LSB Industries, Inc.

Form 10-K (12-31-2009)

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549
FORM 10-K

(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2009

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 1-7677

LSB INDUSTRIES, INC.
(Exact Name of Registrant as Specified in its Charter)

Delaware
(State of Incorporation)

73-1015226
(I.R.S. Employer)
Identification No.)

16 South Pennsylvania Avenue
Oklahoma City, Oklahoma
(Address of Principal Executive Offices)

73107
(Zip Code)

Registrant's Telephone Number, Including Area Code: (405) 235-4546

Securities Registered Pursuant to Section 12(b) of the Act:

Name of Each Exchange

Edgar Filing: LSB INDUSTRIES INC - Form 10-K

Title of Each Class	On Which Registered
Common Stock, Par Value \$.10	New York Stock Exchange
Preferred Share Purchase Rights	New York Stock Exchange

(Facing Sheet Continued)

Indicate by check mark if the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the Registrant (1) has filed all reports required by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for the shorter period that the Registrant has had to file the reports), and (2) has been subject to the filing requirements for the past 90 days. Yes No

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the Registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the Registrant's voting common equity held by non-affiliates of the Registrant, computed by reference to the price at which the voting common stock was last sold as of June 30, 2009, was approximately \$227 million. As a result, the Registrant is an accelerated filer as of December 31, 2009. For purposes of this computation, shares of the Registrant's common stock beneficially owned by each executive officer and director of the Registrant were deemed to be owned by affiliates of the Registrant as of June 30, 2009. Such determination should not be deemed an admission that such executive officers and directors of our common stock are, in fact, affiliates of the Registrant or affiliates as of the date of this Form 10-K.

As of February 28, 2010, the Registrant had 21,226,063 shares of common stock outstanding (excluding 4,143,362 shares of common stock held as treasury stock).

PART I

ITEM 1. BUSINESS

General

LSB Industries, Inc. (the "Company", "Registrant", "LSB", "We", "Us", or "Our") was formed in 1968 as an Oklahoma corporation, and became a Delaware corporation in 1977. We are a diversified holding company. Our wholly-owned subsidiary, ThermaClime, Inc. ("ThermaClime") through its subsidiaries, owns substantially all of our core businesses consisting of the:

- Climate Control Business engaged in the manufacturing and selling of a broad range of heating, ventilation and air conditioning ("HVAC") products for the niche markets we serve. These products are used to control the environment in commercial and residential new building construction, renovation of existing buildings and replacement of existing systems.
- Chemical Business engaged in the manufacturing and selling of nitrogen based chemical products produced from three plants located in Arkansas, Alabama and Texas for the agricultural, industrial, and mining markets.

Certain of our other subsidiaries outside of ThermaClime own facilities and operations, including our previously idled chemical facility located in Pryor, Oklahoma (the "Pryor Facility"), within our above described core businesses.

We believe our Climate Control Business has developed leadership positions in certain niche markets by offering extensive product lines, customized products and improved technologies. Under this focused strategy, we have developed what we believe to be the most extensive line of geothermal and water source heat pumps and hydronic fan coils in the United States. Further, we believe that we were a pioneer in the use of geothermal technology in the climate control industry and have used it to create what we believe to be the most energy efficient climate control systems commercially available today. We employ highly flexible production capabilities that allow us to custom design units for new construction as well as the retrofit and replacement markets.

Our Chemical Business has three chemical production facilities located in El Dorado, Arkansas (the "El Dorado Facility"), Cherokee, Alabama (the "Cherokee Facility") and Baytown, Texas (the "Baytown Facility"). Our products include fertilizer and industrial grade ammonium nitrate ("AN"), urea ammonium nitrate ("UAN"), nitric acid in various concentrations, nitrogen solutions and various other products. Our Chemical Business is a supplier to some of the world's leading chemical and industrial companies. By focusing on specific geographic areas, we have developed freight and distribution advantages over many of our competitors, and we believe our Chemical Business has established leading regional market positions, a key element in the success of this business.

Table of Contents

In addition as discussed below under “Chemical Business - Agricultural Products,” during 2009, we activated a portion of our previously idled Pryor Facility. We encountered numerous unanticipated delays, but began production of anhydrous ammonia in January 2010, however at production rates lower than our targeted rates. Anhydrous ammonia is the initial feedstock for the production of UAN.

Certain statements contained in this Part I may be deemed to be forward-looking statements. See "Special Note Regarding Forward-Looking Statements."

Current State of the Economy

Since our two business segments serve several diverse markets, we consider market fundamentals for each market individually as we evaluate economic conditions.

Climate Control Business - The downturn in commercial and residential construction has had a significant adverse effect on our Climate Control Business' product order level and sales in 2009. Based upon published reports of leading indicators, including the Construction Market Forecasting Service published by McGraw-Hill Construction Research & Analytics, a business unit of the McGraw-Hill Companies (“McGraw-Hill”), and the national architecture billings index published by the American Institute of Architects (“AIA”), the overall commercial construction sector is not expected to recover during 2010. On the other hand, McGraw-Hill has projected an increase in both single-family residential and multi-family construction during 2010. Another factor that may affect product order rates going forward is the potential for growth in our highly energy-efficient geothermal water-source heat pumps, which could benefit significantly from government stimulus programs, including various tax incentives, although we can not predict the impact these programs will have on our business.

Chemical Business - In our Chemical Business, approximately 60% of our 2009 sales were into industrial and mining markets. Approximately 75% of these sales are to customers that have contractual obligations to purchase a minimum quantity or allow us to recover our cost plus a profit, irrespective of the volume of product sold. It is unclear to us how these markets will respond in 2010 but it appears that market demand for these products could be flat to slightly up for the first half of 2010.

The remaining 40% of our Chemical Business 2009 sales were made into the agricultural fertilizer markets to customers that do not purchase pursuant to contractual arrangements. Our agricultural sales volumes and margins depend upon the supply of, and the demand, for fertilizer, which in turn depends on the market fundamentals for crops including corn, wheat and forage. The current outlook remains uncertain but most market indicators, including reports in Green Markets, Fertilizer Week and other industry publications, point to positive supply and demand fundamentals for the types of nitrogen fertilizer products we produce and sell. However, it is possible that the fertilizer outlook could be adversely affected by lower grain prices, unanticipated spikes in natural gas prices, or unfavorable weather conditions.

See further discussion relating to the economy under various risk factors under Item 1A of this Part 1 and “Overview-Economic Conditions” of the Management’s Discussion and Analysis of Financial Condition and Results of Operations (“MD&A”) contained in this report.

Table of Contents

Website Access to Company's Reports

Our internet website address is www.lsb-okc.com. Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to section 13(a) or 15(d) of the Exchange Act are available free of charge through our website within a reasonable amount of time after they are electronically filed with, or furnished to, the Securities and Exchange Commission (“SEC”).

Segment Information and Foreign and Domestic Operations and Export Sales

Schedules of the amounts of net sales, gross profit, operating income (loss) and identifiable assets attributable to each of our lines of business and of the amount of our export sales in the aggregate and by major geographic area for each of the last three years appear in Note 22 of the Notes to Consolidated Financial Statements included elsewhere in this report.

Climate Control Business

General

Our Climate Control Business manufactures and sells a broad range of standard and custom designed geothermal and water source heat pumps and hydronic fan coils as well as large custom air handlers and modular chiller systems. These products are for use in commercial and residential HVAC systems. Our products are currently installed in some of the most recognizable commercial developments in the country, including Prudential Tower, Rockefeller Plaza, Trump Tower, and Time Warner Center and many others. In addition, we have a significant presence in the lodging industry with installations in numerous Hyatt, Marriott, Four Seasons, Starwood, Ritz Carlton and Hilton hotels. We also have a substantial share of resort destinations in Las Vegas where we have units installed in over 70,000 rooms for a number of premier properties, including the MGM Grand, Luxor, Venetian, Treasure Island, Bellagio, Mandalay Bay, Caesar’s Palace, Monte Carlo, Mirage, Golden Nugget, Hard Rock, Wynn resorts, and many others. During 2009, our Climate Control Business saw a significant decline in sales associated with the lodging industry due to the economic downturn.

The following table summarizes net sales information relating to our products of the Climate Control Business:

		2009	2008	2007
Percentage of net sales of the Climate Control Business:				
Geothermal and water source heat pumps	68%	61%	58%	
Hydronic fan coils	17%	27%	30%	
Other HVAC products	15%	12%	12%	
	100%	100%	100%	
Percentage of LSB’s consolidated net sales:				
Geothermal and water source heat pumps	34%	25%	28%	
Hydronic fan coils	9%	11%	15%	
Other HVAC products	7%	5%	6%	
	50%	41%	49%	

Table of Contents

Market Conditions for Climate Control Business

We discuss below certain details of our marketing, distribution, production, backlog, competition and new products relative to our geothermal and water source heat pumps, hydronic fan coils and other products produced by our Climate Control Business. At this time, we are unable to assess the possible impact to our Climate Control Business' sales level as a result of the well documented downturn in commercial and residential construction. For the short term, we do expect to see lower demand for most of our products.

We believe that tax credits and incentives, and certain planned direct spending by the federal government contained in the American Reinvestment and Recovery Act of 2009, could stimulate sales of our geothermal heat pump products, as well as other products that could be used to modernize federally owned and operated buildings, military installations, public housing and hospitals. Also see discussion concerning Advanced Manufacturing Energy Credits awarded to two of our subsidiaries under "Liquidity and Capital Resources - Capital Expenditures" of Item 7 of Part II of this report.

Geothermal and Water Source Heat Pumps

We believe we are a leading provider of geothermal and water source heat pumps to the commercial construction and renovation markets in the United States. Water source heat pumps are highly efficient heating and cooling products, which enable individual room climate control through the transfer of heat using a water pipe system, which is connected to a centralized cooling tower or heat injector. Water source heat pumps enjoy a broad range of commercial applications, particularly in medium to large sized buildings with many small, individually controlled spaces. Despite the current economic downturn, we believe the market share for commercial water source heat pumps relative to other types of heating and air-conditioning systems will continue to grow due to the relative efficiency and longevity of such systems, as well as due to the emergence of the replacement market for those systems.

Our Climate Control Business has also developed the use of geothermal heat pumps in residential and commercial applications. Geothermal systems, which circulate water and antifreeze through an underground heat exchanger, are among the most energy efficient systems currently available in the market. We believe the energy efficiency, longer life, and relatively short payback periods of geothermal systems, as compared with air-to-air systems, as well as tax incentives that are available to builders and homeowners when installing geothermal systems, will continue to increase demand for our geothermal products. We specifically target the commercial and institutional markets, as well as single-family new construction, renovation and replacements.

Hydronic Fan Coils

We believe that our Climate Control Business is a leading provider of hydronic fan coils. Our Climate Control Business targets the commercial and institutional markets. Hydronic fan coils use heated or chilled water provided by a centralized chiller or boiler, through a water pipe system, to condition the air and allow individual room control. Hydronic fan coil systems are

Table of Contents

quieter, have longer lives and lower maintenance costs than other comparable systems used where individual room control is required. Important components of our strategy for competing in the commercial and institutional renovation and replacement markets include the breadth of our product line coupled with customization capability provided by a flexible manufacturing process. Hydronic fan coils enjoy a broad range of commercial applications, particularly in medium to large sized buildings with many small, individually controlled spaces.

Geothermal and Water Source Heat Pump and Hydronic Fan Coil Market

We estimate the annual United States market for geothermal and water source heat pumps and hydronic fan coils was approximately \$600 million in 2009 based on December 2009 data supplied by the Air-Conditioning, Heating and Refrigeration Institute (“AHRI”). Levels of repair, replacement, and new construction activity generally drive demand in these markets. However, this market is being impacted by the current economic conditions.

Production, Capital Investments and Backlog

We manufacture our products in many sizes and configurations, as required by the purchaser, to fit the space and capacity requirements of hotels, motels, schools, hospitals, apartment buildings, office buildings and other commercial or residential structures. In addition, most of the customer product orders are placed well in advance of required delivery dates.

During 2009, we invested approximately \$6.4 million in additional property, plant and equipment primarily relating to production equipment and other upgrades for additional capacity relating to our Climate Control Business.

As of December 31, 2009, we have committed to spend an additional \$1.3 million primarily for facilities expansion and upgrades and production equipment in 2010. Our investment in the Climate Control Business will continue if customer product order intake levels warrant such investment. These investments have and will increase our capacity to produce and distribute our Climate Control products. Additional investments will depend upon our long-term outlook for the economic conditions that might affect our markets. See discussions under “Liquidity and Capital Resources-Capital Expenditures” of Item 7 of Part II of this report, including Advanced Manufacturing Energy Credits awarded to two of our subsidiaries.

As of December 31, 2009 and 2008, the backlog of confirmed customer product orders (purchase orders from customers that have been accepted and received credit approval) for our Climate Control Business was approximately \$32.2 million and \$68.5 million, respectively. The decrease in our backlog is primarily the result of lower product order levels during 2009 in all major product categories and markets due to the economic downturn. At December 31, 2009, included within our reported backlog is a confirmed order for approximately \$3.2 million that has been placed on hold by the customer pending refinancing arrangements. Historically, we have not experienced significant cancellations relating to our backlog of confirmed customer product orders and we expect to ship substantially all of these orders within the next twelve months; however, due to the current economic conditions in the markets we serve, it is possible that some of our customers could cancel a portion of our backlog or extend the shipment terms beyond twelve months.

Table of Contents

Distribution

Our Climate Control Business sells its products to mechanical contractors, original equipment manufacturers (“OEMs”) and distributors. Our sales to mechanical contractors primarily occur through independent manufacturers' representatives, who also represent complementary product lines not manufactured by us. OEMs generally consist of other air conditioning and heating equipment manufacturers who resell under their own brand name the products purchased from our Climate Control Business in competition with us. The following table summarizes net sales to OEMs relating to our products of the Climate Control Business:

	2009	2008	2007
Net sales to OEMs as a percentage of:			
Net sales of the Climate Control Business	23%	20%	19 %
LSB's consolidated net sales	11%	9%	9 %

Market

Our Climate Control Business depends primarily on the commercial construction industry, including new construction and the remodeling and renovation of older buildings, and on the residential construction industry and existing homes for both new and replacement markets relating to their geothermal products.

Raw Materials

Numerous domestic and foreign sources exist for the materials used by our Climate Control Business, which materials include copper, compressors, steel, aluminum, electric motors, and valves. Periodically, our Climate Control Business enters into futures contracts for copper. We do not anticipate any difficulties in obtaining necessary materials for our Climate Control Business. Although we believe we will be able to pass to our customers the majority of any raw material cost increases in the form of higher prices, the timing of these price increases could lag the increases in the cost of materials. While we believe we will have sufficient sources for materials, a shortage of raw materials could impact production of our Climate Control products.

Regulatory Matters

The American Reinvestment and Recovery Act of 2009 contains significant incentives for the installation of our geothermal products. Also see discussion concerning Advanced Manufacturing Energy Credits awarded to two of our subsidiaries under “Liquidity and Capital Resources - Capital Expenditures” of Item 7 of Part II of this report.

Competition

Our Climate Control Business competes primarily with seven companies, some of whom are also our customers. Some of our competitors serve other markets and have greater financial and other resources than we do. Our Climate Control Business manufactures a broader line of geothermal and water source heat pump and fan coil products than any other manufacturer in the United States, and we believe that we are competitive as to price, service, warranty and product performance.

Table of Contents

Continue to Introduce New Products

Based on business plans and key objectives submitted by our subsidiaries within our Climate Control Business, we expect to continue to launch new products and product upgrades in an effort to maintain and increase our current market position and to establish a presence in new markets served by the Climate Control Business.

Chemical Business

General

Our Chemical Business manufactures products for three principal markets:

- anhydrous ammonia, fertilizer grade AN, UAN, and ammonium nitrate ammonia solution (“ANA”) for the agricultural applications,
 - concentrated, blended and regular nitric acid, mixed nitrating acids, metallurgical grade anhydrous ammonia, sulfuric acid, and high purity AN for industrial applications, and
 - industrial grade AN and solutions for the mining industry.

The following table summarizes net sales information relating to our products of the Chemical Business:

	2009	2008	2007
Percentage of net sales of the Chemical Business:			
Industrial acids and other chemical products	37%	38%	33%
Agricultural products	41%	36%	41%
Mining products	22%	26%	26%
	100%	100%	100%
Percentage of LSB’s consolidated net sales:			
Agricultural products	20%	20%	20%
Industrial acids and other chemical products	18%	22%	16%
Mining products	11%	15%	13%
	49%	57%	49%

Market Conditions for Chemical Business

We discuss below certain details of our agricultural products, industrial acids and other chemical products, mining products, major customers, raw materials and other sales and industry issues affecting our Chemical Business.

As discussed in more detail under “Overview-Economic Conditions” of the MD&A contained in this report, we are unable to definitively assess the impact to our Chemical Business’ sales level as a result of the current economic recession. At this time based upon information from our sales personnel, it appears that the market demand for our industrial acids and mining products will be flat to slightly up, for the first half of 2010, and the nitrogen fertilizer supply and demand fundamentals appear to be favorable. However, it is possible that the fertilizer outlook could be adversely affected by lower grain prices, unanticipated spikes in natural gas prices, or unfavorable weather conditions.

Table of Contents

Agricultural Products

Our Chemical Business produces AN at the El Dorado Facility and anhydrous ammonia, UAN, and ANA at the Cherokee Facility; all of which are nitrogen based fertilizers. The Cherokee Facility also has the ability to produce agricultural grade AN. Although, to some extent, the various forms of nitrogen-based fertilizers are interchangeable, each has its own characteristics, which produce agronomic preferences among end users. Farmers and ranchers decide which type of nitrogen-based fertilizer to apply based on the crop planted, soil and weather conditions, regional farming practices and relative nitrogen fertilizer prices. Our agricultural markets include a high concentration of pastureland and row crops, which favor our products. We sell these agricultural products to farmers, ranchers, fertilizer dealers and distributors located in the Central and Southeastern United States, which are in relatively close proximity to the El Dorado and Cherokee Facilities. We develop our market position in these areas by emphasizing high quality products, customer service and technical advice. During the past few years, we have been successful in expanding outside our traditional markets by barging to distributors on the Tennessee and Ohio rivers, and by railing into certain Western States. The El Dorado Facility produces a high performance AN fertilizer that, because of its uniform size, is easier to apply than many competing nitrogen-based fertilizer products. Our subsidiary, El Dorado Chemical Company (“EDC”) establishes long-term relationships with end-users through its network of wholesale and retail distribution centers and our subsidiary, Cherokee Nitrogen Company (“CNC”) sells directly to agricultural customers.

During 2009, we proceeded to activate a portion of our previously idled Pryor Facility. We encountered numerous unanticipated delays, but began production of anhydrous ammonia in January 2010, which is the initial feedstock for the production of UAN, however at production rates lower than our targeted rates. We are continuing to produce and store anhydrous ammonia while we are activating the Urea plant. The start up of the Urea plant has encountered delays as discussed under “Overview-Chemical Business” of Item 7 of Part II of this report. At the Pryor Facility, natural gas is a primary raw material for producing UAN and anhydrous ammonia. When producing at a sustained level, we expect the Pryor Facility to produce and sell at an annualized rate of approximately 325,000 tons of UAN and 35,000 tons of anhydrous ammonia.

One of our subsidiaries, Pryor Chemical Company (“PCC”), is a party to a contract with Koch Nitrogen Company (“Koch”) under which Koch agreed to purchase and distribute substantially all of the UAN produced at the Pryor Facility. Pursuant to the terms of the contract, the UAN will be priced at market prices less a distribution fee and certain shipping costs where applicable.

Industrial Acids and Other Chemical Products

Our Chemical Business manufactures and sells industrial acids and other chemical products primarily to the polyurethane, paper, fibers, fuel additives, emission control, and electronics industries. We are a major supplier of concentrated nitric acid and mixed nitrating acids, specialty products used in the manufacture of fibers, gaskets, fuel additives, ordnance, and other chemical products. In addition, at the El Dorado Facility, we produce and sell blended and regular nitric acid and we are a niche market supplier of sulfuric acid, primarily to the region’s key paper and related chemical manufacturers. At the Cherokee Facility, we are also a niche market supplier of industrial and high purity ammonia for many specialty applications, including

Table of Contents

chemicals to reduce air emissions from power plants. As discussed below under “Introduction of New Product” of this Item 1, as of January 2010, the Cherokee Facility began producing and selling diesel exhaust fluid.

We compete based upon service, price, location of production and distribution sites, product quality and performance. We also believe we are the largest domestic merchant marketer of concentrated and blended nitric acids and provide inventory management as part of the value-added services offered to certain customers.

The Baytown Facility is one of the two largest nitric acid manufacturing units in the United States, with demonstrated capacity exceeding 1,350 short tons per day. The majority of the Baytown Facility’s production is sold to Bayer Material Science LLC (“Bayer”) pursuant to a long-term contract. See discussion below under “Bayer Agreement” of this Item 1 concerning the replacement of the original Bayer agreement with a new agreement in 2009.

Mining Products

Our Chemical Business manufactures industrial grade AN at the El Dorado Facility and 83% AN solution at the Cherokee Facility for the mining industry. Effective January 1, 2010, EDC is a party to a long-term cost-plus supply agreement. Under this supply agreement, EDC supplies Orica International Pte Ltd. with a significant volume of industrial grade AN per year for a term through December 2014. This new agreement replaces EDC’s previous agreement to supply industrial grade AN to Orica USA, Inc. (“Orica”).

Major Customers

The following summarizes net sales to our major customers relating to our products of the Chemical Business:

	2009	2008	2007
Net sales to Bayer as a percentage of:			
Net sales of the Chemical Business	14%	19%	15%
LSB’s consolidated net sales	7%	11%	7%
Net sales to Orica as a percentage of:			
Net sales of the Chemical Business	14%	19%	19%
LSB’s consolidated net sales	7%	11%	9%

Raw Materials

The products our Chemical Business manufacture are primarily derived from the following raw material feedstocks: anhydrous ammonia, natural gas and sulfur. These raw material feedstocks are commodities, subject to price fluctuations.

Table of Contents

The El Dorado Facility purchases approximately 200,000 tons of anhydrous ammonia and 50,000 tons of sulfur annually and produces and sells approximately 470,000 tons of nitrogen-based products and approximately 150,000 tons of sulfuric acid per year. Although anhydrous ammonia is produced from natural gas, the price does not necessarily follow the spot price of natural gas in the U.S. because anhydrous ammonia is an internationally traded commodity and the relative price is set in the world market while natural gas is primarily a nationally traded commodity. The ammonia supply to the El Dorado Facility is transported from the Gulf of Mexico by pipeline. Under an agreement with its principal supplier of anhydrous ammonia, EDC purchases a majority of its anhydrous ammonia requirements for its El Dorado Facility through December 2012 from this supplier. Periodically, we will enter into futures/forward contracts to economically hedge certain of the anhydrous ammonia requirements. We believe that we can obtain anhydrous ammonia from other sources in the event of an interruption of service under the above-referenced contract. Prices for anhydrous ammonia were volatile during 2009, ranging from \$125 to \$355 per metric ton. During 2009, the average prices for sulfur ranged from minimal to \$30 per long ton.

The Cherokee Facility normally consumes 5 to 6 million MMBtu's of natural gas annually and produces and sells approximately 300,000 to 370,000 tons of nitrogen-based products per year. Natural gas is a primary raw material for anhydrous ammonia. The Cherokee Facility's natural gas feedstock requirements are generally purchased at spot market price. Periodically, we will enter into futures/forward contracts to economically hedge certain of the natural gas requirements. Natural gas prices continue to exhibit volatility. In 2009, daily spot prices per MMBtu, excluding transportation, ranged from \$1.87 to \$6.08. Periodically, the Cherokee Facility purchases anhydrous ammonia to supplement its annual production capacity of approximately 175,000 tons. Anhydrous ammonia can be delivered to Cherokee Facility by truck, rail or barge.

The Baytown Facility typically consumes more than 100,000 tons of purchased anhydrous ammonia per year. The majority of the Baytown Facility's production is sold to Bayer pursuant to a long-term contract that provides for a pass-through of certain costs, including the anhydrous ammonia costs, plus a profit. See discussion concerning a new long-term contract below under "Bayer Agreement" of this Item 1.

Table of Contents

Spot anhydrous ammonia, natural gas and sulfur costs have fluctuated dramatically in recent years. The following table shows, for the periods indicated, the high and low published prices for:

- ammonia based upon the low Tampa metric price per ton as published by Fertecon and FMB Ammonia reports,
 - natural gas based upon the daily spot price at the Tennessee 500 pipeline pricing point, and
 - sulfur based upon the average quarterly Tampa price per long ton as published in Green Markets.

	Ammonia Price Per Metric Ton		Daily Spot Natural Gas Prices Per MMBtu		Sulfur Price Per Long Ton	
	High	Low	High	Low	High	Low
2009	\$355	\$125	\$ 6.08	\$1.87	\$ 30	minimal
2008	\$931	\$125	\$13.16	\$5.36	\$617	\$150
2007	\$460	\$295	\$10.59	\$5.30	\$112	\$ 56

As of March 1, 2010, the published price, as described above, for ammonia was \$450 per metric ton and natural gas was \$4.75 per MMBtu. The average quarterly price per long ton for sulfur was \$90 per long ton.

See discussion above under “Agricultural Products” of this Item 1 concerning our previously idled Pryor Facility that began production of anhydrous ammonia in 2010.

Sales Strategy

Our Chemical Business has pursued a strategy of developing customers that purchase substantial quantities of products pursuant to sales agreements and/or pricing arrangements that provide for the pass through of raw material costs in order to minimize the impact of the uncertainty of the sales prices of our products in relation to the cost of anhydrous ammonia, natural gas and sulfur. These pricing arrangements help mitigate the volatility risk inherent in the raw material feedstocks of natural gas, anhydrous ammonia and sulfur. For 2009, approximately 60% of the Chemical Business’ sales were into industrial and mining markets. Approximately 75% of our industrial and mining sector sales were made pursuant to these types of arrangements. The remaining 40% of our 2009 sales are primarily into agricultural markets at the price in effect at time of shipment. However, we enter into futures/forward contracts to economically hedge the cost of natural gas and anhydrous ammonia for the purpose of securing the profit margin on a significant portion of our sales commitments with firm sales prices in our Chemical Business.

The sales prices of our agricultural products have only a moderate correlation to the anhydrous ammonia and natural gas feedstock costs and reflect market conditions for like and competing nitrogen sources. This can compromise our ability to recover our full cost to produce the product in this market. Additionally, the lack of sufficient non-seasonal sales volume to operate our manufacturing facilities at optimum levels can preclude the Chemical Business from reaching full performance potential. Our primary efforts to improve the results of our Chemical Business

Table of Contents

include maximizing the production at our Chemical facilities and emphasizing our marketing efforts to customers that will accept the volatility risk inherent with natural gas and anhydrous ammonia, while maintaining a strong presence in the agricultural sector. In addition, see our discussion above under “Agricultural Products” of this Item 1 concerning the production of anhydrous ammonia that began at the Pryor Facility in 2010.

Bayer Agreement

During October 2008, subsidiaries within our Chemical Business, El Dorado Nitric Company (“EDN”) and EDC, entered into a new Nitric Acid Supply Operating and Maintenance Agreement (the “Bayer Agreement”) with Bayer, replacing a previous agreement between EDN, EDC and Bayer entered into during 1997. The Bayer Agreement became effective on June 24, 2009, and is for an initial term of five years, with certain renewal options.

Under the terms of the Bayer Agreement, Bayer purchases all of its requirements for nitric acid for use in Bayer’s chemical manufacturing complex located in Baytown, Texas from EDN at a price covering EDN’s costs plus a profit, with certain performance obligations on EDN’s part. EDN purchases from Bayer ammonia, certain utilities, chemical additives and services as required for production of nitric acid at the Baytown Facility.

On June 23, 2009, Bayer purchased all of the nitric acid production assets comprising the Baytown Facility (the “Baytown Assets”) from a third party, except certain assets that are owned by EDN for use in the production process. EDN continues to be responsible for the maintenance and operation of the Baytown Facility in accordance with the terms of the Bayer Agreement.

Pursuant to the terms of the Bayer Agreement, annual net sales after June 30, 2009 will decrease by approximately \$9.7 million primarily as a result of the elimination of the Baytown Facility’s lease expense, which was included in our sales price under the original Bayer agreement that was replaced by the Bayer Agreement. This elimination was the result of Bayer purchasing the Baytown Assets.

If there is a change in control of EDN, Bayer will have the right to terminate the Bayer Agreement upon payment of certain fees to EDN. See further discussion of the Bayer Agreement under “Liquidity and Capital Resources - Bayer Agreement” of Item 7 of Part II of this report.

