CAUTIONARY  
NOTE

REGARDING  
FORWARD-LOOKING  
STATEMENTS

This document contains forward-looking statements concerning the proposed transactions, its financial and business impact, management's beliefs and objectives with respect thereto, and management's current expectations for future operating and financial performance, based on assumptions currently believed to be valid. Forward-looking statements are all statements other than statements

of  
historical  
facts.  
The  
words  
anticipates,  
may,  
can,  
plans,  
believes,  
estimates,  
expects,  
projects,  
intends,  
likely,  
will,  
should,  
to  
be,  
and  
any  
similar  
expressions  
or  
otherwords  
of  
similar  
meaning  
are  
intended  
to  
identify  
those  
assertions  
as  
forward-looking  
statements.  
It  
is  
uncertain  
whether  
the  
events  
anticipated  
will  
transpire,  
or  
if  
they  
do

occur  
what  
impact  
they  
will  
have  
on  
the  
results  
of  
operations  
and  
financial  
condition  
of  
Holdco,  
Forest  
Oil  
Corporation  
or  
Sabine  
Oil  
&  
Gas  
LLC.  
These  
forward-looking  
statements  
involve  
significant  
risks  
and  
uncertainties  
that  
could  
cause  
actual  
results  
to  
differ  
materially  
from  
those  
anticipated,  
including  
but  
not

Overview

Consideration

Board /

Management

Key

Conditions

/

Timing

- » Extensive overlap in top two asset areas: East Texas and Eagle Ford
- » Creates a leading East Texas position of ~207,000 net acres

Compelling  
inventory

of  
high  
return,  
liquids-rich  
Cotton  
Valley  
Sand  
opportunities

Significant  
inventory  
of  
Haynesville  
drilling  
opportunities  
with  
compelling  
current  
economics  
and  
significant  
upside  
value

»  
Complementary positions in the Eagle Ford, creating significant scale of ~65,000 net acres

Sabine s Eagle Ford results top 10% in the industry in 2013

»  
Combined  
12/31/13  
proved  
reserves  
of  
1.5  
Tcfe  
(71%  
gas)  
and  
2014E  
production  
of  
~345  
Mmcfed  
(65%  
gas)  
based  
on  
based  
on  
respective

company  
guidance

»  
Substantial production and cash flow growth

Over 20% pro forma 2014E production growth

»  
Cost savings from reduced overhead and streamlined operations

»  
Ability to optimize capital allocation on \$800 -  
\$825 million capital program

»  
Will apply top tier operational results across portfolio

»  
Liquidity to fund drilling program through 2015 without accessing capital markets

»  
Clear path to improving balance sheet through property divestments and optimized capital  
allocation -  
to be implemented as a top priority

»  
First Reserve, an energy-focused private equity firm, remains a controlling shareholder

David Sambrooks  
Chief Executive Officer

Former Vice President and General Manager of Devon Energy Corporation's Southern Division and prior to that,

their International Division

Over his thirty-four years of experience, held various executive, business development and engineering positions with Sun Oil Company / Oryx Energy and Santa Fe Energy Resources / Santa Fe Snyder Corporation

Bachelor of Science degree in Mechanical Engineering from the University of Texas at Austin and a Master of Business Administration from the Executive Program at the University of Houston

Shane Bayless

Executive Vice President and  
Chief Financial Officer

Former Executive Vice President -  
Chief Financial Officer and Treasurer with Petrohawk Energy

Over his twenty-four years of experience, held various executive and senior positions with 3TEC Energy, Encore Acquisition Company, Hugoton Energy and Ernst & Young

Bachelor of Science in Accounting from Wichita State University and a Certified Public Accountant

Todd Levesque

Executive Vice President and  
Chief Operating Officer

Previously served as Senior Vice President of Engineering and Development of Sabine

Over  
his  
twenty-two  
years  
of  
experience,  
held  
various  
engineering  
and  
management  
positions  
with  
Devon/Ocean  
Energy,  
Burlington  
Resources  
and  
Amerada  
Hess

Bachelor of Science degree in Petroleum Engineering from Texas A&M University

»

The combined company's management team has been together since Sabine's formation in 2007, delivering top-tier well results and production/cash flow/asset growth

2014 Plans

Currently running four rigs in liquids-rich Cotton Valley play

Test new Haynesville well design, \$700k potential capital savings

Evaluating drilling program for combined company, potential for increased activity

East Texas has been a core asset for Sabine and Forest. With current gas prices and increased activity, this area will provide significant production and reserve growth.

