, the jurisdictions in which enforcement proceedings may be commenced. For example, repossession from defaulting lessees may be difficult and more expensive in jurisdictions in which laws do not confer the same security interests and rights to creditors and lessors as those in the United States and in jurisdictions where recovery of containers from defaulting lessees is more cumbersome. As a result, the relative success and expedience of enforcement proceedings with respect to containers in various jurisdictions cannot be predicted.

Table of Contents

We are also subject to risks inherent in conducting business across national boundaries, any one of which could adversely impact our business. These risks include:

regional or local economic downturns;

changes in governmental policy or regulation;

restrictions on the transfer of funds into or out of the country;

import and export duties and quotas;

domestic and foreign customs and tariffs;

foreign currency fluctuations and related gains and losses;

international incidents;

war, hostilities and terrorist attacks, or the threat of any of these events;

government instability;

nationalization of foreign assets;

government protectionism;

compliance with export controls, including those of the U.S. Department of Commerce;

compliance with import procedures and controls, including those of the U.S. Department of Homeland Security;

consequences from changes in tax laws, including tax laws pertaining to the container investors;

potential liabilities relating to foreign withholding taxes;

labor or other disruptions at key ports;

difficulty in staffing and managing widespread operations; and

restrictions on our ability to own or operate subsidiaries, make investments or acquire new

businesses in these jurisdictions.

One or more of these factors could impair our current or future international operations and, as a result, harm our overall business.

We may incur costs associated with new security regulations, which may adversely affect our business, financial condition and results of operations.

We may be subject to regulations promulgated in various countries, including the United States, seeking to protect the integrity of international commerce and prevent the use of containers for international terrorism or other illicit activities. For example, the Container Security Initiative, the Customs-Trade Partnership Against Terrorism and Operation Safe Commerce are among the programs administered by the U.S. Department of Homeland Security that are designed to enhance security for cargo moving throughout the international transportation system by identifying existing vulnerabilities in the supply chain and developing improved methods for ensuring the security of containerized cargo entering and leaving the United States. Moreover, the International Convention for Safe Containers, 1972 (CSC), as amended, adopted by the International Maritime Organization, applies to new and existing containers and seeks to maintain a high level of safety of human life in the transport and handling of containers by providing uniform international safety regulations. As these regulations develop and change, we may incur compliance costs due to the acquisition of new, compliant containers and/or the adaptation of existing containers to meet new requirements imposed by such regulations. Additionally, certain companies are currently developing or may in the future develop products designed to enhance the security of containers transported in international commerce. Regardless of the existence of current or future government regulations mandating the safety standards of intermodal shipping containers, our competitors may adopt such products or our container lessees may require that we adopt such products. In responding to such market pressures, we may incur increased costs, which could have a material adverse effect on our business, financial condition and results of operations.

We operate in numerous tax jurisdictions. A taxing authority within any of these jurisdictions may challenge our operating structure which could result in additional taxes, interest and penalties that could materially impact our future financial results.

We have implemented a number of structural changes with respect to our international subsidiaries in an effort to reduce our income tax obligations in countries in which we operate. There can be no assurance that our tax structure and the amount of taxes we pay in any of these countries will not be challenged by the taxing authorities in these countries or that we will achieve any of the expected tax savings over the expected timeline or at all. If the tax authorities challenge our tax structure or the amount of taxes paid, we could incur substantial expenses associated with defending our tax position as well as expenses associated with the payment of any additional taxes, penalties and interest that may be imposed on us. The payment of these amounts could have a material adverse effect on our business and results of operations.

Environmental liability may adversely affect our business and financial condition.

We are subject to federal, state, local and foreign laws and regulations relating to the protection of the environment, including those governing the discharge of pollutants to air, ground and water, the management and disposal of hazardous substances and wastes and the cleanup of contaminated sites. We could incur substantial costs, including cleanup costs, fines and costs arising out of third-party

Table of Contents

claims for property or natural resource damage and personal injury, as a result of violations of or liabilities under environmental laws and regulations in connection with our or our lessees' current or historical operations. Under some environmental laws in the United States and certain other countries, the owner or operator of a container may be liable for environmental damage, cleanup or other costs in the event of a spill or discharge of material from the container without regard to the fault of the owner or operator. While we typically maintain liability insurance and typically require lessees to provide us with indemnity against certain losses, the insurance coverage may not be sufficient, or available, to protect against any or all liabilities and such indemnities may not be sufficient to protect us against losses arising from environmental damage. Moreover, our lessees may not have adequate resources, or may refuse to honor their indemnity obligations and our insurance coverage is subject to large deductibles, coverage limits and significant exclusions.