Introduction of New Product

As part of the Clean Air Act, the United States Environmental Protection Agency (“EPA”) enacted emissions standards, which became effective beginning in 2010, that require the further reduction of nitrogen oxide emissions from diesel engines, starting with heavy-duty vehicles. CNC has developed a diesel exhaust fluid product (“DEF”) under the tradename, EarthPure DEFTM, specifically for this application. CNC began production of DEF in January 2010.

Seasonality

We believe that the only significant seasonal products are fertilizer and related chemical products sold by our Chemical Business to the agricultural industry. The selling seasons for those products are primarily during the spring and fall planting seasons, which typically extend from

Table of Contents

March through June and from September through November in the geographical markets in which the majority of our agricultural products are distributed. As a result, our Chemical Business typically increases its inventory of AN and UAN prior to the beginning of each planting season. In addition, the amount and timing of sales to the agricultural markets depend upon weather conditions and other circumstances beyond our control.

Regulatory Matters

Our Chemical Business is subject to extensive federal, state and local environmental laws, rules and regulations as discussed under "Environmental Matters" of this Item 1 and various risk factors under Item 1A.

Competition

Our Chemical Business competes with several chemical companies in our markets, such as Agrium, CF Industries, Dyno Nobel North America, Potash Corporation of Saskatchewan, Terra Industries and Yara North America, Inc., many of whom have greater financial and other resources than we do. We believe that competition within the markets served by our Chemical Business is primarily based upon service, price, location of production and distribution sites, and product quality and performance.

In addition, see discussion concerning potential increase of imported UAN under Item 1A of this Part 1.

Employees

As of December 31, 2009, we employed 1,749 persons. As of that date, our Climate Control Business employed 1,222 persons, none of whom was represented by a union, and our Chemical Business employed 455 persons, with 156 represented by unions under agreements that expire in July through November of 2010.

Environmental Matters

Our operations are subject to numerous environmental laws ("Environmental Laws") and to other federal, state and local laws regarding health and safety matters ("Health Laws"). In particular, the manufacture and distribution of chemical products are activities which entail environmental risks and impose obligations under the Environmental Laws and the Health Laws, many of which provide for certain performance obligations, substantial fines and criminal sanctions for violations. There can be no assurance that material costs or liabilities will not be incurred by us in complying with such laws or in paying fines or penalties for violation of such laws. The Environmental Laws and Health Laws and enforcement policies thereunder relating to our Chemical Business have in the past resulted, and could in the future result, in compliance expenses, cleanup costs, penalties or other liabilities relating to the handling, manufacture, use, emission, discharge or disposal of effluents at or from our facilities or the use or disposal of certain of its chemical products. Historically, significant expenditures have been incurred by subsidiaries within our Chemical Business in order to comply with the Environmental Laws and Health Laws and are reasonably expected to be incurred in the future.

Table of Contents

We are obligated to monitor certain discharge water outlets at our Chemical Business facilities should we discontinue the operations of a facility. We also have certain facilities in our Chemical Business that contain asbestos insulation around certain piping and heated surfaces, which we plan to maintain or replace, as needed, with non-asbestos insulation through our standard repair and maintenance activities to prevent deterioration.

1. Discharge Water Matters

The El Dorado Facility owned by EDC generates process wastewater, which includes cooling tower and boiler blowdowns, contact storm water and miscellaneous spills and leaks from process equipment. The process water discharge, storm-water runoff and miscellaneous spills and leaks are governed by a state National Pollutant Discharge Elimination System (“NPDES”) water discharge permit issued by the Arkansas Department of Environmental Quality (“ADEQ”), which permit is to be renewed every five years. The ADEQ issued to EDC a NPDES water discharge permit in 2004, and the El Dorado Facility had until June 1, 2007 to meet the compliance deadline for the more restrictive limits under the 2004 NPDES permit. In order to meet the El Dorado Facility’s June 2007 limits, the El Dorado Facility has significantly reduced the contaminant levels of its wastewater.

The El Dorado Facility has demonstrated its ability to comply with the more restrictive permit limits, and believes that if it is required to meet the more restrictive dissolved minerals permit levels, it will be able to do so. The El Dorado Facility is currently having discussions with the ADEQ to modify and reduce the permit levels as to dissolved minerals, but, although the rule is a state rule, any revisions must also be approved by the EPA before it can become effective. Once the rule change is complete, the permit limits can be modified to incorporate achievable dissolved minerals permit levels. The ADEQ and the El Dorado Facility also entered into a Consent Administrative Order (“CAO”) which authorized the El Dorado Facility to continue operating through December 31, 2009 without incurring permit violations pending the modification of the permit to implement the revised rule. In March 2009, the EPA notified the ADEQ that it disapproved the dissolved mineral rulemaking due to insufficient documentation. Representatives of EDC, ADEQ and the EPA have met to determine what additional information was required by the EPA. During January 2010, EDC received an Administrative Order from the EPA noting certain violations of the permit and requesting EDC to demonstrate compliance with the permit or provide a plan and schedule for returning to compliance. EDC has provided the EPA a response which states that the El Dorado Facility is now in compliance with the permit, that the El Dorado Facility expects to maintain compliance and that all but fifteen of the alleged violations were resolved through the CAO with the ADEQ. During the meeting with the EPA prior to the issuance of the Administrative Order, the EPA advised EDC that its primary objective is to bring the El Dorado Facility into compliance with the permit requirements, but reserved the right to assess penalties for past and continuing violations of the permit. As a result, it is unknown whether the EPA might elect to pursue civil penalties against EDC. Therefore, no liability has been established at December 31, 2009.

In addition, EDC has entered into a CAO that recognizes the presence of nitrate contamination in the shallow groundwater at the El Dorado Facility. EDC is addressing the shallow groundwater contamination. The CAO requires the El Dorado Facility to continue semi-annual groundwater

Table of Contents

monitoring, to continue operation of a groundwater recovery system and to submit a human health and ecological risk assessment to the ADEQ. The final remedy for shallow groundwater contamination, should any remediation be required, will be selected pursuant to the new CAO and based upon the risk assessment. The cost of any additional remediation that may be required will be determined based on the results of the investigation and risk assessment and cannot currently be reasonably estimated. Therefore, no liability has been established at December 31, 2009.

2. Air Matters

The EPA has sent information requests to most, if not all, of the nitric acid plants in the United States, including to us relating to our El Dorado, Cherokee and Baytown Facilities, requesting information under Section 114 of the Clean Air Act as to construction and modification activities at each of these facilities over a period of years to enable the EPA to determine whether these facilities are in compliance with certain provisions of the Clean Air Act. In connection with a review by our Chemical Business of these facilities in obtaining information for the EPA pursuant to the EPA's request, our Chemical Business management believes, subject to further review, investigation and discussion with the EPA, that certain changes to its production equipment may be needed in order to comply with the requirements of the Clean Air Act. If changes to the production equipment at these facilities are required in order to bring this equipment into compliance with the Clean Air Act, the amount of capital expenditures necessary in order to bring the equipment into compliance is unknown at this time but could be substantial.

Further, if it is determined that the equipment at any of our El Dorado, Cherokee and/or Baytown Facilities have not met the requirements of the Clean Air Act, our Chemical Business could be subject to penalties in an amount not to exceed \$27,500 per day as to each facility not in compliance and require such facility to be retrofitted with the "best available control technology." We believe this technology is already employed at the Baytown Facility. Currently, we believe that certain facilities within our Chemical Business may be required to pay certain penalties and may be required to make certain capital improvements to certain emission equipment as a result of the above described matter; however, at this time we are unable to determine the amount of any penalties that may be assessed, or the cost of additional capital improvements that may be required, by the EPA. Therefore no liability has been established at December 31, 2009.

3. Other Environmental Matters

In December 2002, two of our subsidiaries within our Chemical Business, sold substantially all of their operating assets relating to a Kansas chemical facility ("Hallowell Facility") but retained ownership of the real property. At December 31, 2002, even though we continued to own the real property, we did not assess our continuing involvement with our former Hallowell Facility to be significant and therefore accounted for the sale as discontinued operations. In connection with this sale, our subsidiary leased the real property to the buyer under a triple net long-term lease agreement. However, our subsidiary retained the obligation to be responsible for, and perform the activities under, a previously executed consent order to investigate the surface and subsurface contamination at the real property and a corrective action strategy based on the investigation. In addition, certain of our subsidiaries agreed to indemnify the buyer of such assets for these

Table of Contents

environmental matters. The successor (“Chevron”) of a prior owner of the Hallowell Facility is a participating responsible party and has agreed, within certain limitations, to pay and has been paying one-half of the costs relating to this matter as approved by the Kansas Department of Environmental Quality, subject to reallocation.

Based on additional modeling of the site, our subsidiary and Chevron are pursuing a course with the state of Kansas of long-term surface and groundwater monitoring to track the natural decline in contamination, instead of the soil excavation proposed previously. Our subsidiary and Chevron submitted its final report on the groundwater monitoring and an addendum to the Mitigation Work Plan to the state of Kansas. The data from the monitoring program is being evaluated by the state of Kansas and the potential costs of additional monitoring or required remediation, if any, is unknown.

At December 31, 2009, our estimated allocable portion of the total estimated liability (which is included in current and noncurrent accrued and other liabilities) in connection with this remediation matter is approximately \$305,000. This amount is not discounted to its present value. It is reasonably possible that a change in the estimate of our liability will occur in the near term.

ITEM 1A. RISK FACTORS

Risks Related to Us and Our Business

Cost and the lack of availability of raw materials could materially affect our profitability and liquidity.

Our sales and profits are heavily affected by the costs and availability of primary raw materials. These primary raw materials, which are purchased from unrelated third parties, are subject to considerable price volatility. Historically, when there have been rapid increases in the cost of these primary raw materials, we have sometimes been unable to timely increase our sales prices to cover all of the higher costs incurred. While we periodically enter into futures/forward contracts to economically hedge against price increases in certain of these raw materials, there can be no assurance that we will effectively manage against price fluctuations in those raw materials.

Anhydrous ammonia, natural gas and sulfur represent the primary raw material feedstocks in the production of most of the products of the Chemical Business. Although our Chemical Business has a program to enter into contracts with certain customers that provide for the pass-through of raw material costs, we have a substantial amount of sales that do not provide for the pass-through of raw material costs. In addition, the Climate Control Business depends on raw materials such as copper and steel, which have shown considerable price volatility. As a result, in the future, we may not be able to pass along to all of our customers the full amount of any increases in raw material costs. There can be no assurance that future price fluctuations in our raw materials will not have an adverse effect on our financial condition, liquidity and results of operations.

Table of Contents

Additionally, we depend on certain vendors to deliver the primary raw materials and other key components that are required in the production of our products. Any disruption in the supply of the primary raw materials and other key components could result in lost production or delayed shipments. We have suspended in the past, and could suspend in the future, production at our chemical facilities due to, among other things, the high cost or lack of availability of such primary raw materials, which could adversely impact our competitiveness in the markets we serve. Accordingly, our financial condition, liquidity and results of operations could be materially affected in the future by the lack of availability of primary raw materials and other key components.

Our Climate Control and Chemical Businesses and their customers are sensitive to adverse economic cycles.

Our Climate Control Business can be affected by cyclical factors, such as interest rates, inflation and economic downturns. Our Climate Control Business depends on sales to customers in the construction and renovation industries, which are particularly sensitive to these factors. Due to the current recession, we have experienced and expect to continue to experience a decline in both commercial and residential construction. A decline in the economic activity in the United States has in the past, and could in the future, have a material adverse effect on us and our customers in the construction and renovation industries in which our Climate Control Business sells a substantial amount of its products. Such a decline could result in a decrease in revenues and profits, and an increase in bad debts, in our Climate Control Business and could have a material adverse effect on our operating results, financial condition and liquidity.

Our Chemical Business also can be affected by cyclical factors such as inflation, global energy policy and costs, global market conditions and economic downturns in specific industries. Certain sales of our Chemical Business are sensitive to the level of activity in the agricultural, mining, automotive and housing industries. Certain of our industrial and mining customers have been affected and we expect will continue to be affected by the current economic recession and could substantially reduce their purchases. A substantial decline in the activity of our Chemical Business has in the past, and could in the future, have a material adverse effect on the results of our Chemical Business and on our liquidity and capital resources.

Weather conditions adversely affect our Chemical Business.

The agricultural products produced and sold by our Chemical Business have in the past, and could in the future, be materially affected by adverse weather conditions (such as excessive rains or drought) in the primary markets for our fertilizer and related agricultural products. If any of these unusual weather events occur during the primary seasons for sales of our agricultural products (March-June and September-November), this could have a material adverse effect on the agricultural sales of our Chemical Business and our financial condition and results of operations.

Environmental and regulatory matters entail significant risk for us.

Our Chemical Business is subject to numerous environmental laws and regulations. The manufacture and distribution of chemical products are activities, which entail environmental

Table of Contents

risks and impose obligations under environmental laws and regulations, many of which provide for substantial fines and potential criminal sanctions for violations. Although we have established processes to monitor, review and manage our businesses to comply with the numerous environmental laws and regulations, our Chemical Business has in the past, and may in the future, be subject to fines, penalties and sanctions for violations and substantial expenditures for cleanup costs and other liabilities relating to the handling, manufacture, use, emission, discharge or disposal of effluents at or from the Chemical Business' facilities. Further, a number of our Chemical Business' facilities are dependent on environmental permits to operate, the loss or modification of which could have a material adverse effect on their operations and our financial condition.

We may be required to expand our security procedures and install additional security equipment for our Chemical Business in order to comply with current and possible future government regulations, including the Homeland Security Act of 2002.

The chemical industry in general, and producers and distributors of anhydrous ammonia and AN specifically, are scrutinized by the government, industry and public on security issues. Under current and proposed regulations, including the Homeland Security Act of 2002, we may be required to incur substantial additional costs relating to security at our chemical facilities and distribution centers, as well as in the transportation of our products. These costs could have a material impact on our financial condition, results of operations, and liquidity. The cost of such regulatory changes, if significant enough, could lead some of our customers to choose alternate products to anhydrous ammonia and AN, which would have a significant impact on our Chemical Business.

Proposed governmental laws and regulations relating to greenhouse gas emissions may subject certain of our Chemical Business' facilities to significant new costs and restrictions on their operations.

Certain of the manufacturing facilities within our Chemical Business use significant amounts of electricity, natural gas and other raw materials necessary for the production of their chemical products that result, or could result, in certain greenhouse gas emissions into the environment. Federal and state courts and administrative agencies are considering the scope and scale of greenhouse gas emission regulation. There are bills pending in Congress that would regulate greenhouse gas emissions through a cap-and-trade system under which emitters would be required to either install abatement systems where feasible or buy allowances for offsets of emissions of greenhouse gas. In addition, the EPA has announced its determination that greenhouse gases threaten the public's health and welfare and thus could make them subject to regulation under the Clean Air Act. However this determination is being contested. The EPA has instituted a mandatory greenhouse gas reporting requirement beginning in 2010, which will impact all of our chemical manufacturing sites. Greenhouse gas regulation could increase the price of the electricity purchased by these chemical facilities and increase costs for our use of natural gas, other raw materials (such as anhydrous ammonia), and other energy sources, potentially restrict access to or the use of natural gas and certain other raw materials necessary to produce certain of our chemical products and require us to incur substantial expenditures to retrofit these chemical facilities to comply with the proposed new laws and regulations

Table of Contents

regulating greenhouse gas emissions, if adopted. Federal, state and local governments may also pass laws mandating the use of alternative energy sources, such as wind power and solar energy, which may increase the cost of energy use in certain of our chemical and other manufacturing operations. While future emission regulations or new laws appear likely, it is too early to predict how these regulations, if and when adopted, will affect our businesses, operations, liquidity or financial results.

A substantial portion of our sales is dependent upon a limited number of customers.

During 2009, eight customers of our Chemical Business accounted for approximately 50% of its net sales and 24% of our consolidated sales, and our Climate Control Business had four customers (including affiliates and their distributors) that accounted for approximately 27% of its net sales and 13% of our consolidated sales. The loss of, or a material reduction in purchase levels by, one or more of these customers could have a material adverse effect on our business and our results of operations, financial condition and liquidity if we are unable to replace a customer on substantially similar terms.

There is intense competition in the Climate Control and Chemical industries.

Substantially all of the markets in which we participate are highly competitive with respect to product quality, price, design innovations, distribution, service, warranties, reliability and efficiency. We compete with a number of companies that have greater financial, marketing and other resources. Competitive factors could require us to reduce prices or increase spending on product development, marketing and sales that would have a material adverse effect on our business, results of operation and financial condition.

Potential increase of imported ammonium nitrate from Russia.

In 2000, the United States ("U.S.") and Russia entered into a suspension agreement limiting the quantity of, and setting the minimum prices for, fertilizer grade AN sold from Russia into the U.S.

The Russians have requested that the suspension agreement be changed to only require that the prices of its imported AN reflect the Russian producers full production costs, plus profit. The Russian producers of AN could benefit from state set prices of natural gas, the principal raw material for AN, which could be less than what U.S. producers are required to pay for their natural gas. Other factors, however, such as transportation costs may partially offset natural gas and production cost advantages. This change, if accepted by the U.S., could result in a substantial increase in the amount of AN imported into the U.S. from Russia at prices that could be less than the cost to produce AN by U.S. producers plus a profit. Russia is the world's largest producer of fertilizer grade AN, and we are led to believe that it has substantial excess AN production capacity.

For 2009, net sales of fertilizer grade AN accounted for 24% and 12% of our Chemical Business net sales and consolidated net sales, respectively. If the suspension agreement is changed, as discussed above, this change could result in Russia substantially increasing the amount of AN

Table of Contents

sold in the U.S. at prices less than the U.S. producers are required to charge in order to cover their cost plus a profit, and could have an adverse effect on our revenues and operating results.

Potential increase of imported urea ammonium nitrate (UAN).

A large percentage of the domestic UAN market is supplied by imports. Significant additional UAN production in the Caribbean is expected to begin in 2010, and such UAN production is expected to be marketed in the United States. This increased foreign production of UAN is expected to have a lower cost of production than UAN produced in the United States, and could have an adverse impact on the domestic UAN market, and the domestic fertilizer market in general, including the UAN and fertilizer markets of our Chemical Business, by increasing supply and possibly reducing prices.

We are effectively controlled by the Golsen Group.

Jack E. Golsen, our Chairman of the Board and Chief Executive Officer (“CEO”), members of his immediate family (spouse and children), including Barry H. Golsen, our Vice Chairman and President, entities owned by them and trusts for which they possess voting or dispositive power as trustee (collectively, the “Golsen Group”) beneficially owned as of February 28, 2010, an aggregate of 3,594,843 shares of our common stock and 1,020,000 shares of our voting preferred stock (1,000,000 of which shares have .875 votes per share, or 875,000 votes), which together votes as a class and represent approximately 20.3% of the voting power of our issued and outstanding voting securities as of that date. In addition, the Golsen Group also beneficially owned options and other convertible securities that allowed its members to acquire an additional 208,500 shares of our common stock within 60 days of February 28, 2010. Thus, the Golsen Group may be considered to effectively control us. As a result, the ability of other stockholders to influence our management and policies could be limited.

Loss of key personnel could negatively affect our business.

We believe that our performance has been and will continue to be dependent upon the efforts of our principal executive officers. We cannot promise you that our principal executive officers will continue to be available. Jack E. Golsen has an employment agreement with us. No other principal executive has an employment agreement with us. The loss of some of our principal executive officers could have a material adverse effect on us. We believe that our future success will depend in large part on our continued ability to attract and retain highly skilled and qualified personnel.

We may have inadequate insurance.

While we maintain liability insurance, including certain coverage for environmental contamination, it is subject to coverage limits and policies may exclude coverage for some types of damages (which may include warranty and product liability claims). Although there may currently be sources from which such coverage may be obtained, it may not continue to be available to us on commercially reasonable terms or the possible types of liabilities that may be incurred by us may not be covered by our insurance. In addition, our insurance carriers may not be able to meet their obligations under the policies or the dollar amount of the liabilities may

Table of Contents

exceed our policy limits. Even a partially uninsured claim, if successful and of significant magnitude, could have a material adverse effect on our business, results of operations, financial condition and liquidity.

Many of our insurance policies are written by Chartis, Inc., a subsidiary of AIG, and AIG has experienced and is continuing to experience financial difficulties.

It has been publicly reported that American International Group, Inc. (“AIG”) has experienced significant financial difficulties and is continuing to experience significant financial difficulties. AIG is a holding company for several different subsidiary insurance companies, which are now known as Chartis, Inc. Chartis provides many of our casualty, workers compensation and other insurance policies, including, but not limited to, our general liability policy, which includes certain pollution coverage, excess umbrella policy, and officer and director liability policy covering us and our officers and directors against certain securities’ law claims. We are currently involved in certain legal proceedings in which a subsidiary of AIG has agreed to defend and to indemnify us and our subsidiaries against loss under a reservation of rights, including one matter involving one of our executive officers. In the event of a failure of AIG and/or its subsidiaries, it is unknown whether AIG or the applicable subsidiary that is the insurer under our policies or the applicable regulatory authorities can comply with the insurer’s obligations under our policies. Further, in the event of a failure by AIG and/or its subsidiaries, we could be required to replace these policies. If it becomes necessary to replace the policies written by Chartis, it may be difficult or impossible to replace these policies or, if we can replace these policies, to replace them on substantially similar terms as our existing insurance policies.

We have not paid dividends on our outstanding common stock in many years.

Although we have paid dividends on our outstanding series of preferred stock (two of the three outstanding series of preferred stock are owned by the Golsen Group), we have not paid cash dividends on our outstanding common stock in many years, and we do not currently anticipate paying cash dividends on our outstanding common stock. However, our board of directors has not made a decision whether or not to pay such dividends in 2010.

Terrorist attacks and other acts of violence or war, and natural disasters (such as hurricanes, pandemic health crisis, etc.), have and could negatively impact U.S. and foreign companies, the financial markets, the industries where we operate, our operations and profitability.

Terrorist attacks and natural disasters (such as hurricanes) have in the past, and can in the future, negatively affect our operations. We cannot predict further terrorist attacks and natural disasters in the U.S. and elsewhere. These attacks or natural disasters have contributed to economic instability in the U.S. and elsewhere, and further acts of terrorism, violence, war or natural disasters could further affect the industries where we operate, our ability to purchase raw materials, our business, results of operations and financial condition. In addition, terrorist attacks and natural disasters may directly impact our physical facilities, especially our chemical facilities, or those of our suppliers or customers and could impact our sales, our production capability and our ability to deliver products to our customers. In the past, hurricanes affecting

Table of Contents

the Gulf Coast of the U.S. have negatively impacted our operations and those of our customers. The consequences of any terrorist attacks or hostilities or natural disasters are unpredictable, and we may not be able to foresee events that could have an adverse effect on our operations.

We are a holding company and depend, in large part, on receiving funds from our subsidiaries to fund our indebtedness.

Because we are a holding company and operations are conducted through our subsidiaries, principally ThermaClime and its subsidiaries, our ability to make scheduled payments of principal and interest on our indebtedness depends, in large part, on the operating performance and cash flows of our subsidiaries and the ability of our subsidiaries to make distributions and pay dividends to us. Under its loan agreements, ThermaClime and its subsidiaries may only make distributions and pay dividends to us under limited circumstances and in limited amounts.

Our net operating loss carryforwards are subject to certain limitations and examination.

We had generated significant net operating loss (“NOL”) carryforwards from certain historical losses. During recent years, we have utilized all of the remaining federal NOL carryforwards and a portion of our state NOL carryforwards. The utilization of these NOL carryforwards has reduced our income tax liabilities. The federal tax returns for 1997 through 2005 remain subject to examination for the purpose of determining the amount of remaining tax NOL and other carryforwards. With few exceptions, the 2006-2008 years remain open for all purposes of examination by the Internal Revenue Service (“IRS”) and other major tax jurisdictions.

Future issuance or potential issuance of our common stock could adversely affect the price of our common stock, our ability to raise funds in new stock offerings and dilute your percentage interest in our common stock.

Future sales of substantial amounts of our common stock or equity-related securities in the public market, or the perception that such sales could occur, could adversely affect prevailing trading prices of our common stock and could impair our ability to raise capital through future offerings of equity or equity-related securities. No prediction can be made as to the effect, if any, that future sales of shares of common stock or the availability of shares of common stock for future sale will have on the trading price of our common stock. Such future sales could also significantly reduce the percentage ownership of our existing common stockholders.

We are subject to a variety of factors that could discourage other parties from attempting to acquire us.

Our certificate of incorporation provides for a staggered board of directors and, except in limited circumstances, a two-thirds vote of outstanding voting shares to approve a merger, consolidation or sale of all, or substantially all, of our assets. In addition, we have entered into severance agreements with our executive officers and some of the executive officers of our subsidiaries that provide, among other things, that if, within a specified period of time after the occurrence of a change in control of our company, these officers are terminated, other than for cause, or the officer terminates his employment for good reason, we must pay such officer an amount equal to 2.9 times the officer’s average annual gross salary for the last five years preceding the change in control.

Table of Contents

We have authorized and unissued (including shares held in treasury) 53,774,267 shares of common stock and 4,229,490 shares of preferred stock as of December 31, 2009. These unissued shares could be used by our management to make it more difficult, and thereby discourage an attempt to acquire control of us.

We have adopted a preferred share purchase plan, which is designed to protect us against certain creeping acquisitions, open market purchases and certain mergers and other combinations with acquiring companies.

The foregoing provisions and agreements are designed to discourage a third party tender offer, proxy contest, or other attempts to acquire control of us and could have the effect of making it more difficult to remove incumbent management.

Delaware has adopted an anti-takeover law which, among other things, will delay for three years business combinations with acquirers of 15% or more of the outstanding voting stock of publicly-held companies (such as us), unless;

- prior to such time the board of directors of the corporation approved the business combination that results in the stockholder becoming an invested stockholder;
- the acquirer owned at least 85% of the outstanding voting stock of such company prior to commencement of the transaction;
- two-thirds of the stockholders, other than the acquirer, vote to approve the business combination after approval thereof by the board of directors; or
- the stockholders of the corporation amends its articles of incorporation or by-laws electing not to be governed by this provision.

ITEM 1B. UNRESOLVED STAFF COMMENTS

Not applicable.

ITEM 2. PROPERTIES

Climate Control Business

Our Climate Control Business manufactures most of its geothermal and water source heat pump products in a 270,000 square foot facility in Oklahoma City, Oklahoma. We lease this facility, with an option to buy, through May 2016, with options to renew for three additional five-year periods. For 2009, approximately 53% of the productive capacity of this manufacturing facility was being utilized, based primarily on two ten-hour shifts per day and a four-day workweek. In addition, we own a 46,000 square foot building subject to a mortgage, which is adjacent to our existing heat pump manufacturing facility, primarily used for storage of raw material inventory. In addition, we utilize approximately 110,000 square feet of an existing facility for a distribution center, which facility is subject to a mortgage. We also have expanded our geothermal and water source heat pump plant manufacturing facility with a 70,000 square foot addition primarily for raw material storage.

Table of Contents

Our Climate Control Business conducts its fan coil manufacturing operation in a facility located in Oklahoma City, Oklahoma, consisting of approximately 265,000 square feet. We own this facility subject to a mortgage. For 2009, our fan coil manufacturing operation was using 48% of the productive capacity, based primarily on two ten-hour shifts per day and a four-day workweek.

Our Climate Control Business conducts its large air handler manufacturing operation in a facility located in Oklahoma City, Oklahoma, consisting of approximately 110,000 square feet. We own this facility subject to a mortgage. For 2009, approximately 69% of the productive capacity of this manufacturing facility was being utilized, based primarily on a one eight-hour shift on a five-day workweek and a partial second shift in selected areas.

All of the properties utilized by our Climate Control Business are suitable to meet the current needs of that business.

Chemical Business

Our Chemical Business primarily conducts manufacturing operations (a) on 150 acres of a 1,400 acre tract of land located at the El Dorado Facility, (b) on 160 acres of a 1,300 acre tract of land located at the Cherokee Facility and (c) on property within Bayer's complex in the Baytown, Texas. In addition, we are in the process of restarting our previously idled Pryor Facility located on 58 acres in Pryor, Oklahoma. The Company and/or its subsidiaries own all of its manufacturing facilities except the Baytown Facility. Except for certain assets that are owned by EDN for use in the production process within the Baytown Facility, the Baytown Facility is owned by Bayer. EDN operates and maintains the Baytown Facility pursuant to the Bayer Agreement as discussed under "Bayer Agreement" of Item 1 of this report. Certain real property and equipment located at the El Dorado and Cherokee Facilities are being used to secure a \$50 million term loan. For 2009, the following facilities were utilized based on continuous operation:

	Percentage of Capacity
El Dorado Facility (1)	76%
Cherokee Facility (2)	100%
Baytown Facility	61%

(1) The percentage of capacity for the El Dorado Facility relates to its nitric acid capacity. The El Dorado Facility has capacity to produce other nitrogen products in excess of its nitric acid capacity.

