Form 10-Q
July 30, 2015

UNITED STATES SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549
FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934

For the Quarterly Period Ended June 30, 2015

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934

Commission File Number: 001-32576

ITC HOLDINGS CORP.

(Exact Name of Registrant as Specified in Its Charter)

Michigan

(State or Other Jurisdiction of Incorporation or
Organization)

32-0058047

(I.R.S. Employer Identification No.)

27175 Energy Way

Novi, MI 48377

(Address Of Principal Executive Offices, Including Zip Code)

(248) 946-3000

(Registrant's Telephone Number, Including Area Code)

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting
company)

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

The number of shares of the Registrant's Common Stock, without par value, outstanding as of July 24, 2015 was 156,144,406.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. GENERAL

These condensed consolidated financial statements should be read in conjunction with the notes to the consolidated financial statements as of and for the year ended December 31, 2014 included in ITC Holdings' annual report on Form 10-K for such period.

The accompanying condensed consolidated financial statements have been prepared using accounting principles generally accepted in the United States of America ("GAAP") and with the instructions to Form 10-Q and Rule 10-01 of Securities and Exchange Commission ("SEC") Regulation S-X as they apply to interim financial information.

Accordingly, they do not include all of the information and notes required by GAAP for complete financial statements. These accounting principles require us to use estimates and assumptions that impact the reported amounts of assets, liabilities, revenues and expenses, and the disclosure of contingent assets and liabilities. Actual results may differ from our estimates.

The condensed consolidated financial statements are unaudited, but in our opinion include all adjustments (consisting of normal recurring adjustments) necessary for a fair statement of the results for the interim period. The interim financial results are not necessarily indicative of results that may be expected for any other interim period or the fiscal year.

Supplementary Cash Flows Information

(in thousands)	Six months ended	
	June 30, 2015	2014
Supplementary cash flows information:		
Interest paid (net of interest capitalized)	\$93,803	\$90,248
Income taxes paid — net	40,776	25,416
Supplementary non-cash investing and financing activities:		
Additions to property, plant and equipment and other long-lived assets (a)	\$70,737	\$105,246
Allowance for equity funds used during construction	15,013	9,944

Amounts consist of current liabilities for construction, labor and materials that have not been included in investing (a) activities. These amounts have not been paid for as of June 30, 2015 or 2014, respectively, but have been or will be included as a cash outflow from investing activities for expenditures for property, plant and equipment when paid.

2. RECENT ACCOUNTING PRONOUNCEMENTS

Revenue Recognition

In May 2014, the Financial Accounting Standards Board ("FASB") issued authoritative guidance requiring entities to apply a new model for recognizing revenue from contracts with customers. The guidance will supersede the current revenue recognition guidance and require entities to evaluate their revenue recognition arrangements using a five step model to determine when a customer obtains control of a transferred good or service. The guidance is effective for annual reporting periods beginning after December 15, 2017 and may be adopted using a full or modified retrospective application. We do not expect the guidance to have a material impact on our results of operations, cash flows, or financial position.

Going Concern

In August 2014, the FASB issued authoritative guidance on (1) how to perform a going concern assessment and (2) when going concern disclosures are required under U.S. GAAP. The guidance extends the responsibility for performing a going concern assessment to company management; previously this requirement existed only in auditing literature. The standard is expected to enhance the timeliness, clarity, and consistency of going concern disclosures. The guidance is effective for the annual period ending after December 15, 2016, and for interim periods and annual periods thereafter. Early application is permitted. We do not expect the standard to have a material impact on our consolidated financial statements, including our disclosure.

Table of Contents

Amendments to the Consolidation Analysis

In February 2015, the FASB issued authoritative guidance that amends the variable interest entity consolidation analysis under U.S. GAAP. The new standard was issued to improve targeted areas of consolidation guidance; though the FASB's deliberations were largely focused on the investment management industry, the standard is applicable for reporting entities across industries. Specifically, the guidance amends the consolidation analysis for limited partnerships, clarifies when fees paid to a decision maker should be a factor in the consolidation analysis and amends how variable interests held by related parties affect consolidation. The guidance is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2015. Early application is permitted. We do not expect the standard to have a material impact on our consolidated financial statements.

Amendment to the Balance Sheet Presentation of Debt Issuance Costs

In April 2015, the FASB issued authoritative guidance that amends the balance sheet presentation of debt issuance costs. This new standard requires debt issuance costs to be shown as a direct deduction from the carrying amount of the related debt, consistent with debt discounts. The guidance is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2015 and will be applied retrospectively. Upon transition, an entity is required to comply with the applicable disclosures for a change in an accounting principle. We do not expect the standard to have a material impact on our consolidated financial statements.

3. REGULATORY MATTERS

Start-Up, Development and Pre-Construction Regulatory Assets

As of June 30, 2015, we have recorded a total of \$13.7 million of regulatory assets for start-up, development and pre-construction expenses, including associated interest carrying charges, incurred by ITC Great Plains, which include certain costs incurred for the Kansas Electric Transmission Authority ("KETA") Project and the Kansas V-Plan Project prior to construction. ITC Great Plains made a filing with the FERC under Section 205 of the FPA in May 2013 to recover these start-up, development and pre-construction expenses, including associated debt and equity carrying charges, in future rates. On March 26, 2015, FERC accepted ITC Great Plains' request to commence amortization of the authorized regulatory assets, subject to refund, as well as set the matter for hearing and settlement judge procedures. As a result, ITC Great Plains has included the unamortized balance of the regulatory assets in its rate base and commenced amortization over a 10-year period during the second quarter of 2015. The amortization expense will be recovered through ITC Great Plains' cost-based formula rate template, subject to refund. We do not expect the settlement of this proceeding to have a material impact on our results of operations, cash flows or financial condition.

MISO Funding Policy for Generator Interconnections

On June 18, 2015, FERC issued an order initiating a proceeding, pursuant to Section 206 of the FPA, to examine MISO's funding policy for generator interconnections, which allows a transmission owner to unilaterally elect to fund network upgrades and recover such costs from the interconnection customer. In this order, FERC suggested the MISO funding policy be revised to require mutual agreement between the interconnection customer and transmission owner to utilize the election to fund network upgrades. We do not expect the resolution of this proceeding to have a material impact on our results of operations, cash flows or financial condition.

Order on Formula Rate Protocols

In 2012, the FERC issued an order initiating a proceeding, pursuant to Section 206 of the FPA, to determine whether the formula rate protocols under the MISO Tariff are sufficient to ensure just and reasonable rates. Our MISO Regulated Operating Subsidiaries were named in the order. In May 2013, the FERC issued an order that determined the formula rate protocols are insufficient to ensure just and reasonable rates and directed MISO and its member transmission owners ("TOs") to file revised formula rate protocols. In September 2013, MISO and its TOs, including our MISO Regulated Operating Subsidiaries, filed revised formula rate protocols which require our MISO Regulated Operating Subsidiaries to provide additional information for certain aspects of the formula rates used to calculate their respective annual revenue requirements. On March 20, 2014, FERC issued an order conditionally accepting MISO and its TOs' September 2013 filing and required a further compliance filing, which MISO and its TOs made on May 19, 2014. On January 22, 2015, the FERC conditionally accepted the May 19, 2014 compliance filing, subject to a further compliance filing, which was made on February 13, 2015. We do not expect the revised formula rate protocols to impact our results of operations, cash flows or financial condition.

Table of Contents

Rate of Return on Equity and Capital Structure Complaints

See “Rate of Return on Equity and Capital Structure Complaints” in Note 11 for a discussion of the complaints.

Cost-Based Formula Rates with True-Up Mechanism

The transmission rates at our Regulated Operating Subsidiaries are set annually, using the FERC-approved formula rates, and the rates remain in effect for a one-year period. By completing their formula rate templates on an annual basis, our Regulated Operating Subsidiaries are able to adjust their transmission rates to reflect changing operational data and financial performance, including the amount of network load on their transmission systems (for our MISO Regulated Operating Subsidiaries), operating expenses and additions to property, plant and equipment when placed in service, among other items. The FERC-approved formula rates use approved return on equity (“ROE”) rates and do not require further action or FERC filings for the calculated joint zone rates to go into effect, although the rates are subject to legal challenge at the FERC. Our Regulated Operating Subsidiaries will continue to use formula rates to calculate their respective annual revenue requirements unless the FERC determines the rates to be unjust and unreasonable or another mechanism is determined by the FERC to be just and reasonable. See “Rate of Return on Equity and Capital Structure Complaints” in Note 11 for detail on ROE matters including incentive adders approved by FERC in 2015. Our cost-based formula rate templates include a true-up mechanism, whereby our Regulated Operating Subsidiaries compare their actual revenue requirements to their billed revenues for each year to determine any over- or under-collection of revenue requirements. Revenue is recognized for services provided during each reporting period based on actual revenue requirements calculated using the formula rate templates. Our Regulated Operating Subsidiaries accrue or defer revenues to the extent that the actual revenue requirement for the reporting period is higher or lower, respectively, than the amounts billed relating to that reporting period. The amount of accrued or deferred revenues is reflected in customer bills within two years under the provisions of the formula rate templates.

The net changes in regulatory assets and liabilities associated with our Regulated Operating Subsidiaries’ formula rate revenue accruals and deferrals, including accrued interest, were as follows during the six months ended June 30, 2015:

(in thousands)	Total
Balance as of December 31, 2014	\$(56,103)
Net refund of 2013 revenue deferrals and accruals, including accrued interest	17,578
Net revenue accrual for the six months ended June 30, 2015	15,316
Net accrued interest payable for the six months ended June 30, 2015	(1,027)
Balance as of June 30, 2015	\$(24,236)

Regulatory assets and liabilities associated with our Regulated Operating Subsidiaries’ formula rate revenue accruals and deferrals and associated accrued interest are recorded in the condensed consolidated statements of financial position at June 30, 2015 as follows:

(in thousands)	Total
Current assets	\$8,974
Non-current assets	27,231
Current liabilities	(37,244)
Non-current liabilities	(23,197)
Balance as of June 30, 2015	\$(24,236)

4. GOODWILL AND INTANGIBLE ASSETS

Goodwill

At June 30, 2015 and December 31, 2014, we had goodwill balances recorded at ITCTransmission, METC and ITC Midwest of \$173.4 million, \$453.8 million and \$323.0 million, respectively, which resulted from the ITCTransmission acquisition, the METC acquisition and ITC Midwest’s asset acquisition, respectively.

Intangible Assets

We have recorded intangible assets as a result of the METC acquisition in 2006. The carrying value of these assets was \$32.7 million and \$34.2 million (net of accumulated amortization of \$25.7 million and \$24.2 million) as of June 30, 2015 and December 31, 2014, respectively.

Table of Contents

We have also recorded intangible assets for payments and obligations made by ITC Great Plains to certain TOs to acquire rights which are required under the SPP tariff to designate ITC Great Plains to build, own and operate projects within the SPP region, including the KETA Project and the Kansas V-Plan Project. The carrying amount of these intangible assets was \$14.4 million and \$14.6 million (net of accumulated amortization of \$0.9 million and \$0.7 million) as of June 30, 2015 and December 31, 2014, respectively.