Our purchasing and leasing of refrigerated containers may subject us to additional risks.

In 2007 we began purchasing refrigerated containers and leasing them to our customers. We intend to make additional purchases of refrigerated containers. Refrigerated containers are significantly more expensive on a per TEU basis than dry van containers and will have a greater financial impact than a single dry van container would have on our financial results. As a new entrant into this segment we may not be able to lease the equipment we have purchased, or lease the units at rates that are profitable. We may also have difficulty remarketing refrigerated containers at a profit, or at all, after they are returned at the expiration of their initial lease terms. Refrigerated containers are also subject to greater risk of obsolescence. There have been significant changes in the regulations surrounding permitted refrigerants and their disposal and subsequent change in regulations affecting equipment could subject us to significantly higher than expected costs. Refrigerated containers also require significant on-going maintenance and repair, and the cargo transported in refrigerated containers is perishable. A malfunction of the container or the refrigeration machinery could subject us to liability. Any of these factors could have a material adverse effect on our financial position and results of operations.

We may face litigation involving our management of containers for container investors.

We manage containers for container investors under management agreements that are negotiated with each container investor. We make no assurances to container investors that they will make any amount of profit on their investment or that our management activities will result in any particular level of income or return of their initial capital. We believe that as the number of containers that we manage for container investors increases, there is a possibility that we may be drawn into litigation relating to the investments. Although our management agreements contain contractual protections and indemnities that are designed to limit our exposure to such litigation, such provisions may not be effective and we may be subject to a significant loss in a successful litigation by a container investor.

The container investors that purchase containers from us are located in five countries and a change in the conditions and laws in any of these countries could significantly reduce demand by container investors to purchase containers.

The container investors that have historically purchased containers from us are located in Germany, Switzerland, Singapore, Austria and Japan. The willingness of these investors to continue to purchase containers from us will depend upon a number of factors outside of our control, including the laws in the countries in which they are domiciled, the tax treatment of an investment and restrictions on foreign investments. If a change in tax laws or other conditions makes investments in containers less attractive, we will need to identify new container investors. The process of identifying new container investors and selling containers to them could be lengthy and we may not be able to find new container investors in these circumstances, which would result in a substantial reduction in the amount of gain on sale of container portfolios and cash flow we recognize.

Our 80 percent ownership in CAIJ Ltd, a container investment arranger and advisor focused on arranging container investments with Japanese investors, may subject us to material litigation risks and damage to our professional reputation as a result of litigation allegations and negative publicity.

CAIJ Ltd (CAIJ) was formed and began operation in 2007 for the purpose of arranging investments in our containers with Japanese investors. CAIJ has arranged \$10.2 million of investments through the first quarter of 2008, and we expect that CAIJ will arrange more container investments in the future. Because we are the seller and manager of the containers that will be sold to investors on whose behalf CAIJ acts as an arranger and advisor, there is an inherent conflict of interest between us and CAIJ. We disclose this inherent conflict of interest to container investors prior to any sale to them, but we do not provide them with any assurances that they will realize a specific or any investment return on the containers purchased from, and managed by, us. In the event that these container investors realize losses on their investments or believe that the returns on their investments are lower than expected, they may make claims, including bringing lawsuits, against CAIJ or us for our alleged failure to act in their best interests. Any such claims could result in the payment of legal expenses and damages and also damage our reputation with container investors and potential container investors and materially and adversely affect our business, financial condition or results of operations.

Table of Contents

Certain liens may arise on our containers.

Depot operators, repairmen and transporters may come into possession of our containers from time to time and have sums due to them from the lessees or sublessees of the containers. In the event of nonpayment of those charges by the lessees or sublessees, we may be delayed in, or entirely barred from, repossessing the containers, or be required to make payments or incur expenses to discharge liens on our containers.