(2) The percentage of capacity for the Cherokee Facility relates to its ammonia production capacity. The Cherokee Facility has additional capacity for nitric acid, AN and UAN in excess of its ammonia capacity.

In addition to the El Dorado and Cherokee Facilities, our Chemical Business distributes its agricultural products through 15 wholesale and retail distribution centers, with 13 of the centers located in Texas (10 of which we own and 3 of which we lease); 1 center located in Tennessee (owned); and 1 center located in Missouri (owned).

Table of Contents

See discussion above under “Chemical Business - Agricultural Products” of Item 1 concerning production of anhydrous ammonia in 2010 from the Pryor Facility.

All of the properties utilized by our Chemical Business are suitable and adequate to meet the current needs of that business.

ITEM 3. LEGAL PROCEEDINGS

1. Environmental See “Business-Environmental Matters” for a discussion as to:

- certain environmental matters relating to air and water issues at our El Dorado Facility; and
- certain environmental remediation matters at our former Hallowell Facility.

2. Other

The Jayhawk Group

In November 2006, we entered into an agreement with Jayhawk Capital Management, LLC, Jayhawk Investments, L.P., Jayhawk Institutional Partners, L.P. and Kent McCarthy, the manager and sole member of Jayhawk Capital, (collectively, the “Jayhawk Group”), in which the Jayhawk Group agreed, among other things, that if we undertook, in our sole discretion, within one year from the date of agreement a tender offer for our Series 2 \$3.25 convertible, exchangeable Class C preferred stock (“Series 2 Preferred”) or to issue our common stock for a portion of our Series 2 Preferred pursuant to a private exchange, that it would tender or exchange an aggregate of no more than 180,450 shares of the 340,900 shares of the Series 2 Preferred beneficially owned by the Jayhawk Group, subject to, among other things, the entities owned and controlled by Jack E. Golsen, our Chairman and Chief Executive Officer (“Golsen”), and his immediate family, that beneficially own Series 2 Preferred only being able to exchange or tender approximately the same percentage of shares of Series 2 Preferred beneficially owned by them as the Jayhawk Group is able to tender or exchange under the terms of the agreement. In addition, under the agreement, the Jayhawk Group agreed to vote its shares of our common stock and Series 2 Preferred “for” an amendment to the Certificate of Designation covering the Series 2 Preferred to allow us:

- for a period of five years from the completion of an exchange or tender to repurchase, redeem or otherwise acquire shares of our common stock, without approval of the outstanding Series 2 Preferred irrespective that dividends are accrued and unpaid with respect to the Series 2 Preferred; or
- to provide that holders of Series 2 Preferred may not elect two directors to our board of directors when dividends are unpaid on the Series 2 Preferred if less than 140,000 shares of Series 2 Preferred remain outstanding.

During 2007, we made a tender offer for our outstanding Series 2 Preferred at the rate of 7.4 shares of our common stock for each share of Series 2 Preferred so tendered. In July 2007, we redeemed the balance of our outstanding shares of Series 2 Preferred. Pursuant to its terms, the Series 2 Preferred was convertible into 4.329 shares of our common stock for each share of

Table of Contents

Series 2 Preferred. As a result of the redemption, the Jayhawk Group converted the balance of its Series 2 Preferred pursuant to the terms of the Series 2 Preferred in lieu of having its shares redeemed.

During November 2008, the Jayhawk Group filed suit against us and Golsen in a lawsuit styled Jayhawk Capital Management, LLC, et al. v. LSB Industries, Inc., et al., in the United States District Court for the District of Kansas at Kansas City. During March 2009, the Jayhawk Group amended its complaint alleging that the Jayhawk Group should have been able to tender all of its Series 2 Preferred pursuant to the tender offer, notwithstanding the above-described agreement, based on the following claims against us and Golsen:

- fraudulent inducement and fraud,
- violation of 10(b) of the Exchange Act and Rule 10b-5,
- violation of 17-12A501 of the Kansas Uniform Securities Act, and
 - breach of contract.

The Jayhawk Group seeks damages in an unspecified amount based on the additional number of common shares it allegedly would have received on conversion of all of its Series 2 Preferred through the February 2007 tender offer, plus punitive damages. In addition, the amended complaint seeks damages of approximately \$4,000,000 for accrued and unpaid dividends it purports are owed as a result of Jayhawk's July 2007 conversion of its remaining shares of Series 2 Preferred. In May 2008, the General Counsel for the Jayhawk Group offered to settle its claims against us and Golsen in return for a payment of \$100,000, representing the approximate legal fees it had incurred investigating the claims at that time. Through counsel, we verbally agreed to the settlement offer and confirmed the agreement by e-mail. Afterward, the Jayhawk Group's General Counsel purported to withdraw the settlement offer, and asserted that Jayhawk is not bound by any settlement agreement. We contend that the settlement agreement is binding on the Jayhawk Group. Both Golsen and we have filed motions to dismiss the plaintiff's complaint in the federal court, and such motions to dismiss are pending. We intend to contest the lawsuit vigorously, and will assert that Jayhawk is bound by an agreement to settle the claims for \$100,000. Our insurer, Chartis, has agreed to defend this lawsuit on our behalf and on behalf of Golsen and to indemnify under a reservation of rights to deny liability under certain conditions. We have incurred expenses associated with this matter up to our insurance deductible of \$250,000. We believe our insurance coverage is adequate to cover any currently foreseeable losses associated with the Jayhawk claims. As a result, no liability remains outstanding relating to this matter as of December 31, 2009.

Other Claims and Legal Actions

Wetherall v. Climate Master was a proposed class action filed in the Illinois state district court in September 2007 alleging that certain evaporator coils sold by one of our subsidiaries in the Climate Control Business, Climate Master, Inc. ("Climate Master"), in the state of Illinois from 1990 to approximately 2003 were defective. Prior to the hearing on class certification, the trial court granted Climate Master's motion for summary judgment and entered judgment in favor of Climate Master and against the plaintiffs based upon the statute of limitations and further denied class certification as moot because there were no other class representatives. Prior to the appeal

Table of Contents

deadline, a settlement agreement was entered into between the plaintiffs and Climate Master whereby the plaintiffs waived any right to appeal the judgment in favor of Climate Master for an insignificant amount, which consideration has been paid by Climate Master.

We are also involved in various other claims and legal actions including claims covered by our general liability insurance, which generally includes a deductible of \$250,000 per claim. For any claims or legal actions that management, after consultation with legal counsel, assessed the likelihood of our liability as probable, we have recognized an estimated liability up to the applicable deductible. In the opinion of management, after consultation with legal counsel, if those claims which we have not recognized were determined adversely to us, it would not have a material effect on our business, financial condition or results of operations.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

Not applicable.

EXECUTIVE OFFICERS OF THE REGISTRANT

Our officers serve one-year terms, renewable on an annual basis by the board of directors. Information regarding the Company's executive officers is as follows:

Jack E. Golsen (1) - Chairman of the Board and Chief Executive Officer. Mr. Golsen, age 81 first became a director in 1969. His term will expire in 2010. Mr. Golsen, founder of the Company, is our Chairman of the Board of Directors and Chief Executive Officer and has served in those capacities since our inception in 1969. Mr. Golsen served as our President from 1969 until 2004. During 1996, he was inducted into the Oklahoma Commerce and Industry Hall of Honor as one of Oklahoma's leading industrialists. Mr. Golsen has a Bachelor of Science degree from the University of New Mexico. Mr. Golsen is a Trustee of Oklahoma City University. During his career, he acquired or started the companies which formed LSB. He has served on the boards of insurance companies, several banks and was Board Chairman of Equity Bank for Savings N.A., which was formerly owned by LSB. In 1972, Mr. Golsen was recognized nationally as the person who prevented a widespread collapse of the Wall Street investment banking industry. Refer to "The Second Crash" by Charles Ellis, and five additional books about the Wall Street crisis.

Barry H. Golsen (1) - Vice Chairman of the Board, President, and President of the Climate Control Business. Mr. Golsen, age 59, first became a director in 1981. His term will expire in 2012. Mr. Golsen was elected President of the Company in 2004. Mr. Golsen has served as our Vice Chairman of the Board of Directors since August 1994, and has been the President of our Climate Control Business for more than five years. Mr. Golsen also served as a director of the Oklahoma branch of the Federal Reserve Bank. Mr. Golsen has both his undergraduate and law degrees from the University of Oklahoma.

David R. Goss - Executive Vice President of Operations and Director. Mr. Goss, age 69, first became a director in 1971. His term will expire in 2012. Mr. Goss, a certified public accountant, is our Executive Vice President of Operations and has served in substantially the same capacity for more than five years. Mr. Goss is a graduate of Rutgers University.

Table of Contents

Tony M. Shelby - Executive Vice President of Finance and Director. Mr. Shelby, age 68, first became a director in 1971. His term will expire in 2011. Mr. Shelby, a certified public accountant, is our Executive Vice President of Finance and Chief Financial Officer, a position he has held for more than five years. Prior to becoming our Executive Vice President of Finance and Chief Financial Officer, he served as Chief Financial Officer of a subsidiary of the Company and was with the accounting firm of Arthur Young & Co., a predecessor to Ernst & Young LLP. Mr. Shelby is a graduate of Oklahoma City University.

Jim D. Jones (2) - Senior Vice President and Treasurer. Mr. Jones, age 67, has been Senior Vice President and Treasurer since July 2003, and has served as an officer of the Company since April 1977. Mr. Jones is a certified public accountant and was with the accounting firm of Arthur Young & Co., a predecessor to Ernst & Young LLP. Mr. Jones is a graduate of the University of Central Oklahoma.

David M. Shear (1) - Senior Vice President and General Counsel. Mr. Shear, age 50, has been Senior Vice President since July 2004 and General Counsel and Secretary since 1990. Mr. Shear attended Brandeis University, graduating cum laude in 1981. At Brandeis University, Mr. Shear was the founding Editor-In-Chief of Chronos, the first journal of undergraduate scholarly articles. Mr. Shear attended the Boston University School of Law, where he was a contributing Editor of the Annual Review of Banking Law. Mr. Shear acted as a staff attorney at the Bureau of Competition with the Federal Trade Commission from 1985 to 1986. From 1986 through 1989, Mr. Shear was an associate in the Boston law firm of Weiss, Angoff, Coltin, Koski and Wolf.

Michael D. Tepper – Senior Vice President of International Operations. Mr. Tepper, age 71, has served in substantially the same capacity for more than five years. Mr. Tepper is a graduate of the Wharton School of the University of Pennsylvania.

Michael G. Adams - Vice President and Corporate Controller. Mr. Adams, age 60, was appointed to this position effective October 16, 2008 and has served as an officer of the Company since March 1990. Mr. Adams is a certified public accountant and was with the accounting firm of Arthur Young & Co., a predecessor to Ernst & Young LLP. Mr. Adams is a graduate of the University of Oklahoma.

Harold L. Rieker Jr. - Vice President and Principal Accounting Officer. Mr. Rieker, age 49, was appointed to this position effective October 16, 2008 and has served as an officer of the Company since March 2006. Mr. Rieker is a certified public accountant and was with the accounting firm of Grant Thornton LLP. Mr. Rieker is a graduate of the University of Central Oklahoma.

(1) Barry H. Golsen is the son of Jack E. Golsen and David M. Shear is married to the niece of Jack E. Golsen.

(2) As previously disclosed, the Company and Mr. Jones entered into a settlement order with the SEC. Under the order, the Company and Mr. Jones agreed, without admitting or denying any wrongdoing, not to commit violations of certain provisions of the Securities Exchange Act of 1934, as amended. Mr. Jones also consented not to appear before the SEC as an accountant, but can apply for reinstatement at any time after July 2011.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market Information

On October 28, 2008, our common stock began trading on the New York Stock Exchange under the symbol "LXU". Prior to that date, our common stock traded on the American Stock Exchange under the same symbol. The following table shows, for the periods indicated, the high and low sales prices.

Quarter	Year Ended December 31,			
	2009		2008	
	High	Low	High	Low
First	\$ 10.87	\$ 6.62	\$ 28.80	\$ 13.80
Second	\$ 18.16	\$ 9.67	\$ 20.83	\$ 13.45
Third	\$ 18.31	\$ 14.85	\$ 24.59	\$ 13.11
Fourth	\$ 15.70	\$ 10.62	\$ 14.67	\$ 6.65

Stockholders

As of February 28, 2010, we had 665 record holders of our common stock. This number does not include investors whose ownership is recorded in the name of their brokerage company.

Dividends

We are a holding company and, accordingly, our ability to pay cash dividends on our preferred stock and our common stock depends in large part on our ability to obtain funds from our subsidiaries. The ability of ThermaClime (which owns substantially all of the companies comprising the Climate Control Business and Chemical Business) and its wholly-owned subsidiaries to pay dividends and to make distributions to us is restricted by certain covenants contained in the \$50 million revolving credit facility (the "Working Capital Revolver Loan") and the \$50 million loan agreement due 2012 (the "Secured Term Loan"). Under the terms of these agreements, ThermaClime cannot transfer funds to us in the form of cash dividends or other distributions or advances, except for:

- the amount of income taxes that ThermaClime would be required to pay if they were not consolidated with us;
- an amount not to exceed fifty percent (50%) of ThermaClime's consolidated net income during each fiscal year determined in accordance with generally accepted accounting principles plus amounts paid to us within the first bullet above, provided that certain other conditions are met;
- the amount of direct and indirect costs and expenses incurred by us on behalf of ThermaClime pursuant to a certain services agreement;

Table of Contents

- amounts under a certain management agreement between us and ThermaClime, provided certain conditions are met, and
- outstanding loans entered into subsequent to November 2, 2007 in excess of \$2.0 million at any time.

In 2001, we issued shares of Series D 6% cumulative, convertible Class C preferred stock ("Series D Preferred") and in 1985, we issued shares of Series B 12% convertible, cumulative preferred stock ("Series B Preferred"). As of December 31, 2009, we have issued and outstanding 1,000,000 shares of Series D Preferred, 20,000 shares of Series B Preferred, and 511 shares of noncumulative redeemable preferred stock ("Noncumulative Preferred"). Each share of preferred stock is entitled to receive an annual dividend, only when declared by our board of directors, payable as follows:

- Series D Preferred at the rate of \$.06 a share payable on October 9, which dividend is cumulative;
- Series B Preferred at the rate of \$12.00 a share payable January 1, which dividend is cumulative; and
 - Noncumulative Preferred at the rate of \$10.00 a share payable April 1, which is noncumulative.

On February 18, 2010, our board of directors declared the following dividends:

- \$.06 per share on our outstanding Series D Preferred for an aggregate dividend of \$60,000, payable on March 31, 2010;
- \$12.00 per share on our outstanding Series B Preferred for an aggregate dividend of \$240,000, payable on March 31, 2010; and
- \$10.00 per share on our outstanding Noncumulative Preferred for an aggregate dividend of approximately \$5,100, payable on April 1, 2010.

All shares of Series D Preferred and Series B Preferred are owned by the Golsen Group.

Holders of our common stock are entitled to receive dividends only when and if declared by our board of directors. We have not paid cash dividends on our outstanding common stock in many years, and we do not currently anticipate paying cash dividends on our outstanding common stock in the near future. However, our board of directors has not made a decision whether or not to pay such dividends on our common stock in 2010.

Equity Compensation Plans

See discussions relating to our equity compensation plans under Item 12 of Part III contained in this report.

Table of Contents

Purchases of Equity Securities by the Issuer and Affiliated Purchasers

Common Stock - During the three months ended December 31, 2009, the Company and affiliated purchasers, as defined, purchased treasury stock as shown in the following table:

Period	(a) Total number of shares of common stock acquired (1)	(b) Average price paid per share of common stock (1)	(c) Total number of shares of common stock purchased as part of publicly announced plans or programs (2)	(d) Maximum number (or approximate dollar value) of shares of common stock that may yet be purchased under the plans or programs
October 1, 2009 - October 31, 2009	-	\$ -	-

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") should be read in conjunction with a review of the other Items included in this Form 10-K and our December 31, 2009 Consolidated Financial Statements included elsewhere in this report. Certain statements contained in this MD&A may be deemed to be forward-looking statements. See "Special Note Regarding Forward-Looking Statements."

Overview

General

We are a manufacturing, marketing and engineering company, operating through our subsidiaries. Our wholly-owned subsidiary, ThermaClime, through its subsidiaries, owns a substantial portion of our following core businesses:

- Climate Control Business manufactures and sells a broad range of air conditioning and heating products in the niche markets we serve consisting of geothermal and water source heat pumps, hydronic fan coils, large custom air handlers and other related products used to control the environment in commercial and residential new building construction, renovation of existing buildings and replacement of existing systems. For 2009, approximately 50% of our consolidated net sales relates to the Climate Control Business.
- Chemical Business manufactures and sells nitrogen based chemical products produced from three plants located in Arkansas, Alabama and Texas for the industrial, mining and agricultural markets. In addition, we are restarting our previously idled Pryor Facility located in Pryor, Oklahoma. Our products include industrial and fertilizer grade AN, UAN, anhydrous ammonia, sulfuric acids, nitric acids in various concentrations, nitrogen solutions and various other products. For 2009, approximately 49% of our consolidated net sales relates to the Chemical Business.

Certain of our other subsidiaries outside of ThermaClime own facilities and operations, including the Pryor Facility, within our above described core businesses.

As discussed below under "Chemical Business," our project to begin production of anhydrous ammonia and UAN at the Pryor Facility is still underway despite numerous delays. We began production of anhydrous ammonia, which is the initial feedstock for the production of UAN, in January 2010 but at production rates lower than our targeted rates.

Economic Conditions

Our two business segments serve several diverse markets. We consider market fundamentals for each market individually as we evaluate economic conditions.

Climate Control Business - The downturn in commercial and residential construction has had a significant adverse effect on our Climate Control Business' product order level and sales in 2009. Based upon published reports of leading indicators, including the Construction Market Forecasting Service published by McGraw-Hill, and the national architecture billings index

Table of Contents

published by AIA, the overall commercial construction sector is not expected to recover during 2010. On the other hand, McGraw-Hill has projected an increase in both single-family residential and multi-family construction during 2010. Another factor that may affect product order rates going forward is the potential for growth in our highly energy-efficient geothermal water-source heat pumps, which could benefit significantly from government stimulus programs, including various tax incentives, although we can not predict the impact these programs will have on our business.

The Chemical Business - During 2009, our Chemical Business' industrial and mining sales volumes, expressed in tons shipped, were down 11% and 24%, respectively. However, approximately 60% of our 2009 sales were into industrial and mining markets. Approximately 75% of these sales are to customers that have contractual obligations to purchase a minimum quantity or allow us to recover our cost plus a profit, irrespective of the volume of product sold. It is unclear to us how these markets will respond in 2010 but it appears that market demand for these products could be flat to slightly up for the first half of 2010.

The remaining 40% of our Chemical Business' 2009 sales were made into the agricultural fertilizer markets to customers that do not purchase pursuant to contractual arrangements. Our agricultural sales volumes and margins depend upon the supply of and the demand for fertilizer, which in turn depends on the market fundamentals for crops including corn, wheat and forage. The current outlook remains uncertain but most market indicators, including reports in Green Markets, Fertilizer Week and other industry publications, point to positive supply and demand fundamentals for the types of nitrogen fertilizer products we produce and sell. However, it is possible that the fertilizer outlook could be adversely affected by lower grain prices, unanticipated spikes in natural gas prices, or unfavorable weather conditions.

2009 Results

Our consolidated net sales for 2009 were \$531.8 million compared to \$749.0 million for 2008. The sales decrease of approximately \$217.2 million includes a decrease of \$45.2 million in our Climate Control Business and a decrease of \$166.3 million in our Chemical Business. The Climate Control Business decrease is due primarily to lower customer product orders received due to the economic downturn. The Chemical Business' decrease is primarily due to steep declines in our raw material costs resulting in lower selling prices. This decline is also due to the reduction in volume at the Baytown Facility, which had minimal impact on our operating results due to the fixed cost pass-through provisions in the Bayer agreements.

Our consolidated operating income was \$40.7 million compared to \$59.2 million in 2008. The decrease in operating income of approximately \$18.5 million was primarily the result of a \$16.2 million decrease in our Chemical Business operating income as discussed below. In addition, our Climate Control Business' operating income declined \$1.2 million on lower sales but experienced an improved gross profit percentage and our general corporate expense and other business operations increased approximately \$1.0 million as discussed below under "Results of Operations."

Table of Contents

The \$16.2 million decrease in our Chemical Business' 2009 operating income includes start-up expenses associated with the Pryor Facility of approximately \$17.2 million compared to \$2.4 million for 2008. In addition, we recognized other operating income of \$7.6 million from a litigation judgment during 2008. Eliminating those two factors, our Chemical Business' 2009 operating income increased \$6.2 million primarily as a result of 2008 firm sales commitments fulfilled in 2009 resulting in higher gross profit compared to then current market prices (\$6.6 million), reduced losses on natural gas and ammonia hedge contracts (\$6.4 million), and improved plant efficiencies (\$3.9 million), partially offset by lower gross profit on agricultural products sales (\$10.8 million).

In addition, our interest expense was \$6.7 million for 2009 compared to \$11.4 million for 2008, a decrease of approximately \$4.7 million. This decrease primarily relates to a decrease in losses of \$2.1 million associated with our interest rate contracts, a decrease of \$1.6 million as the result of the acquisitions of the 2007 Debentures and a decrease of \$1.1 million due to the decline in the LIBOR rate associated with the Secured Term Loan.

As discussed further below under "Liquidity and Capital Resources," during 2009, we continued to acquire through unsolicited transactions a portion of the 2007 Debentures. As a result, we recognized a gain on extinguishment of debt of \$1.8 million compared to \$5.5 million in 2008.

Our resulting effective income tax rate for 2009 was approximately 40.7%, which includes an additional provision relating to the adjustments reconciling the 2008 federal income and state tax returns to the 2008 estimated tax provision and the impact of lower taxable income for 2009, which limited the amount of the manufacturing deduction that can be utilized. For 2008, our resulting effective income tax rate was approximately 33.9%, which included a net deferred income tax benefit of \$1.6 million as the result of a detailed analysis performed on all our deferred tax assets and liabilities and the realizability of those deferred tax assets.

Climate Control Business

Our Climate Control sales for 2009 were \$266.2 million or 14.5% below 2008. The decrease in net sales resulted in a 44.4% decline in sales of our fan coil products and a 5.8% decline in our geothermal and water source heat pump products partially offset by an 8.1% increase in other HVAC products. Based upon recent customer product order levels and published reports of leading indicators, including reports by McGraw-Hill and AIA, the overall commercial construction sector is not expected to recover during 2010. On the other hand, McGraw-Hill has projected an increase in both single-family residential and multi-family construction during 2010.

We continue to closely follow the contraction and volatility in the credit markets and have attempted to assess the impact on the commercial and residential construction sectors that we serve, including but not limited to new construction and/or renovation of facilities in the following sectors:

- Multi-Family Residential (apartments and condominiums)
 - Single-Family Residential
 - Lodging

Table of Contents

- Education
- Healthcare
 - Offices
- Manufacturing

During 2009, approximately 77% of our Climate Control Business' sales were to the commercial and multi-family construction markets, and the remaining 23% were sales of geothermal heat pumps ("GHPs") to the single-family residential market.

For 2009, the product order level was \$207.2 million as compared to \$305.9 million for 2008, a decrease of \$98.7 million or 32.3%. Our product order level consists of confirmed purchase orders from customers, those that have been accepted and received credit approval. The net decrease in 2009 product orders includes a decrease of approximately 17.0% in product orders for residential GHPs and a 36.4% decrease in product orders for commercial products.

Customer product orders received for all Climate Control products in the fourth quarter of 2009 were \$48.5 million compared to \$59.1 million in the fourth quarter of 2008 and compared to \$49.1 million for the third quarter of 2009. Our backlog was \$68.5 million at December 31, 2008, \$39.4 million at September 30, 2009 and \$32.2 million at December 31, 2009. The backlog consists of confirmed customer orders for product to be shipped at a future date. At December 31, 2009, included within our reported backlog is a confirmed order for approximately \$3.2 million that has been placed on hold by the customer pending refinancing arrangements. Historically, we have not experienced significant cancellations relating to our backlog of confirmed customer product orders and we expect to ship substantially all of these orders within the next twelve months; however, due to the current economic conditions in the markets we serve, it is possible that some of our customers could cancel a portion of our backlog or extend the shipment terms beyond twelve months. For 2010, the potential sales level remains uncertain. For the first two months of 2010, our new orders received were approximately \$32.5 million and our backlog was approximately \$31.3 million at February 28, 2010.

Our GHPs, use a form of renewable energy and can reduce energy costs up to 80%, under certain conditions. The American Recovery and Reinvestment Act of 2009 ("Act") provides a 30% tax credit for homeowners who install GHPs. For businesses that install GHPs, the Act includes a 10% tax credit, 50% first year depreciation and five year accelerated depreciation for the balance of the system cost.

Although we expect to see continued slowness in our Climate Control Business' results in the short-term, we have significantly increased our sales and marketing efforts for all of our Climate Control products. Over time, we believe that the recently enacted federal tax credits for GHPs should have a positive impact on sales of those highly energy efficient and green products.

Chemical Business

During 2009, our Chemical Business operated three chemical production facilities: the El Dorado Facility, the Cherokee Facility and the Baytown Facility. The El Dorado and Baytown Facilities produce nitrogen products from anhydrous ammonia that is delivered by pipeline, and

Table of Contents

the El Dorado Facility also produces sulfuric acid from recovered elemental sulfur delivered by truck and rail. The Cherokee Facility produces anhydrous ammonia and nitrogen products primarily from natural gas that is delivered by pipeline but can also receive supplemental anhydrous ammonia by truck, rail and barge.

The project to begin production of anhydrous ammonia and UAN at the Pryor Facility is still underway despite numerous delays. In January 2010, we began production of anhydrous ammonia, which is the initial feedstock for the production of UAN, but at production rates lower than our targeted rates. We are continuing to produce and store anhydrous ammonia while we are activating the Urea plant. The start up of the Urea plant has encountered delays, due to extended lead times to refurbish certain major equipment items, resulting in significant increases in our previous estimates of the start up costs. We believe that some of the delays and additional costs resulted from faulty workmanship performed by certain contractors. We are investigating potential remedies for recovery of some of the cost of the delays. For 2009, we incurred approximately \$17.2 million of expenses primarily consisting of start up costs. Currently, the Pryor Facility monthly operating start up costs, prior to production of UAN at sustained targeted rates, are approximately \$1.6 million in addition to variable costs such as natural gas and electricity. We have funded the start up of the Pryor Facility from our available cash on hand and working capital. At the Pryor Facility, natural gas is a primary raw material for producing UAN and anhydrous ammonia.

Our Chemical Business' primary markets are industrial, mining and agricultural. The sales in all three sectors for 2010 will continue to be affected by the overall economic conditions.

Our Chemical Business reported net sales for 2009 of \$257.8 million compared to \$424.1 million for 2008, a decrease of \$166.3 million or 39.2%. The decrease in sales dollars is primarily attributable to steep declines in commodity prices as discussed below and the impact of the Bayer Agreement as discussed below under "Liquidity and Capital Resources – Bayer Agreement." The decline in commodity prices resulted in the decrease in the selling prices for the products produced at our facilities as well as steep declines in our raw material feedstock costs. Sales are also down due to fewer tons sold in our mining and industrial acids markets as discussed below.

Our primary raw material feedstocks (anhydrous ammonia, natural gas and sulfur) are commodities subject to significant price fluctuations, and are generally purchased at prices in effect at the time of purchase. During 2009, the average prices for those commodities compared to last year were as follows:

	2009	2008
Natural gas average price per MMBtu based upon Tennessee 500\$ pipeline pricing point	4.38	\$ 9.62
Ammonia average price based upon low Tampa metric price per\$ ton	272	\$ 587
Sulfur price based upon Tampa average quarterly price per long ton	\$ 11	\$ 368

Table of Contents

The substantial decline in the cost of the commodities was accompanied by similar declines in selling prices of our products.

Approximately 60% of our Chemical Business sales for 2009 were in the industrial and mining markets consisting of:

- nitric acid, sulfuric acid and anhydrous ammonia sold to industrial customers; and
- industrial grade AN and nitrogen solutions sold to mining customers.

Most of these sales were pursuant to sales contracts and/or pricing arrangements on terms that include the cost of raw material feedstock as a pass through component in the sales price.

For 2009, approximately 40% of our Chemical Business sales were agricultural products, primarily nitrogen fertilizer sold in the agricultural markets including:

- AN produced at our El Dorado Facility from purchased anhydrous ammonia,
- UAN produced at our Cherokee Facility primarily from natural gas, and
- other fertilizer products sold through our agricultural distribution centers.

The agricultural product sales, unlike the majority of our industrial and mining sales, are sold at the market price in effect at the time of sale or at a negotiated future price.