During each of the three months ended June 30, 2015 and 2014, we recognized \$0.9 million and \$0.8 million, respectively, of amortization expense of our intangible assets and \$1.7 million and \$1.6 million for the six months ended June 30, 2015 and 2014, respectively. For each of the next five years, we expect the annual amortization of our intangible assets that have been recorded as of June 30, 2015 to be \$3.3 million per year.

5. DEBT

Derivative Instruments and Hedging Activities

We may use derivative financial instruments, including interest rate swap contracts, to manage our exposure to fluctuations in interest rates. The use of these financial instruments mitigates exposure to these risks and the variability of our operating results. We are not a party to leveraged derivatives and do not enter into derivative financial instruments for trading or speculative purposes. The interest rate swaps listed below manage interest rate risk associated with the forecasted future issuance of fixed-rate debt related to the expected refinancing of the maturing ITC Holdings 5.875% Senior Notes, due September 30, 2016. As of June 30, 2015, ITC Holdings had \$139.3 million outstanding under the 5.875% Senior Notes.

Interest Rate Swaps	Notional Amount	Fixed Rate	Original Term	Effective Date
(Amounts in millions)				
August 2014 swap	\$25.0	3.217	% 10 years	September 2016
October 2014 swap	25.0	3.075	% 10 years	September 2016
January 2015 swap	25.0	2.301	% 10 years	September 2016
Total	\$75.0			

The 10-year term interest rate swaps call for ITC Holdings to receive interest quarterly at a variable rate equal to LIBOR and to pay interest semi-annually at various fixed rates effective for the 10-year period beginning September 30, 2016 after the agreements have been terminated. The agreements include a mandatory early termination provision and will be terminated no later than the effective date of the interest rate swaps of September 30, 2016. The interest rate swaps have been determined to be highly effective at offsetting changes in the fair value of the forecasted interest cash flows associated with the expected debt issuance attributable to changes in benchmark interest rates from the trade date of the interest rate swaps to the issuance date of the debt obligation. As of June 30, 2015, there has been no material ineffectiveness recorded in the condensed consolidated statement of operations. The interest rate swaps qualify for hedge accounting treatment, whereby any gain or loss recognized from the trade date to the effective date for the effective portion of the hedge is recorded net of tax in accumulated other comprehensive income ("AOCI"). This amount will be accumulated and amortized as a component of interest expense over the life of the forecasted debt. As of June 30, 2015, the fair value of the derivative instruments was an asset of \$1.2 million recorded to other non-current assets and a liability of \$1.4 million recorded to other non-current liabilities. None of the interest rate swaps contain credit-risk-related contingent features. Refer to Note 10 for additional fair value information.

ITC Midwest

On April 7, 2015, ITC Midwest issued \$225.0 million aggregate principal amount of 3.83% First Mortgage Bonds, Series G, due 2055. The proceeds from the issuance were used for general corporate purposes, including the repayment of borrowings under ITC Midwest's revolving credit agreement. ITC Midwest's First Mortgage Bonds are issued under its first mortgage and deed of trust and secured by a first mortgage lien on substantially all of its property.

ITC Holdings

On June 8, 2015, pursuant to the authorization by the Board of Directors, ITC Holdings established an ongoing commercial paper program for the issuance and sale of unsecured commercial paper in an aggregate amount not to

exceed \$400.0 million outstanding at any one time. As of June 30, 2015, ITC Holdings had approximately \$50.0 million of commercial paper issued and outstanding under the program, with a weighted-average interest rate of 0.549% and weighted average remaining days

Table of Contents

to maturity of 26 days. The proceeds from the issuance were used for general corporate purposes, including the repayment of borrowings under ITC Holdings' revolving credit agreement. The amount outstanding as of June 30, 2015 was classified as debt maturing within one year in the consolidated statements of financial position.

Revolving Credit Agreements

At June 30, 2015, ITC Holdings and its Regulated Operating Subsidiaries had the following unsecured revolving credit facilities available:

(amounts in millions)	Total Available Capacity	Outstanding Balance (a)	Unused Capacity	Weighted Average Interest Rate on Outstanding Balance	Commitment Fee Rate (b)	
ITC Holdings	\$400.0	\$89.5	\$310.5	(c) 1.4%	(d) 0.175	%
ITC Transmission	100.0	39.8	60.2	1.1%	(e) 0.10	%
METC	100.0	8.1	91.9	1.1%	(e) 0.10	%
ITC Midwest	250.0	22.6	227.4	1.1%	(e) 0.10	%
ITC Great Plains	150.0	62.2	87.8	1.1%	(e) 0.10	%
Total	\$1,000.0	\$222.2	\$777.8			

(a) Included within long-term debt.

(b) Calculation based on the average daily unused commitments, subject to adjustment based on the borrower's credit rating.

ITC Holdings' revolving credit agreement may be used for general corporate purposes, including to repay commercial paper issued pursuant to the commercial paper program described above, if necessary. While

(c) outstanding commercial paper does not reduce available capacity under ITC Holdings' revolving credit agreement, the unused capacity under this agreement adjusted for the commercial paper outstanding was \$260.5 million as of June 30, 2015.

Loan bears interest at a rate equal to LIBOR plus an applicable margin of 1.25% or at a base rate, which is defined (d) as the higher of the prime rate, 0.50% above the federal funds rate or 1.00% above the one month LIBOR, plus an applicable margin of 0.25%, subject to adjustments based on ITC Holdings' credit rating.

Loans bear interest at a rate equal to LIBOR plus an applicable margin of 1.00% or at a base rate, which is defined (e) as the higher of the prime rate, 0.50% above the federal funds rate or 1% above the one month LIBOR, subject to adjustments based on the borrower's credit rating.

Covenants

Our debt instruments contain numerous financial and operating covenants that place significant restrictions on certain transactions, such as incurring additional indebtedness, engaging in sale and lease-back transactions, creating liens or other encumbrances, entering into mergers, consolidations, liquidations or dissolutions, creating or acquiring subsidiaries, selling or otherwise disposing of all or substantially all of our assets and paying dividends. In addition, the covenants require us to meet certain financial ratios, such as maintaining certain debt to capitalization ratios and maintaining certain interest coverage ratios. As of June 30, 2015, we were not in violation of any debt covenant.

Accumulated Other Comprehensive Income

The following table provides the components of changes in AOCI for the three and six months ended June 30, 2015 and 2014:

(in thousands)	Three months ended		Six months ended	
	June 30, 2015	2014	June 30, 2015	2014
Balance at the beginning of period	\$4,195	\$6,483	\$4,816	\$6,327
Derivative instruments				
Reclassification of net loss relating to interest rate cash flow hedges from AOCI to interest expense — net (net of tax of \$86 and \$79 for the three months ended June 30, 2015 and 2014, respectively, and net of tax of \$161 and \$155 for the six months ended June 30, 2015 and 2014, respectively)	125	112	261	218
Reclassification of loss relating to interest rate cash flow hedges from AOCI to loss on extinguishment of debt (net of tax of \$83 for the three and six months ended June 30, 2014)	—	117	—	117
Gain (loss) on interest rate swaps relating to interest rate cash flow hedges (net of tax of \$1,333 and \$655 for the three months ended June 30, 2015 and 2014, respectively, and net of tax of \$719 and \$655 for the six months ended June 30, 2015 and 2014, respectively)	1,861	(917) 998	(917
Derivative instruments, net of tax	1,986	(688) 1,259	(582
Available-for-sale securities				
Unrealized net (loss) gain on available-for-sale securities (net of tax of \$74 and \$43 for the three months ended June 30, 2015 and 2014, respectively, and net of tax of \$2 and \$79 for the six months ended June 30, 2015 and 2014, respectively)	(103) 60	3	110
Available-for-sale securities, net of tax	(103) 60	3	110
Total other comprehensive income (loss), net of tax	1,883	(628) 1,262	(472
Balance at the end of period	\$6,078	\$5,855	\$6,078	\$5,855

Share Repurchase Program

In April 2014, the Board of Directors authorized and ITC Holdings announced a share repurchase program for up to \$250.0 million, which expires in December 2015. Pursuant to such authorization, ITC Holdings completed an accelerated share repurchase from June 2014 to December 2014 in which 3.6 million shares were repurchased and retired for a total of \$130.0 million. No shares were repurchased under the share repurchase program during the six months ended June 30, 2015. Additionally, we had not entered into any agreement for the remaining amount available under the share repurchase program as of June 30, 2015.

7. SHARE-BASED COMPENSATION

Long-Term Incentive Plan Grants

On May 19, 2015, pursuant to the Second Amended and Restated 2006 Long-Term Incentive Plan (“LTIP”), we granted 473,200 options to purchase shares of our common stock with an exercise price of \$35.91 per share, which was the closing price of our common stock on the date of grant. The options vest in three equal annual installments with the first installment vesting on May 19, 2016. In addition, on May 19, 2015, pursuant to the LTIP, we granted 189,299 shares of restricted stock and 287,464 performance shares. One-half of the payout of the performance shares will be based on an external measure for total shareholder return (“TSR”) relative to a predetermined peer group and the remainder will be based on adjusted diluted earnings per share (“EPS”) growth. Payout of the performance shares will range from 0% to 200% of the target number of shares granted, plus additional dividend equivalent shares as described below. The fair value for performance shares with the

Table of Contents

relative TSR condition was determined using a Monte Carlo simulation valuation model, whereas the fair value for performance shares with the EPS growth condition was based on the closing price of our common stock on the grant date.

Holders of outstanding restricted stock and performance shares have all the rights of a holder of common stock of ITC Holdings, including dividend and voting rights. However, performance shares earn and accumulate dividend equivalents, which are settled in the form of additional shares upon vesting of the related award. Dividend equivalents paid on performance shares that do not vest will be forfeited. Restricted stock holders receive cash dividends at each dividend payment date. The restricted stock and performance shares generally vest three years after the grant date. Holders of restricted stock and performance shares may not sell, transfer or pledge their respective shares until vesting occurs.

Stock Option Exercises

We issued 1,068,085 and 1,011,750 shares of our common stock during the six months ended June 30, 2015 and the year ended December 31, 2014, respectively, due to the exercise of stock options.

