THE NEW HOME COMPANY INC.  
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. Organization and Summary of Significant Accounting Policies

Organization

The New Home Company Inc. (the “Company”), a Delaware corporation, and its subsidiaries are primarily engaged in all aspects of residential real estate development, including acquiring land and designing, constructing and selling homes located in California.

Initial Public Offering

The Company completed its initial public offering (“IPO”) on January 30, 2014. In preparation for the IPO, the Company reorganized from a Delaware limited liability company (“LLC”) into a Delaware corporation, issuing 8,636,250 shares of common stock to the former members of the LLC in the Company's formation transactions, and changed its name to The New Home Company Inc. As a result of the IPO, the Company issued and sold 8,984,375 shares of common stock (including 1,171,875 shares sold pursuant to the underwriter's exercise of their option to purchase additional shares from the Company) at the public offering price of \$11.00 per share. In accordance with the terms of the IPO, with net proceeds received from the underwriters exercise of their option to purchase additional shares, the Company repurchased 1,171,875 shares of its common stock issued to a member of the LLC in connection with the Company's formation transactions. The Company received proceeds of \$75.8 million, net of the underwriting discount, offering expenses and the repurchase of shares. Upon the close of the IPO, the Company had 16,448,750 shares of common stock outstanding. The Company had 16,516,546 shares of common stock outstanding as of September 30, 2015.

Basis of Presentation

The unaudited condensed consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. All significant intercompany accounts have been eliminated upon consolidation.

The accompanying unaudited condensed financial statements have been prepared in accordance with U.S. generally accepted accounting principles (“GAAP”) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X and should be read in conjunction with the consolidated financial statements and notes thereto included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2014. The accompanying unaudited condensed financial statements include all adjustments (consisting of normal recurring entries) necessary for the fair presentation of our results for the interim period presented. Results for the interim period are not necessarily indicative of the results to be expected for the full year.

Unless the context otherwise requires, the terms “we”, “us”, “our” and “the Company” refer to the Company and its wholly owned subsidiaries, on a consolidated basis.

Use of Estimates

The preparation of the Company’s consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the accompanying consolidated financial statements and notes. Accordingly, actual results could differ materially from these estimates.

## Segment Reporting

Accounting Standards Codification (“ASC”) 280, "Segment Reporting" (“ASC 280”) established standards for the manner in which public enterprises report information about operating segments. In accordance with ASC 280, we have determined that our homebuilding division and our fee building division are our operating segments. Corporate is a non-operating segment.

## Cash and Cash Equivalents and Concentration of Credit Risk

We define cash and cash equivalents as cash on hand, demand deposits with financial institutions, and short term liquid investments with a maturity date of less than three months from the date of purchase. The Company’s cash balances exceed federally insurable limits. The Company monitors the cash balances in its operating accounts and adjusts the cash balances as appropriate; however, these cash balances could be impacted if the underlying financial institutions fail or are subject to other adverse conditions in the financial markets. To date, the Company has not experienced a loss or lack of access to cash in its operating accounts.

THE NEW HOME COMPANY INC.  
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

### Restricted Cash

Restricted cash of \$0.1 million and \$0.3 million as of September 30, 2015 and December 31, 2014, respectively, is held in accounts for payments of subcontractor costs incurred in connection with various fee building projects.

### Real Estate Inventories and Cost of Sales

We capitalize pre-acquisition, land, development and other allocated costs, including interest, property taxes and indirect construction costs. Pre-acquisition costs, including non-refundable land deposits, are expensed to abandoned project costs when we determine continuation of the prospective project is not probable.

Land, development and other common costs are typically allocated to real estate inventories using a methodology that approximates the relative-sales-value method. Home construction costs per production phase are recorded using the specific identification method. Cost of sales for homes closed includes the allocation of construction costs of each home and all applicable land acquisition, land development and related common costs (both incurred and estimated to be incurred) based upon the relative-sales-value of the home within each project. Changes to estimated total development costs subsequent to initial home closings in a project are generally allocated on a relative-sales-value method to remaining homes in the project. Inventory is stated at cost, unless the carrying amount is determined not to be recoverable, in which case inventory is written down to fair value. We review our real estate assets at each project on a periodic basis or whenever indicators of impairment exist. Real estate assets include projects actively selling and projects under development or held for future development. Indicators of impairment include, but are not limited to, significant decreases in local housing market values and selling prices of comparable homes, significant decreases in gross margins and sales absorption rates, costs significantly in excess of budget, and actual or projected cash flow losses.

If there are indicators of impairment, we perform a detailed budget and cash flow review of the applicable real estate inventories to determine whether the estimated remaining undiscounted future cash flows of the project are more or less than the asset's carrying value. If the undiscounted cash flows are more than the asset's carrying value, no impairment adjustment is required. However, if the undiscounted cash flows are less than the asset's carrying value, the asset is deemed impaired and is written down to fair value.

When estimating undiscounted cash flows of a project, we make various assumptions, including: (i) expected sales prices and sales incentives to be offered, including the number of homes available, pricing and incentives being offered by us or other builders in other projects, and future sales price adjustments based on market and economic trends; (ii) expected sales pace and cancellation rates based on local housing market conditions, competition and historical trends; (iii) costs expended to date and expected to be incurred including, but not limited to, land and land development costs, home construction costs, interest costs, indirect construction and overhead costs, and selling and marketing costs; (iv) alternative product offerings that may be offered that could have an impact on sales pace, sales price and/or building costs; and (v) alternative uses for the property.

Many assumptions are interdependent and a change in one may require a corresponding change to other assumptions. For example, increasing or decreasing sales absorption rates has a direct impact on the estimated per unit sales price of a home, the level of time sensitive costs (such as indirect construction, overhead and carrying costs), and selling and marketing costs (such as model maintenance costs and advertising costs). Depending on the underlying objective of the project, assumptions could have a significant impact on the projected cash flow analysis. For example, if our

objective is to preserve operating margins, our cash flow analysis will be different than if the objective is to increase sales. These objectives may vary significantly from project to project and over time. If assets are considered impaired, impairment is determined by the amount the asset's carrying value exceeds its fair value. Fair value is determined based on estimated future cash flows discounted for inherent risks associated with real estate assets. These discounted cash flows are impacted by expected risk based on estimated land development; construction and delivery timelines; market risk of price erosion; uncertainty of development or construction cost increases; and other risks specific to the asset or market conditions where the asset is located when assessment is made. These factors are specific to each project and may vary among projects. For the three and nine months ended September 30, 2015 and 2014, no impairment adjustments relating to homebuilding real estate inventories were recorded.

THE NEW HOME COMPANY INC.  
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

### Capitalization of Interest

We follow the practice of capitalizing interest to real estate inventories during the period of development and to investments in unconsolidated joint ventures, when applicable, in accordance with ASC 835, "Interest" ("ASC 835"). Interest capitalized as a component of cost of real estate inventories is included in cost of home sales as related homes or lots are sold. To the extent interest is capitalized to investment in unconsolidated joint ventures, it is included as a reduction of income from or increase in loss from unconsolidated joint ventures when the related homes or lots are sold to third parties. To the extent our debt exceeds our qualified assets as defined in ASC 835, we expense a portion of the interest incurred by us. Qualified assets represent projects that are actively selling or under development as well as investments in unconsolidated joint ventures accounted for under the equity method until such equity investees begin their principal operations.

### Revenue Recognition

#### Home Sales and Profit Recognition

In accordance with ASC 360, "Property, Plant, and Equipment", revenues from home sales and other real estate sales are recorded and a profit is recognized when the respective homes are closed. Home sales and other real estate sales are closed when all conditions of escrow are met, including delivery of the home or other real estate asset, title passes, appropriate consideration is received and collection of associated receivables, if any, is reasonably assured. Sales incentives are a reduction of revenues when the respective home is closed. When it is determined that the earnings process is not complete, the sale and the related profit are deferred for recognition in future periods. The profit we record is based on the calculation of cost of sales, which is dependent on our allocation of costs, as described in more detail above in the section entitled "Real Estate Inventories and Cost of Sales."

### Fee Building

The Company enters into fee building agreements to provide services whereby it will build homes on behalf of independent third-party property owners. The independent third-party property owner funds all project costs incurred by the Company to build and sell the homes. The Company primarily enters into cost plus fee contracts where it charges independent third-party property owners for all direct and indirect costs plus a negotiated management fee. For these types of contracts, the Company recognizes revenue based on the actual total costs it has expended plus the applicable management fee. The management fee is typically a fixed fee based on a percentage of the cost or home sales revenue of the project depending on the terms of the agreement with the independent third-party property owner. In accordance with ASC 605, "Revenue Recognition" ("ASC 605"), revenues from fee building services are recognized over a cost-to-cost approach in applying the percentage-of-completion method. Under this approach, revenue is earned in proportion to total costs incurred, divided by total costs expected to be incurred. The total estimated cost plus the management fee represents the total contract value. The Company recognizes revenue based on the actual labor and other direct costs incurred, plus the portion of the management fee it has earned to date. In the course of providing its services, the Company routinely subcontracts for services and incurs other direct costs on behalf of its customers. These costs are passed through to customers and, in accordance with industry practice and GAAP, are included in the Company's revenue and cost of revenue. Under certain agreements, the Company is eligible to receive additional incentive compensation as certain financial thresholds defined in the agreement are achieved. The Company recognizes revenue for any incentive compensation when such financial thresholds are probable of being met and such compensation is deemed to be collectible, generally at the date the amount is communicated to us by the independent

third-party property owner.

The Company also enters into fee building and management contracts with third parties and its unconsolidated joint ventures where it provides construction supervision services, as well as sales and marketing services, and does not bear financial risks for any services provided. In accordance with ASC 605, revenues from these services are recognized over a proportional performance method or completed performance method. Under this approach, revenue is earned as services are provided in proportion to total services expected to be provided to the customer or on a straight line basis if the pattern of performance cannot be determined while costs are recognized as incurred. Revenue recognition for any portion of the fees earned from these services that are contingent upon a financial threshold or specific event is deferred until the threshold is achieved or the event occurs.

The Company's fee building revenues have historically been concentrated with a small number of customers. For the three and nine months ended September 30, 2015, one customer comprised 88% and 92% of fee building revenue, respectively. For the three and nine months ended September 30, 2014, one customer comprised 89% and 85% of fee building revenue, respectively. As of September 30, 2015 and December 31, 2014, one customer comprised 96% and 98% of contracts and accounts receivables, respectively.

THE NEW HOME COMPANY INC.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Variable Interest Entities

The Company accounts for variable interest entities in accordance with ASC 810, "Consolidation" ("ASC 810"). Under ASC 810, a variable interest entity ("VIE") is created when: (a) the equity investment at risk in the entity is not sufficient to permit the entity to finance its activities without additional subordinated financial support provided by other parties, including the equity holders; (b) the entity's equity holders as a group either (i) lack the direct or indirect ability to make decisions about the entity, (ii) are not obligated to absorb expected losses of the entity or (iii) do not have the right to receive expected residual returns of the entity; or (c) the entity's equity holders have voting rights that are not proportionate to their economic interests, and the activities of the entity involve or are conducted on behalf of the equity holder with disproportionately few voting rights. If an entity is deemed to be a VIE pursuant to ASC 810, the enterprise that has both (i) the power to direct the activities of a VIE that most significantly impact the entity's economic performance and (ii) the obligation to absorb the expected losses of the entity or right to receive benefits from the entity that could be potentially significant to the VIE is considered the primary beneficiary and must consolidate the VIE.

Under ASC 810, a non-refundable deposit paid to an entity may be deemed to be a variable interest that will absorb some or all of the entity's expected losses if they occur. Our land purchase and lot option deposits generally represent our maximum exposure to the land seller if we elect not to purchase the optioned property. In some instances, we may also expend funds for due diligence, development and construction activities with respect to optioned land prior to takedown. Such costs are classified as real estate inventories, which we would have to write off should we not exercise the option. Therefore, whenever we enter into a land option or purchase contract with an entity and make a non-refundable deposit, a VIE may have been created.