Our recent acquisition of Consent Equipment AB (CEAB) could present unforeseen integration obstacles, risks or costs.

Our acquisition of CEAB involves a number of risks and presents financial, managerial and operational challenges, including the potential disruption of our ongoing business, distraction of management and the difficulty of integrating personnel, financial and other systems. CEAB increases the scope, geographic diversity and complexity of our operations. We may encounter unforeseen obstacles or costs in the integration of CEAB. We may not be able to retain existing management or hire additional management and other critical personnel. As a result of our acquisition of CEAB, we could lose significant current customers of CEAB. In addition, the equipment owned and subsequently purchased by CEAB is more specialized, more expensive, and subject to a greater risk of obsolescence than our existing dry van containers. The presence of one or more material liabilities that were unknown to us at the time of acquisition may have a material adverse effect on our business. If our estimates of CEAB's contribution to our future revenues and earnings are not accurate, our results of operations could fall below our expectations or those of analysts or investors, which would adversely affect our stock price. As a result of these and other risks, we may not realize any anticipated benefits from the acquisition of CEAB.

We are pursuing acquisitions or joint ventures that could present unforeseen integration obstacles or costs.

We are pursuing acquisitions and joint ventures. Acquisitions involve a number of risks and present financial, managerial and operational challenges, including:

potential disruption of our ongoing business and distraction of management;

difficulty integrating personnel and financial and other systems;

hiring additional management and other critical personnel; and

increasing the scope, geographic diversity and complexity of our operations.

In addition, we may encounter unforeseen obstacles or costs in the integration of acquired businesses. Also, the presence of one or more material liabilities of an acquired company that are unknown to us at the time of acquisition may have a material adverse effect on our business. Acquisitions or joint ventures may not be successful, and we may not realize any anticipated benefits from acquisitions or joint ventures. Acquisitions could in the future result in various changes to earnings that could adversely affect our results of operations. These charges could include impairment of goodwill or other assets or restructuring charges.

In the future, we may be required to pay personal holding company taxes, which would have an adverse effect on our cash flows, results of operations and financial condition.

The Internal Revenue Code requires any company that qualifies as a personal holding company to pay personal holding company taxes in addition to regular income taxes. A company qualifies as a personal holding company if (1) more than 50.0% of the value of the company's stock is held by five or fewer individuals and (2) at least 60.0% of the company's adjusted ordinary gross income constitutes personal holding company income, which, in our case, includes adjusted income from the lease of our containers. If we or any of our subsidiaries are a personal holding company, our undistributed personal holding company income, which is generally taxable income with certain adjustments, including a deduction for federal income taxes and dividends paid, will be taxed at a rate of 15.0%. Based upon our operating results, we were not classified as a personal holding company for the year ended December 31, 2007. Whether or not we or any of our subsidiaries are classified as personal holding companies for the year ending December 31, 2008 or in future years will depend upon the amount of our personal holding company income and the percentage of our outstanding common stock that will be beneficially owned by Hiromitsu Ogawa, who beneficially owned approximately 51.9% of our common stock as of June 30, 2008. At some point in the future we could become liable for personal holding

Edgar Filing: CAI International, Inc. - Form 10-Q

company taxes. The payment of personal holding company taxes in the future would have an adverse effect on our cash flows, results of operations and financial condition.

Implementation of required public-company corporate governance and financial reporting practices and policies will increase our costs, and we may be unable to provide the required financial information in a timely and reliable manner.

The Securities and Exchange Commission, as directed by Section 404 of the Sarbanes-Oxley Act of 2002 (the Sarbanes-Oxley Act), requires annual management assessments of the effectiveness of internal control over financial reporting and a report by our independent auditors rendering an opinion on the effectiveness of our internal control over financial reporting. If we fail to maintain the adequacy and effectiveness of internal control over financial reporting, we may not be able to conclude on an ongoing

Table of Contents

basis that we have effective internal control over financial reporting in accordance with Section 404 of the Sarbanes-Oxley Act and related regulations. Although our management has concluded that adequate internal control procedures are currently in place, no system of internal control can provide absolute assurance that our financial statements are accurate and free of errors. As a result, the risk exists that our internal control may not detect all errors or omissions in our financial statements.

