Cautionary Note Regarding Forward-Looking Information

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Any statements about our expectations, beliefs, plans, predictions, forecasts, objectives, assumptions, or future events or performance are not historical facts and may be forward-looking. These statements are often, but not always, made through the use of words or phrases such as “anticipates,” “believes,” “can,” “could,” “may,” “predicts,” “potential,” “should,” “will,” “estimate,” “plans,” “projects,” “continuing,” “ongoing,” “expects,” “similar words or phrases. Although we believe that the expectations reflected in these forward-looking statements are reasonable, these statements are not guarantees of future performance and involve risks and uncertainties which are subject to change based on various important factors, some of which are beyond our control. For more information regarding these risks and uncertainties as well as certain additional risks that we face, refer to the Risk Factors detailed in Item 1A of Part I of our Annual Report on Form 10-K for the year ended December 31, 2013, as supplemented by the risks discussed below in this report in Part II, Item 1A, “Risk Factors,” as well as factors more fully described in Part I, Item 2, “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and elsewhere in this report, including the exhibits hereto, and subsequent reports and registration statements filed from time to time with the U.S. Securities and Exchange Commission. Among the factors that could cause our financial performance to differ materially from that suggested by the forward-looking statements are:

- we operate in a highly regulated industry and continually changing federal, state, and local laws and regulations could materially adversely affect our business;
- adverse economic conditions in the United States and worldwide may negatively impact our results;
- our business could suffer if our access to funding is reduced;
- we face significant risks implementing our growth strategy, some of which are outside our control;
- our agreement with Chrysler Group LLC (“Chrysler”) may not result in currently anticipated levels of growth and is subject to certain performance conditions that could result in termination of the agreement;
- our business could suffer if we are unsuccessful in developing and maintaining relationships with automobile dealerships;
- our financial condition, liquidity, and results of operations depend on the credit performance of our loans;
- loss of our key management or other personnel, or an inability to attract such management and personnel, could negatively impact our business;
- we are subject to certain bank regulations, including oversight by the Office of the Comptroller of the Currency (the “OCC”), the Consumer Financial Protection Bureau (“CFPB”), the Bank of Spain, and the Federal Reserve, which oversight and regulation may limit certain of our activities, including the timing and amount of dividends and other limitations on our business; and
- future changes in our relationship with Banco Santander, S.A. (“Santander”) could adversely affect our operations.

If one or more of the factors affecting our forward-looking information and statements proves incorrect, its actual results, performance or achievements could differ materially from those expressed in, or implied by, forward-looking information and statements. Therefore, we caution not to place undue reliance on any forward-looking information or statements. The effect of these factors is difficult to predict. Factors other than these also could adversely affect our results, and the reader should not consider these factors to be a complete set of all potential risks or uncertainties. New factors emerge from time to time, and management cannot assess the impact of any such factor on our business or the extent to which any factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statement. Any forward-looking statements only speak as of the date of this document, and we undertake no obligation to update any forward-looking information or statements, whether written or oral, to reflect any change, except as required by law. All forward-looking statements attributable to us are expressly qualified by these cautionary statements.

SANTANDER CONSUMER USA HOLDINGS INC. AND SUBSIDIARIES
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except per share amounts)
(Unaudited)

1. Description of Business, Basis of Presentation, and Significant Accounting Policies and Practices

Santander Consumer USA Holdings Inc., a Delaware Corporation (“SCUSA Delaware” or, together with its subsidiaries, “SCUSA” or “the Company”), is the holding company for Santander Consumer USA Inc., an Illinois corporation (“SCUSA Illinois”), and subsidiaries, a specialized consumer finance company focused on vehicle finance and unsecured consumer lending products. The Company’s primary business is the indirect origination of retail installment contracts principally through manufacturer-franchised dealers in connection with their sale of new and used vehicles to retail consumers.

In conjunction with a ten-year private label financing agreement with Chrysler Group (the “Chrysler Agreement”) that became effective May 1, 2013, the Company offers a full spectrum of auto financing products and services to Chrysler customers and dealers under the Chrysler Capital brand. These products and services include consumer retail installment contracts and leases, as well as dealer loans for inventory, construction, real estate, working capital and revolving lines of credit.

The Company also originates vehicle loans through a web-based direct lending program, purchases vehicle retail installment contracts from other lenders, and services automobile and recreational and marine vehicle portfolios for other lenders. Additionally, the Company has several relationships through which it provides unsecured consumer loans, private label credit cards and other consumer finance products.

The Company is owned approximately 60.5% by Santander Holdings USA, Inc. (“SHUSA”), a subsidiary of Banco Santander, S.A. (“Santander”), approximately 28.2% by public shareholders, approximately 10.0% by DDFS LLC, an entity affiliated with Thomas G. Dundon, the Company’s Chairman and Chief Executive Officer (“CEO”), approximately 1.2% by Sponsor Auto Finance Holdings Series LP (“Auto Finance Holdings”) and approximately 0.1% by other holders, primarily members of senior management.

On August 14, 2014, the Company filed a shelf registration statement on Form S-1 with the Securities and Exchange Commission (“the Commission”) to register up to 14,178,779 shares of its common stock owned by Auto Finance Holdings. On August 22, 2014, the Commission declared the registration statement effective. On September 8, 2014, J.P. Morgan, acting as sole bookrunner for the offering, purchased 10,047,954 shares, or 2.88% of the Company's outstanding common stock, from Auto Finance Holdings for \$18.65 per share. As a result of the sale, Auto Finance Holdings' ownership in the Company declined from approximately 4.1% to approximately 1.2% of the Company's outstanding common stock. Auto Finance Holdings received all of the net proceeds from the sale of such shares.

Basis of Presentation

The accompanying condensed consolidated financial statements include the accounts of the Company and its subsidiaries, including certain special purpose financing trusts utilized in financing transactions (“Trusts”), which are considered variable interest entities (“VIEs”). The Company consolidates other VIEs for which it was deemed the primary beneficiary. All intercompany balances and transactions have been eliminated in consolidation.

The accompanying condensed consolidated financial statements as of September 30, 2014 and December 31, 2013, and for the three and nine months ended September 30, 2014 and 2013, have been prepared in accordance with United States generally accepted accounting principles (“U.S. GAAP”) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, these financial statements contain all adjustments, consisting of normal recurring accruals, necessary to present fairly the financial position, results of operations and cash flows for the periods indicated. Results of operations for the periods presented herein are not necessarily indicative of results of operations for the entire year. These financial statements should be read in conjunction with the Company’s Annual Report on Form 10-K for the year ended December 31, 2013, filed on March 6, 2014. Certain prior year amounts have been reclassified to conform

to current year presentation; specifically, capital leases are now reportedly separately from other assets in the condensed consolidated balance sheets and disclosed in corresponding footnotes (see Notes 3 and 4), manufacturer incentives received are now reported separately from retail installment contract originations in the condensed

8

consolidated statements of cash flows, and cash flows on unsecured notes payable are now reflected separately from cash flows on notes payable in the condensed consolidated statements of cash flows.

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosures of contingent assets and liabilities as of the date of the financial statements and the amount of revenue and expenses during the reporting periods. Actual results could differ from those estimates and those differences may be material. These estimates include the determination of loan loss allowance, discount accretion, impairment, expected end-of-term lease residual values, values of repossessed assets, and income taxes. These estimates, although based on actual historical trends and modeling, may potentially show significant variances over time.

Business Segment Information

The Company has one reportable segment: Consumer Finance, which includes the Company's vehicle financial products and services, including retail installment contracts, vehicle leases, and dealer loans, as well as financial products and services related to motorcycles, RVs, and watercraft. It also includes the Company's unsecured personal loan and point-of-sale financing operations.

Accounting Policies

The Company has identified the following significant accounting policies and estimates used by management in the preparation of the Company's financial statements: retail installment contracts, unsecured consumer loans, receivables from dealers, provision for loan losses, leased vehicles, income taxes, and earnings per share. As of September 30, 2014, there have been no significant changes to the Company's accounting policies as disclosed in the Company's consolidated financial statements for the year ended December 31, 2013.

Recently Adopted Accounting Standards

In July 2013, the FASB issued ASU 2013-11, Income Taxes: Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists. This ASU provides guidance on the presentation of unrecognized tax benefits, particularly the manner in which an entity would settle, at the reporting date, any additional income taxes that would result from the disallowance of a tax position when net operating loss carryforwards, similar tax losses, or tax credit carryforwards exist. This guidance became effective for the Company January 1, 2014 and implementation did not have a significant impact on the Company's financial position, results of operations, or cash flows.

Recent Accounting Pronouncements

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers, which provides guidance on a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers. This guidance is effective beginning after December 15, 2016. The Company does not expect the adoption to have a material impact to the consolidated financial statements as loan and lease contracts are excluded.

In June 2014, the FASB issued ASU 2014-11, Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures. The standard requires entities to account for repurchase-to-maturity transactions as secured borrowings, eliminates accounting guidance on linked repurchase financing transactions, and expands disclosure requirements related to certain transfers of financial assets that are accounted for as secured borrowings. This guidance is effective for the Company beginning January 1, 2015 and early adoption is not permitted. The Company is currently evaluating the impact of the adoption on its consolidated financial statements.

In June 2014, the FASB issued ASU 2014-12, Accounting for Share-Based Payments When the Terms of an Award That a Performance Target Could be Achieved after the Requisite Service Period. This standard affects entities that issue share-based payments when the terms of an award stipulate that a performance target could be achieved after an employee completes the requisite service period. This guidance is effective for fiscal years beginning after December 15, 2015 and early adoption is permitted. The Company is currently evaluating the impact of the adoption on its consolidated financial statements.

In August 2014, the FASB issued ASU 2014-15, Disclosure of Uncertainties About an Entity's Ability to Continue as a Going Concern. The standard requires management to perform interim and annual assessments of an entity's ability to continue as a going concern within one year of the date of issuance of the entity's financial statements. This guidance

is effective for fiscal years ending after December 15, 2016 with early adoption permitted. The Company does not expect the adoption to have a material impact to the consolidated financial statements as there are not any conditions or events that raise substantial doubt about the Company's ability to continue as a going concern.

2. Finance Receivables

Finance receivables held for investment at September 30, 2014 and December 31, 2013, were comprised as follows:

	September 30, 2014			Receivables	
	Loans	Purchased	Total	from	Unsecured
	Acquired	Receivables		Dealers Held	Consumer
	Individually	Portfolios		for	Loans
				Investment	
Unpaid principal balance	\$23,890,480	\$1,032,828	\$24,923,308	\$97,826	\$1,640,276
Loan loss allowance (Note 4)	(2,793,199)	(192,960)	(2,986,159)	(648)	(300,425)
(Discount) / premium	(660,652)	5,797	(654,855)	—	(297)
Capitalized origination costs and fees	36,786	—	36,786	—	729
Net carrying balance	\$20,473,415	\$845,665	\$21,319,080	\$97,178	\$1,340,283
	December 31, 2013			Receivables	
	Loans	Purchased	Total	from	Unsecured
	Acquired	Receivables		Dealers Held	Consumer
	Individually	Portfolios		for	Loans
				Investment	
Unpaid principal balance	\$21,238,281	\$1,961,060	\$23,199,341	\$95,835	\$1,165,778
Loan loss allowance (Note 4)	(2,132,634)	(226,356)	(2,358,990)	(1,090)	(179,350)
Discount	(573,462)	(81,216)	(654,678)	—	(32,831)
Capitalized origination costs	33,936	—	33,936	—	592
Net carrying balance	\$18,566,121	\$1,653,488	\$20,219,609	\$94,745	\$954,189

As of September 30, 2014, retail installment contracts and receivables from dealers held for sale totaled \$89,918 and \$1,235, respectively. As of December 31, 2013, retail installment contracts and receivables from dealers held for sale totaled \$56,066 and \$26,437, respectively. Sales of retail installment contracts for the three and nine months ended September 30, 2014 included principal balance amounts of approximately \$2,413,251 and \$5,483,149. The Company retains servicing of sold retail installment contracts and was servicing \$6,928,679 and \$2,847,656 as of September 30, 2014 and December 31, 2013, respectively, of contracts owned by unrelated third parties, including contracts sold by the Company.

Retail installment contracts are collateralized by vehicle titles, and the Company has the right to repossess the vehicle in the event the consumer defaults on the payment terms of the contract. Most of the Company's retail installment contracts held for investment are pledged against warehouse facilities or securitization bonds (Note 5). Most of the creditors on the Company's retail installment contracts are retail consumers; however, approximately \$677,007 and \$345,177 of the unpaid principal balance represented fleet contracts with commercial borrowers as of September 30, 2014 and December 31, 2013, respectively.

Borrowers on the Company's retail installment contracts held for investment are located in Texas (18%), Florida (11%), California (9%), and other states each individually representing less than 5% of the Company's total.

Receivables from dealers held for investment includes a term loan, which was previously a residual warehouse credit facility, with a third-party vehicle dealer and lender that operates in multiple states. The loan allowed committed borrowings of \$50,000 at September 30, 2014 and December 31, 2013, and the unpaid principal balance of the facility was \$50,000 at each of those dates. The term loan will mature on December 1, 2019. On September 16, 2014, the Company sold \$18,227 of receivables from dealers to Santander Bank, N.A., formerly Sovereign Bank ("SBNA"), an affiliate (Note 11), resulting in a gain of \$347. The Company is entitled to additional proceeds on this sale totaling

\$694 if certain conditions, including continued existence and performance of the sold loans, are met at the first and second anniversaries of the sale.

Borrowers on the Company's remaining receivables from dealers held for investment, all of which are Chrysler-affiliated, are located in Virginia (23%), Ohio (21%), California (17%), New York (15%), Tennessee (9%), Louisiana (6%), and other states each individually representing less than 5% of the Company's total.

Borrowers on the Company's unsecured consumer loans are located in California (10%), New York (8%), Texas (8%), Florida (6%), and other states each individually representing less than 5% of the Company's total.

Changes in accretable yield on the Company's purchased receivables portfolios for the periods indicated were as follows:

	For the Three Months Ended		For the Nine Months Ended	
	September 30,	September 30,	September 30,	September 30,
	2014	2013	2014	2013
Balance — beginning of period	\$305,254	\$535,656	\$403,400	\$816,854
Accretion of accretable yield	(43,231)	(174,201)	(164,651)	(421,913)
Reclassifications from nonaccretable difference	36,394	73,560	59,668	40,074
Balance — end of period	\$298,417	\$435,015	\$298,417	\$435,015

The Company also has capital leases classified as finance receivables (Note 3).

3. Leases

The Company has both operating and capital leases which are separately accounted for and recorded on the Company's consolidated balance sheets as leased vehicles, net and capital lease receivables, net.

Operating Leases

Leased vehicles, net, which is comprised of leases originated under the Chrysler Agreement, consisted of the following as of September 30, 2014 and December 31, 2013:

	September 30,	December 31,
	2014	2013
Leased vehicles	\$5,645,755	\$2,402,052
Origination fees and other costs	2,707	2,716
Manufacturer subvention payments	(614,255)	(259,152)
	5,034,207	2,145,616
Less: accumulated depreciation	(620,199)	(122,183)
	\$4,414,008	\$2,023,433

The following summarizes the future minimum rental payments due to the Company as lessor under operating leases as of September 30, 2014:

Remainder of 2014	\$196,776
2015	766,408
2016	619,909
2017	183,882
2018	313
Thereafter	—
Total	\$1,767,288

Capital Leases

In early 2014, the Company began originating leases that are accounted for as capital leases as the contractual residual values are nominal amounts. Capital lease receivables, net consisted of the following as of September 30, 2014:

	September 30, 2014
Gross investment in capital leases	\$78,779
Origination fees and other	19
Less unearned income	(27,104)
Net investment in capital leases before allowance	51,694
Less: allowance for lease losses	(6,106)
Net investment in capital leases	\$45,588

The following summarizes the future minimum lease payments due to the Company as lessor under capital leases as of September 30, 2014:

Remainder of 2014	\$4,639
2015	18,559
2016	18,559
2017	18,486
2018	17,112
Thereafter	1,424
Total	\$78,779

4. Loan and Lease Loss Allowance and Credit Quality

Loan and Lease Loss Allowance

The Company estimates loan losses on individually acquired retail installment contracts and unsecured consumer loans held for investment based on delinquency status, historical loss experience, estimated values of underlying collateral, when applicable, and various economic factors. The Company maintains a general loan loss allowance for receivables from dealers based on risk ratings, and individually evaluates the loans for specific impairment as necessary. The loan loss allowance for receivables from dealers is comprised entirely of general allowances as none of these receivables have been determined to be individually impaired.

The activity in the loan loss allowance for individually acquired loans for the three and nine months ended September 30, 2014 and 2013 was as follows:

	Three Months Ended September 30, 2014			Three Months Ended September 30, 2013		
	Retail Installment Contracts Acquired Individually	Receivables from Dealers Held for Investment	Unsecured Consumer Loans	Retail Installment Contracts Acquired Individually	Receivables from Dealers Held for Investment	Unsecured Consumer Loans
Balance — beginning of period	\$2,668,587	\$923	\$212,954	\$1,864,313	\$1,490	\$39,250
Provision for loan losses	601,414	(275)	167,409	447,565	103	56,815
Charge-offs	(932,145)	—	(86,512)	(584,815)	—	(815)
Recoveries	455,343	—	6,574	260,887	—	—
Balance — end of period	\$2,793,199	\$648	\$300,425	\$1,987,950	\$1,593	\$95,250

	Nine Months Ended September 30, 2014			Nine Months Ended September 30, 2013		
	Retail Installment Contracts Acquired Individually	Receivables from Dealers Held for Investment	Unsecured Consumer Loans	Retail Installment Contracts Acquired Individually	Receivables from Dealers Held for Investment	Unsecured Consumer Loans
Balance — beginning of period	\$2,132,634	\$1,090	\$179,350	\$1,555,362	\$—	\$—
Provision for loan losses	1,785,482	(442)	299,750	1,074,487	1,593	96,071
Charge-offs	(2,385,675)	—	(194,426)	(1,338,936)	—	(821)
Recoveries	1,260,758	—	15,751	697,037	—	—
Balance — end of period	\$2,793,199	\$648	\$300,425	\$1,987,950	\$1,593	\$95,250

The activity in the impairment reserves related to purchased receivables portfolios for the three and nine months ended September 30, 2014 and 2013 was as follows:

	Three Months Ended		Nine Months Ended	
	September 30, 2014	2013	September 30, 2014	2013
Balance — beginning of period	\$197,844	\$176,576	\$226,356	\$218,640
Incremental provisions for purchased receivable portfolios	1,606	245,987	3,281	285,963
Incremental reversal of provisions for purchased receivables portfolios	(6,490)	(152,269)	(36,677)	(234,309)
Balance — end of period	\$192,960	\$270,294	\$192,960	\$270,294

The Company estimates lease losses on the capital lease receivable portfolio based on delinquency status, loss experience to date, and consideration of similarity between this portfolio and individually acquired retail installment contracts as well as various economic factors. The activity in the lease loss allowance for capital lease receivables for the three and nine months ended September 30, 2014 was as follows:

	Three Months Ended	Nine Months Ended
	September 30, 2014	September 30, 2014
Balance — beginning of period	\$—	\$—
Provision for lease losses	6,106	6,106
Balance — end of period	\$6,106	\$6,106

Delinquencies

Retail installment contracts and unsecured consumer amortizing term loans are classified as non-performing when they are greater than 60 days past due as to contractual principal or interest payments. Dealer receivables are classified as non-performing when they are greater than 90 days past due. At the time a loan is placed in non-performing status, previously accrued and uncollected interest is reversed against interest income. If an account is returned to a performing status, the Company returns to accruing interest on the contract. The accrual of interest on revolving unsecured consumer loans continues until the loan is charged off. A summary of delinquencies as of September 30, 2014 and December 31, 2013 is as follows:

	September 30, 2014			Unsecured Consumer Loans
	Retail Installment Contracts Held for Investment			
	Loans Acquired Individually	Purchased Receivables Portfolios	Total	
	Principal, 31-60 days past due	\$2,077,190	\$163,047	
Delinquent principal over 60 days	888,940	81,048	969,988	131,537
Total delinquent principal	\$2,966,130	\$244,095	\$3,210,225	\$182,811

	December 31, 2013			Unsecured Consumer Loans
	Retail Installment Contracts Held for Investment			
	Loans Acquired Individually	Purchased Receivables Portfolios	Total	
	Principal, 31-60 days past due	\$1,729,139	\$321,549	
Delinquent principal over 60 days	855,315	181,698	1,037,013	65,360
Total delinquent principal	\$2,584,454	\$503,247	\$3,087,701	\$93,462

The balances in the above tables reflect total principal rather than net investment; the difference is considered immaterial.

As of September 30, 2014 and December 31, 2013, there were no receivables from dealers or receivables held for sale that were non-performing. Delinquencies on the capital lease receivables portfolio, which began in 2014, were immaterial as of September 30, 2014.

FICO® Distribution — A summary of the credit risk profile of the Company's consumer loans by FICO® distribution, determined at origination, as of September 30, 2014 and December 31, 2013 was as follows:

September 30, 2014

FICO Band	Retail Installment Contracts Held for Investment (a)	Unsecured Consumer Loans (b)
<540	26.9%	3.2%
540-599	33.2%	20.7%
600-659	26.5%	35.6%
>660	13.4%	40.5%

December 31, 2013

FICO Band	Retail Installment Contracts Held for Investment (a)	Unsecured Consumer Loans (b)
<540	26.8%	6.3%
540-599	31.8%	24.2%
600-659	26.3%	39.4%
>660	15.1%	30.1%

(a) Excluded from the FICO distribution is \$2,771,937 and \$1,944,204 as of September 30, 2014 and December 31, 2013, respectively, as the borrowers on these loans did not have FICO scores at origination.

(b) Excluded from the FICO distribution is an insignificant amount of loans to borrowers that did not have FICO scores at origination.

Commercial Lending Credit Quality Indicators — The credit quality of receivables from dealers, which are considered commercial loans, is summarized according to standard regulatory classifications as follows:

Pass — Asset is well protected by the current net worth and paying capacity of the obligor or guarantors, if any, or by the fair value less costs to acquire and sell any underlying collateral in a timely manner.

Special Mention — Asset has potential weaknesses that deserve management’s close attention, which, if left uncorrected, may result in deterioration of the repayment prospects for an asset at some future date. Special Mention assets are not adversely classified.

Substandard — Asset is inadequately protected by the current net worth and paying capacity of the obligor or by the collateral pledged, if any. A well-defined weakness or weaknesses exist that jeopardize the liquidation of the debt. The loans are characterized by the distinct possibility that the Company will sustain some loss if deficiencies are not corrected.

Doubtful — Exhibits the inherent weaknesses of a substandard credit. Additional characteristics exist that make collection or liquidation in full highly questionable and improbable, on the basis of currently known facts, conditions and values. Possibility of loss is extremely high, but because of certain important and reasonable specific pending factors which may work to the advantage and strengthening of the credit, an estimated loss cannot yet be determined.

Loss — Credit is considered uncollectible and of such little value that it does not warrant consideration as an active asset. There may be some recovery or salvage value, but there is doubt as to whether, how much or when the recovery would occur.

As discussed in Note 2, the Company has \$677,007 of fleet contracts with commercial consumers. Although these loans are recorded in Retail installment contracts held for investment, net, on the consolidated balance sheets, the Company's risk department performs a commercial analysis and classifies certain loans over an internal threshold accordingly based on the classifications above. As of September 30, 2014, the fleet portfolio all was classified as Pass. Commercial loan credit quality indicators for receivables from dealers held for investment as of September 30, 2014 and December 31, 2013 were as follows:

	September 30, 2014	December 31, 2013
Pass	\$95,692	\$95,835
Special Mention	2,134	—
Substandard	—	—
Doubtful	—	—
Loss	—	—
	\$97,826	\$95,835

Troubled Debt Restructurings

In certain circumstances, the Company modifies the terms of its finance receivables to troubled borrowers.

Modifications may include a reduction in interest rate, an extension of the maturity date, rescheduling of future cash flows, or a combination thereof. A modification of finance receivable terms is considered a troubled debt restructuring (“TDR”) if the Company grants a concession to a borrower for economic or legal reasons related to the debtor’s financial difficulties that would not otherwise have been considered. Management considers TDRs to include all individually acquired retail installment contracts that have been modified at least once, deferred for a period of 90 days or more, or deferred at least twice. Additionally, restructurings through bankruptcy proceedings are deemed to be TDRs. The purchased receivables portfolio and operating and capital leases are excluded from the scope of the applicable guidance. As of September 30, 2014 and December 31, 2013, there were no receivables from dealers classified as a TDR.

The table below presents the Company's loans modified in TDRs as of September 30, 2014 and December 31, 2013:

	September 30, 2014		December 31, 2013	
	Retail Installment Contracts	Unsecured Consumer Loans	Retail Installment Contracts	Unsecured Consumer Loans
Total TDR principal	\$3,666,676	\$15,428	\$2,604,351	\$8,391
Accrued interest	100,592	—	70,965	—
Discount	(101,396)	(4)	(70,321)	(274)
Origination costs	5,646	14	4,161	5
Outstanding recorded investment	3,671,518	15,438	2,609,156	8,122
Allowance for loan losses	(605,643)	(6,884)	(475,128)	(2,345)
Outstanding recorded investment, net of allowance	\$3,065,875	\$8,554	\$2,134,028	\$5,777

A summary of the Company's delinquent TDRs at September 30, 2014 and December 31, 2013, is as follows:

	September 30, 2014		December 31, 2013	
	Retail Installment Contracts	Unsecured Consumer Loans	Retail Installment Contracts	Unsecured Consumer Loans
Principal, 31-60 days past due	806,819	1,101	556,489	875
Delinquent principal over 60 days	422,776	8,017	356,969	1,396
Total delinquent TDR principal	\$1,229,595	\$9,118	\$913,458	\$2,271

A loan that has been classified as a TDR remains so until the loan is liquidated through payoff or charge-off.

Consistent with other of the Company's retail installment contracts, TDRs are placed on nonaccrual status when the account becomes past due more than 60 days, and return to accrual status when the account is 60 days or less past due.