As of September 30, 2015 and December 31, 2014, the Company was not required to consolidate any VIEs. In accordance with ASC 810, we perform ongoing reassessments of whether we are the primary beneficiary of a VIE.

Noncontrolling Interest

During 2013, the Company entered into a joint venture agreement with a third-party property owner. In accordance with ASC 810, the Company analyzed this arrangement and determined that it was not a variable interest entity; however, the Company determined it was required to consolidate the joint venture as it is the managing member with the powers to direct the major decisions of the entity. As of September 30, 2015 and December 31, 2014, the third-party investor had made contributions of \$2.5 million and \$2.3 million, respectively, net of losses and distributions.

Investments in Unconsolidated Joint Ventures

We first analyze our homebuilding and land development joint ventures to determine if they are variable interest entities under the provisions of ASC 810 (as discussed above) when determining whether the entity should be consolidated. If we conclude that our homebuilding and land development joint ventures are not variable interest entities, then, in accordance with the provisions of ASC 810, limited partnerships or similar entities must be further evaluated under the presumption that the general partner, or the managing member in the case of a limited liability company, is deemed to have a controlling interest and therefore must consolidate the entity unless the limited partners or non-managing members have: (1) the ability, either by a single limited partner or through a simple majority vote, to

dissolve or liquidate the entity, or kick-out the managing member/general partner without cause, or (2) substantive participatory rights that are exercised in the ordinary course of business. Under the provisions of ASC 810, we may be required to consolidate certain investments in which we hold a general partner or managing member interest.

As of September 30, 2015 and December 31, 2014, the Company concluded that some of its joint ventures were variable interest entities. The Company concluded that it was not the primary beneficiary of the variable interest entities and accounted for these entities under the equity method of accounting.

Investments in our unconsolidated joint ventures are accounted for under the equity method of accounting. Under the equity method, we recognize our proportionate share of earnings and losses generated by the joint venture upon the delivery of lots or homes to third parties. Our proportionate share of intra-entity profits and losses are eliminated until the related asset has been sold by the unconsolidated joint venture to third parties. Our ownership interests in our unconsolidated joint ventures vary, but are generally less than or equal to 50%. The unconsolidated joint ventures accounting policies are generally consistent with those of the Company.

We review real estate inventory held by our unconsolidated joint ventures for indicators of impairment, consistent with our real estate inventories. We also review our investments in unconsolidated joint ventures for evidence of other-than-

THE NEW HOME COMPANY INC.  
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

temporary declines in value. To the extent we deem any portion of our investment in unconsolidated joint ventures as not recoverable, we impair our investment accordingly. For the three and nine months ended September 30, 2015 and 2014, no impairments related to investment in unconsolidated joint ventures were recorded.

The Company selectively provides loan-to-value ("LTV") maintenance and completion guaranties for debt held by its unconsolidated joint ventures. Such guaranties facilitated the financing of our joint ventures' development projects and arose in the ordinary course of business. Refer to Note 11 for more information discussing the LTV and completion guaranties.

#### Selling and Marketing Expense

Selling and marketing costs incurred to sell real estate projects are capitalized if they are reasonably expected to be recovered from the sale of the project or from incidental operations, and are incurred for tangible assets that are used directly through the selling period to aid in the sale of the project or services that have been performed to obtain regulatory approval of sales. All other selling and marketing costs are expensed in the period incurred.

#### Warranty Accrual

We offer warranties on our homes that generally cover various defects in workmanship or materials, or to cover structural construction defects for one-year periods. Estimated future direct warranty costs are accrued and charged to cost of sales in the period when the related homebuilding revenues are recognized. Amounts are accrued based upon the Company's historical rates. Due to the Company's limited history related to homebuilding sales, the Company also considers the historical experience of its peers in determining the amount of its warranty accrual. In addition, the Company receives warranty payments from its customers for certain of its fee building projects where it has the contractual risk of construction. These payments are recorded as warranty accruals. Indirect warranty overhead salaries and related costs are charged to the accrual in the period incurred. We assess the adequacy of our warranty accrual on a quarterly basis and adjust the amounts recorded if necessary. Our warranty accrual is included in accrued expenses and other liabilities in the accompanying consolidated balance sheets.

#### Contracts and Accounts Receivable

Contracts and accounts receivable primarily represent the fees earned but not collected and reimbursable project costs incurred in connection with fee building agreements. The Company periodically evaluates the collectability of its contracts receivable, and, if it is determined that a receivable might not be fully collectible, an allowance is recorded for the amount deemed uncollectible. This allowance for doubtful accounts is estimated based on management's evaluation of the contracts involved and the financial condition of its customers. Factors considered in evaluations include, but are not limited to: (i) customer type; (ii) historical contract performance; (iii) historical collection and delinquency trends; (iv) customer credit worthiness; and (v) general economic conditions.

As of September 30, 2015 and December 31, 2014, no allowance was recorded related to contracts and accounts receivable.

#### Property and Equipment

Property and equipment are recorded at cost and depreciated using the straight-line method over their estimated useful lives ranging from three to five years. Leasehold improvements are stated at cost and are amortized using the

straight-line method over the shorter of either their estimated useful lives or the probable term of the lease.

#### Income Taxes

Income taxes are accounted for in accordance with ASC 740, "Income Taxes" ("ASC 740"). As a result of the conversion from an LLC to a taxable entity in connection with the Company's IPO, the Company recognized a cumulative net deferred tax asset of \$1.5 million related to the difference between the financial statement basis and tax basis of the assets and liabilities as of January 30, 2014. Subsequent to the conversion, the consolidated provision for, or benefit from, income taxes are calculated using the asset and liability method, under which deferred tax assets and liabilities are recorded based on the difference between the financial statement and tax basis of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse.

Deferred tax assets are evaluated on a quarterly basis to determine if adjustments to the valuation allowance are required. In accordance with ASC 740, we assess whether a valuation allowance should be established based on the consideration of all available evidence using a "more likely than not" standard with respect to whether deferred tax assets will be realized. The ultimate realization of deferred tax assets depends primarily on the generation of future taxable income during the periods in

THE NEW HOME COMPANY INC.  
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

which the differences become deductible. The value of our deferred tax assets will depend on applicable income tax rates. Judgment is required in determining the future tax consequences of events that have been recognized in our consolidated financial statements and/or tax returns. Differences between anticipated and actual outcomes of these future tax consequences could have a material impact on our consolidated financial statements.

ASC 740 defines the methodology for recognizing the benefits of uncertain tax return positions as well as guidance regarding the measurement of the resulting tax benefits. These provisions require an enterprise to recognize the financial statement effects of a tax position when it is more likely than not (defined as a likelihood of more than 50%), based on the technical merits, that the position will be sustained upon examination. In addition, these provisions provide guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. The evaluation of whether a tax position meets the more-likely-than-not recognition threshold requires a substantial degree of judgment by management based on the individual facts and circumstances. Actual results could differ from estimates.

#### Stock-Based Compensation

We account for share-based awards in accordance with ASC 718, "Compensation – Stock Compensation" ("ASC 718") and ASC 505-50, "Equity – Equity Based Payments to Non-Employees" ("ASC 505-50").

ASC 718 requires that the cost resulting from all share-based payment transactions be recognized in a company's financial statements. ASC 718 requires all entities to apply a fair-value-based measurement method in accounting for share-based payment transactions with employees except for equity instruments held by employee share ownership plans.

On June 26, 2015, the Company entered into an agreement that transitioned Joseph Davis' role within the Company from Chief Investment Officer to a non-employee consultant to the Company. Per the agreement, Mr. Davis' outstanding restricted stock units and stock option equity awards will continue to vest in accordance with their original terms. Under ASC 505-50, if an employee becomes a non-employee and continues to vest in an award pursuant to the award's original terms, that award will be treated as an award to a non-employee prospectively, provided the individual is required to continue providing services to the employer (such as consulting services). Based on the terms and conditions of Mr. Davis' consulting agreement noted above, we account for Mr. Davis' share-based awards in accordance with ASC 505-50.

ASC 505-50 requires that Mr. Davis' award be accounted for prospectively, such that the fair value of the award will be re-measured at each reporting date until the earlier of (a) the performance commitment date or (b) the date the services required under the transition agreement with Mr. Davis have been completed. ASC 505-50 requires that compensation cost ultimately recognized in the Company's financial statements be the sum of (a) the compensation cost recognized during the period of time the individual was an employee (based on the grant-date fair value) plus (b) the fair value of the award determined on the measurement date determined in accordance ASC 505-50 for the pro-rata portion of the vesting period in which the individual was a non-employee.

#### Recently Issued Accounting Standards

The Company qualifies as an "emerging growth company" pursuant to the provisions of the Jumpstart Our Business Startups Act of 2012 (the "JOBS Act"), enacted on April 5, 2012. Section 102 of the JOBS Act provides that an "emerging growth company" can take advantage of the extended transition period provided in Section 7(a)(2)(B) of the

Securities Act of 1933, as amended, for complying with new or revised accounting standards. As previously disclosed, the Company has chosen, irrevocably, to “opt out” of such extended transition period, and as a result, will comply with new or revised accounting standards on the relevant dates on which adoption of such standards is required for non-emerging growth companies.

In May 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2014-09, “Revenue from Contracts with Customers” (“ASU 2014-09”), which supersedes existing accounting literature relating to how and when a company recognizes revenue. Under ASU 2014-09, a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods and services. In August 2015, the FASB issued ASU No. 2015-14, “Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date”, which delayed the effective date of ASU 2014-09 by one year. As a result, for public companies, ASU 2014-09 will be effective for interim and annual reporting periods beginning after December 15, 2017, and is to be applied either with a full retrospective or modified retrospective approach, with early application permitted. We are currently evaluating the impact the adoption will have on our condensed consolidated financial statements and related disclosures.

THE NEW HOME COMPANY INC.  
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

In June 2014, the FASB issued ASU No. 2014-12, "Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period" ("ASU 2014-12"), which requires that a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition. A reporting entity should apply existing guidance in ASC 718, Compensation - Stock Compensation, as it relates to awards with performance conditions that affect vesting to account for such awards. The amendments in ASU 2014-12 are effective for interim and annual periods beginning after December 15, 2015. Early adoption is permitted. Our adoption of ASU 2014-12 is not expected to have a material effect on our condensed consolidated financial statements and related disclosures.

In August 2014, the FASB issued ASU No. 2014-15, "Disclosure of Uncertainties About an Entity's Ability to Continue as a Going Concern" ("ASU 2014-15"), which requires management to perform interim and annual assessments on whether there are conditions or events that raise substantial doubt about the entity's ability to continue as a going concern within one year of the date the financial statements are issued and to provide related disclosures, if required. The amendments in ASU 2014-15 are effective for the annual period ending after December 15, 2016, and for annual and interim periods thereafter. Early adoption is permitted. Our adoption of ASU 2014-15 is not expected to have a material effect on our condensed consolidated financial statements and related disclosures.

In February 2015, the FASB issued Accounting Standards Update ASU No. 2015-02, "Amendments to the Consolidation Analysis" ("ASU 2015-02"), which changes the analysis that a reporting entity must perform to determine whether it should consolidate certain types of legal entities. The amendments in ASU 2015-02 are effective for interim and annual periods beginning after December 15, 2015. Early adoption is permitted. The Company is in the process of evaluating the effects of ASU 2015-02 on its condensed consolidated financial statements and related disclosures.

In April 2015, the FASB issued Accounting Standards Update ASU No. 2015-03, "Simplifying the Presentation of Debt Issuance Costs" ("ASU 2015-03"), which requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The amendments in ASU 2015-03 are effective for interim and annual periods beginning after December 15, 2015. Early adoption is permitted. The Company is in the process of evaluating the effects of ASU 2015-03 on its condensed consolidated financial statements. Our adoption of ASU 2015-03 is not expected to have a material effect on our condensed consolidated financial statements and related disclosures.