8. EARNINGS PER SHARE

We report both basic and diluted EPS. Our restricted stock contain rights to receive nonforfeitable dividends and thus, are participating securities requiring the two-class method of computing EPS. A reconciliation of both calculations for the three and six months ended June 30, 2015 and 2014 is presented in the following table:

(in thousands, except share, per share data and percentages)	Three months ended		Six months ended	
	June 30,	June 30,	June 30,	June 30,
	2015	2014	2015	2014
Numerator:				
Net income	\$72,336	\$54,336	\$139,468	\$123,472
Less: dividends declared and paid — common and restricted shares	(25,248)	(22,530)	(50,467)	(44,983)
Undistributed earnings	47,088	31,806	89,001	78,489
Percentage allocated to common shares (a)	99.3 %	99.2 %	99.2 %	99.2 %
Undistributed earnings — common shares	46,758	31,552	88,289	77,861
Add: dividends declared and paid — common shares	25,076	22,347	50,100	44,609
Numerator for basic and diluted earnings per common share	\$71,834	\$53,899	\$138,389	\$122,470
Denominator:				
Basic earnings per common share — weighted average common shares outstanding	154,228,727	156,427,493	154,100,335	156,309,340
Incremental shares for stock options and employee stock purchase plan — weighted average, assumed conversion	1,190,632	1,541,565	1,316,716	1,523,485
Diluted earnings per common share — adjusted weighted average shares and assumed conversion	155,419,359	157,969,058	155,417,051	157,832,825
Per common share net income:				
Basic	\$0.47	\$0.34	\$0.90	\$0.78
Diluted	\$0.46	\$0.34	\$0.89	\$0.78

(a) Weighted average common shares outstanding	154,228,727	156,427,493	154,100,335	156,309,340
Weighted average restricted shares (participating securities)	1,134,649	1,297,578	1,171,852	1,329,136

Edgar Filing: ITC Holdings Corp. - Form 10-Q

Total	155,363,376	157,725,071	155,272,187	157,638,476	
Percentage allocated to common shares	99.3	% 99.2	% 99.2	% 99.2	%

Table of Contents

The incremental shares for stock options and employee stock purchase plan (“ESPP”) shares are included in the diluted EPS calculation using the treasury stock method, unless the effect of including them would be anti-dilutive. The outstanding stock options and ESPP shares and the anti-dilutive stock options and ESPP shares excluded from the diluted EPS calculations were as follows:

	2015	2014
Outstanding stock options and ESPP shares (as of June 30)	3,961,886	4,891,913
Anti-dilutive stock options and ESPP shares (for the three and six months ended June 30)	1,078,158	654,231

In addition, the performance shares discussed in Note 7 are not included in the diluted EPS calculation for the three and six months ended June 30, 2015 because the performance metric had not been met or was not substantively measurable as of June 30, 2015.

9. RETIREMENT BENEFITS AND ASSETS HELD IN TRUST

Pension Plan Benefits

We have a qualified defined benefit pension plan (“retirement plan”) for eligible employees, comprised of a traditional final average pay plan and a cash balance plan. The traditional final average pay plan is noncontributory, covers select employees, and provides retirement benefits based on years of benefit service, average final compensation and age at retirement. The cash balance plan is also noncontributory, covers substantially all employees, and provides retirement benefits based on eligible compensation and interest credits. Our funding practice for the retirement plan is to contribute amounts necessary to meet the minimum funding requirements of the Employee Retirement Income Security Act of 1974, plus additional amounts as we determine appropriate. During the second quarter of 2015, we contributed \$4.1 million to the retirement plan. We do not expect to make any additional contributions to this plan in 2015.

We also have two supplemental nonqualified, noncontributory, defined benefit pension plans for selected management employees (the “supplemental benefit plans” and collectively with the retirement plan, the “pension plans”). The supplemental benefit plans provide for benefits that supplement those provided by the retirement plan. We contributed \$9.4 million to the supplemental benefit plans during the second quarter of 2015. We do not expect to make any additional contributions to these plans in 2015.

Net periodic benefit cost for the pension plans, by component, was as follows for the three and six months ended June 30, 2015 and 2014:

(in thousands)	Three months ended		Six months ended	
	June 30, 2015	2014	June 30, 2015	2014
Service cost	\$1,624	\$1,267	\$3,248	\$2,533
Interest cost	924	901	1,848	1,802
Expected return on plan assets	(959)) (885)) (1,919)) (1,770)
Amortization of prior service credit	(11)) (11)) (21)) (21)
Amortization of unrecognized loss	1,060	386	2,121	772
Net pension cost	\$2,638	\$1,658	\$5,277	\$3,316

Other Postretirement Benefits

We provide certain postretirement health care, dental, and life insurance benefits for eligible employees. During the second quarter of 2015, we contributed \$4.6 million to the postretirement benefit plan. We expect to make estimated additional contributions of \$4.5 million to the postretirement benefit plan during the second half of 2015.

Table of Contents

Net postretirement benefit plan cost, by component, was as follows for the three and six months ended June 30, 2015 and 2014:

(in thousands)	Three months ended		Six months ended	
	June 30, 2015	2014	June 30, 2015	2014
Service cost	\$2,121	\$1,462	\$4,243	\$2,923
Interest cost	619	498	1,238	996
Expected return on plan assets	(463) (341) (926) (681
Amortization of unrecognized loss	125	—	250	—
Net postretirement cost	\$2,402	\$1,619	\$4,805	\$3,238

Defined Contribution Plan

We also sponsor a defined contribution retirement savings plan. Participation in this plan is available to substantially all employees. We match employee contributions up to certain predefined limits based upon eligible compensation and the employee's contribution rate. The cost of this plan was \$0.9 million and \$0.8 million for the three months ended June 30, 2015 and 2014, respectively, and \$2.4 million and \$2.1 million for the six months ended June 30, 2015 and 2014, respectively.

10. FAIR VALUE MEASUREMENTS

The measurement of fair value is based on a three-tier hierarchy, which prioritizes the inputs used in measuring fair value. These tiers include: Level 1, defined as observable inputs such as quoted prices in active markets; Level 2, defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3, defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period. For the six months ended June 30, 2015 and the year ended December 31, 2014, there were no transfers between levels.

Our assets and liabilities measured at fair value subject to the three-tier hierarchy at June 30, 2015, were as follows:

(in thousands)	Fair Value Measurements at Reporting Date Using		
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Financial assets measured on a recurring basis:			
Cash and cash equivalents — cash equivalents	\$49	\$—	\$—

Total	\$32,834	\$(1,934) \$—

17

Table of Contents

As of June 30, 2015 and December 31, 2014, we held certain assets and liabilities that are required to be measured at fair value on a recurring basis. The assets consist of investments recorded within cash and cash equivalents and other long-term assets, including investments held in a trust associated with our supplemental nonqualified, noncontributory, retirement benefit plans for selected management employees. Our cash and cash equivalents consist of money market mutual funds that are administered similar to money market funds recorded at cost plus accrued interest to approximate fair value. Our mutual funds consist primarily of publicly traded mutual funds and are recorded at fair value based on observable trades for identical securities in an active market. Changes in the observed trading prices and liquidity of money market funds are monitored as additional support for determining fair value, and losses are recorded in earnings for investments classified as trading securities and other comprehensive income for investments classified as available for sale if fair value falls below recorded cost.

The asset and liability related to derivatives consist of interest rate swaps as discussed in Note 5. The fair value of our interest rate swap derivatives as of June 30, 2015 is determined based on a discounted cash flow (“DCF”) method using LIBOR swap rates which are observable at commonly quoted intervals.

We also held non-financial assets that are required to be measured at fair value on a non-recurring basis. These consist of goodwill and intangible assets. We did not record any impairment charges on long-lived assets and no other significant events occurred requiring non-financial assets and liabilities to be measured at fair value (subsequent to initial recognition) during the six months ended June 30, 2015. For additional information on our goodwill and intangible assets, please refer to the notes to the consolidated financial statements as of and for the year ended December 31, 2014 included in our Form 10-K for such period and to Note 4 of this Form 10-Q.

Fair Value of Financial Assets and Liabilities

Fixed Rate Debt

Based on the borrowing rates obtained from third party lending institutions currently available for bank loans with similar terms and average maturities from active markets, the fair value of our consolidated long-term debt and debt maturing within one year, excluding revolving and term loan credit agreements and commercial paper, was \$4,035.3 million and \$3,985.6 million at June 30, 2015 and December 31, 2014, respectively. These fair values represent Level 2 under the three-tier hierarchy described above. The total book value of our consolidated long-term debt and debt maturing within one year, excluding revolving and term loan credit agreements and commercial paper, was \$3,855.1 million and \$3,629.8 million at June 30, 2015 and December 31, 2014, respectively.

Revolving and Term Loan Credit Agreements

At June 30, 2015 and December 31, 2014, we had a consolidated total of \$383.2 million and \$473.8 million, respectively, outstanding under our revolving and term loan credit agreements, which are variable rate loans. The fair value of these loans approximates book value based on the borrowing rates currently available for variable rate loans obtained from third party lending institutions. These fair values represent Level 2 under the three-tier hierarchy described above.

Other Financial Instruments

The carrying value of other financial instruments included in current assets and current liabilities, including cash and cash equivalents, special deposits and commercial paper, approximates their fair value due to the short-term nature of these instruments.

11. COMMITMENTS AND CONTINGENT LIABILITIES

Environmental Matters

Our Regulated Operating Subsidiaries’ operations are subject to federal, state, and local environmental laws and regulations, which impose limitations on the discharge of pollutants into the environment, establish standards for the management, treatment, storage, transportation and disposal of hazardous materials and of solid and hazardous wastes, and impose obligations to investigate and remediate contamination in certain circumstances. Liabilities to investigate or remediate contamination, as well as other liabilities concerning hazardous materials or contamination, such as claims for personal injury or property damage, may arise at many locations, including formerly owned or operated properties and sites where wastes have been treated or disposed of, as well as at properties currently owned or operated by our Regulated Operating Subsidiaries. Such liabilities may arise even where the contamination does not result from noncompliance with applicable environmental laws. Under a

Table of Contents

number of environmental laws, such liabilities may also be joint and several, meaning that a party can be held responsible for more than its share of the liability involved, or even the entire share. Although environmental requirements generally have become more stringent and compliance with those requirements more expensive, we are not aware of any specific developments that would increase our Regulated Operating Subsidiaries' costs for such compliance in a manner that would be expected to have a material adverse effect on our results of operations, financial position or liquidity.

Our Regulated Operating Subsidiaries' assets and operations also involve the use of materials classified as hazardous, toxic or otherwise dangerous. Many of the properties our Regulated Operating Subsidiaries own or operate have been used for many years, and include older facilities and equipment that may be more likely than newer ones to contain or be made from such materials. Some of these properties include aboveground or underground storage tanks and associated piping. Some of them also include large electrical equipment filled with mineral oil, which may contain or previously have contained polychlorinated biphenyls, or PCBs. Our Regulated Operating Subsidiaries' facilities and equipment are often situated close to or on property owned by others so that, if they are the source of contamination, others' property may be affected. For example, aboveground and underground transmission lines sometimes traverse properties that our Regulated Operating Subsidiaries do not own, and, at some of our Regulated Operating Subsidiaries' transmission stations, transmission assets (owned or operated by our Regulated Operating Subsidiaries) and distribution assets (owned or operated by our Regulated Operating Subsidiaries' transmission customer) are commingled.

Some properties in which our Regulated Operating Subsidiaries have an ownership interest or at which they operate are, and others are suspected of being, affected by environmental contamination. Our Regulated Operating Subsidiaries are not aware of any pending or threatened claims against them with respect to environmental contamination, or of any investigation or remediation of contamination at any properties, that entail costs likely to materially affect them. Some facilities and properties are located near environmentally sensitive areas such as wetlands.