The percentage change in sales (volume and dollars) for 2009 compared to 2008 is as follows:

	Percentage Change of	
	Tons	Dollars
	Increase (Decrease)	
Chemical products:		
Agricultural	11 %	(32)%
Industrial acids and other	(11)%	(41)%
Mining	(24)%	(47)%
Total weighted-average change	(7)%	(39)%

The disproportionate percentage change relating to tons sold compared to sales dollars for our Chemical products is due primarily to declines in prices for most commodities, including natural gas, anhydrous ammonia and sulfur, as compared to 2008, resulting in lower selling prices per ton of product sold. The reduction in tons sold to industrial and mining customers is a direct result of lower customer demand as a result of the economic downturn. However, a significant amount of the lower tonnage volume was related to customers that were contractually bound to pay for the fixed costs plus a profit for those tons not taken.

We produce AN and UAN fertilizers for the agricultural markets. For 2009, demand for fertilizer grade AN was strong resulting in a 36% increase in tons sold. Conversely, the demand for UAN was relatively weak resulting in an 11% decrease in tons sold as compared to 2008. We believe that the lower shipments of UAN were due to market conditions, including poor weather conditions, a reluctance of distributors to build inventory due to pricing concerns and possibly less nitrogen applied to corn during the spring.

Table of Contents

We believe that global demand for corn, wheat and other grains will continue to be the fundamental drivers of nitrogen fertilizer demand.

Liquidity and Capital Resources

The following is our cash and cash equivalents, total interest bearing debt and stockholders' equity:

	December 31, 2009	December 31, 2008
(In Millions)		
Cash and cash equivalents	\$ 61.7	\$ 46.2
Short-term investments (1)	10.1	-
	\$ 71.8	\$ 46.2
Long-term debt:		
2007 Debentures due 2012	\$ 29.4	\$ 40.5
Secured Term Loan due 2012	50.0	50.0
Other	22.4	14.7
Total long-term debt	\$ 101.8	\$ 105.2
Total stockholders' equity	\$ 150.6	\$ 130.0

(1) These investments consist of certificates of deposit with an original maturity of 13 weeks. All of these investments were held by financial institutions within the United States and none of these investments were in excess of the federally insured limits.

At December 31, 2009, our cash, cash equivalents and short-term investments totaled \$71.8 million and our \$50 million Working Capital Revolver Loan was undrawn and available to fund operations, if needed, subject to the amount of our eligible collateral and outstanding letters of credit. At December 31, 2009, the ratio between long-term debt, before the use of cash on hand and short-term investments to pay down debt, and stockholders' equity was approximately 0.7 to 1 as compared to 0.8 to 1 at December 31, 2008.

For 2010, we expect our primary cash needs will be for working capital and capital expenditures. We and our subsidiaries plan to rely upon internally generated cash flows, cash and short-term investments on hand, secured property and equipment financing, and the borrowing availability under the Working Capital Revolver Loan to fund operations and pay obligations. Also see discussion below concerning our universal shelf registration statement. Our internally generated cash flows and our liquidity could be affected by possible declines in sales volumes resulting from the uncertainty relative to the current economic conditions.

The 2007 Debentures bear interest at the annual rate of 5.5% and mature on July 1, 2012. Interest is payable in arrears on January 1 and July 1 of each year. As of December 31, 2009, we have acquired \$30.6 million aggregate principal amount of these debentures including \$11.1 million during 2009 as discussed below under "Authorization to Repurchase 2007 Debentures and Stock."

Table of Contents

The Secured Term Loan matures on November 2, 2012 and accrues interest at a defined LIBOR rate plus 3%, which LIBOR rate is adjusted on a quarterly basis. The interest rate at December 31, 2009 was approximately 3.28%. The Secured Term Loan requires only quarterly interest payments with the final payment of interest and principal at maturity. The Secured Term Loan is secured by the real property and equipment located at the El Dorado and Cherokee Facilities.

Since the 2007 Debentures and the Secured Term Loan both mature in 2012, we are currently reviewing various alternatives for the retirement of these obligations, as they become due.

ThermaClime and certain of its subsidiaries are subject to numerous covenants under the Secured Term Loan including, but not limited to, limitation on the incurrence of certain additional indebtedness and liens, limitations on mergers, acquisitions, dissolution and sale of assets, and limitations on declaration of dividends and distributions to us, all with certain exceptions.

ThermaClime's Working Capital Revolver Loan is available to fund its working capital requirements, if necessary, through April 13, 2012. Under the Working Capital Revolver Loan, ThermaClime and its subsidiaries (the "Borrowers") may borrow on a revolving basis up to \$50.0 million based on specific percentages of eligible accounts receivable and inventories. At December 31, 2009, we had approximately \$49.2 million of borrowing availability under the Working Capital Revolver Loan based on eligible collateral and outstanding letters of credit.

The Working Capital Revolver Loan and the Secured Term Loan have financial covenants that are discussed below under "Subordinated Debentures and Loan Agreements - Terms and Conditions". The Borrowers' ability to maintain borrowing availability under the Working Capital Revolver Loan depends on their ability to comply with the terms and conditions of the loan agreements and their ability to generate cash flow from operations. The Borrowers are restricted under their credit agreements as to the funds they may transfer to the Company and their non-ThermaClime affiliates and certain ThermaClime subsidiaries. This limitation does not prohibit payment to the Company of amounts due under a Services Agreement, Management Agreement and a Tax Sharing Agreement. Based upon our current projections, we believe that cash, short-term investments and borrowing availability under our Working Capital Revolver Loan is adequate to fund operations during 2010.

Although we do not have any current plans to offer or sell any securities, in September 2009, we filed a universal shelf registration statement on Form S-3, with the SEC, which was declared effective by the SEC on November 20, 2009. The shelf registration statement provides that we could offer and sell up to \$200 million of our securities consisting of equity (common and preferred), debt (senior and subordinated), warrants and units, or a combination thereof. This disclosure shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

Income Taxes

The utilization of the NOL carryforwards reduced our income tax liabilities in prior years. However, we utilized our remaining federal NOL carryforwards during 2008. As a result, we are recognizing and paying federal income taxes at regular corporate tax rates.

Table of Contents

The federal tax returns for 1997 through 2005 remain subject to examination for the purpose of determining the amount of tax NOL and other carryforwards. With few exceptions, the 2006-2008 years remain open for all purposes of examination by the IRS and other major tax jurisdictions.

Capital Expenditures

Capital Expenditures in 2009

Cash used for capital expenditures during 2009 was \$28.9 million, including \$5.1 million primarily for production equipment and other upgrades for additional capacity in our Climate Control Business and \$23.3 million for our Chemical Business, primarily for process and reliability improvements of our operating facilities, including \$8.1 million associated with the Pryor Facility and approximately \$0.5 million to maintain compliance with environmental laws, regulations and guidelines. These capital expenditures were primarily funded from working capital and from secured financing totaling \$8.5 million obtained by refinancing certain existing assets.

Committed and Planned Capital Expenditures for 2010

At December 31, 2009, we had committed capital expenditures of approximately \$7.9 million for 2010. The expenditures included \$6.6 million for process and reliability improvements in our Chemical Business, including \$1.7 million relating to the Pryor Facility and approximately \$0.9 million to maintain compliance with environmental laws, regulations and guidelines. In addition, our commitments included \$1.3 million primarily for facilities expansion and upgrades and production equipment in our Climate Control Business. We plan to fund these expenditures from working capital, which may include utilizing our Working Capital Revolver Loan, and financing arrangements.

In addition to committed capital expenditures at December 31, 2009, we had planned capital expenditures for 2010 in our Chemical Business of approximately \$11.0 million and in our Climate Control Business of approximately \$6.0 million. These planned expenditures are subject to economic conditions and approval by senior management. If these capital expenditures are approved, most of the Chemical Business' expenditures will likely be funded from internal cash flows and the Climate Control's expenditures will likely be financed.

Advanced Manufacturing Energy Credits

On January 8, 2010, two of our subsidiaries within the Climate Control Business were awarded Internal Revenue Code § 48C tax credits (also referred to as "Advanced Manufacturing Energy Credits") of approximately \$9.6 million. The award is based on anticipated capital expenditures made from February 2009 through February 2013 for machinery that will be used to produce geothermal heat pumps and green modular chillers. As these subsidiaries invest in the qualifying machinery, we will be entitled to an income tax credit equal to 30% of the machinery cost, up to the total credit amount awarded.

Table of Contents

Information Request from EPA

The EPA has sent information requests to most, if not all, of the nitric acid plants in the United States, including to us relating to our El Dorado, Cherokee and Baytown Facilities, requesting information under Section 114 of the Clean Air Act as to construction and modification activities at each of these facilities over a period of years to enable the EPA to determine whether these facilities are in compliance with certain provisions of the Clean Air Act. In connection with a review by our Chemical Business of these facilities in obtaining information for the EPA pursuant to the EPA's request, our Chemical Business management believes, subject to further review, investigation and discussion with the EPA, that certain changes to its production equipment may be needed in order to comply with the requirements of the Clean Air Act. If changes to the production equipment at these facilities are required in order to bring this equipment into compliance with the Clean Air Act, the amount of capital expenditures necessary in order to bring the equipment into compliance is unknown at this time but could be substantial.

Further, if it is determined that the equipment at any of our El Dorado, Cherokee and/or Baytown Facilities have not met the requirements of the Clean Air Act, our Chemical Business could be subject to penalties in an amount not to exceed \$27,500 per day as to each facility not in compliance and require such facility to be retrofitted with the "best available control technology." We believe this technology is already employed at the Baytown Facility. Currently, we believe that certain facilities within our Chemical Business may be required to pay certain penalties and may be required to make certain capital improvements to certain emission equipment as a result of the above described matter; however, at this time we are unable to determine the amount of any penalties that may be assessed, or the cost of additional capital improvements that may be required, by the EPA. Therefore no liability has been established at December 31, 2009.

Estimated Plant Turnaround Costs in 2010

Our Chemical Business expenses the costs of planned major maintenance activities ("Turnarounds") as they are incurred. Based on our current plan for Turnarounds to be performed during 2010, we currently estimate that we will incur approximately \$5 million to \$6 million of Turnaround costs. However, it is possible that the actual costs could be significantly different than our estimates.

Expenses Associated with Environmental Regulatory Compliance

Our Chemical Business is subject to specific federal and state environmental compliance laws, regulations and guidelines. As a result, our Chemical Business incurred expenses of \$3.2 million in 2009 to maintain such regulatory compliance. For 2010, we expect to incur expenses ranging from \$3 million to \$4 million to maintain compliance. However, it is possible that the actual costs could be significantly different than our estimates.

Proposed Legislation and Regulations

Certain of the manufacturing facilities within our Chemical Business use significant amounts of electricity, natural gas and other raw materials necessary for the production of their chemical

Table of Contents

products that result, or could result, in certain greenhouse gas emissions into the environment. Federal and state courts and administrative agencies are considering the scope and scale of greenhouse gas emission regulation. There are bills pending in Congress that would regulate greenhouse gas emissions through a cap-and-trade system under which emitters would be required to either install abatement systems where feasible or buy allowances for offsets of emissions of greenhouse gas. In addition, the EPA has announced its determination that greenhouse gases threaten the public's health and welfare and thus could make them subject to regulation under the Clean Air Act. However this determination is being contested. The EPA has instituted a mandatory greenhouse gas reporting requirement beginning in 2010, which will impact all of our chemical manufacturing sites. Greenhouse gas regulation could increase the price of the electricity purchased by these chemical facilities and increase costs for our use of natural gas, other raw materials (such as anhydrous ammonia), and other energy sources, potentially restrict access to or the use of natural gas and certain other raw materials necessary to produce certain of our chemical products and require us to incur substantial expenditures to retrofit these chemical facilities to comply with the proposed new laws and regulations regulating greenhouse gas emissions, if adopted. Federal, state and local governments may also pass laws mandating the use of alternative energy sources, such as wind power and solar energy, which may increase the cost of energy use in certain of our chemical and other manufacturing operations. While future emission regulations or new laws appear likely, it is too early to predict how these regulations, if and when adopted, will affect our businesses, operations, liquidity or financial results.

Certain Events Relating to Our Chemical Business

Bayer Agreement - EDN is a party to the Bayer Agreement with Bayer, by which EDN operates the Baytown Facility at Bayer's chemical manufacturing complex. The Bayer Agreement is for an initial term of five years, with renewal options.

Under the terms of the Bayer Agreement, Bayer purchases from EDN all of Bayer's requirements for nitric acid for use in Bayer's chemical manufacturing complex located in Baytown, Texas at a price covering EDN's costs plus a profit, with certain performance obligations on EDN's part. EDN purchases from Bayer ammonia, certain utilities, chemical additives and services as required for production of nitric acid at the Baytown Facility.

On June 23, 2009, Bayer purchased the Baytown Assets from a third party, except the EDN Assets. EDN continues to be responsible for the maintenance and operation of the Baytown Facility in accordance with the terms of the Bayer Agreement.

Pursuant to the terms of the Bayer Agreement, annual net sales after June 30, 2009, will decrease by approximately \$9.7 million primarily as a result of the elimination of the Baytown Facility's lease expense, which was included in our sales price under the original Bayer agreement that was replaced by the Bayer Agreement. This elimination was the result of Bayer purchasing the Baytown Assets. For 2009, we had sales to Bayer of approximately 14% and 7% of the Chemical Business' and our consolidated net sales, respectively.

Table of Contents

If there is a change in control of EDN, Bayer has the right to terminate the Bayer Agreement upon payment to EDN of a termination fee of approximately \$6.3 million plus 1.1 times the current net book value of the EDN Assets.

New DEF Product - As part of the Clean Air Act, the EPA enacted emissions standards, which became effective beginning in 2010, that require the further reduction of nitrogen oxide emissions from diesel engines, starting with heavy-duty vehicles. CNC has developed a DEF product under the tradename, EarthPure DEFTM, specifically for this application. CNC began production of DEF in January 2010.

Potential Increase of Imported UAN - A large percentage of the domestic UAN market is supplied by imports. Significant additional UAN production is expected to begin in the Caribbean during 2010, and we believe this additional UAN production will be marketed in the United States. Generally, foreign production of UAN is produced at a lower cost of production than UAN produced in the United States. During 2009, revenues from the sale of UAN by our Chemical Business was approximately \$28 million. Additionally, UAN is the primary product to be produced and sold by the Pryor Facility. This potential additional import of UAN beginning in 2010 could have an adverse impact on our revenues and profits from the sale of UAN and fertilizer products.

Authorization to Repurchase 2007 Debentures and Stock

Our board of directors has granted management the authority to repurchase the 2007 Debentures on terms that management deems favorable to us if an opportunity is presented. Under this authority, we acquired in unsolicited transactions \$30.6 million aggregate principal face amount of these debentures, including \$11.1 million during 2009, at negotiated prices ranging from 72.25% to 98.5% of the face value of the 2007 Debentures. We used \$8.9 million of our working capital to fund the purchases made during 2009. As a result, only \$29.4 million remains outstanding at December 31, 2009.

In addition, our board of directors enacted a stock repurchase authorization for an unstipulated number of shares for an indefinite period of time. The stock repurchase authorization will remain in effect until such time as of our board of directors decides to end it. During 2009, we repurchased 275,900 shares of our common stock at a weighted-average price of \$11.60 per share using funds from our working capital.

Dividends

We are a holding company and, accordingly, our ability to pay cash dividends on our preferred stock and our common stock depends in large part on our ability to obtain funds from our subsidiaries. The ability of ThermaClime (which owns substantially all of the companies comprising the Climate Control Business and Chemical Business) and its wholly-owned subsidiaries to pay dividends and to make distributions to us is restricted by certain covenants contained in the \$50 million Working Capital Revolver Loan and the \$50 million Secured Term Loan. Under the terms of these agreements, ThermaClime cannot transfer funds to us in the form of cash dividends or other distributions or advances, except for:

Table of Contents

- the amount of income taxes that ThermaClime would be required to pay if they were not consolidated with us;
- an amount not to exceed fifty percent (50%) of ThermaClime's consolidated net income during each fiscal year determined in accordance with generally accepted accounting principles plus amounts paid to us within the first bullet above, provided that certain other conditions are met;
- the amount of direct and indirect costs and expenses incurred by us on behalf of ThermaClime pursuant to a certain services agreement;
- the amount under a certain management agreement between us and ThermaClime, provided certain conditions are met, and
 - outstanding loans entered into subsequent to November 2, 2007 not to exceed \$2.0 million at any time.

We have not paid cash dividends on our outstanding common stock in many years and we do not currently anticipate paying cash dividends on our outstanding common stock in the near future. However, our board of directors has not made a decision whether or not to pay such dividends on our common stock in 2010.

During 2009, dividends were declared and paid on our preferred stock using funds from our working capital. Each share of preferred stock is entitled to receive an annual dividend, only when declared by our board of directors, payable as follows:

- Series D Preferred at the rate of \$.06 a share payable on October 9, which dividend is cumulative;
- Series B Preferred at the rate of \$12.00 a share payable January 1, which dividend is cumulative; and
 - Noncumulative Preferred at the rate of \$10.00 a share payable April 1, which is noncumulative.

All shares of the Series D Preferred and Series B Preferred are owned by the Golsen Group. See “Related Party Transactions” of this MD&A for a discussion as to the amount of dividends paid to the Golsen Group during 2009.

Compliance with Long - Term Debt Covenants

As discussed below under “Subordinated Debentures and Loan Agreements - Terms and Conditions”, the Secured Term Loan and Working Capital Revolver Loan, as amended, of ThermaClime and its subsidiaries require, among other things, that ThermaClime meet certain financial covenants. Currently, ThermaClime's forecast is that ThermaClime will be able to meet all financial covenant requirements for 2010.

Table of Contents

Subordinated Debentures and Loan Agreements - Terms and Conditions

5.5% Convertible Senior Subordinated Debentures - On June 28, 2007, we completed a private placement to twenty-two qualified institutional buyers, pursuant to which we sold \$60.0 million aggregate principal amount of the 2007 Debentures. Only \$29.4 million remains outstanding at December 31, 2009, including \$5.0 million owned by the Golsen Group.

The 2007 Debentures bear interest at the rate of 5.5% per year and mature on July 1, 2012. Interest is payable in arrears on January 1 and July 1 of each year, which began on January 1, 2008. In addition, the 2007 Debentures are unsecured obligations and are subordinated in right of payment to all of our existing and future senior indebtedness, including indebtedness under our revolving debt facilities. The 2007 Debentures are effectively subordinated to all present and future liabilities, including trade payables, of our subsidiaries.

The 2007 Debentures are convertible by the holders in whole or in part into shares of our common stock prior to their maturity. The conversion rate of the 2007 Debentures for the holders electing to convert all or any portion of a debenture is 36.4 shares of our common stock per \$1,000 principal amount of debentures (representing a conversion price of \$27.47 per share of common stock), subject to adjustment under certain conditions as set forth in the Indenture.

Working Capital Revolver Loan - ThermaClime's Working Capital Revolver Loan is available to fund its working capital requirements, if necessary, through April 13, 2012. Under the Working Capital Revolver Loan, ThermaClime and its subsidiaries may borrow on a revolving basis up to \$50.0 million based on specific percentages of eligible accounts receivable and inventories. At December 31, 2009, there were no outstanding borrowings. In addition, the net credit available for borrowings under our Working Capital Revolver Loan was approximately \$49.2 million at December 31, 2009, based on our eligible collateral and outstanding letters of credit as of that date. The Working Capital Revolver Loan requires that ThermaClime meet certain financial covenants, including an EBITDA requirement of greater than \$25 million, a minimum fixed charge coverage ratio of not less than 1.10 to 1, and a maximum senior leverage coverage ratio of not greater than 4.50 to 1. These requirements are measured quarterly on a trailing twelve-month basis and as defined in the agreement. ThermaClime was in compliance with those covenants for the twelve-month period ended December 31, 2009.

Secured Term Loan - In November 2007, ThermaClime and certain of its subsidiaries entered into the \$50.0 million Secured Term Loan with a certain lender. Proceeds from the Secured Term Loan were used to repay the previous senior secured loan. The Secured Term Loan matures on November 2, 2012. The Secured Term Loan accrues interest at a defined LIBOR rate plus 3%, which LIBOR rate is adjusted on a quarterly basis. The interest rate at December 31, 2009 was approximately 3.28%. The Secured Term Loan requires only quarterly interest payments with the final payment of interest and principal at maturity. The Secured Term Loan is secured by the real property and equipment located at the El Dorado and Cherokee Facilities. The carrying value of the pledged assets is approximately \$63 million at December 31, 2009.

Table of Contents

The Secured Term Loan borrowers are subject to numerous covenants under the agreement including, but not limited to, limitation on the incurrence of certain additional indebtedness and liens, limitations on mergers, acquisitions, dissolution and sale of assets, and limitations on declaration of dividends and distributions to us, all with certain exceptions. At December 31, 2009, the carrying value of the restricted net assets of ThermaClime and its subsidiaries was approximately \$79 million. As defined in the agreement, the Secured Term Loan borrowers are also subject to a minimum fixed charge coverage ratio of not less than 1.10 to 1 and a maximum leverage ratio of not greater than 4.50 to 1. Both of these requirements are measured quarterly on a trailing twelve-month basis. The Secured Term Loan borrowers were in compliance with these financial covenants for the twelve-month period ended December 31, 2009. The maturity date of the Secured Term Loan can be accelerated by the lender upon the occurrence of a continuing event of default, as defined.

Cross-Default Provisions - The Working Capital Revolver Loan agreement and the Secured Term Loan contain cross-default provisions. If ThermaClime fails to meet the financial covenants of either of these agreements, the lenders may declare an event of default.

Seasonality

We believe that our only significant seasonal products are fertilizer and related chemical products sold by our Chemical Business to the agricultural industry. The selling seasons for those products are primarily during the spring and fall planting seasons, which typically extend from March through June and from September through November in the geographical markets in which the majority of our agricultural products are distributed. As a result, our Chemical Business increases its inventory of agricultural products prior to the beginning of each planting season. In addition, the amount and timing of sales to the agricultural markets depend upon weather conditions and other circumstances beyond our control.

Related Party Transactions

Golsen Group

The Golsen Group has acquired from an unrelated third party \$5,000,000 of the 2007 Debentures. During 2009, we incurred interest expense of \$275,000 relating to the debentures held by the Golsen Group, of which \$137,500 remains accrued at December 31, 2009. We also paid interest of \$137,500 that was accrued at December 31, 2008.

In March 2009, we paid the dividends totaling approximately \$240,000 and \$60,000 on our Series B Preferred and our Series D Preferred, respectively, all of the outstanding shares of which are owned by the Golsen Group.

Critical Accounting Policies and Estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amount of assets, liabilities, revenues and expenses, and disclosures of contingencies. In addition, the more critical areas of financial reporting impacted by management's judgment, estimates and assumptions include the following:

Table of Contents

Accounts Receivable and Credit Risk - Our sales to contractors and independent sales representatives are generally subject to a mechanic's lien in the Climate Control Business. Our other sales are generally unsecured. Credit is extended to customers based on an evaluation of the customer's financial condition and other factors. Credit losses are provided for in the consolidated financial statements based on historical experience and periodic assessment of outstanding accounts receivable, particularly those accounts which are past due (determined based upon how recently payments have been received). Our periodic assessment of accounts and credit loss provisions are based on our best estimate of amounts that are not recoverable. Concentrations of credit risk with respect to trade receivables are limited due to the large number of customers comprising our customer bases and their dispersion across many different industries and geographic areas, however, eight customers (including their affiliates) account for approximately 24% of our total net receivables at December 31, 2009. We do not believe this concentration in these eight customers represents a significant credit risk due to the financial stability of these customers. At December 31, 2009 and 2008, our allowance for doubtful accounts of \$676,000 and \$729,000, respectively, were netted against our accounts receivable.

Inventory Valuations - Inventories are priced at the lower of cost or market, with cost being determined using the first-in, first-out ("FIFO") basis. Finished goods and work-in-process inventories include material, labor and manufacturing overhead costs. At December 31, 2009 and 2008, the carrying value of certain nitrogen-based inventories produced by our Chemical Business was reduced to market because cost exceeded the net realizable value by \$0.5 million and \$3.6 million, respectively. In addition, the carrying value of certain slow-moving inventory items (primarily Climate Control products) was reduced to market because cost exceeded the net realizable value by \$1.2 million and \$0.5 million at December 31, 2009 and 2008, respectively.

Precious Metals - Precious metals are used as a catalyst in the Chemical Business manufacturing process. Precious metals are carried at cost, with cost being determined using the FIFO basis. As of December 31, 2009 and 2008, precious metals were \$13.1 million and \$14.7 million, respectively, and are included in supplies, prepaid items and other in the consolidated balance sheets. Because some of the catalyst consumed in the production process cannot be readily recovered and the amount and timing of recoveries are not predictable, we follow the practice of expensing precious metals as they are consumed. For 2009, 2008, and 2007, the amounts expensed for precious metals were approximately \$5.9 million, \$7.8 million and \$6.4 million, respectively. These precious metals expenses are included in cost of sales. Occasionally, during major maintenance or capital projects, we may be able to perform procedures to recover precious metals (previously expensed) which have accumulated over time within the manufacturing equipment. For 2009, 2008, and 2007, we recognized recoveries of precious metals at historical FIFO costs of approximately \$2.6 million, \$1.5 million and \$1.8 million, respectively. When we accumulate precious metals in excess of our production requirements, we may sell a portion of the excess metals. We recognized gains of \$2.0 million for 2007 (none in 2009 or 2008) from the sale of excess precious metals. These recoveries and gains are reductions to cost of sales.

Impairment of Long-Lived Assets and Goodwill - Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amounts may not be recoverable and goodwill is reviewed for impairment at least annually. If assets to be held

Table of Contents

and used are considered to be impaired, the impairment to be recognized is the amount by which the carrying amounts of the assets exceed the fair values of the assets as measured by the present value of future net cash flows expected to be generated by the assets or their appraised value. Assets to be disposed are reported at the lower of the carrying amounts of the assets or fair values less costs to sell. At December 31, 2009, we had no long-lived assets to be classified as assets held for sale. We have considered impairment of our long-lived assets and goodwill. The timing of impairments cannot be predicted with reasonable certainty and are primarily dependent on market conditions outside our control. Should sales prices permanently decline dramatically without a similar decline in the raw material costs or should other matters, including the environmental requirements and/or operating requirements set by Federal and State agencies change substantially from our current expectations, a provision for impairment may be required based upon such event or events. See Item 1 "Business-Environmental Matters." Based on estimates obtained from external sources and internal estimates based on inquiry and other techniques, we recognized impairments relating to certain non-core equipment of \$192,000 relating to Corporate assets during 2008 (none in 2009 and 2007) and \$250,000 relating to certain capital spare parts and idle assets in our Chemical Business during 2007 (none in 2009 and 2008). These impairments are included in other expense.

Accrued Insurance Liabilities - We are self-insured up to certain limits for group health, workers' compensation and general liability claims. Above these limits, we have commercial insurance coverage for our contractual exposure on group health claims and statutory limits under workers' compensation obligations. We also carry excess umbrella insurance of \$50 million for most general liability and auto liability risks. We have a separate \$30 million insurance policy covering pollution liability at our Chemical Business facilities. Additional pollution liability coverage for our other facilities is provided in our general liability and umbrella policies. Our accrued insurance liabilities are based on estimates of claims, which include the incurred claims amounts plus estimates of future claims development calculated by applying our historical claims development factors to our incurred claims amounts. We also consider the reserves established by our insurance adjustors and/or estimates provided by attorneys handling the claims, if any. In addition, our accrued insurance liabilities include estimates of incurred, but not reported, claims and other insurance-related costs. Potential legal fees and other directly related costs associated with insurance claims are not accrued but rather are expensed as incurred. At December 31, 2009 and 2008, our accrued insurance liabilities were \$3.7 million and \$3.0 million, respectively, and are included in accrued and other liabilities. It is possible that the actual development of claims could exceed our estimates.

Product Warranty - Our Climate Control Business sells equipment that has an expected life, under normal circumstances and use, that extends over several years. As such, we provide warranties after equipment shipment/start-up covering defects in materials and workmanship.

Generally, the base warranty coverage for most of the manufactured equipment in the Climate Control Business is limited to eighteen months from the date of shipment or twelve months from the date of start-up, whichever is shorter, and to ninety days for spare parts. The warranty provides that most equipment is required to be returned to the factory or an authorized representative and the warranty is limited to the repair and replacement of the defective product, with a maximum warranty of the refund of the purchase price. Furthermore, companies within

Table of Contents

the Climate Control Business generally disclaim and exclude warranties related to merchantability or fitness for any particular purpose and disclaim and exclude any liability for consequential or incidental damages. In some cases, the customer may purchase or a specific product may be sold with an extended warranty. The above discussion is generally applicable to such extended warranties, but variations do occur depending upon specific contractual obligations, certain system components, and local laws.