In August 2015, the FASB issued ASU No. 2015-15, "Presentation and Subsequent Measurement of Debt Issuance Costs Associated with Line-of-Credit Arrangements – Amendments to SEC Paragraphs Pursuant to Staff Announcement at June 18, 2015 EITF Meeting" ("ASU 2015-15"), which clarifies the treatment of debt issuance costs from line-of-credit arrangements after the adoption of ASU 2015-03. In particular, ASU 2015-15 clarifies that the SEC staff would not object to an entity deferring and presenting debt issuance costs as an asset and subsequently amortizing the deferred debt issuance costs ratably over the term of the line-of-credit arrangement, regardless of whether there are any outstanding borrowings on the line-of-credit arrangement. Our adoption of ASU 2015-15 is not expected to have a material effect on our condensed consolidated financial statements and related disclosures.

## 2. Computation of Earnings (Loss) Per Share

Basic and diluted earnings per share for the nine months ended September 30, 2014 give effect to the conversion of the Company's members' equity into common stock on January 30, 2014 as though the conversion had occurred as of the beginning of the reporting period or the original date of issuance, if later. The number of shares converted was

based on the actual IPO price of \$11.00 per share.

Contracts receivable	\$10,626	\$13,158
Contracts receivable:		
Billed	\$—	\$2
Unbilled	10,626	13,156
	10,626	13,158
Accounts receivable:		
Escrow receivables	458	—
Other receivables	—	6

Contracts and accounts receivable	\$11,084	\$13,164
-----------------------------------	----------	----------

14

---

## THE NEW HOME COMPANY INC.

## NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Billed contracts receivable represent amounts billed to customers that have yet to be collected. Unbilled contracts receivable represents the contract revenue recognized but not yet billable pursuant to contract terms or administratively not invoiced. All unbilled receivables as of September 30, 2015 and December 31, 2014 are expected to be billed and collected within 90 days. Accounts payable at September 30, 2015 and December 31, 2014 includes \$9.9 million and \$11.9 million, respectively, related to costs incurred under the Company's fee building contracts.

## 4. Real Estate Inventories and Capitalized Interest

Real estate inventories are summarized as follows:

	September 30, 2015	December 31, 2014
	(Dollars in thousands)	
Deposits and pre-acquisition costs	\$10,857	\$9,349
Land held and land under development	57,480	48,990
Homes completed or under construction	139,797	87,072
Model homes	39,934	18,153
	\$248,068	\$163,564

All of our deposits and pre-acquisition costs are non-refundable, except for \$0.4 million and \$0 as of September 30, 2015 and December 31, 2014, respectively.

Model homes, homes completed, and homes under construction include all costs associated with home construction, including land, development, indirects, permits, materials and labor. Land held and land under development includes costs incurred during site development such as land, development, indirects, and permits.

Interest is capitalized to inventory during development and other qualifying activities. Interest capitalized as a cost of inventory is included in cost of sales as related homes are closed. For the three and nine months ended September 30, 2015 and 2014 interest incurred, capitalized and expensed was as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
	(Dollars in thousands)			
Interest incurred	\$1,369	\$534	\$3,295	\$1,079
Interest capitalized	(1,369	) (534	) (3,295	) (1,079
Interest expensed	\$—	\$—	\$—	\$—
Capitalized interest in beginning inventory	\$3,510	\$1,495	\$2,328	\$1,003
Interest capitalized as a cost of inventory	1,369	534	3,295	1,079
Contributions to unconsolidated joint ventures	—	—	(264	) —
Interest previously capitalized as cost of inventory, included in cost of sales	(396	) (65	) (876	) (118
Interest previously capitalized as cost of inventory, included in other expense	\$ (39	) \$—	\$ (39	) \$—
Capitalized interest in ending inventory	\$4,444	\$1,964	\$4,444	\$1,964

THE NEW HOME COMPANY INC.  
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

5. Unconsolidated Joint Ventures

As of September 30, 2015 and December 31, 2014, the Company had ownership interests in 13 and 12, respectively, unconsolidated joint ventures with ownership percentages that generally range from 5% to 50%. The condensed combined balance sheets for our unconsolidated joint ventures accounted for under the equity method are as follows:

	September 30, 2015	December 31, 2014
	(Dollars in thousands)	
Cash and cash equivalents	\$39,333	\$45,037
Restricted cash	11,613	14,981
Real estate inventories	473,313	459,770
Other assets	6,575	1,822
Total assets	\$530,834	\$521,610
Accounts payable and accrued liabilities	\$60,053	\$52,601
Notes payable	103,654	87,994
Total liabilities	163,707	140,595
The Company's equity	61,791	60,564
Other partners' equity	305,336	320,451
Total equity	367,127	381,015
Total liabilities and equity	\$530,834	\$521,610

The condensed combined statements of operations for our unconsolidated joint ventures accounted for under the equity method are as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
	(Dollars in thousands)			
Revenues	\$115,370	\$35,720	\$254,780	\$88,166
Cost of sales	87,645	29,326	196,928	69,490
Gross margin	27,725	6,394	57,852	18,676
Operating expenses	6,819	3,970	18,542	11,114
Net income of unconsolidated joint ventures	\$20,906	\$2,424	\$39,310	\$7,562
Equity in net income of unconsolidated joint ventures reflected in the accompanying consolidated statements of operations	\$4,056	\$50	\$9,180	\$995

The Company has entered into agreements with its unconsolidated joint ventures to provide management services related to the underlying projects (collectively referred to as the "Management Agreements"). Pursuant to the Management Agreements, the Company receives a management fee based on each project's revenues from its unconsolidated joint ventures. For the three and nine months ended September 30, 2015 and 2014, the Company earned \$3.3 million, \$8.4 million, \$2.2 million and \$5.5 million, respectively, in management fees, which have been recorded as fee building revenues in the accompanying condensed consolidated statements of operations.

On June 29, 2015, the Company formed a new unconsolidated joint venture and received capital credit in excess of our contributed land basis. As a result, the Company recognized \$1.6 million in equity in net income of unconsolidated joint ventures and deferred \$0.4 million in profit from unconsolidated joint ventures related to this transaction.

THE NEW HOME COMPANY INC.  
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

6. Other Assets

Other assets consist of the following:

	September 30, 2015	December 31, 2014
	(Dollars in thousands)	
Deferred tax asset	\$4,439	\$5,841
Prepaid income taxes	553	—
Prepaid loan fees	—	307
Prepaid expenses	825	500
Other assets	227	31
	\$6,044	\$6,679

7. Accrued Expenses and Other Liabilities

Accrued expenses and other liabilities consist of the following:

	September 30, 2015	December 31, 2014
	(Dollars in thousands)	
Warranty accrual	\$2,762	\$1,578
Accrued compensation and benefits	3,568	4,680
Accrued interest	470	268
Completion reserve	328	219
Accrued professional fees	204	414
Income taxes payable	—	3,930
Deferred profit from unconsolidated joint ventures	437	—
Other accrued expenses	225	111
	\$7,994	\$11,200

Completion reserves relate to liabilities for completed subcontractor work on closed homes for which invoices have not been remitted as of the balance sheet date.

THE NEW HOME COMPANY INC.  
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Changes in our warranty accrual are detailed in the table set forth below:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
	(Dollars in thousands)			
Beginning warranty accrual for homebuilding projects	\$ 1,902	\$ 916	\$ 1,277	\$ 810
Warranty provision for homebuilding projects	579	82	1,333	229
Warranty payments for homebuilding projects	(59	) (31	) (188	) (72
Ending warranty accrual for homebuilding projects	2,422	967	2,422	967
Beginning warranty accrual for fee building projects	297	257	301	264
Warranty provision for fee building projects	57	—	57	—
Warranty efforts for fee building projects	(14	) (8	) (18	) (15
Ending warranty accrual for fee building projects	340	249	340	249
Total ending warranty accrual	\$ 2,762	\$ 1,216	\$ 2,762	\$ 1,216

#### 8. Notes Payable

Notes payable consisted of the following:

	September 30, 2015	December 31, 2014
	(Dollars in thousands)	
Senior unsecured revolving credit facility	\$ 159,924	\$ 100,474
Note payable with land seller	7,000	9,500
Construction loans	2,250	3,777
	\$ 169,174	\$ 113,751
Notes payable to affiliate	\$ 249	\$ —

On June 26, 2014, the Company entered into a senior unsecured revolving credit facility (the "Credit Facility") with a bank to borrow up to \$125.0 million, limited by borrowing base provisions and financial covenants. Any outstanding principal is due upon maturity, which was June 26, 2017, with the potential for a one-year extension of the term of the loan, subject to specified conditions and the payment of an extension fee. On May 7, 2015, the Company entered into a modification agreement to increase the total lending commitments under the Credit Facility from \$125.0 million to \$175.0 million. The maturity date was extended to April 30, 2018, with the potential for a one-year extension of the term of the loan, subject to specified conditions and the payment of an extension fee.

The Company may repay advances at any time without premium or penalty. Interest is payable monthly and is charged at a rate of 1-month LIBOR plus a margin ranging from 2.25% to 3.00% depending on the Company's leverage ratio as calculated at the end of each fiscal quarter. As of September 30, 2015, the availability under the facility was \$15.1 million and the interest rate was 2.94%. In connection with the agreement, the Company is required to maintain certain financial covenants as defined in the Credit Facility, including (i) a minimum tangible net worth; (ii) leverage ratios; (iii) a minimum liquidity covenant; and (iv) a minimum fixed charge coverage ratio based on EBITDA to interest incurred. As of September 30, 2015, the Company was in compliance with all financial covenants.

In 2012, the Company entered into a \$9.5 million term loan with a land seller, secured by real estate, which bears interest at 7.0% per annum. During February 2015, we made a principal payment of \$2.5 million and extended the maturity date of the note. The note matures on the earlier of (i) 10 days following entitlement approval, or (ii) February 15, 2016 and requires certain mandatory pay downs totaling \$1.0 million based on the occurrence of certain project-related events. Interest is payable monthly and the remaining principal is due at maturity.

THE NEW HOME COMPANY INC.  
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

In May 2014, the Company entered into two construction loans with a bank related to model and production homes for a specific project. The loans are secured by real estate and bear interest at the bank's prime rate plus 2.0%, or 5.25% at September 30, 2015. The total commitment under the construction loans is \$8.6 million. As of September 30, 2015, the Company had \$6.4 million available to borrow under the construction loans subject to certain funding criteria. The loans mature on November 27, 2016. Interest is payable monthly with all unpaid principal and interest due at maturity.

In January 2015, the Company entered into two notes, secured by real estate, with one of its unconsolidated joint ventures for a total of \$0.7 million related to the purchase of finished lots. There is no stated interest rate associated with the notes. Repayment of the notes shall be made in three equal installments. In April, the company paid the first and second installments on both notes for a total pay down of \$0.5 million. The third installment will be payable on the sooner of the achievement of specified project development milestones or on January 7, 2020.

#### 9. Fair Value Disclosures

ASC 820, "Fair Value Measurements and Disclosures," defines fair value as the price that would be received for selling an asset or paid to transfer a liability in an orderly transaction between market participants at measurement date and requires assets and liabilities carried at fair value to be classified and disclosed in the following three categories:

- Level 1 – Quoted prices for identical instruments in active markets
- Level 2 – Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are inactive; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets at measurement date
- Level 3 – Valuations derived from techniques where one or more significant inputs or significant value drivers are unobservable in active markets at measurement date

#### Fair Value of Financial Instruments

The accompanying consolidated balance sheets include the following financial instruments: cash and cash equivalents, restricted cash, contracts and accounts receivable, due from affiliates, accounts payable, accrued expenses and other liabilities, notes payable and notes payable to affiliate.

The Company considers the carrying value of cash and cash equivalents, restricted cash, contracts and accounts receivable, accounts payable, and accrued expenses and other liabilities to approximate the fair value of these financial instruments based on the short duration between origination of the instruments and their expected realization. The fair value of amounts due from affiliates and notes payable to affiliate is not determinable due to the related party nature of such amounts. As of September 30, 2015 and December 31, 2014, the fair value of the Company's notes payable approximated the carrying value. The Company has determined that its notes payable are classified as Level 3 within the fair value hierarchy. Estimated fair values of the outstanding notes payable at September 30, 2015 and December 31, 2014 were based on cash flow models discounted at market interest rates that considered underlying risks of the debt.