Claims have been made or threatened against electric utilities for bodily injury, disease or other damages allegedly related to exposure to electromagnetic fields associated with electric transmission and distribution lines. While our Regulated Operating Subsidiaries do not believe that a causal link between electromagnetic field exposure and injury has been generally established and accepted in the scientific community, if such a relationship is established or accepted, the liabilities and costs imposed on our business could be significant. We are not aware of any pending or threatened claims against our Regulated Operating Subsidiaries for bodily injury, disease or other damages allegedly related to exposure to electromagnetic fields and electric transmission and distribution lines that entail costs likely to have a material adverse effect on our results of operations, financial position or liquidity.

Litigation

We are involved in certain legal proceedings before various courts, governmental agencies and mediation panels concerning matters arising in the ordinary course of business. These proceedings include certain contract disputes, regulatory matters and pending judicial matters. We cannot predict the final disposition of such proceedings. We regularly review legal matters and record provisions for claims that are considered probable of loss.

Michigan Sales and Use Tax Audit

The Michigan Department of Treasury has conducted sales and use tax audits of ITCTransmission for the audit periods April 1, 2005 through June 30, 2008 and October 1, 2009 through September 30, 2013. The Michigan Department of Treasury has denied ITCTransmission's claims of the industrial processing exemption from use tax that it has taken beginning January 1, 2007. The exemption claim denials resulted in use tax assessments against ITCTransmission. ITCTransmission filed administrative appeals to contest these use tax assessments.

In a separate, but related case involving a Michigan-based public utility that made similar industrial processing exemption claims, the Michigan Supreme Court ruled in July 2015 that the electric system, which involves altering voltage, constitutes an exempt, industrial processing activity. However, the ruling further held the electric system is also used for other functions that would not be exempt, and remanded the case to the Michigan Court of Claims to determine how the exemption applies to assets that are used in electric distribution activities. ITCTransmission is assessing the recent ruling in light of its specific facts, but cannot estimate the amount or timing of any potential tax

assessments or refunds. ITC Transmission believes that the industrial processing exemption will apply to a significant portion and potentially all of the equipment purchases for which it claimed exemption, but it is reasonably possible that portions of the use tax assessments could be sustained upon resolution of this matter.

Table of Contents

The amount of use tax liability associated with the exemptions taken by ITCTransmission through June 30, 2015 is estimated to be approximately \$16.7 million including interest. This amount includes approximately \$10.2 million, including interest, assessed for the audit periods noted above. ITCTransmission has not recorded this contingent liability as of June 30, 2015. METC has also taken the industrial processing exemption, estimated to be approximately \$10.1 million for periods still subject to audit and METC has also not recorded any contingent liabilities as of June 30, 2015 associated with this matter. In the event it becomes appropriate to record additional use tax liability relating to this matter, ITCTransmission and METC would record the additional use tax primarily as an increase to the cost of property, plant and equipment, which is a component of revenue requirement, as the majority of purchases for which the exemption was taken relate to equipment purchases associated with capital projects.

Rate of Return on Equity and Capital Structure Complaints

On November 12, 2013, the Association of Businesses Advocating Tariff Equity, Coalition of MISO Transmission Customers, Illinois Industrial Energy Consumers, Indiana Industrial Energy Consumers, Inc., Minnesota Large Industrial Group, and Wisconsin Industrial Energy Group (collectively, the “complainants”) filed a complaint with the FERC under Section 206 of the FPA (the “Complaint”), requesting that the FERC find the current 12.38% MISO regional base ROE rate (the “base ROE”) for all MISO TOs, including ITCTransmission, METC and ITC Midwest, to no longer be just and reasonable. The complainants sought a FERC order reducing the base ROE used in our MISO Regulated Operating Subsidiaries’ formula transmission rates to 9.15%. The Complaint also alleged that the rates of any MISO TO using a capital structure with greater than 50% for the equity component are likewise not just and reasonable (our MISO Regulated Operating Subsidiaries use their actual capital structures, which target 60% equity, as FERC had previously authorized). The Complaint also alleged the ROE adders currently approved for certain ITC Holdings operating companies, including an adder currently charged by ITCTransmission for being a member of an RTO and adders charged by ITCTransmission and METC for being independent transmission owners, are no longer just and reasonable, and sought to have them eliminated.

On June 19, 2014, in a separate Section 206 complaint against the regional base ROE rate for ISO New England TOs, FERC adopted a new methodology for establishing base ROE rates for electric transmission utilities. The new methodology is based on a two-step discounted cash flow analysis (“two-step DCF”) that uses both short-term and long-term growth projections in calculating ROE rates for a proxy group of electric utilities. The previous methodology used only short-term growth projections. FERC also reiterated that it can apply discretion in determining how ROE rates are established within a zone of reasonableness and reiterated its policy for limiting the overall ROE rate for any company, including the base and all applicable adders, at the high end of the zone of reasonableness set by the two-step DCF methodology. The new method presented in the ISO New England ROE case will be used in resolving the MISO ROE case.

On October 16, 2014, FERC granted the complainants’ request in part by setting the base ROE for hearing and settlement procedures, while denying all other aspects of the Complaint. FERC found that the complainants failed to show that the use of actual or FERC-approved capital structures that include more than 50% equity are unjust and unreasonable. FERC also denied the request to terminate ITCTransmission’s and METC’s ROE incentives. The order reiterates that any TO’s total ROE rate is limited by the top end of a zone of reasonableness and the TO’s ability to implement the full amount of previously granted ROE adders may be affected by the outcome of the hearing. FERC set the refund effective date as November 12, 2013.

During the fourth quarter of 2014, the MISO TOs engaged in the ordered FERC settlement procedures with the complainants but were not able to reach resolution. On January 5, 2015, the Chief Judge issued an order which terminated settlement procedures and set the matter for hearing. The order established a schedule for the proceeding that provides for a hearing within 32 weeks of the order and an initial decision within 47 weeks of the order. On April 6, 2015, the MISO TOs filed expert witness testimony in the Complaint proceeding supporting the existing base ROE as just and reasonable. However, in the event that FERC elects to change the base ROE, the testimony included a recommendation of 11.39% base ROE for the period of November 12, 2013 through February 12, 2015 (the “Initial Refund Period”). In resolving the Complaint, we expect FERC to establish a new base ROE to determine any potential refund liability for the Initial Refund Period. The new base ROE as well as any ROE adders, subject to the limitations of the top end of any zone of reasonableness that is established, are expected to be used to calculate the refund liability

for the Initial Refund Period.

On February 12, 2015, an additional complaint was filed with the FERC under Section 206 of the FPA (the “Second Complaint”) by Arkansas Electric Cooperative Corporation, Mississippi Delta Energy Agency, Clarksdale Public Utilities Commission, Public Service Commission of Yazoo City and Hoosier Energy Rural Electric Cooperative, Inc., seeking a FERC order to reduce the base ROE used in our MISO Regulated Operating Subsidiaries’ formula transmission rates to 8.67% with an effective date of February 12, 2015. On March 11, 2015, the MISO TOs filed an answer to the Second Complaint with the

Table of Contents

FERC supporting the current base ROE as just and reasonable. On June 18, 2015, FERC accepted the Second Complaint and set it for hearing and settlement procedures. FERC also set the refund effective date for the Second Complaint as February 12, 2015.

We believe it is probable that refunds will be required for these matters and as of June 30, 2015, the estimated range of refunds on a pre-tax basis is expected to be from \$69.6 million to \$123.2 million for the period from November 12, 2013 through June 30, 2015. As of June 30, 2015 and December 31, 2014, our MISO Regulated Operating Subsidiaries had recorded an aggregate estimated regulatory liability of \$69.6 million and \$47.8 million, respectively, representing the low end of the range of potential refunds as of those dates, as there is no best estimate within the range of refunds. The recognition of this estimated liability resulted in a reduction in revenues of \$13.3 million, \$20.8 million and \$46.9 million and an increase in interest expense of \$0.5 million, \$0.9 million and \$0.9 million for the three and six months ended June 30, 2015 and the year ended December 31, 2014, respectively. This resulted in an estimated after-tax reduction to net income of \$8.5 million, \$13.3 million and \$28.9 million for the three and six months ended June 30, 2015 and year ended December 31, 2014, respectively. No amounts related to these complaints were recorded as of or for the three and six months ended June 30, 2014.

Based on the estimated range of refunds identified above, we believe that it is reasonably possible that this matter could result in an additional estimated pre-tax refund of up to \$53.6 million (or a \$32.5 million estimated after-tax reduction of net income) in excess of the amount recorded as of June 30, 2015. It is also possible the outcome of this matter could differ from the estimated range of losses and materially affect our results of operations due to the uncertainty of the calculation of an authorized base ROE along with the zone of reasonableness under the newly adopted two-step DCF methodology, which is subject to significant discretion by the FERC. As of June 30, 2015, our MISO Regulated Operating Subsidiaries had a total of approximately \$2.8 billion of equity in their collective capital structures for ratemaking purposes. Based on this level of aggregate equity, we estimate that each 10 basis point reduction in the authorized ROE would reduce annual consolidated net income by approximately \$2.8 million. In a separate but related matter, in November 2014, METC, ITC Midwest and other MISO TOs filed a request with FERC under FPA Section 205 for authority to include a 50 basis point incentive adder for RTO participation in each of the TOs' formula rates. On January 5, 2015, FERC approved the use of this incentive adder, effective January 6, 2015. Additionally, ITC Midwest filed a request with FERC under FPA Section 205 in January 2015 for authority to include a 100 basis point incentive adder for independent transmission ownership, which is currently authorized for ITC Transmission and METC. On March 31, 2015, FERC approved the use of a 50 basis point incentive adder for independence, effective April 1, 2015. On April 30, 2015, ITC Midwest filed a request with FERC for clarification and rehearing on the approved incentive adder for independence. The RTO participation incentive adder will be applied to METC's and ITC Midwest's base ROEs and the independence incentive adder will be applied to ITC Midwest's base ROE in establishing their total authorized ROE rates, subject to the limitations of the top end of any zone of reasonableness that is established. Collection of these recently approved incentive adders is being deferred pending the outcome of the complaints relating to the base ROE.

12. SEGMENT INFORMATION

We identify reportable segments based on the criteria set forth by the FASB regarding disclosures about segments of an enterprise, including the regulatory environment of our subsidiaries and the business activities performed to earn revenues and incur expenses. The following tables show our financial information by reportable segment:

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

SAFE HARBOR STATEMENT UNDER THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

Our reports, filings and other public announcements contain certain statements that describe our management's beliefs concerning future business conditions, plans and prospects, growth opportunities and the outlook for our business and the electric transmission industry based upon information currently available. Such statements are "forward-looking" statements within the meaning of the Private Securities Litigation Reform Act of 1995. Wherever possible, we have identified these forward-looking statements by words such as "will," "may," "anticipates," "believes," "intends," "estimates," "expects," "projects," "likely" and similar phrases. These forward-looking statements are based upon assumptions our management believes are reasonable. Such forward-looking statements are subject to risks and uncertainties which could cause our actual results, performance and achievements to differ materially from those expressed in, or implied by, these statements, including, among others, the risks and uncertainties listed in Item 1A Risk Factors of our Form 10-K for the fiscal year ended December 31, 2014, and the following:

Certain elements of our Regulated Operating Subsidiaries' formula rates can be and have been challenged, which could result in lowered rates and/or refunds of amounts previously collected and thus have an adverse effect on our business, financial condition, results of operations and cash flows.