Average recorded investment and income recognized on TDR loans are as follows:

	Three Months Ended				Nine Months Ended			
	September 30, 2014		September 30, 2013		September 30, 2014		September 30, 2013	
	Retail Installment Contracts	Unsecured Consumer Loans	Retail Installment Contracts	Unsecured Consumer Loans	Retail Installment Contracts	Unsecured Consumer Loans	Retail Installment Contracts	Unsecured Consumer Loans
Average outstanding recorded investment in TDRs	\$3,412,644	\$17,484	\$2,076,345	\$2,323	\$3,060,141	\$13,240	\$1,816,378	\$1,549
Interest income recognized	\$130,716	\$449	\$88,034	\$24	\$363,305	\$1,169	\$218,435	\$25

TDR Impact on Allowance for Loan Losses

For loans not classified as TDRs, the Company generally estimates an appropriate allowance for loan loss based on delinquency status, the Company's historical loss experience, estimated values of underlying collateral, and various economic factors. Once a loan has been classified as a TDR, impairment is measured based on the present value of expected future cash flows considering all available evidence, including collateral values.

The following table summarizes the financial effects of loan modifications accounted for as TDRs that occurred during the three and nine months ended September 30, 2014 and 2013:

	Three Months Ended		September 30, 2013	
	Retail Installment Contracts	Unsecured Consumer Loans	Retail Installment Contracts	Unsecured Consumer Loans
September 30, 2014				
September 30, 2013				
Troubled Debt Restructurings:				
Outstanding recorded investment before TDR	\$951,012	\$6,284	\$615,097	\$4,034
Outstanding recorded investment after TDR	\$948,164	\$6,311	\$585,830	\$4,020
Number of contracts	57,829	5,653	39,598	5,950

	Nine Months Ended		September 30, 2013	
	Retail Installment Contracts	Unsecured Consumer Loans	Retail Installment Contracts	Unsecured Consumer Loans
September 30, 2014				
September 30, 2013				
Troubled Debt Restructurings:				
Outstanding recorded investment before TDR	\$2,318,685	\$13,032	\$1,379,733	\$4,184
Outstanding recorded investment after TDR	\$2,228,375	\$12,978	\$1,319,642	\$4,169
Number of contracts	141,582	11,788	89,869	6,093

A TDR is considered to have subsequently defaulted upon charge off, which for retail installment contracts is at the earlier of the date of repossession or 120 days past due and for revolving unsecured consumer loans is generally the month in which the receivable becomes 180 days past due. Loan modifications accounted for as TDRs within the previous twelve months that subsequently defaulted during the three and nine months ended September 30, 2014 and 2013 are summarized in the following table:

	Three Months Ended		September 30, 2013	
	Retail Installment Contracts	Unsecured Consumer Loans	Retail Installment Contracts	Unsecured Consumer Loans
September 30, 2014				
September 30, 2013				
Troubled debt restructurings that subsequently defaulted	\$110,528	\$1,054	\$341,718	(a)
Number of contracts	10,736	1,015	24,952	(a)

	Nine Months Ended		September 30, 2013	
	Retail Installment Contracts	Unsecured Consumer Loans	Retail Installment Contracts	Unsecured Consumer Loans
September 30, 2014				
September 30, 2013				
Troubled debt restructurings that subsequently defaulted	\$230,803	\$1,801	\$371,048	(a)
Number of contracts	23,859	1,766	27,105	(a)

(a) Subsequent defaults on unsecured consumer loan TDRs were insignificant for the periods presented.

5. Debt

Revolving Credit Facilities

The following table presents information regarding credit facilities as of September 30, 2014 and December 31, 2013:

	September 30, 2014					
	Maturity Date(s)	Utilized Balance	Committed Amount	Effective Rate	Assets Pledged	Restricted Cash Pledged

Total revolving credit facilities		\$8,099,773	\$15,273,673		\$4,490,044	\$89,118

(a) Half of the outstanding balance on this facility matures in March 2015 and half in March 2016.

(b) This line is held exclusively for Chrysler Capital retail loan and lease financing, with lease financing comprising no more than 50% of the outstanding balance upon advance.

(c) This line is held exclusively for unsecured consumer term loans.

(d) The repurchase facility is also collateralized by securitization notes payable retained by the Company. No portion of this facility is unsecured. This facility has rolling 30-day and 90-day maturities.

(e) This line is collateralized by residuals retained by the Company.

(f) This line is collateralized by notes payable retained by the Company.

These lines are also collateralized by securitization notes payable and residuals retained by the Company. As of (g) September 30, 2014 and December 31, 2013, \$1,702,720 and \$1,123,354, respectively, of the aggregate outstanding balances on these facilities were unsecured.

On October 15, 2014, the Company made a \$28,596 principal payment to increase the overcollateralization on this (h) warehouse by 10% to cure a level I triggering event. The Company subsequently amended the warehouse agreement to revise the trigger levels.

Facilities with Third Parties

The warehouse lines and repurchase facility are fully collateralized by a designated portion of the Company's retail installment contracts (Note 2), leased vehicles (Note 3), securitization notes payables and residuals retained by the Company.

Lines of Credit with Santander and Related Subsidiaries

Through its New York branch, Banco Santander provides the Company with \$4,500,000 of long-term committed revolving credit facilities. Through SHUSA, under an agreement entered into on March 6, 2014, Santander provides the Company with an additional \$300,000 of committed revolving credit, collateralized by residuals retained on its own securitizations. The fundings through the New York branch and through SHUSA are collectively known as the "Santander Credit Facilities."

The facilities offered through the New York branch are structured as three- and five-year floating rate facilities, with current maturity dates of December 31, 2016 and December 31, 2018, respectively. Santander has the option to continue to renew the term of these facilities annually going forward, thereby maintaining the three and five year maturities. These facilities currently permit unsecured borrowing but generally are collateralized by retail installment

contracts and retained residuals. Any secured balances outstanding under the facilities at the time of their maturity will amortize to match the maturities and expected cash flows of the corresponding collateral.

Secured Structured Financings

The following table presents information regarding secured structured financings as of September 30, 2014 and December 31, 2013:

	September 30, 2014					
	Original Estimated Maturity Date(s)	Balance	Initial Note Amounts Issued	Initial Weighted Average Interest Rate	Collateral	Restricted Cash

Privately issued amortizing notes		3,780,721	8,136,587		4,876,685	145,000
Total secured structured financings		\$15,195,887	\$33,127,485		\$19,133,315	\$1,280,881

(a) On October 15, 2014, the Company executed a clean-up call on a securitization representing \$87,664 of this balance.

(b) Securitizations executed under Rule 144A of the Securities Act are included within this balance.

Notes Payable — Secured Structured Financings

The principal and interest on secured structured financings are paid using the cash flows from the underlying retail installment contracts, loans and leases, which serve as collateral for the notes. Accordingly, the timing of the principal payments on these notes is dependent on the payments received on the underlying collateral.

Most of the Company's secured structured financings are in the form of public, SEC-registered securitizations. The Company also executes private securitizations under Rule 144A of the Securities Act and periodically issues private term amortizing notes, which are structured similarly to securitizations but are acquired by banks and conduits. Historically, all of the Company's securitizations and private issuances have been collateralized by vehicle retail installment contracts and loans; however, in 2013, the Company issued its first amortizing notes backed by vehicle leases. As of September 30, 2014, the Company had private issuances of notes backed by vehicle leases totaling approximately \$1,346,793.

Unamortized debt issuance costs are amortized as interest expense over the terms of the related notes payable using a method that approximates the effective interest method. Amortization of premium or accretion of discount on acquired notes payable is also included in interest expense using a method that approximates the effective interest method, over the estimated remaining life of the acquired notes. Total interest expense on secured structured financings for the three months ended September 30, 2014 and 2013 was \$60,700 and \$58,444, respectively. Total interest expense on secured structured financings for the nine months ended September 30, 2014 and 2013 was \$177,779 and \$172,780, respectively.

6. Variable Interest Entities

The Company transfers retail installment contracts and leased vehicles into newly formed Trusts which then issue one or more classes of notes payable backed by the collateral. The Company's continuing involvement with these Trusts is in the form of servicing loans held by special purpose financing Trusts and, except for the Chrysler Capital securitizations, through holding a residual interest in the Trust. These transactions are structured without recourse. The Trusts are considered variable interest entities ("VIEs") under U.S. GAAP and, except for the Chrysler Capital securitizations, are consolidated because the Company has: (a) power over the significant activities of the entity as servicer of its financial assets and (b) the residual interest and in some cases debt securities held by the Company, an obligation to absorb losses or the right to receive benefits from the VIE which are potentially significant to the VIE. The Company did not retain any debt or equity interests in the Chrysler Capital securitizations executed in 2013 and 2014, and recorded these transactions as sales of the associated retail installment contracts.

The Company also uses a titling trust to originate and hold its leased vehicles and the associated leases, in order to facilitate the pledging of leases to financing facilities or sale of leases to other parties without incurring the costs and administrative burden of retitling the leased vehicles. The titling trust, and each special unit of beneficial interest ("SUBI") in the titling trust, such as those formed to facilitate the transfer of leased vehicles to financing facilities or other parties, is considered a VIE.

Revolving credit facilities also utilize Trusts that are considered VIEs. The collateral, borrowings under credit facilities and securitization notes payable of the Company's consolidated VIEs remain on the consolidated balance sheets. The Company recognizes finance charges and fee income on the retail installment contracts and leased vehicles and interest expense on the debt, and records a provision for credit losses to cover probable inherent losses on the contracts. All of the Trusts are separate legal entities and the collateral and other assets held by these subsidiaries are legally owned by them and are not available to other creditors.

On-balance sheet variable interest entities

The following table summarizes the assets and liabilities related to VIEs included in the Company's consolidated financial statements:

	September 30, 2014	December 31, 2013
Restricted cash	\$1,646,807	\$1,370,174
Retail installment contracts, net	20,819,285	19,166,392
Leased vehicles, net	4,414,008	2,023,433
Various other assets	951,170	541,469
Notes payable	27,039,906	23,810,950
Various other liabilities	2,228	25,682

The Company retains servicing for receivables transferred to the Trusts and receives a monthly servicing fee on the outstanding principal balance. Supplemental fees, such as late charges, for servicing the receivables are reflected in fees, commissions and other income. As of September 30, 2014 and December 31, 2013, the Company was servicing \$24,231,357 and \$21,935,874, respectively, of gross retail installment contracts that have been transferred to consolidated Trusts. The remainder of the Company's retail installment contracts remain unpledged.

A summary of the cash flows received from consolidated securitization trusts during the three and nine months ended September 30, 2014 and 2013, is as follows:

	Three Months Ended		Nine Months Ended	
	September 30, 2014	September 30, 2013	September 30, 2014	September 30, 2013
Receivables securitized	\$3,723,447	\$1,853,327	\$12,090,743	\$5,974,694
Net proceeds from securitizations (a)	\$2,919,796	\$1,642,310	\$10,310,702	\$5,228,770
Cash received for servicing fees	166,390	111,204	465,675	320,640
Cash received upon release from reserve and restricted cash accounts	—	2,160	810	8,385
Net distributions from Trusts	426,966	377,111	1,137,778	1,136,401
Total cash received from securitization trusts	\$3,513,152	\$2,132,785	\$11,914,965	\$6,694,196

(a) Includes additional advances on existing securitizations.

Off-balance sheet variable interest entities

During 2013 and 2014, the Company completed sales to VIEs that meet sale accounting treatment in accordance with the applicable guidance. Due to the nature, purpose, and activity of the transactions, the Company determined for consolidation purposes that it either does not hold potentially significant variable interests or is not the primary beneficiary as a result of the Company's limited further involvement with the financial assets. For such transactions, the transferred financial assets are removed from the Company's consolidated balance sheets. In certain situations, the Company remains the servicer of the financial assets and receives servicing fees that represent adequate compensation. The Company also recognizes a gain or loss for the difference between the cash proceeds and carrying value of the assets sold.

During the three and nine months ended September 30, 2014, the Company sold \$1,028,278 and \$1,802,461, respectively, of gross retail installment contracts to VIEs in off-balance sheet securitizations for a gain of approximately \$39,060 and \$71,598, respectively. As of September 30, 2014 and December 31, 2013, the Company was servicing \$2,375,107 and \$1,017,756, respectively, of gross retail installment contracts that have been sold in these off-balance sheet Chrysler Capital securitizations. Other than repurchases of sold assets due to standard representations and warranties, the Company has no exposure to loss as a result of its involvement with these VIEs.

A summary of the cash flows received from the off-balance securitization trusts during the three and nine months ended September 30, 2014, is as follows:

	Three Months Ended September 30, 2014	Nine Months Ended September 30, 2014
Receivables securitized	\$1,028,278	\$1,802,461
Net proceeds from new securitizations	\$1,078,202	\$1,894,052
Cash received for servicing fees	3,925	10,897
Total cash received from securitization trusts	\$1,082,127	\$1,904,949

On June 27, 2014, the Company executed a bulk sale of Chrysler Capital leases with a depreciated net capitalized cost of \$369,114 and a net book value of \$317,275 to SBNA, an affiliate. This sale was effected through the transfer of a SUBI in SCUSA's titling trust, which was determined to be a VIE. The Company concluded that it is not the primary beneficiary of the VIE and therefore treated the transaction as a sale for accounting purposes, with the removal of the leases from the consolidated balance sheets. Proceeds from the sale were \$322,851, for a total gain of \$5,576. For the three and nine months ended September 30, 2014, the Company received \$241 in servicing fees on these leases. The Company has no exposure to loss as a result of its involvement with the VIE.

7. Derivative Financial Instruments

Certain of the Company's interest rate swap agreements are designated as cash flow hedges for accounting purposes. The Company's remaining interest rate swap agreements, as well as its interest rate cap agreements, the corresponding options written in order to offset the interest rate cap agreements, and a total return swap, are not designated as hedges for accounting purposes. The underlying notional amounts and aggregate fair values of these agreements at September 30, 2014 and December 31, 2013, were as follows:

	September 30, 2014		December 31, 2013	
	Notional	Fair Value	Notional	Fair Value
Interest rate swap agreements designated as cash flow hedges	\$7,053,000	\$5,754	\$3,873,000	\$(5,686)
Interest rate swap agreements not designated as hedges	2,878,574	(14,805)	3,444,459	(31,360)
Interest rate cap agreements	7,248,483	60,525	4,616,960	28,274
Options for interest rate cap agreements	7,248,483	(60,580)	4,616,960	(28,389)
Total return swap	250,594	(494)	—	—

The aggregate fair value of the interest rate swap agreements was included on the Company's consolidated balance sheets in other assets and other liabilities, as appropriate. The interest rate cap agreements were included in other assets and the related options in other liabilities on the Company's consolidated balance sheets.

In March 2014, the Company entered into a financing arrangement with a third party whereby the Company pledged certain bonds retained in its own securitizations in exchange for approximately \$250,594 in cash. In conjunction with the financing arrangement, the Company entered into a total return swap related to the bonds as an effective avenue to monetize the Company's retained bonds as a source of financing. The Company will receive the fixed return on the bonds in exchange for paying a variable rate of three-month LIBOR plus 75 basis points. In addition, at maturity, the Company will receive a payment from, or make a payment to, the counterparty based on the change in fair value of the bonds during the one-year term of the facility. Throughout the term of the facility, the party in a net liability position must post collateral. The Company has the ability to substitute collateral and may do so if a bond is set to begin amortizing. Alternatively, the amortization may be utilized to reduce the notional amount of the facility.

The Company enters into legally enforceable master netting agreements that reduce risk by permitting netting of transactions, such as derivatives and collateral posting, with the same counterparty on the occurrence of certain events. A master netting agreement allows two counterparties the ability to net-settle amounts under all contracts, including any related collateral posted, through a single payment. The right to offset and certain terms regarding the collateral

process, such as valuation, credit events and settlement, are contained in International Swaps and Derivative Association ("ISDA") master agreements.

Information on the offsetting of derivative assets and derivative liabilities due to the right of offset was as follows, as of September 30, 2014 and December 31, 2013:

The Company is the holder of a warrant that gives it the right, if certain vesting conditions are satisfied, to purchase additional shares in a company in which it has a cost method investment. This warrant was issued in 2012 and is carried at its estimated fair value of zero at September 30, 2014 and December 31, 2013.

The gross gains (losses) reclassified from accumulated other comprehensive income to net income, and gains (losses) recognized in net income, are included as components of interest expense. The Company's interest rate swap agreements had effects on its consolidated statements of income and comprehensive income for the three and nine months ended September 30, 2014 and 2013 as follows:

Edgar Filing: Santander Consumer USA Holdings Inc. - Form 10-Q

	Three Months Ended September 30, 2014			Three Months Ended September 30, 2013		
	Gains (Losses) Recognized in Interest Expense	Gross Gains (Losses) Recognized in Accumulated Other Comprehensive Income	Gross Gains (Losses) Reclassified From Accumulated Other Comprehensive Income to Interest Expense	Gains (Losses) Recognized in Interest Expense	Gross Gains (Losses) Recognized in Accumulated Other Comprehensive Income	Gross Gains (Losses) Reclassified From Accumulated Other Comprehensive Income to Interest Expense
Interest rate swap agreements designated as cash flow hedges	\$ (383)	\$ 12,822	\$ (906)	\$ —	\$ (3,577)	\$ (5,342)
Derivative instruments not designated as hedges	\$ 8,227			\$ (978)		
	Nine Months Ended September 30, 2014			Nine Months Ended September 30, 2013		
	Gains (Losses) Recognized in Interest Expense	Gross Gains (Losses) Recognized in Accumulated Other Comprehensive Income	Gross Gains (Losses) Reclassified From Accumulated Other Comprehensive Income To Interest Expense	Gains (Losses) Recognized in Interest Expense	Gross Gains (Losses) Recognized in Accumulated Other Comprehensive Income	Gross Gains (Losses) Reclassified From Accumulated Other Comprehensive Income to Interest Expense
Interest rate swap agreements designated as cash flow hedges	\$ (292)	\$ 6,230	\$ (5,501)	\$ —	\$ (5,237)	\$ (14,781)
Derivative instruments not designated as hedges	\$ 16,615			\$ 16,361		

The ineffectiveness related to the interest rate swap agreements designated as cash flow hedges was insignificant for the nine months ended September 30, 2014 and 2013.

8. Other Assets

Other assets were comprised as follows:

	September 30, 2014	December 31, 2013
Upfront fee (a)	\$ 128,750	\$ 140,000
Inventory of repossessed vehicles	138,345	129,323
Manufacturer subvention payments receivable (a)	85,054	55,579
Derivative assets (Note 7)	69,867	29,875
Indemnification payments receivable (b)	5,504	8,603

Other	100,500	46,925
	\$528,020	\$410,305

These amounts relate to the Chrysler Agreement. The Company paid a \$150,000 upfront fee upon the May 2013 inception of the agreement. The fee is being amortized into finance and other interest income over a ten-year term.
 (a) As the preferred financing provider for Chrysler, the Company is entitled to subvention payments on loans and leases with below-market customer payments.

This amount represents tax indemnification payments to the original equity investors in two investment
 (b) partnerships now owned by the Company. These payments are expected to be recovered through tax refunds passed through to the Company as the original investors recognize tax losses related to the investments.

9. Income Taxes

The Company recorded income tax expense of \$90,397 (32.1% effective tax rate) and \$282,081 (35.2% effective tax rate) during the three and nine months ended September 30, 2014, respectively. The Company recorded income tax expense of \$65,486 (36.9% effective tax rate) and \$322,413 (35.7% effective tax rate) during the three and nine months ended September 30, 2013, respectively. The decrease in effective tax rate year over year is primarily due to the release of reserves for uncertain tax positions and an increase in electric vehicle tax credits.

Significant judgment is required in evaluating and reserving for uncertain tax positions. Although management believes adequate reserves have been established for all uncertain tax positions, the final outcomes of these matters may differ. Management does not believe the outcome of any uncertain tax position, individually or combined, will have a material effect on the results of operations. The reserve for uncertain tax positions, as well as associated penalties and interest, are a component of the income tax provision.

10. Commitments and Contingencies

In connection with the sale of retail installment contracts through securitizations and other sales, the Company has made standard representations and warranties customary to the consumer finance industry. Violations of these representations and warranties may require the Company to repurchase loans previously sold to on- or off-balance sheet trusts or other third parties. As of September 30, 2014, the Company had no repurchase requests outstanding. In the opinion of management, the potential exposure of other recourse obligations related to the Company's retail installment contract sales agreements will not have a material adverse effect on the Company's consolidated financial position, results of operations, or cash flows.

The Company has a letter of credit facility with Santander — New York Branch totaling \$500,000 at September 30, 2014 and December 31, 2013. The amount issued was zero as of September 30, 2014 and December 31, 2013. The letters of credit can serve as collateral for certain warehouse lines. These commitments will expire on December 31, 2014.

Santander has provided guarantees on the covenants, agreements, and obligations of the Company under the governing documents of its warehouse facilities and privately issued amortizing notes. These guarantees are limited to the obligations of SCUSA as servicer.

The Company committed to purchase certain new advances on unsecured revolving financings originated by a third party retailer, along with existing balances on accounts with new advances, for an initial term ending on April 2020 and renewing through April 2022 at the retailer's option. The Company also is required to make a profit-sharing payment to the retailer each month.

Under terms of the agreement with Chrysler, the Company must make revenue sharing payments to Chrysler and also must make gain-sharing payments when residual gains on leased vehicles exceed a specified threshold.

Under terms of an application transfer agreement with another original equipment manufacturer ("OEM"), the Company has the first opportunity to review for its own portfolio any credit applications turned down by the OEM's captive finance company. The agreement does not require the Company to originate any loans, but for each loan originated the Company will pay the OEM a referral fee, comprised of a volume bonus fee and a loss betterment bonus fee. The loss betterment bonus fee will be calculated annually and is based on the amount by which losses on loans originated under the agreement are lower than an established percentage threshold.

The Company is obligated to make purchase price holdback payments to a third party originator of loans that it purchases on a periodic basis, when losses are lower than originally expected.

The Company has a flow agreement with Bank of America whereby the Company is committed to sell up to \$300,000 of eligible loans to the bank each month through May 2018. The Company retains servicing on all sold loans and may receive or pay a servicer performance payment based on an agreed-upon formula if performance on the sold loans is better or worse, respectively, than expected performance at time of sale. As of September 30, 2014, the Company was obligated to repurchase \$17,145 in loans sold to Bank of America under standard representations and warranties due to the loans not meeting Bank of America's collateral requirements.

The Company has sold loans to Citizens Bank of Pennsylvania ("CBP") in 2014 under terms of a flow agreement and predecessor sale agreements. The Company retains servicing on the sold loans and will owe CBP a loss-sharing payment capped at 0.5% of the original pool balance if losses exceed a specified threshold, established on a pool-by-pool basis.

As of September 30, 2014, the Company had an agreement with SBNA, a subsidiary of SHUSA, whereby the Company provided SBNA with the first right to review and assess Chrysler dealer lending opportunities and, if SBNA elected, to provide the proposed financing. The Company provided servicing on all loans originated under this arrangement. The Company received a \$9,000 referral fee in June 2013 in connection with this arrangement and was amortizing the fee into income over the ten-year term of agreement. As of September 30, 2014 and December 31, 2013, the unamortized fee balance was \$7,875 and \$8,550, respectively. The Company also received or made a servicer performance payment if it yielded returns, net of credit losses, on the loans that were higher or lower, respectively, than expected at origination. As of September 30, 2014 and December 31, 2013, the Company serviced \$595,414 and \$202,494 of loans that had been originated under this agreement. Effective October 1, 2014, this agreement was terminated and replaced with a revised arrangement. See Note 11 for further detail.

The Company also provides SBNA with the first right to review and approve consumer vehicle lease applications, subject to volume constraints. The Company has indemnified SBNA for potential credit and residual losses on \$48,226 of leases that had been originated by SBNA under this program but were subsequently determined not to meet SBNA's underwriting requirements. This indemnification agreement is supported by an equal amount of cash collateral posted by the Company in an SBNA bank account. The collateral account balance is included in restricted cash in the Company's condensed consolidated balance sheets.

The Company also has agreements with SBNA to service recreational and marine vehicle portfolios. These agreements call for a periodic retroactive adjustment, based on cumulative return performance, of the servicing fee rate to inception of the contract. There was no adjustment for the three months ended September 30, 2014 or 2013, and adjustments for the nine months ended September 30, 2014 and 2013 totaled a net upward adjustment of \$1,329 and zero, respectively.

Under terms of agreements with a peer-to-peer unsecured lending platform company, the Company has committed to purchase at least the lesser of \$30,000 per month or 75% of the lending platform company's near-prime originations through July 2015, and the lesser of \$30,000 per month or 50% of the lending platform company's near-prime originations thereafter through July 2017. This commitment can be reduced or canceled with 90 days' notice.

Periodically, the Company is party to or otherwise involved in various lawsuits and other legal proceedings that arise in the ordinary course of business. On August 26, 2014, a purported securities class action lawsuit was filed in the United States District Court, Southern District of New York. On October 6, 2014, another purported securities class action lawsuit was filed in the District Court of Dallas County, Texas and was subsequently removed to the United States District Court, Northern District of Texas. Both lawsuits were filed against the Company, certain of its current and former directors and executive officers and certain institutions that served as underwriters in the initial public offering. Each lawsuit was brought by a purported stockholder of the Company seeking to represent a class consisting of all those who purchased or otherwise acquired securities pursuant and/or traceable to SCUSA's Registration Statement and Prospectus issued in connection with the initial public offering. Each complaint alleges that the Registration Statement and Prospectus contained misleading statements concerning the Company's auto lending business and underwriting practices. Each lawsuit asserts claims under Section 11 and Section 15 of the Securities Act of 1933 and seeks damages and other relief.