#### Non-Recurring Fair Value Adjustments

Nonfinancial assets and liabilities include items such as inventory and long-lived assets that are measured at cost when acquired and adjusted for impairment to fair value, if deemed necessary. During the three and nine months ended September 30, 2015 and 2014, the Company did not record any fair value adjustments to those nonfinancial assets and liabilities remeasured at fair value on a nonrecurring basis.

#### 10. Commitments and Contingencies

The Company is a defendant in various lawsuits related to its normal course of business. We are also subject to local, state and federal laws and regulations related to land development activities, house construction standards, sales practices, employment practices and environmental protection. As a result, we are subject to periodic examinations or inquiry by agencies administering these laws and regulations.

We record a reserve for potential legal claims and regulatory matters when they are probable of occurring and a potential loss is reasonably estimable. We accrue for these matters based on facts and circumstances specific to each matter and revise these estimates when necessary.

In view of the inherent difficulty of predicting outcomes of legal claims and related contingencies, we generally cannot predict their ultimate resolution, related timing or eventual loss. If our evaluations indicate loss contingencies that could be material are not probable, but are reasonably possible, we will disclose their nature with an estimate of possible range of losses

THE NEW HOME COMPANY INC.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

or a statement that such loss is not reasonably estimable. As of September 30, 2015 and December 31, 2014, the Company did not have any accruals for asserted or unasserted matters.

As an owner and developer of real estate, the Company is subject to various environmental laws of federal, state and local governments. The Company is not aware of any environmental liability that could have a material adverse effect on its financial condition or results of operations. However, changes in applicable environmental laws and regulations, the uses and conditions of real estate in the vicinity of the Company's real estate and other environmental conditions of which the Company is unaware with respect to the real estate could result in future environmental liabilities.

We obtain surety bonds in the normal course of business to ensure completion of certain infrastructure improvements of our projects. As of September 30, 2015 and December 31, 2014, the Company had outstanding surety bonds totaling \$19.2 million and \$12.2 million, respectively. The beneficiaries of the bonds are various municipalities and other organizations. In the unlikely event that any such surety bond issued by a third party is called because the required improvements are not completed, the Company could be obligated to reimburse the issuer of the bond.

On May 6, 2015, the Company entered into a letter of credit facility agreement that allows the Company and certain affiliated unconsolidated joint ventures to issue up to \$5.0 million in letters of credit. The agreement includes an option to increase this amount to \$7.5 million, subject to certain conditions. As of September 30, 2015, the Company and its affiliated joint ventures had \$3.6 million in outstanding letters of credit issued under this facility.

#### 11. Related Party Transactions

During the three and nine months ended September 30, 2015 and 2014, the Company incurred construction-related costs on behalf of its unconsolidated joint ventures totaling \$2.8 million, \$8.6 million, \$1.9 million and \$5.6 million, respectively. As of September 30, 2015 and December 31, 2014, \$0.6 million and \$1.1 million, respectively, are included in due from affiliates in the accompanying condensed consolidated balance sheets.

The Company has entered into Management Agreements with its unconsolidated joint ventures to provide management services related to the underlying projects. Pursuant to the Management Agreements, the Company receives a management fee based on each project's revenues. During the three and nine months ended September 30, 2015 and 2014, the Company earned \$3.3 million, \$8.4 million, \$2.2 million and \$5.5 million, respectively, in management fees, which have been recorded as fee building revenue in the accompanying condensed consolidated statements of operations. As of September 30, 2015 and December 31, 2014, \$0.2 million and \$1.6 million, respectively, of management fees are included in due from affiliates in the accompanying condensed consolidated balance sheets.

The Company has provided credit enhancements in connection with joint venture borrowings in the form of loan-to-value ("LTV") maintenance guaranties in order to secure performance under the loans and maintain certain LTV ratios. The Company has also entered into agreements with its partners in each of the unconsolidated joint ventures whereby the Company and its partners are apportioned liability under the LTV maintenance guaranties according to their respective capital interest. In addition, the agreements provide the Company, to the extent its partner has an unpaid liability under such credit enhancements, the right to receive distributions from the unconsolidated joint venture that would otherwise be made to the partner. The loans underlying the guaranties comprise acquisition and development loans, construction revolvers and model loans, and the guaranties remain in force until the loans are satisfied. Due to the nature of the loans, the outstanding balance at any given time is subject to a number of factors including the status of site improvements, the mix of horizontal and vertical development underway, the timing of phase build outs, and the period necessary to complete the escrow process for homebuyers. As of September 30, 2015 and December 31, 2014, \$81.5 million and \$61.4 million, respectively, was outstanding under the loans and credit enhanced by the Company through LTV maintenance guaranties. Under the terms of the joint venture agreements, the Company's proportionate share of LTV maintenance agreement liabilities was 27.3% and 12.6%, respectively, as of

September 30, 2015 and December 31, 2014. In addition, the Company has provided completion guaranties regarding specific performance for certain projects whereby the Company is required to complete the given project with funds provided by the beneficiary of the guaranty. If there are not adequate funds available under the specific project loans, then the Company would be subject to financial liability under such completion guaranties. Typically, under such terms of the joint venture agreements, the Company has the right to apportion the respective share of any liabilities funded under such completion guaranties to its partners. In connection with providing the loan guaranties, the Company recognized no guaranty fee income during the three and nine months ended September 30, 2015, no guaranty fee income during the three months ended September 30, 2014, and \$18,927 in guaranty fee income during the nine months ended September 30, 2014 in the accompanying condensed consolidated statements of operations. Berchtold Capital Partners, an entity owned by Mr. Michael Berchtold, one of the Company's non-employee directors, served as an advisor to the Company, providing general advice and guidance in connection with the Company's IPO, as well as

THE NEW HOME COMPANY INC.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

assisting with the selection of the members of the Company's board of directors, the selection of and interacting with the Company's compensation consultant and advising the executives and board of managers regarding governance and compensation matters. The Company paid Berchtold Capital Partners \$562,500 for these services, including \$500,000 upon completion of our IPO. Amounts paid to Berchtold are included in offering expenses and were offset against the proceeds of our IPO.

As of September 30, 2015, the Company had investments in certain unconsolidated joint ventures totaling \$20.8 million. Certain members of the Company's board of directors are affiliated with entities that also had an investment in these joint ventures and are owners of more than 10% of the outstanding common stock of the Company.

TL Fab LP, an affiliate of Mr. Paul Heeschen, one of the Company's non-employee directors, was engaged by the Company and some of its unconsolidated joint ventures as a trade contractor to provide metal fabrication services. For the three and nine months ended September 30, 2015, the Company and its unconsolidated joint ventures incurred \$0.3 million and \$0.7 million, respectively, for these services. The Company and its unconsolidated joint ventures incurred \$0.4 million and \$0.8 million for these services for the three and nine months ended September 30, 2014, respectively. Of these costs, \$0.2 million and \$0.1 million was due to TL Fab LP at September 30, 2015 and December 31, 2014, respectively, and included in accounts payable in the accompanying balance sheet. These amounts were capitalized to real estate inventories by the Company and its unconsolidated joint ventures and will be included in cost of home sales at the time of home deliveries.

On June 26, 2015 ("Transition Date"), the Company entered into an agreement that transitioned Joseph Davis' role within the Company from Chief Investment Officer to a non-employee consultant to the Company. As of the Transition Date, Mr. Davis ceased being an employee of the Company and became an independent contractor performing consulting services. Per the agreement, Mr. Davis is expected to work approximately, but not more than, 40 consulting hours per month. For his services, he will be compensated \$10,000 per month for a term of one year from the Transition Date with the option to extend the agreement one year on each anniversary of the Transition Date, if mutually consented to by the parties. Either party may terminate the agreement at any time for any or no reason. Additionally, Mr. Davis' outstanding restricted stock units and stock option equity awards will continue to vest in accordance with their original terms. For the three and nine months ended September 30, 2015, the Company paid Mr. Davis \$40,000, excluding reimbursable expenses. Of these costs, no balance was due to Mr. Davis at September 30, 2015.

On June 29, 2015, the Company formed a new unconsolidated joint venture and received capital credit in excess of our contributed land basis. As a result, the Company recognized \$1.6 million in equity in net income of unconsolidated joint ventures and deferred \$0.4 million in profit from unconsolidated joint ventures related to this transaction.

## 12. Stock-Based Compensation

On August 18, 2010, the Company granted equity based units to certain members of management valued on the date of grant at \$1.9 million with a four year vesting period. Recipients of the equity based units have the right to receive certain distributions, if any, from the Company following return of capital to its equity members. The share based units vested upon completion of the IPO, and the remaining unrecognized compensation expense of \$316,667 was recognized during the first quarter of 2014, and is included in general and administrative expense in the accompanying consolidated statement of operations.

The 2014 Long-Term Incentive Plan ("2014 Incentive Plan"), was adopted by our board of directors in January 2014. The 2014 Incentive Plan provides for the grant of equity-based awards, including options to purchase shares of common stock, stock appreciation rights, restricted and unrestricted stock awards, restricted stock units and performance awards. The 2014 Incentive Plan will automatically expire on the tenth anniversary of its effective date. Our board of directors may terminate or amend the 2014 Incentive Plan at any time, subject to any requirement of

stockholder approval required by applicable law, rule or regulation and provided that the rights of a holder of an outstanding award may not be impaired without the consent of the holder.

The number of shares of our common stock that may be issued under the 2014 Incentive Plan is 1,644,875 shares. To the extent that shares of the Company's common stock subject to an outstanding option, stock appreciation right, stock award or performance award granted under the 2014 Incentive Plan or any predecessor plan are not issued or delivered by reason of the expiration, termination, cancellation or forfeiture of such award or the settlement of such award in cash, then such shares of common stock generally shall again be available under the 2014 Incentive Plan.

The Company has issued stock option and restricted stock unit awards under the 2014 Incentive Plan. The exercise price of stock-based awards may not be less than the market value of the Company's common stock on the date of grant. The fair value for stock options is established at the date of grant using the Black-Scholes model for time-based vesting awards. The Company's stock option and restricted stock awards typically vest over a one to three year period and expire ten years from the date of grant.

THE NEW HOME COMPANY INC.  
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

A summary of the Company's common stock option activity as of and for the nine months ended September 30, 2015 is presented below:

	Options Outstanding	
	Number of Shares	Weighted-Average Exercise Price per share
Options outstanding at December 31, 2014	846,874	\$ 11.00
Options granted	—	\$—
Options forfeited	—	\$—
Options outstanding at September 30, 2015	846,874	\$ 11.00
Options exercisable at September 30, 2015	24,717	\$ 11.00

A summary of the Company's restricted stock units as of and for the nine months ended September 30, 2015 is presented below:

	Restricted Stock Units Outstanding	
	Number of Shares	Weighted-Average Grant-Date Fair Value per Share
Balance outstanding at December 31, 2014	112,233	\$ 11.36
Restricted stock units granted	293,324	\$ 14.46
Restricted stock units vested	(85,386)	) \$ 11.48
Restricted stock units forfeited	(384)	) \$ 11.00
Balance outstanding at September 30, 2015	319,787	\$ 14.17

The expense related to the Company's stock-based compensation programs, included in general and administrative expense in the accompanying consolidated statements of operations, was as follows:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2015	2014	2015	2014
	(Dollars in thousands)			
Expense related to:				
Equity based incentive units	\$—	\$—	\$—	\$ 317
Stock options	301	319	911	854
Restricted stock units	941	240	1,814	636
	\$ 1,242	\$ 559	\$ 2,725	\$ 1,807

We used the "simplified method" to establish the expected term of the common stock options granted by the Company. Our restricted stock awards are valued based on the closing price of our common stock on the date of grant. At September 30, 2015, the amount of unearned stock-based compensation currently estimated to be expensed through 2018 related to unvested common stock options and restricted stock units is \$4.4 million, net of estimated forfeitures. The weighted-average period over which the unearned stock-based compensation is expected to be recognized is 1.4 years. If there are any modifications or cancellations of the underlying unvested awards, the Company may be required to accelerate, increase or cancel any remaining unearned stock-based compensation expense.

