NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note 1: Basis of Presentation

The accompanying unaudited interim condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting only of normal recurring accruals) considered necessary for a fair presentation have been included.

These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in Guaranty Federal Bancshares, Inc.'s (the "Company") Annual Report on Form 10-K for the year ended December 31, 2013 filed with the Securities and Exchange Commission (the "SEC"). The results of operations for the periods are not necessarily indicative of the results to be expected for the full year. The condensed consolidated balance sheet of the Company as of December 31, 2013, has been derived from the audited consolidated balance sheet of the Company as of that date. Certain information and note disclosures normally included in the Company's annual financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted.

Note 2: Principles of Consolidation

The accompanying condensed consolidated financial statements include the accounts of the Company and its wholly owned subsidiary, Guaranty Bank (the "Bank"). All significant intercompany transactions and balances have been eliminated in consolidation.

Note 3: Securities

The amortized cost and approximate fair values of securities classified as available-for-sale were as follows:

Edgar Filing: GUARANTY FEDERAL BANCSHARES INC - Form 10-Q

	\$ 101,825,759	\$ 99,126,419

The amortized cost and approximate fair values of securities classified as held to maturity are as follows:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized (Losses)	Approximate Fair Value
As of March 31, 2014				
Debt Securities:				

Edgar Filing: GUARANTY FEDERAL BANCSHARES INC - Form 10-Q

Government sponsored mortgage-backed securities	\$ 74,483	\$ 1,783	\$ -	\$ 76,266
---	-----------	----------	------	-----------

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized (Losses)	Approximate Fair Value
As of December 31, 2013				
Debt Securities:				
Government sponsored mortgage-backed securities	\$ 79,162	\$ 1,927	\$ -	\$ 81,089

Maturities of held-to-maturity securities as of March 31, 2014:

	Amortized	Approximate
	Cost	Fair Value
Government sponsored mortgage-backed securities not due on a single maturity date	\$ 74,483	\$ 76,266

The book value of securities pledged as collateral, to secure public deposits and for other purposes, amounted to \$47,925,251 and \$44,717,470 as of March 31, 2014 and December 31, 2013, respectively. The approximate fair value of pledged securities amounted to \$46,456,478 and \$42,807,840 as of March 31, 2014 and December 31, 2013, respectively.

Realized gains and losses are recorded as net securities gains. Gains on sales of securities are determined on the specific identification method. Gross gains of \$3,088 and \$88,801 as of March 31, 2014 and March 31, 2013, respectively, were realized from the sale of available-for-sale securities. The tax effect of these net gains was \$1,142 and \$32,856 as of March 31, 2014 and March 31, 2013, respectively.

The Company evaluates all securities quarterly to determine if any unrealized losses are deemed to be other than temporary. Certain investment securities are valued at less than their historical cost. These declines are primarily the result of the rate for these investments yielding less than current market rates, or declines in stock prices of equity securities. Based on evaluation of available evidence, management believes the declines in fair value for these securities are temporary. It is management's intent to hold the debt securities to maturity or until recovery of the unrealized loss. Should the impairment of any of these debt securities become other than temporary, the cost basis of the investment will be reduced and the resulting loss recognized in net income in the period the other-than-temporary impairment is identified, to the extent the loss is related to credit issues, and to other comprehensive income to the extent the decline on debt securities is related to other factors and the Company does not intend to sell the security prior to recovery of the unrealized loss.

Certain other investments in debt and equity securities are reported in the financial statements at an amount less than their historical cost. Total fair value of these investments at March 31, 2014 and December 31, 2013, was \$86,417,488 and \$85,712,067, respectively, which is approximately 87% and 88% of the Company's investment portfolio. These declines primarily resulted from changes in market interest rates and failure of certain investments to meet projected earnings targets.

The following table shows gross unrealized losses and fair value, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position at March 31, 2014 and December 31, 2013.

Description of Securities	March 31, 2014					
	Less than 12 Months		12 Months or More		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Equity Securities	\$-	\$-	\$32,128	\$(15,799)	\$32,128	\$(15,799)

Note 4: Loans and Allowance for Loan Losses

Categories of loans at March 31, 2014 and December 31, 2013 include:

	March 31, 2014	December 31, 2013
Real estate - residential mortgage:		
One to four family units	\$94,547,623	\$93,797,650
Multi-family	32,226,919	46,188,434
Real estate - construction	35,445,018	43,266,130
Real estate - commercial	188,399,937	179,079,433
Commercial loans	86,217,119	92,721,783
Consumer and other loans	17,301,258	17,303,392
Total loans	454,137,874	472,356,822
Less:		
Allowance for loan losses	(7,761,135)	(7,801,600)
Deferred loan fees/costs, net	(162,406)	(175,368)
Net loans	\$446,214,333	\$464,379,854

Classes of loans by aging at March 31, 2014 and December 31, 2013 were as follows:

As of March 31, 2014

	30-59 Days Past Due	60-89 Days Past Due	90 Days and more Past Due	Total Past Due	Current	Total Loans Receivable	Total Loans > 90 Days and Accruing

The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to income. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance.

The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectibility of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

The allowance consists of allocated and general components. The allocated component relates to loans that are classified as impaired. For those loans that are classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of that loan. The general component covers nonclassified loans and is based on historical charge-off experience and expected loss given default derived from the Bank's internal risk rating process. Other adjustments may be made to the allowance for pools of loans after an assessment of internal or external influences on credit quality that are not fully reflected in the historical loss or risk rating data.

A loan is considered impaired when, based on current information and events, it is probable that the Bank will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan-by-loan basis by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price or the fair value of the collateral if the loan is collateral dependent.

Groups of loans with similar risk characteristics are collectively evaluated for impairment based on the group's historical loss experience adjusted for changes in trends, conditions and other relevant factors that affect repayment of the loans.

The following table summarizes the recorded investment in impaired loans at March 31, 2014 and December 31, 2013:

	March 31, 2014			December 31, 2013

At March 31, 2014, the Bank's impaired loans shown in the table above included loans that were classified as troubled debt restructurings ("TDR"). The restructuring of a loan is considered a TDR if both (i) the borrower is experiencing financial difficulties and (ii) the creditor has granted a concession.