Further, the Company is party to or are otherwise involved periodically in reviews, investigations, and proceedings (both formal and informal), and information-gathering requests, by government and self-regulatory agencies, including the Federal Reserve, the CFPB, the Department of Justice ("DOJ"), the Commission, the FTC and various state regulatory agencies. Currently, such proceedings include a civil subpoena from the Department of Justice under The Financial Institutions Reform, Recovery, and Enforcement Act of 1989 ("FIRREA") requesting the production of documents and communications that, among other things, relate to the underwriting and securitization of nonprime

auto loans since 2007. Additionally, on October 28, 2014, the Company received a preservation letter and request for documents from the Commission requesting the preservation and production of documents and communications that, among other things, relate to the underwriting and securitization of auto loans since January 1, 2011. The Company also has received civil subpoenas from various state Attorneys General requesting similar documents and

communications. The Company is in the process of complying with the requests for information and document preservation.

The Company does not believe that there are any proceedings, threatened or pending, that, if determined adversely, would have a material adverse effect on the consolidated financial position, results of operations, or liquidity of the Company.

11. Related-Party Transactions

Related-party transactions not otherwise disclosed in these footnotes to the consolidated financial statements include the following:

Interest expense, including unused fees, for affiliate lines/letters of credit for the three and nine months ended September 30, 2014 and 2013 was as follows:

	Three Months Ended		Nine Months Ended	
	September 30,	September 30,	September 30,	September 30,
	2014	2013	2014	2013
Line of credit agreement with Santander - New York Branch	\$21,408	\$ 23,375	\$68,991	\$ 43,826
Line of credit agreement with SHUSA	1,339	—	3,001	—
Letter of credit facility with Santander - New York Branch	128	128	379	398

Accrued interest for affiliate lines/letters of credit at September 30, 2014 and December 31, 2013, were comprised as follows:

	September 30,	December 31,
	2014	2013
Line of credit agreement with Santander - New York Branch	\$ 7,070	\$11,435
Line of credit agreement with SHUSA	227	—
Letter of credit facility with Santander - New York Branch	128	128

The Company has derivative financial instruments with Santander and affiliates with outstanding notional amounts of \$16,798,539 and \$10,461,378 at September 30, 2014 and December 31, 2013, respectively (Note 7). Interest expense on these agreements includes amounts totaling \$8,002 and \$15,432 for the three months ended September 30, 2014 and 2013, respectively, and \$29,585 and \$20,255 for the nine months ended September 30, 2014 and 2013, respectively.

For the three and nine months ended September 30, 2013, the Company sold approximately \$204,782 of the Company's receivables from dealers to SBNA. For the three and nine months ended September 30, 2014, the Company sold \$18,227 of receivables from dealers to SBNA for a net gain of \$347. Until October 1, 2014, the Company continued to service dealer loans it had sold to SBNA but the loans were not subject to the servicer performance payment that applied to dealer loans originated under the SBNA flow agreement, described in Note 10. Servicing fee income recognized on receivables from dealers sold to SBNA or originated by SBNA totaled \$2,897 and \$247 for the three months ended September 30, 2014 and 2013, respectively, and \$7,195 and \$247 for the nine months ended September 30, 2014 and 2013, respectively, including \$1,209 and \$9 for the three months ended September 30, 2014 and 2013, respectively and \$2,932 and \$9 for the nine months ended September 30, 2014 and 2013, respectively, in servicer performance payments.

Other information on the dealer loan portfolio serviced for SBNA as of September 30, 2014 and December 31, 2013 is as follows:

	September 30, 2014	December 31, 2013
Total serviced portfolio	\$877,786	\$513,684
Cash collections due to owner	12,009	6,941
Loan fundings due from owner	5,736	—
Servicing fees receivable	945	817

Effective October 1, 2014, the servicing of all Chrysler Capital receivables from dealers, including receivables held by SBNA and by SCUSA, was transferred to SBNA. The agreements executed in connection with this transfer require SCUSA to permit SBNA first right to review and assess Chrysler Capital dealer lending opportunities and require SBNA to pay SCUSA a Relationship Management Fee based upon the performance and yields of Chrysler Capital dealer loans held by SBNA. The remaining balance of the referral fee SBNA paid to SCUSA in connection with the original sourcing and servicing agreement is now considered a referral fee in connection with the new agreements, and will continue to be amortized into income through the July 1, 2022 termination date of the new agreements.

The Company also has agreements with SBNA to service auto retail installment contracts and recreational and marine vehicle portfolios. Servicing fee income recognized under these agreements totaled \$2,217 and \$5,127 for the three months ended September 30, 2014 and 2013, respectively, and \$8,866 and \$16,705 for the nine months ended September 30, 2014 and 2013, respectively. Other information on the serviced auto loan and retail installment contract portfolios for SBNA as of September 30, 2014 and December 31, 2013 is as follows:

	September 30, 2014	December 31, 2013
Total serviced portfolio	\$950,325	\$1,175,566
Cash collections due to owner	25,461	32,831
Servicing fees receivable (refundable)	2,290	(3,163)

During 2014, the Company entered into a flow agreement with SBNA whereby SBNA has the first right to review and approve Chrysler Capital consumer vehicle lease applications. SCUSA may review any applications declined by SBNA for the Company's own portfolio. The Company provides servicing and receives an origination fee on all leases originated under this agreement.

On June 27, 2014, the Company executed a bulk sale of Chrysler Capital leases with a depreciated net capitalized cost of \$369,114 and a net book value of \$317,275 in Chrysler Capital leases to SBNA. This sale was effected through the transfer of a SUBI in SCUSA's titling trust. Proceeds from the sale were \$322,851, for a total gain of \$5,576. SCUSA retained servicing on the sold leases.

Combined origination and servicing fee income recognized on leases originated and serviced for SBNA totaled \$6,432 and \$17,683, respectively, for the three and nine months ended September 30, 2014. Other information on the consumer vehicle lease portfolio serviced for SBNA as of September 30, 2014 is as follows:

	September 30, 2014
Total serviced portfolio	\$1,491,395
Cash collections due to owner	2,059
Origination and servicing fees receivable	11,602

On June 30, 2014, the Company entered into an indemnification agreement with SBNA whereby SCUSA indemnifies SBNA for any credit or residual losses on a pool of \$48,226 in leases originated under the flow agreement. The covered leases are non-conforming units because they did not meet SBNA's credit criteria at origination. At time of the agreement, SCUSA established a \$48,226 collateral account with SBNA in restricted cash that will be released over time to SBNA, in the case of losses, and SCUSA, in the case of payments and sale proceeds. During the third quarter, the parties identified that \$6,985 of the collateral was related to manufacturing subvention that would be subsequently

provided from Chrysler and as such, released this balance to unrestricted cash. As of September 30, 2014 the balance in the collateral account was \$41,241.

30

Produban Servicios Informaticos Generales S.L., a Santander affiliate, is under contract with the Company to provide professional services, telecommunications, and internal and/or external applications. Expenses incurred, which are included as a component of data processing, communications and other expenses, totaled \$0 and \$35 for the three months ended September 30, 2014 and 2013, and \$75 and \$110 for the nine months ended September 30, 2014 and 2013.

During the three and nine months ended September 30, 2014, the Company originated \$3,237 and \$6,148, respectively, in unsecured revolving loans under terms of a Master Service Agreement ("MSA") with a company in which it has a cost method investment and holds a warrant to increase its ownership if certain vesting conditions are satisfied. The MSA enables SCUSA to review credit applications of retail store customers.

The Company paid expenses totaling \$21 and \$499, respectively, for the three and nine months ended September 30, 2013, on behalf of the former managing member of the investment partnerships described in Note 8. The former managing member is an investor in Auto Finance Holdings. The Company has paid no expenses on behalf of this former managing member in 2014.

The Company paid certain expenses incurred by the Company's Chairman and CEO in the operation of a private plane in which he owns a partial interest when used for SCUSA business within the contiguous 48 states. Under this practice, payment is based on a set flight time hourly rate, and the amount of our reimbursement is not subject to a maximum cap per fiscal year. For the three and nine months ended September 30, 2014, the Company paid \$115 and \$529, respectively, to Meregrass Company, Inc., the company managing the plane's operations, with an average rate of \$5.8 per hour.

The following members of management have a minority equity investment in a property in which the Company leases 373,000 square feet as its corporate headquarters: Chairman and CEO, President and Chief Financial Officer, and a member of the Board of Directors who is also a Santander employee. Per the rental agreement, the Company is not required to pay base rent until February 2015. Future minimum lease payments for the 12 year term of the lease total approximately \$83,555.

12. Computation of Basic and Diluted Earnings per Common Share

Earnings per common share is computed using the two-class method required for participating securities. Restricted stock awards are considered to be participating securities because holders of such shares have non-forfeitable dividend rights in the event of a declaration of a dividend on the Company's common shares.

1,731,329 and 1,539,861 employee stock option awards are excluded from the calculation of earnings per share for the three and nine months ended September 30, 2014, respectively, as the effect would be anti-dilutive.

	Three Months Ended		Nine Months Ended	
	September 30, 2014	2013	September 30, 2014	2013
Earnings per common share				
Net income attributable to SCUSA shareholders	\$ 191,369	\$ 111,245	\$ 519,316	\$ 583,565
Weighted average number of common shares outstanding before restricted participating shares (in thousands)	348,372	346,172	348,047	346,170
Weighted average number of participating restricted common shares outstanding (in thousands)	584	—	584	—
Weighted average number of common shares outstanding (in thousands)	348,956	346,172	348,631	346,170
Earnings per common share	\$0.55	\$0.32	\$ 1.49	\$ 1.69
Earnings per common share - assuming dilution				
Net income attributable to SCUSA shareholders	\$ 191,369	\$ 111,245	\$ 519,316	\$ 583,565
Weighted average number of common shares outstanding (in thousands)	348,956	346,172	348,631	346,170
Effect of employee stock-based awards (in thousands)	6,966	—	7,179	—
Weighted average number of common shares outstanding - assuming dilution (in thousands)	355,922	346,172	355,810	346,170
Earnings per common share - assuming dilution	\$0.54	\$0.32	\$ 1.46	\$ 1.69

13. Fair Value of Financial Instruments

Fair value estimates, methods, and assumptions are as follows:

	Level	September 30, 2014		December 31, 2013	
		Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
Cash and cash equivalents (a)	1	\$43,889	\$43,889	\$ 10,531	\$ 10,531
Receivables held for sale (b)	2	91,153	91,153	82,503	83,344
Retail installment contracts held for investment, net (c)	3	21,319,080	21,940,248	20,219,609	21,465,236
Unsecured consumer loans, net (d)	3	1,340,283	1,369,459	954,189	1,187,286
Receivables from dealers held for investment (e)	3	97,178	97,178	94,745	94,745
Restricted cash (a)	1	1,989,434	1,989,434	1,563,613	1,563,613
Notes payable — credit facilities (f)	3	8,390,080	8,390,080	8,099,773	8,099,773
Notes payable — secured structured financings (g)		18,444,397	18,551,552	15,195,887	15,565,013

Cash and cash equivalents and restricted cash — The carrying amount of cash and cash equivalents, including (a) restricted cash, is at an approximated fair value as the instruments mature within 90 days or less and bear interest at market rates.

(b) Receivables held for sale — Receivables held for sale are carried at the lower of cost or market, as determined on an aggregate basis. The estimated fair value is based on the prices obtained or expected to be obtained in the

subsequent sales usually in the following month.

Retail installment contracts held for investment — Retail installment contracts held for investment are carried at (c) amortized cost, net of loan loss allowance. The estimated fair value is calculated based on estimated market rates for similar contracts with similar credit risks.

Unsecured consumer loans, net — Unsecured consumer loans are carried at amortized cost, net of loan loss allowance. Carrying value approximates fair value for unsecured revolving loans as the loans are short term in (d) duration, do not have a defined maturity date and/or are at a market-based interest rate. For unsecured amortizing loans, the estimated fair value is calculated based on estimated market rates for similar loans with similar credit risks.

Receivables from dealers, held for investment, net — Receivables from dealers held for investment are carried at (e) amortized cost, net of loan loss allowance. The estimated fair value is calculated based on estimated market rates for similar receivables with similar credit risks.

Notes payable — credit facilities — The carrying amount of notes payable related to revolving credit facilities is (f) estimated to approximate fair value. Management believes that the terms of these credit agreements approximate market terms for similar credit agreements.

Notes payable — secured structured financings — The estimated fair value of notes payable related to secured (g) structured financings is calculated based on market quotes for the Company's publicly traded debt and estimated market rates currently available from recent transactions involving similar debt with similar credit risks.

The following table presents the Company's assets and liabilities that are measured at fair value on a recurring basis at September 30, 2014 and December 31, 2013, and are categorized using the fair value hierarchy. The fair value hierarchy includes three levels based on the reliability of the inputs used to determine the fair value:

Fair Value Measurements at September 30, 2014

	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets — trading interest rate caps (a)	\$60,525	\$—	\$60,525	\$—
Assets — cash flow hedging interest rate swaps (a)	8,257	—	8,257	—

(a)

The valuation of swaps and caps is determined using widely accepted valuation techniques including discounted cash flow analysis on the expected cash flows of each derivative. This analysis reflects the contractual terms of the derivative, including the period to maturity, and uses observable market-based inputs. The Company incorporates credit valuation adjustments to appropriately reflect both its own nonperformance risk and the respective counterparty's nonperformance risk in the fair value measurement of its derivatives. In adjusting the fair value of its derivative contracts for the effect of nonperformance risk, the Company has considered the impact of netting and any applicable credit enhancements, such as collateral postings and guarantees. The Company utilizes the exception in ASC 820-10-35-18D (commonly referred to as the "portfolio exception") with respect to measuring counterparty credit risk for instruments (Note 7).

(b) The total return swap is valued based on the estimated market value of the underlying bonds pledged to the associated credit facility.

No amounts were transferred in or out of Level 3 during 2014 or 2013.

The following table presents the Company's assets and liabilities that are measured at fair value on a nonrecurring basis at September 30, 2014 and December 31, 2013, and are categorized using the fair value hierarchy:

Fair Value Measurements at September 30, 2014

	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets — repossessed vehicle inventory	\$ 138,345	\$—	\$ 138,345	\$—

Fair Value Measurements at December 31, 2013

	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets — repossessed vehicle inventory	\$ 129,323	\$—	\$ 129,323	\$—

The Company estimates the fair value of its repossessed vehicle inventory using historical auction rates and current market levels of used car prices.

14. Employee Benefit Plans

SCUSA Compensation Plan — Beginning in 2012, the Company granted stock options to certain executives, other employees, and independent directors under its 2011 Management Equity Plan (the "Plan"). The Plan is administered by the Board of Directors (the Board) and enables the Company to make stock awards up to a total of approximately 29 million common shares (net of shares canceled and forfeited), or 8.5% of the equity invested in the Company as of December 31, 2011.

Stock options granted have an exercise price based on the estimated fair market value of the Company's common stock on the grant date. The stock options expire after ten years and include both time vesting options and performance vesting options. The fair value of the stock options is amortized into income over the vesting period as time and performance vesting conditions are met. Under the Management Shareholder Agreement entered into by certain employees, no shares obtained through exercise of stock options could be transferred until the later of December 31, 2016, and the Company's execution of an initial public offering ("IPO") (the later date of which is referred to as the Lapse Date). Until the Lapse Date, if an employee were to leave the Company, the Company would have the right to repurchase any or all of the stock obtained by the employee through option exercise. If the employee were terminated for cause (as defined in the Plan) or voluntarily left the Company without good reason (as defined in the Plan), in each case, prior to the Lapse Date the repurchase price would be the lower of the strike price or fair market value at the date of repurchase. If the employee were terminated without cause or voluntarily left the Company with good reason, in each case, prior to the Lapse Date the repurchase price is the fair market value at the date of repurchase. Management believes the Company's repurchase right caused the IPO event to constitute an implicit vesting condition and therefore did not record any stock compensation expense until the date of the IPO.

On December 28, 2013, the Board approved certain changes to the Plan and the Management Shareholders Agreement, including acceleration of vesting for certain employees, removal of transfer restrictions for shares underlying a portion of the options outstanding under the Plan, and addition of transfer restrictions for shares underlying another portion of the outstanding options. All of the changes were contingent on, and effective upon, the Company's execution of an IPO and, as such, became effective upon pricing of the IPO on January 22, 2014. Also on December 28, 2013, the Board established the Omnibus Incentive Plan, which enables the Company to grant awards

of nonqualified and incentive stock options, stock appreciation rights, restricted stock awards, restricted stock units and other awards that may be settled in or based upon the value of the Company's common stock up to a total of 5,192,640 common shares. As of September 30, 2014, the Company had granted 583,890 shares of restricted stock to certain executives under terms of the Omnibus Incentive Plan. Compensation expense related to this restricted stock is recognized over a five-year vesting period, with \$637 and \$1,853 recorded for the three and nine months ended September 30, 2014.

On January 23, 2014, the Company executed an IPO, in which selling stockholders offered and sold to the public 85,242,042 shares of common stock at a price of \$24.00 per share. The Company received no proceeds from the initial public offering. Stock-based compensation expense totaling \$117,770 related to vested options was recognized upon the IPO, including expense related to accelerated vesting for certain executives of \$33,845. Also in connection with the IPO, the Company granted additional stock options under the Plan to certain executives, other employees, and an independent director with an estimated fair value of \$10,216, which is being recognized over the awards' vesting period of five years for the employees and three years for the director. Additional stock option grants have been made during the nine months ended September 30, 2014 to employees and independent directors; the estimated fair value associated with these additional grants is \$2,603.

A summary of the Company's stock options and related activity as of and for the nine months ended September 30, 2014 is as follows:

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
	(in whole dollars)			
Options outstanding at January 1, 2014	23,910,062	\$9.81	8.0	
Granted	1,731,329	23.50		
Exercised	(3,061,539)	9.62		(44,572)
Expired	—			
Forfeited	(1,061,230)	12.27		
Options outstanding at September 30, 2014	21,518,622	10.82	7.4	150,511
Options exercisable at September 30, 2014	15,528,012	9.86	7.3	123,372

15. Shareholders' Equity

Treasury Stock

The Company has 3,154 shares of treasury stock outstanding as of September 30, 2014 and December 31, 2013, respectively. Prior to the IPO, the Company repurchased the shares as a result of an employee leaving the company. The value of the treasury stock is immaterial and included within additional paid-in-capital.

Accumulated Other Comprehensive Loss

A summary of changes in accumulated other comprehensive income (loss), net of tax, for the three and nine months ended September 30, 2014 and 2013 is as follows:

	Three Months Ended September 30, 2014			Three Months Ended September 30, 2013

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Background and Overview

We are a full-service, technology-driven consumer finance company focused on vehicle finance and unsecured consumer lending products. We believe that, since our founding in 1995, we have achieved strong brand recognition in the nonprime vehicle finance space. We mainly originate loans indirectly through manufacturer-franchised and selected independent automotive dealers, as well as through relationships with national and regional banks and OEMs. We also directly originate and refinance vehicle loans online. In February 2013, we entered into a ten-year agreement with Chrysler whereby we originate private-label loans and leases under the Chrysler Capital brand. With this agreement, we are now the preferred financing provider for all of Chrysler's retail consumers, including both prime and nonprime customers. From May 1, 2013, the effective date of the Chrysler Agreement, through September 30, 2014, 33% of our retail installment contract origination volume has been prime, as compared to only 14% in 2012, the last full year prior to our entry into the agreement. In addition, we have several relationships through which we provide unsecured consumer loans, private label credit cards and other consumer finance products. We generate revenues and cash flows through interest and other finance charges on our loans and leases. We also earn servicing fee income on our serviced for others portfolios, which consist of loans and leases that we service but do not own and do not report on our balance sheet.

We have demonstrated significant access to the capital markets by funding our operations through securitization transactions and committed credit lines. We raised a total of over \$32 billion of ABS from 2010 through the third quarter of 2014, and we have been the largest issuer of retail auto ABS since 2011. We have significant bank funding relationships, with third-party banks and Santander currently providing approximately \$17.6 billion and \$4.8 billion, respectively, in committed financing. In addition, we have flow agreements in place with Bank of America, Citizens Bank of Pennsylvania (a subsidiary of RBS Citizens Financial Group) and SBNA to fund a portion of our Chrysler Capital business. We have produced consistent, controlled growth and robust profitability in both growth periods and economic downturns. We have been profitable every year for the past ten years, and we delivered an average return on assets of 3.7% from 2009 to 2013 and a return on total common equity of more than 27% in each of those years.

Economic and Business Environment

Consistent with indicators throughout 2013, the U.S. economy continued its slow-paced recovery during the first nine months of 2014. According to the Bureau of Labor Statistics, unemployment declined from 6.7% at the beginning of the year to 5.9% for September. The Federal Reserve continues to taper its bond purchases. Vehicle sales as of September are on pace to total over 16 million for the year. After experiencing higher prices at the beginning of the year, wholesale used vehicle prices have returned to levels seen in recent years.

Regulatory Matters

The U.S. lending industry is highly regulated under various U.S. federal laws, including the Truth-in-Lending, Equal Credit Opportunity, Fair Credit Reporting, Fair Debt Collection Practices, Servicemembers Civil Relief, and Unfair, Deceptive, or Abusive Acts or Practices, Credit CARD, Telephone Consumer Protection, Financial Institutions Reform, Recovery and Enforcement ("FIRREA"), and Gramm-Leach-Bliley Acts, as well as various state laws. We are subject to inspections, examinations, supervision, and regulation by the Commission, the CFPB, the Federal Trade Commission ("FTC") and by regulatory agencies in each state in which we are licensed. In addition, we are subject to certain bank regulations, including oversight by the OCC, the Bank of Spain, and the Federal Reserve, which has the ability to limit certain of our activities, such as the timing and amount of dividends and certain transactions that we might otherwise desire to enter into, such as merger and acquisition opportunities, or to impose other limitations on our growth.

Dodd-Frank Wall Street Reform and Consumer Protection Act

At the federal level, Congress enacted comprehensive financial regulatory reform legislation on July 21, 2010. A significant focus of the new law (the "Dodd-Frank Act") is heightened consumer protection. The Dodd-Frank Act established a new body, the CFPB, which has regulatory, supervisory, and enforcement powers over providers of consumer financial products and services, including us, including explicit supervisory authority to examine and require registration of non-depository lenders and promulgate rules that can affect the practices and activities of lenders. For example, the Company began clearing its applicable interest rate swaps on a regulated exchange in order

to maintain compliance with the Dodd-Frank Act.

Although the Dodd-Frank Act expressly provides that the CFPB has no authority to establish usury limits, some consumer advocacy groups have suggested that various forms of alternative financial services or specific features of consumer loan

37

products should be a regulatory priority, and it is possible that at some time in the future the CFPB could propose and adopt rules making such lending services materially less profitable or impractical, which may impact finance loans or other products that we offer.

In March 2013, the CFPB issued a bulletin recommending that indirect vehicle lenders, a class that includes us, take steps to monitor and impose controls over dealer markup policies whereby dealers charge consumers higher interest rates, with the markup shared between the dealer and the lender.

The CFPB is also conducting supervisory audits of large vehicle lenders and has indicated it intends to study and take action with respect to possible Equal Credit Opportunity Act ("ECOA") "disparate impact" credit discrimination in indirect vehicle finance. If the CFPB enters into a consent decree with one or more lenders on disparate impact claims, it could negatively impact the business of the affected lenders, and potentially the business of dealers and other lenders in the vehicle finance market. This impact on dealers and lenders could increase our regulatory compliance requirements and associated costs. On July 23, 2014, an automotive finance industry publication reported on complaints related to automotive finance institutions filed with the CFPB over the first half of 2014 as compared to prior year. We believe the rise in CFPB complaints for the Company over the last year is attributable to portfolio growth, inclusion of our entire serviced portfolio (on- and off-balance sheet) and consumer credit quality. The Company logs and investigates all complaints, and tracks each complaint until it is resolved or otherwise settled.

In addition to the grant of certain regulatory powers to the CFPB, the Dodd-Frank Act gives the CFPB authority to pursue administrative proceedings or litigation for violations of federal consumer financial laws. In these proceedings, the CFPB can obtain cease and desist orders (which can include orders for restitution or rescission of contracts, as well as other kinds of affirmative relief) and monetary penalties.

The Dodd-Frank Act also included risk retention requirements. On October 22, 2014, six federal agencies approved a final rule implementing these requirements. The rule, which will become effective in October 2015, generally requires sponsors of asset-backed securities (ABS) to retain not less than five percent of the credit risk of the assets collateralizing the ABS issuance. The rule also sets forth prohibitions on transferring or hedging the credit risk that the sponsor is required to retain. The final rule also does not require any retention for securitizations of commercial loans, commercial mortgages, or automobile loans if they meet specific standards for high quality underwriting.

Dividend Restrictions

Dodd-Frank also requires certain banks and bank holding companies, including SHUSA, to perform a stress test and submit a capital plan to the Federal Reserve on an annual basis. On March 26, 2014, the Federal Reserve Bank of Boston (the "FRB") informed SHUSA that, based on qualitative concerns, the FRB objected to SHUSA's capital plan (the "capital plan") pursuant to the Comprehensive Capital Analysis and Review ("CCAR") SHUSA had previously submitted to the FRB. On May 1, 2014, the Company's Board of Directors (the "Board") declared a dividend of \$0.15 per share of SCUSA common stock, payable on May 30, 2014 to shareholders of record on May 12, 2014 (the "May Dividend").

The FRB informed SHUSA on May 22, 2014 that it did not object to SCUSA's payment of the May Dividend, provided that Santander contribute at least \$20.9 million of capital to SHUSA prior to such payment, so that SHUSA's consolidated capital position would be unaffected by the May Dividend. The FRB also informed SHUSA that, until the FRB issues a written non-objection to SHUSA's capital plan, any future Company dividend will require prior receipt of a written non-objection from the FRB.

On May 30, 2014, Santander provided \$21.0 million of additional capital to SHUSA and the Company paid the May Dividend. The Company will not pay any future dividends until such time as SHUSA has submitted to the FRB a capital plan and the FRB issues a written non-objection to such plan or the FRB otherwise issues its written non-objection to the payment of a dividend by the Company. SHUSA has informed the Company that SHUSA does not currently expect to submit a revised capital plan to the FRB until January 2015, subject to the FRB's approval. In addition, on September 15, 2014, SHUSA entered into a written agreement with the FRB memorializing prior discussions under which, among other things, SHUSA is prohibited from allowing its non-wholly-owned nonbank subsidiaries, including the Company, to declare or pay any dividend, or to make any capital distribution, without the prior written approval of the FRB.