THE NEW HOME COMPANY INC.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

13. Income Taxes

The Company accounts for income taxes in accordance with ASC 740, which requires an asset and liability approach for measuring deferred taxes based on temporary differences between the financial statements and tax bases of assets and liabilities existing at each balance sheet date using enacted tax rates for the years in which taxes are expected to be paid or recovered.

For the three months ended September 30, 2015, the Company recorded a provision for taxes of \$2.2 million. For the three months ended September 30, 2014, the Company recorded a tax benefit of \$0.6 million due to the loss before taxes. The effective tax rate for the three months ended September 30, 2015 and 2014 differs from the 35% statutory tax rate, primarily due to the tax benefit of production activities and return to provision adjustments, partially offset by state income taxes.

For the nine months ended September 30, 2015, the Company recorded a provision for taxes of \$5.3 million. The effective tax rate for the nine months ended September 30, 2015 differs from the 35% statutory tax rate due to the tax benefit of production activities and return to provision adjustments, partially offset by state income taxes. The effective tax rate for the nine months ended September 30, 2014 differs from the 35% statutory tax rate due to the recognition of a tax benefit for the cumulative net deferred tax assets resulting from our conversion to a taxable entity. For the nine months ended September 30, 2014, the Company recorded a tax benefit of \$2.6 million primarily due to the differences between the financial statement basis and tax basis of certain assets upon conversion to a taxable entity at the time of our initial public offering, resulting in a net deferred tax asset. Additionally, the effective tax rate was reduced by the exclusion of pre-conversion earnings from taxable income for the three months ended March 31, 2014, and the tax benefit of production activities, partially offset by state income taxes.

As discussed in Note 1, for the first 30 calendar days of 2014, the Company was a Delaware LLC which was treated as partnership for income tax purposes and was subject to certain minimal taxes and fees; however, income taxes on taxable income or losses realized by the Company were the obligation of the members.

Each quarter we assess our deferred tax asset to determine whether all or any portion of the asset is more likely or not unrealizable under ASC 740. We are required to establish a valuation allowance for any portion of the asset we conclude is more likely or not unrealizable. Our assessment considers, among other things, the nature, frequency and severity of prior cumulative losses, forecasts of future taxable income, the duration of statutory carryforward periods, our utilization experience with operating loss and tax credit carryforwards and the planning alternatives, to the extent these items are applicable.

The Company classifies any interest and penalties related to income taxes assessed by jurisdiction as part of income tax expense. The Company has concluded that there were no significant uncertain tax positions requiring recognition in its financial statements, nor has the Company been assessed interest or penalties by any major tax jurisdictions related to any open tax periods.

14. Segment Information

The Company's operations are organized into two reportable segments: homebuilding and fee building. In accordance with ASC 280, in determining the most appropriate reportable segments, we considered similar economic and other characteristics, including product types, average selling prices, gross margins, production processes, suppliers, subcontractors, regulatory environments, land acquisition results, and underlying demand and supply.

The reportable segments follow the same accounting policies as our consolidated financial statements described in Note 1. Operational results of each reportable segment are not necessarily indicative of the results that would have been achieved had the reportable segment been an independent, stand-alone entity during the periods presented.

Financial information relating to reportable segments was as follows:

## THE NEW HOME COMPANY INC.

## NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

## 15. Pro Forma Net Loss and Loss per Share

The pro forma amounts reflect the income tax provision as if the Company was a taxable corporation as of the beginning of the period, and assume the Company filed a consolidated tax return for the periods presented.

For the three and nine months ended September 30, 2014, the pro forma tax provision assumes the Company's taxable income for the year would have included pretax income earned between January 1, 2014 and January 30, 2014, prior to the conversion to a taxable corporation. In addition, a net deferred income tax asset of \$1.4 million was recognized as a result of the conversion to a taxable entity during the first quarter of 2014. However, the pro forma results exclude the effect of the conversion adjustment because of its nonrecurring nature.

Basic and diluted earnings (loss) per share and pro forma basic and diluted loss per share give effect to the conversion of the Company's members' equity into common stock on January 30, 2014 as though the conversion had occurred as of the beginning of the reporting period or the original date of issuance, if later. See Note 2.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

CAUTIONARY NOTE CONCERNING FORWARD-LOOKING STATEMENTS

Various statements contained in this quarterly report on Form 10-Q, including those that express a belief, expectation or intention, as well as those that are not statements of historical fact, are forward-looking statements. These forward-looking statements may include projections and estimates concerning the timing and success of specific projects and our future production, revenues, income and capital spending. Our forward-looking statements are generally accompanied by words such as “estimate,” “project,” “predict,” “believe,” “expect,” “intend,” “anticipate,” “potential,” “goal” or other words that convey the uncertainty of future events or outcomes. The forward-looking statements in this report speak only as of the date of this report, and we disclaim any obligation to update these statements unless required by law, and we caution you not to rely on them unduly. We have based these forward-looking statements on our current expectations and assumptions about future events. While our management considers these expectations and assumptions to be reasonable, they are inherently subject to significant business, economic, competitive, regulatory and other risks, contingencies and uncertainties, most of which are difficult to predict and many of which are beyond our control. The following factors, among others, may cause our actual results, performance or achievements to differ materially from any future results, performance or achievements expressed or implied by these forward-looking statements:

- economic changes either nationally or in the markets in which we operate, including declines in employment, volatility of mortgage interest rates and inflation;
- continued or increased downturn in the homebuilding industry;
- continued volatility and uncertainty in the credit markets and broader financial markets;
- our future operating results, financial condition and liquidity;
- our business operations;
- changes in our business and investment strategy;
- availability of land to acquire and our ability to acquire such land on favorable terms or at all;
- availability, terms and deployment of capital;
- continued or increased disruption in the availability of mortgage financing or the number of foreclosures in the market;
- shortages of or increased prices for labor, land or raw materials used in housing construction;
- delays in land development or home construction resulting from adverse weather conditions or other events outside our control;
- issues concerning our joint venture partnerships;
- the cost and availability of insurance and surety bonds;
- changes in, or the failure or inability to comply with, governmental laws and regulations;
- the timing of receipt of regulatory approvals and the opening of projects;
- the degree and nature of our competition;
- our leverage and debt service obligations; and
- availability of qualified personnel and our ability to retain our key personnel.

Unless the context otherwise requires, the terms “we”, “us”, “our” and “the Company” refer to The New Home Company Inc. and its consolidated subsidiaries. The following discussion and analysis should be read in conjunction with our unaudited condensed consolidated financial statements and related notes thereto contained elsewhere in this report. The information contained in this quarterly report on Form 10-Q is not a complete description of our business or the risks associated with an investment in our securities. We urge you to carefully review and consider the various disclosures made by us in this report and in our other reports filed with the Securities and Exchange Commission (“SEC”), including our Annual Report on Form 10-K for the year ended December 31, 2014 and subsequent reports on

Form 10-Q and Form 8-K, which discuss our business in greater detail. The section entitled “Risk Factors” set forth in Item 1A of our Annual Report on Form 10-K, and similar disclosures in our other SEC filings, discuss some of the important risk factors that may affect our business, results of operations and financial condition. You should carefully consider those risks, in addition to the information in this report and in our other filings with the SEC, before deciding to invest in, or maintain your investment in, our common stock.

## Overview

During the 2015 third quarter, we continued executing our growth strategy by focusing on shifting a larger portion of our business to wholly-owned communities. Notably, as compared to three months ended September 30, 2014, total revenues increased by \$58.4 million to \$87.0 million, equity in net income from our joint ventures increased by \$4.0 million to \$4.1 million and our net income increased by \$5.5 million to \$4.4 million. In addition, we ended the quarter with 10 selling communities compared to four in the prior year period, and a backlog of \$211.6 million, compared to \$91.1 million as of September 30, 2014.

## Results of Operations

## Net New Home Orders and Backlog

	Three Months Ended		Increase/(Decrease)		Nine Months Ended		Increase/(Decrease)		
	September 30, 2015	September 30, 2014	Amount	%	September 30, 2015	September 30, 2014	Amount	%	
	(Dollars in thousands)								
Net new home orders	61	27	34	126	% 126	60	66	110	%
Monthly absorption rate	2.3	2.3	—	—	% 2.1	2.1	—	—	%
Cancellation rate	8	% 21	(13	)% (62	)% 6	% 13	(7	)% (54	)%
Average selling communities	8.8	4.0	4.8	120	% 6.4	3.2	3.2	100	%
Selling communities at end of period					10	4	6	150	%
Backlog (dollar value)					\$211,640	\$91,061	\$120,579	132	%
Backlog (homes)					96	42	54	129	%
Average sales price of backlog					\$2,205	\$2,168	\$37	2	%

Net new home orders for the three and nine months ended September 30, 2015 increased by 126% and 110%, respectively, compared to the same periods in 2014, primarily due to similar levels of increases in average selling communities. Our monthly sales absorption rate per community for the 2015 third quarter was 2.3 per month, flat with the prior year third quarter and up 21% as compared to 1.9 per month in the 2015 second quarter. Our monthly sales absorption rates for the nine month periods ended September 30, 2015 and 2014 were flat at 2.1 per month in both periods. Our cancellation rate for the 2015 third quarter was 8% versus 21% in the prior year period. The decrease in cancellation rate was due to a mix shift to higher-priced product, which generally experiences a lower cancellation rate than lower to moderate priced product.

Backlog reflects the number of homes, net of actual cancellations, for which we have entered into a sales contract with a customer, but for which we have not yet delivered the home. The number of homes in backlog as of September 30, 2015 compared to September 30, 2014 increased 129% as a result of increased net new home orders due to a higher average community count. As a result of the increase in net new orders, the dollar value of backlog as of September 30, 2015 increased \$120.6 million, or 132%, to \$211.6 million compared to the prior year period.

## Home Sales Revenue and New Homes Delivered

	Three Months Ended		Increase/(Decrease)		Nine Months Ended		Increase/(Decrease)		
	September 30, 2015	September 30, 2014	Amount	%	September 30, 2015	September 30, 2014	Amount	%	
	(Dollars in thousands)								
New homes delivered	30	10	20	200	% 71	33	38	115	%
Home sales revenue	\$57,878	\$8,197	\$49,681	606	% \$133,315	\$22,855	\$110,460	483	%
Average sales price of homes delivered	\$1,929	\$820	\$1,109	135	% \$1,878	\$693	\$1,185	171	%

New home deliveries increased by 200% and 115%, respectively, during the three and nine months ended September 30, 2015 compared to the same periods in 2014 primarily due to the increase in net new home orders. During the three and nine months ended September 30, 2015, home sales revenue increased 606% and 483%, respectively, compared to the same periods in 2014, primarily due to an increase in the number of homes delivered and an increase in average sales prices due to a shift to higher-priced product in coastal Southern California, and to a lesser extent, from the initial deliveries from our new Lafayette luxury condominium project in the Bay Area.

Homebuilding

Homebuilding gross margin percentage for the three and nine months ended September 30, 2015 decreased to 13.8% and 13.5%, respectively, as compared to 15.6% and 17.6%, respectively, for the same periods in 2014. The year-over-year declines in homebuilding gross margin percentage was due primarily to lower margins generated from two Sacramento close-out communities in 2015 that required higher incentives. Sequentially, the Company's 2015 third quarter homebuilding gross

margin percentage improved 340 basis points from the 2015 second quarter primarily due to a larger proportion of deliveries generated from its higher-priced Irvine and Lafayette communities.

Excluding interest in cost of home sales, adjusted homebuilding gross margin percentage for the three and nine months ended September 30, 2015 was 14.5% and 14.1%, respectively, compared to 16.4% and 18.1% for the same periods in 2014. See the table below reconciling this non-GAAP financial measure to homebuilding gross margin, the nearest GAAP equivalent.