In assessing whether or not a borrower is experiencing financial difficulties, the Bank considers information currently available regarding the financial condition of the borrower. This information includes, but is not limited to, whether (i) the debtor is currently in payment default on any of its debt; (ii) a payment default is probable in the foreseeable future without the modification; (iii) the debtor has declared or is in the process of declaring bankruptcy and (iv) the debtor's projected cash flow is sufficient to satisfy the contractual payments due under the original terms of the loan without a modification.

The Bank considers all aspects of the modification to loan terms to determine whether or not a concession has been granted to the borrower. Key factors considered by the Bank include the debtor's ability to access funds at a market rate for debt with similar risk characteristics, the significance of the modification relative to unpaid principal balance or collateral value of the debt, and the significance of a delay in the timing of payments relative to the original contractual terms of the loan. The most common concessions granted by the Bank generally include one or more modifications to the terms of the debt, such as (i) a reduction in the interest rate for the remaining life of the debt, (ii) an extension of the maturity date at an interest rate lower than the current market rate for new debt with similar risk, (iii) a reduction on the face amount or maturity amount of the debt as stated in the original loan, (iv) a temporary period of interest-only payments, (v) a reduction in accrued interest, and (vi) an extension of amortization.

The following table summarizes, by class, loans that were newly classified as TDRs for the three months ended March 31, 2014:

	Number of Loans	Pre-Modification Outstanding Recorded Balance	Post-Modification Outstanding Recorded Balance
Real estate - residential mortgage:			
One to four family units	-	\$ -	\$ -
Multi-family	-	-	-
Real estate - construction	-	-	-
Real estate - commercial	-	-	-
Commercial loans	3	931,026	931,026
Consumer and other loans	-	-	-
Total	3	\$ 931,026	\$ 931,026

The following table summarizes, by type of concession, loans that were newly classified as TDRs for the three months ended March 31, 2014:

	Interest Rate	Term	Combination	Total Modification
Real estate - residential mortgage:				
One to four family units	\$ -	\$-	\$ -	\$ -
Multi-family	-	-	-	-
Real estate - construction	-	-	-	-
Real estate - commercial	-	-	-	-

Commercial loans	-	100,000	831,026	931,026
Consumer and other loans	-	-	-	-
Total	\$ -	\$ 100,000	\$ 831,026	\$ 931,026

The following table presents the carrying balance of TDRs as of March 31, 2014 and December 31, 2013:

	March 31, 2014	December 31, 2013
Real estate - residential mortgage:		
One to four family units	\$511,685	\$519,718
Multi-family	-	-
Real estate - construction	3,971,464	4,507,190
Real estate - commercial	500,007	3,026,931
Commercial loans	2,717,035	3,699,243
Consumer and other loans	-	-
Total	\$7,700,191	\$11,753,082

The Bank has allocated \$1,311,655 and \$1,146,359 of specific reserves to customers whose loan terms have been modified in TDR as of March 31, 2014 and December 31, 2013, respectively.

There were no TDRs for which there was a payment default within twelve months following the modification during the three months ending March 31, 2014 and 2013. A loan is considered to be in payment default once it is 90 days contractually past due under the modified terms.

As part of the on-going monitoring of the credit quality of the Bank's loan portfolio, management tracks loans by an internal rating system. All loans are assigned an internal credit quality rating based on an analysis of the borrower's financial condition. The criteria used to assign quality ratings to extensions of credit that exhibit potential problems or well-defined weaknesses are primarily based upon the degree of risk and the likelihood of orderly repayment, and their effect on the Bank's safety and soundness. The following are the internally assigned ratings:

Pass: This rating represents loans that have strong asset quality and liquidity along with a multi-year track record of profitability.

Special mention: This rating represents loans that are currently protected but are potentially weak. The credit risk may be relatively minor, yet constitute an increased risk in light of the circumstances surrounding a specific loan.

Substandard: This rating represents loans that show signs of continuing negative financial trends and unprofitability and therefore, is inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any.

Doubtful: This rating represents loans that have all the weaknesses of substandard classified loans with the additional characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable.

Risk characteristics applicable to each segment of the loan portfolio are described as follows.

Real estate-Residential 1-4 family: The residential 1-4 family real estate loans are generally secured by owner-occupied 1-4 family residences. Repayment of these loans is primarily dependent on the personal income and credit rating of the borrowers. Credit risk in these loans can be impacted by economic conditions within the Bank's market areas that might impact either property values or a borrower's personal income. Risk is mitigated by the fact that the loans are of smaller individual amounts and spread over a large number of borrowers.

Real estate-Construction: Construction and land development real estate loans are usually based upon estimates of costs and estimated value of the completed project and include independent appraisal reviews and a financial analysis of the developers and property owners. Sources of repayment of these loans may include permanent loans, sales of developed property or an interim loan commitment from the Bank until permanent financing is obtained. These loans are considered to be higher risk than other real estate loans due to their ultimate repayment being sensitive to interest rate changes, general economic conditions and the availability of long-term financing. Credit risk in these loans may be impacted by the creditworthiness of a borrower, property values and the local economies in the Bank's market areas.

Real estate-Commercial: Commercial real estate loans typically involve larger principal amounts, and repayment of these loans is generally dependent on the successful operations of the property securing the loan or the business conducted on the property securing the loan. These loans are viewed primarily as cash flow loans and secondarily as loans secured by real estate. Credit risk in these loans may be impacted by the creditworthiness of a borrower, property values and the local economies in the Bank's market areas.

Commercial: The commercial portfolio includes loans to commercial customers for use in financing working capital needs, equipment purchases and expansions. The loans in this category are repaid primarily from the cash flow of a borrower's principal business operation. Credit risk in these loans is driven by creditworthiness of a borrower and the economic conditions that impact the cash flow stability from business operations.