Our accounting policy and methodology for warranty arrangements is to measure and recognize the expense and liability for such warranty obligations using a percentage of net sales, based upon our historical warranty costs. We also recognize the additional warranty expense and liability to cover atypical costs associated with a specific product, or component thereof, or project installation, when such costs are probable and reasonably estimable. It is possible that future warranty costs could exceed our estimates. At December 31, 2009 and 2008, our accrued product warranty obligations were \$3.1 million and \$2.8 million, respectively and are included in current and noncurrent accrued and other liabilities in the consolidated balance sheets.

Executive Benefit Agreements - We have entered into benefit agreements with certain key executives. Costs associated with these individual benefit agreements are accrued based on the estimated remaining service period when such benefits become probable they will be paid. Total costs accrued equal the present value of specified payments to be made after benefits become payable. In 1992, we entered into individual benefit agreements with certain key executives ("1992 Agreements") that provide for annual benefit payments for life (in addition to salary). The liability for these benefits under the 1992 Agreements is \$1,102,000 and \$1,111,000 as of December 31, 2009 and 2008, respectively, and is included in current and noncurrent accrued and other liabilities in the consolidated balance sheets.

In 1981, we entered into individual death benefit agreements with certain key executives. In addition, as part of the 1992 Agreements, should the executive die prior to attaining the age of 65, we will pay the beneficiary named in the agreement in 120 equal monthly installments aggregating to an amount specified in the agreement. In 2005, we entered into a death benefit agreement with our CEO. As of December 31, 2009, the liability for death benefits is \$3.4 million (\$2.7 million at December 31, 2008) which is included in current and noncurrent accrued and noncurrent liabilities in the consolidated balance sheets.

Income Taxes - We recognize deferred tax assets and liabilities for the expected future tax consequences attributable to NOL carryforwards, tax credit carryforwards, and differences between the financial statement carrying amounts and the tax basis of our assets and liabilities. We establish valuation allowances if we believe it is more-likely-than-not that some or all of deferred tax assets will not be realized. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

In addition, we do not recognize a tax benefit unless we conclude that it is more-likely-than-not that the benefit will be sustained on audit by the taxing authority based solely on the technical merits of the associated tax position. If the recognition threshold is met, we recognize a tax

Table of Contents

benefit measured at the largest amount of the tax benefit that, in our judgment, is greater than 50% likely to be realized. We record interest related to unrecognized tax positions in interest expense and penalties in operating other expense.

We reduce income tax expense for investment tax credits in the year the credit arises and is earned.

Income tax benefits credited to equity relate to tax benefits associated with amounts that are deductible for income tax purposes but do not affect earnings. These benefits are principally generated from exercises of non-qualified stock options.

Contingencies - We accrue for contingent losses when such losses are probable and reasonably estimable. Estimates of potential legal fees and other directly related costs associated with loss contingencies are not accrued but rather are expensed as incurred. In addition, we recognize contingent gains when such gains are realized or realizable and earned. We are a party to various litigation and other contingencies, the ultimate outcome of which is not presently known. Should the ultimate outcome of these contingencies be adverse, such outcome could create an event of default under ThermaClime's Working Capital Revolver Loan and the Secured Term Loan and could adversely impact our liquidity and capital resources.

Regulatory Compliance - Our Chemical Business is subject to specific federal and state regulatory compliance laws and guidelines. We have developed policies and procedures related to regulatory compliance. We must continually monitor whether we have maintained compliance with such laws and regulations and the operating implications, if any, and amount of penalties, fines and assessments that may result from noncompliance. At December 31, 2009, liabilities totaling \$305,000 have been accrued relating to remediation and surface and groundwater monitoring costs associated with our former Kansas facility. These liabilities are included in current and noncurrent accrued and other liabilities and are based on current estimates that may be revised in the near term.

Asset Retirement Obligations - We are obligated to monitor certain discharge water outlets at our Chemical Business facilities should we discontinue the operations of a facility. We also have certain facilities in our Chemical Business that contain asbestos insulation around certain piping and heated surfaces, which we plan to maintain or replace, as needed, with non-asbestos insulation through our standard repair and maintenance activities to prevent deterioration. Since we currently have no plans to discontinue the use of these facilities and the remaining lives of the facilities are indeterminable, an asset retirement liability has not been recognized. Currently, there is insufficient information to estimate the fair value of the asset retirement obligations. However, we will continue to review these obligations and record a liability when a reasonable estimate of the fair value can be made.

Revenue Recognition - We recognize revenue for substantially all of our operations at the time title to the goods transfers to the buyer and there remain no significant future performance obligations by us. Revenue relating to construction contracts is recognized using the percentage-of-completion method based primarily on contract costs incurred to date compared with total estimated contract costs. Changes to total estimated contract costs or losses, if any, are

Table of Contents

recognized in the period in which they are determined. Sales of warranty contracts are recognized as revenue ratably over the life of the contract. See discussion above under “Product Warranty” for our accounting policy for recognizing warranty expense.

Recognition of Insurance Recoveries - If an insurance claim relates to a recovery of our losses, we recognize the recovery when it is probable and reasonably estimable. If our insurance claim relates to a contingent gain, we recognize the recovery when it is realized or realizable and earned. Amounts recoverable from our insurance carriers are included in accounts receivable. As previously reported, in February 2009, a small nitric acid plant located at the Cherokee Facility suffered damage due to a fire. Our insurance policy provides for replacement cost coverage relating to property damage with a \$1.0 million property loss deductible. Because our replacement cost coverage for property damages is estimated to exceed our property loss deductible and the net book value of the damaged property, we did not recognize a loss relating to property damage from this fire but we recorded a property insurance claim receivable relating to this event. At December 31, 2009, the balance of the insurance claim receivable relating to this event was approximately \$1.2 million. In January 2010, we received approximately \$1.0 million from our insurance carrier as a partial payment on our insurance claim. We used these funds to pay down the Secured Term Loan.

Derivatives, Hedges and Financial Instruments - Derivatives are recognized in the balance sheet and are measured at fair value. Changes in fair value of derivatives are recorded in results of operations unless the normal purchase or sale exceptions apply or hedge accounting is elected.

We have three types of contracts that are accounted for on a fair value basis, which are interest rate contracts, commodities futures/forward contracts and foreign exchange contracts. The valuation of these contracts was determined based on quoted market prices or, in instances where market quotes are not available, other valuation techniques or models used to estimate fair values. The valuations of contracts classified as Level 1 are based on quoted prices in active markets for identical contracts. The valuations of contracts classified as Level 2 are based on quoted prices for similar contracts and valuation inputs other than quoted prices that are observable for these contracts. At December 31, 2009, we did not have any contracts classified as Level 3, which are contracts that are valued based on unobservable valuation inputs.

Management's judgment and estimates in these areas are based on information available from internal and external resources at that time. Actual results could differ materially from these estimates and judgments, as additional information becomes known.

Results of Operations

The following Results of Operations should be read in conjunction with our consolidated financial statements for the years ended December 31, 2009, 2008, and 2007 and accompanying notes and the discussions above under “Overview” and “Liquidity and Capital Resources.”

The following information about our results of operations is presented by our two industry segments, Climate Control Business and Chemical Business. Gross profit by industry segment represents net sales less cost of sales. In addition, our chief operating decision makers use operating income by industry segment for purposes of making decisions that include resource

Table of Contents

allocations and performance evaluations. Operating income by industry segment represents gross profit by industry segment less selling, general and administrative expense (“SG&A”) incurred by each industry segment plus other income and other expense earned/incurred by each industry segment before general corporate expenses and other business operations, net. The business operation classified as “Other” primarily sells industrial machinery and related components to machine tool dealers and end users. General corporate expenses and other business operations, net consist of unallocated portions of gross profit, SG&A, other income and other expense.

The following table contains certain information about our continuing operations in different industry segments for each of the three years ended December 31:

	2009	2008	2007
	(In Thousands)		
Net sales:

Table of Contents

Year Ended December 31, 2009 Compared to Year Ended December 31, 2008

Climate Control Business

The following table contains certain information about our net sales, gross profit and operating income in our Climate Control segment for 2009 and 2008:

	2009	2008	Change	Percentage Change
	(Dollars In Thousands)			
Net sales:				
Geothermal and water source heat pumps	\$ 179,865	\$ 190,960	\$ (11,095)	(5.8) %
Hydronic fan coils	46,381	83,472	(37,091)	(44.4) %
Other HVAC products	39,923	36,948	2,975	8.1 %
Total Climate Control	\$ 266,169	\$ 311,380	\$ (45,211)	(14.5) %
Gross profit – Climate Control	\$ 92,409	\$ 96,633	\$ (4,224)	(4.4) %
Gross profit percentage – Climate Control (1)	34.7 %	31.0 %	3.7 %	
Operating income – Climate Control	\$ 37,706	\$ 38,944	\$ (1,238)	(3.2) %

(1) As a percentage of net sales

Net Sales – Climate Control

- Net sales of our geothermal and water source heat pump products decreased primarily as a result of a 9.8% decrease in sales of our commercial products due to the slowdown in the construction and renovation activities in the markets we serve partially offset by a 4.0% increase in sales of our residential products. During 2009, we continued to maintain a market share leadership position of approximately 40%, based on market data supplied by the AHRI;
- Net sales of our hydronic fan coils decreased primarily due to a 43.7% decrease in the number of units sold due to the slowdown in the construction and renovation activities in the markets we serve and a decline in the average unit sales price due to change in product mix. During 2009, we continue to have a market share leadership position of approximately 30% based on market data supplied by the AHRI;
- Net sales of our other HVAC products increased primarily as the result of an increase in engineering and construction services completed on construction contracts entered into during 2008 as well as an increase in sales of our modular chillers partially offset by a decline in sales of our large custom air handlers.

Gross Profit – Climate Control

The decrease in gross profit was primarily the result of lower sales volume in our hydronic fan coil and geothermal and water source heat pump products partially offset by a change in product mix, primarily a higher content of geothermal and water source heat pump products that have a higher gross profit percentage, and a decrease in the cost of our raw materials. In addition, our

Table of Contents

engineering and construction business increased its contribution to gross profit on completed projects and customer change orders. As a result, our gross profit percentage improved 3.7% compared to 2008. Competitive pressures on product pricing and recent increases in market prices of raw materials, especially steel, copper and aluminum, could impact gross margins negatively going forward, if we are unable to pass these cost increases to our customers in the form of higher sales prices.

Operating Income – Climate Control

Operating income decreased slightly primarily as a result of the decrease in gross profit as discussed above partially offset by lower operating expenses. Significant changes in operating expenses include lower freight and commission expenses due primarily to reduced sales volume (\$3.1 million and \$2.3 million, respectively) and lower legal and other professional fees (\$0.7 million) due primarily to a patent infringement defense in 2008 and other miscellaneous items (\$0.5 million) partially offset by an increase in advertising expenses (\$3.6 million) as a result of a marketing program launched by one of our subsidiaries.

Chemical Business

The following table contains certain information about our net sales, gross profit and operating income in our Chemical segment for 2009 and 2008:

	2009	2008	Change	Percentage Change
	(Dollars In Thousands)			
Net sales:				
Agricultural products	\$ 104,300	\$ 152,802	\$ (48,502)	(31.7) %
Industrial acids and other chemical products	95,997	162,941	(66,944)	(41.1) %
Mining products	57,535	108,374	(50,839)	(46.9) %
Total Chemical	\$ 257,832	\$ 424,117	\$ (166,285)	(39.2) %
Gross profit - Chemical	\$ 42,422	\$ 37,991	\$ 4,431	11.7 %
Gross profit percentage – Chemical (1)	16.5 %	9.0 %	7.5 %	
Operating income - Chemical	\$ 15,122	\$ 31,340	\$ (16,218)	(51.7) %

(1) As a percentage of net sales

Net Sales - Chemical

The El Dorado and Cherokee Facilities produce all the chemical products described in the table above and the Baytown Facility produces only industrial acids products. For 2009, overall sales prices for the Chemical Business decreased 35% and the volume of tons sold decreased 7%, compared with 2008, generally as a result of the following:

Table of Contents

- Sales prices for products produced at the El Dorado Facility decreased 33% related, in part, to the lower cost of raw material, anhydrous ammonia, part of which is passed through to our customers pursuant to contracts and/or pricing arrangements that include raw material feedstock as a pass-through component in the sales price. Our industrial grade AN is sold to one customer pursuant to a multi-year take or pay supply contract in which the customer has agreed to purchase from our El Dorado Facility a certain minimum volume of industrial grade AN during the year. This customer ordered less than the contractual minimum quantity of industrial grade AN product that it was required to purchase during 2009 contributing to the decline in sales. Pursuant to the terms of the contract, the customer was invoiced and paid for certain unrecovered fixed costs and profit on the minimum volume not taken in 2009. Pricing for agricultural grade AN was lower in 2009 due primarily to falling commodity prices beginning in the later half of 2008. However, fertilizer grade AN volume of tons shipped at the El Dorado Facility increased 36% compared to 2008 as the result of more favorable market conditions. Overall volume of all products sold from the El Dorado Facility increased slightly compared to 2008.
- Sales prices and volumes for products produced at the Cherokee Facility decreased 41% and 3%, respectively, primarily related to the lower market-driven demand for UAN in 2009. This situation was compounded by unfavorable weather conditions in Cherokee's primary market resulting in lower fertilizer application. Sales prices also decreased with the pass through of our lower natural gas costs in 2009 compared to 2008, under pricing arrangements with certain of our industrial customers.
- Sales prices decreased approximately 35% for products produced at the Baytown Facility due to lower ammonia cost, which is a pass-through component to Bayer. Overall volumes decreased 24% as the result of a decline in customer demand primarily due to the economic downturn. Sales are also lower due to the elimination of a pass-through cost component for lease expense as discussed in "Liquidity and Capital Resources-Bayer Agreement". The lower sales prices and lower volumes had only a minimum impact to gross profit and operating income due to certain provisions of the Bayer Agreement.

Gross Profit - Chemical

The increase in gross profit of our Chemical Business includes \$6.6 million in higher margins on our chemical products sold in excess of then current market prices due to firm sales commitments made in 2008 when market prices were higher, and \$6.4 million reduction of losses (both realized and unrealized) on natural gas and ammonia hedging contracts in 2009 compared to 2008. Also contributing to the increase in gross profit was improved production efficiencies of \$3.9 million due, in part, to unplanned downtime incurred at the Cherokee Facility in 2008, a reduction in our turnaround costs due to the timing of certain turnarounds, and an increase in recoveries of precious metals. This increase in gross profit was partially offset by lower agricultural product margins of \$10.8 million due primarily to lower margins on UAN fertilizer. Our UAN margins were lower due to market conditions, including poor weather conditions, a reluctance of distributors to build inventory, and possibly lower levels of nitrogen fertilizer applied to crops. In addition, the Pryor Facility incurred a \$1.2 million loss on firm sales commitments entered into during 2009, of which \$0.4 million relates to outstanding firm sales commitments at December 31, 2009. Primarily as a result of these items, our overall gross profit as a percentage of sales improved for 2009 compared to 2008.

Table of Contents

Operating Income - Chemical

The decrease of our Chemical Business' operating income includes start up expenses associated with the Pryor Facility of approximately \$16.0 million (which does not include the \$1.2 million loss on the Pryor Facility's sales commitments discussed above) compared to \$2.4 million for 2008. In addition, we recognized other operating income of \$7.6 million from a litigation judgment during 2008. This decrease was partially offset by the increase in gross profit of \$4.4 million as discussed above.

Other

The business operation classified as "Other" primarily sells industrial machinery and related components to machine tool dealers and end users. General corporate expenses and other business operations, net consist of unallocated portions of gross profit, SG&A, other income and other expense. The following table contains certain information about our net sales and gross profit classified as "Other" and general corporate expenses and other business operations, net, for 2009 and 2008:

	2009	2008	Change	Percentage Change
	(Dollars In Thousands)			
Net sales - Other	\$ 7,837	\$ 13,470	\$ (5,633)	(41.8)%
Gross profit - Other	\$ 2,583	\$ 4,256	\$ (1,673)	(39.3)%
Gross profit percentage – Other (1)	33.0 %	31.6 %	1.4 %	
General corporate expense and other business operations, net	\$ (12,118)	\$ (11,129)	\$ (989)	8.9 %

(1) As a percentage of net sales

Net Sales - Other

The decrease in net sales classified as "Other" relates primarily to lower demand for new industrial machinery as a result of the present global economic conditions and downturn in capital equipment spending.

Gross Profit - Other

The decrease in gross profit classified as "Other" is due primarily to the decrease in sales as discussed above.

General Corporate Expense and Other Business Operations, Net

Our general corporate expense and other business operations, net increased by approximately \$1.0 million primarily as the result of the decrease in gross profit classified as "Other" as

Table of Contents

discussed above partially offset by a decrease of \$1.1 million of professional fees primarily relating to a reduction in fees associated with the assistance in our evaluation of internal controls and procedures and related documentation for Sarbanes-Oxley requirements and to legal fees on various legal matters.

Interest Expense

Interest expense was \$6.7 million for 2009 compared to \$11.4 million for 2008, a decrease of approximately \$4.7 million. This decrease primarily relates to a decrease in losses of \$2.1 million associated with our interest rate contracts, a decrease of \$1.6 million as the result of the acquisitions of the 2007 Debentures and a decrease of \$1.1 million due to the decline in the LIBOR rate associated with the Secured Term Loan.

Gain on Extinguishment of Debt

During 2009 and 2008, we acquired \$11.1 million and \$19.5 million, respectively, aggregate principal amount of the 2007 Debentures for approximately \$8.9 million and \$13.2 million, respectively, and recognized a gain on extinguishment of debt of \$1.8 million and \$5.5 million, respectively, after expensing the unamortized debt issuance costs associated with the 2007 Debentures acquired.

Non-Operating Other Income, Net

Our non-operating other income, net was \$0.1 million for 2009 compared to \$1.1 million for 2008. The decrease of \$1.0 million relates primarily to higher returns received in 2008 from highly liquid investments.

Provision For Income Taxes

The provision for income taxes for 2009 was \$15.0 million compared to \$18.8 million for 2008. The resulting effective tax rate for 2009 was 40.7% compared to 33.9% for 2008. As discussed under "Overview - 2009 Results," during 2009, we incurred an additional provision relating to adjustments reconciling the 2008 federal and state income tax returns to the 2008 estimated tax provision. Additionally, the impact of lower taxable income which limited the amount of the manufacturing deduction that can be utilized also increased our provision for income taxes. During 2008, we incurred current and deferred federal and state income taxes due, in part, to increased taxable income and higher effective tax rates partially offset by a net deferred income tax benefit of \$1.6 million as the result of a detailed analysis performed on all our deferred tax assets and liabilities and the realizability of those deferred tax assets.

Table of Contents

Year Ended December 31, 2008 Compared to Year Ended December 31, 2007

Climate Control Business

The following table contains certain information about our net sales, gross profit and operating income in our Climate Control segment for 2008 and 2007:

	2008	2007	Change	Percentage Change
	(Dollars In Thousands)			
Net sales:				
Geothermal and water source heat pumps	\$ 190,960	\$ 165,115	\$ 25,845	15.7 %
Hydronic fan coils	83,472	85,815	(2,343)	(2.7) %
Other HVAC products	36,948	35,435	1,513	4.3 %
Total Climate Control	\$ 311,380	\$ 286,365	\$ 25,015	8.7 %
Gross profit - Climate Control	\$ 96,633	\$ 83,638	\$ 12,995	15.5 %
Gross profit percentage - Climate Control (1)	31.0 %	29.2 %	1.8 %	
Operating income - Climate Control	\$ 38,944	\$ 34,194	\$ 4,750	13.9 %

(1) As a percentage of net sales

Net Sales – Climate Control

- Net sales of our geothermal and water source heat pump products increased primarily as a result of a 19% increase in our average selling price per unit due to a change in product mix, primarily more residential products that have higher selling prices and more accessories, partially offset by a 3% decrease in the number of units sold. The number of units sold in 2008 was down slightly due to lower export sales and a decrease in domestic commercial orders as the result of the weaker construction market. During 2008, we continued to maintain a market share leadership position of approximately 40%, based on data supplied by the AHRI;
- Net sales of our hydronic fan coils decreased slightly primarily due to a 7% decrease in the number of units sold partially offset by a 4% increase in our average selling price. During 2008, we continued to maintain a market share leadership position of approximately 37%, based on data supplied by the AHRI;
- Net sales of our other HVAC products increased slightly primarily as the result of an increase in sales of large custom air handlers.

Gross Profit – Climate Control

The increase in gross profit in our Climate Control Business was primarily the result of the increase in sales of our geothermal and water source heat pumps as discussed above and the increase of \$1.3 million in gains recognized on our futures contracts for copper partially offset by the reduction in sales volumes discussed above. In addition, the above changes were also the primary reasons for the increase in our gross profit percentage.

Table of Contents

Operating Income – Climate Control

The net increase in operating income of our Climate Control Business resulted primarily from the net increase of gross profit of \$13.0 million as discussed above. This increase in operating income was partially offset by an increase in variable operating expenses associated with higher sales. Personnel costs increased by \$3.9 million as the result of an increase in the number of personnel and costs associated with group insurance and other employee benefits, warranty expenses increased by \$2.2 million due to the increase in sales volume and actual costs incurred, and professional fees increased by \$1.1 million primarily relating to legal expenses associated with patent defense costs relating to potential new product development in the large air-handler product line.

Chemical Business

The following table contains certain information about our net sales, gross profit and operating income in our Chemical segment for 2008 and 2007:

	2008	2007	Change	Percentage Change
	(Dollars In Thousands)			
Net sales:				
Industrial acids and other chemical products	\$ 162,941	\$ 95,754	\$ 67,187	70.2 %
Agricultural products	152,802	117,158	35,644	30.4 %
Mining products	108,374	75,928	32,446	42.7 %
Total Chemical	\$ 424,117	\$ 288,840	\$ 135,277	46.8 %
Gross profit - Chemical	\$ 37,991	\$ 44,946	\$ (6,955)	(15.5)%
Gross profit percentage – Chemical (1)	9.0 %	15.6%	(6.6) %	
Operating income - Chemical	\$ 31,340	\$ 35,011	\$ (3,671)	(10.5)%

(1) As a percentage of net sales

Net Sales - Chemical

The El Dorado and Cherokee Facilities produce all the chemical products described in the table above and the Baytown Facility produces only industrial acids products. For 2008, overall sales prices for the Chemical Business increased 59% while the volume of tons sold decreased 6%, compared with 2007.

- Sales prices at the El Dorado Facility increased 47% related, in part, to the high cost of raw materials, anhydrous ammonia and sulfur, the majority of which we were able to pass through to our customers and also to strong global agricultural market demand relative to supply volumes during this period. Volume at the El Dorado Facility decreased 13% or 86,000 tons. The decrease in tons sold was primarily attributable to (i) 69,000 fewer tons of agricultural AN and other bulk fertilizers sold primarily in the first half of 2008 compared to

Table of Contents

- the same period of 2007 due to poor weather conditions and lower demand for AN in favor of urea, a competing product in El Dorado's market area, as well as reduced forage application due to poor conditions in the cattle market and (ii) 11,000 fewer tons of sulfuric acid due primarily to the bi-annual Turnaround of the sulfuric acid plant.
- Sales prices and volumes at the Cherokee Facility increased 61% and 9%, respectively, primarily related to the market-driven demand for UAN and mining products. Sales prices also increased with the pass through of our higher natural gas costs in 2008 compared to 2007, recoverable under pricing arrangements with certain of our industrial customers. The increase in volume was partially offset by the unplanned maintenance downtime experienced during the third quarter of 2008;
- Sales prices increased approximately 96% at the Baytown Facility due to higher global ammonia pricing, which is recoverable under the Original Bayer Agreement but had a minimum impact to gross profit and operating income. Overall volumes decreased 11% as the result of a decline in customer demand after Hurricane Ike and following the economic downturn.

Gross Profit - Chemical

The decrease in gross profit of our Chemical Business relates to several significant items. We recognized unrealized losses of \$5.3 million on our natural gas and ammonia futures/forward contracts outstanding at December 31, 2008. In addition, we have estimated that the Cherokee Facility incurred costs of approximately \$5.1 million as the result of unplanned maintenance downtime during 2008 compared to \$1.1 million in 2007. Also at December 31, 2008, we recognized a lower of cost or market provision on inventory of \$3.6 million due to declines in global nitrogen prices as demand fell as the result of buyers' concerns over volatile commodity prices and the global economic crisis. In addition during 2008, the amount expensed for precious metals, net of recoveries and gains, was \$6.3 million compared to \$2.6 million during 2007. In general, other non-raw material manufacturing expenses, including steam (produced from natural gas), maintenance and Turnarounds, electricity and labor, increased during 2008 compared to 2007. Our Chemical Business incurred expenses for Turnarounds of \$6.0 million for 2008 compared to \$3.4 million for 2007. This decrease in gross profit was partially offset by the increase in sales prices of products sold by the El Dorado and Cherokee Facilities, as discussed above, in relation to raw material costs. During 2007, we realized non-recurring insurance recoveries of \$3.8 million relating to a business interruption claim. These recoveries contributed to an increase in gross profit in 2007. As a result of these changes discussed above, our overall gross profit percentage declined for 2008 as compared to 2007.

Operating Income - Chemical

The net decrease of our Chemical Business' operating income includes the net decrease in gross profit of \$7.0 million as discussed above. Also, we incurred an increase in expenses associated with the Pryor Facility of \$1.4 million due to the process of activating this facility. The decrease in operating income was partially offset by other income recognized by our Chemical Business of \$7.6 million from a litigation judgment during 2008, as previously reported. During 2007, we recognized income of \$3.3 million relating to a litigation settlement.

Table of Contents

Other

The following table contains certain information about our net sales and gross profit classified as “Other” and general corporate expenses and other business operations, net, for 2008 and 2007:

	2008	2007	Change	Percentage Change
	(Dollars In Thousands)			
Net sales - Other	\$ 13,470	\$ 11,202	\$ 2,268	20.2%
Gross profit - Other	\$ 4,256	\$ 4,009	\$ 247	6.2%
Gross profit percentage – Other (1)	31.6 %	35.8 %	(4.2) %	
General corporate expense and other business operations, net	\$ (11,129)	\$ (10,194)	\$ (935)	9.2%

(1) As a percentage of net sales

Net Sales - Other

The increase in net sales classified as “Other” relates primarily to increased customer demand for our machine tool products.

Gross Profit - Other

The increase in gross profit classified as “Other” is due primarily to the increase in sales as discussed above. The decline in our gross profit percentage was primarily due to additional costs incurred relating to a large customized industrial machine tool, freight costs and the recognition of losses of \$0.2 million on our foreign currency contracts.

General Corporate Expense and Other Business Operations, Net

The net increase in our general corporate expense and other business operations, net relates primarily to increased personnel costs of \$1.1 million resulting from increased compensation and other employee benefits, professional fees of \$0.5 million due, in part, for assistance in our evaluation of our internal controls and procedures and related documentation for Sarbanes-Oxley requirements and to legal fees on various litigation matters and other expense of \$0.6 million relating primarily to potential litigation settlements, an impairment of long-lived assets and income tax related penalties, partially offset by an increase in other income of \$0.7 million due, in part, to litigation settlements.

Interest Expense

Interest expense was \$11.4 million for 2008 compared to \$12.1 million for 2007, a decrease of \$0.7 million. This net decrease primarily relates to a decrease of \$3.4 million as the result of obtaining a lower interest rate associated with the Secured Term Loan compared to the interest

Table of Contents

rate associated with the previous senior secured loan and a decrease of \$1.0 million due to the continual pay off of the Working Capital Revolver Loan during 2008, partially offset by the increase in realized and unrealized losses of \$2.5 million relating to our interest rate contracts and the increase of \$1.7 million relating to the 2007 Debentures.

Gain on Extinguishment of Debt

During 2008, we acquired \$19.5 million aggregate principal amount of the 2007 Debentures for \$13.2 million and recognized a gain on extinguishment of debt of \$5.5 million, after expensing \$0.8 million of the unamortized debt issuance costs associated with the 2007 Debentures acquired.

Provision For Income Taxes

The provision for income taxes for 2008 was \$18.8 million compared to \$2.5 million for 2007. During 2008, we incurred current and deferred federal and state income taxes due, in part, to increased taxable income and higher effective tax rates partially offset by a net deferred income tax benefit of \$1.6 million as the result of a detailed analysis performed on all our deferred tax assets and liabilities and the realizability of those deferred tax assets. During 2007, we incurred federal and state income taxes resulting from increased taxable income and additional prior year state income taxes recorded pursuant to a then new accounting standard. However, these provisions were partially offset by the benefit of deferred taxes from the reversal of valuation allowances.

Cash Flow From Continuing Operating Activities

Historically, our primary cash needs have been for operating expenses, working capital and capital expenditures. We have financed our cash requirements primarily through internally generated cash flow, borrowings under our revolving credit facilities, secured asset financing and the sale of assets. See additional discussions concerning cash flow relating to our Climate Control and Chemical Businesses under “Overview” and “Liquidity and Capital Resources” of this MD&A.