	Three Months Ended September 30,				Nine Months Ended September 30,				
	2015	%	2014	%	2015	%	2014	%	
	(Dollars in thousands)								
Home sales revenue	\$57,878	100.0	% \$8,197	100.0	% \$133,315	100.0	% \$22,855	100.0	%
Cost of home sales	49,889	86.2	% 6,922	84.4	% 115,364	86.5	% 18,822	82.4	%
Homebuilding gross margin	7,989	13.8	% 1,275	15.6	% 17,951	13.5	% 4,033	17.6	%
Add: Interest in cost of home sales	396	0.7	% 65	0.8	% 876	0.6	% 118	0.5	%
Adjusted homebuilding gross margin(1)	\$8,385	14.5	% \$1,340	16.4	% \$18,827	14.1	% \$4,151	18.1	%

Adjusted homebuilding gross margin is a non-GAAP financial measure. We believe that by adding interest in cost of home sales back to homebuilding gross margin, investors are able to assess the performance of our (1) homebuilding business excluding our interest cost. We believe this information is meaningful as it isolates the impact that leverage has on homebuilding gross margin and permits investors to make better comparisons with our competitors who adjust gross margins in a similar fashion.

#### Fee Building

	Three Months Ended September 30,				Nine Months Ended September 30,				
	2015	%	2014	%	2015	%	2014	%	
	(Dollars in thousands)								
Fee building revenues	\$29,099	100.0	% \$20,408	100.0	% \$102,158	100.0	% \$53,817	100.0	%
Cost of fee building	27,028	92.9	% 19,389	95.0	% 96,014	94.0	% 51,864	96.4	%
Fee building gross margin	\$2,071	7.1	% \$1,019	5.0	% \$6,144	6.0	% \$1,953	3.6	%

Fee building revenues include (i) billings to independent third-party land owners for general contracting services and (ii) management fees from our unconsolidated joint ventures for construction management services. Cost of fee building includes (i) labor, subcontractor, and other indirect construction and development costs that are reimbursable by the land owner and (ii) general and administrative, or G&A, expenses that are attributable to fee building activities. Billings to land owners are a function of construction activity and reimbursable costs are incurred as homes are started. The total billings and reimbursable costs are driven by the pace at which the land owner has us execute its development plan. Management fees from our unconsolidated joint ventures are collected over the project's life and increase as homes and lots are delivered.

For the three months ended September 30, 2015, fee building revenues increased 43% year-over-year to \$29.1 million from \$20.4 million due to an increase in construction activity in fee building communities and higher joint venture management fees. Included in fee building revenues were (i) \$25.8 million and \$18.2 million of billings to land owners for the three months ended September 30, 2015 and 2014, respectively, and (ii) \$3.3 million and \$2.2 million of management fees from our unconsolidated joint ventures for the three months ended September 30, 2015 and 2014, respectively.

For the nine months ended September 30, 2015, fee building revenues increased 90% year-over-year to \$102.2 million from \$53.8 million due to an increase in construction activity in fee building communities and higher joint venture

management fees. Included in fee building revenues were (i) \$93.8 million and \$48.3 million of billings to land owners for the nine months ended September 30, 2015 and 2014, respectively, and (ii) \$8.4 million and \$5.5 million of management fees from our unconsolidated joint ventures for the nine months ended September 30, 2015 and 2014, respectively.

Our fee building revenues have historically been concentrated with a small number of customers. For the three and nine months ended September 30, 2015, one customer comprised 88% and 92% of fee building revenue, respectively. For the three and nine months ended September 30, 2014, one customer represented 89% and 85% of fee building revenue, respectively.

For the three months ended September 30, 2015, cost of fee building increased to \$27.0 million compared to \$19.4 million for the same period during 2014. The amount of G&A expenses included in cost of fee building were \$2.4 million and \$2.0 million for the three months ended September 30, 2015 and 2014, respectively. Fee building gross margin percentage increased to 7.1% from 5.0% for the three months ended September 30, 2015 and 2014, respectively, primarily due to the increase in management fees from our unconsolidated joint ventures.

For the nine months ended September 30, 2015, cost of fee building increased to \$96.0 million compared to \$51.9 million for the same period during 2014. The amount of G&A expenses included in cost of fee building were \$6.7 million and \$6.2 million for the nine months ended September 30, 2015 and 2014, respectively. Fee building gross margin percentage increased to 6.0% from 3.6% for the nine months ended September 30, 2015 and 2014, respectively, primarily due to the increase in management fees from our unconsolidated joint ventures.

#### Abandoned Project Costs

Pre-acquisition costs, which consist primarily of due diligence costs and deposits for specific projects, are expensed to abandoned project costs when we determine continuation of the prospective project is not probable. For the three months ended September 30, 2015 and 2014, abandoned project costs were \$0.1 million. For the nine months ended September 30, 2015, abandoned project costs increased to \$0.6 million from \$0.2 million for the nine months ended September 30, 2014. The increase in abandoned project costs consisted primarily of \$0.3 million of forfeited deposits during the second quarter of 2015 related to a lot option contract for a community in Sacramento.

#### Selling, General and Administrative Expenses

	Three Months Ended		As a Percentage of		Nine Months Ended		As a Percentage of			
	September 30, 2015	2014	2015	2014	September 30, 2015	2014	2015	2014		
	(Dollars in thousands)									
Selling and marketing expenses	\$2,294	\$971	4.0	% 11.8	% \$4,914	\$2,188	3.7	% 9.6	%	
General and administrative expenses ("G&A")	5,105	3,149	8.8	% 38.4	% 13,078	8,028	9.8	% 35.1	%	
Total selling, marketing and G&A ("SG&A")	\$7,399	\$4,120	12.8	% 50.2	% \$17,992	\$10,216	13.5	% 44.7	%	

Selling, general and administrative ("SG&A") expenses for the 2015 third quarter were \$7.4 million, compared to \$4.1 million in the prior year period. The increase in SG&A expenses resulted from higher selling and marketing expenses due to a 606% increase in home sales revenue and increased G&A related to higher personnel and professional fees to support our growth. As a percentage of home sales revenue, SG&A for the 2015 third quarter was 12.8% versus 50.2% in the prior year period and 13.5% for the nine months ended September 30, 2015 as compared to 44.7% for the year earlier period. The year-over-year improvements in the SG&A percentages for both periods was driven by stronger operating leverage from higher home sales revenue.

#### Equity in Net Income of Unconsolidated Joint Ventures

As of September 30, 2015 and 2014, we had ownership interests in 13 and 12, respectively, unconsolidated joint ventures. We own economic interests in our unconsolidated joint ventures, which include our capital interests that generally range from 5% to 50% plus, in each case, a share of the distributions from the unconsolidated joint ventures in excess of our capital interest. These economic interests vary among our joint ventures.

For the three months ended September 30, 2015, the unconsolidated joint ventures produced \$20.9 million in net income compared to \$2.4 million for the same period in 2014. Our equity in net income from unconsolidated joint ventures was \$4.1 million for the three months ended September 30, 2015, compared to equity in net income of \$0.1 million for the same period in 2014. The increase in our equity in net income from unconsolidated joint ventures for the three months ended September 30, 2015 was primarily due to an increase in total revenues and gross margin percentage, primarily from our highly successful luxury condominium community in Newport Beach.

For the nine months ended September 30, 2015, the unconsolidated joint ventures produced \$39.3 million in net income compared to \$7.6 million for the same period in 2014. Our equity in net income from unconsolidated joint ventures was \$9.2 million for the nine months ended September 30, 2015, compared to equity in net income of \$1.0 million for the same period in 2014. During the second quarter of 2015, we formed a new unconsolidated joint venture and received capital credit and a cash distribution in excess of the book value of our land basis. As a result, we recognized \$1.6 million in equity in net income of

unconsolidated joint ventures related to this transaction. This transaction, combined with the increase in total revenues and net income by our unconsolidated joint ventures, were the primary drivers of the increase in our equity in net income from unconsolidated joint ventures for the nine months ended September 30, 2015.

The following table sets forth supplemental operational and financial information about our unconsolidated joint ventures. Such information is not included in our financial data for GAAP purposes, but is recognized in our results as a component of equity in net income of unconsolidated joint ventures. This data is included for informational purposes only.

	Three Months Ended				Nine Months Ended			
	September 30,		Increase/(Decrease)		September 30,		Increase/(Decrease)	
	2015	2014	Amount	%	2015	2014	Amount	%
(Dollars in thousands)								
Unconsolidated Joint Ventures—Homebuilding								
Operational Data								
Net new home orders	57	79	(22 )	(28 )%	268	231	37	16 %
Monthly absorption rate	1.8	3.3	(1.5 )	(45 )%	3.1	3.3	(0.2 )	(6 )%
Cancellation rate	15 %	10 %	5 %	50 %	8 %	8 %	— %	— %
Average selling communities	10.5	8.3	2.2	27 %	9.5	7.7	1.8	23 %
New homes delivered	71	72	(1 )	(1 )%	170	146	24	16 %
Home sales revenue	\$106,485	\$35,720	\$70,765	198 %	\$200,325	\$88,166	\$112,159	127 %
Average sales price of homes delivered	\$1,500	\$496	\$1,004	202 %	\$1,178	\$604	\$574	95 %
Selling communities at end of period					11	10	1	10 %
Backlog (dollar value)					\$205,604	\$189,069	\$16,535	9 %
Backlog (homes)					173	147	26	18 %
Average sales price of backlog					\$1,188	\$1,286	\$(98 )	(8 )%

Net new home orders from unconsolidated joint ventures for the three months ended September 30, 2015 decreased 28% compared to the same period in 2014. The decline in orders was primarily due to a lower monthly sales absorption rate, which was impacted in part by fewer available lots to sell within the actively selling unconsolidated joint venture communities. Net new home orders from unconsolidated joint ventures for the nine months ended September 30, 2015 increased 16% compared to the same period in 2014, primarily due to an increase in the number of average selling communities. The monthly sales absorption rate from unconsolidated joint venture communities for the nine months ended September 30, 2015 was 3.1 compared to 3.3 for the same period in 2014. The number of homes in backlog from unconsolidated joint ventures as of September 30, 2015 increased 18% to 173 homes compared to September 30, 2014, primarily due to a 16% increase in net new home orders for the nine months ended September 30, 2015. The dollar value of backlog as of September 30, 2015 compared to September 30, 2014 increased 9% due to the increase in the number of homes in backlog partially offset by a slight reduction in average sales price of backlog. The average sales price of backlog decreased primarily due to a change in product mix.

Home sales revenue from unconsolidated joint ventures increased 198% during the three months ended September 30, 2015 compared to the same period in 2014, primarily due to the increase in the average sales price of homes delivered.

Home sales revenue from unconsolidated joint ventures increased 127% during the nine months ended September 30, 2015 compared to the same period in 2014, primarily due to a 16% increase in homes delivered and a 95% increase in its average selling price. The increase in new home deliveries from unconsolidated joint ventures for the nine months ended September 30, 2015 as compared to the same period in 2014 was primarily due to a higher beginning backlog to start 2015 compared to 2014, coupled with higher net new home order activity during 2015, which was driven by higher average community count during the period.

For the 2015 third quarter, unconsolidated joint venture homebuilding gross margin percentage was up 690 basis points to 24.8%. The improvement in our unconsolidated joint venture gross margins was largely due to a higher number of deliveries from our highly successful luxury condominium community in Newport Beach.

Excluding interest in cost of home sales, adjusted unconsolidated joint ventures homebuilding gross margin percentage for the three and nine months ended September 30, 2015 was 25.8% and 23.7%, respectively, compared to 19.1% and 22.3%

for the same periods in 2014. See the table below reconciling this non-GAAP financial measure to unconsolidated joint venture homebuilding gross margin, the nearest GAAP equivalent.

	Three Months Ended September 30,				Nine Months Ended September 30,				
	2015	%	2014	%	2015	%	2014	%	
(Dollars in thousands)									
Unconsolidated Joint Ventures—Homebuilding Gross Margin									
Unconsolidated joint ventures home sales revenue	\$ 106,485	100.0	% 35,720	100.0	% \$ 200,325	100.0	% \$ 88,166	100.0	%

Unconsolidated joint ventures homebuilding gross margin	26,408	24.8	% 6,394	17.9	% 44,797	22.4	% 18,676	21.2	%
Add: Interest in cost of unconsolidated joint venture home sales	1,091	1.0	% 443	1.2	% 2,654	1.3	% 1,008	1.1	%
Adjusted unconsolidated joint ventures homebuilding gross margin <sup>(1)</sup>	\$27,499	25.8	% \$6,837	19.1	% \$47,451	23.7	% \$19,684	22.3	%

Adjusted unconsolidated joint ventures homebuilding gross margin is a non-GAAP financial measure. We believe that by adding interest in cost of unconsolidated joint venture home sales back to unconsolidated joint ventures homebuilding gross margin, investors are able to assess the performance of our unconsolidated joint ventures <sup>(1)</sup>excluding interest cost. We believe this information is meaningful as it isolates the impact that leverage has on unconsolidated joint venture homebuilding gross margin and permits investors to make better comparisons with our competitors who adjust gross margins in a similar fashion.