Regulation AB II

In response to investor requests for greater transparency, on August 27, 2014, the SEC unanimously voted to adopt final rules known as "Regulation AB II," that, among other things, expanded disclosure requirements and modified the offering and shelf

38

registration process. All Forms 10-D or 10-K that are filed after November 23, 2015 must comply with new rules and disclosures, except asset level disclosures. This will affect the Company's public securitization platform.

Additionally, on August 27, 2014, the SEC adopted final rules (the "Final Rules") implementing provisions of the Dodd-Frank Act relating to third-party due diligence reports for asset-backed securities. The Final Rules take effect nine months after they are published in the Federal Register (i.e., June 2015). These Final Rules have a wider impact on SCUSA than Regulation AB II as it will cover both the on- and off-balance sheet securitization platforms.

Additional legal and regulatory matters affecting the Company's activities are further discussed in part II, Item 1A—Risk Factors.

Disclosure Pursuant to Section 219 of the Iran Threat Reduction and Syria Human Rights Act

Pursuant to Section 219 of the Iran Threat Reduction and Syria Human Rights Act of 2012, which added Section 13(r) to the Securities Exchange Act of 1934, as amended (the "Exchange Act"), an issuer is required to disclose in its annual or quarterly reports, as applicable, whether it or any of its affiliates knowingly engaged in certain activities, transactions or dealings relating to Iran or with individuals or entities designated pursuant to certain Executive Orders. Disclosure is generally required even where the activities, transactions or dealings were conducted in compliance with applicable law.

SCUSA does not have any activities, transactions, or dealings with Iran or Syria that require disclosure. The following activities are disclosed in response to Section 13(r) with respect to affiliates of the Company through its relationship with Santander. During the period covered by this quarterly report:

Santander UK entity holds frozen savings and current accounts for three customers resident in the U.K. who are currently designated by the U.S. for terrorism. The accounts held by each customer were blocked after the customer's designation and have remained blocked and dormant for the nine months ended September 30, 2014. No revenue has been generated by Santander UK on these accounts.

An Iranian national, resident in the U.K., who is currently designated by the U.S. under the Iranian Financial Sanctions Regulations and the NPWMD designation, holds a mortgage with Santander UK that was issued prior to any such designation. No further draw-down has been made (or would be allowed) under this mortgage, although we continue to receive repayment installments. In the nine months ended September 30, 2014, total revenue in connection with this mortgage was approximately £1,800, while net profits were negligible relative to the overall profits of Santander UK. Santander UK does not intend to enter into any new relationships with this customer, and any disbursements will only be made in accordance with applicable sanctions. The same Iranian national also holds two investment accounts with Santander Asset Management UK Limited. The accounts have remained frozen for the nine months ended September 30, 2014. The investment returns are being automatically reinvested, and no disbursements have been made to the customer. For the nine months ended September 30, 2014, total revenue for Santander in connection with the investment accounts was approximately £188 while net profits were negligible relative to its overall profits of Banco Santander, S.A.

In addition, during the third quarter 2014, Santander UK has identified two additional customers.

A UK national is designated by the U.S. under the NPWMD sanctions program and holds a business account, where no transactions have taken place. This account is in the process of being closed. No revenue or profits has been generated.

A second UK national designated by the U.S. for terrorism held a personal current account and a personal credit card account in the third quarter of 2014, both of which have now been closed. Although transactions have taken place on the current account during the reportable period, revenue and profits generated were negligible. No transactions have taken place on the credit card.

In addition, the Santander group has certain legacy export credits and performance guarantees with Bank Mellat, which are included in the U.S. Department of the Treasury's Office of Foreign Assets Control's Specially Designated Nationals and Blocked Persons List. The Bank entered into two bilateral credit facilities in February 2000 in an aggregate principal amount of €25.9 million. Both credit facilities matured in 2012. In addition, in 2005 Santander participated in a syndicated credit facility for Bank Mellat of €15.5 million, which matures on July 6, 2015. As of September 30, 2014, Santander was owed €3.1 million under this credit facility.

Bank Mellat has been in default under all of these agreements in recent years and Santander has been and expects to continue to be repaid any amounts due by official export credit agencies, which insure between 95% and 99% of the outstanding amounts under these credit facilities. No funds have been extended by Santander under these facilities since they were granted.

Santander also has certain legacy performance guarantees for the benefit of Bank Sepah and Bank Mellat (stand-by letters of credit to guarantee the obligations - either under tender documents or under contracting agreements - of contractors who participated in public bids in Iran) that were in place prior to April 27, 2007. However, should any of the contractors default in their obligations under the public bids, Santander would not be able to pay any amounts due to Bank Sepah or Bank Mellat because any such payments would be frozen pursuant to Council Regulation (EU) No. 961/2010.

In the aggregate, all of the transactions described above resulted in approximately €30,000 gross revenues and approximately €46,000 net loss to Santander for the nine months ended September 30, 2014, all of which resulted from the performance of export credit agencies rather than any Iranian entity. Santander has undertaken significant steps to withdraw from the Iranian market such as closing its representative office in Iran and ceasing all banking activities therein, including correspondent relationships, deposit taking from Iranian entities and issuing export letters of credit, except for the legacy transactions described above. Santander is not contractually permitted to cancel these arrangements without either (i) paying the guaranteed amount - which payment would be frozen as explained above (in the case of the performance guarantees), or (ii) forfeiting the outstanding amounts due to it (in the case of the export credits). As such, Santander intends to continue to provide the guarantees and hold these assets in accordance with company policy and applicable laws.

How We Assess Our Business Performance

Net income attributable to our shareholders, and the associated return on equity, are the primary metrics by which we judge the performance of our business. Accordingly, we closely monitor the primary drivers of net income:

Net financing income — We track the spread between the interest and finance charge income earned on our assets and the interest expense incurred on our liabilities, and continually monitor the components of our yield and our cost of funds. In addition, we monitor external rate trends, including the Treasury swap curve and spot and forward rates.

Net credit losses — Each of our loans and leases is priced using our risk-based proprietary models. The profitability of a loan is directly connected to whether or not the actual net credit losses are consistent with forecasted losses; therefore, we closely analyze credit performance. We perform this analysis at the vintage level for individually acquired retail installment contracts and at the pool level for purchased portfolios, enabling us to pinpoint drivers of any unusual or unexpected trends. We also monitor recovery rates, both industry-wide and our own, because of their contribution to the severity of our charge-offs. Additionally, because delinquencies are an early indicator of future net credit losses, we analyze delinquency trends, adjusting for seasonality, to determine whether or not our loans are performing in line with our original estimation.

Other income — The various flow agreements in connection with our Chrysler relationship have resulted in a growing portfolio of assets serviced for others. These assets provide a steady stream of servicing income and may provide a gain on sale. We monitor the size of the portfolio and average servicing fee rate and gain. Additionally, our unsecured lending business provides fee income, which we monitor as an input to return on the unsecured portfolio.

Operating expenses — We assess our operational efficiency using our cost-to-income ratio. We perform extensive analysis to determine whether observed fluctuations in operating expense levels indicate a trend or are the nonrecurring impact of large projects. Our operating expense analysis also includes a loan- and portfolio-level review of origination and servicing costs to assist us in assessing profitability by pool and vintage.

Because volume and portfolio size determine the magnitude of the impact of each of the above factors on our earnings, we also closely monitor origination volume along with annual percentage rate (“APR”) and discounts (including subvention and net of dealer participation).

Recent Developments and Other Factors Affecting Our Results of Operations

Regulatory Restrictions

As further described above under Regulatory Matters - Dividend Restrictions, the FRB has objected to SHUSA's capital plan, resulting in, among other consequences, SCUSA's inability to pay dividends until such time as SHUSA has submitted to the FRB a revised capital plan and the FRB issues a written non-objection to such plan or the FRB otherwise issues its written non-objection to the payment of a dividend by SCUSA. Additionally, SHUSA is

prohibited by a written agreement with the FRB from allowing its non-wholly-owned nonbank subsidiaries, including the Company, to declare or pay any dividend, or to make any capital distribution, without the prior written approval of the FRB.

40

We expect to incur additional compliance costs related to regulatory compliance, including CCAR, as we seek to develop a best-in-class compliance capability. Costs of the process will include, but may not be limited to, personnel, IT systems, consultants and advisors, and legal costs. These costs, as well as other aspects of the current regulatory environment applicable to the Company (including dividend and growth restrictions), could limit the Company's earnings growth.

Chrysler Capital

Since May 1, 2013, we have been the preferred provider for Chrysler's consumer loans and leases and dealer loans under terms of the ten-year Chrysler Agreement. Business generated under terms of the Chrysler Agreement is branded as Chrysler Capital. In connection with entering into the Chrysler Agreement, we paid Chrysler a \$150 million upfront, nonrefundable fee, which is being amortized over the ten-year term as an adjustment to finance and other interest income. We have also executed an Equity Option Agreement with Chrysler, whereby Chrysler may elect to purchase an equity participation of any percentage in the Chrysler Capital portion of our business at fair market value.

The Chrysler Agreement could be terminated in the event of a change in control of SCUSA, which, as defined in the agreement, would occur if both a single shareholder acquired more than 20% of our outstanding shares of common stock and SHUSA owned fewer shares than that shareholder. We are also required to meet specific transition milestones related to market penetration rates, approval rates, dedicated staffing, and service-level standards for the initial year following launch. If the transition milestones were not met in the first year, the agreement could terminate and we could lose the ability to operate as Chrysler Capital. We recently agreed with Chrysler that these milestones have been met to Chrysler's satisfaction as of the end of the first year, April 30, 2014, and that the Chrysler Agreement will continue in effect. We must continue to meet penetration and approval rate targets and maintain service-level standards or the agreement can be terminated. Our penetration rate targets, which are measured as of the end of each year of the Chrysler Agreement (April 30), for years one through five of the Chrysler Agreement are 31%, 44%, 54%, 64% and 65%, respectively. Our penetration rate for the three months ended September 30, 2014 was 29%. During the period from the May 1, 2013 launch of the Chrysler Capital business through September 30, 2014, we originated approximately \$16.7 billion of Chrysler Capital retail installment contracts and more than \$6.1 billion of Chrysler Capital vehicle leases, and facilitated the origination of more than \$1.7 billion in leases and dealer loan originations for SBNA under flow agreements.

We have a flow agreement with Bank of America whereby we are committed to sell a contractually determined amount of eligible loans to Bank of America on a monthly basis. The amount sold monthly is up to \$300 million and varies depending on the amount and credit quality of eligible current month originations and prior month sales. The agreement extends through May 31, 2018. For loans sold, we retain the servicing rights at contractually agreed upon rates. We also may receive or pay a servicer performance payment based on an agreed-upon formula if performance on the sold loans is better or worse, respectively, than expected performance at the time of sale. These servicer performance payments are limited to a known dollar amount at time of sale and are not expected to be significant to our total servicing compensation from the flow agreement. For the three and nine months ended September 30, 2014, the Company sold approximately \$882 million and \$2.4 billion of loans under this agreement, respectively.

In June 2013, we entered into a flow agreement with SBNA, whereby we provided the bank with the first right to review and assess dealer lending opportunities and, if the bank elected, to provide the proposed financing. We provided servicing on all loans originated under this arrangement. We also received or paid a servicer performance payment if it yielded, net of credit losses, on the loans are higher or lower, respectively, than expected at origination. As of September 30, 2014, SBNA owned approximately \$595 million of loans originated under this agreement. Servicer performance payments earned for the three and nine months ended September 30, 2014 totaled approximately \$1.2 million and \$2.9 million, respectively. The agreement was terminated on October 1, 2014 and replaced with a revised arrangement. Under the revised terms, the servicing of all Chrysler Capital receivables from dealers, including receivables held by SBNA and by the Company, was transferred to SBNA. The agreement executed in connection with this transfer requires the Company to permit SBNA first right to review and assess Chrysler Capital dealer lending opportunities and requires SBNA to pay the Company a relationship management fee based upon the performance and yields of Chrysler Capital dealer loans held by SBNA.

In February 2014, we entered into a direct origination agreement with SBNA whereby we provide SBNA with the first right to review and approve consumer vehicle lease applications, subject to volume constraints. We may review any applications declined by SBNA for our own portfolio. We provide servicing and receive an origination fee on all leases originated under this agreement. As of September 30, 2014, approximately \$1.2 billion had been originated under this agreement, of which approximately \$48 million is subject to an indemnification agreement whereby the Company will reimburse SBNA for any credit or residual losses on the covered leases.

In May 2014, we entered into a loan flow agreement with Citizens Bank of Pennsylvania (CBP) (a subsidiary of RBS Citizens Financial Group) whereby CBP has committed to purchase up to \$600 million per quarter of Chrysler Capital prime loans over

the next three years. The minimum commitment is \$250 million per quarter for the first four quarters and \$400 million thereafter. During the three and nine months ended September 30, 2014, we have sold \$0.5 billion and \$1.3 billion, respectively, to Citizens under terms of this flow agreement and predecessor purchase agreements. We retain servicing on the sold loans and will owe CBP a loss-sharing payment capped at 0.5% of the original pool balance if losses exceed a specified threshold, established on a pool-by-pool basis. We currently do not expect such loss-sharing payments to be material.

Other OEM Relationships

In April 2014, SCUSA executed an application transfer agreement with Nissan, whereby SCUSA provides nonprime retail auto financing through a turn-down program for new and used vehicles for Nissan's customers and dealers in the U.S. As of September 30, 2014, approximately \$264 million had been originated under this agreement and a predecessor pilot arrangement.

Secondary Offering

On August 14, 2014, the Company filed a shelf registration statement on Form S-1 with the Commission to register up to 14,178,779 shares of its common stock owned by Auto Finance Holdings. On August 22, 2014, the Commission declared the registration statement effective. On September 8, 2014, J.P. Morgan, acting as sole bookrunner for the offering, purchased 10,047,954 shares, or 2.88% of our outstanding common stock, from Auto Finance Holdings for \$18.65 per share. As a result of the sale, Auto Finance Holdings' ownership in the Company declined from approximately 4.1% to approximately 1.2% of our outstanding common stock. Auto Finance Holdings received all of the net proceeds from the sale of such shares.

Our Reportable Segment

The Company has one reportable segment: Consumer Finance. This segment includes our vehicle financial products and services, including retail installment contracts, vehicle leases, and dealer loans, as well as financial products and services related to motorcycles, RVs, and watercraft. It also includes our unsecured personal loan and point-of-sale financing operations.

Volume

Our volume of individually acquired loans and leases, including net balance increases on revolving loans, average APR, and discount during the three and nine months ended September 30, 2014 and 2013 have been as follows:

Discount	—	—		

We record interest income from individually acquired retail installment contracts, unsecured consumer loans and receivables from dealers in accordance with the terms of the loans, generally discontinuing and reversing accrued income once a loan becomes more than 60 days past due, except in the case of revolving unsecured loans and receivables from dealers, for which we continue to accrue interest until charge-off. Receivables from dealers and term unsecured consumer loans generally are not acquired at a discount. We amortize discounts, subvention payments from manufacturers, and origination costs as adjustments to income from individually acquired retail installment contracts using the effective yield method. We amortize the discount, if applicable, on revolving unsecured consumer loans straight-line over the estimated period over which the receivables are expected to be outstanding.

For individually acquired retail installment contracts, unsecured consumer loans, capital leases, and receivables from dealers, we also establish a loan or lease loss allowance for the estimated losses inherent in the portfolio. We estimate probable losses based on contractual delinquency status, historical loss experience, expected recovery rates from sale of repossessed collateral, bankruptcy trends, and general economic conditions such as unemployment rates.

We classify substantially all of our vehicle leases as operating leases. The net capitalized cost of each lease is recorded as an asset, which is depreciated straight-line over the contractual term of the lease to the expected residual value.

Lease payments due from customers are recorded as income until and unless a customer becomes more than 60 days delinquent, at which time the accrual of revenue is discontinued and reversed. The accrual is resumed and reinstated if a delinquent account subsequently becomes 60 days or less past due. Subvention payments from the manufacturer, down payments from the customer, and initial direct costs incurred in connection with originating the lease are amortized straight-line over the contractual term of the lease.

Historically, our primary means of acquiring retail installment contracts was through individual acquisitions immediately after origination by a dealer. We also periodically purchase pools of receivables and had significant volumes of these purchases during the credit crisis. While we continue to pursue such opportunities when available, we did not purchase any pools during the nine months ended September 30, 2014 and 2013. All of the retail installment contracts acquired during these periods were acquired individually. For our existing purchased receivables portfolios, which were acquired at a discount partially attributable to credit deterioration since origination, we estimate the expected yield on each portfolio at acquisition and record monthly accretion income based on this expectation. We periodically re-evaluate performance expectations and may increase the accretion rate if a pool is performing better than expected. If a pool is performing worse than expected, we are required to continue to record accretion income at the previously established rate and to record impairment to account for the worsening performance.

(a) Financial data for the years 2005 and 2004 is derived from the audited consolidated financial statements of Drive Financial Services LP, the predecessor company to Santander Consumer USA Inc.

(b) Provision for credit losses for the years 2005 and 2004 includes impairment of residual interests in securitizations, which had been retained and recorded as assets under U.S. GAAP applicable at the time.

No income tax expense was recorded for the years 2005 and 2004 as Drive Financial Services LP was a partnership (c) and therefore not directly subject to Federal and state income taxes. Income for those years was instead passed through to the individual tax returns of the partners.

There were no shares outstanding at the end of the years 2005 and 2004 as Drive Financial Services LP was a partnership, rather than a corporation, and therefore did not issue shares. Drive Financial Services LP was (d) dissolved into the company now known as Santander Consumer USA Inc. on December 6, 2006. Earnings per share and dividend per share amounts are not applicable or not meaningful for the years 2006, 2005, and 2004.

- (1) "Yield on earning assets" is defined as the ratio of Total finance and other interest income, net of Leased vehicle expense, to Average gross finance receivables, loans and leases
- (2) "Cost of debt" is defined as the ratio of Interest expense to Average debt
- (3) "Net interest margin" is defined as the ratio of Net interest income to Average gross finance receivables, loans and leases
- (4) "Efficiency ratio" is defined as the ratio of Operating expenses to the sum of Net finance and other interest income and Other income
- (5) "Return on average assets" is defined as the ratio of Net income to Average total assets
- (6) "Return on average equity" is defined as the ratio of Net income to Average total equity
- (7) "Net charge-off ratio" is defined as the ratio of Charge-offs, net of recoveries, to average balance of the respective portfolio.
- (8) "Delinquency ratio" is defined as the ratio of End of period Delinquent principal over 60 days to End of period Gross finance receivables and loans
- (9) "Tangible common equity to tangible assets" is defined as the ratio of Total equity, excluding Goodwill and intangible assets, to Total assets, excluding Goodwill and intangible assets - a reconciliation from GAAP to this non-GAAP measure for the years ended December 31, 2004 through 2013 is as follows:

	Year Ended December 31,

Three and Nine Months Ended September 30, 2014 Compared to Three and Nine Months Ended September 30, 2013
Interest on Finance Receivables and Loans

	Three Months Ended		Increase (Decrease)		Nine Months Ended		Increase (Decrease)			
	September 30, 2014	2013	Amount	Percent	September 30, 2014	2013	Amount	Percent		
	(Dollars in thousands)				(Dollars in thousands)					
Income from individually acquired retail installment contracts	\$1,047,879	\$879,628	\$168,251	19 %	\$3,061,554	\$2,333,857	\$727,697	31 %		
Income from purchased receivables portfolios	43,231	87,237	(44,006)	(50)%	164,651	327,712	(163,061)	(50)%		
Income from receivables from dealers	896	2,180	(1,284)	(59)%	3,502	4,915	(1,413)	(29)%		
Income from unsecured consumer loans	85,822	42,447	43,375	102 %	251,898	57,290	194,608	340 %		
Total interest on finance receivables and loans	\$1,177,828	\$1,011,492	\$166,336	16 %	\$3,481,605	\$2,723,774	\$757,831	28 %		

Income from individually acquired retail installment contracts increased \$168 million, or 19%, from the third quarter of 2013 to the third quarter of 2014, and \$728 million, or 31%, from the nine months ended September 30, 2013 to the nine months ended September 30, 2014, in line with the growth in the average outstanding balance of our portfolio of these contracts by 22% and 35%, respectively.

Income from purchased receivables portfolios decreased \$44 million, or 50%, from the third quarter of 2013 to the third quarter of 2014, and \$163 million, or 50%, from the nine months ended September 30, 2013 to the nine months ended September 30, 2014, due to the continued runoff of the portfolios. The average balance of the portfolios decreased from \$2.7 billion and \$3.3 billion for the three and nine months ended September 30, 2013, to \$1.1 billion and \$1.4 billion for the three and nine months ended September 30, 2014, respectively, as we have made no portfolio acquisitions since 2012.

Income from receivables from dealers decreased \$1.3 million, or 59%, from the third quarter of 2013 to the third quarter of 2014, due to a decrease in the average balance outstanding on Chrysler Capital dealer loans as well as the December 2013 liquidation of a revolving credit facility with a third-party vehicle dealer and lender. Income from receivables from dealers decreased \$1.4 million, or 29%, from the nine months ended September 30, 2013 to the nine months ended September 30, 2014, as the increase in average Chrysler Capital dealer loans outstanding was more than offset by the liquidation of the third-party revolving credit facility.

Income from unsecured consumer loans more than doubled from the third quarter of 2013 to the third quarter of 2014, due to the growth in the average outstanding balance of our unsecured consumer loan portfolio by nearly threefold, partly offset by a decrease in discount accretion from \$15 million to less than \$3 million as most of the original discount at which we purchased the first portion of our unsecured revolving consumer loans was fully accreted by the third quarter of 2014. Income from unsecured consumer loans grew over fourfold from the nine months ended September 30, 2013 to the nine months ended September 30, 2014, due to the growth in the average portfolio by over fivefold, partly offset by a smaller increase (from \$21 million to \$33 million) in discount accretion.

Leased Vehicle Income and Expense

	Three Months Ended					Nine Months Ended				
	September 30,		Increase (Decrease)			September 30,		Increase (Decrease)

Leased vehicle expense	200,397	41,485	158,912	383	%	499,601	48,513	451,088	930	%
	\$62,751	\$8,614	\$54,137	628	%	\$129,608	\$11,616	\$117,992	1,016	%

The Company began originating vehicle leases in the first quarter of 2013 under the Chrysler Agreement. Leased vehicle revenue includes customer payments and the accretion of manufacturer incentive payments and discounts, net of amortization of initial direct costs incurred in connection with origination of the leases and amortization of dealer participation. Leased vehicle expense includes depreciation of the leased vehicle and gains and losses on sale of vehicle upon lease termination.

Interest Expense

	Three Months Ended					Nine Months Ended				
	September 30,		Increase (Decrease)			September 30,		Increase (Decrease)		
	2014	2013	Amount	Percent	%	2014	2013	Amount	Percent	%
	(Dollars in thousands)					(Dollars in thousands)				
Interest expense on notes payable	\$120,980	\$104,156	\$16,824	16	%	\$351,497	\$268,466	\$83,031	31	%
Interest expense on derivatives	8,155	16,433	(8,278)	(50)	%	30,398	22,596	7,802	35	%
Total interest expense	\$129,135	\$120,589	\$8,546	7	%	\$381,895	\$291,062	\$90,833	31	%

Interest expense on notes payable increased \$17 million, or 16%, from the third quarter of 2013 to the third quarter of 2014, and \$83 million, or 31%, from the nine months ended September 30, 2013 to the nine months ended September 30, 2014, less than the growth in average debt outstanding of 25% and 38%, respectively, due to the more favorable interest rates on our most recent secured structured financings.

Interest expense on derivatives decreased from \$16 million in the third quarter of 2013 to \$8 million in the third quarter of 2014, primarily due to favorable mark-to-mark adjustments on trading derivatives and increased from \$23 million for the nine months ended September 30, 2013 to \$30 million for the nine months ended September 30, 2014, primarily due to the increase in notional balance outstanding.

Provision for Credit Losses

	Three Months Ended				Nine Months Ended			
	September 30,		Increase (Decrease)		September 30,		Increase (Decrease)	
	2014	2013	Amount	Percent	2014	2013	Amount	Percent
	(Dollars in thousands)				(Dollars in thousands)			
Provision for credit losses on individually acquired retail installment contracts	\$601,414	\$447,565	\$153,849	34 %	\$1,785,482	\$1,074,487	\$710,995	66 %
Incremental increase (decrease) in allowance related to purchased receivable portfolios	(4,884)	93,718	(98,602)	(105)%	(33,396)	51,654	(85,050)	(165)%
Provision for credit losses on receivables from dealers	(275)	103	(378)	(367)%	(442)	1,593	(2,035)	(128)%
Provision for credit losses on unsecured consumer loans	167,409	56,815	110,594	195 %	299,750	96,071	203,679	212 %
Provision for credit losses on capital leases	6,025	—	6,025		6,025	—	6,025	
Provision for credit losses	\$769,689	\$598,201	\$171,488	29 %	\$2,057,419	\$1,223,805	\$833,614	68 %

Provision for credit losses on our individually acquired retail installment contracts increased \$154 million, or 34%, from the third quarter of 2013 to the third quarter of 2014, due to portfolio growth as well as the increase in net charge-off rate from 6.5% to 7.9% as increased competition has made it more difficult for lenders, including us, to price for incremental risk. Provision for credit losses on our individually acquired retail installment contracts increased \$711 million, or 66% from the nine months ended September 30, 2013 to the nine months ended September 30, 2014, also due to portfolio growth as well as an increase in net charge-off rate from 5.0% to 6.4%. Impairment on purchased receivables changed from an expense for the three and nine months ended September 30, 2013 to a credit for three and nine months ended September 30, 2014, due to improving performance in the current year as compared to worsening performance in the prior year.

Provision on unsecured consumer loans increased significantly over the prior year in line with growth in the portfolio. In 2014, we established a portfolio of leases classified as capital leases and began recording provision on these assets.