Consumer: The consumer loan portfolio consists of various term and line of credit loans such as automobile loans and loans for other personal purposes. Repayment for these types of loans will come from a borrower's income sources that are typically independent of the loan purpose. Credit risk is driven by consumer economic factors (such as unemployment and general economic conditions in the Bank's market area) and the creditworthiness of a borrower.

The following tables provide information about the credit quality of the loan portfolio using the Bank's internal rating system as of March 31, 2014 and December 31, 2013:

March 31, 2014	Commercial Construction	Commercial Real Estate	One to four family	Multi-family	Commercial	Consumer and Other	Total

For loans amortized at cost, interest income is accrued based on the unpaid principal balance. Loan origination fees net of certain direct origination costs, are deferred and amortized as a level yield adjustment over the respective term of the loan.

The accrual of interest on loans is discontinued at the time the loan is 90 days past due unless the loan is well-secured and in process of collection. Past due status is based on contractual terms of the loan. In all cases, loans are placed on nonaccrual or charged off at an earlier date if collection of principal or interest is considered doubtful.

All interest accrued but not collected for loans that are placed on nonaccrual or charged off is reversed against interest income. The interest on these loans is accounted for on the cash-basis or cost-recovery method, until qualifying for return to accrual. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

Note 5: Benefit Plans

The Company has stock-based employee compensation plans, which are described in the Company's December 31, 2013 Annual Report on Form 10-K.

The table below summarizes transactions under the Company's stock option plans for three months ended March 31, 2014:

	Number of shares		Weighted
	Non-	Incentive	Average
	Stock	Stock	Exercise
	Option	Option	Price
Balance outstanding as of January 1, 2014	168,100	121,000	\$ 16.54
Granted	-	-	\$ -
Exercised	(2,800)	-	\$ 5.21
Forfeited	-	(21,000)	\$ 18.31
Balance outstanding as of March 31, 2014	165,300	100,000	\$ 16.52
Options exercisable as of March 31, 2014	158,200	90,250	\$ 17.29

Stock-based compensation expense, consisting of stock options and restricted stock awards, recognized for the three months ended March 31, 2014 and 2013 was \$28,787 and \$35,782, respectively. As of March 31, 2014, there was \$22,406 of unrecognized compensation expense related to nonvested stock options and \$248,982 of unrecognized compensation expense related to nonvested restricted stock awards, which will be recognized over the remaining vesting period.

In February 2014, the Company granted restricted stock to directors pursuant to the 2010 Equity Plan that was fully vested and thus, expensed in full during the three months ended March 31, 2014. The amount expensed was \$122,538 for the quarter which represents 11,242 shares of common stock at a market price of \$10.90 at the date of grant.

In February 2014, the company granted 21,820 shares of restricted stock to officers that have a cliff vesting at the end of three years. The expense is being recognized over the applicable vesting period. The amount expensed during the first quarter of 2014 was \$13,213.

Note 6: Income Per Common Share

	For three months ended March 31, 2014		
	Income Available to Common Stockholders	Average Common Shares Outstanding	Per Common Share
Basic Income per Common Share	\$1,055,216	3,166,463	\$ 0.33
Effect of Dilutive Securities		61,416	
Diluted Income per Common Share	\$1,055,216	3,227,879	\$ 0.33

	For three months ended March 31, 2013		
	Income Available to Common Stockholders	Average Common Shares Outstanding	Per Common Share
Basic Income per Common Share	\$754,023	2,739,351	\$ 0.28
Effect of Dilutive Securities		227,977	
Diluted Income per Common Share	\$754,023	2,967,328	\$ 0.25

Stock options to purchase 136,500 and 200,500 shares of common stock were outstanding during the three months ended March 31, 2014 and 2013, respectively, but were not included in the computation of diluted income per common share because their exercise price was greater than the average market price of the common shares.

Note 7: New Accounting Pronouncements

In January 2014, the FASB issued ASU No. 2014-01 to amend FASB ASC Topic 323, *Investments – Equity Method and Joint Ventures*. The objective of this update is to provide guidance on accounting for investments by a reporting entity in flow-through limited liability entities that manage or invest in affordable housing projects that qualify for the low-income housing tax credit. The amendments in the update permit reporting entities to make an accounting policy election to account for their investments in qualified affordable housing projects using the proportional amortization

method if certain conditions are met. Under the proportional amortization method, an entity amortizes the initial cost of the investment in proportion to the tax credits and other tax benefits received and recognizes the net investment performance in the income statement as a component of income tax expense (benefit). The update will be effective for the Company beginning January 1, 2015; however, early adoption is permitted. The Company does have significant investments in such qualified affordable housing projects and is currently reviewing the provisions of this update to determine what, if any, impacts it may have on the Company's financial position or results of operations. The Company expects that there will be no material impact on the Company's financial position or results of operations, except that the investment amortization expense which is currently included in Other Non-interest Expense in the Consolidated Statements of Income would be removed from Other Non-interest Expense and included in Provision for Income Taxes in the Consolidated Statements of Income. This would have the effect of reducing Non-interest Expense and increasing Provision for Income Taxes, but is not expected to have any impact on Net Income.

In January 2014, the FASB issued ASU No. 2014-04 to amend FASB ASC Topic 310, *Receivables – Troubled Debt Restructurings by Creditors*. The objective of the amendments in this update is to reduce diversity by clarifying when an in substance repossession or foreclosure occurs, that is, when a creditor should be considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan such that the loan receivable should be derecognized and the real estate property recognized. The amendments in this update clarify that an in substance repossession or foreclosure occurs, and a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan, upon either (1) the creditor obtaining legal title to the residential real estate property upon completion of a foreclosure or (2) the borrower conveying all interest in the residential real estate property to the creditor to satisfy that loan through completion of a deed in lieu of foreclosure or through a similar legal agreement. Additionally, the amendments require interim and annual disclosure of both (1) the amount of foreclosed residential real estate property held by the creditor and (2) the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure according to local requirements of the applicable jurisdiction. The update will be effective for the Company beginning January 1, 2015, and is not expected to have a material impact on the Company's financial position or results of operations.