As of December 31, 2008, our independent auditors must report on the effectiveness of such internal controls over financial reporting. Our management may not be able to effectively and timely implement controls and procedures that adequately respond to the increased regulatory compliance and reporting requirements that are applicable to us as a public company. If we are not able to implement the requirements of the Sarbanes-Oxley Act in a timely manner or with adequate compliance, our independent auditors may not be able to certify as to the effectiveness of our internal controls over financial reporting. This result may subject us to adverse regulatory consequences, and could lead to a negative reaction in the financial markets due to a loss of confidence in the reliability of our financial statements. We could also suffer a loss of confidence in the reliability of our financial statements if we disclose material weaknesses in our internal controls. In addition, if we fail to develop and maintain effective controls and procedures, we may be unable to provide the required financial information in a timely and reliable manner or otherwise comply with the standards applicable to us as a public company. Any failure by us to timely provide the required financial information could materially and adversely impact our financial condition and the market value of our stock.

We may incur future asset impairment charges.

An asset impairment charge may result from the occurrence of unexpected adverse events or management decisions that impact our estimates of expected cash flows generated from our long-lived assets. We regularly review our long-lived assets for impairment, including when events or changes in circumstances indicate the carrying value of an asset may not be recoverable. We may be required to recognize asset impairment charges in the future as a result of reductions in demand for specific container and chassis types, a weak economic environment, challenging market conditions, events related to particular customers or asset type, or as a result of asset or portfolio sale decisions by management.

The requirements of Financial Accounting Standards Board Statement No. 142, Goodwill and Other Intangible Assets (FAS 142) may result in a write-off of all or a portion of our goodwill which would negatively affect our operating results and financial condition.

As of June 30, 2008, we had goodwill of \$50.2 million in our consolidated balance sheet. Under FAS 142, goodwill is not amortized. In lieu of amortization, we are required to perform an annual impairment test of goodwill. We perform our annual impairment test for indications of goodwill impairment in the fourth quarter of our fiscal year or sooner if indicators of impairment exist. As of December 31, 2007, the time of our latest annual review, we concluded that no impairment of goodwill existed. If we were required to take an impairment charge to our goodwill in connection with the requirements of FAS 142, our operating results may decrease and our financial condition may be harmed.

Our stock price has been volatile and may remain volatile.

The trading price of our common stock may be subject to wide fluctuations in response to quarter-to-quarter variations in operating results, new services by us or our competitors, general conditions in the shipping industry and the intermodal container sales and leasing markets, changes in earnings estimates by analysts, or other events or factors. In addition, the public stock markets have experienced extreme price and trading volume volatility in recent months. The broad market fluctuations may adversely affect the market price of our common stock. Factors affecting the trading price of our common stock may include:

variations in our financial results;

changes in financial estimates or investment recommendations by any securities analysts following our business;

the public's response to our press releases, our other public announcements and our filings with the Securities and Exchange Commission;

changes in accounting standards, policies, guidance, interpretations or principles;

Edgar Filing: CAI International, Inc. - Form 10-Q

future sales of common stock by us or our directors, officers or significant stockholders or the perception such sales may occur;

our ability to achieve operating results consistent with securities analysts' projections or our own forecasts;

the operating and stock price performance of other companies that investors may deem comparable to us;

recruitment or departure of key personnel;

our ability to timely address changing container lessee preferences;

container market and industry factors;

general stock market conditions; and

other events or factors, including those resulting from war, incidents of terrorism or responses to such events.

Table of Contents

In addition, if the market for companies deemed similar to us or the stock market in general experiences loss of investor confidence, the trading price of our common stock could decline for reasons unrelated to our business or financial results. The trading price of our common stock might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us.

Future sales of our common stock, or the perception that such future sales may occur, may cause our stock price to decline and impair our ability to obtain capital through future stock offerings.

A substantial number of shares of our common stock held by our current stockholders could be sold into the public market at anytime. The occurrence of such sales, or the perception that such sales could occur, could materially and adversely affect our stock price and could impair our ability to obtain capital through an offering of equity securities.

We do not expect to pay any dividends in the foreseeable future.