Our actual capital investment may be lower than planned, which would cause a lower than expected rate base and therefore our revenues and earnings compared to our current expectations. In addition, we expect to invest in strategic development opportunities to improve the efficiency and reliability of the transmission grid, but we cannot assure you that we will be able to initiate or complete any of these investments. In addition, we expect to incur expenses related to the pursuit of development opportunities which may be higher than forecasted.

The regulations to which we are subject may limit our ability to raise capital and/or pursue acquisitions, development opportunities or other transactions or may subject us to liabilities.

Changes in energy laws, regulations or policies could impact our business, financial condition, results of operations and cash flows.

If amounts billed for transmission service for our Regulated Operating Subsidiaries' transmission systems are lower than expected, or our actual revenue requirements are higher than expected, the timing of collection of our revenues would be delayed.

Each of our MISO Regulated Operating Subsidiaries depends on its primary customer for a substantial portion of its revenues, and any material failure by those primary customers to make payments for transmission services could have a material adverse effect on our business, financial condition, results of operations and cash flows.

A significant amount of the land on which our assets are located is subject to easements, mineral rights and other similar encumbrances. As a result, we must comply with the provisions of various easements, mineral rights and other similar encumbrances, which may adversely impact their ability to complete construction projects in a timely manner. We contract with third parties to provide services for certain aspects of our business. If any of these agreements are terminated, we may face a shortage of labor or replacement contractors to provide the services formerly provided by these third parties.

Hazards associated with high-voltage electricity transmission may result in suspension of our operations or the imposition of civil or criminal penalties.

We are subject to environmental regulations and to laws that can give rise to substantial liabilities from environmental contamination.

We are subject to various regulatory requirements, including reliability standards; contract filing requirements; reporting, recordkeeping and accounting requirements; and transaction approval requirements. Violations of these requirements, whether intentional or unintentional, may result in penalties that, under some circumstances, could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Acts of war, terrorist attacks, cyber attacks, natural disasters, severe weather and other catastrophic events may have a material adverse effect on our business, financial condition, results of operations and cash flows.

Table of Contents

• ITC Holdings is a holding company with no operations, and unless we receive dividends or other payments from our subsidiaries, we may be unable to pay dividends and fulfill our other cash obligations.

• We have a considerable amount of debt and our reliance on debt financing may limit our ability to fulfill our debt obligations and/or to obtain additional financing.

• Certain provisions in our debt instruments limit our financial and operating flexibility.

• Adverse changes in our credit ratings may negatively affect us.

• Provisions in our Articles of Incorporation and bylaws, Michigan corporate law and our debt agreements may impede efforts by our shareholders to change the direction or management of our company.

• Provisions in our Articles of Incorporation restrict market participants from voting or owning 5% or more of the outstanding shares of our capital stock.

Because our forward-looking statements are based on estimates and assumptions that are subject to significant business, economic and competitive uncertainties, many of which are beyond our control or are subject to change, actual results could be materially different and any or all of our forward-looking statements may turn out to be wrong. Forward-looking statements speak only as of the date made and can be affected by assumptions we might make or by known or unknown risks and uncertainties. Many factors mentioned in our discussion in this report will be important in determining future results. Consequently, we cannot assure you that our expectations or forecasts expressed in such forward-looking statements will be achieved. Except as required by law, we undertake no obligation to publicly update any of our forward-looking or other statements, whether as a result of new information, future events, or otherwise.

OVERVIEW

Through our Regulated Operating Subsidiaries, we operate high-voltage systems in Michigan's Lower Peninsula and portions of Iowa, Minnesota, Illinois, Missouri, Kansas and Oklahoma that transmit electricity from generating stations to local distribution facilities connected to our systems. Our business strategy is to operate, maintain and invest in transmission infrastructure in order to enhance system integrity and reliability, to reduce transmission constraints and to upgrade the transmission networks to support new generating resources interconnecting to our transmission systems. We also are pursuing development projects not within our existing systems, which are likewise intended to improve overall grid reliability, reduce transmission constraints and facilitate interconnections of new generating resources, as well as enhance competitive wholesale electricity markets.

As electric transmission utilities with rates regulated by the FERC, our Regulated Operating Subsidiaries earn revenues through tariff rates charged for the use of their electric transmission systems by our customers, which include investor-owned utilities, municipalities, cooperatives, power marketers and alternative energy suppliers. As independent transmission companies, our Regulated Operating Subsidiaries are subject to rate regulation only by the FERC. The rates charged by our Regulated Operating Subsidiaries are established using cost-based formula rate templates as discussed in Note 3 to the condensed consolidated financial statements under "— Cost-Based Formula Rates with True-Up Mechanism."

Our Regulated Operating Subsidiaries' primary operating responsibilities include maintaining, improving and expanding their transmission systems to meet their customers' ongoing needs, scheduling outages on system elements to allow for maintenance and construction, maintaining appropriate system voltages and monitoring flows over transmission lines and other facilities to ensure physical limits are not exceeded.

We derive nearly all of our revenues from providing electric transmission service over our Regulated Operating Subsidiaries' transmission systems to investor-owned utilities, such as DTE Electric, Consumers Energy and IP&L, and to other entities such as alternative electricity suppliers, power marketers and other wholesale customers that provide electricity to end-use consumers and from transaction-based capacity reservations on our transmission systems.

Significant recent matters that influenced our financial position and results of operations and cash flows for the six months ended June 30, 2015 or may affect future results include:

Our capital investment of \$326.9 million at our Regulated Operating Subsidiaries for the six months ended June 30, 2015, resulting primarily from our focus on improving system reliability, increasing system capacity and upgrading the transmission network to support new generating resources;

Table of Contents

Debt issuance as described in Note 5 to the condensed consolidated financial statements and borrowings under our revolving and term loan credit agreements in 2015 and 2014 to fund capital investment at our Regulated Operating Subsidiaries and for general corporate purposes, resulting in higher interest expense;

Establishment of a commercial paper program as described in Note 5 to the condensed consolidated financial statements, which provides an additional source of liquidity for our working capital needs;

Debt maturing within one year of \$225.0 million as of June 30, 2015 and the potentially higher interest rates associated with the additional financing required to repay this debt; and

Recognition of an estimated contingent liability for the potential refunds relating to the rate of return on equity (“ROE”) and capital structure complaints as described in Note 11 to the condensed consolidated financial statements, which resulted in a total estimated pre-tax reduction of revenue and interest of \$13.8 million and \$21.7 million and an estimated after-tax reduction to net income of \$8.5 million and \$13.3 million for the three and six months ended June 30, 2015, respectively.

These items are discussed in more detail throughout Management’s Discussion and Analysis of Financial Condition and Results of Operations.

Capital Project Updates and Other Recent Developments

ITC Great Plains Regulatory Assets

As of June 30, 2015, we have recorded a total of \$13.7 million of regulatory assets for start-up, development and pre-construction expenses, including associated interest carrying charges, incurred by ITC Great Plains, which include certain costs incurred for the Kansas Electric Transmission Authority (“KETA”) and the Kansas V-Plan Projects prior to construction. Based on ITC Great Plains’ FERC application under which authority to recognize these regulatory assets was sought and the related FERC order granting such authority, ITC Great Plains made a filing with the FERC under Section 205 of the FPA in May 2013 to recover these start-up, development and pre-construction expenses, including associated debt and equity carrying charges, in future rates as discussed in Note 3 of the condensed consolidated financial statements. On March 26, 2015, FERC accepted ITC Great Plains’ request to commence amortization of the authorized regulatory assets, subject to refund, as well as set the matter for hearing and settlement judge procedures. As a result, ITC Great Plains has included the unamortized balance of the regulatory assets in its rate base and commenced amortization over a 10-year period during the second quarter of 2015. The amortization expense will be recovered through ITC Great Plains’ cost-based formula rate template, subject to refund. We do not expect the settlement of this proceeding to have a material impact on our results of operations, cash flows or financial condition.

Development Bonuses

We recognized general and administrative expenses of \$0.3 million and \$9.8 million during the three and six months ended June 30, 2015, respectively, and \$0.7 million and \$2.2 million during the three and six months ended June 30, 2014, respectively, for bonuses for certain development projects, including the successful completion of certain milestones relating to projects at ITC Great Plains. Specifically, the Kansas V-Plan Project was placed in-service in December 2014 and the resulting development bonus was approved and paid during the three months ended March 31, 2015. It is reasonably possible that future development-related bonuses may be authorized and awarded for these or other development projects.

Multi-Value Projects

2011 MISO Multi-Value Projects

In December 2011, MISO approved a portfolio of Multi-Value Projects (“MVPs”) which includes portions of four MVPs that we will construct, own and operate. The four MVPs are located in south central Minnesota, northern and southeast Iowa, southwest Wisconsin, and northeast Missouri and are in various stages of construction and included in ITC Midwest’s capital investment amounts. We currently estimate ITC Midwest will invest approximately \$800 million in the four MVPs from 2014 through 2018.

Thumb Loop Project

The Thumb Loop Project, an additional MVP, is located in ITC Transmission’s region and consists of a 140-mile, double-circuit 345 kV transmission line and related substations that will serve as the backbone of the transmission system needed to

Table of Contents

accommodate future wind development projects in the Michigan counties of Tuscola, Huron, Sanilac and St. Clair. Construction activities commenced for the Thumb Loop Project in 2012. Phase 1 and Phase 2 of the Thumb Loop Project, which consisted of 62 miles and 20 miles of transmission line, respectively, were placed in-service in September 2013 and May 2014, respectively. The third and final phase, which consisted of 56 miles of transmission line, was placed in-service on May 13, 2015. Through June 30, 2015, ITC Transmission has invested \$495.9 million in the Thumb Loop Project and any further investment to complete this project is not expected to be material.

Rate of Return on Equity and Capital Structure Complaints

In November 2013, certain parties filed a joint complaint with the FERC under Section 206 of the FPA (the "Complaint"), requesting that the FERC find the current 12.38% MISO regional base ROE rate (the "base ROE") for all MISO TOs, including ITC Transmission, METC and ITC Midwest to no longer be just and reasonable. The complainants sought a FERC order reducing the base ROE used in our MISO Regulated Operating Subsidiaries' formula transmission rates to 9.15%, reducing the equity component of our capital structure from the FERC approved 60% to 50% and terminating the ROE adders currently approved for certain ITC Holdings operating companies, including adders currently utilized by ITC Transmission and METC.

We believe that the current ROE encourages transmission investment and offsets the burdens associated with maintaining the independent transmission business model and RTO membership. ITC Transmission, METC and ITC Midwest filed responses during the first quarter of 2014, separately and together with other MISO TOs, that seek dismissal of the Complaint for its failure to satisfy the requirements of FPA Section 206 and the FERC's accompanying Rules, or denial of the Complaint on the merits, with prejudice.