Note 8: Disclosures about Fair Value of Assets and Liabilities

ASC Topic 820, *Fair Value Measurements*, defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Topic 820 also specifies a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1: Quoted prices in active markets for identical assets or liabilities

Level 2: Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities

Level 3: Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities

The following is a description of the inputs and valuation methodologies used for assets measured at fair value on a recurring basis and recognized in the accompanying condensed consolidated balance sheets, as well as the general classification of such assets pursuant to the valuation hierarchy.

Available-for-sale securities: Where quoted market prices are available in an active market, securities are classified within Level 1 of the valuation hierarchy. Level 1 securities include equity securities. If quoted market prices are not available, then fair values are estimated by using pricing models, quoted prices of securities with similar characteristics or discounted cash flows. For these investments, the inputs used by the pricing service to determine fair value may include one or a combination of observable inputs such as benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bid offers and reference data market research publications and are classified within Level 2 of the valuation hierarchy. Level 2 securities include U.S. government agencies and government sponsored mortgage-backed securities. The Company has no Level 3 securities.

The following table presents the fair value measurements of assets recognized in the accompanying condensed consolidated balance sheets measured at fair value on a recurring basis and the level within the fair value hierarchy in which the fair value measurements fall at March 31, 2014 and December 31, 2013 (dollar amounts in thousands):

3/31/2014

Financial assets:

	Level 1 inputs	Level 2 inputs	Level 3 inputs	Total fair value
Equity securities	\$ 105	\$-	\$ -	\$ 105
Debt securities:				
U.S. government agencies	-	25,597	-	25,597
Municipals	-	14,608	-	14,608
Government sponsored mortgage-backed securities	-	58,922	-	58,922
Available-for-sale securities	\$ 105	\$99,127	\$ -	\$99,232

12/31/2013

Financial assets:

	Level 1 inputs	Level 2 inputs	Level 3 inputs	Total fair value
Equity securities	\$ 99	\$-	\$ -	\$99
Debt securities:				
U.S. government agencies	-	31,762	-	31,762
Municipals	-	13,493	-	13,493
Corporate Bonds	-	994	-	994
Government sponsored mortgage-backed securities	-	51,345	-	51,345
Available-for-sale securities	\$ 99	\$97,594	\$ -	\$97,693

The following is a description of the valuation methodologies used for assets measured at fair value on a nonrecurring basis and recognized in the accompanying statements of financial condition, as well as the general classification of such assets pursuant to the valuation hierarchy.

Foreclosed Assets Held for Sale: Fair value is estimated using recent appraisals, comparable sales and other estimates of value obtained principally from independent sources, adjusted for selling costs. Foreclosed assets held for sale are classified within Level 3 of the valuation hierarchy.

Impaired loans (Collateral Dependent): Loans for which it is probable that the Company will not collect all principal and interest due according to contractual terms are measured for impairment. Allowable methods for determining the

amount of impairment include estimating fair value using the fair value of the collateral for collateral dependent loans.

If the impaired loan is identified as collateral dependent, then the fair value method of measuring the amount of impairment is utilized. This method requires obtaining a current independent appraisal of the collateral and applying a discount factor to the value. Impaired loans that are collateral dependent are classified within Level 3 of the fair value hierarchy when impairment is determined using the fair value method.

The following table presents the fair value measurement of assets measured at fair value on a nonrecurring basis and the level within the fair value hierarchy in which the fair value measurements fall at March 31, 2014 and December 31, 2013 (dollar amounts in thousands):

Impaired loans:

	Level 1 inputs	Level 2 inputs	Level 3 inputs	Total fair value
March 31, 2014	\$ -	\$ -	\$4,257	\$4,257
December 31, 2013	\$ -	\$ -	\$10,305	\$10,305

Foreclosed assets held for sale:

	Level 1 inputs	Level 2 inputs	Level 3 inputs	Total fair value
March 31, 2014	\$ -	\$ -	\$-	\$-
December 31, 2013	\$ -	\$ -	\$2,340	\$2,340

There were no transfers between valuation levels for any asset during the three months ended March 31, 2014 or 2013. If valuation techniques are deemed necessary, the Company considers those transfers to occur at the end of the period when the assets are valued.

The following table presents quantitative information about unobservable inputs used in recurring and nonrecurring Level 3 fair value measurement (dollar amounts in thousands):

	Fair Value	Valuation Technique	Unobservable Input	Range (Weighted Average)
Impaired loans (collateral dependent)	\$4,257	Market Comparable	Discount to reflect realizable value	0%-100% (21%)
Impaired loans	\$-		Discount rate	0%

		Discounted cash	
		flow	
Foreclosed assets held for sale	\$-	Market Comparable	Discount to reflect realizable value 0%

The following methods were used to estimate the fair value of all other financial instruments recognized in the accompanying condensed consolidated balance sheets at amounts other than fair value.

Cash and cash equivalents, interest-bearing deposits and Federal Home Loan Bank stock

The carrying amounts reported in the condensed consolidated balance sheets approximate those assets' fair value.

Held-to-maturity securities

Fair value is based on quoted market prices, if available. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities.

Loans

The fair value of loans is estimated by discounting the future cash flows using the market rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. Loans with similar characteristics were aggregated for purposes of the calculations. The carrying amount of accrued interest approximates its fair value.

Deposits

Deposits include demand deposits, savings accounts, NOW accounts and certain money market deposits. The carrying amount approximates fair value. The fair value of fixed-maturity certificates of deposit is estimated by discounting the future cash flows using rates currently offered for deposits of similar remaining maturities.

Federal Home Loan Bank advances and securities sold under agreements to repurchase

The fair value of advances and securities sold under agreements to repurchase is estimated by using rates on debt with similar terms and remaining maturities.

Subordinated debentures

For these variable rate instruments, the carrying amount is a reasonable estimate of fair value. There is currently a limited market for similar debt instruments and the Company has the option to call the subordinated debentures at an amount close to its par value.

Interest payable

The carrying amount approximates fair value.

