3. MANAGEMENT'S DISCUSSION AND ANALYSIS

3.1 Brief analysis on the overall situation of the operating activities of the Company during the reporting period

In the first three quarters of 2005, the Company's management and all the staff worked hard together in seizing the opportunities of rapid growth in power consumption brought about by the rapid and steady growth of the national economy. The challenges from the rise of coal prices and the decline of coal quality were dealt with in a conscientious manner. Facing increasing competition in the power market, the management and all staff

Edgar Filing: HUANENG POWER INTERNATIONAL INC - Form 6-K

of the Company strived to do their utmost, thereby having overcome the difficulties and completed the tasks. The Company achieved good progress in terms of safe generation, project construction, operation management and preparation work of projects.

Compared to the same period last year, newly acquired power plants and newly operated generating units brought an expansion of the overall operating scale of the Company as well as a significant increase in the Company's power generation during the first three quarters of 2005. The tariff hike under the coal-electricity price linkage mechanism during the year coupled with lower tariff rates for newly added generating units has resulted in commensurate growth of the Company's revenues and power generation. As the price of coal remained at a high level, the unit fuel cost amounted to RMB158.63/MWh, representing an increase of 15.61% over the same period last year. The increase in revenues could not fully offset the impact of fuel costs upon profits, and as a result, the Company's net profit decreased compared to the same period last year. Compared to the second quarter, the coal price was relatively lower in the third quarter, thus resulting in an increase of the Company's gross profit.

The Company's total power generation on a consolidated basis in the first three quarters of 2005 amounted to 110.956 billion kWh, an increase of 37.3% over the same period last year.

The power generation of each of the Company's power plants in the first three quarters of 2005 was listed below (in billion kWh):

Dalian	6.700	Changxing	1.443