Profit Sharing

	Three Months Ended				Nine Months Ended			
	September 30,		Increase (Decrease)		September 30,		Increase (Decrease)	
	2014	2013	Amount	Percent	2014	2013	Amount	Percent
	(Dollars in thousands)				(Dollars in thousands)			
Profit sharing	\$10,556	\$27,238	\$(16,682)	(61)%	\$66,773	\$34,802	\$31,971	92 %

Profit sharing includes revenue sharing payments due to Chrysler Group based on a portion of net interest income on consumer loans and leased vehicle income originated under the Chrysler Capital business since May 1, 2013.

Payments are accrued as incurred and due quarterly in arrears, beginning in July 2013. Profit sharing also includes profit sharing payments due to the originator and servicer of the Company's unsecured revolving loan portfolio.

Payments are accrued as incurred and due monthly in arrears, beginning in June 2013. The decrease in profit sharing from the third quarter of 2013 to the third quarter of 2014 was due to increased charge offs in the unsecured portfolio

as it seasoned, thereby decreasing our revenue sharing, while the increase from the nine months ended September 30, 2013 to the nine months ended September 30, 2014 was due to the growth of the portfolios.

Other Income

	Three Months Ended		Increase (Decrease)		Nine Months Ended		Increase (Decrease)	
	September 30, 2014	2013	Amount	Percent	September 30, 2014	2013	Amount	Percent

	2014	2013
	(Dollars in thousands)	
SBNA dealer loans	\$877,786	\$255,256
SBNA retail installment contracts	950,325	1,266,300
SBNA leases	1,491,395	—
Total serviced for related parties	3,319,506	1,521,556
Off-balance sheet securitizations	2,375,106	—
Other third parties	4,553,573	1,474,455
Total serviced for third parties	6,928,679	1,474,455
Total serviced for others	\$10,248,185	\$2,996,011

Investment gains, net increased from \$8 million for the third quarter of 2013 to \$38 million for the third quarter of 2014, as the third quarter of 2014 included an off-balance sheet securitization driving substantially all of the gain.

Investment gains, net increased from \$9 million for the nine months ended September 30, 2013 to \$95 million for the nine months ended September 30, 2014, due to the execution of two off-balance sheet securitizations year-to-date in 2014, which generating \$72 million in gains, sales to CBP beginning in March 2014 that have generated \$18 million in gains year-to-date, and a bulk lease sale to our affiliate, SBNA, generating an approximately \$5 million gain.

We record servicing fee income on loans that we service but do not own and do not report on our balance sheet.

Servicing fee income increased from \$7 million in the third quarter of 2013 to \$21 million in the third quarter of 2014, and from \$21 million for the nine months ended September 30, 2013 to \$53 million for the nine months ended September 30, 2014, as a result of significant growth in our average serviced for others portfolio as we sell and facilitate originations of loans on which we retain servicing.

Fees, commissions, and other increased \$28 million, or 44%, from the third quarter of 2013 to the third quarter of 2014, primarily due to late charge and other fee income earned from our revolving unsecured portfolio, which has grown significantly since its inception in the second quarter of 2014. Fees, commissions, and other income increased by \$97 million, or 54%, from the nine months ended September 30, 2013 to the nine months ended September 30,

2014, as the impact of growth in the portfolio more than offset the \$22 million decline in deficiency income (proceeds on loans that were charged off prior to our acquiring them) to an insignificant amount.

Operating Expenses

	Three Months Ended					Nine Months Ended				
	September 30,		Increase (Decrease)			September 30,		Increase (Decrease)		
	2014	2013	Amount	Percent	%	2014	2013	Amount	Percent	%
	(Dollars in thousands)					(Dollars in thousands)				
Salary and benefits expense	\$88,940	\$79,293	\$9,647	12	%	\$384,544	\$217,172	\$167,372	77	%
Repossession expense	50,738	36,091	14,647	41	%	144,817	103,231	41,586	40	%
Other operating costs	62,228	60,756	1,472	2	%	202,219	175,909	26,310	15	%
Total operating expenses	\$201,906	\$176,140	\$25,766	15	%	\$731,580	\$496,312	\$235,268	47	%

Total operating expenses increased \$26 million, or 15%, from the third quarter of 2013 to the third quarter of 2014 driven by the growth in our portfolio. Our efficiency ratio decreased from 18.0% for the third quarter of 2013 to 16.0% for the third quarter of 2014.

Total operating expenses increased \$235 million, or 47%, from the nine months ended September 30, 2013 to the nine months ended September 30, 2014 primarily due to the recording of \$123 million in stock compensation expense related to option plans, most of which was recorded upon and in connection with our initial public offering in January 2014. This expense caused our efficiency ratio to increase from 18.7% for the nine months ended September 30, 2013 to 20.0% for the nine months ended September 30, 2014.

Income Tax Expense

	Three Months Ended					Nine Months Ended				
	September 30,		Increase (Decrease)			September 30,		Increase (Decrease)		
	2014	2013	Amount	Percent	%	2014	2013	Amount	Percent	%
	(Dollars in thousands)					(Dollars in thousands)				
Income tax expense	\$90,397	\$65,486	\$24,911	38	%	\$282,081	\$322,413	\$(40,332)	(13)	%
Income before income taxes	281,766	177,307	104,459	59	%	801,397	904,157	(102,760)	(11)	%

Effective tax rate 32.1 % 36.9 % 35.2 % 35.7 %

Our effective tax rate decreased from 36.9% in the third quarter of 2013 to 32.1% in the third quarter of 2014 due to a release of uncertain tax position reserves during the quarter ended September 30, 2014. The decrease from 35.7% for the nine months ended September 30, 2013 to 35.2% for the nine months ended September 30, 2014, was driven by the release of uncertain tax positions as well as an increase in favorable permanent book-tax differences for the nine months ended September 30, 2014, specifically hybrid-electric credits on certain leased vehicles.

Other Comprehensive Income (Loss)

	Three Months Ended			Increase (Decrease)			Nine Months Ended			Increase (Decrease)		
	September 30,		Amount	Percent		September 30,		Percent		Amount		Percent
	2014	2013				2014	2013					
	(Dollars in thousands)						(Dollars in thousands)					
Change in unrealized gains (losses) on cash flow hedges, net of tax	\$8,685	\$986	\$7,699	781	%	\$7,409	\$5,821	\$1,588	27	%		
Change in unrealized gains on investments available for sale, net of tax	—	(629)	629	(100)	%	—	(3,252)	3,252	(100)	%		
Other comprehensive income, net	\$8,685	\$357	\$8,328	2,333	%	\$7,409	\$2,569	\$4,840	188	%		

The change in our unrealized gains (losses) on cash flow hedges for the three and nine months ended September 30, 2014 increased as compared to the change for the three and nine months ended September 30, 2013 due to larger favorable interest rate increases.

The unrealized gains on our investments decreased to zero during the three and nine months ended September 30, 2013 as the bonds were paid off in the third quarter of 2013.

Credit Quality

Loans and Other Finance Receivables

Nonprime loans comprise 85% of our portfolio as of September 30, 2014. We record an allowance for loan losses to cover our estimate of inherent losses on our individually acquired retail installment contracts and other loans and receivables. For retail installment contracts we acquired in pools subsequent to their origination, we anticipate the expected credit losses at purchase and record income thereafter based on the expected effective yield, recording impairment if performance is worse than expected at purchase.

Delinquency

An account is considered delinquent if a substantial portion of a scheduled payment has not been received by the date such payment was contractually due. Delinquencies may vary from period to period based upon the average age or seasoning of the portfolio, seasonality within the calendar year, and economic factors. Historically, our delinquencies have been highest in the period from November through January due to consumers' holiday spending.

The following is a summary of retail installment contracts held for investment that are (i) 31-60 days delinquent and (ii) more than 60 days delinquent but not yet in repossession:

	September 30, 2014				December 31, 2013			
	Retail Installment Contracts Held for Investment		Unsecured Consumer Loans		Retail Installment Contracts Held for Investment		Unsecured Consumer Loans	
	Dollars (in thousands)	Percent (a)	Dollars (in thousands)	Percent (a)	Dollars (in thousands)	Percent (a)	Dollars (in thousands)	Percent (a)
Principal 31-60 days past due	\$2,240,237	9.0	\$51,274	3.1	\$2,050,688	8.8	\$28,102	2.4
Delinquent principal over 60 days	969,988	3.9	131,537	8.0	1,037,013	4.5	65,360	5.6
Total delinquent contracts	\$3,210,225	12.9	\$182,811	11.1	\$3,087,701	13.3	\$93,462	8.0

(a)Percent of unpaid principal balance.

All of our receivables from dealers and all of our retail installment contracts held for sale were current as of September 30, 2014 and December 31, 2013. Delinquencies on the capital lease receivables portfolio, which began in 2014, were immaterial as of September 30, 2014.

Credit Loss Experience

The following is a summary of our net losses and repossession activity on our finance receivables for the nine months ended September 30, 2014 and 2013.

	Nine Months Ended September 30,				
	2014		2013		
	Retail		Retail		
	Installment	Unsecured	Installment	Unsecured	
	Contracts - Held	Consumer	Contracts - Held	Consumer	
	for	Loans	for	Loans	
	Investment		Investment		
	(Dollars in thousands)				
Principal outstanding at period end	\$24,923,308	\$1,640,276	\$23,306,943	\$715,602	
Average principal outstanding during the period	\$24,420,669	\$1,369,631	\$20,506,168	\$248,206	
Number of receivables outstanding at period end	1,620,995	1,710,372	1,652,837	1,074,128	
Average number of receivables outstanding during the period	1,618,615	1,672,596	1,580,233	345,871	
Number of repossessions (1)	166,045	n/a	125,930	n/a	
Number of repossessions as a percent of average number of receivables outstanding	13.68	% n/a	10.63	% n/a	
Net losses	\$1,172,488	\$178,675	\$771,367	\$821	
Net losses as a percent of average principal amount outstanding (2)	6.40	% 17.39	% 5.02	% 0.44	%

(1) Repossessions are net of redemptions. The number of repossessions includes repossessions from the outstanding portfolio and from accounts already charged off.

(2) The percentages for the nine months ended September 30, 2014 and 2013 are annualized and are not necessarily indicative of a full year's actual results.

We have had no charge-offs on our receivables from dealers and no material charge-offs on our capital lease receivables.

Deferrals and Troubled Debt Restructurings

In accordance with our policies and guidelines, we, at times, offer payment deferrals to borrowers on our retail installment contracts, whereby the consumer is allowed to move up to three delinquent payments to the end of the loan. Our policies and guidelines limit the number and frequency of deferrals that may be granted to one every six months and eight over the life of a loan. Additionally, we generally limit the granting of deferrals on new accounts until a requisite number of payments has been received. During the deferral period, we continue to accrue and collect interest on the loan in accordance with the terms of the deferral agreement.

At the time a deferral is granted, all delinquent amounts may be deferred or paid, resulting in the classification of the loan as current and therefore not considered a delinquent account. Thereafter, such account is aged based on the timely payment of future installments in the same manner as any other account.

The following is a summary of deferrals on our retail installment contracts held for investment as of the dates indicated:

	September 30, 2014		December 31, 2013		
	(Dollars in thousands)				
Never deferred	\$18,170,769	72.9	% \$17,532,461	75.6	%
Deferred once	3,556,496	14.3	% 2,935,099	12.7	%
Deferred twice	1,700,253	6.8	% 1,356,957	5.8	%
Deferred 3 - 4 times	1,422,603	5.7	% 1,311,791	5.7	%
Deferred greater than 4 times	73,187	0.3	% 63,033	0.3	%
Total	\$24,923,308		\$23,199,341		

We evaluate the results of our deferral strategies based upon the amount of cash installments that are collected on accounts after they have been deferred versus the extent to which the collateral underlying the deferred accounts has depreciated over the same period of time. Based on this evaluation, we believe that payment deferrals granted according to our policies and guidelines are an effective portfolio management technique and result in higher ultimate

cash collections from the portfolio.

Changes in deferral levels do not have a direct impact on the ultimate amount of consumer finance receivables charged off by us. However, the timing of a charge-off may be affected if the previously deferred account ultimately results in a charge-off. To the extent that deferrals impact the ultimate timing of when an account is charged off, historical charge-off ratios, loss confirmation periods, and cash flow forecasts for loans classified as TDRs used in the determination of the adequacy of our allowance for loan losses are also impacted. Increased use of deferrals may result in a lengthening of the loss confirmation

60

period, which would increase expectations of credit losses inherent in the portfolio and therefore increase the allowance for loan losses and related provision for loan losses. Changes in these ratios and periods are considered in determining the appropriate level of allowance for loan losses and related provision for loan losses.

If a customer's financial difficulty is not temporary, we may agree, or be required by a bankruptcy court, to grant a modification involving one or a combination of the following: a reduction in interest rate, a reduction in loan principal balance, or an extension of the maturity date. The servicer also may grant concessions on our unsecured consumer loans in the form of principal or interest rate reductions or payment plans. The following is a summary of the principal balance as of September 30, 2014 and December 31, 2013 of loans that have received these modifications and concessions:

	September 30, 2014		December 31, 2013

Delinquent principal over 60 days	422,776	8,017	356,969	1,396
Total delinquent TDRs	\$1,229,595	\$9,118	\$913,458	\$2,271

As of September 30, 2014 and December 31, 2013, we did not have any dealer loans classified as TDRs and had not granted deferrals or modifications on any of these loans.

Liquidity and Capital Resources

We require a significant amount of liquidity to originate and acquire loans and leases and to service debt. We fund our operations primarily through securitization in the ABS market and committed credit lines from third-party banks and Santander.

We seek to issue debt that appropriately matches the cash flows of the assets that we originate. In addition, we utilize large flow agreements. We have over \$3.3 billion of stockholders' equity that supports our access to the securitization markets, credit facilities, and flow agreements.

In the first nine months of 2014, our origination volume increased to a company-record production of \$21.4 billion. We are executing more frequent securitization transactions, as well as continuing to add additional credit facilities and flow agreements, to fund the increased origination volume from our Chrysler Capital and unsecured lending businesses.

As of September 30, 2014, our revolving credit facilities consisted of the following:

September 30, 2014 (Dollars in thousands)						
	Maturity Date(s)	Utilized Balance	Committed Amount	Effective Rate	Assets Pledged	Restricted Cash Pledged
Warehouse line	June 2015	\$214,186	\$500,000	1.22%	\$306,303	\$—

(a) Half of the outstanding balance on this facility matures in March 2015 and half in March 2016.

- (b) This line is held exclusively for Chrysler Capital retail loan and lease financing, with lease financing comprising no more than 50% of the outstanding balance upon advance.
- (c) This line is held exclusively for unsecured consumer term loans. On October 31, 2014, the Company entered into another facility for unsecured consumer term loans with additional borrowing capacity of \$250 million.
- (d) The repurchase facility is also collateralized by securitization notes payable retained by the Company. No portion of this facility is unsecured. This facility has rolling 30-day and 90-day maturities.
- (e) This line is collateralized by residuals retained by the Company.
- (f) This line is collateralized by notes payable retained by the Company.
- (g) These lines are also collateralized by securitization notes payable and residuals retained by the Company. As of September 30, 2014, \$1.7 billion of the aggregate outstanding balances on credit facilities were unsecured. On October 15, 2014, the Company made a \$28.6 million principal payment to increase the overcollateralization
- (h) on this warehouse by 10% to cure a level I triggering event. The Company subsequently amended the warehouse agreement to revise the trigger levels.

Edgar Filing: Santander Consumer USA Holdings Inc. - Form 10-Q

Our secured structured financings primarily consist of public, SEC-registered securitizations. We also execute private securitizations under Rule 144A of the Securities Act and privately issue amortizing notes. As of September 30, 2014, our secured structured financings consisted of the following:

September 30, 2014 (Dollars in thousands)						
	Original Estimated Maturity Date(s)	Balance	Initial Note Amounts Issued	Initial Weighted Average Interest Rate	Collateral	Restricted Cash
2010 Securitizations (a)	October 2016 - November 2017	\$ 185,348	\$2,634,349	1.04%-1.44%	\$403,129	\$95,597

2011 Private issuances	December 2018	1,026,730	1,700,000	1.46%-1.80%	1,476,856	58,240
2012 Private issuances	May 2016	9,607	70,308	1.07%	15,198	1,450
2013 Private issuances	September 2018 - September 2020	2,166,424	2,693,754	1.13%-1.38%	2,960,515	91,402
2014 Private issuances	November 2015 - December 2021	2,951,973	3,519,049	1.05%-1.85%	4,165,753	140,007
Privately issued amortizing notes		6,344,917	8,499,111		8,938,473	300,157
Total secured structured financings		\$18,444,397	\$35,242,950		\$23,833,240	\$1,530,845

(a) On October 15, 2014, the Company executed a clean-up call on a securitization representing \$87.7 million of this balance.

(b) Securitizations executed under Rule 144A of the Securities Act are included within this balance.

In addition to our credit facilities and secured structured financings, we have flow agreements in place with Bank of America and Citizens Bank of Pennsylvania for Chrysler Capital retail installment contracts and with SBNA for Chrysler Capital consumer vehicle leases and dealer loans.

Credit Facilities

Third-party Revolving Credit Facilities

Warehouse Lines

We currently have lending relationships with fourteen third party banks. Warehouse lines are used to fund originations. Each line specifies the required collateral characteristics, collateral concentrations, credit enhancement, and advance rates. Our warehouse lines generally are backed by auto retail installment contracts and, in some cases, leases or unsecured consumer loans. These credit lines generally have one- or two-year commitments, staggered maturities and floating interest rates. We maintain daily funding forecasts for originations, acquisitions, and other large outflows such as tax payments in order to balance the desire to minimize funding costs with our liquidity needs. Our warehouse lines generally have net spread, delinquency, and net loss ratio limits. Generally, these limits are calculated based on the portfolio collateralizing the respective line; however, for two of our warehouse lines, delinquency and net loss ratios are calculated with respect to our serviced portfolio as a whole. Failure to meet any of these covenants could trigger increased overcollateralization requirements or, in the case of limits calculated with respect to the specific portfolio underlying certain credit lines, result in an event of default under these agreements. If an event of default occurs under one of these agreements, the lenders could elect to declare all amounts outstanding under the impacted agreement to be immediately due and payable, enforce their interests against collateral pledged under the agreement, restrict our ability to obtain additional

borrowings under the agreement, and/or remove us as servicer. None of our warehouse lines currently have any ratios above their limits, and we have never had a warehouse line terminated due to failure to comply with any ratio or a failure to meet any covenant. A default under one of these agreements can be enforced only with respect to the impacted warehouse line.

We have a credit facility with seven banks providing an aggregate commitment of \$4.3 billion for the exclusive use of providing short-term liquidity needs to support Chrysler retail financing. The facility can be used for both loan and lease financing (with lease financing comprising no more than 50% of the outstanding balance upon advance). The facility requires reduced advance rates in the event of delinquency, credit loss, or residual loss ratios exceeding specified thresholds.

Repurchase Facility

We also obtain financing through an investment management agreement whereby we pledge retained subordinate bonds on our own securitizations as collateral for repurchase agreements with various borrowers and at renewable terms ranging from 30 to 90 days.

Total Return Swap

Beginning in 2014, we also obtain financing through a total return swap whereby we pledge retained subordinate bonds on our own securitizations as collateral for a financing facility that also includes a requirement that we settle with the counterparty at maturity an amount based on the change in the fair value of the underlying bonds during the term of the facility.

Santander Credit Facilities

Santander historically has provided, and continues to provide, our business with significant funding support in the form of committed credit facilities. Through its New York branch, Banco Santander, S.A. provides us with \$4.5 billion of long-term committed revolving credit facilities. Under an agreement entered into on March 6, 2014, SHUSA provides us with an additional \$0.3 billion of committed revolving credit, collateralized by residuals retained on our own securitizations. The fundings through the New York branch and through SHUSA are collectively known as the "Santander Credit Facilities."

The facilities offered through the New York branch are structured as three- and five-year floating rate facilities, with current maturity dates of December 31, 2016 and 2018. Santander has the option to allow us to continue to renew the term of these facilities annually going forward, thereby maintaining the three and five year maturities. These facilities currently permit unsecured borrowing but generally are collateralized by retail installment contracts as well as securitization notes payables and residuals by the Company. Any secured balances outstanding under the facilities at the time of their maturity will amortize to match the maturities and expected cash flows of the corresponding collateral.

There was an average outstanding balance of approximately \$3.9 billion and \$2.4 billion under the Santander Credit Facilities during the nine months ended September 30, 2014 and 2013, respectively. The maximum outstanding balance during each period was \$4.6 billion and \$4.3 billion, respectively.

Santander also has provided a \$500 million letter of credit facility with a maturity date of December 31, 2014 that we can use as credit enhancement to support increased borrowings on certain third-party credit facilities. We have not used this facility since December 2012. Santander affiliates also serve as the counterparty for many of our derivative financial instruments.

Secured Structured Financings

We obtain long-term funding for our receivables through securitization in the ABS market. ABS provides an attractive source of funding due to the cost efficiency of the market, a large and deep investor base, and tenors that appropriately match the cash flows of the debt to the cash flows of the underlying assets. The term structure of a securitization locks in fixed rate funding for the life of the underlying fixed rate assets, and the matching amortization of the assets and liabilities provides committed funding for the collateralized loans throughout their terms. Because of prevailing market rates, we did not issue ABS transactions in 2008 and 2009, but we began issuing ABS again in 2010. We have been the largest issuer of retail auto ABS since 2011, and have issued a total of over \$32 billion in retail auto ABS since 2010.

We execute each securitization transaction by selling receivables to securitization trusts (“Trusts”) that issue ABS to investors. In order to attain specified credit ratings for each class of bonds, these securitization transactions have credit enhancement requirements in the form of subordination, restricted cash accounts, excess cash flow, and overcollateralization, whereby more receivables are transferred to the Trusts than the amount of ABS issued by the Trusts.

Excess cash flows result from the difference between the finance and interest income received from the obligors on the receivables and the interest paid to the ABS investors, net of credit losses and expenses. Initially, excess cash flows generated by the Trusts are used to pay down outstanding debt in the Trusts, increasing over collateralization until the targeted percentage level of assets has been reached. Once the targeted percentage level of overcollateralization is reached and maintained, excess cash flows generated by the Trusts are released to us as distributions from the Trusts. We also receive monthly servicing fees as servicer for the Trusts. Our securitizations each require an increase in credit enhancement levels if Cumulative Net Losses, as defined in the documents underlying each ABS transaction, exceed a specified percentage of the pool balance. None of our securitizations have Cumulative Net Loss percentages above their limits.

Our on-balance sheet securitization transactions utilize bankruptcy-remote special purpose entities, which are considered VIEs, that meet the requirements to be consolidated in our financial statements. Following a securitization, the finance receivables and the notes payable related to the securitized retail installment contracts remain on the consolidated balance sheets. We recognize finance and interest income as well as fee income on the collateralized retail installment contracts and interest expense on the ABS issued. We also record a provision for loan losses to cover probable loan losses on the retail installment contracts. While these Trusts are included in our consolidated financial statements, these Trusts are separate legal entities; thus, the finance receivables and other assets sold to these Trusts are legally owned by these Trusts, are available only to satisfy the notes payable related to the securitized retail installment contracts, and are not available to our creditors or our other subsidiaries.

We have completed six securitizations year-to-date in 2014, in addition to executing six subordinate bond transactions to fund residual interests from existing securitizations. We currently have 27 securitizations outstanding in the market with a cumulative ABS balance of approximately \$13 billion. Our securitizations generally have several classes of notes, with principal paid sequentially based on seniority and any excess spread distributed to the residual holder. We generally retain the lowest bond class and the residual, except in the case of off-balance sheet securitizations, which are described further below. We use the proceeds from securitization transactions to repay borrowings outstanding under our credit facilities, originate and acquire loans and leases, and for general corporate purposes. We generally exercise clean-up call options on our securitizations when the collateral pool balance reaches 10% of its original balance.

We also periodically privately issue amortizing notes, in transactions that are structured similarly to our public and Rule 144A securitizations but are issued to banks and conduits. Historically, all of the Company's securitizations and private issuances have been collateralized by vehicle retail installment contracts and loans; however, in 2013, the Company issued its first amortizing notes backed by vehicle leases. As of September 30, 2014, the Company had private issuances of notes backed by vehicle leases totaling approximately \$1.3 billion.

Flow Agreements

In order to manage our balance sheet and provide funding for our recent significant increase in volume of originations, we are actively seeking to enter into flow agreements under which we will sell, or otherwise source to third parties, loans and leases on a periodic basis. These loans and leases will not be on our balance sheet but may provide a gain on sale and will provide a stable stream of servicing fee income. Our flow agreements all relate to our Chrysler Capital relationship and are described under Recent Developments and Other Factors Affecting Our Results of Operations.

Off-Balance Sheet Financing

We periodically execute Chrysler Capital-branded securitizations under Rule 144A of the Securities Act. Because all of the notes and residual interests in these securitizations are issued to third parties, we record these transactions as true sales of the retail installment contracts securitized, and removed the sold assets from our consolidated balance sheets. During the three months ended September 30, 2014, the Company sold \$1.0 billion of gross retail installment contracts in an off-balance sheet securitization, recognizing a gain on sale of approximately \$39 million. This securitization was primarily comprised of Chrysler Capital loans but included some non-Chrysler collateral. During the nine months ended September 30, 2014, the Company sold approximately \$1.8 billion of gross retail installment contracts in off-balance sheet securitizations for a gain of approximately \$72 million.

Cash Flow Comparison

We have produced positive net cash from operating activities every year since 2003. Our investing activities primarily consist of originations and acquisitions of retail installment contracts. Our financing activities primarily consist of borrowing, repayments of debt, and payment of dividends.

	Nine Months Ended September 30,	
	2014	2013
	(Dollars in thousands)	
Net cash provided by operating activities	\$2,774,964	\$1,381,799
Net cash used in investing activities	\$(6,241,062)	\$(7,595,568)
Net cash provided by financing activities	\$3,499,456	\$6,170,233
Cash Provided by Operating Activities		

For the nine months ended September 30, 2014, net cash provided by operating activities of \$2.8 billion consisted of net income of \$519 million, adjustments for non-cash items of \$2.0 billion, net proceeds from sales and repayments of loans held for sale of \$3.3 billion, and changes in working capital of \$195 million, partially offset by net originations of loans held for sale of \$3.2 billion. Adjustments for non-cash items consisted primarily of \$2.1 billion in provision for credit losses. Changes in working capital consisted primarily of a \$337 million decrease in federal, state, and other income taxes payable, driven by a \$375 million refund received for overpayment of 2013 estimated taxes.

