Item 2.06 Material Impairments.

On January 14, 2009, Kaiser Aluminum Corporation (the "Company") announced that it expects to be required under generally accepted accounting principals to fully impair its equity investment in Anglesey Aluminium Metal Ltd. ("Anglesey") in its fourth quarter 2008 results. As set forth in the press release attached hereto as Exhibit 99.1 and incorporated herein by reference, the Company expects Anglesey, jointly owned by the Company and Rio Tinto Alcan ("Rio Tinto"), to fully curtail its smelting operations at the end of September 2009 when its current power contract expires. Anglesey has worked intensively with United Kingdom government authorities and agencies to find a sustainable alternative to the power supply needs of the smelter but has been unable to reach a feasible solution. In addition, Anglesey is obligated to contribute to the Rio Tinto pension plan in which Anglesey participates, make certain redundancy payments and is potentially exposed to higher pension contributions following recent declines in the value of the assets held by the Rio Tinto pension plan. As a result of Anglesey's inability to obtain affordable power for its smelting operations after September 2009, the resulting expected curtailment of smelting operations, the growing uncertainty with respect to the future of Anglesey's operations, and Anglesey's cash requirements, the Company expects to fully impair its 49% equity investment in Anglesey in its fourth quarter 2008 results. The Company's investment in Anglesey was \$37.6 million as of September 30, 2008, and, after recognition of Anglesey's fourth quarter results, the full impairment charge is expected to be \$37.8 million, subject to the final review by the Company's independent registered public accountants. Neither the curtailment of the smelting operations nor the related impairment is expected to require the Company to make future cash investments in Anglesey.

Item 9.01 Financial Statements and Exhibits.

99.1 - Press Release dated January 14, 2009.