For 2009, net cash provided by continuing operating activities was \$57.7 million, including net income plus depreciation and amortization, deferred income taxes, stock-based compensation, gain on extinguishment of debt, realization of losses on inventory and other adjustments and the net cash provided by the following significant changes in assets and liabilities.

Accounts receivable decreased \$22.1 million including:

- a decrease of \$13.8 million in the Climate Control Business due, in part, to the decline in sales relating to our hydronic fan coil and geothermal and water source heat pump products, reduction in billings associated with construction contracts, and an improvement in the timing of collections,
- a net decrease of \$7.7 million in the Chemical Business primarily as the result of lower sales prices and tons sold from our Cherokee Facility and an improvement in the timing of collections, and

Table of Contents

- a decrease of \$0.6 million in the industrial machinery business due primarily to a decrease in sales of large machinery.

Inventories decreased \$11.9 million including:

- a decrease of \$9.0 million in the Chemical Business primarily relating to the El Dorado and Cherokee Facilities due to the decline in costs of our raw material feedstocks and volume on hand partially offset by the inventory produced as the result of activating our Pryor Facility and
- a decrease of \$2.7 million in the Climate Control Business due primarily to the reduction in the volume on hand associated with our hydronic fan coil and geothermal and water source heat pump products.

The change in prepaid and accrued income taxes of \$2.7 million primarily to payments made to the taxing authorities partially offset by the recognition of income taxes for 2009.

Other supplies and prepaid items decreased \$0.2 million including:

- a decrease of \$1.6 million relating to lower costs and volume on hand of precious metals used in the manufacturing process of our Chemical Business, partially offset by
- an increase of \$0.8 million of prepaid insurance primarily as the result of increased insurance premiums related to the Pryor Facility and
- an increase of \$0.6 million of supplies relating to the Chemical Business due primarily to an increase in the volume on hand including the additions at the Pryor Facility.

Accounts payable decreased \$6.2 million relating primarily to a decrease of \$5.7 million in the Climate Control Business primarily as the result of a reduction in raw material purchases and a decrease in certain raw material costs. Accounts payable relating to our Chemical Business had a minimal net increase due, in part, to increased start-up costs at the Pryor Facility partially offset by the decrease in costs of our raw material feedstocks and the timing of maintenance projects performed at the El Dorado Facility.

Commodities contracts decreased \$5.9 million primarily as the result of these contracts being settled during 2009.

Customer deposits decreased \$2.6 million primarily as the result of the shipment of products associated with these deposits that includes:

- a decrease of \$1.5 million in the Chemical Business,
- a decrease of \$0.6 million in the Climate Control Business, and
- a decrease of \$0.5 million in our industrial machinery business.

Deferred rent expense decreased \$1.4 million as the result of the scheduled lease payments during 2009 exceeding the rent expense recognized on a straight-line basis. The scheduled lease payments ended in June 2009 when the previous Bayer agreement was replaced by the current Bayer Agreement.

Table of Contents

The decrease in other current and noncurrent liabilities of \$4.0 million includes primarily:

- a decrease in accrued contractual manufacturing obligations of \$1.5 million primarily as the result of our Chemical Business paying a portion of these obligations in December 2009,
- decrease in accrued commissions of \$1.4 million due primarily to lower sales volume in related distribution channels relating to our Climate Control Business, and
- a decrease in billings in excess of costs and estimated earnings on uncompleted contracts of \$1.3 million primarily due to costs incurred during 2009 associated with these construction contracts relating to our Climate Control Business.

Cash Flow from Continuing Investing Activities

Net cash used by continuing investing activities for 2009 was \$38.1 million that consisted primarily of \$28.9 million for capital expenditures of which \$5.1 million and \$23.3 million are for the benefit of our Climate Control and Chemical Businesses, respectively. The capital expenditures used by our Chemical Business includes \$8.1 million relating to the Pryor Facility. In addition, we invested \$10.1 million in short-term investments consisting of certificates of deposit with an original maturity of 13 weeks.

Cash Flow from Continuing Financing Activities

Net cash used by continuing financing activities for 2009 was \$3.9 million that primarily consisted of \$8.9 million used for the acquisition of \$11.1 million aggregate principal amount of the 2007 Debentures, purchases of treasury stock of \$3.2 million, and payments on other long-term debt totaling \$2.3 million partially offset by net proceeds from other long-term debt of \$8.6 million.

Performance and Payment Bonds

We are contingently liable to sureties in respect of certain insurance bonds issued by the sureties in connection with certain contracts entered into by our subsidiaries in the normal course of business. These insurance bonds primarily represent guarantees of future performance of our subsidiaries. As of December 31, 2009, we have agreed to indemnify the sureties for payments, up to \$22.9 million, made by them in respect of such bonds. Approximately \$21.7 million of these insurances bonds expire in 2010 while the remaining \$1.2 million expire in 2011.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements as defined in Item 303(a)(4)(ii) of Regulation S-K under the Securities Exchange Act of 1934, as amended, except for the following:

Cepolk Holding, Inc. ("CHI"), a subsidiary of the Company, is a limited partner and has a 50% equity interest in Cepolk Limited Partnership ("Partnership") which is accounted for on the equity method. The Partnership owns an energy savings project located at the Ft. Polk Army

Table of Contents

base in Louisiana (“Project”). At December 31, 2009, our investment was \$3.8 million. For 2009, distributions received from this Partnership were approximately \$0.8 million and our equity in earnings was approximately \$1.0 million. As of December 31, 2009, the Partnership and general partner to the Partnership are indebted to a term lender (“Lender”) of the Project for approximately \$2.1 million with a term extending to December 2010 (“Loan”). CHI has pledged its limited partnership interest in the Partnership to the Lender as part of the Lender’s collateral securing all obligations under the Loan. This guarantee and pledge is limited to CHI’s limited partnership interest and does not expose CHI or the Company to liability in excess of CHI’s limited partnership interest. In accordance with GAAP, no liability is required to be established for this pledge since it was entered into prior to January 1, 2003. CHI has no recourse provisions or available collateral that would enable CHI to recover its partnership interest should the Lender be required to perform under this pledge.

69

Table of Contents

Aggregate Contractual Obligations

Our aggregate contractual obligations as of December 31, 2009 are summarized in the following table.

Contractual Obligations (In Thousands)	Payments Due in the Year Ending December 31,						
	Total	2010	2011	2012	2013	2014	Thereafter
Long-term debt:							
5.5% Convertible Senior Subordinated Notes	\$ 29,400	\$ -	\$ -	\$ 29,400	\$ -	\$ -	\$ -
Secured Term Loan due 2012	50,000	-	-	50,000	-	-	-
Capital leases	1,742	532	462	378	335	35	-
Other	20,659	2,673	2,821	2,988	3,164	2,595	6,418
Total long-term debt	101,801	3,205	3,283	82,766	3,499	2,630	6,418
Interest payments on long-term debt (1)	14,606	4,582	4,380	3,121	710	507	1,306
Interest rate contracts (2)	1,929	1,084	742	103	-	-	-
Capital expenditures (3)	7,850	7,850	-	-	-	-	-
Operating leases	17,459	4,606	3,949	3,374	2,446	2,150	934
Futures/forward contracts	2,873	2,873	-	-	-	-	-
Accrued contractual manufacturing obligations	732	732	-	-	-	-	-
Purchase obligations	870	870	-	-	-	-	-
Other contractual obligations included in noncurrent accrued and other liabilities	4,405	-	155	115	103	105	3,927
Total	\$ 152,525	\$ 25,802	\$ 12,509	\$ 89,479	\$ 6,758	\$ 5,392	\$ 12,585

(1) The estimated interest payments relating to variable interest rate debt are based on the effective interest rates at December 31, 2009.

(2) The estimated future cash flows are based on the estimated fair value of these contracts at December 31, 2009.

(3) Capital expenditures include only non-discretionary amounts in our 2010 capital expenditure budget.

Availability of Company's Income Tax Loss Carry-Overs

For a discussion on our income tax net operating loss carry-overs, see Note 14 of Notes to Consolidated Financial Statements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

General

Our results of operations and operating cash flows are impacted by changes in market prices of copper, steel, anhydrous ammonia and natural gas, changes in market currency exchange rates, and changes in market interest rates.

Forward Sales Commitments Risk

Periodically, our Climate Control and Chemical Businesses enter into forward sales commitments of products for deliveries in future periods. As a result, we could be exposed to embedded losses should our product costs exceed the firm sales prices. At December 31, 2009, we had \$0.4 million of embedded losses associated with sales commitments with firm sales prices in our Chemical Business.

Commodity Price Risk

Our Climate Control Business buys substantial quantities of copper and steel for use in manufacturing processes and our Chemical Business buys substantial quantities of anhydrous ammonia and natural gas as feedstocks generally at market prices. As part of our raw material price risk management, periodically, our Climate Control Business enters into futures contracts for copper and our Chemical Business enters into futures/forward contracts for anhydrous ammonia and natural gas, which contracts are generally accounted for on a mark-to-market basis. At December 31, 2009, our purchase commitments under copper contracts were for 750,000 pounds of copper through May 2010 at a weighted-average cost of approximately \$3.19 per pound (\$2,390,000) and a weighted-average market value of approximately \$3.35 per pound (\$2,512,000). In addition, our Chemical Business had contractual rights under natural gas call contracts for approximately 150,000 MMBtu of natural gas through February 2010 at a weighted-average price of \$6.00 per MMBtu (\$900,000). At December 31, 2009, the weighted-average market value of these natural gas call contracts (unrealized gain) was approximately \$0.19 per MMBtu (\$29,000).

Foreign Currency Risk

One of our business operations purchases industrial machinery and related components from vendors outside of the United States. As part of our foreign currency risk management, we periodically entered into foreign currency contracts. At December 31, 2009, our commitments under these contracts were for the receipt of approximately 336,000 Euros through April 2010 at a weighted-average contract exchange rate of 1.435, which rate approximated the market exchange rate.

Table of Contents

Interest Rate Risk

Our interest rate risk exposure results from our debt portfolio which is impacted by short-term rates, primarily variable-rate borrowings from commercial banks, and long-term rates, primarily fixed-rate notes, some of which prohibit prepayment or require a substantial premium payment with the prepayment.

As part of our interest rate risk management, we periodically purchase and/or enter into various interest rate contracts. At December 31, 2009, we have an interest rate swap, which sets a fixed three-month LIBOR rate of 3.24% on \$25 million and matures in April 2012. Also, we have an interest rate swap, which sets a fixed three-month LIBOR rate of 3.595% on \$25 million and matures in April 2012. These contracts are free-standing derivatives and are accounted for on a mark-to-market basis. At December 31, 2009, the fair value of these contracts (unrealized loss) was \$1.9 million.

72

Table of Contents

The following table presents principal amounts and related weighted-average interest rates by maturity date for our interest rate sensitive debt agreements and the estimated future cash flows and related estimated weighted-average receive rate for our interest rate sensitive interest rate swaps as of December 31, 2009.

	Years ending December 31,						Total
	2010	2011	2012	2013	2014	Thereafter	
(Dollars In Thousands)							
Expected maturities of long-term debt (1):							
Variable rate debt	\$ 123	\$ 122	\$ 50,130	\$ 138	\$ 147	\$ 1,893	\$ 52,553
Weighted-average interest rate							
	3.41%	3.40%	3.50%	6.00%	6.00%	6.00%	3.60%
Fixed rate debt	\$ 3,082	\$ 3,161	\$ 32,636	\$ 3,361	\$ 2,483	\$ 4,525	\$ 49,248
Weighted-average interest rate							
	5.82%	5.79%	5.91%	6.52%	6.67%	6.78%	6.06%
Estimated future cash flows of interest rate swaps (2):							
Variable to Fixed	\$ 1,084	\$ 742	\$ 103	\$ -	\$ -	\$ -	\$ 1,929
Weighted-average pay rate							
	3.42%	3.42%	3.42%	-%	-%	-%	3.42%
Weighted-average receive rate							
	0.84%	2.01%	2.97%	-%	-%	-%	2.15%

(1) The variable and fixed rate debt balances and weighted-average interest rate are based on the aggregate amount of debt outstanding as of December 31, 2009.

(2) The estimated future cash flows and related weighted-average receive rate are based on the estimated fair value of these contracts as of December 31, 2009.

Table of Contents

The following table presents our purchase commitments under futures/forward contracts and related weighted-average contract costs/exchange rate by contract terms as of December 31, 2009.

	Years ending December 31,					Thereafter	Total
	(Dollars In Thousands, Except For Per Pound)						
	2010	2011	2012	2013	2014		
Futures/Forward contracts:							
Copper:							
Total cost of contracts	\$ 2,390						\$ 2,390
Weighted-average cost per pound							
	\$ 3.19						\$ 3.19
Foreign Currency (1):							
Total cost of contract	\$ 483						\$ 483
Weighted-average contract exchange rate							
	0.70						0.70

(1) Our commitments under these contracts are to pay in U.S Dollars and receive approximately 336,000 Euros.

Table of Contents

Our long-term debt agreements are the only financial instruments with fair values significantly different from their carrying amounts. At December 31, 2009 and 2008, the estimated fair value of the Secured Term Loan is based on defined LIBOR rates plus 7% and 10%, respectively, utilizing information obtained from the lender. Fair values for fixed rate borrowings, other than the 2007 Debentures, are estimated using a discounted cash flow analysis that applies interest rates currently being offered on borrowings of similar amounts and terms to those currently outstanding while also taking into consideration our current credit worthiness. At December 31, 2009 and 2008, the estimated fair value of the 2007 Debentures is based on quoted prices obtained from a broker for these debentures. The following table shows the estimated fair value and carrying value of our borrowings at:

	December 31, 2009		December 31, 2008		
	Estimated Fair Value	Carrying Value	Estimated Fair Value	Carrying Value	
	(In Thousands)				
Variable Rate:					
Secured Term Loan		\$ 27,640	\$ 50,000	\$ 20,939	\$ 50,000
Working Capital Revolver Loan		-	-	-	-
Other debt		2,553	2,553	8	8

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

We have included the financial statements and supplementary financial information required by this item immediately following Part IV of this report and hereby incorporate by reference the relevant portions of those statements and information into this Item 8.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

As of the end of the period covered by this report, we carried out an evaluation, with the participation of our Principal Executive Officer and Principal Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15 under the Securities Exchange Act of 1934). Based upon that evaluation, we have concluded, with the participation of our Principal Executive Officer and our Principal Financial Officer, that our disclosure controls and procedures were effective. There were no changes to our internal control over financial reporting during the quarter ended December 31, 2009 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Our internal control system was designed to provide reasonable assurance to our management and board of directors regarding the preparation and fair presentation of published financial statements. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

Our management assessed the effectiveness of our internal control over financial reporting as of December 31, 2009. In making this assessment, it used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in Internal Control - Integrated Framework. Based on our assessment, we believe that, as of December 31, 2009, our internal control over financial reporting is effective based on those criteria.

Our independent registered public accounting firm has issued an attestation report on our internal control over financial reporting. This report appears on the following page.

Table of Contents

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders of LSB Industries, Inc.

We have audited LSB Industries, Inc.'s internal control over financial reporting as of December 31, 2009 based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). LSB Industries, Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, LSB Industries, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2009, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of LSB Industries, Inc. as of December 31, 2009 and 2008, and the related consolidated statements of income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2009 of LSB Industries, Inc. and our report dated March 8, 2010 expressed an unqualified opinion thereon.

None.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

Certain statements contained within this report may be deemed "Forward-Looking Statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements in this report other than statements of historical fact are Forward-Looking Statements that are subject to known and unknown risks, uncertainties and other factors which could cause actual results and performance of the Company to differ materially from such statements. The words "believe", "expect", "anticipate", "intend", and similar expressions identify Forward-Looking Statements. Forward-Looking Statements contained herein relate to, among other things,

- a factor that may affect product order rates going forward is the potential for growth in our highly energy-efficient geothermal water-source heat pumps, which could benefit significantly from government stimulus programs, including various tax incentives;
- for the short term, we do expect to see lower demand for most of our Climate Control products;
- tax credits and incentives, and certain planned direct spending by the federal government contained in the American Reinvestment and Recovery Act of 2009, could stimulate sales of our geothermal heat pump products, as well as other products that could be used to modernize federally owned and operated buildings, military installations, public housing and hospitals;
- the market share for commercial water source heat pumps relative to other types of heating and air-conditioning systems will continue to grow due to the relative efficiency and longevity of such systems, as well as due to the emergence of the replacement market for those systems;
- the energy efficiency, longer life, and relatively short payback periods of geothermal systems, as compared with air-to-air systems, as well as tax incentives that are available to builders and homeowners when installing geothermal systems, will continue to increase demand for our geothermal products;
- levels of repair, replacement, and new construction activity generally drive demand in the geothermal and water source heat pumps and hydronic fan coil markets;
- our investment in the Climate Control Business will continue if customer product order intake levels warrant such investment, and our investments will increase our capacity to produce and distribute our Climate Control products;
- to ship substantially all of the customer product orders included in the Climate Control Business' backlog within the next twelve months; however, due to the current economic conditions in the markets we serve, it is possible that some of our customers could cancel a portion of our backlog or extend the shipment terms beyond twelve months;
- no difficulties in obtaining necessary materials for our Climate Control Business;
- the ability to pass to our customers the majority of any raw material cost increases in the form of higher prices, but the timing of these price increases could lag the increases in the cost of materials, having sufficient sources for materials, and a shortage of raw materials could impact production of our Climate Control products;

Table of Contents

- to continue to launch new products and product upgrades in an effort to maintain and increase our current market position and to establish a presence in new markets served by the Climate Control Business;
- the market demand for our industrial acids and mining products will be flat to slightly up, for the first half of 2010, and the nitrogen fertilizer supply and demand fundamentals appear to be favorable; however, it is possible that the fertilizer outlook could be adversely affected by lower grain prices, unanticipated spikes in natural gas prices, or unfavorable weather conditions;
- when producing at a sustained level, we expect the Pryor Facility to produce and sell at an annualized rate of approximately 325,000 tons of UAN and 35,000 tons of anhydrous ammonia;
- we can obtain anhydrous ammonia from other sources in the event of an interruption of service under our current supply contract;
- the overall commercial construction sector is not expected to recover during 2010, but there is a projected increase in both single-family residential and multi-family construction during 2010;
- for 2010, the potential sales level remains uncertain for the Climate Control Business;
- to see continued slowness in our Climate Control Business' results in the short-term;
- that the recently enacted federal tax credits for GHPs should have a positive impact on sales of those highly energy efficient and green products;
- the Pryor Facility monthly operating start up costs, prior to production of UAN at sustained targeted rates, are approximately \$1.6 million in addition to variable costs such as natural gas and electricity;
- our Chemical Business' sales in the industrial, mining and agricultural sectors for 2010 will continue to be affected by the overall economic conditions;
- our primary cash needs will be for working capital and capital expenditures for 2010;
- we and our subsidiaries plan to rely upon internally generated cash flows, cash and short-term investments on hand, secured property and equipment financing, and the borrowing availability under the Working Capital Revolver Loan to fund operations and pay obligations;
- the amount of committed and planned capital expenditures for 2010, including the amounts for the Climate Control and Chemical Businesses;
- the amount of Turnaround Costs and expenses associated with environmental regulatory compliance to be incurred in 2010;
- while future emission regulations or new laws appear likely, it is too early to predict how these regulations, if and when adopted, will affect our businesses, operations, liquidity or financial results;
- the actual development of claims could exceed our estimates as they relate to our accrued liabilities;
- meeting all required covenant tests for all quarters and the year ending in 2010, and
- environmental and health laws and enforcement policies thereunder could result, in compliance expenses, cleanup costs, penalties or other liabilities relating to the handling, manufacture, use, emission, discharge or disposal of pollutants or other substances at or from our facilities or the use or disposal of certain of its chemical products.

Table of Contents

While we believe the expectations reflected in such Forward-Looking Statements are reasonable, we can give no assurance such expectations will prove to have been correct. There are a variety of factors which could cause future outcomes to differ materially from those described in this report, including, but not limited to,

- changes in general economic conditions, both domestic and foreign,
- material reduction in revenues,
- material changes in interest rates,
- ability to collect in a timely manner a material amount of receivables,
- increased competitive pressures,
- changes in federal, state and local laws and regulations, especially environmental regulations, or in interpretation of such,
- additional releases (particularly air emissions) into the environment,
- material increases in equipment, maintenance, operating or labor costs not presently anticipated by us,
- the requirement to use internally generated funds for purposes not presently anticipated,
- the inability to pay or secure additional financing for planned capital expenditures,
- material changes in the cost of certain precious metals, anhydrous ammonia, natural gas, copper and steel,
- changes in competition,
- the loss of any significant customer,
- changes in operating strategy or development plans,
- inability to fund the working capital and expansion of our businesses,
- changes in the production efficiency of our facilities,
- adverse results in any of our pending litigation,
- activating operations at full production rates at the Pryor Facility,
- inability to obtain necessary raw materials,
- other factors described in the MD&A contained in this report, and
- other factors described in “Risk Factors”.

Given these uncertainties, all parties are cautioned not to place undue reliance on such Forward-Looking Statements. We disclaim any obligation to update any such factors or to publicly announce the result of any revisions to any of the Forward-Looking Statements contained herein to reflect future events or developments.

Table of Contents

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

General

The Certificate of Incorporation and By-laws of the Company provide for the division of the Board of Directors into three classes, each class consisting as nearly as possible of one-third of the whole. The term of office of one class of directors expires each year; with each class of directors elected for a term of three years and until the shareholders elect their qualified successors.

The Company's By-laws provide that the Board of Directors, by resolution from time to time, may fix the number of directors that shall constitute the whole Board of Directors. The By-laws presently provide that the number of directors may consist of not less than 3 nor more than 14. The Board of Directors currently has set the number of directors at 14.

Only persons who are nominated in accordance with the procedures set forth in our Bylaws are eligible for election as directors. Pursuant to the August 20, 2009 amendments to our Bylaws, nominations of persons for election to the Board of Directors may be made at a meeting of stockholders at which directors are to be elected only (i) by or at the direction of the Board of Directors; or (ii) by any stockholder of the Company entitled to vote for the election of directors at the meeting who complies with the notice procedures set forth in our Bylaws. A director nomination made by a stockholder must be delivered or mailed to and received at our principal executive offices not less than 120 nor more than 150 days prior to the date of the meeting; provided, however, that in the event the date of the annual meeting is more than 30 days before or more than 60 days after such date, notice by the stockholder to be timely must be so delivered, or mailed and received not later than the 90th day prior to such annual meeting, or if later, the 10th day following the date on which the public disclosure of the date of such annual meeting was so made.

Our Nominating and Governance Committee reviews the composition of the Board to assess the Board performance, composition, and effectiveness. The Nominating Committee values certain characteristics to all Board members, including personal and professional integrity, reputation, outstanding professional achievement, and sound business judgment. The Nominating Committee evaluates each individual director in the context of the Board as a whole with the goal of recommending an effective group with a diversity of experience and skills that exercises sound business judgment in the interest of our business and our shareholders.

Directors

Raymond B. Ackerman, age 87. Mr. Ackerman first became a director in 1993. His term will expire in 2011. From 1952 until his retirement in 1992, Mr. Ackerman served as Chairman of the Board and President of Ackerman McQueen, Inc., the largest advertising and public relations firm headquartered in Oklahoma. He currently serves as Chairman Emeritus of the firm. He retired as a Rear Admiral in the United States Naval Reserve. He is a graduate of Oklahoma City University, and in 1996, was awarded an honorary doctorate from the school. He was elected to the Oklahoma Hall of Fame in 1993 and the Oklahoma Commerce and Industry Hall of Honor in

Table of Contents

1998. He served as the President of the Oklahoma City Chamber of Commerce, the United Way, Allied Arts and six other Oklahoma City non-profit organizations. Mr. Ackerman's advertising and public relations experience, and his leadership skills and business experience, among other factors, led the Board to conclude that he should serve as a director.

Robert C. Brown, M.D., age 78. Dr. Brown first became a director in 1969. His term will expire in 2012. Dr. Brown has practiced medicine for many years and is Vice President and Treasurer of Plaza Medical Group, P.C. Dr. Brown received both his undergraduate and medical degrees from Tufts University after which he spent two years as a doctor in the United States Navy and over three years at the Mayo Clinic. Dr. Brown is also a Clinical Professor at Oklahoma University Health Science Center. Dr. Brown has experience with and insight into all aspects of developing and growing a company and as President and Chief Executive Officer oversaw the launch and sale of a medical claims clearinghouse which was sold, ultimately, to WebMD. Dr. Brown is currently President and Chief Executive Officer of ClaimLogic L.L.C., a medical claims clearinghouse specializing in the provision of medical clearinghouse services to university affiliated hospitals and other medical providers throughout the United States. Dr. Brown served as President of the Medical Staff of Baptist Medical Center of Oklahoma. He is a Board member of Integris Physicians Services, Inc. Dr. Brown's leadership experience, entrepreneurial business experience and broad range of knowledge of the Company history and business through his service as a director, among other factors, led the Board to conclude that he should serve as a director.

Charles A. Burtch, age 74. Mr. Burtch first became a director in 1999. His term will expire in 2010. Mr. Burtch was formerly Executive Vice-President and West Division Manager of BankAmerica, where he managed BankAmerica's asset-based lending division for the western third of the United States. He retired in 1998 and has since been engaged as a private investor. Mr. Burtch is a graduate of Arizona State University. Mr. Burtch's financial experience and his experience as executive vice president of a large commercial bank, among other factors, led the Board to conclude that he should serve as a director.

Robert A. Butkin, age 57. Mr. Butkin first became a director in August 2007. His term will expire in 2010. Mr. Butkin is currently a Professor of Law at the University of Tulsa College of Law. He was Dean of the Tulsa College of Law from 2005 to 2007. Mr. Butkin also serves as President of BRJN Capital Corporation a private investment company. Mr. Butkin served as Assistant Attorney General for the State of Oklahoma from 1987 to 1993, and served from 1995 to 2005 as the State Treasurer of Oklahoma. He has served in various organizations, including holding the presidency of the Southern State Treasurers Association. He chaired the Banking, Collateral and Cash Management Committee for the National Association of State Treasurers ("NAST"). In addition, from 1981 to 1995, he served on the Board of Citizens Bank of Velma, Oklahoma, and he served as Chairman of the Board of that bank from 1991 to 1994. He attended and received a Bachelor of Arts degree from Yale College. He received his Juris Doctorate from the University of Pennsylvania Law School in 1978. Mr. Butkin's leadership skills and financial experience obtained through serving as State Treasurer of Oklahoma, chairman of the banking committee of NAST, leading his private investment company, and service as the dean of a major law school in the State of Oklahoma, among other factors, led the Board to conclude that he should serve as a director.

Table of Contents

Barry H. Golsen, J.D., age 59. Mr. Golsen first became a director in 1981. His term will expire in 2012. Mr. Golsen was elected President of the Company in 2004. Mr. Golsen has served as our Vice Chairman of the Board of Directors since August 1994, and has been the President of our Climate Control Business for more than five years. Mr. Golsen served as a director of the Oklahoma branch of the Federal Reserve Bank. Mr. Golsen has both his undergraduate and law degrees from the University of Oklahoma. Mr. Golsen's extensive experience in the climate control industry, his depth of knowledge and understanding of the business in which the Company operates, and his demonstrated leadership skills within the Company, among other factors, led the Board to conclude that he should serve as a director.

Jack E. Golsen, age 81. Mr. Golsen first became a director in 1969. His term will expire in 2010. Mr. Golsen, founder of the Company, is our Chairman of the Board of Directors and Chief Executive Officer and has served in that capacity since our inception in 1969. Mr. Golsen served as our President from 1969 until 2004. During 1996, he was inducted into the Oklahoma Commerce and Industry Hall of Honor as one of Oklahoma's leading industrialists. Mr. Golsen has a Bachelor of Science degree from the University of New Mexico. Mr. Golsen is a Trustee of Oklahoma City University. During his career, he acquired or started the companies which formed the Company. He has served on the boards of insurance companies, several banks and was Board Chairman of Equity Bank for Savings N.A. which was formerly owned by the Company. In 1972 he was recognized nationally as the person who prevented a widespread collapse of the Wall Street investment banking industry. Refer to "The Second Crash" by Charles Ellis, and five additional books about the Wall Street crisis. Mr. Golsen's demonstrated leadership skills and extensive experience and understanding in all industries in which the Company operates, his financial experience and broad business knowledge, among other factors, led the Board to conclude that he should serve as a director.

David R. Goss, age 69. Mr. Goss first became a director in 1971. His term will expire in 2012. Mr. Goss, a certified public accountant, is our Executive Vice President of Operations and has served in substantially the same capacity for more than five years. Mr. Goss is a graduate of Rutgers University. Mr. Goss's accounting and financial experience and extensive knowledge of the industries in which the Company operates, among other factors, led the Board to conclude that he should serve as a director.