For the nine months ended September 30, 2013, net cash provided by operating activities of \$1.4 billion consisted of net income of \$582 million, adjustments for non-cash items of \$1.0 billion and net proceeds from sales and repayments of loans held for sale of \$1.1 billion, partially offset by net originations of loans held for sale of \$1.2 billion and changes in working capital of \$146 million. Adjustments for non-cash items consisted primarily of \$1.2 billion in provision for credit losses, partially offset by \$231 million in accretion of discount, net of depreciation and amortization of capitalized origination costs.

Cash Used in Investing Activities

For the nine months ended September 30, 2014, net cash used in investing activities of \$6.2 billion primarily consisted of \$16.4 billion in loan and lease originations and net balance increases on revolving lines, partially offset by \$7.0 billion in collections, \$2.4 billion in proceeds from asset sales, \$744 million in manufacturer incentives received, and \$412 million in proceeds from sale of leased vehicles. Net cash used in investing activities also includes a \$426 million increase in restricted cash.

For the nine months ended September 30, 2013, net cash used in investing activities of \$7.6 billion primarily consisted of \$14.3 billion in loan and lease originations and net balance increases on revolving lines, partially offset by \$7.1 billion in collections. Net cash used in investing activities also includes the \$150 million upfront fee paid to Chrysler and a \$322 million increase in restricted cash.

Cash Provided by Financing Activities

For the nine months ended September 30, 2014, net cash provided by financing activities of \$3.5 billion was driven by net proceeds exceeding payments on secured structured financings by \$3.2 billion and net advances of \$290 million on credit facilities, partly offset by a \$52 million dividend.

For the nine months ended September 30, 2013, net cash provided by financing activities of \$6.2 billion was driven by net advances of \$4.0 billion on credit facilities, in addition to net proceeds exceeding payments on secured structured financings by \$2.4 billion. Additionally, \$48 million was received from SHUSA as a capital contribution pursuant to the shareholders agreement in force at the time between SCUSA and certain of its shareholders, and the Company paid a \$290 million dividend.

Contingencies and Off-Balance Sheet Arrangements

Lending Arrangements

We are obligated to make purchase price holdback payments to a third-party originator of loans that we purchase on a periodic basis, when losses are lower than originally expected.

We have extended revolving lines of credit to certain auto dealers. Under this arrangement, we are committed to lend up to each dealer's established credit limit.

In March 2013, we entered into certain agreements with LendingClub under which we have the option to purchase up to 25% of LendingClub's total originations for a term of three years. In July 2013, we entered into certain additional

agreements with

66

LendingClub under which we are committed to purchase at least the lesser of \$30 million per month or 75% of the lending platform company's near-prime originations through July 2015, and the lesser of \$30 million per month or 50% of the lending platform company's near-prime originations thereafter through July 2017. This commitment can be reduced or cancelled with 90 days' notice.

In April 2013, we entered into certain agreements with Bluestem. The terms of the agreements include a commitment by us to purchase new advances originated by Bluestem, along with existing balances on accounts with new advances, for an initial term ending in April 2020 and, based on an amendment in June 2014, renewable through April 2022 at Bluestem's option. Each customer account generated under the agreements generally is approved with a credit limit higher than the amount of the initial purchase, with each subsequent purchase automatically approved as long as it does not cause the account to exceed its limit and the customer is in good standing. As these credit lines do not have a specified maturity, but rather can be terminated at any time in the event of adverse credit changes or lack of use, we have not recorded an allowance for unfunded commitments. We are required to make a monthly profit-sharing payment to Bluestem.

In April 2014, we entered into an application transfer agreement with Nissan, whereby the Company has the first opportunity to review for its own portfolio any credit applications turned down by Nissan's captive finance company. The agreement does not require the Company to originate any loans, but for each loan originated the Company will pay Nissan a referral fee, comprised of a volume bonus fee and a loss betterment bonus fee. The loss betterment bonus fee will be calculated annually and is based on the amount by which losses on loans originated under the agreement are lower than an established percentage threshold.

Flow Agreements

Our retail installment contract flow agreements with Bank of America and CBP may require us to make servicer performance or loss-sharing payments. These agreements relate to our Chrysler Capital relationship and are described in Recent Developments and Other Factors Affecting Our Results of Operations.

Credit Enhancement Arrangements

In connection with the sale of retail installment contracts to securitization trusts, we have made standard representations and warranties customary to the consumer finance industry. Violations of these representations and warranties may require us to repurchase loans previously sold. As of September 30, 2014, we had no repurchase requests outstanding.

We have a letter of credit facility in the amount of \$500 million from Santander with a maturity date of December 31, 2014 that we can use as credit enhancement to support increased borrowings on certain third-party credit facilities. We have not used this letter of credit facility since December 2012.

Chrysler-related Contingencies

Throughout the ten-year term of our agreement with Chrysler, we are obligated to make quarterly payments to Chrysler representing a percentage of gross profits earned from a portion of the Chrysler Capital consumer loan and lease platform. We also are obligated to make quarterly payments to Chrysler sharing residual gains on leases in quarters in which we experience lease terminations with gains over a specified percentage threshold.

Contractual Obligations

We lease our headquarters in Dallas, Texas, our servicing centers in Texas and Colorado, and an operations facility in California under non-cancelable operating leases that expire at various dates through 2026.

Risk Management Framework

SCUSA has established a risk governance structure that assigns responsibility for risk management among front-line business personnel, an independent risk management function, and internal audit. According to this model, business owners maintain responsibility for identifying and mitigating the risks generated through their business activities. The Chief Risk Officer ("CRO"), who reports to the Board Enterprise Risk Committee ("BERC") and the CEO and is independent of any business line, is responsible for developing and maintaining a risk framework that ensures risks are appropriately identified and mitigated, and for reporting on the overall level of risk in the Company. The CRO is also accountable to SHUSA's Chief Risk Officer.

The BERC, which has been established by the Board, is charged with responsibility for establishing the governance over the risk management process, providing oversight in managing the aggregate risk position and reporting on the comprehensive portfolio of risk categories and the potential impact these risks can have on our risk profile. The BERC meets no less often than quarterly and is chartered to assist the Board in promoting the best interests of the Company by overseeing policies, procedures and risk practices relating to enterprise-wide risk and compliance with regulatory guidance. Members of the BERC are individuals whose experiences and qualifications can lead to broad and informed views on risk matters facing us and the financial services industry, including, but not limited to, risk matters that address credit, market, liquidity, operational, compliance, legal and other general business conditions. A comprehensive risk report is submitted by the CRO to the BERC and to the Board each quarter providing management's view of our risk position provided by the CRO.

In addition to the Board and BERC, the CEO and CRO delegate risk responsibility to management committees. These committees include: the Asset Liability Committee, the Capital Committee and the Enterprise Risk Management Committee. The CRO participates in each of these committees.

Additionally, the Company has established an enterprise risk management ("ERM") function to coordinate risk management activities. ERM has developed a Board-approved Enterprise-wide Risk Management Policy under which ERM implements procedures and programs to manage risk. ERM has developed a Risk Tolerance Statement, which is approved by the Board and details the types of risk and size of risk-taking activities permissible in the course of executing business strategy.

Interest Rate Risk

A change from the current low interest rate environment, a flat or inverted yield curve, and changes in prevailing interest rates can have an adverse impact on our business. Loans and leases originated or otherwise acquired by us and pledged to secure borrowings under our revolving credit facilities bear fixed interest rates and finance charges. Our gross interest rate spread, which is the difference between the income we earn through the interest and finance charges on our finance receivables and lease contracts and the interest we pay on our funding, is affected by changes in interest rates as a result of our dependence on the incurrence of variable rate debt. We are exposed to variable rate funding through our borrowings under our revolving credit facilities.

The variable rates on the borrowings under our revolving credit facilities are indexed to LIBOR or commercial paper rates and fluctuate periodically based on movements in those indexes. We sometimes use interest rate swap agreements to convert the variable rate exposures on these borrowings to a fixed rate, thereby mitigating our interest rate exposure. Interest rate swap agreements purchased by us do not impact the contractual cash flows to be paid to the creditor. The counterparty for most of our interest rate swaps is Santander or one of its affiliates. As of September 30, 2014, the notional value of our hedges with Santander and affiliates was approximately \$8.9 billion.

In our public and Rule 144A securitization transactions, we transfer fixed rate to trusts that, in turn, issue fixed or floating rate securities to investors. The interest rate demanded by investors in our securitization transactions and other secured financings depends on the general interest rate environment and prevailing interest rate spreads for securitizations. We are able to obtain attractive interest rate spreads on our securitizations due to among other factors: (i) the credit quality of the receivables in the trusts; (ii) the historical credit performance of similar pools of our receivables; (iii) the significant expansion of our securitization investor base since 2010; (iv) the historical lack of defaults in auto ABS; (v) the structure of our securitizations (with first losses going to the equity residual generally retained by us); and (vi) our obtaining of ratings from at least two ratings agencies on each securitization.

We are, in certain circumstances, required to hedge our interest rate risk on our secured structured financings and the borrowings under our revolving credit facilities, and we use both interest rate swaps and interest rate caps to satisfy these requirements. We currently hold purchased interest rate caps and offsetting sold interest rate caps related to several of our secured structured financings and to our Chrysler retail financing facility. Although the interest rate caps are purchased by these financing facilities, cash outflows from the facilities ultimately impact our retained interests in the secured structured financings as cash expended by the facilities will decrease the ultimate amount of cash to be received by us. Therefore, we may simultaneously sell a corresponding interest rate cap to offset the premium paid to purchase the interest rate cap. The fair values of our interest rate cap agreements purchased and sold net to an immaterial value in our financial statements and have an immaterial earnings impact comprised solely of

their execution cost. The counterparties for certain of our interest rate caps and related options are affiliates of Santander. As of September 30, 2014, the notional value of our caps and options with these affiliates was approximately \$7.9 billion.

The Board requires that we closely monitor and manage the amount of our interest rate risk exposure. We monitor our interest rate risk by conducting sensitivity analyses that include parallel shifts in prevailing interest rates. As of September 30, 2014, the

impact of a hypothetical 100 basis point parallel increase in the interest rate curve on our net interest income and our economic net worth was a decrease of \$45.6 million and \$78.9 million, respectively. We assess interest rate risk by monitoring the repricing gap by maturity date of our interest-bearing assets and liabilities to ensure appropriate duration matching.

The following table provides information about maturities of our interest rate-sensitive financial instruments by expected maturity date as of September 30, 2014:

	1M	3M	6M	12M	2 Y	3 Y	4 Y	5 Y	>5 Y
	(Dollars in thousands)								
Total assets	\$966	\$1,783	\$2,902	\$5,249	\$8,387	\$5,986	\$1,404	\$227	\$317
Total liabilities	16,017	1,203	1,176	2,088	3,382	2,075	685	209	—
Net swaps	9,765	(507)	(624)	(1,531)	(3,796)	(2,708)	(600)	—	—
Repricing gap	\$(5,286)	\$73	\$1,102	\$1,630	\$1,209	\$1,203	\$119	\$18	\$317
Cumulative gap	\$(5,286)	\$(5,213)	\$(4,111)	\$(2,481)	\$(1,272)	\$(69)	\$50	\$68	\$385

Finance receivables are estimated to be realized by us in future periods using discount rate, prepayment, and credit loss assumptions similar to our historical experience. Notional amounts on interest rate swap and cap agreements are based on contractual terms. Credit facilities and securitization notes payable amounts have been classified based on expected payoff.

The notional amounts of interest rate swap and cap agreements, which are used to calculate the contractual payments to be exchanged under the contracts, represent average amounts that will be outstanding for each of the years included in the table. Notional amounts do not represent amounts exchanged by parties and, thus, are not a measure of our exposure to loss through our use of these agreements.

Management monitors our interest rate hedging activities to ensure that the value of derivative financial instruments, their correlation to the contracts being hedged, and the amounts being hedged continue to provide effective protection against interest rate risk. However, there can be no assurance that our strategies will be effective in minimizing interest rate risk or that increases in interest rates will not have an adverse effect on our profitability.

Liquidity Risk

We view liquidity as integral to other key elements such as capital adequacy, asset quality and profitability. Because our debt is nearly entirely serviced by collections on consumer receivables, our primary liquidity risk relates to the ability to continue to grow our business through the funding of originations. We have a robust liquidity policy in place to manage this risk. The liquidity policy establishes the following guidelines:

- that we maintain at least eight external credit providers (as of September 30, 2014, we had fourteen);
- that we rely on Santander and affiliates for no more than 30% of our funding (as of September 30, 2014, Santander and affiliates provided 12% of our funding);
- that no more than 35% of our debt mature in the next six months and no more than 65% of our debt mature in the next twelve months (as of September 30, 2014, only 6% and 18%, respectively, of our debt is scheduled to mature in these timeframes);
- that we maintain unused capacity of at least \$6.0 billion, including flow agreements, in excess of our expected peak usage over the following twelve months (as of September 30, 2014, we had twelve-month rolling unused capacity of over \$10 billion); and
- that we maintain a minimum liquidity ratio, defined as our short-term assets divided by our short-term liabilities, of at least 70% over periods of one, three, six, and twelve months (as of September 30, 2014, our minimum liquidity ratio was 79%, 81%, 102%, and 115% over these respective periods).

Our liquidity policy also requires that our Asset and Liability Committee monitor many indicators, both market-wide and company-specific, to determine if action may be necessary to maintain our liquidity position. These indicators include:

- delinquency and loss ratios on our securitizations;
- available commitments on our borrowing lines;

Santander ratings, market capitalization, and commercial paper rate;
spreads on U.S. and Spanish debt;

69

swap rates; and

the Manheim Used Vehicle Index.

We generally look for funding first from structured secured financings, second from third-party credit facilities, and last from Santander. We believe this strategy helps us avoid being overly reliant on Santander for funding. We also utilize financing structures whereby even if a credit facility is canceled, balances outstanding are not due and payable immediately but rather run off only as the underlying collateral amortizes. Additionally, we can reduce originations to significantly lower levels if necessary during times of limited liquidity.

Our liquidity management tools include daily and twelve-month rolling cash requirements forecasts, monthly funding usage and availability reports, daily sources and uses reporting, structural liquidity risk exercises, and the establishment of liquidity contingency plans. We also perform quarterly stress tests in which we forecast the impact of various negative scenarios (alone and in combination), including reduced credit availability, higher funding costs, lower advance rates, lower customer interest rates, dealer discount rates, and higher credit losses.

We have established a qualified like-kind exchange program in order to defer tax liability on gains on sale of vehicle assets at lease termination. If we do not meet the safe harbor requirements of IRS Revenue Procedure 2003-39, we may be subject to large, unexpected tax liabilities, thereby generating immediate liquidity needs. We believe that our compliance monitoring policies and procedures are adequate to enable us to remain in compliance with the program requirements.

Credit Risk

The risk inherent in our loan and lease portfolios is driven by credit quality and is affected by borrower-specific and economy-wide factors such as changes in employment. We manage this risk through our underwriting and credit approval guidelines and servicing policies and practices, as well as geographic and manufacturer concentration limits. Our automated originations process reflects a disciplined approach to credit risk management. Our robust historical data on both organically originated and acquired loans provides us with the ability to perform advanced loss forecasting. Each applicant is automatically assigned a proprietary loss forecasting score (“LFS”) using information such as FICO®, debt-to-income ratio, loan-to-value ratio, and over 30 other predictive factors, placing the applicant in one of 100 pricing tiers. The pricing in each tier is continuously monitored and adjusted to reflect market and risk trends. In addition to our automated process, we maintain a team of underwriters for manual review, consideration of exceptions, and review of deal structures with dealers. We generally tighten our underwriting requirements in times of greater economic uncertainty (including during the recent financial crisis) to compete in the market at loss and approval rates acceptable for meeting our required returns. We have also adjusted our underwriting standards to meet the requirements of our contracts such as the Chrysler agreement. In both cases, we have accomplished this by adjusting our risk-based pricing, the material components of which include interest rate, down payment, and loan-to-value.

We monitor early payment defaults and other potential indicators of dealer or customer fraud, and use the monitoring results to identify dealers who will be subject to more extensive stipulations when presenting customer applications, as well as dealers with whom we will not do business at all.

As part of our plan for minimizing credit losses from our dealer lending product line, we will conduct periodic inventories, generally without advance notice to the dealer, of the collateral for floorplan lines of credit we have extended. We also will reevaluate the creditworthiness of each dealer with an outstanding balance on at least an annual basis, and more often if events indicate a possible decline in creditworthiness.

Collateral Risk

Our lease portfolio presents an inherent risk that residual values recognized upon lease termination will be lower than those used to price the contracts at inception. Although we have elected not to purchase residual value insurance, our residual risk is somewhat mitigated by our residual risk-sharing agreement with Chrysler, as all of our leases are originated under terms of the Chrysler Agreement with Chrysler. We also utilize industry data, including the Automotive Lease Guide (“ALG”) benchmark for residual values, and employ a team of individuals experienced in forecasting residual values.

Similarly, lower used vehicle prices also reduce the amount we can recover when remarketing repossessed vehicles that serve as collateral underlying loans. We manage this risk through loan-to-value limits on originations, monitoring

of new and used vehicle values using standard industry guides, and active, targeted management of the repossession process.

70

Legal and Compliance Risk

We must comply with the significant number of laws and regulations governing the consumer finance industry and, specifically, consumer protection. Compliance with applicable law is costly and can affect operating results. Compliance also requires a robust framework of governance and controls, which may create operational constraints. To manage our legal and compliance risk, we maintain an extensive compliance, internal control, and monitoring framework, which includes the gathering of corporate control performance threshold indicators, Sarbanes-Oxley testing, monthly quality control tests, ongoing compliance monitoring with all applicable regulations, internal control documentation and review of processes, and internal audits. We also utilize internal and external legal counsel for expertise when needed. All associates upon hire and annually receive comprehensive mandatory regulatory compliance training. In addition, the Board receives annual regulatory and compliance training. We use industry-leading call mining and other software solutions that assist us in analyzing potential breaches of regulatory requirements and customer service. Our call mining software analyzes all customer service calls, converting speech to text and mining for specific words and phrases that may indicate inappropriate comments by a representative. The software also detects escalated voice volume, enabling a supervisor to intervene if necessary. This tool enables us to effectively manage and identify training opportunities for associates, as well as track and resolve customer complaints through a robust quality assurance program. An example of another system control to mitigate compliance risk is that our customer dialing system has been programmed based on regulatory requirements to not permit dialing a customer phone number outside of permissible time periods or that already has been called the maximum number of times that day.

Operational and Technological Risk

We are exposed to loss that occurs in the process of carrying out our business activities. These relate to failures arising from inadequate or failed processes, failures in our people or systems, or from external events. Our operational risk management program encompasses risk event reporting, analysis, and remediation; key risk indicator monitoring; and risk profile assessments.

A significant operational error related to distribution of principal on a securitization occurred in the second quarter of 2014. Principal payments that should have been made pro rata to the Class A-2-A and Class A-2-B notes of the Santander Drive Auto Receivables Trust 2013-5 transaction instead were made solely to Class A-2-A notes on two consecutive monthly distribution dates. This transaction was our first securitization in several years that featured a class of notes with subclasses that were to receive principal payments pro rata. To correct the error, we amended the transaction documents to allow for a deposit of approximately \$71 million to the Trust for distribution to the Class A-2-B noteholders. This action, which had no material impact on our consolidated results of operations, brought the respective note balances of the Class A-2-A and Class A-2-B notes into parity and increased overcollateralization on the transaction. Additionally, we have implemented enhanced processes and controls to ensure payment distributions accurately reflect the legal documentation and transaction structure going forward.

Foreign Exchange Risk

As we do not currently operate in foreign markets, substantially all of our vendors are based in the United States, and we have only three employees outside of the United States. As a result, we do not currently have material exposure to currency fluctuations.

Inflation Risk

The risk of inflation does not have a significant impact on our business.

Other Information

Further information on risk factors can be found under Part II, Item 1A - "Risk Factors."

Glossary of Selected Terms

Advance Rate-The maximum percentage of the value of collateral that a lender is willing to extend for a loan. The advance rate helps a borrower determine what kind of collateral to provide in order to secure the desired loan amount, and helps minimize a lender's loss exposure when accepting collateral that can fluctuate in value.

Clean-Up Call-The action of an issuer of a debt instrument (such as a bond) requiring early redemption of the instrument before it is fully amortized.

Credit/Warehouse Facility (Line of Credit)-Any credit source extended to a business by a bank or other financial institution. A line of credit is effectively a source of funds that can readily be tapped at the borrower's discretion. Interest is paid only on money actually withdrawn. However, the borrower may be required to pay an unused line fee, often an annualized percentage fee on the money not withdrawn. Lines of credit can be secured by collateral, or may be unsecured.

Credit Enhancement-Through credit enhancement, the lender is provided with reassurance that the borrower will honor the obligation through additional collateral, insurance, or a third-party guarantee. Credit enhancement reduces credit/default risk of a debt, thereby increasing the overall credit rating and lowering interest rates.

Dealer Loans- Floorplan lines of credit, real estate loans, and working capital loans to automotive dealers.

FICO® -A type of credit score that makes up a substantial portion of the credit report that lenders use to assess an applicant's credit risk and whether to extend a loan. FICO® is an acronym for the Fair Isaac Corporation, the creator of the FICO® score. Using mathematical models, the FICO® score takes into account various factors in each of these five areas to determine credit risk: payment history, current level of indebtedness, types of credit used, length of credit history, and new credit. A person's FICO® score will range between 300 and 850.

Floorplan Lines of Credit- A revolving line of credit that allows the borrower to obtain financing for retail goods.

These loans are made against a specific piece of collateral (e.g., auto, recreational vehicle, manufactured home). When each piece of collateral is sold by the dealer, the loan advance against that piece of collateral is repaid.

Nonaccretable Difference- The difference between the undiscounted contractual cash flows and the undiscounted expected cash. The nonaccretable difference represents an estimate of the credit risk in the loan portfolio at the acquisition date.

Overcollateralization- The process of posting more collateral than is needed to obtain or secure financing.

Overcollateralization is often used as a method of credit enhancement by lowering the creditor's exposure to default risk.

Private-Label Loans/Leases- Financings branded in the name of the product manufacturer rather than in the name of the finance company.

Remarketing- Vehicle remarketing is the controlled disposal of fleet and leasing vehicles that have reached the end of their fixed term or the process to resell repossessed vehicles.

Residual Values- Residual value describes the future value of an asset at the end of the lease term based upon the percentage of depreciation of its initial value.

Subvention Program- Reimbursement to the finance company by a manufacturer for the difference between a market loan or lease rate and the below-market rate granted to the customer.

Turn-down – A turn-down loan or program is one in which the lender has the opportunity to review the application for approval only after the primary lender or lenders have declined the application.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Incorporated by reference from Part I, Item 2 - "Management's Discussion and Analysis of Financial Conditions and Results of Operations —Risk Management Framework" above.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our CEO and Chief Financial Officer ("CFO"), has evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a- 15(e) and 15d- 15(e) under the Securities Exchange Act of 1934, as amended (Exchange Act)), as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on such evaluation, our CEO and CFO have concluded that as of September 30, 2014, our disclosure controls and procedures are designed at a reasonable assurance level and are effective to provide reasonable assurance that information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission, and that such information is accumulated and communicated to our management, including our CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting identified in management's evaluation pursuant to Rules 13a-15(d) or 15d-15(d) of the Exchange Act during the three months ended September 30, 2014 covered by this Quarterly Report on Form 10-Q that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Limitations on Effectiveness of Controls and Procedures

In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures must reflect the fact that there are resource constraints and that management is required to apply judgment in evaluating the benefits of possible controls and procedures relative to their costs.

PART II: OTHER INFORMATION

Item 1. Legal Proceedings

Reference should be made to Note 10 to the Condensed Consolidated Financial Statements, which is incorporated herein by reference, for information regarding legal proceedings in which we are involved. We believe that the claims in the class action lawsuits are without merit and intend to defend the lawsuits vigorously. However, litigation is subject to inherent uncertainties, and an adverse result in these or other matters may arise from time to time that may harm our business. Investigations, proceedings or information-gathering requests that we are, or may become, involved in may result in adverse consequences including, without limitation, adverse judgments, settlements, fines, penalties, injunctions, or other actions.

Item 1A. Risk Factors.

The Company is subject to a number of risks that could materially and adversely affect our business, financial condition and results of operations in addition to other possible adverse consequences. The following description of risk factors includes any material changes to, and supersedes the description of, risk factors associated with the Company's business previously disclosed in Part I, Item 1A, Risk Factors, on pages 20-36 of the Company's 2013 Annual Report on Form 10-K. The risk factors discussed below do not identify all risks that we face because our business operations could also be affected by additional factors that are not presently known to us or that we currently consider to be immaterial to our operations.

Explanatory Note: The risk factors set forth below with an asterisk (*) before the title are risk factors containing substantive changes from the risk factors previously disclosed in Part I, Item 1A of the Company's 2013 Form 10-K.

Adverse economic conditions in the United States and worldwide may negatively impact our results.