We do not anticipate paying any cash dividends to holders of our common stock in the foreseeable future. In addition, our senior secured credit facility includes restrictions on our ability to pay cash dividends. Agreements governing future indebtedness will likely contain similar restrictions on our ability to pay cash dividends. Consequently, investors must rely on sales of their common stock as the only way to realize any future gains on their investment. Investors seeking cash dividends should not purchase our common stock.

If securities analysts do not publish research or reports about our business or if they change their financial estimates or investment recommendation, the price of our stock could decline.

The trading market for our common shares will rely in part on the research and reports that industry or financial analysts publish about us or our business. We do not control or influence the decisions or opinions of these analysts and analysts may not cover us. To the extent we do not achieve operating results consistent with analysts' projections, our stock price could decline.

If any analyst who covers us changes his or her financial estimates or investment recommendation, the price of our stock could decline. If any analyst ceases coverage of our company, we could lose visibility in the market, which in turn could cause our stock price to decline.

Our founder, Hiromitsu Ogawa, has substantial control over us and could act in a manner with which other stockholders may disagree or that is not necessarily in the interests of other stockholders.

Based upon beneficial ownership as of June 30, 2008, Mr. Ogawa beneficially owns approximately 51.9% of our outstanding common stock. Mr. Ogawa has significant influence over all matters submitted to our stockholders for approval, including the election of directors and any merger, consolidation or sale of all or substantially all of our assets. In addition, he may have the ability to control the management and affairs of our company. Mr. Ogawa may have interests that are different from yours. For example, he may support proposals and actions with which you may disagree or which are not in your interests. The concentration of ownership could delay or prevent a change in control of us or otherwise discourage a potential acquirer from attempting to obtain control of us, which in turn could reduce the price of our common stock. In addition, as our Executive Chairman, Mr. Ogawa will influence decisions to maintain our existing management and directors in office, delay or prevent changes of control of our company, or support or reject other management and board proposals that are subject to stockholder approval, such as amendments to our employee stock plans and approvals of significant financing transactions.

Our certificate of incorporation and bylaws and Delaware law contain provisions that could discourage a third party from acquiring us and consequently decrease the market value of an investment in our common stock.

Our certificate of incorporation and bylaws and Delaware corporate law each contain provisions that could delay, defer or prevent a change in control of our company or changes in our management. Among other things, these provisions:

authorize us to issue preferred stock that can be created and issued by the board of directors without prior stockholder approval, with rights senior to those of our common stock;

permit removal of directors only for cause by the holders of a majority of the shares entitled to vote at the election of directors and allow only the directors to fill a vacancy on the board of directors;

Edgar Filing: CAI International, Inc. - Form 10-Q

prohibit stockholders from calling special meetings of stockholders;
prohibit stockholder action by written consent, thereby requiring all stockholder actions to be taken at a meeting of our stockholders;

allow the authorized number of directors to be changed only by resolution of the board of directors;

Table of Contents

establish advance notice requirements for submitting nominations for election to the board of directors and for proposing matters that can be acted upon by stockholders at a meeting;

classify our board of directors into three classes so that only a portion of our directors are elected each year; and

allow our directors to amend our bylaws.

These provisions could discourage proxy contests and make it more difficult for our stockholders to elect directors and take other corporate actions, which may prevent a change of control or changes in our management that a stockholder might consider favorable. In addition, Section 203 of the Delaware General Corporation Law may discourage, delay or prevent a change in control of us. Any delay or prevention of a change in control or change in management that stockholders might otherwise consider to be favorable could cause the market price of our common stock to decline.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF STOCKHOLDERS

Our annual meeting of stockholders was held on June 19, 2008. The following nominee was elected as a Class I director, to hold office until his successor is elected and qualified, by the vote set forth below:

Nominee	For	Withheld
Marvin Dennis	16,972,632	18,490

ITEM 5. OTHER INFORMATION

None.

ITEM 6. EXHIBITS.

- 31.1 Certification of Chief Executive Officer pursuant to Exchange Act Rule 13a-14(a)/15d-14(a) as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 31.2 Certification of Chief Financial Officer pursuant to Exchange Act Rule 13a-14(a)/15d-14(a) as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 32.1 Certification of Chief Executive Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
- 32.2 Certification of Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