Bernard G. Ille, age 83. Mr. Ille first became a director in 1971. His term will expire in 2011. Mr. Ille served as President and Chief Executive Officer of United Founders Life from 1966 to 1988. He served as President and Chief Executive Officer of First Life Assurance Company from 1988, until it was acquired by another company in 1994. During his tenure as President of these two companies, he served as Chairman of the Oklahoma Guaranty Association for ten years and was President of the Oklahoma Association of Life Insurance Companies for two terms. He was a director of Landmark Land Company, Inc., which was the parent company of First Life. He is also a director for Quail Creek Bank, N.A. Mr. Ille is currently President of BML Consultants and a private investor. He is a graduate of the University of Oklahoma. Mr. Ille's leadership of a major insurance company in Oklahoma, his financial and insurance background, and his investment experience, among other factors, led the Board to conclude that she should serve as a director.

Table of Contents

Gail P. Lapidus, age 58. The Board of Directors appointed Ms. Lapidus as a director in February 2010 to fill a newly-created vacancy. Her term will expire in 2012. Ms. Lapidus is the Executive Director and CEO of Family & Children's Services ("FCS"), a premiere human services provider in the Tulsa, Oklahoma metro area. Ms. Lapidus has been with the 85 year old agency for 35 years and has served as its Executive Director since 1986. During her tenure, FCS has become the largest outpatient community mental health center in the state of Oklahoma for children, families and individuals without sufficient economic resources or health insurance. FCS, which has an annual budget of more than \$33 million and a staff of over 500, has attracted national recognition and research grants for the services it provides. Ms. Lapidus received her undergraduate degree and a Master's Degree in Social Work from the University of Oklahoma where she was later named an inaugural inductee into the Hall of Honor for outstanding leadership in professional practice. Ms. Lapidus's management and leadership experience as the executive director of FCS, among other factors, led the Board to conclude that she should serve as a director.

Donald W. Munson, age 77. Mr. Munson first became a director in 1997. His term will expire in 2011. From 1988, until his retirement in 1992, Mr. Munson served as President and Chief Operating Officer of Lennox Industries. Prior to 1998, he served as Executive Vice President of Lennox Industries' Division Operations, President of Lennox Canada and Managing Director of Lennox Industries' European Operations. Prior to joining Lennox Industries, Mr. Munson served in various capacities with the Howden Group, a company located in Scotland, and The Trane Company, including serving as the managing director of various companies within the Howden Group and Vice President Europe for The Trane Company. He is currently a consultant. Mr. Munson is a resident of England. He has degrees in mechanical engineering and business administration from the University of Minnesota. Mr. Munson's extensive experience in the climate control industry, and his leadership skills obtained through his service as senior executive and a managing director of Lennox Industries, among other factors, led the Board to conclude that he should serve as a director.

Ronald V. Perry, age 60. Mr. Perry first became a director in August 2007. His term will expire in 2011. Mr. Perry currently serves as President of Prime Time Travel, which he founded in 1979. He also serves on the Alumni Board of Directors for Leadership Oklahoma City and is a member of the Metro Technology Centers Board of Directors. Mr. Perry has served in various charitable and civic organizations. Mr. Perry is also a past President of the Oklahoma City Food Bank and has served as President of the OKC Food Bank Board of Directors. In 2007, the mayor of Oklahoma City appointed Mr. Perry to serve as a commissioner on the Oklahoma City Convention and Visitors Bureau. Mr. Perry graduated from Oklahoma State University, with a Bachelor's degree in Business Administration. Mr. Perry's leadership skills, business experience and promotions experience, among other factors, led the Board to conclude that he should serve as a director.

Horace G. Rhodes, age 82. Mr. Rhodes first became a director in 1996. His term will expire in 2010. Mr. Rhodes is the Chairman of the law firm of Kerr, Irvine, Rhodes & Ables and has served in such capacity and has practiced law for many years. From 1972 until 2001, he served as Executive Vice President and General Counsel for the Association of Oklahoma Life Insurance Companies and since 1982 served as Executive Vice President and General Counsel for the Oklahoma Life and Health Insurance Guaranty Association ("OLHIGA"). Mr. Rhodes received his undergraduate and law degrees from the University of Oklahoma. Mr. Rhodes'

Table of Contents

experience as a leader of an Oklahoma law firm, his depth of understanding of corporations and business transactions obtained through 40 years of practice as a corporate lawyer with expertise in mergers and acquisitions, his financial and investment experience gained through one year as treasurer and seven years as president of a life insurance company, together with his unique financial experience as an insurance industry regulator for three years, among other factors, led the Board to conclude that he should serve as a director.

Tony M. Shelby, age 68. Mr. Shelby first became a director in 1971. His term will expire in 2011. Mr. Shelby, a certified public accountant, is our Executive Vice President of Finance and Chief Financial Officer, a position he has held for more than five years. Prior to becoming our Executive Vice President of Finance and Chief Financial Officer, he served as Chief Financial Officer of a subsidiary of the Company and was with the accounting firm of Arthur Young & Co., a predecessor to Ernst & Young LLP. Mr. Shelby is a graduate of Oklahoma City University. Mr. Shelby's financial and accounting experience, his demonstrated leadership skills within the Company, and extensive understanding of the industries in which the Company operates, among other factors, led the Board to conclude that he should serve as a director.

John A. Shelley, age 59. Mr. Shelley first became a director in 2005. His term will expire in 2012. Mr. Shelley is the President and Chief Executive Officer of The Bank of Union ("Bank of Union") located in Oklahoma. He has held this position since 1997. Prior to 1997, Mr. Shelley held various senior level positions in financial institutions in Oklahoma including the position of President of Equity Bank for Savings, N.A., a savings and loan that was owned by the Company prior to 1994. Mr. Shelley is a graduate of the University of Oklahoma. Mr. Shelley's experience in the banking industry and his financial experience obtained through his service as CEO of the Bank of Union, among other factors, led the Board to conclude that he should serve as a director.

Executive Officers

Certain information concerning our executive officers is contained in Part I of this annual report on Form 10-K under the caption "Executive Officers of the Registrant" and is incorporated by reference herein.

Family Relationships

Jack E. Golsen is the father of Barry H. Golsen and the brother-in-law of Robert C. Brown. Robert C. Brown is the uncle of Barry H. Golsen. David M. Shear is the nephew by marriage to Jack E. Golsen and son-in-law of Robert C. Brown. Although not executive officers or directors of the Company, Steve J. Golsen, the son of Jack E. Golsen, brother of Barry H. Golsen, and the nephew of Robert C. Brown, is the Chief Operating Officer of our Climate Control Business, and Heidi Brown Shear, Vice President and Managing Counsel of the Company, is the daughter of Robert C. Brown and spouse of David M. Shear.

Table of Contents

Section 16(a) Beneficial Ownership Reporting Compliance

Section 16(a) of the Exchange Act of 1934, as amended (the “Exchange Act”), requires the Company’s directors, officers, and beneficial owners of more than 10% of the Company’s common stock to file with the Securities and Exchange Commission reports of holdings and changes in beneficial ownership of the Company’s stock. Based solely on a review of copies of the Forms 3, 4 and 5 and amendments thereto furnished to the Company with respect to 2009, or written representations that no Form 5 was required to be filed, the Company believes that during 2009 all directors and officers of the Company and beneficial owners of more than 10% of the Company’s common stock filed timely their required Forms 3, 4, or 5, except (a) Robert Butkin and Mike Tepper each inadvertently filed one late Form 4 to report one transaction, and (b) Bernie Ille filed one late Form 5 to amend a prior filed Form 4.

Code of Ethics

The Chief Executive Officer, the Chief Financial Officer, the principal accounting officer, and the controller of the Company and each of the our subsidiaries, or persons performing similar functions, are subject to our Code of Ethics. We and each of our subsidiary companies have adopted a Statement of Policy Concerning Business Conduct applicable to our employees.

Our Code of Ethics and Statement of Policy Concerning Business Conduct are available on our website at www.lsb-okc.com. We will post any amendments to these documents, as well as any waivers that are required to be disclosed pursuant to the rules of either the Securities and Exchange Commission or the NYSE Euronext (“NYSE”), on our website.

Audit Committee

We have a separately-designated standing audit committee established in accordance with Section 3(a)(58)(A) of the Exchange Act. The members of the Audit Committee are Messrs. Bernard Ille (Chairman), Charles Burtch, Horace Rhodes, Ray Ackerman and John Shelley. The Board has determined that each member of the Audit Committee is independent, as defined in the listing standards of the NYSE as of the Company’s fiscal year end. During 2009, the Audit Committee had seven meetings.

Audit Committee Financial Expert

While the Board of Directors endorses the effectiveness of our Audit Committee, its membership does not presently include a director that qualifies for designation as an “audit committee financial expert.” However, each of the current members of the Audit Committee is financially literate and able to read and understand fundamental financial statements and at least one of its members has financial management expertise. The Board of Directors believes that the background and experience of each member of the Audit Committee is sufficient to fulfill the duties of the Audit Committee. For these reasons, although members of our Audit Committee are not professionally engaged in the practice of accounting or auditing, our Board of Directors has concluded that the ability of our Audit Committee to perform its duties is not impaired by the absence of an “audit committee financial expert.”

Table of Contents

Nominating and Corporate Governance Committee

We have a separately-designated standing Nominating and Corporate Governance Committee (the “Nominating Committee”). The members of the Nominating Committee are Messrs. Ray Ackerman, Bernard Ille, Horace Rhodes, and John Shelley (Chairman). The Board has determined that each member of the Nominating Committee is independent, in accordance with Section 10A-3 of the Exchange Act and the listing standards of the NYSE. During 2009, the Nominating Committee had two meetings.

Compensation and Stock Option Committee

The Compensation and Stock Option Committee (the “Compensation Committee”) has three members and met two times during 2009. The Compensation Committee is comprised of Messrs. Horace Rhodes (Chairman), Charles Burtch and Bernard Ille, non-employee, independent directors in accordance with the rules of the NYSE. The Board has adopted a Compensation and Stock Option Committee Charter, which governs the responsibilities of the Compensation Committee. This charter is available on the Company’s website at www.lsb-okc.com, and is also available from the Company upon request.

The Compensation Committee’s responsibilities include, among other duties, the responsibility to:

- establish the base salary, incentive compensation and any other compensation for the Company’s executive officers;
- administer the Company’s management incentive and stock-based compensation plans, non-qualified death benefits, salary continuation and welfare plans, and discharge the duties imposed on the Compensation Committee by the terms of those plans; and
 - perform other functions or duties deemed appropriate by the Board.

Decisions regarding non-equity compensation of non-executive officers of the Company and the executive officers of the Company named in the Summary Compensation Table (the “named executive officers”) other than the Chief Executive Officer and the President, are made by the Company’s Chief Executive Officer and presented for approval or modification by the Committee.

The agenda for meetings of the Compensation Committee is determined by its Chairman with the assistance of the Company’s Chief Executive Officer. Committee meetings are regularly attended by the Chief Executive Officer. At each Compensation Committee meeting, the Compensation Committee also meets in executive session without the Chief Executive Officer. The Committee’s Chairman reports to the Board the Compensation Committee’s recommendations on compensation for the Chief Executive Officer and the President. The Chief Executive Officer may be delegated authority to fulfill certain administrative duties regarding the compensation programs.

The Compensation Committee has authority under its charter to retain, approve fees for, and terminate advisors, consultants and agents as it deems necessary to assist in the fulfillment of its responsibilities. If an outside consultant is engaged, the Compensation Committee reviews the total fees paid to such outside consultant by the Company to ensure that the consultant maintains its objectivity and independence when rendering advice to the Compensation Committee. For 2009, no outside consultants were engaged by the Compensation Committee.

ITEM 11. EXECUTIVE COMPENSATION

Compensation Discussion and Analysis

Overview of Compensation Program

Our long-term success depends on our ability to efficiently operate our facilities, to continue to develop our product lines and technologies, and to focus on developing our product markets. To achieve these goals, it is important that we be able to attract, motivate, and retain highly talented individuals who are committed to our values and goals.

The Compensation Committee has responsibility for the establishment in consultation with management, of our compensation philosophy for our senior executive officers and the implementation and oversight of a compensation program consistent with the philosophy. This group of senior executive officers includes the named executive officers, as well as our other executives.

A primary objective of the Compensation Committee is to ensure that the compensation paid to the senior executive officers is fair, reasonable, competitive, and provides incentives for superior performance. The Compensation Committee is responsible for approval of all decisions for the direct compensation, including the base salary and bonuses, stock options and other benefit programs for the Company's senior executive officers, including the named executive officers.

In general, the day-to-day administration of savings, health and welfare plans and policies are handled by a team of our legal and finance department employees. The Compensation Committee (or Board) remains responsible for key policy changes outside of the day to day requirements necessary to maintain these plans and policies.

Compensation Philosophy and Objectives

The Compensation Committee believes that the most effective executive compensation program rewards the executive's achievements and contribution towards the Company achieving its long-term strategic goals. However, the Compensation Committee does not believe that executive compensation should be tied to specific numeric or formulaic financial goals or stock price achievement by the Company. The Compensation Committee recognizes that, given the volatility of the markets in which we do business, our economic performance in any given time frame may not be an accurate measurement of our senior executive officer's performance.

The Compensation Committee values both personal contribution and teamwork as factors to be rewarded. The Compensation Committee believes that it is important to align executives' interests with those of stockholders through the use of stock option incentive programs. When granted, stock options are granted with an exercise price equal to their grant date value, in accordance with our stock option incentive programs. The Compensation Committee evaluates both performance and compensation and considers previously granted options to ensure that we maintain our ability to attract and retain highly talented employees in key positions, and that compensation provided to key employees will remain competitive relative to our other senior executive officers. The Compensation Committee believes that executive compensation packages should include both cash and stock-based compensation, as well as other benefit programs to

Table of Contents

encourage senior executive officers to remain with the Company and have interests aligned with those of the Company. As a result, the Compensation Committee reviews the number of stock options exercised by senior executive officers during recent periods, if any, as well as stock options currently held by the senior executive officers. This analysis enables the Compensation Committee to determine whether the grant of additional stock based compensation may be advisable to ensure that our senior executive officers' interests are aligned with those of the Company. Based on the foregoing, the Compensation Committee bases its executive compensation program on the following criteria:

- Compensation should be based on the level of job responsibility, executive performance, and Company performance.
 - Compensation should enable us to attract and retain key talent.
- Compensation should be competitive with compensation offered by other companies that compete with us for talented individuals in our geographic area.
 - Compensation should reward performance.
 - Compensation should motivate executives to achieve our strategic and operational goals.

Setting Executive Compensation

The Compensation Committee sets annual cash and non-cash executive compensation to reward the named executive officers for achievement and to motivate the named executive officers to achieve long-term business objectives. The Compensation Committee is unable to use peer group comparisons in determining the compensation package because of the diverse nature of our lines of business. Although the Compensation Committee has not engaged outside consultants to assist in conducting its annual review of the total compensation program, it may do so in the future. The Compensation Committee reviewed some generally available compensation information for companies of our size. The Compensation Committee considered base salary and current bonus awards in determining overall compensation. The Compensation Committee does not have a policy allocating long term and currently paid compensation. The Compensation Committee also considered the allocation between cash and non-cash compensation amounts, but does not have a specific formula or required allocation between such compensation amounts. The Compensation Committee compares the Chief Executive Officer's total compensation to the total compensation of our other named executive officers over time. However, the Compensation Committee has not established a target ratio between total compensation of the Chief Executive Officer and the median total compensation level for the next lower tier of management. The Compensation Committee also considers internal pay equity among the named executive officers and in relation to next lower tier of management in order to maintain compensation levels that are consistent with the individual contributions and responsibilities of those executive officers. The Compensation Committee does not consider amounts payable under severance agreements when setting the annual compensation of the named executive officers.

Role of Executive Officers in Compensation Decisions

Our Chief Executive Officer annually reviews the performance of each of our named executive officers (other than the Chief Executive Officer and the President) and presents to the Compensation Committee recommendations with respect to salary, bonuses and other benefit items. The Compensation Committee considers and reviews such recommendations in light of the Compensation Committee's philosophy and objections and exercises its discretion in

Table of Contents

accepting or modifying the recommended compensation. In determining compensation for the Chief Executive Officer and the President, the Compensation Committee reviews the responsibilities and performance of each of them. Such review includes interviewing both the Chief Executive Officer and the President and consideration of the Compensation Committee's observations of the Chief Executive Officer and the President during the applicable year.

2009 Executive Compensation Components

For the fiscal year ended December 31, 2009, the principal components of compensation for the named executive officers were:

- base salary;
- cash bonus;
- death benefit and salary continuation programs; and
- perquisites and other personal benefits.

The Compensation Committee did not award equity-based compensation, such as stock options, to the named executive officers in 2009. As discussed below, the Compensation Committee awarded salary increases and bonuses to the named executive officers for 2009. Those awards were considered sufficient to provide competitively based incentives to our executives to advance company performance, without granting equity based compensation as well.

Base Salary

We provide the named executive officers and other senior executive officers with base salary to compensate them for services rendered during the year. We do not have a defined benefit or qualified retirement plan for our executives. This factor is considered when setting the base compensation for senior executive officers.

Base salaries are determined for the named executive officers in the discretion of the Compensation Committee based upon the recommendations of the Chief Executive Officer's assessment of the executive's compensation, both individually and relative to the other senior executive officers, and based upon an assessment of the individual performance of the executive during the preceding year. In determining the base salary for the Chief Executive Officer and the President, the Compensation Committee exercises its judgment based on its observations of such senior executive officers and the Compensation Committee's assessment of such officers' contribution to the Company's performance and other leadership achievements. Although the Compensation Committee does not use specific performance targets to set base salaries or bonuses, the Compensation Committee awarded salary increases in 2009 based on the above criteria and with consideration of the overall performance of the Company during challenging economic conditions.

Bonuses

The Compensation Committee may award cash bonuses to the named executive officers to reward outstanding performance. The Compensation Committee awarded bonuses to the named executive officers in 2009 based upon the Compensation Committee's review of the performance and the recommendation of the Chief Executive Officer. No bonus is guaranteed, and there is no defined range of bonus amounts that the Compensation Committee may award.

Bonus awards

90

Table of Contents

are made at the Compensation Committee's discretion based upon an assessment of an individual's overall contribution to the Company.

Death Benefit and Salary Continuation Plans

The Company sponsors non-qualified arrangements to provide a death benefit to the designated beneficiary of certain key employees (including certain of the named executive officers) in the event of such executive's death (the "Death Benefit Plans"). We also have a non-qualified arrangement with certain key employees (including certain of the named executive officers) of the Company and its subsidiaries to provide compensation to such individuals in the event that they are employed by the Company at age 65 (the "Salary Continuation Plans").

Attributed costs of the personal benefits described above for the named executive officers for the fiscal year ended December 31, 2009, are discussed in footnote (1) and included in column (i) of the "Summary Compensation Table."

The Compensation Committee believes that the Death Benefit and Salary Continuation Plans are significant factors in:

- enabling the Company to retain its named executive officers;
- encouraging our named executive officers to render outstanding service; and
 - maintaining competitive levels of total compensation.

Perquisites and Other Personal Benefits

The Company and the Compensation Committee believe that perquisites are necessary and appropriate parts of total compensation that contribute to our ability to attract and retain superior executives. Accordingly, the Company and the Compensation Committee provided our named executive officers and certain other executive officers a limited number of perquisites that are reasonable and consistent with our overall compensation program.

We currently provide the named executive officers with the use of our automobiles, provide cell phones that are used primarily for business purposes, and pay the country club dues for certain of the executive officers. The executive officers are expected to use the country club in large part for business purposes.

The Compensation Committee periodically reviews the levels of perquisites provided to the named executive officers.

Severance Agreements

We have entered into change of control severance agreements with certain key employees, including the named executive officers. The severance agreements are designed to promote stability and continuity of senior management. The severance agreements provide generally that if a executive officer who is a party to a severance agreement is terminated, other than for cause, within 24 months after the occurrence of a change-in-control of the Company or the executive officer terminates his employment for good reason following a change in control, the Company must pay the executive officer an amount equal to 2.9 times the officer's average annual gross

Table of Contents

salary for the last five years preceding the change in control. The Compensation Committee believes that the severance agreements are an important element in retaining our senior management. These severance agreements are described under “Severance Agreements” below. Information regarding applicable payments under such agreements for the named executive officers is provided under the heading “Potential Payments Upon Termination or Change-In-Control.”

Employment Agreement

We have no employment agreements with our named executive officers, except with Jack E. Golsen, our Chief Executive Officer. The terms of Mr. Golsen’s employment agreement are described below under “Employment Agreement.” We believe that Mr. Golsen’s employment agreement promotes stability in our senior management and encourages Mr. Golsen to provide superior service to us. The current term of the Employment Agreement expires March 21, 2011, but will automatically renew for up to three additional three-year periods, unless earlier terminated by either party with one years’ notice.

Ownership Guidelines

At this time, we have not established any guidelines which require our executive officers to acquire and hold our common stock. However, our named executive officers have historically acquired and maintained a significant ownership position in our common stock.

Tax and Accounting Implications

Deductibility of Executive Compensation - Section 162(m) of the Internal Revenue Code, provides that the Company may not deduct compensation of more than \$1,000,000 of employee remuneration for named executive officers. However, the statute exempts qualifying performance-based compensation from the deduction limit when specified requirements are met. In the past, the Company has granted non-qualifying stock options to the named executive officers that do not meet the performance-based compensation criteria and are subject to the Section 162(m) limitation.

As a result of the exercise of non-qualifying stock options, the Company’s aggregate reported compensation, for tax purposes, to Jack E. Golsen, Barry H. Golsen, and David M. Shear exceeded the Section 162(m) deductibility limits in 2008 and 2007 by \$350,000 and \$3,418,000, respectively (none in 2009). For 2008, Barry H. Golsen’s compensation exceeded the deductibility limit by \$350,000, which represents a cost to the company of \$137,000 as a result of the lost tax deduction. For 2007, Jack E. Golsen’s compensation exceeded the deductibility limit by \$3,349,000, which represents a cost to the company of \$1,306,000 as a result of the lost tax deduction and David M. Shear’s compensation exceeded the deductibility limit by \$69,000 which represents a cost to the company of \$27,000 as a result of the lost tax deductions. The Company’s compensation deduction was not limited by Section 162(m) in 2009.

Accounting for Stock-Based Compensation - The Company accounts for stock-based payments, including its incentive and nonqualified stock options, in accordance with United States generally accepted accounting principles.

Table of Contents

(1) As discussed below under “1981 Agreements” and “2005 Agreement,” the Company entered into individual death benefit agreements in 1981 (amended in 2008 to comply with Section 409A of the Internal Revenue Code (“Section 409A”)) and a death benefit agreement in 2005. Reported compensation for the death benefit under these agreements is the greater of:

- the expense incurred associated with our accrued death benefit liability; or
- the pro rata portion of life insurance premium expense to fund the undiscounted death benefit.

Amounts accrued under these agreements are not paid until the death of the named executive officer.

As discussed below under “1992 Agreements”, the Company entered into benefit agreements in 1992 (and amended in 2008 to comply with Section 409A), which include a death benefit until the employee reaches age 65 or benefits for life commencing when the employee reaches age 65. Compensation reported for these benefits is the greater of:

- the expense incurred associated with our accrued benefit liability or
- the pro rata portion of life insurance premium expense to fund the undiscounted death benefit.

The amounts set forth under “All Other Compensation” are comprised of compensation relating to these agreements and perquisites for 2009, as follows:

	1981 Agreements	1992 Agreements	2005 Agreement	Other (A)	Total
Jack E. Golsen	\$ 215,229	\$ -	\$ 490,157	\$ 8,170	\$ 713,556
Tony M. Shelby	\$ 7,250	\$ -	\$ -	\$ 9,574	\$ 16,824
Barry H. Golsen	\$ 517	\$ 10,287	\$ -	\$ 6,083	\$ 16,887
David R. Goss	\$ 1,132	\$ -	\$ -	\$ 3,063	\$ 4,195
David M. Shear	\$ -	\$ 4,946	\$ -	\$ 4,122	\$ 9,068

(A) Amount relates to the personal use of automobiles, cell phones and country club dues.

The Company did not grant equity-based awards to the named executive officers during 2009, 2008 or 2007.

Employment Agreement

We have an employment agreement with Jack E. Golsen, which requires the Company to employ Mr. Golsen as an executive officer of the Company. The employment agreement was amended in 2008 to comply with Section 409A. The employment agreement may be terminated by either party by written notice at least one year prior to the expiration of the then current term. The current term of the employment agreement expires March 21, 2011, but will be automatically renewed for up to three additional three-year periods. Under the terms of such employment agreement, Mr. Golsen shall:

Table of Contents

- be paid an annual base salary at his 1995 base rate, as adjusted from time to time by the Compensation Committee, but such shall never be adjusted to an amount less than Mr. Golsen's 1995 base salary,
 - be paid an annual bonus in an amount as determined by the Compensation Committee, and
 - receive from the Company certain other fringe benefits (vacation; health and disability insurance).

The employment agreement provides that Mr. Golsen's employment may not be terminated, except:

- upon conviction of a felony involving moral turpitude after all appeals have been exhausted ("Conviction"),
- Mr. Golsen's serious, willful, gross misconduct or willful, gross negligence of duties resulting in material damage to the Company and its subsidiaries, taken as a whole, unless Mr. Golsen believed, in good faith, that such action or failure to act was in the Company's or its subsidiaries' best interest ("Misconduct"), and
 - Mr. Golsen's death.

However, no termination for a Conviction or Misconduct may occur unless and until the Company has delivered to Mr. Golsen a resolution duly adopted by an affirmative vote of three-fourths of the entire membership of the Board of Directors at a meeting called for such purpose after reasonable notice given to Mr. Golsen finding, in good faith, that Mr. Golsen violated such item.

If Mr. Golsen's employment is terminated for reasons other than due to a Conviction or Misconduct, then he shall, pursuant to the employment agreement, in addition to his other rights and remedies, receive and the Company shall pay to Mr. Golsen:

- a cash payment, on the date of termination, a sum equal to the amount of Mr. Golsen's annual base salary at the time of such termination and the amount of the last bonus paid to Mr. Golsen prior to such termination times the number of years remaining under the then current term of the employment agreement, and
- provide to Mr. Golsen all of the fringe benefits that the Company was obligated to provide during his employment under the employment agreement for the remainder of the term of the employment agreement.

If there is a change in control (as defined in the severance agreement between Mr. Golsen and the Company as discussed below under "Severance Agreements") and within 24 months after such change in control Mr. Golsen is terminated, other than for Cause (as defined in the severance agreement), then in such event, the severance agreement between Mr. Golsen and the Company shall be controlling.

In the event Mr. Golsen becomes disabled and is not able to perform his duties under the employment agreement as a result thereof for a period of 12 consecutive months within any two-year period, the Company shall pay Mr. Golsen his full salary for the remainder of the term of the employment agreement and thereafter 60% of such salary until Mr. Golsen's death.

Table of Contents

1981 Agreements

During 1981, the Company entered into individual death benefit agreements (the “1981 Agreements”) with certain key employees (including certain of the named executive officers). Each named executive officer will receive a monthly benefit for a period of 10 years if the officer dies while in the employment of the Company or a wholly-owned subsidiary of the Company. The 1981 Agreements provide that the Company may terminate the agreement as to any officer at anytime prior to the officer’s death. The Company has purchased life insurance on the life of each officer covered under the 1981 Agreements to provide a source of funds for the Company’s obligations under the 1981 Agreements. The Company is the owner and sole beneficiary of each of the insurance policies and the proceeds are payable to the Company upon the death of the officer.

The following table sets forth the amounts of annual benefits payable to the designated beneficiary or beneficiaries of the named executive officer’s under the 1981 Agreements.

Name of Individual	Amount of Annual Payment
Jack E. Golsen	\$ 175,000
Tony M. Shelby	\$ 35,000
Barry H. Golsen	\$ 30,000
David R. Goss	\$ 35,000
David M. Shear	N/A

1992 Agreements

During 1992, the Company entered into individual benefit agreements with certain key employees of the Company and its subsidiaries (including certain of the named executive officers) to provide compensation to such individuals in the event that they are employed by the Company or a subsidiary of the Company at age 65 (the “1992 Agreements”). The 1992 Agreements were amended in 2008 to comply with Section 409A. As relating to the named executive officers, under the 1992 Agreements, the officer is eligible to receive a designated benefit (“Benefit”) as set forth in the 1992 Agreements. The officer will receive the Benefit beginning at the age 65 for the remainder of the officer’s life. If prior to attaining the age 65, the officer dies while in the employment of the Company or a subsidiary of the Company, the designated beneficiary of the officer will receive a monthly benefit (“Death Benefit”) for a period of ten years. The 1992 Agreements provide that the Company may terminate the agreement as to any officer at any time and for any reason prior to the death of the officer. The Company has purchased insurance on the life of each officer covered under the 1992 Agreements. The Company is the owner and sole beneficiary of each insurance policy, and the proceeds are payable to the Company to provide a source of funds for the Company’s obligations under the 1992 Agreements. Under the terms of the 1992 Agreements, if the officer becomes incapacitated prior to retirement or prior to reaching age 65, the officer may request the Company to cash-in any life insurance on the life of such officer purchased to fund the Company’s obligations under the 1992 Agreements. Jack E. Golsen does not participate in the 1992 Agreements.