We are subject to changes in general economic conditions that are beyond our control. During periods of economic slowdown such as the recent economic downturn, delinquencies, defaults, repossessions, and losses generally increase while proceeds from auction sales decrease. These periods may also be accompanied by increased unemployment rates, decreased consumer demand for automobiles and other consumer products, and declining values of automobiles and other consumer products securing outstanding accounts, which weaken collateral coverage and increase the amount of a loss in the event of default. Additionally, higher gasoline prices, unstable real estate values, reset of adjustable rate mortgages to higher interest rates, general availability of consumer credit, or other factors that impact consumer confidence or disposable income could increase loss frequency and decrease consumer demand for automobiles and other consumer products as well as weaken collateral values on certain types of automobiles and other consumer products. Because our historical focus has been predominantly on nonprime consumers, the actual rates of delinquencies, defaults, repossessions, and losses on these loans could be more dramatically affected by a general economic downturn. In addition, during an economic slowdown or recession, our servicing costs may increase without a corresponding increase in our finance charge income. Furthermore, our business is significantly affected by monetary and regulatory policies of the U.S. federal government and its agencies. Changes in any of these policies are influenced by macroeconomic conditions and other factors that are beyond our control and could have a material adverse effect on us through interest rate changes, costs of compliance with increased regulation, and other factors. Although market conditions have improved, unemployment in the United States remains at elevated levels, and conditions remain challenging for financial institutions. Furthermore, certain Eurozone member countries have fiscal outlays that exceed their fiscal revenue, which has raised concerns about such countries' abilities to continue to service their debt and foster economic growth. A weakened European economy could undermine investor confidence in European financial institutions and the stability of European member economies. Notwithstanding its geographic diversification, this could adversely impact Santander, with whom we have a significant relationship. Such events could also negatively affect U.S.-based financial institutions, counterparties with which we do business, and the stability of the global financial markets. Disruptions in the global financial markets have also adversely affected the corporate bond markets, debt and equity underwriting, and other elements of the financial markets. In recent years, downgrades of the sovereign debt of some European countries have resulted in increased volatility in capital markets and have caused some lenders and institutional investors to reduce and, in some cases, cease to provide funding to

certain borrowers, including other financial institutions. The impact on available credit, increased volatility in the financial markets, and reduced business activity has adversely affected, and may continue to adversely affect, our businesses, capital, liquidity, or other financial conditions and results of operations, and access to credit.

The process we use to estimate losses inherent in our credit exposure requires complex judgments, including forecasts of economic conditions and how those economic conditions might impair the ability of our borrowers to repay their loans. The degree of uncertainty concerning economic conditions may adversely affect the accuracy of our estimates, which may, in turn, impact the reliability of the process and the quality of our assets.

Our business could be negatively impacted if our access to funding is reduced.

We rely upon our ability to sell securities in the ABS market and upon our ability to access various credit facilities to fund our operations. The ABS market, along with credit markets in general, experienced unprecedented disruptions during the recent economic downturn. Although market conditions have improved since 2009, for a number of years following the economic downturn, certain issuers experienced increased risk premiums while there was a relatively lower level of investor demand for certain ABS (particularly those securities backed by nonprime collateral). In addition, the risk of volatility surrounding the global economic system and uncertainty surrounding regulatory reforms such as the Dodd-Frank Act continue to create uncertainty around access to the capital markets. As a result, there can be no assurance that we will continue to be successful in selling securities in the ABS market. Adverse changes in our ABS program or in the ABS market generally could materially adversely affect our ability to securitize loans on a timely basis or upon terms acceptable to us. This could increase our cost of funding, reduce our margins or cause us to hold assets until investor demand improves.

We also depend on various credit facilities and flow agreements to fund our future liquidity needs. We cannot guarantee that these financing sources will continue to be available beyond the current maturity dates, on reasonable terms, or at all. As our volume of loan acquisitions and originations increases, especially due to our relationship with Chrysler, we will require the expanded borrowing capacity on existing or additional credit facilities and flow agreements. The availability of these financing sources depends, in part, on factors outside of our control, including regulatory capital treatment for unfunded bank lines of credit, the financial strength and strategic objectives of Santander and the other banks that participate in our credit facilities and flow agreements, and the availability of bank liquidity in general. We may also experience the occurrence of events of default or breach of financial covenants, which could reduce our access to bank funding. In the event of a sudden or unexpected shortage of funds in the banking system, we cannot be sure that we will be able to maintain necessary levels of funding without incurring high funding costs, a reduction in the term of funding instruments, or the liquidation of certain assets.

We have not experienced a significant increase in risk premiums or cost of funding to date, but we are not isolated from general market conditions that may affect issuers of ABS and other borrowers and we could experience increased risk premiums or funding costs in the future. In addition, if the sources of funding described above are not available to us on a regular basis for any reason, we may have to curtail or suspend our loan acquisition and origination activities. Downsizing the scale of our business would have a material adverse effect on our financial position, liquidity, and results of operations.

We face significant risks in implementing our growth strategy, some of which are outside our control.

We intend to continue our growth strategy to (i) expand our vehicle finance franchise by increasing market penetration via the number and depth of our relationships in the vehicle finance market, pursuing additional relationships with OEMs, and expanding our direct-to-consumer footprint and (ii) grow our unsecured consumer lending platform. Our ability to execute this growth strategy is subject to significant risks, some of which are beyond our control, including:

- the inherent uncertainty regarding general economic conditions;
- our ability to obtain adequate financing for our expansion plans;
- the prevailing laws and regulatory environment of each state in which we operate or seek to operate,
- and, to the extent applicable, federal laws and regulations, which are subject to change at any time;
- the degree of competition in our markets and its effect on our ability to attract customers;
- our ability to recruit qualified personnel, in particular in areas where we face a great deal of competition; and
- our ability to obtain and maintain any regulatory approvals, government permits, or licenses that may be required on a timely basis.

*Our agreement with Chrysler may not result in currently anticipated levels of growth and is subject to certain performance conditions that could result in termination of the agreement.

In February 2013, we entered into a ten-year Master Private Label Financing Agreement (the “Chrysler Agreement”) with Chrysler whereby we launched the Chrysler Capital brand, which originates private-label loans and leases to facilitate the purchase of Chrysler vehicles by consumers and Chrysler-franchised automotive dealers. The financing services that we provide under the Chrysler Agreement, which launched May 1, 2013, include credit lines to finance Chrysler-franchised dealers’ acquisitions of vehicles and other products that Chrysler sells or distributes, automotive loans and leases to finance consumer acquisitions of new and used vehicles at Chrysler-franchised dealerships, financing for commercial and fleet customers, and ancillary services. In addition, we will offer dealers dealer loan financing, construction loans, real estate loans, working capital loans, and revolving lines of credit. In accordance with the terms of the Chrysler Agreement, in May 2013 we

75

paid Chrysler a \$150 million upfront, nonrefundable payment, which will be amortized over ten years but would be recognized as expense immediately if the Chrysler Agreement is terminated in accordance with its terms.

As part of the Chrysler Agreement, we received limited exclusivity rights to participate in specified minimum percentages of certain of Chrysler's financing incentive programs, which include loan rate subvention and automotive lease residual support subvention. We have committed to certain revenue sharing arrangements, as well as to considering future revenue sharing opportunities. We will bear the risk of loss on loans originated pursuant to the Chrysler Agreement, but Chrysler will share in any residual gains and losses in respect of automotive leases, subject to specific provisions in the Chrysler Agreement, including limitations on our participation in gains and losses. In addition, under the Chrysler Agreement, Chrysler has the option to acquire, for fair market value, an equity participation in an operating entity through which the financial services contemplated by the Chrysler Agreement are offered and provided, through either an equity interest in the new entity or participation in a joint venture or other similar business relationship or structure. There is no maximum limit on the size of Chrysler's potential equity participation. Although the Chrysler Agreement contains provisions that are designed to address a situation in which the parties disagree on the fair market value of the equity participation interest, there is a risk that we ultimately receive less than what we believe to be the fair market value for such interest.

The Chrysler Agreement is subject to early termination in certain circumstances, including the failure by either party to comply with certain of their ongoing obligations under the Chrysler Agreement. Chrysler may also terminate the agreement, among other circumstances, if (i) we fail to meet certain performance metrics, including certain penetration and approval rate targets, during the term of the agreement, (ii) a person other than Santander and its affiliates or our other stockholders owns 20% or more of our common stock and Santander and its affiliates own fewer shares of common stock than such person, (iii) we become, control, or become controlled by, an OEM that competes with Chrysler or (iv) if certain of our credit facilities become impaired.

The loans and leases originated through Chrysler Capital are expected to provide us with a significant portion of our projected growth over the next several years. Our ability to realize the full strategic and financial benefits of our relationship with Chrysler depends in part on the successful development of our Chrysler Capital business, which will require a significant amount of management's time and effort. If we are unable to realize the expected benefits of our relationship with Chrysler, or if the Chrysler Agreement were to terminate, our ability to generate or grow revenues could be reduced, and we may not be able to implement our business strategy, which would negatively impact our future growth.

Our business could be negatively impacted if we are unsuccessful in developing and maintaining relationships with automobile dealerships.

Our ability to acquire loans and automotive leases is reliant on our relationships with automotive dealers. In particular, our automotive finance operations depend in large part upon our ability to establish and maintain relationships with reputable automotive dealers that direct customers to our offices or originate loans at the point-of-sale, which we subsequently purchase. Although we have relationships with certain automotive dealers, none of our relationships are exclusive and any may be terminated at any time. As a result of the recent economic downturn and contraction of credit to both dealers and their customers, there was an increase in dealership closures and our existing dealer base experienced decreased sales and loan volume in the past and may experience decreased sales and loan volume in the future, which may have an adverse effect on our business, results of operations, and financial condition.

A reduction in demand for our products and failure by us to adapt to such reduction could adversely affect our business, results of operations, and financial condition.

The demand for the products we offer may be reduced due to a variety of factors, such as demographic patterns, changes in customer preferences or financial conditions, regulatory restrictions that decrease customer access to particular products, or the availability of competing products. Should we fail to adapt to significant changes in our

customers' demand for, or access to, our products, our revenues could decrease significantly and our operations could be harmed. Even if we do make changes to our product offerings to fulfill customer demand, customers may resist such changes or may reject such products. Moreover, the effect of any product change on the results of our business may not be fully ascertainable until the change has been in effect for some time, and, by that time, it may be too late to make further modifications to such product without causing further harm to our business, results of operations, and financial condition.

*Our financial condition, liquidity, and results of operations depend on the credit performance of our loans.

As of September 30, 2014, over 86% of our vehicle consumer loans and over 59% of our unsecured consumer loans are nonprime receivables with obligors who do not qualify for conventional consumer finance products as a result of, among other things, a lack of or adverse credit history, low income levels, and/or the inability to provide adequate down payments. While underwriting guidelines were designed to establish that, notwithstanding such factors, the obligor would be a reasonable credit risk, the receivables nonetheless will experience higher default rates than a portfolio of obligations of prime obligors. In the event of such a default on an auto loan, generally the most practical alternative is repossession of the financed vehicle, although the collateral value of the vehicle usually does not cover the outstanding account balance and costs of recovery. Repossessions and foreclosure sales that do not yield sufficient proceeds to repay the receivables in full could result in losses on those receivables. We repossessed 166,045 vehicles, incurring \$1.2 billion in net losses, during the nine months ended September 30, 2014, of which 158,690 repossessions and \$1.1 billion of net losses were on nonprime receivables. We experienced a default rate of 7.2% for nonprime receivables and 2.1% for prime receivables during the nine months ended September 30, 2014.

From time to time we are the subject of unfavorable news or editorial coverage and we, like many peer companies, are the subject of various complaint websites in connection with our repossession and collection activities. Regardless of merit, this type of negative publicity could damage our reputation and lead consumers to choose other consumer finance companies. This could, in turn, lead to decreased business which could have a material adverse impact on our financial position. We do not believe we have experienced any such impact as our lending is primarily indirect, with the end consumer interacting directly with a dealer rather than the finance company.

In addition, our prime portfolio is rapidly growing. While prime portfolios typically have lower default rates than nonprime portfolios, we have less ability to make risk adjustments to the pricing of prime loans compared to nonprime loans. As a result, a larger proportion of our business will consist of loans with respect to which we have less flexibility to adjust pricing to absorb losses. As a result of these factors, we may sustain higher losses than anticipated in our prime portfolio.

We depend on the accuracy and completeness of information about borrowers and counterparties and any misrepresented information could adversely affect our business, results of operations, and financial condition. In deciding whether to approve loans or to enter into other transactions with borrowers and counterparties in our retail lending and commercial lending businesses, we may rely on information furnished to us by or on behalf of borrowers and counterparties, including financial statements and other financial information. We also may rely on representations of borrowers and counterparties as to the accuracy and completeness of that information and, with respect to financial statements, on reports of independent auditors. If any of this information is intentionally or negligently misrepresented and such misrepresentation is not detected prior to loan funding, the value of the loan may be significantly lower than expected. Whether a misrepresentation is made by the loan applicant, another third party, or one of our employees, we generally bear the risk of loss associated with the misrepresentation. Our controls and processes may not have detected or may not detect all misrepresented information in our loan originations or from our business clients. Any such misrepresented information could adversely affect our business, financial condition, and results of operations.

Loss of our key management or other personnel, or an inability to attract such management and other personnel, could negatively impact our business.

The successful implementation of our growth strategy depends in part on our ability to retain our experienced management team and key employees and on our ability to attract appropriately qualified personnel as well as have an effective succession planning framework in place. For instance, our Chief Executive Officer is one of the founders of SCUSA and has extensive experience in the vehicle finance industry. He has a proven track record of successfully operating our business, including by leading us through the recent economic downturn. The loss of any key member of our management team or other key employees could hinder or delay our ability to implement our growth strategy effectively. Further, if we are unable to attract appropriately qualified personnel as we expand, we may not be

successful in implementing our growth strategy. In either instance, our profitability and financial performance could be adversely affected. See “Management” for more detail on our executive officers.

Future changes in our relationship with Santander may adversely affect our operations.

Santander, through SHUSA, owns 210,995,049 shares (approximately 60.5%) of our common stock. We rely on our relationship with Santander, through SHUSA, for several competitive advantages including relationships with OEMs and regulatory best practices. Santander also provides us with significant funding support, through both committed liquidity and opportunistic extensions of credit. During the recent financial downturn, Santander and its affiliates provided us with over \$6

billion in financing that enabled us to pursue several acquisitions and/or conversions of vehicle loan portfolios at a time when most major banks were curtailing or eliminating their commercial lending activities. If Santander or SHUSA elects not to provide such support or provide it to the same degree, we may not be able to replace such support ourselves or to obtain substitute arrangements with third parties. We may be unable to obtain such support because of financial or other constraints or be unable to implement substitute arrangements on a timely basis on terms that are comparable, or at all, which could adversely affect our operations.

Furthermore, subject to certain limitations in the shareholders agreement that was entered into among us and certain of our shareholders, including SHUSA, Auto Finance Holdings and DDFS (the "Shareholders Agreement"), Santander is permitted to sell its interest in us. If Santander reduces its equity interest in us, it may be less willing to provide us with the support it has provided in the past. In addition, our right to use the Santander name is on the basis of a non-exclusive, royalty-free, and non-transferable license from Santander, and further only extends to uses in connection with our current and future operations within the United States. Santander may terminate such license at any time Santander ceases to own, directly or indirectly, 50% or more of our common stock. If we were required to change our name, we would incur the administrative costs and time associated with revising legal documents and marketing materials, and also may experience loss of brand and loss of business or loss of funding due to consumers' and banks' relative lack of familiarity with our new name. Additionally, Chrysler may terminate the Chrysler Agreement if a person other than Santander and its affiliates or our other stockholders owns 20% or more of our common stock and Santander and its affiliates own fewer shares of common stock than such person.

Santander has provided guarantees on the covenants, agreements, and our obligations under the governing documents of our warehouse facilities and privately issued amortizing notes. These guarantees are limited to our obligations as servicer.

Some terms of our credit agreements are influenced by, among other things, the credit ratings of Santander. If Santander were to suffer credit ratings downgrades or other adverse financial developments, we could be negatively impacted, either directly or indirectly. Santander's short-term credit ratings downgrades in 2012, from A-1 to A-2 (Standard & Poor's) and from P-1 to P-2 (Moody's), did not directly impact our cost of funds. However, due to the contractual terms of certain of our debt agreements, these downgrades resulted in the loss of our ability to commingle funds. The loss of commingling increased the amount of funds we were required to borrow, thereby indirectly raising our cost of funds by approximately \$1 million per month. In addition, because of the methodologies applied by credit ratings agencies, our securitization ratings in our ABS offerings are indirectly tied to Santander's credit ratings. Santander applies certain standardized banking policies, procedures and standards across its affiliated entities, including with respect to internal audit, credit approval, governance, risk management, and compensation practices. We currently follow certain of these Santander policies and may in the future become subject to additional Santander policies, procedures and standards, which could result in changes to our practices.

It is also possible that our continuing relationship with Santander or SHUSA could reduce the willingness of other banks to develop relationships with us due to general competitive dynamics among such banks.

Negative changes in the business of the OEMs with which we have strategic relationships, including Chrysler, could adversely affect our business.

A significant adverse change in Chrysler's or other automotive manufacturers' business, including (i) significant adverse changes in their respective liquidity position and access to the capital markets, (ii) the production or sale of Chrysler or other automotive manufacturers' vehicles (including the effects of any product recalls), (iii) the quality or resale value of Chrysler or other vehicles, (iv) the use of marketing incentives, (v) Chrysler's or other automotive manufacturers' relationships with their key suppliers, or (vi) Chrysler's or other automotive manufacturers' respective relationships with the United Auto Workers and other labor unions and other factors impacting automotive manufacturers or their employees could have a material adverse effect on our profitability and financial condition. Under the Chrysler Agreement, we originate private-label loans and leases to facilitate the purchase of Chrysler vehicles by consumers and Chrysler-franchised automotive dealers. In the future, it is possible that Chrysler or other automotive manufacturers with whom we have relationships could utilize other companies to support their financing needs, including offering products or terms that we would not or could not offer, which could have a material adverse

impact on our business and operations. Furthermore, Chrysler or other automotive manufacturers could expand or establish or acquire captive finance companies to support their financing needs thus reducing their need for our services.

There can be no assurance that the global automotive market, or Chrysler's or our other OEM partners' share of that market, will not suffer downturns in the future, and any negative impact could in turn have a material adverse effect on our business, results of operations, and financial position.

*Our information technology may not support our future volumes and business strategies.

We rely on our proprietary origination and servicing platforms that utilize database-driven software applications, including nearly 20 years of internal historical credit data and extensive third-party data, to continuously adapt our origination and servicing operations to evolving consumer behavior, changing vehicle finance and consumer loan products and third party purchaser requirements. We employ an extensive team of engineers, information technology analysts, and website designers to ensure that our information technology systems remain on the cutting edge. However, due to the continued rapid changes in technology, there can be no assurance that our information technology solutions will continue to be adequate for the business or to provide a competitive advantage. Our network and information systems are important to our operating activities and any network and information system shutdowns could disrupt our ability to process loan applications, originate loans, or service our existing loan portfolios, which could have a material adverse impact on our operating activities. Shutdowns may be caused by unforeseen catastrophic events, including natural disasters, terrorist attacks, large-scale power outages, software or hardware defects, computer viruses, cyber attacks, external or internal security breaches, acts of vandalism, misplaced or lost data, programming or human errors, difficulties in migrating technology facilities from one location to another, or other similar events. Although we maintain, and regularly assess the adequacy of, a disaster recovery plan designed to effectively manage the effects of such unforeseen events, we cannot be certain that such plan will function as intended, or otherwise resolve or compensate for such effects. Such a failure of our disaster recovery plan, if and when experienced, may have a material adverse effect on our revenue and ability to support and service our customer base.

We are required to make significant estimates and assumptions in the preparation of our financial statements and our estimates and assumptions may not be accurate.

The preparation of our consolidated financial statements in conformity with generally accepted accounting principles in the United States of America ("GAAP") requires our management to make significant estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of income and expense during the reporting periods. We also use estimates and assumptions in determining the residual values of leased vehicles. Critical estimates are made by management in determining, among other things, the allowance for loan losses, amounts of impairment, and valuation of income taxes. If our underlying estimates and assumptions prove to be incorrect, our financial condition and results of operations may be materially adversely affected.

*Our allowance for loan losses and impairments may prove to be insufficient to absorb probable losses inherent in our loan portfolio.

We maintain an allowance for loan losses, established through a provision for loan losses charged to expense, that we believe is appropriate to provide for probable losses inherent in our originated loan portfolio. For receivables portfolios purchased from other lenders at a discount to the aggregate principal balance of the receivables, the portion of the discount that was attributable to credit deterioration since origination of the loans is recorded as a nonaccretable difference. Any deterioration in the performance of the purchased portfolios after acquisition results in an incremental allowance. Our allowance for loan losses as of September 30, 2014 is \$3.3 billion, or 12.3% of outstanding principal balance. The determination of the appropriate level of the allowance for loan losses, and nonaccretable difference inherently involves a high degree of subjectivity and requires us to make significant estimates of current credit risks and future trends, all of which are subject to change. Changes in economic conditions affecting borrowers, new information regarding our loans, and other factors, both within and outside of our control, may require an increase in the allowance for loan losses. Furthermore, growth in our loan portfolio generally would lead to an increase in the provision for loan losses. Some of our planned growth is in lending areas other than vehicle loans, and we are not experienced in estimating loan and credit losses in those other areas. In addition, if net chargeoffs in future periods

exceed the allowance for loan losses, we will need to make additional provisions to increase the allowance for loan losses. There is no accurate method for predicting loan and credit losses, and we cannot assure you that our loan loss allowance will be sufficient to cover actual losses. Any increases in the allowance for loan losses will result in a decrease in net income and capital and may have a material adverse effect on us.

*Our profitability and financial condition could be materially adversely affected if the value of used cars declines, resulting in lower residual values of our vehicle leases and lower recoveries in sales of repossessed vehicles. General economic conditions, the supply of off-lease and other used vehicles to be sold, new vehicle market prices and marketing programs, vehicle brand image and strength, perceived vehicle quality, general consumer preference and confidence levels, seasonality, overall price and volatility of gasoline or diesel fuel, among other factors, heavily influence used vehicle prices and thus the residual value of our leased vehicles and the amount we recover in remarketing repossessed vehicles. We expect our financial results to be more sensitive to used auto prices as leases become a larger part of our business.

Our expectation of the residual value of a leased vehicle is a critical input in determining the amount of the lease payments at the inception of a lease contract. Our lease customers are responsible only for any deviation from expected residual value that is caused by excess mileage or excess wear and tear, while we retain the obligation to absorb any general market changes in the value of the vehicle. Therefore, our operating lease expense is increased when we have to take an impairment on our residual values or when the realized residual value of a vehicle at lease termination is less than the expected residual value for the vehicle at lease inception. In addition, the timeliness, effectiveness, and quality of our remarketing of off-lease vehicles affects the net proceeds realized from the vehicle sales. While we have elected not to purchase residual value insurance, our exposure is somewhat lessened by Chrysler's residual subvention programs and the sharing of losses over a specified threshold. However, we take the first portion of loss on any vehicle, and such losses could have a negative impact on our profitability and financial condition.

Lower used vehicle prices also reduce the amount we can recover when remarketing repossessed vehicles that serve as collateral underlying loans. As a result, declines in used vehicle prices could have a negative impact on our profitability and financial condition.

*Poor portfolio performance may trigger credit enhancement provisions in our revolving credit facilities or secured structured financings.

Our revolving credit facilities generally have net spread, delinquency, and net loss ratio limits on the receivables pledged to each facility that, if exceeded, would increase the level of credit enhancement requirements for that facility and redirect all excess cash to the credit providers. Generally, these limits are calculated based on the portfolio collateralizing the respective credit line; however, for certain of our warehouse lines, delinquency and net loss ratios are calculated with respect to our serviced portfolio as a whole. Our facilities used to finance vehicle lease originations also have a residual loss ratio limit calculated with respect to our serviced lease portfolio as a whole.

The documents that govern our secured structured financings also contain cumulative net loss ratio limits on the receivables included in each securitization trust. If, at any measurement date, a cumulative net loss trigger with respect to any financing were to exceed the specified limits, provisions of the financing agreements would increase the level of credit enhancement requirements for that financing and redirect all excess cash to the holders of the ABS. During this period, excess cash flows, if any, from the facility would be used to fund the increased credit enhancement levels rather than being distributed to us. Once an impacted trust reaches the new requirement, we would return to receiving a residual distribution from the trust.

*Future significant loan, lease, or unsecured consumer loan repurchase requirements could harm our profitability and financial condition.

We have repurchase obligations in our capacity as servicer in securitizations and whole-loan sales. If a servicer breaches a representation, warranty, or servicing covenant with respect to the loans sold, the servicer may be required by the servicing provisions to repurchase that asset from the purchaser or otherwise compensate one or more classes of investors for losses caused by the breach. If significant repurchases of assets or other payments are required under our responsibility as servicer, it could have a material adverse effect on our financial condition, liquidity, and results of operations. As we have increased the number of loans sold, the potential impact of such repurchases has increased.

*We apply financial leverage to our operations, which may materially adversely affect our business, results of operations, and financial condition.

We currently apply financial leverage, pledging most of our assets to credit facilities and securitization trusts, and we intend to continue to apply financial leverage in our retail lending operations. Our debt-to-assets ratio is 88% as of September 30, 2014. Although our total borrowings are restricted by covenants in our credit facilities and market conditions, our Board of Directors

80

may change our target borrowing levels at any time without the approval of our stockholders. Incurring substantial debt subjects us to the risk that our cash flow from operations may be insufficient to service our outstanding debt.

*Our indebtedness and other obligations are significant and impose restrictions on our business.

We have a significant amount of indebtedness. At September 30, 2014 and December 31, 2013, we had approximately \$26.8 billion and \$23.3 billion, respectively, in principal amount of indebtedness outstanding (including approximately \$25.1 billion and \$22.2 billion, respectively, in secured indebtedness). Interest expense on our indebtedness constituted approximately 11% of our total net finance and other interest income, net of leased vehicle expense, for the nine months ended September 30, 2014.

Our debt reduces operational flexibility and creates default risks. Our revolving credit facilities contain a borrowing base or advance rate formula which requires us to pledge finance contracts in excess of the amounts which we can borrow under the facilities. We are also required to hold certain funds in restricted cash accounts to provide additional collateral for borrowings under the credit facilities. In addition, certain facilities require the replacement of delinquent or defaulted collateral, and the finance contracts pledged as collateral in securitizations must be less than 31 days delinquent at the time the securitization is issued. Accordingly, increases in delinquencies or defaults resulting from weakened economic conditions would require us to pledge additional finance contracts to support the same borrowing levels and may cause us to be unable to securitize loans to the extent we desire. These outcomes would adversely impact our financial position, liquidity, and results of operations.

