This Form 6-K consists of:

A press release regarding the signing of a strategic investment agreement between JA Solar Holding Co., Ltd. (the “Registrant”) and the city of Hefei, Anhui province, China in order to set up a new state-of-the-art photovoltaic production facility for solar cells and photovoltaic products, made by the Registrant in English on March 10, 2011.

JA Solar Announces Investment Agreement with City of Hefei to Establish 3GW
Advanced Photovoltaic Production Facility

SHANGHAI, March 10, 2011--- JA Solar Holdings Co., Ltd. (NASDAQ: JASO) (“JA Solar” or “the Company”), one of the world’s largest manufacturers of high-performance solar cells and solar power products, today announced that it has signed a strategic investment agreement with the city of Hefei, in China’s Anhui province, to set up a new state-of-the-art photovoltaic (“PV”) production facility for solar cells and PV products. The facility is expected to be located in the Hefei High-Tech Industrial Development Zone in the City of Hefei. Construction will take place over a multi-year period and, when fully completed, the facility is expected to have a manufacturing capacity of 3GW of solar cells and PV products. The first phase of construction is expected to begin in 2011, with production expected to commence in 2012.

Under the terms of the agreement, the Hefei High-Tech Construction and Investment Group, a government-affiliated investment company, and a number of domestic Chinese banks, are expected to provide financing of up to RMB 13.5 billion over a four-year period at competitive commercial loan rates for the construction of the new solar cell and PV product manufacturing facility.

By establishing this new facility in the city of Hefei, JA Solar expects to benefit from the city’s progressive policy environment for clean energy companies, access to the region’s well-trained low-cost labor market, and Hefei’s central location as a regional hub for logistics and transportation.

“As the world’s leading supplier of high-efficiency, low-cost solar cells, we are delighted to work with the City of Hefei to establish this new state-of-the-art PV manufacturing site, in which we will employ the world’s most advanced solar technology for the manufacturing and development of high-efficiency, low-cost solar cells and PV products. With lower labor costs and a favorable investment climate in Hefei translating into lower operational costs, we anticipate this new facility will serve to enhance JA Solar’s future profitability and market share,” said Dr. Peng Fang, CEO of JA Solar. “This new facility complements JA Solar’s long-term growth strategy as a world leader in solar cell technology and manufacturing. With this new capacity we will also be well-placed to meet the strong demand from our strategic partners globally for JA Solar’s products.”

Forward-looking Statements

This press release contains forward-looking statements within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements can be identified by words such as "may," "expect," "anticipate," "aim," "intend," "plan," "believe," "estimate," "potential," "continue," and

other similar statements. Statements other than statements of historical facts in this announcement are forward-looking statements, including but not limited to, our expectations regarding the expansion of our manufacturing capacities, our future business development, and our beliefs regarding our production output and production outlook. These forward-looking statements involve known and unknown risks and uncertainties and are based on current expectations, assumptions, estimates and projections about the company and the industry. Further information regarding these and other risks is included in Form 20-F and other documents filed with the Securities and Exchange Commission. The company undertakes no obligation to update forward-looking statements, except as may be required by law. Although the company believes that the expectations expressed in these forward-looking statements are reasonable, it cannot assure you that its expectations will turn out to be correct, and investors are cautioned that actual results may differ materially from the anticipated results.

About JA Solar Holdings Co., Ltd.

JA Solar Holdings Co., Ltd. is a leading manufacturer of high-performance solar power products. The company sells its products to solar manufacturers worldwide, who assemble and integrate solar cells into modules and systems that convert sunlight into electricity for residential, commercial, and utility-scale power generation.