Table of Contents

The following table sets forth the amounts of annual benefits payable to the named executive officers under the 1992 Agreements and the net cash surrender value of the associated life insurance policies at December 31, 2009.

Name of Individual	Amount of Annual Benefit	Amount of Annual Death Benefit	Amount of Net Cash Surrender Value
Jack E. Golsen	N/A	N/A	N/A
Tony M. Shelby	\$ 15,605	N/A	\$ -
Barry H. Golsen	\$ 17,480	\$ 11,596	\$ 41,847
David R. Goss	\$ 17,403	N/A	\$ 61,113
David M. Shear	\$ 17,822	\$ 7,957	\$ -

2005 Agreement

During 2005, the Company entered into a death benefit agreement (“2005 Agreement”) with Jack E. Golsen. This agreement replaced existing benefits that were payable to Mr. Golsen. The 2005 Agreement provides that, upon Mr. Golsen’s death, the Company will pay to Mr. Golsen’s family or designated beneficiary \$2.5 million to be funded from the net proceeds received by the Company under certain life insurance policies on Mr. Golsen’s life that were purchased and are owned by the Company. The 2005 Agreement requires that the Company is obligated to keep in existence no less than \$2.5 million of the stated death benefit. The life insurance policies in force provide an aggregate stated death benefit to the Company, as beneficiary, of \$7 million.

401(k) Plan

We maintain The LSB Industries, Inc. Savings Incentive Plan (the “401(k) Plan”) for the employees (including the named executive officers) of the Company and its subsidiaries, excluding employees covered under union agreements and certain other employees. As relating to the named executive officers, the 401(k) Plan is funded by the officer’s contributions. The Company and its subsidiaries make no contributions to the 401(k) Plan for any of the named executive officers. The amount that an officer may contribute to the 401(k) Plan equals a certain percentage of the employee’s compensation, with the percentage based on the officer’s income and certain other criteria as required under Section 401(k) of the Internal Revenue Code. The Company or subsidiary deducts the amounts contributed to the 401(k) Plan from the officer’s compensation each pay period, in accordance with the officer’s instructions, and pays the amount into the 401(k) Plan pursuant to the officer’s election. The salary and bonus set forth in the Summary Compensation Table above include any amounts contributed by the named executive officers during the 2009, 2008 and 2007 fiscal years pursuant to the 401(k) Plan.

(2) Value realized was determined using the difference between the exercise price of the options and the closing price of our common stock on the date of exercise.

Table of Contents

Severance Agreements

We have entered into severance agreements with each of the named executive officers and certain other officers, which were amended in 2008 to comply with Section 409A. Each severance agreement provides (among other things) that if, within 24 months after the occurrence of a change in control (as defined) of the Company, the Company terminates the officer's employment other than for cause (as defined), or the officer terminates his employment for good reason (as defined), the Company must pay the officer an amount equal to 2.9 times the officer's base amount (as defined). The phrase "base amount" means the average annual gross compensation paid by the Company to the officer and includable in the officer's gross income during the most recent five-year period immediately preceding the change in control. If the officer has been employed by the Company for less than five years, the base amount is calculated with respect to the most recent number of taxable years ending before the change in control that the officer worked for the Company.

The severance agreements provide that a "change in control" means a change in control of the Company of a nature that would require the filing of a Form 8-K with the SEC and, in any event, would mean when:

- any individual, firm, corporation, entity, or group (as defined in Section 13(d)(3) of the Securities Exchange Act of 1934, as amended) becomes the beneficial owner, directly or indirectly, of 30% or more of the combined voting power of the Company's outstanding voting securities having the right to vote for the election of directors, except acquisitions by:
- any person, firm, corporation, entity, or group which, as of the date of the severance agreement, has that ownership, or
- Jack E. Golsen, his wife; his children and the spouses of his children; his estate; executor or administrator of any estate, guardian or custodian for Jack E. Golsen, his wife, his children, or the spouses of his children, any corporation, trust, partnership, or other entity of which Jack E. Golsen, his wife, children, or the spouses of his children own at least 80% of the outstanding beneficial voting or equity interests, directly or indirectly, either by any one or more of the above-described persons, entities, or estates; and certain affiliates and associates of any of the above-described persons, entities, or estates;
- individuals who, as of the date of the severance agreement, constitute the Board of Directors of the Company (the "Incumbent Board") and who cease for any reason to constitute a majority of the Board of Directors except that any person becoming a director subsequent to the date of the severance agreement, whose election or nomination for election is approved by a majority of the Incumbent Board (with certain limited exceptions), will constitute a member of the Incumbent Board; or
- the sale by the Company of all or substantially all of its assets.

Except for the severance agreement with Jack E. Golsen, the termination of an officer's employment with the Company "for cause" means termination because of:

- the mental or physical disability from performing the officer's duties for a period of 120 consecutive days or one hundred eighty days (even though not consecutive) within a 360 day period;

Table of Contents

- the conviction of a felony;
- the embezzlement by the officer of Company assets resulting in substantial personal enrichment of the officer at the expense of the Company; or
- the willful failure (when not mentally or physically disabled) to follow a direct written order from the Company's Board of Directors within the reasonable scope of the officer's duties performed during the 60 day period prior to the change in control.

The definition of "Cause" contained in the severance agreement with Jack E. Golsen means termination because of:

- the conviction of Mr. Golsen of a felony involving moral turpitude after all appeals have been completed; or
- if due to Mr. Golsen's serious, willful, gross misconduct or willful, gross neglect of his duties has resulted in material damages to the Company and its subsidiaries, taken as a whole, provided that:
- no action or failure to act by Mr. Golsen will constitute a reason for termination if he believed, in good faith, that such action or failure to act was in the Company's or its subsidiaries' best interest, and
- failure of Mr. Golsen to perform his duties hereunder due to disability shall not be considered willful, gross misconduct or willful, gross negligence of his duties for any purpose.

The termination of an officer's employment with the Company for "good reason" means termination because of:

- the assignment to the officer of duties inconsistent with the officer's position, authority, duties, or responsibilities during the 60 day period immediately preceding the change in control of the Company or any other action which results in the diminishment of those duties, position, authority, or responsibilities;
- the relocation of the officer;
- any purported termination by the Company of the officer's employment with the Company otherwise than as permitted by the severance agreement; or
- in the event of a change in control of the Company, the failure of the successor or parent company to agree, in form and substance satisfactory to the officer, to assume (as to a successor) or guarantee (as to a parent) the severance agreement as if no change in control had occurred.

Except for the severance agreement with Jack E. Golsen, each severance agreement expires on the earlier of: (a) three years after the date of the severance agreement, or (b) the date of retirement from the Company; however, beginning on the first anniversary of the severance agreement and on each annual anniversary thereafter, the term of the severance agreement automatically extends for an additional one-year period, unless the Company gives notice otherwise at least 60 days prior to the anniversary date. The severance agreement with Jack E. Golsen is effective for a period of three years from the date of the severance agreement; except that, commencing on the date one year after the date of such severance agreement and on each anniversary thereafter, the term of such severance agreement shall be automatically extended so as to terminate three years from such renewal date, unless the Company gives notices otherwise at least one year prior to the renewal date.

Table of Contents

Potential Payments Upon Termination or Change-In-Control

The following table reflects the amount that would have been payable to each of the named executive officers under the applicable agreement if the respective trigger event had occurred on December 31, 2009. (1)

Severance Pay Trigger Event

Name and Executive Benefit and Payments Upon Separation	Voluntary Termination (\$)	Involuntary Other Than For Cause Termination (\$)	Involuntary For Cause Termination (\$)	Involuntary Other Than For Cause Termination - Change of Control (\$)	Voluntary For Good Reason Termination - Change of Control (\$)	Disability/ Incapacitation (\$)	Death (\$)

(1) This amount does not include the amount realizable under outstanding stock options granted to the named executive officers, all of which are fully vested. See "Outstanding Equity Awards at December 31, 2009."

(2) See, "Employment Agreement," above for a description of the terms of Mr. Golsen's employment agreement.

(3) See, "Severance Agreements," above for a description of the terms of our severance agreements.

- (4) See, "1981 Agreements" for a discussion of the terms of our death benefit agreements.
- (5) See, "1992 Agreements" for a description of the terms of our retention and death benefit agreements.
- (6) See, "2005 Agreement" for a description of the terms of Mr. Golsen's death benefit agreement.

Table of Contents

Our Compensation Policies May Discourage Other Parties From Attempting to Acquire Us

We have entered into severance agreements with our executive officers and some of the executive officers of our subsidiaries that provide, among other things, that if, within a specified period of time after the occurrence of a change in control of our Company, these officers are terminated, other than for cause, or the officer terminates his employment for good reason, we must pay such officer an amount equal to 2.9 times the officer's average annual gross salary for the last five years preceding the change in control. See "Severance Agreements" and "Employment Agreement," above. These agreements may discourage a third party tender offer, proxy contest, or other attempts to acquire control of us and could have the effect of making it more difficult to remove incumbent management.

Compensation of Directors

In 2009, we compensated our non-employee directors for their services as directors on our Board. Our Directors were not awarded stock options or other equity based compensation in 2009. Directors who are employees of the Company receive no compensation for their services as directors.

The following table summarizes the compensation paid by us to our non-employee directors during the year ended December 31, 2009.

Director Compensation Table

(a)	(b)	(h)
Name	Fees Earned or Paid in Cash (\$)(1)	Total (\$)
Raymond B. Ackerman	40,500	40,500
Robert C. Brown, M.D.	40,000	40,000
Charles A. Burtch	40,000	40,000
Robert A. Butkin	39,500	39,500
Bernard G. Ille	40,500	40,500
Donald W. Munson	40,500	40,500
Ronald V. Perry	40,500	40,500
Horace G. Rhodes	40,500	40,500
John A. Shelley	40,500	40,500

(1) This amount includes as to each director, an annual fee of \$13,000 for services as a director and \$500 for each Board meeting attended during 2009. In addition, each director that serves on one or more committees of the Board receives an additional \$25,000 for such service. As noted below, each of our directors served on at least one committee during 2009:

Table of Contents

- Mr. Ackerman is a member of the Audit Committee, Nominating and Corporate Governance Committee and Public Relations and Marketing Committee.
- Dr. Brown is a member of the Benefits and Programs Committee. The amount shown above does not include amounts paid by the Company to Dr. Brown for consulting services rendered by him or his affiliated medical group, which amounts are described under “Item 13 - Certain Relationships and Related Party Transactions, and Director Independence - Related Party Transactions.”
 - Mr. Burtch is a member of the Audit Committee and Compensation Committee.
 - Mr. Butkin is a member of the Business Development Committee.
- Mr. Ille is a member of the Audit Committee, Compensation Committee, Nominating and Corporate Governance Committee and Public Relations and Marketing Committee.
 - Mr. Munson is a member of the Business Development Committee.
 - Mr. Perry is a member of the Public Relations and Marketing Committee.
- Mr. Rhodes is a member of the Audit Committee, Compensation Committee and Nominating and Corporate Governance Committee.
 - Mr. Shelley is a member of the Audit Committee, Public Relations and Marketing Committee and Nominating and Corporate Governance Committee.

Compensation Committee Interlocks and Insider Participation

The Compensation Committee has the authority to set the compensation of all of our officers. This Compensation Committee considers the recommendations of the Chief Executive Officer when setting the compensation of our officers. The Chief Executive Officer does not make a recommendation regarding his own salary, and does not make any recommendation as to the President’s salary. The members of the Compensation Committee are the following non-employee directors: Horace G. Rhodes (Chairman), Charles A. Burtch, and Bernard G. Ille. Neither Mr. Rhodes, Mr. Burtch nor Mr. Ille is, or ever has been, an officer or employee of the Company or any of its subsidiaries. None of our executive officers or members of the Compensation Committee had any relationship requiring disclosure under Item 404 of Regulation S-K during 2009.

Table of Contents

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The following table sets forth the information as of December 31, 2009, with respect to our equity compensation plans.

Plan Category	Equity Compensation Plan Information		Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)
	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)	
Equity compensation plans approved by stockholders	848,775	\$8.23	870,000
Equity compensation plan not approved by stockholders (1)	22,500	\$2.73	-
Total	871,275	\$ 8.09	870,000

(1) Non-Stockholder Approved Plan From time to time, the Compensation Committee and/or the Board of Directors has approved the grants of certain nonqualified stock options as the Board has determined to be in our best interest to compensate directors, officers, or employees for service to the Company. The exercise price of each such option is equal to the market value of our common stock at the date of grant and each option expires ten years from the grant date. All outstanding options under this plan were exercisable at December 31, 2009.

On November 29, 2001, we granted to certain employees of the Company nonqualified stock options to acquire 102,500 shares of common stock in consideration of services to the Company. As of December 31, 2009, 22,500 shares remain issuable under the nonqualified stock options at an exercise price of \$2.73 per share. The nonqualified stock options were not approved by our stockholders.

Security Ownership of Certain Beneficial Owners

The following table sets forth certain information as of February 28, 2010, regarding the ownership of our voting common stock and voting preferred stock by each person (including any "group" as used in Section 13(d)(3) of the Securities Act of 1934, as amended) that we know to be beneficial owner of more than 5% of our voting common stock and voting preferred stock. A person is deemed to be the beneficial owner of shares of the Company which he or she could acquire within 60 days of February 28, 2010.

Table of Contents

Name and Address of Beneficial Owner	Title of Class	Amounts of Shares Beneficially owned (1)	Percent of Class+
Jack E. Golsen and certain members of his family (2)	Common	4,720,009(3) (4)	21.1 %
	Voting	1,020,000(5)	99.9 %
	Preferred		

+ Because of the requirements of the SEC as to the method of determining the amount of shares an individual or entity may own beneficially, the amount shown for an individual may include shares also considered beneficially owned by others. Any shares of stock which a person does not own, but which he or she has the right to acquire within 60 days of February 28, 2010 are deemed to be outstanding for the purpose of computing the percentage of outstanding stock of the class owned by such person but are not deemed to be outstanding for the purpose of computing the percentage of the class owned by any other person.

(1) We based the information with respect to beneficial ownership on information furnished by the above-named individuals or entities or contained in filings made with the Securities and Exchange Commission or the Company's records.

(2) Includes Jack E. Golsen ("J. Golsen") and the following members of his family: wife, Sylvia H. Golsen; son, Barry H. Golsen ("B. Golsen") (a director, Vice Chairman of the Board of Directors, and President of the Company and its climate control business); son, Steven J. Golsen ("S. Golsen") (executive officer of several subsidiaries of the Company), Golsen Family LLC ("LLC") which is wholly-owned by J. Golsen (43.516% owner), Sylvia H. Golsen (43.516% owner), B. Golsen (4.323% owner), S. Golsen (4.323% owner), and Linda F. Rappaport (4.323% owner and daughter of J. Golsen ("L. Rappaport")), and SBL LLC ("SBL") which is wholly-owned by the LLC (49% owner), B. Golsen (17% owner), S. Golsen (17% owner), and L. Rappaport (17% owner). J. Golsen and Sylvia H. Golsen are the managers of the LLC and share voting and dispositive power over the shares beneficially owned by the LLC. J. Golsen and B. Golsen, as the only directors and officers of SBL, share the voting and dispositive power of the shares beneficially owned by SBL and its wholly owned subsidiary, Golsen Petroleum Corp ("GPC"). The address of Jack E. Golsen, Sylvia H. Golsen, and Barry H. Golsen is 16 South Pennsylvania Avenue, Oklahoma City, Oklahoma 73107; and Steven J. Golsen's address is 7300 SW 44th Street, Oklahoma City, Oklahoma 73179. SBL's address is 16 South Pennsylvania Avenue, Oklahoma City, Oklahoma 73107.

(3) Includes (a) the following shares over which J. Golsen has the sole voting and dispositive power: (i) 4,000 shares that he has the right to acquire upon conversion of a promissory note; (ii) 263,320 shares of common stock owned of record by certain trusts for the benefit of B. Golsen, S. Golsen and L. Rappaport over which J. Golsen is the trustee of each of these trusts; and (iii) 200,406 shares held in certain trusts for the benefit of grandchildren and great grandchildren of J. Golsen and Sylvia H. Golsen over which J. Golsen is the trustee; (b) 653,976 shares owned of record by the LLC and 133,333 shares that the LLC has the right to acquire upon the conversion of 4,000 shares of the Series B Preferred owned of record by the LLC; (c) 296,639 shares over which B. Golsen has the sole voting and dispositive power, 533 shares owned of record by B. Golsen's wife, over which he shares the voting and dispositive power, and

105

Table of Contents

11,250 shares that he has the right to acquire within the next 60 days under the Company's stock option plans; (d) 263,915 shares over which S. Golsen has the sole voting and dispositive power and 11,250 shares that he has the right to acquire within the next 60 days under the Company's stock option plans; (e) 30,000 shares over which L. Rappaport has the sole voting and dispositive power and 36,400 shares that she has the right to acquire upon conversion of \$1 million principal amount of the 2007 Debentures; (f) 1,602,099 shares owned of record by SBL, 400,000 shares that SBL has the right to acquire upon conversion of 12,000 shares of Series B Preferred owned of record by SBL, 250,000 shares that SBL has to right to acquire upon conversion of 1,000,000 shares of the Series D Preferred owned of record by SBL and 145,600 shares issuable shares upon the conversion of \$4 million principal amount of the 2007 Debentures owned of record by SBL, and (g) 283,955 shares owned of record by GPC, which is a wholly-owned subsidiary of SBL, and 133,333 shares that GPC has the right to acquire upon conversion of 4,000 shares of Series B Preferred owned of record by GPC. See "Certain Relationships and Related Transactions".

(4) J. Golsen and Sylvia H. Golsen disclaim beneficial ownership of the shares over which B. Golsen, S. Golsen and L. Rappaport each have sole voting and investment power. Sylvia H. Golsen, B. Golsen, S. Golsen and L. Rappaport disclaim beneficial ownership of the shares that J. Golsen has sole voting and investment power over as noted in footnote (3)(a) above. B. Golsen, S. Golsen and L. Rappaport disclaim beneficial ownership of the shares owned of record by the LLC, except to the extent of their respective pecuniary interest therein. S. Golsen and L. Rappaport disclaims beneficial ownership of the shares owned of record by SBL and GPC and all shares beneficially owned by SBL through the LLC, except to the extent of his pecuniary interest therein. L. Rappaport disclaims beneficial ownership of the shares over which her spouse has sole voting and investment power over.

(5) Includes: (a) 4,000 shares of Series B Preferred owned of record by the LLC; (b) 12,000 shares of Series B Preferred owned of record by SBL; (c) 4,000 shares Series B Preferred owned of record by SBL's wholly-owned subsidiary, GPC, over which SBL, J. Golsen, and B. Golsen share the voting and dispositive power and (d) 1,000,000 shares of Series D Preferred owned of record by SBL.

Table of Contents

+ See footnote “+” to the table under “Security Ownership of Certain Beneficial Owners.”

(1) We based the information, with respect to beneficial ownership, on information furnished by each director or officer, contained in filings made with the SEC, or contained in our records.

(2) This amount includes (a) 1,450 shares held by Mr. Ackerman’s trust and 825 shares of common stock that Mr. Ackerman may purchase pursuant to currently exercisable non-qualified stock options, over which Mr. Ackerman possesses sole voting and dispositive power and (b) 13,600 shares are held in a trust owned by Mrs. Ackerman, of which Mrs. Ackerman is trustee.

(3) This amount includes 10,000 shares held by Mr. Adams’ trust over which Mr. Adams possesses sole voting and dispositive power, and 12,475 shares that Mr. Adams may acquire pursuant to currently exercisable stock options.

(4) This amount includes 61,160 shares held in a joint account owned by a trust, of which Dr. Brown’s wife is the trustee, and by a trust, of which Dr. Brown is the trustee. As trustees, Dr. Brown and his wife share voting and dispositive power over these shares. The amount also includes (a) 825 shares of common stock that Dr. Brown may purchase pursuant to currently exercisable non-qualified stock options, (b) 18,442 shares held in a profit sharing plan of which Dr. Brown is the trustee and holds voting and dispositive power over the shares and (c) 50,727 shares owned by Robert C. Brown, MD, Inc. over which Dr. Brown has voting and dispositive power. The amount shown does not include shares owned directly, or through trusts, by the children of Dr. Brown and the son-in-law of Dr. Brown, David M. Shear, all of which Dr. Brown disclaims beneficial ownership.

(5) Mr. Burtch has the sole voting and dispositive power over these shares, which include 825 shares of common stock that Mr. Burtch may purchase pursuant to currently exercisable non-qualified stock options.

(6) This amount includes (a) 1,000 shares that are held in certain trusts and (b) 825 shares of common stock that Mr. Butkin may purchase pursuant to currently exercisable non-qualified stock options over which Mr. Butkin has voting and dispositive power.

(7) See footnotes (2), (3), (4), and (5) of the table under “Security Ownership of Certain Beneficial Owners” for a description of the amount and nature of the shares beneficially owned by B. Golsen.

(8) See footnotes (2), (3), (4), and (5) of the table under “Security Ownership of Certain Beneficial Owners” for a description of the amount and nature of the shares beneficially owned by J. Golsen.

(9) Mr. Goss has the sole voting and dispositive power over these shares.

(10) The amount includes 15,000 shares held by Mr. Ille’s trust and 825 shares of common stock that Mr. Ille may purchase pursuant to currently exercisable non-qualified stock options, over which Mr. Ille possesses sole voting and dispositive power.

(11) Mr. Jones and his wife share voting and dispositive power over these shares, which include 15,000 shares that Mr. Jones may acquire pursuant to currently exercisable stock options, over which Mr. Jones has sole voting and dispositive power.

Table of Contents

(12) Mr. Munson has the sole voting and dispositive power over these shares, which include 825 shares that Mr. Munson may acquire pursuant to currently exercisable non-qualified stock options.

(13) This amount represents shares that Mr. Perry may acquire pursuant to currently exercisable stock options, over which Mr. Perry has sole dispositive power.

(14) The amount includes (a) 16,000 shares of common stock, including 15,000 shares held by a trust, and (b) 825 shares of common stock that Mr. Rhodes may purchase pursuant to currently exercisable non-qualified stock options, over which Mr. Rhodes has the sole voting and dispositive power, and (c) 500 shares held by a revocable trust over which Mr. Rhodes' wife has voting and dispositive power.

(15) This amount represents shares that Mr. Rieker may acquire pursuant to currently exercisable stock options, over which Mr. Rieker has sole dispositive power.

(16) Mr. Rydlund has the sole voting and dispositive power over these shares, which include 11,500 shares that Mr. Rydlund may acquire pursuant to currently exercisable stock options plans.

(17) These shares are held in a joint account owned by Mr. Shear's revocable trust of which Mr. Shear is the trustee and by Mr. Shear's spouse's revocable trust of which his spouse is the trustee. As trustees, Mr. Shear and his wife share voting and dispositive power over these shares. This amount does not include, and Mr. Shear disclaims beneficial ownership of the shares beneficially owned by Mr. Shear's wife, which consist of 8,988 shares, the beneficial ownership of which is disclaimed by her, that are held by trusts of which she is the trustee.

(18) Mr. Shelby has the sole voting and dispositive power over these shares, which include 15,000 shares that Mr. Shelby may acquire pursuant to currently exercisable stock options plans.

(19) Mr. Shelley has the sole voting and dispositive power over these shares which include 825 shares that Mr. Shelley may acquire pursuant to currently exercisable non-qualified stock options.

(20) The amount includes 2,000 shares of common stock, including 57,455 shares held by a trust, over which Mr. Tepper has the sole voting and dispositive power.

(21) The shares of common stock include 78,225 shares of common stock that executive officers and directors have the right to acquire within 60 days under our stock option plans and 1,066,266 shares of common stock that executive officers, directors, or entities controlled by our executive officers and directors, have the right to acquire within 60 days under other convertible securities.

Table of Contents

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCE

Policy as to Related Party Transaction

Pursuant to the Audit Committee Charter, our Audit Committee reviews any related party transactions involving any of our directors and executive officers. The following related party transactions were reviewed by the Audit Committee or the Board of Directors as a whole.

Related Party Transactions

Golsen Group

The Golsen Group has acquired from an unrelated third party \$5,000,000 of the 2007 Debentures. During 2009, we incurred interest expense of \$275,000 relating to the debentures held by the Golsen Group, of which \$137,500 remains accrued at December 31, 2009. We also paid interest of \$137,500 that was accrued at December 31, 2008.

In March 2009, we paid dividends totaling approximately \$240,000 and \$60,000 on our Series B Preferred and our Series D Preferred, respectively. In February 2010, we declared dividends totaling approximately \$240,000 and \$60,000 on our Series B Preferred and our Series D Preferred, respectively. All of the outstanding shares of Series B Preferred and Series D Preferred are owned by the Golsen Group.

During 2009, the Company incurred costs of approximately \$1,400 for office improvements from a company owned by Linda Golsen Rappaport, the daughter of Jack E. Golsen, our Chairman and Chief Executive Officer, and sister of Barry H. Golsen, our President.

During 2009, the Golsen Group occupied approximately 1,500 square feet of office space in our corporate offices for which the annual rent is \$12,000.

Steven J. Golsen, Chief Operating Officer of our Climate Control Business, 2009 compensation was approximately \$483,000, which included \$150,000 bonus and \$6,100 automobile allowance. Heidi Brown Shear, Vice President and Managing Counsel to the Company, 2009 compensation was approximately \$164,000, which included \$35,000 bonus and \$4,000 automobile allowance.

Northwest

Northwest Internal Medicine Associates (“Northwest”), a division of Plaza Medical Group, P.C., has an agreement with the Company to perform medical examinations of the management and supervisory personnel of the Company and its subsidiaries. Each year, we pay Northwest \$2,000 a month to perform such examinations, under the agreement. Dr. Robert C. Brown (a director of the Company) is Vice President and Treasurer of Plaza Medical Group, P.C. In addition, Dr. Brown receives a fee of \$2,000 per month to perform medical director consulting services for the Company in connection with the Company’s self-insured health plan and workmen’s compensation benefits.

Table of Contents

Board Independence

The Board of Directors has determined that each of Messrs. Ackerman, Burtch, Butkin, Ille, Munson, Rhodes, Perry, Shelley and Ms. Lapidus is an “independent director” in accordance with the current listing standards of the NYSE.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Audit Fees

The aggregate fees billed by Ernst & Young LLP for professional services rendered for the audit of the Company’s annual financial statements for the fiscal years ended December 31, 2009 and 2008, for the reviews of the financial statements included in the Company’s Quarterly Reports on Form 10-Q for those fiscal years, and for review of documents filed with the SEC for those fiscal years were approximately \$1,321,000 and \$1,397,000, respectively.

Audit-Related Fees

Ernst & Young LLP billed the Company \$32,700 and \$25,000 during 2009 and 2008, respectively, for audit-related services relating to benefit plan audits.

Tax Fees

Ernst & Young LLP billed \$664,559 and \$538,095 during 2009 and 2008, respectively, for tax services to the Company, and included tax return review and preparation and tax consultations and planning.

All Other Fees

The Company did not engage its accountants to provide any other services for the fiscal years ended December 31, 2009 and 2008.

Engagement of the Independent Registered Public Accounting Firm

The Audit Committee is responsible for approving all engagements with Ernst & Young LLP to perform audit or non-audit services for us prior to us engaging Ernst & Young LLP to provide those services. All of the services under the headings Audit Related, Tax Services, and All Other Fees were approved by the Audit Committee in accordance with paragraph (c)(7)(i)(C) of Rule 2-01 of Regulation S-X of the Exchange Act. The Audit Committee of the Company’s Board of Directors has considered whether Ernst & Young LLP’s provision of the services described above for the fiscal years ended December 31, 2009 and 2008 is compatible with maintaining its independence.

Report of Independent Registered
Public Accounting Firm

The Board of Directors and Stockholders of LSB Industries, Inc.

We have audited the accompanying consolidated balance sheets of LSB Industries, Inc. as of December 31, 2009 and 2008, and the related consolidated statements of income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2009. Our audits also included the financial statement schedules listed in the Index at Item 15(a)(2). These financial statements and schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedules based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of LSB Industries, Inc. at December 31, 2009 and 2008, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2009, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedules, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

As discussed in Note 14 to the consolidated financial statements, in 2007, the Company adopted a new accounting principle related to uncertain income tax provisions.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), LSB Industries, Inc.'s internal control over financial reporting as of December 31, 2009, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 8, 2010 expressed an unqualified opinion thereon.