	Three Months Ended				Nine Months Ended			
	September 30,		Increase/(Decrease)		September 30,		Increase/(Decrease)	
	2015	2014	Amount	%	2015	2014	Amount	%
(Dollars in thousands)								
Unconsolidated Joint Ventures—Land Operational Data								
Land sales revenue	\$8,885	\$—	\$8,885	—	\$54,455	\$—	\$54,455	—
Backlog (dollar value) <sup>(1)</sup>					\$51,662	\$—	\$51,662	—

<sup>(1)</sup> Amounts include \$18.1 million of backlog dollar value related to purchase contracts between an unconsolidated joint venture and the Company.

Land sales for the three and nine months ended September 30, 2015 represented residential lot sales to merchant homebuilders from our unconsolidated joint ventures in Davis and Foster City, California. No land sales occurred during the three and nine months ended September 30, 2014.

Excluding interest in cost of land sales, adjusted unconsolidated joint ventures land gross margin percentage for the three and nine months ended September 30, 2015 was 14.9% and 24.0%, respectively, compared to none for the same period in 2014. See the table below reconciling this non-GAAP financial measure to unconsolidated joint venture land gross margin, the nearest GAAP equivalent.

Adjusted unconsolidated joint ventures land gross margin is a non-GAAP financial measure. We believe that by adding interest in cost of unconsolidated joint venture land sales back to unconsolidated joint ventures land gross margin, investors are able to assess the performance of our unconsolidated joint ventures excluding interest cost. <sup>(1)</sup> We believe this information is meaningful as it isolates the impact that leverage has on unconsolidated joint venture land gross margin and permits investors to make better comparisons with our competitors who adjust gross margins in a similar fashion.

The table below summarizes lots owned and controlled by our unconsolidated joint ventures as of the dates presented:

	September 30,		Increase/(Decrease)	
	2015	2014	Amount	%
Unconsolidated Joint Ventures - Lots Owned and Controlled				
Homebuilding				
Lots owned	776	1,884	(1,108	) (59 )%
Lots controlled <sup>(1)</sup>	68	—	68	NA
Homebuilding Total	844	1,884	(1,040	) (55 )%
Land Development				
Lots owned	2,420	547	1,873	342 %
Lots controlled <sup>(1)</sup>	235	1,869	(1,634	) (87 )%
Land Development Total	2,655	2,416	239	10 %
Total	3,499	4,300	(801	) (19 )%

<sup>(1)</sup> Consists of lots that are under purchase and sale agreements.

(Provision) Benefit for Taxes

For the three months ended September 30, 2015, we recorded a provision for taxes of \$2.2 million. For the three months ended September 30, 2014, we recorded a tax benefit of \$0.6 million due to the loss before taxes. The effective tax rate for the three months ended September 30, 2015 and 2014 differs from the 35% statutory tax rate, primarily due to the tax benefit of production activities and return to provision adjustments, partially offset by state income taxes.

For the nine months ended September 30, 2015, we recorded a provision for taxes of \$5.3 million. The effective tax rate for the nine months ended September 30, 2015 differs from the 35% statutory tax rate due to the tax benefit of production activities and return to provision adjustments, partially offset by state income taxes. The effective tax rate for the nine months ended September 30, 2014 differs from the 35% statutory tax rate due to the recognition of a tax benefit for the cumulative net deferred tax assets resulting from our conversion to a taxable entity. For the nine months ended September 30, 2014, we recorded a tax benefit of \$2.6 million primarily due to the differences between the financial statement basis and tax basis of

certain assets upon conversion to a taxable entity at the time of our initial public offering, resulting in a net deferred tax asset. Additionally, the effective tax rate was reduced by the exclusion of pre-conversion earnings from taxable income for the three months ended March 31, 2014, and the tax benefit of production activities, partially offset by state income taxes.

Lots Owned and Controlled

	September 30,		Increase/(Decrease)		
	2015	2014	Amount	%	
Lots Owned					
Southern California	135	107	28	26	%
Northern California	292	244	48	20	%
Total	427	351	76	22	%
Lots Controlled <sup>(1)</sup>					
Southern California	569	622	(53	) (9	)%
Northern California	80	90	(10	) (11	)%
Fee Building Projects <sup>(2)</sup>	1,498	1,161	337	29	%
Total	2,147	1,873	274	15	%
Total Lots Owned and Controlled	2,574	2,224	350	16	%

Includes lots that we control under purchase and sale agreements or under executed non-binding letters of intent (1) that are subject to customary conditions and have not yet closed. There can be no assurance that such acquisitions will occur.

(2) Subject to agreements with property owners.

## Liquidity and Capital Resources

### Overview

Our principal uses of capital for the nine months ended September 30, 2015 were land purchases, land development, home construction, operating expenses and the payment of routine liabilities. Our principal sources of capital for the nine months ended September 30, 2015 were advances from our unsecured credit facility, distributions from our unconsolidated joint ventures and cash generated from home sales activities. As of September 30, 2015, our unrestricted cash balance was \$35.4 million and we had \$21.4 million in available loan commitments.

Cash flows for each of our communities depend on their stage in the development cycle, and can differ substantially from reported earnings. Early stages of development or expansion require significant cash outlays for land acquisitions, entitlements and other approvals, and construction of model homes, roads, utilities, general landscaping and other amenities. Because these costs are a component of our real estate inventories and not recognized in our consolidated statement of operations until a home is delivered, we incur significant cash outlays prior to our recognition of earnings. In the later stages of community development, cash inflows may significantly exceed earnings reported for financial statement purposes, as the cash outflow associated with home and land construction was previously incurred. From a liquidity standpoint, we and our unconsolidated joint ventures are actively acquiring and developing lots to increase our lot supply and community count. As we continue to expand our business, we expect cash outlays for land purchases and land development to exceed our cash generated by operations.

We exercise strict controls and believe we have a prudent strategy for companywide cash management, including those related to cash outlays for land and inventory acquisition, development and investments in unconsolidated joint ventures. We ended the third quarter of 2015 with \$35.4 million of cash and cash equivalents, an \$8.7 million decrease from December 31, 2014, primarily as a result of the growth in our community count and increased investment in real estate inventories of \$104.8 million, which was partially offset by net income of \$9.5 million, net borrowings of \$57.9 million, and net distributions of equity from our unconsolidated joint ventures of \$17.7 million. We intend to generate cash from the sale of our inventory, but we intend to redeploy the net cash generated from the sale of inventory to acquire and develop strategic, well-positioned lots that represent opportunities to generate future income and cash flows.

As of September 30, 2015 and December 31, 2014, we had \$9.9 million and \$11.9 million, respectively, in accounts payable that related to costs incurred under our fee building agreements. Funding to pay these amounts is the obligation of the independent third-party land owner, which is generally funded on a monthly basis. Similarly, contracts and accounts receivable as of the same dates included \$10.6 million and \$13.2 million, respectively, related to the payment of the above payables.

We intend to utilize both debt and equity as part of our ongoing financing strategy, coupled with redeployment of cash flows from continuing operations, to provide us with the financial flexibility to operate our business. In that regard, we expect to employ prudent levels of leverage to finance the acquisition and development of our lots and construction of our homes. As of September 30, 2015, we had \$190.9 million of aggregate loan commitments, of which \$169.4 million was outstanding. We will consider a number of factors when evaluating our level of indebtedness and when making decisions regarding the incurrence of new indebtedness, including the purchase price of assets to be acquired with debt financing, the estimated market value of our assets and the ability of particular assets, and our company as a whole, to generate cash flow to cover the expected debt service. As a means of sustaining our long-term financial health and limiting our exposure to unforeseen dislocations in the debt and capital markets, we currently expect to remain conservatively capitalized. In addition, our revolving credit facility contains certain financial covenants that limit the amount of leverage we can maintain. However, our certificate of incorporation does not contain a limitation on the amount of debt we may incur and our board of directors may change our target debt levels at any time without the approval of our stockholders.

We intend to finance future acquisitions and developments with what we believe to be the most advantageous source of capital available to us at the time of the transaction, which may include a combination of common and preferred equity, secured and unsecured corporate level debt, property-level debt and mortgage financing and other public, private or bank debt.

### Land Acquisition Notes

During 2012, we entered into a term loan with a land seller, secured by real estate, which bears interest at 7.0% per annum. The total available commitment under the note is \$7.0 million all of which had been funded as of September 30, 2015. The note matures on the earlier of 10 days following entitlement approval or February 15, 2016, and requires certain mandatory pay downs totaling \$1.0 million based on the occurrence of certain project-related events. Interest is payable monthly and the remaining principal is due at maturity.

In January 2015, we entered into two notes, secured by real estate, with one of its unconsolidated joint ventures for a total of \$0.7 million related to the purchase of finished lots. There is no stated interest rate associated with the notes. Repayment of the notes shall be made in three equal installments. In April, we paid the first and second installments on both notes for a total

pay down of \$0.5 million. The third installment will be payable on the sooner of specified project development milestones or on January 7, 2020.

#### Secured Revolving Construction Notes

In May 2014, we entered into two secured revolving construction loans with a bank related to model and production homes for a specific project. The loans are secured by real estate and bear interest at the bank's prime rate plus 2.0%, or 5.25% as of September 30, 2015. The total commitment under the construction loans is \$8.6 million, with funding and repayment requirements based on the project development and sales cycle. As of September 30, 2015, we had \$6.4 million available to borrow under the revolving construction loans subject to certain funding criteria. The loans mature on November 27, 2016. Interest is payable monthly, with all unpaid principal and interest due at maturity.

#### Senior Unsecured Revolving Credit Facility

As of September 30, 2015, we were party to a senior unsecured revolving credit facility ("Credit Facility") which has a maximum commitment of \$175.0 million and matures on April 30, 2018. We may borrow under the Credit Facility in the ordinary course of business for general corporate purposes. Interest on the Credit Facility is paid monthly at a rate of the one-month LIBOR plus a margin ranging from 2.25% to 3.00% depending on our leverage ratio (as defined in the Credit Facility) as calculated at the end of each fiscal quarter. As of September 30, 2015, the outstanding principal balance was \$159.9 million, the interest rate was 2.94% per annum, and we had \$15.1 million of availability under the Credit Facility.

Under our Credit Facility, we are required to comply with certain financial covenants, including but not limited to those set forth in the table below, and as described and defined further in the Credit Facility:

Financial Covenant	Actual at September 30, 2015	Covenant Requirement at September 30, 2015
	(Dollars in thousands)	
Unencumbered Liquid Assets	\$35,373	\$7,000
EBITDA to Interest Incurred	11.6 : 1.0	> 1.5 : 1.0
Tangible Net Worth	\$159,235	\$127,447
Leverage Ratio	47	% < 65%
Adjusted Leverage Ratio	29	% < 50%

As of September 30, 2015 and December 31, 2014, we were in compliance with all financial covenants.

## Debt-to-Capital Ratios

We believe that debt-to-capital ratios provide useful information to the users of our financial statements regarding our financial position and leverage. The ratio of debt-to-capital and the ratio of net debt-to-capital are calculated as follows:

	September 30, 2015		December 31, 2014	
	(Dollars in thousands)			
Notes payable, including notes payable to affiliate	\$ 169,423		\$ 113,751	
Equity, exclusive of non-controlling interest	160,023		148,084	
Total capital	\$ 329,446		\$ 261,835	
Ratio of debt-to-capital <sup>(1)</sup>	51.4	%	43.4	%
Notes payable, including notes payable to affiliate	\$ 169,423		\$ 113,751	
Less: cash, cash equivalents and restricted cash	35,510		44,340	
Net debt	133,913		69,411	
Equity, exclusive of non-controlling interest	160,023		148,084	
Total capital	\$ 293,936		\$ 217,495	
Ratio of net debt-to-capital <sup>(2)</sup>	45.6	%	31.9	%

(1) The ratio of debt-to-capital is computed as the quotient obtained by dividing notes payable by the sum of total notes payable plus equity, exclusive of noncontrolling interest.