Commitments to originate loans, letters of credit and lines of credit

The fair value of commitments to originate loans is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present credit worthiness of the counterparties. For fixed-rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The fair value of letters of credit and lines of credit are based on fees currently charged for similar agreements or on the estimated cost to terminate them or otherwise settle the obligations with the counterparties at the reporting date.

The following tables present estimated fair values of the Company's financial instruments at March 31, 2014 and December 31, 2013.

March 31, 2014		
Carrying	Fair Value	Hierarchy

Note 9: Preferred Stock and Common Stock Warrants

On January 30, 2009, as part of the U.S. Department of the Treasury's Troubled Asset Relief Program's Capital Purchase Program ("CPP"), the Company entered into a Securities Purchase Agreement - Standard Terms with the United States Department of the Treasury (the "Treasury") pursuant to which the Company sold to the Treasury 17,000 shares of Fixed Rate Cumulative Perpetual Preferred Stock, Series A (the "Series A Preferred Stock") and issued a ten year warrant (the "Warrant") to purchase 459,459 shares of the Company's common stock (the "Common Stock") for \$5.55 per share for a total purchase price of \$17.0 million.

The Series A Preferred Stock qualifies as Tier 1 capital and is entitled to cumulative preferred dividends at a rate of 5% per year for the first five years, payable quarterly, and 9% thereafter. On February 1, 2014, the cumulative preferred dividend rate on the Series A Preferred Stock increased to 9%. The Series A Preferred Stock has a liquidation preference of \$1,000 per share, plus accrued and unpaid dividends. The failure by the Company to pay a total of six quarterly dividends, whether or not consecutive, would have given the holders of the Series A Preferred Stock the right to elect two directors to the Company's board of directors.

On June 13, 2012, with regulatory approval, the Company redeemed \$5 million of the Series A Preferred Stock, including accrued and unpaid dividends of \$19,444. The Company may redeem additional shares of the Series A Preferred Stock for \$1,000 per share, plus accrued and unpaid dividends, in whole or in part, subject to regulatory approval.

The Company entered into a Placement Agency Agreement with the Treasury on April 15, 2013 in connection with a private auction by the Treasury of the remaining 12,000 shares of Series A Preferred Stock conducted immediately thereafter. On April 29, 2013, the Treasury settled the sale of such shares of Series A Preferred Stock to the winning bidders in the private auction, consisting of six parties unrelated to the Company.

On May 8, 2013, the Company notified the Treasury of its intent to repurchase the Warrant at its fair market value. The Board of Directors of the Company had previously determined that it would be in the best interest of the Company and its stockholders to repurchase the Warrant and determined the Warrant's fair market value to be \$2,003,250 (the "Fair Market Value"). On May 10, 2013, the Treasury notified the Company that it had accepted the Company's offer to repurchase the Warrant at its Fair Market Value. Accordingly, on May 15, 2013, the Company entered into a Letter Agreement with Treasury pursuant to which the Company repurchased the Warrant for \$2,003,250 in cash. As a result of the aforementioned, the Warrant is no longer issued or outstanding and the Company's participation in the CPP is completed. In addition, as a result of the Treasury's sale of the Series A Preferred stock to third-party investors on April 29, 2013, the Treasury no longer possessed any securities issued by the Company. The redemption of the Series A Preferred Stock by the Company requires regulatory approval. See further discussions in Note 11 "Subsequent Event".

Note 10: Common Stock Offering

On March 7, 2014, the Company closed an underwritten offering of its common stock. The Company raised approximately \$17.2 million in gross proceeds by re-issuing 1,499,999 shares of its Treasury Stock, which includes the full exercise of the over-allotment option granted to the underwriters of 195,652 shares, at a price to the public of \$11.50 per share.

Net proceeds from the sale of the shares after underwriting discounts and estimated offering expenses were approximately \$15.9 million. The Company used the net proceeds from the offering to redeem the remaining 12,000 shares of the Company's Series A Preferred Stock and intends to use the remaining net proceeds for working capital and for general corporate purposes, including potential future acquisitions.

Note 11: Subsequent Event

On April 3, 2014, the Company received approval from the Board of Governors of the Federal Reserve System to redeem the Company's \$12 million of Series A Preferred Stock that currently carries a coupon rate of 9.0% per annum. The Series A Preferred Stock was originally issued to the Treasury in January 2009 as part of their CPP and was sold to other investors in April 2013 through a public auction. The Company provided the holders of the Series A Preferred Stock with a formal notice of redemption and thirty days thereafter redeemed the Series A Preferred Stock on May 7, 2014, including all accrued and unpaid dividends.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

General

The primary function of the Company is to monitor and oversee its investment in the Bank. The Company engages in few other activities, and the Company has no significant assets other than its investment in the Bank. As a result, the results of operations of the Company are derived primarily from operations of the Bank. The Bank's results of operations are primarily dependent on net interest margin, which is the difference between interest income on interest-earning assets and interest expense on interest-bearing liabilities. The Bank's income is also affected by the level of its noninterest expenses, such as employee salaries and benefits, occupancy expenses and other expenses. The following discussion reviews material changes in the Company's financial condition as of March 31, 2014, and the results of operations for the three months ended March 31, 2014 and 2013.

The discussion set forth below, as well as other portions of this Form 10-Q, may contain forward-looking comments. Such comments are based upon the information currently available to management of the Company and management's perception thereof as of the date of this Form 10-Q. When used in this Form 10-Q, words such as "anticipates," "estimates," "believes," "expects," and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. Such statements are subject to risks and uncertainties. Actual results of the Company's operations could materially differ from those forward-looking comments. The differences could be caused by a number of factors or combination of factors including, but not limited to: changes in demand for banking services; changes in portfolio composition; changes in management strategy; increased competition from both bank and non-bank companies; changes in the general level of interest rates; changes in general or local economic conditions; changes in federal or state regulations and legislation governing the operations of the Company or the Bank; and other factors set forth in reports and other documents filed by the Company with the SEC from time to time, including the risk factors described under Item 1A. of the Company's Form 10-K for the fiscal year ended December 31, 2013.