Additionally, the credit facilities generally contain various covenants requiring in certain cases minimum financial ratios, asset quality, and portfolio performance ratios (portfolio net loss and delinquency ratios, and pool level cumulative net loss ratios) as well as limits on deferral levels. Generally, these limits are calculated based on the portfolio collateralizing the respective line; however, for certain of our third-party credit facilities, delinquency and net loss ratios are calculated with respect to our serviced portfolio as a whole. Covenants on our debts also limit our ability to:

- incur or guarantee additional indebtedness;
- purchase large loan portfolios in bulk;
- pay dividends or make distributions on our capital stock or make certain other restricted payments;
- sell assets, including our loan portfolio or the capital stock of our subsidiaries;
- enter into transactions with affiliates;
- create or incur liens; and
- consolidate, merge, sell, or otherwise dispose of all or substantially all of our assets.

Additionally, certain of our credit facilities contain minimum tangible net worth requirements or key man provisions.

Failure to meet any of these covenants could result in an event of default under these agreements. If an event of default occurs under these agreements, the lenders could elect to declare all amounts outstanding under these agreements to be immediately due and payable, enforce their interests against collateral pledged under these agreements, restrict our ability to obtain additional borrowings under these agreements and/or remove us as servicer.

We currently have the ability to pledge retained residuals and create additional unsecured indebtedness on our credit facilities provided by Santander. Santander may elect not to renew these facilities, causing us to have to find other funding sources prior to the maturity of the facilities. If our debt service obligations increase, whether due to the increased cost of existing indebtedness or the incurrence of additional indebtedness, we may be required to dedicate a significant portion of our cash flow from operations to the payment of principal of, and interest on, our indebtedness, which would reduce the funds available for other purposes. Our indebtedness also could limit our ability to withstand competitive pressures and reduce our flexibility in responding to changing business and economic conditions.

In addition, certain of our funding arrangements may require us to make payments to third parties if losses exceed certain thresholds, including, for example, our flow agreements with Bank of America, CBP and SBNA and arrangements with certain third-party loan originators of loans that we purchase on a periodic basis.

Competition with other lenders could adversely affect us.

The vehicle finance market is served by a variety of entities, including the captive finance affiliates of major automotive manufacturers, banks, savings and loan associations, credit unions, and independent finance companies. The market is highly fragmented, with no individual lender capturing more than 10% of the market. Our competitors often provide financing on terms more favorable to automobile purchasers or dealers than we offer. Many of these competitors also have long-standing

relationships with automobile dealerships and may offer dealerships or their customers other forms of financing that we do not offer.

We anticipate that we will encounter greater competition as we expand our operations and as the economy continues to emerge from recession. In addition, certain of our competitors are not subject to the same regulatory regimes that we are. As a result, these competitors may have advantages in conducting certain businesses and providing certain services, and may be more aggressive in their loan origination activities. Increasing competition could also require us to lower the rates we charge on loans in order to maintain loan origination volume, which could also have a material adverse effect on our business, including our profitability.

Changes in interest rates may adversely impact our profitability and risk profile.

Our profitability may be directly affected by interest rate levels and fluctuations in interest rates. As interest rates change, our gross interest rate spread on originations either increases or decreases because the rates charged on the contracts originated or purchased from dealers are limited by market and competitive conditions, restricting our ability to pass on increased interest costs to the consumer. Additionally, although the majority of our borrowers are nonprime and are not highly sensitive to interest rate movement, increases in interest rates may reduce the volume of loans we originate. While we monitor the interest rate environment and employ hedging strategies designed to mitigate the impact of increased interest rates, we cannot provide assurance that hedging strategies will fully mitigate the impact of changes in interest rates.

We are subject to market, operational, and other related risks associated with our derivative transactions that could have a material adverse effect on us.

We enter into derivative transactions for economic hedging purposes. We are subject to market and operational risks associated with these transactions, including basis risk, the risk of loss associated with variations in the spread between the asset yield and the funding and/or hedge cost, credit or default risk, the risk of insolvency, or other inability of the counterparty to a particular transaction to perform its obligations thereunder, including providing sufficient collateral. Additionally, certain of our derivative agreements require us to post collateral when the fair value of the derivative is negative. Our ability to adequately monitor, analyze, and report derivative transactions continues to depend, to a great extent, on our information technology systems. This factor further increases the risks associated with these transactions and could have a material adverse effect on us.

*Adverse outcomes to current and future litigation against us may negatively impact our financial position, liquidity, and results of operations.

We are party to various litigation claims and legal proceedings. As a consumer finance company, we are subject to various consumer claims and litigation seeking damages and statutory penalties. Some litigation against us could take the form of class action complaints by consumers. As the assignee of loans originated by automotive dealers, we also may be named as a co-defendant in lawsuits filed by consumers principally against automotive dealers. Additionally, we are party to two purported securities class action lawsuits seeking to represent a class consisting of all those who purchased or otherwise acquired our securities pursuant and/or traceable to our Registration Statement and Prospectus issued in connection with our initial public offering. Each class action complaint alleges that our Registration Statement and Prospectus contained misleading statements concerning the Company's auto lending business and underwriting practices and seeks damages and other relief.

We evaluate these litigation claims and legal proceedings to assess the likelihood of unfavorable outcomes and to estimate, if possible, the amount of potential losses. Based on these assessments and estimates, we establish reserves or disclose the relevant litigation claims or legal proceedings, as appropriate. These assessments and estimates are based on the information available to management at the time and involve a significant amount of management judgment. Actual outcomes or losses may differ materially from our current assessments and estimates and any adverse resolution of litigation pending or threatened against us could negatively impact our financial position, liquidity, and results of operations.

A security breach or a cyber attack could adversely affect our business.

In the normal course of business, we collect, process and retain sensitive and confidential consumer information and may, subject to applicable law, share that information with our third-party service providers. Despite the security measures we have in place, our facilities and systems, and those of third-party service providers, could be vulnerable to external or internal security breaches, acts of vandalism, computer viruses, misplaced or lost data, programming or human errors, or other similar events. A security breach or cyber attack of our computer systems could interrupt or damage our operations or harm our

reputation. If third parties or our employees are able to penetrate our network security or otherwise misappropriate our customers' personal information or contract information, or if we give third parties or our employees improper access to consumers' personal information or contract information, we could be subject to liability. This liability could include investigations, fines, or penalties imposed by state or federal regulatory agencies, including the loss of necessary permits or licenses. This liability could also include identity theft or other similar fraud-related claims, claims for other misuses, or losses of personal information, including for unauthorized marketing purposes or claims alleging misrepresentation of our privacy and data security practices.

We rely on encryption and authentication technology licensed from third parties to provide the security and authentication necessary to effect secure online transmission of confidential consumer information. Advances in computer capabilities, new discoveries in the field of cryptography, or other events or developments may result in a compromise or breach of the algorithms that we use to protect sensitive consumer transaction data. A party who is able to circumvent our security measures could misappropriate proprietary information or cause interruptions in our operations. We may be required to expend capital and other resources to protect against such security breaches or cyber attacks or to alleviate problems caused by such breaches or attacks. Our security measures are designed to protect against security breaches and cyber attacks, but our failure to prevent such security breaches and cyber attacks, whether due to an external cyber-security incident, a programming error, or other cause, could damage our reputation, expose us to mitigation costs and the risks of private litigation and government enforcement, disrupt our business, or otherwise have a material adverse effect on our sales and results of operations.

We partially rely on third parties to deliver services, and failure by those parties to provide these services or meet contractual requirements could have a material adverse effect on our business.

We depend on third-party service providers for many aspects of our business operations. For example, we depend on third parties like Experian to obtain data related to our market that we use in our origination and servicing platforms. In addition, we rely on third-party servicing centers for a portion of our servicing activities and on third-party repossession agents. If a service provider fails to provide the services that we require or expect, or fails to meet contractual requirements, such as service levels or compliance with applicable laws, the failure could negatively impact our business by adversely affecting our ability to process customers' transactions in a timely and accurate manner, otherwise hampering our ability to service our customers, or subjecting us to litigation or regulatory risk for poor vendor oversight. Such a failure could adversely affect the perception of the reliability of our networks and services, and the quality of our brands, and could have a material and adverse effect on our financial condition and results of operations.

Catastrophic events may negatively affect our business, financial condition, and results of operations.

Natural disasters, acts of war, terrorist attacks, and the escalation of military activity in response to these attacks or otherwise may have negative and significant effects, such as imposition of increased security measures, changes in applicable laws, market disruptions, and job losses. These events may have an adverse effect on the economy in general. Moreover, the potential for future terrorist attacks and the national and international responses to these threats could affect our business in ways that cannot be predicted. The effect of any of these events or threats could have a material adverse effect on our business, results of operations, and financial condition.

The obligations associated with being a public company require significant resources and management attention, which will increase our costs of operations and may divert focus from our business operations.

Until our IPO, we were not required to comply with the Commission requirements to file periodic reports with the Commission. As a public company, we are now required to file periodic reports containing our consolidated financial statements with the Commission within a specified time following the completion of quarterly and annual periods. As a public company, we will also incur significant legal, accounting, insurance, and other expenses. Compliance with these reporting requirements and other rules of the Commission and the rules of the NYSE will increase our legal and financial compliance costs and make some activities more time consuming and costly. Furthermore, the need to establish the corporate infrastructure demanded of a public company may divert management's attention from

implementing our growth strategy, which could prevent us from successfully implementing our strategic initiatives and improving our business, results of operations, and financial condition. Among other things, we are required to: prepare and distribute periodic reports and other stockholder communications in compliance with our obligations under the federal securities laws and applicable stock exchange rules; appoint new independent members to our Board of Directors and committees; create or expand the roles and duties of our Board of Directors and committees of the board; institute more comprehensive compliance and internal audit functions; evaluate and maintain our system of internal control over financial reporting, and report on management's assessment thereof,

in compliance with the requirements of Section 404 of the Sarbanes-Oxley Act and the related rules and regulations of the SEC and the Public Company Accounting Oversight Board; involve and retain outside legal counsel and accountants in connection with the activities listed above; enhance our investor relations function; and maintain internal policies, including those relating to disclosure controls and procedures. We have made, and will continue to make, changes to our internal controls and procedures for financial reporting and accounting systems to meet our reporting obligations as a public company. However, we cannot predict or estimate the amount of additional costs we may incur in order to comply with these requirements. We anticipate that these costs will materially increase our total costs and expenses.

Internal controls over financial reporting may not prevent or detect all errors or acts of fraud.

We maintain disclosure controls and procedures designed to ensure that we timely report information as specified in the rules and regulations of the Commission. We also maintain a system of internal control over financial reporting. However, these controls may not achieve their intended objectives. Control processes that involve human diligence and compliance, such as our disclosure controls and procedures and internal control over financial reporting, are subject to lapses in judgment and breakdowns resulting from human failures. Controls can also be circumvented by collusion or improper management override. Because of such limitations, there are risks that material misstatements due to error or fraud may not be prevented or detected and that information may not be reported on a timely basis. If our controls are not effective, it could have a material adverse effect on our financial condition, results of operations, and market for our common stock, and could subject us to regulatory scrutiny.

Regulatory Risks

*We operate in a highly regulated industry and continually changing federal, state, and local laws and regulations could materially adversely affect our business.

Due to the highly regulated nature of the consumer finance industry, we are required to comply with a wide array of federal, state, and local laws and regulations that regulate, among other things, the manner in which we conduct our origination and servicing operations. These regulations directly impact our business and require constant compliance, monitoring, and internal and external audits. Although we have an extensive enterprise-wide compliance framework structured to continuously monitor our activities, compliance with applicable law is costly, and may create operational constraints.

These laws and their implementing regulations include, among others, usury laws, Anti-Money Laundering requirements (Bank Secrecy Act and USA PATRIOT Act), ECOA, Fair Debt Collection Practices Act, Fair Credit Reporting Act, Privacy Regulations (Gramm-Leach Bliley Act and Right to Financial Privacy Act), Electronic Funds Transfer Act, Servicemembers' Civil Relief Act, Telephone Consumer Protection Act, Truth in Lending Act, Financial Institutions Reform, Recovery and Enforcement Act, and requirements related to unfair, deceptive, or abusive acts or practices.

Many states and local jurisdictions have consumer protection laws analogous to, or in addition to, those listed above. These federal, state, and local laws regulate the manner in which financial institutions deal with customers when making loans or conducting other types of financial transactions.

New legislation and regulation may include changes with respect to consumer financial protection measures and systematic risk oversight authority. Such changes present the risk of financial loss due to regulatory fines or penalties, restrictions or suspensions of business, or costs associated with mandatory corrective action as a result of failure to adhere to applicable laws, regulations, and supervisory guidance. Failure to comply with these laws and regulations could also give rise to regulatory sanctions, customer rescission rights, action by state and local attorneys general, civil or criminal liability, or damage to our reputation, which could materially and adversely affect our business, financial condition, and results of operations.

In connection with the SEC's review of the Annual Reports on Form 10-K filed by Santander Drive Auto Receivables Trust 2010-1 and Santander Drive Auto Receivables Trust 2010-2 (together, the "2010 Trusts") for the fiscal year ended December 31, 2012, the 2010 Trusts received a comment from the SEC regarding the applicability to SCUSA, as the servicer of the 2010 Trusts, of certain servicing criteria set forth in Regulation AB relating to the safeguarding of pool

assets and related documentation of the 2010 Trusts. We completed our final response to this comment letter, including amendments to the Form 10-K filings by the 2010 Trusts, in September 2013 and believe there has been no adverse impact on our business.

*We are subject to certain banking regulations that limit our business activities, including our ability to pay dividends and enter into certain business transactions without the approval of the Federal Reserve.

Because our controlling shareholder, SHUSA, is a bank holding company and because we provide third party services to banks, we are subject to certain banking regulations, including oversight by the Federal Reserve and the OCC. We also are subject to oversight by the CFPB and the Bank of Spain. Such banking regulations could limit the activities and the types of businesses that we may conduct. The Federal Reserve has broad enforcement authority over bank holding companies and their subsidiaries. The Federal Reserve could exercise its power to restrict SHUSA from having a non-bank subsidiary that is engaged in any activity that, in the Federal Reserve's opinion, is unauthorized or constitutes an unsafe or unsound business practice, and could exercise its power to restrict us from engaging in any such activity. This power includes the authority to prohibit or limit the payment of dividends if, in the Federal Reserve's opinion, such payment would constitute an unsafe or unsound practice. Moreover, certain banks and bank holding companies, including SHUSA, are required to perform a stress test and submit a capital plan to the Federal Reserve on an annual basis, and to receive a notice of non-objection to the plan from the Federal Reserve before taking capital actions, such as paying dividends, implementing common equity repurchase programs, or redeeming or repurchasing capital instruments. Due to the Federal Reserve's objection in March 2014 to SHUSA's capital plan, we currently are prohibited from paying dividends until either the Federal Reserve issues a non-objection to SHUSA's next capital plan submission or a non-objection to a planned dividend payment. On September 15, 2014, SHUSA entered into a written agreement with the Federal Reserve memorializing prior discussions under which, among other things, SHUSA is prohibited from allowing its non-wholly-owned nonbank subsidiaries, including us, to declare or pay any dividend, or to make any capital distribution, without the prior written approval of Federal Reserve. There can be no assurance when SHUSA will submit a revised capital plan, or whether or when the Federal Reserve will accept SHUSA's capital plan, or whether the Federal Reserve will give its written approval for any future dividends or capital distributions.

SHUSA and SCUSA also are subject to increasingly stringent oversight by the Federal Reserve due to the Federal Reserve's objection to SHUSA's CCAR capital plan, and in response, SHUSA has made a concentrated effort to improve its governance, oversight and internal controls, policies, procedures and functions, including as they relate to SCUSA. We expect to incur higher costs than originally anticipated in connection with ensuring compliance with, and assisting SHUSA in, the CCAR process.

The Federal Reserve may also impose substantial fines and other penalties for violations that we may commit, and has the authority to approve or disallow acquisitions or other activities we may contemplate, which may limit our future growth plans. To the extent that we are subject to banking regulation, we could be at a competitive disadvantage because some of our competitors are not subject to these limitations. The suspension of our ability to pay dividends or other limitations placed on SCUSA by the Federal Reserve or any other regulator and additional costs associated with regulatory compliance could have a material adverse effect on us and the trading price of our common stock.

*The Dodd-Frank Act and the creation of the CFPB in addition to recently issued rules and guidance will likely increase our regulatory compliance burden and associated costs.

The Dodd-Frank Act introduced a substantial number of reforms that continue to reshape the structure of the regulation of the financial services industry. In particular, the Dodd-Frank Act includes, among other things, the creation of the CFPB, which is authorized to promulgate and enforce consumer protection regulations relating to financial products and services.

In March 2013, the CFPB issued a bulletin recommending that indirect vehicle lenders, a class that includes us, take steps to monitor and impose controls over dealer markup policies where dealers charge consumers higher interest rates, with the markup shared between the dealer and the lender.

The CFPB is also conducting supervisory audits of large vehicle lenders and has indicated it intends to study and take action with respect to possible ECOA "disparate impact" credit discrimination in indirect vehicle finance. If the CFPB enters into a consent decree with one or more lenders on disparate impact claims, it could negatively impact the business of the affected lenders, and potentially the business of dealers and other lenders in the vehicle finance market. This impact on dealers and lenders could increase our regulatory compliance requirements and associated costs.

Unlike competitors that are banks, we are subject to the licensing and operational requirements of states and other jurisdictions and our business would be adversely affected if we lost our licenses.

The Dodd-Frank Act also included risk retention requirements. Six federal agencies recently approved a final rule implementing these requirements. The rule, which will become effective in October 2015, generally requires sponsors of asset-backed securities (ABS) to retain not less than five percent of the credit risk of the assets collateralizing the ABS issuance. The rule also sets forth prohibitions on transferring or hedging the credit risk that the sponsor is required to retain. The final rule

also does not require any retention for securitizations of commercial loans, commercial mortgages, or automobile loans if they meet specific standards for high quality underwriting. If we do not meet this exception, certain of our securitization structures may be adversely impacted by the risk retention requirement.

Unlike competitors that are banks, we are subject to the licensing and operational requirements of states and other jurisdictions and our business would be adversely affected if we lost our licenses.

Because we are not a depository institution, we do not benefit from exemptions to state loan servicing or debt collection licensing and regulatory requirements. To the extent that they exist, we must comply with state licensing and various operational compliance requirements in all 50 states and the District of Columbia. These include, among others, form and content of contracts, other documentation, collection practices and disclosures, and record keeping requirements. We are sensitive to regulatory changes that may increase our costs through stricter licensing laws, disclosure laws, or increased fees. Currently, we have all required licenses as applicable to do business in all 50 states and the District of Columbia.

In addition, we are subject to periodic examinations by state and other regulators. The states that currently do not provide extensive regulation of our business may later choose to do so. The failure to comply with licensing or permit requirements and other local regulatory requirements could result in significant statutory civil and criminal penalties, monetary damages, attorneys' fees and costs, possible review of licenses, and damage to reputation, brand, and valued customer relationships.

Risks Related to Our Common Stock

*The market price of our common stock may be volatile, which could cause the value of an investment in our common stock to decline.

The market price of our common stock may fluctuate substantially due to a variety of factors, many of which are beyond our control, including:

- general market conditions;
- domestic and international economic factors unrelated to our performance;
- actual or anticipated fluctuations in our quarterly operating results;
- changes in or failure to meet publicly disclosed expectations as to our future financial performance or ability to pay dividends;
- downgrades in securities analysts' estimates of our financial performance or lack of research and reports by industry analysts;
- changes in market valuations or earnings of similar companies;
- any future sales of our common stock or other securities; and
- additions or departures of key personnel.

The stock markets in general have experienced substantial volatility that has often been unrelated to the operating performance of particular companies. These types of broad market fluctuations may adversely affect the trading price of our common stock. In the past, stockholders have sometimes instituted securities class action litigation against companies following periods of volatility in the market price of their securities. Any similar litigation against us could result in substantial costs, divert management's attention and resources, and harm our business or results of operations. For example, we are currently operating in, and have benefited from, a protracted period of historically low interest rates that will not be sustained indefinitely, and future fluctuations in interest rates could cause an increase in volatility of the market price of our common stock.

Certain provisions of our amended and restated certificate of incorporation and amended and restated bylaws may have anti-takeover effects, which could limit the price investors might be willing to pay in the future for our common stock. In addition, Delaware law may inhibit takeovers of us and could limit our ability to engage in certain strategic transactions our Board of Directors believes would be in the best interests of stockholders.

Certain provisions of our amended and restated certificate of incorporation and amended and restated bylaws could discourage unsolicited takeover proposals that stockholders might consider to be in their best interests. Among other things, our amended and restated certificate of incorporation and amended and restated bylaws include provisions that:

- do not permit cumulative voting in the election of directors, which would otherwise allow less than a majority of stockholders to elect director candidates;
- fix the number of directors and provide that the number of directors may only be changed by an amendment to our bylaws;
- limit the ability of our stockholders to nominate candidates for election to our Board of Directors;
- authorize the issuance of “blank check” preferred stock without any need for action by stockholders;
- limit the ability of stockholders to call special meetings of stockholders or to act by written consent in lieu of a meeting; and
- establish advance notice requirements for nominations for election to our Board of Directors or for proposing matters that may be acted on by stockholders at stockholder meetings.

The foregoing factors, as well as the significant common stock ownership by SHUSA, could impede a merger, takeover, or other business combination or discourage a potential investor from making a tender offer for our common stock, which, under certain circumstances, could reduce the market value of our common stock.

In addition, Section 203 of the Delaware General Corporation Law (the “DGCL”) generally affects the ability of an “interested stockholder” to engage in certain business combinations, including mergers, consolidations, or acquisitions of additional shares, for a period of three years following the time that the stockholder becomes an “interested stockholder.” An “interested stockholder” is defined to include persons owning directly or indirectly 15% or more of the outstanding voting stock of a corporation. We elected in our amended and restated certificate of incorporation not to be subject to Section 203 of the DGCL. However, our amended and restated certificate of incorporation contains provisions that have the same effect as Section 203, except that they provide that each of SHUSA and its successors and affiliates and certain of its direct transferees are not deemed to be “interested stockholders,” and, accordingly are not subject to such restrictions, as long as it and its affiliates own at least 10% of our outstanding shares of common stock.

Our common stock is subordinate to all of our existing and future indebtedness and any preferred stock, and effectively subordinated to all indebtedness and preferred equity claims against our subsidiaries.

Shares of our common stock are common equity interests in us and, as such, rank junior to all of our existing and future indebtedness and other liabilities. Additionally, holders of our common stock may become subject to the prior dividend and liquidation rights of holders of any classes or series of preferred stock that our Board of Directors may designate and issue without any action on the part of the holders of our common stock. Furthermore, our right to participate in a distribution of assets upon any of our subsidiaries’ liquidation or reorganization is subject to the prior claims of that subsidiary’s creditors and preferred stockholders.

*SHUSA has significant influence over us, including control over decisions that require the approval of stockholders, which could limit your ability to influence the outcome of key transactions, including a change of control. SHUSA owns approximately 60.5% of our common stock, and accordingly has significant influence over us, including and pursuant to the terms of the Shareholders Agreement. Pursuant to the Shareholders Agreement, SHUSA has the right to nominate a majority of our directors, provided certain minimum share ownership thresholds are maintained. Through our Board of Directors, SHUSA controls our policies and operations, including, among other things, the appointment of management, future issuances of our common stock or other securities, the payment of dividends, if any, on our common stock, the incurrence of debt by us, and the entering into of extraordinary transactions.

In addition, the Shareholders Agreement provides the directors nominated by SHUSA with approval rights over certain specific material actions taken by us, provided certain minimum share ownership thresholds are maintained. These material actions include changes in material accounting policies, changes in material tax policies or positions and changes in our principal line of business. Additionally, SHUSA may elect not to permit us to undertake certain actions or activities if SHUSA were to determine that such actions or activities could or would be viewed negatively

by the Federal Reserve or other regulators.

87

*We are a “controlled company” within the meaning of the NYSE rules and, as a result, will qualify for, and intend to rely on, exemptions from certain corporate governance requirements. You will not have the same protections afforded to stockholders of companies that are subject to such requirements.

SHUSA owns a majority of the voting power of our outstanding common stock. As a result, we are a “controlled company” within the meaning of the corporate governance standards. Under these rules, a company of which more than 50% of the voting power is held by an individual, group, or another company is a “controlled company” and may elect not to comply with certain corporate governance requirements, including:

• the requirement that a majority of the Board of Directors consist of independent directors;

• the requirement that our nominating and corporate governance committee be composed entirely of independent directors;

• the requirement that our compensation committee be composed entirely of independent directors; and

• the requirement for an annual performance evaluation of the nominating and corporate governance and compensation committees.

We intend to utilize these exemptions. As a result, we will not have a majority of independent directors on our Board of Directors. Additionally, our compensation and nominating and governance committees will not be composed entirely of independent directors. Accordingly, you will not have the same protections afforded to stockholders of companies that are subject to all of the corporate governance requirements of the NYSE.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

There were no unregistered sales of the Company’s common stock during the period covered by this Quarterly Report on Form 10-Q.

Item 3. Defaults upon Senior Securities

None.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

None.

Item 6. Exhibits

The following exhibits are included herein:

Exhibit Number	Description
31.1*	Chief Executive Officer certification pursuant to Rule 13a-14(a) of the Securities Exchange Act of 1934, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
31.2*	Chief Financial Officer certification pursuant to Rule 13a-14(a) of the Securities Exchange Act of 1934, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
32.1*	Chief Executive Officer certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002
32.2*	Chief Financial Officer certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002
101.INS*	XBRL Instance Document
101.SCH*	XBRL Taxonomy Extension Schema
101.CAL*	XBRL Taxonomy Extension Calculation Linkbase
101.DEF*	XBRL Taxonomy Extension Definition Linkbase
101.LAB*	XBRL Taxonomy Extension Label Linkbase
101.PRE*	XBRL Taxonomy Extension Presentation Linkbase

* Furnished herewith.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

Santander Consumer USA Holdings Inc.
(Registrant)

By: /s/ Thomas G. Dundon