The ratio of net debt-to-capital is computed as the quotient obtained by dividing net debt (which is notes payable less cash to the extent necessary to reduce the debt balance to zero) by total capital, exclusive of noncontrolling interest. The most directly comparable GAAP financial measure is the ratio of debt-to-capital. We believe the ratio of net debt-to-capital is a relevant financial measure for investors to understand the leverage employed in our operations and as an indicator of our ability to obtain financing. We believe that by deducting our cash from our

(2) notes payable, we provide a measure of our indebtedness that takes into account our cash liquidity. We believe this provides useful information as the ratio of debt-to-capital does not take into account our liquidity and we believe that the ratio net of cash provides supplemental information by which our financial position may be considered.

Investors may also find this to be helpful when comparing our leverage to the leverage of our competitors that present similar information. See the table above reconciling this non-GAAP financial measure to the ratio of debt-to-capital.

## Cash Flows — Nine Months Ended September 30, 2015 Compared to Nine Months Ended September 30, 2014

For the nine months ended September 30, 2015 as compared to the nine months ended September 30, 2014, the comparison of cash flows is as follows:

Net cash used in operating activities was \$83.0 million in the nine months ended September 30, 2015 versus \$62.4 million in the nine months ended September 30, 2014. The change was primarily a result of an increase in cash outflows for real estate inventories of \$104.8 million in the 2015 period compared to \$65.1 million in the nine months ended September 30, 2014. The increase in investment related to a higher community count and more homes under construction was partially offset by an increase in net income.

Net cash provided by investing activities was \$17.4 million in the nine months ended September 30, 2015 compared to net cash used in investing activities of \$22.4 million in the nine months ended September 30, 2014. During the nine months ended September 30, 2015, our net distributions from unconsolidated joint ventures increased to \$17.7 million compared to net contributions of \$21.6 million during the nine months ended September 30, 2014 and was the primary reason net cash provided by investing activities increased.

Net cash provided by financing activities was \$56.9 million in the nine months ended September 30, 2015 versus \$135.2 million in the nine months ended September 30, 2014. The change was primarily a result of the receipt of proceeds of our IPO of \$75.8 million, net of the underwriting discount and offering expenses in the 2014 period.

## Off-Balance Sheet Arrangements and Contractual Obligations

In the ordinary course of business, we enter into land option contracts in order to procure lots for the construction of our homes. We are subject to customary obligations associated with entering into contracts for the purchase of land and improved lots. These purchase contracts typically require a cash deposit and the purchase of properties under these contracts is generally contingent upon satisfaction of certain requirements by the sellers, including obtaining applicable property and development entitlements. We also utilize option contracts with land sellers as a method of acquiring land in staged takedowns, to help us manage the financial and market risk associated with land holdings, and to reduce the use of funds from our corporate financing sources, and to enhance our return on equity. Option contracts generally require a non-refundable deposit for the right to acquire lots over a specified period of time at pre-determined prices. We generally have the right at our discretion to terminate our obligations under both purchase contracts and option contracts by forfeiting our cash deposit with no further financial responsibility to the land seller. As of September 30, 2015, we had \$6.1 million of non-refundable cash deposits and \$0.4 million of refundable cash deposits pertaining to land option contracts and purchase contracts with an estimated aggregate remaining purchase price of \$393.2 million (net of deposits).

Our utilization of land option contracts is dependent on, among other things, the availability of land sellers willing to enter into option arrangements, the availability of capital to financial intermediaries to finance the development of optioned lots, general housing market conditions, and local market dynamics. Options may be more difficult to procure from land sellers in strong housing markets and are more prevalent in certain geographic regions.

We have provided credit enhancements in connection with joint venture borrowings in the form of loan-to-value ("LTV") maintenance guaranties in order to secure performance under the loans and maintain certain LTV ratios. We have also entered into agreements with our partners in each of the unconsolidated joint ventures whereby we and our partners are apportioned liability under the LTV maintenance guaranties according to their respective capital interest. In addition, the agreements provide us, to the extent our partner has an unpaid liability under such credit enhancements, the right to receive distributions from the unconsolidated joint venture that would otherwise be made to the partner. The loans underlying the guaranties comprise acquisition and development loans, construction revolvers and model loans, and the guaranties remain in force until the loans are satisfied. Due to the nature of the loans, the outstanding balance at any given time is subject to a number of factors including the status of site improvements, the mix of horizontal and vertical development underway, the timing of phase build outs, and the period necessary to complete the escrow process for homebuyers. As of September 30, 2015 and December 31, 2014, \$81.5 million and \$61.4 million, respectively, was outstanding under the loans and credit enhanced by us through LTV maintenance guaranties. Under the terms of the joint venture agreements, our proportionate share of LTV maintenance agreement liabilities was 27.3% and 12.6%, respectively, as of September 30, 2015 and December 31, 2014. In addition, we have provided completion guaranties regarding specific performance for certain projects whereby we are required to complete the given project with funds provided by the beneficiary of the guaranty. If there are not adequate funds available under the specific project loans, then we would be subject to financial liability under such completion guaranties. Typically, under such terms of our joint venture agreements, we have the right to apportion the respective share of any liabilities funded under such completion guaranties to our partners.

## Off-Balance Sheet Arrangements

As of September 30, 2015, we held membership interests in 13 unconsolidated joint ventures, nine of which related to homebuilding activities and four of which related to land development as noted below. We were a party to six loan-to-value maintenance agreements related to unconsolidated joint ventures as of September 30, 2015. The following table reflects certain financial and other information related to our unconsolidated joint ventures as of September 30, 2015:

Joint Venture (Project Name)	Year Formed	Location	September 30, 2015 Total Joint Venture			Debt-to-Total Capitalization	Loan-to- Value Maintenance Agreement	Estimated Future Capital Commitment <sup>(2)</sup>

TNHC Tidelands LLC (Tidelands)	2015	San Mateo, CA	\$30,828	\$6,878	\$21,303	24	% Yes	\$ —
Total Unconsolidated Joint Ventures			\$530,834	\$103,654	\$367,127	22	%	\$16,700

Scheduled maturities of the unconsolidated joint venture debt as of September 30, 2015 are as follows: \$0 matures (1) in 2015, \$29.0 million matures in 2016, \$73.9 million matures in 2017, \$0 matures in 2018 and \$0.8 million matures in 2019.

(2) Estimated future capital commitment represents our proportionate share of estimated future contributions to the respective unconsolidated joint ventures as of September 30, 2015. Actual contributions may differ materially.

(3) Certain members of the Company's board of directors are affiliated with entities that have an investment in these joint ventures.

(4) The debt associated with this joint venture consists of a land seller note.

(5) Land development joint ventures.

As of September 30, 2015, the unconsolidated joint ventures were in compliance with their respective loan covenants, where applicable, and we were not required to make any loan-to-value maintenance related payments during the three and nine months ended September 30, 2015.

## Inflation

Our homebuilding and fee building segments can be adversely impacted by inflation, primarily from higher land, financing, labor, material and construction costs. In addition, inflation can lead to higher mortgage rates, which can significantly affect the affordability of mortgage financing to homebuyers. While we attempt to pass on cost increases to customers through increased prices, when weak housing market conditions exist, we are often unable to offset cost increases with higher selling prices.

## Seasonality

Historically, the homebuilding industry experiences seasonal fluctuations in quarterly operating results and capital requirements. We typically experience the highest new home order activity in spring and summer, although this activity is also highly dependent on the number of active selling communities, timing of new community openings and other market factors. Since it typically takes four to six months to construct a new home, we deliver more homes in the second half of the year as spring and summer home orders convert to home deliveries. Because of this seasonality, home starts, construction costs and related cash outflows have historically been highest in the second and third quarters, and the majority of cash receipts from home deliveries occur during the second half of the year. We expect this seasonal pattern to continue over the long-term, although it may be affected by volatility in the homebuilding industry.

## Description of Projects and Communities under Development

Our homebuilding projects usually take approximately 24 to 48 months to complete from the initiation of homebuilding activity. Our land projects usually take approximately 24 to 48 months to complete from the acquisition of land. The following table presents project information relating to each of our markets as of September 30, 2015.

Project, City	Year of First Delivery <sup>(1)</sup>	Total Number of Homes or Lots to Be Built at Completion <sup>(2)</sup>	Cumulative Homes or Lots Delivered as of September 30, 2015	Lots as of September 30, 2015 <sup>(3)</sup>	Backlog at September 30, 2015 <sup>(4)</sup>	Homes or Lots delivered for the nine months ended September 30, 2015	Sales Range (in 000's) <sup>(5)</sup>

Fee Building Projects Total		2,258	760	1,498		461	

(1) Year of first delivery for future periods is based upon management's estimates and is subject to change.

(2) The number of homes or lots to be built at completion is subject to change, and there can be no assurance that we will build these homes or develop these lots.

(3) Consists of owned lots, fee building lots and unconsolidated joint venture lots as of September 30, 2015, including owned lots, fee building lots and unconsolidated joint venture lots in backlog as of September 30, 2015. Of the foregoing lots, there were 11 completed and unsold homes other than those being used as model homes.

Backlog consists of homes or lots under sales contracts that have not closed as of September 30, 2015.

(4) There can be no assurance that delivery of sold homes or lots will occur. Backlog has not been reduced to reflect our historical cancellation rate. Backlog for fee building projects is not included as we are not responsible for sales activities related to those projects.

(5) Sales range reflects estimated total price for homes in the respective project. The actual prices at which our homes are sold in the future may differ. Sales price range is not included for fee building projects where we are not responsible for sales activities.

(6) We own economic interests in our unconsolidated joint ventures, which include our capital interests that generally range from 5% to 50% plus, in each case, a share of the distributions from the joint ventures in excess of our capital interest. These economic interests vary among our different joint ventures.

(7) This project has below-market homes. The sales price range for these homes is excluded from the table.

(8) This project is anticipated to be a lot sale program, in which we may buy lots from the unconsolidated joint venture or sell lots to merchant builders. As such, a sales range is not presented.

(9) Cannery backlog includes lots sold to the Company.

**Critical Accounting Policies**

See Note 1 to the accompanying notes to unaudited condensed consolidated financial statements included in this Quarterly Report on Form 10-Q.

**Recently Issued Accounting Standards**

See Note 1 to the accompanying notes to unaudited condensed consolidated financial statements included in this Quarterly Report on Form 10-Q.

**Item 3. Quantitative and Qualitative Disclosures About Market Risk**

Information about our market risk is disclosed in Part II, Item 7A, of our Annual Report on Form 10-K for the fiscal year ended December 31, 2014, and is incorporated herein by reference. There have been no material changes during the nine months ended September 30, 2015, to the information provided in Part II, Item 7A, of our Annual Report on Form 10-K for the fiscal year ended December 31, 2014.

**Item 4. Controls and Procedures**

Our management, under the supervision and with the participation of our chief executive officer and chief financial officer, has reviewed and evaluated the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Securities Exchange Act Rules 13a-15(e) and 15d-15(e), as of the end of the period covered by this Form 10-Q (the "Evaluation Date"). Based on such evaluation, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level as of the Evaluation Date. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

Our management determined that as of September 30, 2015, there were no changes in our internal control over financial reporting that occurred during the fiscal quarter then ended that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

For more information regarding how we account for legal proceedings, see Note 10, "Commitments and Contingencies," to our consolidated financial statements included elsewhere in this report, which is incorporated herein by reference.

Item 1A. Risk Factors

There have been no material changes to the risk factors disclosed under Part I, Item 1A "Risk Factors" in the Company's Annual Report on Form 10-K for the year ended December 31, 2014.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Purchases of Equity Securities by the Issuer

The Company did not make any purchases of its common stock during the nine months ended September 30, 2015.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

None.

Item 6. Exhibits