Financial Condition

The Company's total assets increased \$19,192,382 (3%) from \$619,888,135 as of December 31, 2013, to \$639,080,517 as of March 31, 2014.

Available-for-sale securities increased \$1,538,963 (2%) from \$97,692,685 as of December 31, 2013, to \$99,231,648 as of March 31, 2014. The Company had purchases of \$11,337,265 offset by sales, maturities and principal payments received of \$11,021,662. The market rates on debt securities have improved in the first quarter of 2014 resulting in a decline in unrealized losses of \$1,281,850.

Net loans receivable decreased by \$18,165,521 (4%) from \$464,379,854 as of December 31, 2013, to \$446,214,333 as of March 31, 2014. During the quarter, commercial real estate loans increased \$9,320,504 (5%) and construction loans decreased \$7,821,112 (18%). These changes were primarily due to one larger credit classified as construction being completed and transferred to the commercial real estate category. Also, commercial loans decreased \$6,504,665 (7%) which was due to various expected payoffs and principal reductions. Permanent multi-family loans decreased \$13,961,515 (30%) due to the expected payoff of one large credit. Loans secured by owner occupied one to four unit residential real estate increased \$749,973 (1%) and installment loans decreased \$2,133 (less than 1%). The Company continues to focus its lending efforts in the commercial and owner occupied real estate loan categories, and to reduce its concentrations in non-owner occupied commercial real estate.

Allowance for loan losses decreased \$40,464 (less than 1%) from \$7,801,600 as of December 31, 2013 to \$7,761,135 as of March 31, 2014. In addition to the provision for loan loss of \$200,000 recorded by the Company for the quarter ended March 31, 2014, loan charge-offs of specific loans (classified as nonperforming at December 31, 2013) exceeded recoveries by \$240,464. The decline in the allowance is primarily due to a decline in loan balances. The allowance for loan losses, as a percentage of gross loans outstanding (excluding mortgage loans held for sale), as of March 31, 2014 and December 31, 2013 was 1.71% and 1.65%, respectively. The allowance for loan losses, as a percentage of nonperforming loans outstanding, as of March 31, 2014 and December 31, 2013 was 71.2% and 49.2%, respectively. Management believes the allowance for loan losses is at a level to be sufficient in providing for potential loan losses in the Bank's existing loan portfolio.

Deposits increased \$4,081,779 (1%) from \$487,318,939 as of December 31, 2013, to \$491,400,718 as of March 31, 2014. For the three months ended March 31, 2014, checking and savings accounts increased by \$5,541,510 and certificates of deposit decreased by \$1,459,731. The increase in checking and savings accounts was due to the Bank's continued efforts to increase core transaction deposits, both retail and commercial. See also the discussion under "Quantitative and Qualitative Disclosure about Market Risk – Asset/Liability Management."

Stockholders' equity (including unrealized appreciation on available-for-sale securities, net of tax) increased \$17,913,496 from \$50,355,233 as of December 31, 2013, to \$68,268,729 as of March 31, 2014. This increase was primarily due to the Company closing an underwritten offering of its common stock. The Company raised approximately \$17,200,000 in gross proceeds by re-issuing 1,499,999 shares of its treasury stock. The Company's net income during this period was \$1,301,426. In conjunction with the Series A Preferred Stock, the Company accrued \$230,000 of dividends during the period. On a per common share basis, stockholders' equity decreased from \$14.04 as of December 31, 2013 to \$13.21 as of March 31, 2014.

Average Balances, Interest and Average Yields

The Company's profitability is primarily dependent upon net interest income, which represents the difference between interest and fees earned on loans and debt and equity securities, and the cost of deposits and borrowings. Net interest income is dependent on the difference between the average balances and rates earned on interest-earning assets and the average balances and rates paid on interest-bearing liabilities. Non-interest income, non-interest expense, and income taxes also impact net income.

The following table sets forth certain information relating to the Company's average consolidated statements of financial condition and reflects the average yield on assets and average cost of liabilities for the periods indicated. Such yields and costs are derived by dividing income or expense annualized by the average balance of assets or liabilities, respectively, for the periods shown. Average balances were derived from average daily balances. The average balance of loans includes loans on which the Company has discontinued accruing interest. The yields and costs include fees which are considered adjustments to yields. All dollar amounts are in thousands.

	Three Months ended 3/31/2014			Three Months ended 3/31/2013

Ratio of interest-earning assets to interest-bearing liabilities		111 %			108 %	

Results of Operations - Comparison of Three Month Periods Ended March 31, 2014 and 2013

Net income for the three months ended March 31, 2014 and 2013 was \$1,301,426 and \$952,653, respectively, which represents an increase in earnings of \$348,773 (37%).

Interest Income

Total interest income for the three months ended March 31, 2014 decreased \$59,357 (1%) as compared to the three months ended March 31, 2013. For the three month period ended March 31, 2014 compared to the same period in 2013, the average yield on interest earning assets increased 6 basis points to 4.34%, while the average balance of interest earning assets decreased approximately \$14,930,000. Declines in loan balances and increased competition in loan pricing has significantly impacted our ability to maintain loan yield. However, for the first quarter, the Company's asset yield increased primarily due to the recognition of approximately \$335,000 of interest income during the quarter on the payoff of a credit relationship that had been classified as non-accrual and the increase in yield on investment securities.

Interest Expense

Total interest expense for the three months ended March 31, 2014 decreased \$327,257 (23%) when compared to the three months ended March 31, 2013. For the three month period ended March 31, 2014, the average cost of interest bearing liabilities decreased 20 basis points to 0.83%, and the average balance of interest bearing liabilities decreased approximately \$26,844,000 when compared to the same period in 2013. The primary reason for the decrease in the average cost of interest bearing liabilities was the continued decline in higher cost certificates of deposits as well as reductions in the average rate paid on transaction deposit balances. Also, the Company reduced its FHLB advances and securities sold under agreements to repurchase during 2013. As a result, interest expense on these borrowings decreased \$171,689 compared to the same quarter in 2013.

