BMO Capital Markets Structured Products Overview August 2015 Registration Statement No. 333-196387 Filed Pursuant to Rule 433

Disclaimer These materials are proprietary to, and may not be reproduced, disseminated or referred to, in whole or in part without the prior consent of BMO Capital Markets (“BMO”). These materials have been prepared exclusively for the BMO client or potential client to which such materials are delivered and may not be used for any purpose other than as authorized in writing by BMO. BMO assumes no obligation to correct or update these materials, except as required by applicable law. These materials do not contain all information that may be required to evaluate, and do not constitute a recommendation with respect to, any transaction or matter. Any recipient of these materials should conduct its own independent analysis of the matters referred to herein. These materials are intended solely for the use of registered investment advisors and other investment professionals. Please note that the information set forth herein is only a summary of certain matters. You must carefully review the pricing supplement and any additional offering documents for any specific offering in order to fully understand the terms of the instrument and the related risk factors. BMO Capital Markets is a trade name used by BMO Financial Group for the wholesale banking businesses of Bank of Montreal, BMO Harris Bank N.A. (member FDIC), Bank of Montreal Ireland p.l.c., and Bank of Montreal (China) Co. Ltd and the institutional broker dealer businesses of BMO Capital Markets Corp. (Member SIPC) and BMO Capital Markets GKST Inc. (Member SIPC) in the U.S., BMO Nesbitt Burns Inc. (Member Canadian Investor Protection Fund) in Canada and Asia, BMO Capital Markets Limited (authorized and regulated by the Financial Conduct Authority) in Europe and Australia and BMO Advisors Private Limited in India. “BMO Capital Markets” is a trademark of Bank of Montreal, used under license. “BMO (M-Bar roundel symbol)” is a registered trademark of Bank of Montreal, used under license. Bank of Montreal has filed a registration statement (including a prospectus) with the SEC for the offerings to which this communication relates. Before you invest, you should read the prospectus in that registration statement and the other documents that the Bank of Montreal has filed with the SEC for more complete information about the Bank of Montreal and the types of offerings described herein. You may obtain these documents free of charge by visiting the SEC’s web site at <http://www.sec.gov>. Alternatively, the Bank of Montreal will arrange to send to you the prospectus (as supplemented by the prospectus supplement and any relevant preliminary pricing supplement) if you request it by calling its agent toll free on 1-877-369-5412 or emailing investor.solutions@bmo.com. * All values in this document are in US\$ unless otherwise specified.

BMO Capital Markets Global Structured Products Flexible and innovative investment solutions geared towards retail, high-net-worth, and institutional investors Clients include: Broker-dealers Registered investment advisors Trust companies Family offices Clearing platforms Financial intermediaries Product focus: Market-linked certificates of deposits Structured notes Basket tracking notes Gold Deposit Receipts (GOLDRsSM) *

Structured Notes Note: See the Appendix page at the end of this presentation for a summary of some of the risk considerations for investing in structured products. * Underlying asset(s) can be a wide variety of publicly traded financial assets. The level of exposure to the underlying asset varies based upon the structure's upside and downside features Overview A typical senior unsecured debt security issued by a bank: Has a fixed term Pays periodic interest at stated interest rates and principal at maturity Has credit risk to the bank However, while still carrying credit risk to an issuer, structured notes are designed to potentially provide a higher investment return by linking interest and/or maturity payments to the price performance of an underlying asset

A Convenient Way to Gain Exposure to an Investment Thesis Basket Tracking Notes (BTNs) are investment securities that offer direct exposure to an asset basket. Investors are exposed to full upside and downside asset basket price movements. No capital preservation, no upside caps, and no leverage. The asset basket is customizable, and may include a combination of stocks and/or equity indices (either long or short exposure). Typically, BTNs are tailored to have a maturity of just over 1 year. At maturity, the redemption value of the BTN will equal face value plus or minus the performance of the asset basket, plus any distributions on the underlying assets, and minus any fees incorporated into the BTN. Every BTN has a CUSIP and settles DTC. * Note: See the Appendix page at the end of this presentation for a summary of some of the risk considerations for investing in structured products. Basket Tracking Notes

Our Commitment to Client Service Customization Structured notes and basket tracking notes can be tailored to meet client specific market views Lead order requirements For structured notes – \$250,000 For basket tracking notes – \$1 million Specific pricing available for immediate execution trades (vs. price range) Secondary market While not obligated to do so, BMO has provided a liquid secondary market for each structured product that we have sold, and currently plans to continue to do so. Upon request, BMO can produce certain customized reports and analyses showing performance metrics for structured notes your clients have previously purchased * Note: See the Appendix page at the end of this presentation for a summary of some of the risk considerations for investing in structured products. Structured Notes

Some Risk Considerations Investors should carefully review the risk factors set forth in the related pricing supplement and product supplement before making an investment in structured notes (“Notes”). Some of the risks include, but are not limited to the following: Depending upon the terms of the Notes and the performance of the underlying asset, an investor may lose some or all of their investment in Notes. The Notes described herein are unsecured debt obligations of Bank of Montreal (“BMO”) and therefore an investment in such Notes is subject to the credit risk of BMO. The activities of BMO and its affiliates may conflict with an investor’s interests and may adversely affect the value of the Notes. The inclusion of agent’s commissions and hedging profits, if any, in the initial price to public of Notes, as well as hedging costs, is likely to adversely affect the price at which an investor can sell their Notes. The cover page of the pricing supplement of each Note will set forth an estimate of the initial value of the Note, which reflects these amounts. The estimated initial value of the Notes will be less than the purchase price of the Notes. The initial estimated value will not represent any future value of the Notes, and may also differ from the estimated value determined by any other party. An investor in the Notes will not have any shareholder rights and will have no right to receive any shares of any underlying asset. Notes will not be listed on any securities exchange. There may not be sufficient liquidity in any potential secondary market to allow an investor to trade or sell the Notes easily. If an investor is able to sell a particular Note prior to maturity, they may receive a price that is significantly less than their original investment. BMO and its affiliates may engage in hedging and trading activities related to the Notes that could adversely affect the payment at maturity of the Notes. Many economic and market factors will influence the value of the Notes. An investor must rely on their own evaluation of the merits of an investment in the Notes and any underlying asset referenced in a Note. Significant aspects of the tax treatment of Notes may be uncertain. Each investor must consult their own tax advisors in relation to how to treat Notes for tax purposes. Returns generated by Notes may be less than the returns of the underlying asset under certain market scenarios. For example, Notes may be issued with a maximum return, in which case an investment in the underlying asset could outperform an investment in the Notes. In addition, for most Notes other than BTNs, the investors will not receive the benefit of any dividends paid on the applicable underlying securities. * Appendix