On October 16, 2014, FERC granted the complainants' request in part by setting the base ROE for hearing and settlement procedures, while denying all other aspects of the Complaint. FERC found that the complainants failed to show that the use of actual or FERC-approved capital structures that include more than 50% equity are unjust and unreasonable. FERC also denied the request to terminate ITC Transmission's and METC's ROE incentives. The order reiterates that any TO's total ROE rate is limited by the top end of a zone of reasonableness and the TO's ability to implement the full amount of previously granted ROE adders may be affected by the outcome of the hearing. FERC set the refund effective date as November 12, 2013.

During the fourth quarter of 2014, the MISO TOs engaged in the ordered FERC settlement procedures with the complainants but were not able to reach resolution. On January 5, 2015, the Chief Judge issued an order which terminated settlement procedures and set the matter for hearing. The order established a schedule for the proceeding that provides for a hearing within 32 weeks of the order and an initial decision within 47 weeks of the order. On April 6, 2015, the MISO TOs filed expert witness testimony in the Complaint proceeding supporting the existing base ROE as just and reasonable. However, in the event that FERC elects to change the base ROE, the testimony included a recommendation of 11.39% base ROE for the period of November 12, 2013 through February 12, 2015 (the "Initial Refund Period"). In resolving the Complaint, we expect FERC to establish a new base ROE to determine any potential refund liability for the Initial Refund Period. The new base ROE as well as any ROE adders, subject to the limitations of the top end of any zone of reasonableness that is established, are expected to be used to calculate the refund liability for the Initial Refund Period.

On February 12, 2015, an additional complaint was filed with the FERC under Section 206 of the FPA (the "Second Complaint") by separate complainants, seeking a FERC order to reduce the base ROE used in our MISO Regulated Operating Subsidiaries' formula transmission rates to 8.67% with an effective date of February 12, 2015. On March 11, 2015, the MISO TOs filed an answer to the Second Complaint with the FERC supporting the current base ROE as just and reasonable. On June 18, 2015, FERC accepted the Second Complaint and set it for hearing and settlement procedures. FERC also set the refund effective date for the Second Complaint as February 12, 2015.

We believe it is probable that refunds will be required for these matters and as of June 30, 2015, the estimated range of refunds on a pre-tax basis is expected to be from \$69.6 million to \$123.2 million for the period from November 12, 2013 through June 30, 2015. As of June 30, 2015 and December 31, 2014, our MISO Regulated Operating Subsidiaries had recorded an aggregate estimated regulatory liability of \$69.6 million and \$47.8 million, respectively, representing the low end of the range of potential refunds as of those dates, as there is no best estimate within the range of refunds. The recognition of this estimated liability resulted in a reduction in revenues of \$13.3 million, \$20.8

million and \$46.9 million and an increase in interest expense of \$0.5 million, \$0.9 million and \$0.9 million for the three and six months ended June 30, 2015 and the year ended December 31, 2014, respectively. This resulted in an estimated after-tax reduction to net income of \$8.5 million, \$13.3 million and \$28.9 million for the three and six months ended June 30, 2015 and year ended December 31, 2014, respectively. No amounts related to these complaints were recorded as of or for the six months ended June 30, 2014.

Table of Contents

Based on the estimated range of refunds identified above, we believe that it is reasonably possible that this matter could result in an additional estimated pre-tax refund of up to \$53.6 million (or a \$32.5 million estimated after-tax reduction of net income) in excess of the amount recorded as of June 30, 2015. It is also possible the outcome of this matter could differ from the estimated range of losses and materially affect our results of operations due to the uncertainty of the calculation of an authorized base ROE along with the zone of reasonableness under the newly adopted two-step DCF methodology, which is subject to significant discretion by the FERC. As of June 30, 2015, our MISO Regulated Operating Subsidiaries had a total of approximately \$2.8 billion of equity in their collective capital structures for ratemaking purposes. Based on this level of aggregate equity, we estimate that each 10 basis point reduction in the authorized ROE would reduce annual consolidated net income by approximately \$2.8 million. In a separate but related matter, in November 2014, METC, ITC Midwest and other MISO TOs filed a request with FERC under FPA Section 205 for authority to include a 50 basis point incentive adder for RTO participation in each of the TOs' formula rates. On January 5, 2015, FERC approved the use of this incentive adder, effective January 6, 2015. Additionally, ITC Midwest filed a request with FERC under FPA Section 205 in January 2015 for authority to include a 100 basis point incentive adder for independent transmission ownership, which is currently authorized for ITC Transmission and METC. On March 31, 2015, FERC approved the use of a 50 basis point incentive adder for independence, effective April 1, 2015. On April 30, 2015, ITC Midwest filed a request with FERC for clarification and rehearing on the approved incentive adder for independence. The RTO participation incentive adder will be applied to METC's and ITC Midwest's base ROEs and the independence incentive adder will be applied to ITC Midwest's base ROE in establishing their total authorized ROE rates, subject to the limitations of the top end of any zone of reasonableness that is established. Collection of these recently approved incentive adders is being deferred pending the outcome of the complaints relating to the base ROE.

Cost-Based Formula Rates with True-Up Mechanism

Our Regulated Operating Subsidiaries calculate their revenue requirements using cost-based formula rate templates and are effective without the need to file rate cases with the FERC, although the rates are subject to legal challenge at the FERC. Under these formula rate templates, our Regulated Operating Subsidiaries recover expenses and earn a return on and recover investments in property, plant and equipment on a current rather than a lagging basis. The formula rate templates utilize forecasted expenses, property, plant and equipment, point-to-point revenues, network load at our MISO Regulated Operating Subsidiaries and other items for the upcoming calendar year to establish projected revenue requirements for each of our Regulated Operating Subsidiaries that are used as the basis for billing for service on their systems from January 1 to December 31 of that year. Our cost-based formula rate templates include a true-up mechanism, whereby our Regulated Operating Subsidiaries compare their actual revenue requirements to their billed revenues for each year to determine any over- or under-collection of revenue. The over- or under-collection typically results from differences between the projected revenue requirement used as the basis for billing and actual revenue requirement at each of our Regulated Operating Subsidiaries, or from differences between actual and projected monthly peak loads at our MISO Regulated Operating Subsidiaries. In the event billed revenues in a given year are more or less than actual revenue requirements, which are calculated primarily using information from that year's FERC Form No. 1, our Regulated Operating Subsidiaries will refund or collect additional revenues, with interest, within a two-year period such that customers pay only the amounts that correspond to actual revenue requirements for that given period. This annual true-up ensures that our Regulated Operating Subsidiaries recover their allowed costs and earn their allowed returns.

Revenue Accruals and Deferrals — Effects of Monthly Peak Loads

For our MISO Regulated Operating Subsidiaries, monthly peak loads are used for billing network revenues, which currently is the largest component of our operating revenues. One of the primary factors that impacts the revenue accruals and deferrals at our MISO Regulated Operating Subsidiaries is actual monthly peak loads experienced as compared to those forecasted in establishing the annual network transmission rate. Under their cost-based formula rates that contain a true-up mechanism, our Regulated Operating Subsidiaries accrue or defer revenues to the extent that their actual revenue requirement for the reporting period is higher or lower, respectively, than the amounts billed relating to that reporting period. Although monthly peak loads do not impact operating revenues recognized, network load affects the timing of our cash flows from transmission service. The monthly peak load of our MISO Regulated

Operating Subsidiaries is affected by many variables, but is generally impacted by weather and economic conditions and is seasonally shaped with higher load in the summer months when cooling demand is higher.

ITC Great Plains does not receive revenue based on a peak load or a dollar amount per kW each month and therefore peak load does not have a seasonal effect on operating cash flows. The SPP tariff applicable to ITC Great Plains is billed ratably each month based on its annual projected revenue requirement posted annually by SPP.

Table of Contents

Capital Investment and Operating Results Trends

We expect a general trend of increases in revenues and earnings for our Regulated Operating Subsidiaries over the long term, excluding any impact resulting from the outcome of the complaints relating to base ROE as described in Note 11 to the condensed consolidated financial statements. The primary factor that is expected to continue to increase our actual revenue requirements in future years is increased rate base that would result from our anticipated capital investment, in excess of depreciation, from our Regulated Operating Subsidiaries' long-term capital investment programs to improve reliability, increase system capacity and upgrade the transmission network to support new generating resources. In addition, our capital investment efforts relating to development initiatives are based on establishing an ongoing pipeline of projects that would position us for long-term growth. Investments in property, plant and equipment, when placed in service upon completion of a capital project, are added to the rate base of our Regulated Operating Subsidiaries.

Our Regulated Operating Subsidiaries strive for high reliability of their systems and to improve system accessibility for all generation resources. The FERC requires compliance with certain reliability standards and may take enforcement actions against violators, including fines of up to \$1.0 million per day. NERC is responsible for developing and enforcing these mandatory reliability standards. We continually assess our transmission systems against standards established by NERC, as well as the standards of applicable regional entities under NERC that have been delegated certain authority for the purpose of proposing and enforcing reliability standards. We believe we meet the applicable standards in all material respects, although further investment in our transmission systems and an increase in maintenance activities will likely be needed to maintain compliance, improve reliability and address any new standards that may be promulgated.

We also assess our transmission systems against our own planning criteria that are filed annually with the FERC. Based on our planning studies, we see needs to make capital investments to (1) rebuild existing property, plant and equipment; (2) upgrade the system to address demographic changes that have impacted transmission load and the changing role that transmission plays in meeting the needs of the wholesale market, including accommodating the siting of new generation or to increase import capacity to meet changes in peak electrical demand; (3) relieve congestion in the transmission systems; and (4) achieve state and federal policy goals, such as renewable generation portfolio standards. The following table shows our expected and actual capital investment for each of the Regulated Operating Subsidiaries and our development initiatives:

(in millions)	Long-term Capital Investment Program	Actual Capital Investment for the six months ended June 30, 2015 (a)	Forecasted Capital Investment for the year ending December 31, 2015
Source of Investment	2014-2018	June 30, 2015 (a)	December 31, 2015
ITC Transmission	\$647	\$82.8	\$170 — 200
METC	546	51.2	150 — 170
ITC Midwest (b)	1,991	182.9	380 — 405
ITC Great Plains	194	10.0	10 — 25
Development and other (c)	1,122	4.1	0 — 10
Total	\$4,500	\$331.0	\$710 — 810

Capital investment amounts differ from cash expenditures for property, plant and equipment included in our condensed consolidated statements of cash flows due in part to differences in construction costs incurred compared (a) to cash paid during that period, as well as payments for major equipment inventory that are included in cash expenditures but not included in capital investment until transferred to construction work in progress, among other factors.

(b) ITC Midwest's investment program includes the 2011 MISO MVPs as discussed above under "Capital Project Updates and Other Recent Developments."