Net Interest Income

Net interest income for the three months ended March 31, 2014 increased \$267,900 (5%) when compared to the same period in 2013. The average balance of interest earning assets increased by approximately \$11,914,000 more than the average balance of interest bearing liabilities increased when comparing the three month period ended March 31, 2014 to the same period in 2013. For the three month period ended March 31, 2014, the net interest margin increased 26 basis points to 3.59% when compared to the same period in 2013.

Provision for Loan Losses

Provisions for loan losses are charged or credited to earnings to bring the total allowance for loan losses to a level considered adequate by the Company to provide for potential loan losses in the existing loan portfolio. When making its assessment, the Company considers prior loss experience, volume and type of lending, local banking trends and impaired and past due loans in the Company's loan portfolio. In addition, the Company considers general economic conditions and other factors related to collectability of the Company's loan portfolio.

Based on its internal analysis and methodology, Management recorded a provision for loan losses of \$200,000 for the three months ended March 31, 2014, compared to \$400,000 for the same period in 2013.

Generally, the overall decrease in the provision for loan losses for the three months ended March 31, 2014 has resulted primarily from declining historic loss rates, which are used to calculate the reserve for the homogenous pool of loans, and an overall decrease in the loan portfolio. The Company has also experienced lower reserve requirements on newly classified nonperforming credits during the quarter. The Bank will continue to monitor its allowance for loan losses

and make future additions based on economic and regulatory conditions. Management may need to increase the allowance for loan losses through charges to the provision for loan losses if anticipated growth in the Bank's loan portfolio increases or other circumstances warrant.

Although the Bank maintains its allowance for loan losses at a level which it considers to be sufficient to provide for potential loan losses in its existing loan portfolio, there can be no assurance that future loan losses will not exceed internal estimates. In addition, the amount of the allowance for loan losses is subject to review by regulatory agencies which can order the establishment of additional loan loss provisions.

Noninterest Income

Noninterest income decreased \$202,075 (20%) for the three months ended March 31, 2014 when compared to the three months ended March 31, 2013.

Gain on sale of loans decreased \$246,355 (57%) for the three months ended March 31, 2014 when compared to the same period in 2013 due to long-term interest rates increasing significantly during 2013 and into the first quarter of 2014 which dramatically reduced consumer demand for long-term secondary market mortgage loans.

Gains on investment securities for the three months ended March 31, 2014 were \$3,088 compared to \$88,801 during the same period in 2013. Losses on foreclosed assets were \$15,783 for the quarter compared to \$72,345 for the same period in 2013. Service charges on deposit accounts and debit and credit card interchange income increased a combined \$56,000 during the quarter compared to the same period in 2013.

Noninterest Expense

Noninterest expense decreased \$80,996 (2%) for the three months ended March 31, 2014 when compared to the three months ended March 31, 2013. The primary factor for the decrease in noninterest expense was due to a decline in the overall number of staff compared to the prior year quarter and also a decline in mortgage commissions from reduced mortgage volume, as noted above.

Provision for Income Taxes

The provision for income taxes decreased slightly during the quarter compared to the same period in 2013. However, the actual effective tax rate (based on income before income taxes) declined approximately 5% compared to the same period in 2013 primarily due to the increased utilization of state low income housing tax credits.

Nonperforming Assets

The allowance for loan losses is calculated based upon an evaluation of pertinent factors underlying the various types and quality of the Bank's existing loan portfolio. When making such evaluation, management considers such factors as the repayment status of its loans, the estimated net realizable value of the underlying collateral, borrowers' intent (to the extent known by the Bank) and ability to repay the loan, local economic conditions and the Bank's historical loss ratios. The allowance for loan losses, as a percentage of nonperforming loans outstanding, as of March 31, 2014 and December 31, 2013 was 71.2% and 49.2%, respectively. Total loans classified as substandard, doubtful or loss as of March 31, 2014, were \$13.2 million or 2.07% of total assets as compared to \$16.7 million, or 2.69% of total assets at December 31, 2013. Management considered nonperforming and total classified loans in evaluating the adequacy of the Bank's allowance for loan losses.

The ratio of nonperforming assets to total assets is another useful tool in evaluating exposure to credit risk. Nonperforming assets of the Bank include nonperforming loans and assets which have been acquired as a result of foreclosure or deed-in-lieu of foreclosure. All dollar amounts are in thousands.

	3/31/2014	12/31/2013	12/31/2012			
Nonperforming loans	\$ 10,894	\$ 15,848	\$ 15,331			
Troubled debt restructurings	831	-	-			
Real estate acquired in settlement of loans	3,901	3,822	4,530			
Total nonperforming assets	\$ 15,626	\$ 19,670	\$ 19,861			
Total nonperforming assets as a percentage of total assets	2.45	% 3.17	% 3.01			%
Allowance for loan losses	\$ 7,761	\$ 7,802	\$ 8,740			
Allowance for loan losses as a percentage of gross loans	1.71	% 1.65	% 1.83			%

Liquidity and Capital Resources

Liquidity refers to the ability to manage future cash flows to meet the needs of depositors and borrowers and fund operations. Maintaining appropriate levels of liquidity allows the Company to have sufficient funds available for customer demand for loans, withdrawal of deposit balances and maturities of deposits and other liabilities. The Company's primary sources of liquidity include cash and cash equivalents, customer deposits and Federal Home Loan Bank of Des Moines borrowings. The Company also has established borrowing lines available from the Federal Reserve Bank which is considered a secondary source of funds.

The Company's most liquid assets are cash and cash equivalents, which are cash on hand, amounts due from financial institutions, and certificates of deposit with other financial institutions that have an original maturity of three months or less. The levels of such assets are dependent on the Bank's operating, financing, and investment activities at any given time. The Company's cash and cash equivalents totaled \$49,242,713 as of March 31, 2014 and \$12,303,200 as of December 31, 2013, representing an increase of \$36,939,513. The variations in levels of cash and cash equivalents are influenced by many factors but primarily loan originations and payments, deposit flows and anticipated future deposit flows, which are subject to, and influenced by, many factors.