Industry Leading Performance

9

Cotton Valley

Incorporated Haynesville designs into CV  
completion

Higher perf cluster density

Tighter frac stage spacing

Higher fluid and proppant volumes  
Haynesville

More economical proppant, reduced  
chemical usage has offset cost impact of  
larger stimulations

Note: Industry results represent entire Cotton Valley and Haynesville plays, respectively.

»

Advanced completion design  
relative to most in industry,  
improving well performance

»

Plan to apply Sabine's completion  
design across combined company

»

Experience: With almost 70 CV  
completions combined, knowledge to  
high-grade acreage

»

Latest Sabine performance on-par with  
NLA Haynesville core

-

with lower cost  
structure

»

Tighter perf clusters, frac stages, utilizing  
zipper  
fracs

»

Higher stimulation volumes

»

Deeper landing point in reservoir, contacts  
more rock

Significant Eagle Ford Position

10

Acreage Overview

Asset Overview

»

Sabine's results have extended the best part of the Eagle Ford trend further northeast, with results comparable to core players

»

Sabine acreage is generally in the gas-condensate window

Higher pressures and gas reservoirs improve recoveries

Best wells are in this part of the hydrocarbon envelope

»

Forest acreage subject to Schlumberger agreement whereby Schlumberger receives a 50% working interest in Forest's Eagle Ford assets in exchange for a \$90 million drilling carry

\$29 million of carry remaining as of 12/31/13

»

Leveraging experience from Haynesville resource development and targeting of Upper Eagle Ford to generate superior results

»

2013 Sabine Shiner Area Eagle Ford Program

10 wells

»

2014 Plans

Currently operating four rigs in DeWitt/Lavaca and two rigs in Gonzales

Greater scale allows for combined company to evaluate opportunity to shift more capital to East Texas

Devon (former

GeoSouthern)

Penn Virginia

Sabine acreage borders Devon and Penn Virginia, with comparable results. Devon/GeoSouthern sale and recent PVA stock rally are additional positive indications of industry/market view of this part of Eagle Ford play.

Eagle Ford Performance

11

»

In northern DeWitt and Lavaca counties, Sabine has validated that the upper Eagle Ford has excellent productivity

»

Also unique to industry, Sabine brought its Haynesville completion experience to the Eagle Ford

Tighter perf cluster, frac stage spacing

Hybrid fluid design with emphasis on high volumes of slick water

Lower strength proppant to reduce cost

Less expensive proppant and reduced chemicals helps offset cost of additional stimulation volumes

»

Optimal landing point coupled with significant stimulated rock volume translates into shallower production declines

Operators in Lower Eagle Ford tout higher 24-hour IP's, but first year production for Sabine wells is comparable

Note: Industry results represent entire Eagle Ford Play

Note: Industry results represent entire Eagle Ford Play

High Return Granite Wash Position

12

Acreage Overview

Asset Overview

Outstanding productivity, with 8 of 17 horizontals producing (or projected to produce) in excess of 200 Mboe in first year

Two recent wells projected at 300-350 Mboe in first year

(~

60%

oil)

Two years of identified drilling locations, with potential for up to 200 locations depending on western delineation results

Wells to date have exhibited extremely strong economics, often paying out in under a year

»

2014 Plans

2014 development plan: Running 2 rigs, balance of low-risk development locations with measured step-out tests to the west. Mesa Vista and Lard Ranch have been extensions on-trend with several large Granite Wash developments. With the shallower depth, Mesa Vista also has a higher oil content.

»

Sabine operates ~ 33,500 net acres in oil window of play, shallowest part of Granite Wash trend

»

Sabine is currently testing the western extent of the Granite Wash, which could represent material upside to the inventory count on this position