(c) Development and other includes initiatives to upgrade the existing transmission grid and regional transmission facilities, primarily to improve overall grid reliability, reduce transmission constraints, enhance competitive markets and facilitate interconnections of new generating resources, including wind generation and other renewable

resources necessary to achieve state and federal policy goals. Additionally, we may pursue other non-traditional transmission investment opportunities not described above.

Investments in property, plant and equipment could vary due to, among other things, the impact of actual loads, forecasted loads, regional economic conditions, weather conditions, union strikes, labor shortages, material and equipment prices and availability, our ability to obtain any necessary financing for such expenditures, limitations on the amount of construction that can be undertaken on our systems at any one time, regulatory approvals for reasons relating to rate construct, environmental, siting, regional planning, cost recovery or other issues or as a result of legal proceedings, variances between estimated and

Table of Contents

actual costs of construction contracts awarded and the potential for greater competition. In addition, investments in transmission network upgrades for generator interconnection projects could change from prior estimates significantly due to changes in the MISO queue for generation projects and other factors beyond our control.

RESULTS OF OPERATIONS**Results of Operations and Variances**

Operating Revenues

Three months ended June 30, 2015 compared to three months ended June 30, 2014

The following table sets forth the components of and changes in operating revenues:

Percentage

Edgar Filing: ITC Holdings Corp. - Form 10-Q

(in thousands)	2015		2014		Increase (decrease)	increase (decrease)
	Amount	Percentage	Amount	Percentage		
Network revenues	\$193,279	70.3 %	\$186,300	70.8 %	\$6,979	3.7 %
Regional cost sharing revenues	80,783	29.4 %	63,934	24.3 %	16,849	26.4 %
Point-to-point	3,836	1.4 %	3,952	1.5 %	(116)	(2.9)%
Scheduling, control and dispatch	3,148	1.1 %	3,231	1.2 %	(83)	(2.6)%
Other	7,305	2.7 %	5,797	2.2 %	1,508	26.0 %
Recognition of contingent liability for return on equity complaints	(13,293)	(4.9)%	—	—	(13,293)	n/a
Total	\$275,058	100.0 %	\$263,214	100.0 %	\$11,844	4.5 %

Network revenues increased due primarily to higher net revenue requirements at our Regulated Operating Subsidiaries during the three months ended June 30, 2015 as compared to the same period in 2014. Higher net revenue requirements were due primarily to higher rate bases associated with higher balances of property, plant and equipment in-service.

Regional cost sharing revenues increased due primarily to additional capital projects identified by MISO as eligible for regional cost sharing and these projects being placed in-service in addition to higher accumulated investment for the Thumb

Table of Contents

Loop Project and Kansas V-Plan Project during the three months ended June 30, 2015 as compared to the same period in 2014. We expect to continue to receive regional cost sharing revenues and the amounts could increase in the near future, including revenues associated with projects that have been or are expected to be approved for regional cost sharing.

The recognition of the estimated contingent liability for potential refunds relating to the ROE complaints resulted in a reduction to operating revenues of \$13.3 million during the three months ended June 30, 2015 as described in Note 11 to the condensed consolidated financial statements. We are not able to estimate whether any required refunds would be applied to all components of revenues listed in the table above or only certain components.

Operating revenues for the three months ended June 30, 2015 include the revenue accruals and deferrals as described in Note 3 to the condensed consolidated financial statements.

Six months ended June 30, 2015 compared to six months ended June 30, 2014

The following table sets forth the components of and changes in operating revenues:

(in thousands)	2015		2014		Increase (decrease)	Percentage increase (decrease)		
	Amount	Percentage	Amount	Percentage				
Network revenues	\$390,255	71.3	% \$375,076	71.9	% \$15,179	4.0	%	
Regional cost sharing revenues	155,333	28.4	% 123,253	23.6	% 32,080	26.0	%	
Point-to-point	8,050	1.5	% 9,637	1.8	% (1,587)	(16.5)%	
Scheduling, control and dispatch	6,363	1.2	% 6,393	1.2	% (30)	(0.5)%	
Other	8,380	1.5	% 7,458	1.5	% 922	12.4	%	
Recognition of contingent liability for return on equity complaints	(20,836)	(3.9)%	—	—	% (20,836)	n/a	
Total	\$547,545	100.0	% \$521,817	100.0	% \$25,728	4.9	%	

Network revenues increased due primarily to higher net revenue requirements at our Regulated Operating Subsidiaries during the six months ended June 30, 2015 as compared to the same period in 2014. Higher net revenue requirements were due primarily to higher rate bases associated with higher balances of property, plant and equipment in-service. Regional cost sharing revenues increased due primarily to additional capital projects identified by MISO as eligible for regional cost sharing and these projects being placed in-service in addition to higher accumulated investment for the Thumb Loop Project and Kansas V-Plan Project during the six months ended June 30, 2015 as compared to the same period in 2014. We expect to continue to receive regional cost sharing revenues and the amounts could increase in the near future, including revenues associated with projects that have been or are expected to be approved for regional cost sharing.

The recognition of the estimated contingent liability for potential refunds relating to the ROE complaints resulted in a reduction to operating revenues of \$20.8 million during the six months ended June 30, 2015 as described in Note 11 to the condensed consolidated financial statements. We are not able to estimate whether any required refunds would be applied to all components of revenues listed in the table above or only certain components.

Operating revenues for the six months ended June 30, 2015 include the revenue accruals and deferrals as described in Note 3 to the condensed consolidated financial statements.

Operating Expenses

Operation and maintenance expenses

Three and six months ended June 30, 2015 compared to three and six months ended June 30, 2014

Operation and maintenance expenses increased primarily due to higher vegetation management requirements and higher expenses associated with substation and overhead line maintenance activities.

General and administrative expenses

Three months ended June 30, 2015 compared to three months ended June 30, 2014

General and administrative expenses increased primarily due to higher compensation expenses of \$1.7 million mainly due to personnel additions.

Table of Contents

Six months ended June 30, 2015 compared to six months ended June 30, 2014

General and administrative expenses increased primarily due to higher compensation-related expenses of \$11.9 million, mainly due to development bonuses paid during the three months ended March 31, 2015 as described in detail above under “Capital Project Updates and Other Recent Developments — Development Bonuses.”

Depreciation and amortization expenses

Three and six months ended June 30, 2015 compared to three and six months ended June 30, 2014

Depreciation and amortization expenses increased due primarily to a higher depreciable base resulting from property, plant and equipment in-service additions.

Taxes other than income taxes

Three and six months ended June 30, 2015 compared to three and six months ended June 30, 2014

Taxes other than income taxes increased due to higher property tax expenses due primarily to our Regulated Operating Subsidiaries’ 2014 capital additions, which are included in the assessments for 2015 personal property taxes.

Other Expenses (Income)

Three and six months ended June 30, 2015 compared to three and six months ended June 30, 2014

Interest Expense

Interest expense increased due primarily to additional interest expense associated with the net issuance of \$450.0 million in long-term debt securities subsequent to June 30, 2014.

Allowance for Equity Funds Used During Construction

Allowance for Equity Funds Used During Construction (“AFUDC equity”) increased due primarily to higher balances of construction work in progress eligible for AFUDC equity during the period.

Loss on Extinguishment of Debt

The loss on extinguishment of debt related to the partial tender of the 5.875% ITC Holdings Senior Notes and the 6.375% ITC Holdings Senior Notes during the second quarter of 2014. See Note 8 to the consolidated financial statements as of and for the year ended December 31, 2014 included in our Form 10-K for such period for a detailed discussion on the cash tender offer.

Income Tax Provision

Three months ended June 30, 2015 compared to three months ended June 30, 2014

Our effective tax rates for the three months ended June 30, 2015 and 2014 were 37.3% and 37.9%, respectively. Our effective tax rate in both periods exceeded our 35% statutory federal income tax rate due primarily to state income taxes, partially offset by the tax effects of AFUDC equity which reduced the effective tax rate. The amount of income tax expense relating to AFUDC equity was recognized as a regulatory asset and not included in the income tax provision. We recorded a state income tax provision of \$4.1 million (net of federal deductibility) during the three months ended June 30, 2015, compared to a state income tax provision of \$3.4 million (net of federal deductibility) for the three months ended June 30, 2014.

Six months ended June 30, 2015 compared to six months ended June 30, 2014

Our effective tax rates for the six months ended June 30, 2015 and 2014 were 37.5% and 38.1%, respectively. Our effective tax rate in both periods exceeded our 35% statutory federal income tax rate due primarily to state income taxes, partially offset by the tax effects of AFUDC equity which reduced the effective tax rate. The amount of income tax expense relating to AFUDC equity was recognized as a regulatory asset and not included in the income tax provision. We recorded a state income tax provision of \$8.1 million (net of federal deductibility) during the six months ended June 30, 2015, compared to a state income tax provision of \$7.9 million (net of federal deductibility) for the six months ended June 30, 2015.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

We expect to fund our future capital requirements with cash from operations, our existing cash and cash equivalents, issuances under our commercial paper program and amounts available under our revolving credit agreements (described in Note 5 to the condensed consolidated financial statements). In addition, we may from time to time secure debt and equity funding in the capital markets, although we can provide no assurance that we will be able to obtain financing on favorable terms or at all. As market conditions warrant, we may also from time to time repurchase debt or equity securities issued by us, in the open market, in privately negotiated transactions, by tender offer or otherwise. We expect that our capital requirements will arise principally from our need to:

- Fund capital expenditures at our Regulated Operating Subsidiaries. Our plans with regard to property, plant and equipment investments are described in detail above under “— Capital Investment and Operating Results Trends.”

- Fund business development expenses and related capital expenditures. We are pursuing development activities for transmission projects which will continue to result in the incurrence of development expenses and could result in significant capital expenditures.

- Fund working capital requirements.

- Fund our debt service requirements, including principal repayments and periodic interest payments. We expect our interest payments to increase each year as a result of additional debt we expect to incur to fund our capital expenditures and for general corporate purposes.

- Fund any potential share repurchases available under the Board of Directors authorized share repurchase program as described in Note 6 to the condensed consolidated financial statements.

- Fund contributions to our retirement benefit plans, as described in Note 9 to the condensed consolidated financial statements. We expect to make an estimated additional contribution of approximately \$4.5 million to these plans in 2015. The impact of the growth in the number of participants in our retirement benefit plans and changes in the requirements of the Pension Protection Act may require contributions to our retirement benefit plans to be higher than we have experienced in the past.

In addition to the expected capital requirements above, any adverse determinations relating to the contingencies described in Note 11 to the condensed consolidated financial statements would result in additional capital requirements.

We believe that we have sufficient capital resources to meet our currently anticipated short-term needs. We rely on both internal and external sources of liquidity to provide working capital and to fund capital investments. ITC Holdings’ sources of cash are dividends and other payments received by us from our Regulated Operating Subsidiaries and any other subsidiaries we may have in addition to the proceeds raised from the sale of our debt and equity securities. Each of our Regulated Operating Subsidiaries, while wholly owned by ITC Holdings, is legally distinct from ITC Holdings and has no obligation, contingent or otherwise, to make funds available to us.