The Bank's capital ratios are above the levels required to be considered a well-capitalized financial institution. As of March 31, 2014, the Bank's Tier 1 leverage ratio was 10.66%, its Tier 1 risk-based capital ratio was 13.77% and the Bank's total risk-based capital ratio was 15.02% - all exceeding the minimums of 5%, 6% and 10%, respectively.

On March 7, 2014, the Company closed an underwritten offering of its common stock. The Company raised approximately \$17.2 million in gross proceeds by re-issuing 1,499,999 shares of treasury stock, which includes the full exercise of the over-allotment option granted to the underwriters of 195,652 shares, at a price to the public of \$11.50 per share. Net proceeds from the sale of the shares after underwriting discounts and estimated offering expenses were approximately \$15.9 million. The Company used the net proceeds from the offering to redeem the remaining 12,000 shares of the Company's Series A Preferred Stock on May 7, 2014 and intends to use the remaining net proceeds for working capital and for general corporate purposes, including potential future acquisitions.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Asset/Liability Management

The goal of the Bank's asset/liability policy is to manage interest rate risk so as to maximize net interest income over time in changing interest rate environments. Management monitors the Bank's net interest spreads (the difference between yields received on assets and paid on liabilities) and, although constrained by market conditions, economic conditions, and prudent underwriting standards, the Bank offers deposit rates and loan rates designed to maximize net interest income. Management also attempts to fund the Bank's assets with liabilities of a comparable duration to minimize the impact of changing interest rates on the Bank's net interest income. Since the relative spread between financial assets and liabilities is constantly changing, the Bank's current net interest income may not be an indication of future net interest income.

As a part of its asset and liability management strategy and throughout the past several years, the Bank has continued to emphasize the origination of short-term commercial real estate, commercial business and consumer loans, while originating fixed-rate, one- to four-family residential loans primarily for immediate resale in the secondary market.

The Bank constantly monitors its deposits in an effort to decrease their interest rate sensitivity. Rates of interest paid on deposits at the Bank are priced competitively in order to meet the Bank's asset/liability management objectives and spread requirements. The Bank believes, based on historical experience, that a substantial portion of such accounts represents non-interest rate sensitive core deposits.

Interest Rate Sensitivity Analysis

The following table sets forth as of March 31, 2014 management's estimates of the projected changes in net portfolio value ("NPV") in the event of 100 and 200 basis point ("bp") instantaneous and permanent increases and decreases in market interest rates. Dollar amounts are expressed in thousands.

BP Change in Rates	Estimated Net Portfolio Value			NPV as % of PV of Assets		
	\$ Amount	\$ Change	% Change	NPV Ratio	Change	
+200	\$74,163	\$(3,210)	-4	% 11.99%	-0.09	%
+100	75,285	(2,088)	-3	% 11.97%	-0.10	%
NC	77,373	-	0	% 12.08%	0.00	%
-100	79,110	1,736	2	% 12.10%	0.02	%
-200	84,285	6,912	9	% 12.65%	0.57	%

Computations of prospective effects of hypothetical interest rate changes are based on an internally generated model using actual maturity and repricing schedules for the Bank's loans and deposits, and are based on numerous assumptions, including relative levels of market interest rates, loan repayments and deposit run-offs, and should not be relied upon as indicative of actual results. Further, the computations do not contemplate any actions the Bank may undertake in response to changes in interest rates. For further discussion of the Company's market risk, see the Interest Rate Sensitivity Analysis Section of Management's Discussion and Analysis of Financial Condition and Results of Operations included in the Company's 2013 Annual Report on Form 10-K.

Management cannot predict future interest rates or their effect on the Bank's NPV in the future. Certain shortcomings are inherent in the method of analysis presented in the computation of NPV. For example, although certain assets and liabilities may have similar maturities or periods to repricing, they may react in differing degrees to changes in market interest rates. Additionally, certain assets, such as adjustable-rate loans, have an initial fixed rate period typically from one to five years, and over the remaining life of the asset changes in the interest rate are restricted. In addition, the proportion of adjustable-rate loans in the Bank's portfolio could decrease in future periods due to refinancing activity if market interest rates remain steady in the future. Further, in the event of a change in interest rates, prepayment and early withdrawal levels could deviate significantly from those assumed in the table. Finally, the ability of many borrowers to service their adjustable-rate debt may decrease in the event of an interest rate increase.

The Bank's Board of Directors (the "Board") is responsible for reviewing the Bank's asset and liability management policies. The Board meets quarterly to review interest rate risk and trends, as well as liquidity and capital ratios and requirements. The Bank's management is responsible for administering the policies and determinations of the Board with respect to the Bank's asset and liability goals and strategies.

Item 4. Controls and Procedures

(a) The Company maintains disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934 (the “Exchange Act”)) that are designed to ensure that information required to be disclosed in the Company’s Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms, and that such information is accumulated and communicated to the Company’s management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

The Company conducted an evaluation, under the supervision and with the participation of the Company’s management, including the Company’s Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company’s disclosure controls and procedures. Based on this evaluation, the Company’s Chief Executive Officer and Chief Financial Officer concluded that the Company’s disclosure controls and procedures were effective as of March 31, 2014.

(b) There have been no changes in the Company’s internal control over financial reporting during the quarter ended March 31, 2014 that have materially affected, or are reasonably likely to materially affect, the Company’s internal control over financial reporting.

PART II

Item 1. Legal Proceedings

None.

Item 1A. Risk Factors

Not applicable.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

ISSUER PURCHASES OF EQUITY SECURITIES

The Company has a repurchase plan which was announced on August 20, 2007. This plan authorizes the purchase by the Company of up to 350,000 shares of the Company's common stock. There is no expiration date for this plan. There are no other repurchase plans in effect at this time. The Company had no repurchase activity of the Company's common stock during the quarter ended March 31, 2014.

Item 3. Defaults Upon Senior Securities

Not applicable.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

None

Item 6. Exhibits