We expect to continue to utilize our commercial paper program and revolving credit agreements as well as our cash and cash equivalents as needed to meet our short-term cash requirements. As of June 30, 2015, we had consolidated indebtedness under our revolving and term loan credit agreements of \$383.2 million, with unused capacity under our revolving credit agreements of \$777.8 million. Additionally, ITC Holdings had \$50.0 million of commercial paper issued and outstanding as of June 30, 2015 with the ability to issue an additional \$350.0 million under the commercial paper program. See Note 5 to the condensed consolidated financial statements for a detailed discussion of the commercial paper program and our revolving credit agreements as well as the debt issuance in 2015.

As of June 30, 2015, we had approximately \$225.0 million of debt maturing within one year, which we expect to refinance with long-term debt. To address our long-term capital requirements and to repay debt maturing within one year, we expect that we will need to obtain additional debt financing. Certain of our capital projects could be delayed in the event we experience difficulties in accessing capital. We expect to be able to obtain such additional financing for both our short and long-term requirements as needed, in amounts and upon terms that will be reasonably satisfactory to us due to our strong credit ratings and our historical ability to obtain financing.

Credit Ratings

Credit ratings by nationally recognized statistical rating agencies are an important component of our liquidity profile. Credit ratings relate to our ability to issue debt securities and the cost to borrow money, and should not be viewed as

an indication of future stock performance or a recommendation to buy, sell, or hold securities. Ratings are subject to revision or

Table of Contents

withdrawal at any time and each rating should be evaluated independently of any other rating. Our current credit ratings are displayed in the following table. An explanation of these ratings may be obtained from the respective rating agency.

Issuer	Issuance	Standard and Poor's Ratings Services (a)	Moody's Investor Service, Inc. (b)
ITC Holdings	Senior Unsecured Notes	BBB+	Baa2
ITC Holdings	Commercial Paper	A-2	Prime-2
ITC Transmission	First Mortgage Bonds	A	A1
METC	Senior Secured Notes	A	A1
ITC Midwest	First Mortgage Bonds	A	A1
ITC Great Plains	First Mortgage Bonds	A	A1

(a) On December 6, 2013, Standard and Poor's Ratings Services ("Standard and Poor's") upgraded the senior unsecured credit rating of ITC Holdings and reaffirmed the secured credit ratings of ITC Transmission, METC and ITC Midwest. On October 7, 2014, Standard and Poor's issued a secured credit rating for ITC Great Plains. Additionally, on June 8, 2015, Standard and Poor's assigned a short-term issuer credit rating to ITC Holdings, which applies to the recently established commercial paper program discussed in Note 5 to the condensed consolidated financial statements. All of the ratings have a stable outlook.

(b) On April 15, 2015, Moody's Investor Service, Inc. ("Moody's") reaffirmed the credit ratings for ITC Holdings and the Regulated Operating Subsidiaries. Additionally, on June 9, 2015, Moody's assigned a short-term commercial paper rating to ITC Holdings, which applies to the recently established commercial paper program discussed in Note 5 to the condensed consolidated financial statements. All of the ratings have a stable outlook.

Covenants

Our debt instruments include senior notes, secured notes, first mortgage bonds and unsecured revolving and term loan credit agreements containing numerous financial and operating covenants that place significant restrictions, which are described in Note 5 to the condensed consolidated financial statements and in our Form 10-K for the fiscal year ended December 31, 2014. As of June 30, 2015, we were not in violation of any debt covenant. In the event of a downgrade in our credit ratings, none of the covenants would be directly impacted, although the borrowing costs under our revolving and term loan credit agreements would increase.

Cash Flows From Operating Activities

Net cash provided by operating activities was \$197.4 million and \$196.0 million for the six months ended June 30, 2015 and 2014, respectively. The increase in cash provided by operating activities was due primarily to an increase in cash received from operating revenues of \$34.7 million during the six months ended June 30, 2015 compared to the same period in 2014. The increase was partially offset by higher income taxes paid of \$15.4 million, an increase of \$8.0 million in contributions to our retirement benefit plans, higher interest payments (net of interest capitalized) of \$3.6 million and an increase in payments of operating expenses of \$2.1 million.

Cash Flows From Investing Activities

Net cash used in investing activities was \$323.7 million and \$375.4 million for the six months ended June 30, 2015 and 2014, respectively. The decrease in cash used in investing activities was due primarily to the timing of payments for investments in property, plant and equipment during the six months ended June 30, 2015 compared to the same period in 2014.

Cash Flows From Financing Activities

Net cash provided by financing activities was \$111.4 million and \$154.2 million for the six months ended June 30, 2015 and 2014, respectively. The decrease in cash provided by financing activities was due primarily to a decrease in long-term debt issuances of \$248.7 million and a net decrease of \$180.4 million in amounts outstanding under our revolving and term loan credit agreements during the six months ended June 30, 2015 compared to the same period in 2014. These decreases were partially offset by a decrease of \$198.5 million in payments to retire long-term debt and the \$50.0 million in proceeds from the issuance of commercial paper in June 2015 under the commercial paper program. Additionally, there were no payments for the accelerated share repurchase program during the six months

ended June 30, 2015 as compared to the payment of \$150.0

Table of Contents

million during the same period in 2014. See Note 5 to the condensed consolidated financial statements for details on the commercial paper program.

CONTRACTUAL OBLIGATIONS

Our contractual obligations are described in our Form 10-K for the year ended December 31, 2014. There have been no material changes to that information since December 31, 2014, other than the items listed below and described in Note 5 to the condensed consolidated financial statements:

- Amounts borrowed under our unsecured, unguaranteed revolving credit agreements;
- The issuance of \$225.0 million of 3.83% First Mortgage Bonds, Series G, due 2055 by ITC Midwest; and
- The \$50.0 million of commercial paper issued by ITC Holdings under the recently established commercial paper program.

CRITICAL ACCOUNTING POLICIES

Our condensed consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”). The preparation of these condensed consolidated financial statements requires the application of appropriate technical accounting rules and guidance, as well as the use of estimates. The application of these policies necessarily involves judgments regarding future events. These estimates and judgments, in and of themselves, could materially impact the condensed consolidated financial statements and disclosures based on varying assumptions, as future events rarely develop exactly as forecasted, and even the best estimates routinely require adjustment. The accounting policies discussed in “Item 7 — Management’s Discussion and Analysis of Financial Condition and Results of Operations — Critical Accounting Policies” in our Form 10-K for the fiscal year ended December 31, 2014 are considered by management to be the most important to an understanding of the consolidated financial statements because of their significance to the portrayal of our financial condition and results of operations or because their application places the most significant demands on management’s judgment and estimates about the effect of matters that are inherently uncertain. There have been no material changes to that information during the six months ended June 30, 2015.

RECENT ACCOUNTING PRONOUNCEMENTS

See Note 2 to the condensed consolidated financial statements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Fixed Rate Debt

Based on the borrowing rates currently available for bank loans with similar terms and average maturities, the fair value of our consolidated long-term debt and debt maturing within one year, excluding revolving and term loan credit agreements and commercial paper, was \$4,035.3 million at June 30, 2015. The total book value of our consolidated long-term debt and debt maturing within one year, excluding revolving and term loan credit agreements and commercial paper, was \$3,855.1 million at June 30, 2015. We performed an analysis calculating the impact of changes in interest rates on the fair value of long-term debt and debt maturing within one year, excluding revolving and term loan credit agreements and commercial paper, at June 30, 2015. An increase in interest rates of 10% (from 5.0% to 5.5%, for example) at June 30, 2015 would decrease the fair value of debt by \$164.1 million, and a decrease in interest rates of 10% at June 30, 2015 would increase the fair value of debt by \$179.3 million at that date.

Revolving and Term Loan Credit Agreements

At June 30, 2015, we had a consolidated total of \$383.2 million outstanding under our revolving and term loan credit agreements, which are variable rate loans and fair value approximates book value. A 10% increase or decrease in borrowing rates under the revolving and term loan credit agreements compared to the weighted average rates in effect at June 30, 2015 would increase or decrease interest expense by \$0.5 million, respectively, for an annual period with a constant borrowing level of \$383.2 million.

Table of Contents

Commercial Paper

At June 30, 2015, ITC Holdings had \$50.0 million of commercial paper issued and outstanding under the commercial paper program. Due to the short-term nature of these financial instruments, the carrying value approximates fair value. A 10% increase or decrease in interest rates for commercial paper would increase or decrease interest expense by less than \$0.1 million for an annual period with a continuous level of commercial paper outstanding of \$50.0 million.

Derivative Instruments and Hedging Activities

We use derivative financial instruments, including interest rate swap contracts, to manage our exposure to fluctuations in interest rates. The use of these financial instruments mitigates exposure to these risks and the variability of our operating results. We are not a party to leveraged derivatives and do not enter into derivative financial instruments for trading or speculative purposes. The interest rate swap contracts held as of June 30, 2015 manage interest rate risk associated with the forecasted future issuance of fixed-rate debt related to the expected refinancing of the maturing ITC Holdings 5.875% Senior Notes, due September 30, 2016. As of June 30, 2015, ITC Holdings had \$139.3 million outstanding under the 5.875% Senior Notes.

Other

As described in our Form 10-K for the fiscal year ended December 31, 2014, we are subject to commodity price risk from market price fluctuations, and to credit risk primarily with DTE Electric, Consumers Energy and IP&L, our primary customers. There have been no material changes in these risks during the six months ended June 30, 2015.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to provide reasonable assurance that material information required to be disclosed in our reports that we file or submit under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required financial disclosure. In designing and evaluating the disclosure controls and procedures, management recognized that a control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, with a company have been detected.

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rule 13a-15 of the Exchange Act. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective at a reasonable assurance level.

Changes in Internal Control Over Financial Reporting

There have been no changes in our internal control over financial reporting during the three months ended June 30, 2015 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

See Note 11 to the condensed consolidated financial statements for a description of recent developments in the rate of return on equity and capital structure complaints filed against all MISO TOs, including our MISO Regulated Operating Subsidiaries.

Table of Contents

ITEM 1A. RISK FACTORS

For information regarding risk factors affecting us, see “Item 1A Risk Factors” of our Form 10-K for the fiscal year ended December 31, 2014. There have been no material changes to the risk factors set forth therein.

ITEM 2. UNREGISTERED SALE OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table sets forth the repurchases of common stock for the quarter ended June 30, 2015:

Period	Total Number of Shares Purchased (a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (b)	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs (in millions) (b)
April 2015	793	\$36.23	—	\$120.0
May 2015	79,705	35.95	—	120.0
June 2015 (c)	1,815	33.46	—	120.0
Total	82,313	\$35.89	—	

Shares acquired were delivered to us by employees as payment of tax withholding obligations due to us upon the (a) vesting of restricted stock as well as payment of obligations for the exercise price and tax withholdings for certain option exercises.

(b) In April 2014, the Board of Directors authorized and ITC Holdings announced a share repurchase program for up to \$250.0 million, which expires in December 2015.

(c) Amount does not include 569,782 shares deemed issued and repurchased for accounting purposes in connection with the payment of the exercise price and tax withholding obligations relating to net option exercises.
