Item 2.02 Results of Operations and Financial Condition

On October 24, 2017, we issued a press release reporting our financial results for the three months ended September 30, 2017 (the Press Release). We will also host a conference call and webcast on October 24, 2017 during which we will make a presentation on our financial results for the three months ended September 30, 2017 (the Presentation). The Press Release and the Presentation are available on our website at <http://investors.ryder.com>.

The Press Release includes information regarding non-GAAP financial measures, as defined by SEC regulations, as well as a reconciliation of each non-GAAP financial measure to the nearest GAAP measure in the tables following the press release. Set forth in the table below is an explanation of each non-GAAP financial measure and why management believes that presentation of each measure provides useful information to investors:

Non-GAAP Financial Measures

Operating Revenue Measures:

|   |   |
|---|---|
| Operating Revenue                       | Operating revenue is defined as total revenue for Ryder System, Inc. or each business segment (FMS, DTS and SCS), respectively,   |
| FMS Operating Revenue                   | excluding any (1) fuel and (2) subcontracted transportation. We believe operating revenue provides useful information to investors as we use it to evaluate the operating performance of our core businesses and as a measure of sales activity at the consolidated level for Ryder System, Inc., as well as for each of our business segments. |
| DTS Operating Revenue                   | We also use segment EBT as a percentage of segment operating revenue for each business segment for the same   |
| SCS Operating Revenue                   |   |
| FMS EBT as a % of FMS Operating Revenue |   |
| DTS EBT as a % of DTS Operating Revenue |   |
| SCS EBT as a % of SCS Operating Revenue |   |

reason. Note: FMS EBT, DTS EBT and SCS EBT, our primary measures of segment performance, are not non-GAAP measures.

Fuel: We exclude FMS, DTS and SCS fuel from the calculation of our operating revenue measures, as fuel is an ancillary service that we provide our customers, which is impacted by fluctuations in market fuel prices, and the costs are largely a pass-through to our customers, resulting in minimal changes in our profitability during periods of steady market fuel prices. However, profitability may be positively or negatively impacted by rapid changes in market fuel prices during a short period of time, as customer pricing for fuel services is established based on trailing market fuel costs.

Subcontracted transportation: We also exclude subcontracted transportation from the calculation of our operating revenue measures,

as these services are also typically a pass-through to our customers and, therefore, fluctuations result in minimal changes to our profitability. While our DTS and SCS business segments subcontract certain transportation services to third party providers, our FMS business segment does not engage in subcontracted transportation and, therefore, this item is not applicable to FMS.

Operating Revenue Growth Excluding Foreign Exchange Operating revenue growth excluding foreign exchange is calculated by dividing the results for the current and prior year periods by the exchange rates in effect on September 30, 2016, which was the last day of the prior year period, rather than the actual exchange rates in effect as of September 30, 2017. Ryder's period-over-period operating revenue growth excluding foreign exchange excludes the effects of changes in foreign currency exchange rates

from our operating  
revenue financial  
measures.

Due to the  
variability of  
foreign exchange  
rates from period  
to period, we  
believe operating  
revenue  
growth excluding  
foreign exchange is  
useful to investors  
to evaluate  
period-over-period  
operating  
performance.

Comparable Earnings Measures:

Comparable Earnings Before Tax (EBT)

Comparable Earnings

Comparable Earnings per Diluted Common Share (EPS)

Comparable EPS  
Forecast

Comparable Tax Rate

Comparable EBT, comparable earnings, comparable EPS, comparable EPS forecast and comparable tax rate are defined, respectively, as GAAP EBT, earnings, EPS, EPS forecast and effective tax rate, all from continuing operations, excluding (1) non-operating pension costs and (2) any other significant items that are not representative of our business operations. We believe these comparable earnings measures provide useful information to investors and allow for better year-over-year comparison of operating performance.

Non-Operating Pension Costs: Our comparable earnings measures

exclude  
non-operating  
pension costs,  
which include  
the amortization  
of net actuarial  
loss and prior  
service cost,  
interest cost and  
expected return  
on plan assets  
components of  
pension and  
postretirement  
benefit costs.

We exclude  
non-operating  
pension costs  
because we  
consider these  
to be impacted  
by financial  
market  
performance  
and outside the  
operational  
performance of  
our business.

Other  
Significant  
Items: Our  
comparable  
earnings  
measures also  
exclude other  
significant  
items that  
are not  
representative  
of our business  
operations.  
These other  
significant  
items vary from  
period to  
period and, in  
some periods,  
there may be no  
such significant  
items. In this  
reporting period

and comparable periods, we exclude the following other significant items from our comparable earnings measures in this Form 8-K:

(1) Fees related to cost-savings program: In the third quarter of 2017, we recorded consulting fees associated with cost-savings program.

(2) Pension settlement charge: In the third quarter of 2017, we recorded an estimated pension settlement charge for the exit from a U.S. multi-employer pension plan.

(3) Tax law change - rate increase: In the third quarter of 2017, the state of Illinois enacted changes to their tax system, which increased the provision for income taxes by \$1.8 million.

(4) Restructuring: In the second quarter of 2017,

we recorded restructuring credits related to the gains on sale of certain UK facilities.

(5) Operating tax

adjustment: In the first quarter of 2017, we recorded a one-time charge of \$2.2 million related to operating tax expenses that had not been recognized in prior period earnings.

(6)

Pension-related adjustments: In the second quarter of 2016, it was determined that certain pension benefit improvements made in 2009 were not fully reflected in our projected benefit obligation, resulting in a charge to reflect those pension benefits.

Calculation of comparable tax rate: The comparable provision for income taxes is computed using the same methodology as the GAAP

Adjusted Return on  
Average Capital  
(ROC)

Adjusted ROC Spread

provision for  
income taxes.  
Income tax  
effects of  
non-GAAP  
adjustments are  
calculated  
based on the  
statutory tax  
rates of the  
jurisdictions to  
which the  
non-GAAP  
adjustments  
relate.

Adjusted ROC:  
Adjusted ROC  
is defined as  
adjusted net  
earnings  
divided by  
average  
adjusted total  
capital and  
represents the  
rate of return  
generated by  
the capital  
deployed in our  
business. The  
adjustments  
represent the  
comparable  
items described  
above which are  
excluded, as  
applicable, from  
the calculation  
of net earnings  
and average  
shareholder's  
equity (a  
component of  
average total  
capital).

Adjusted ROC  
Spread:  
Adjusted ROC  
spread is  
defined as the

difference  
between  
adjusted ROC  
and  
the weighted  
average cost of  
capital. We use  
adjusted ROC  
and adjusted  
ROC spread as  
internal  
measures of  
how effectively  
we use the  
capital invested  
(borrowed or  
owned) in our  
operations.

Cash Flow Measures:

Total Cash Generated We consider total cash generated and free cash flow to be important measures of comparative operating performance, as our principal sources of operating liquidity are cash from operations and proceeds from the sale of revenue earning equipment.

Free Cash Flow Total Cash Generated: Total cash generated is defined as the sum of (1) net cash provided by operating activities, (2) net cash provided by the sale of revenue earning equipment, (3) net cash provided by the sale of operating property and equipment, (4) collections on direct finance leases and (5) other cash inflows from

investing activities. We believe total cash generated is an important measure of total cash flows generated from our ongoing business activities. Free Cash Flow: We refer to the net amount of cash generated from operating activities and investing activities (excluding changes in restricted cash and acquisitions) from continuing operations as “free cash flow”. We calculate free cash flow as the sum of (1) net cash provided by operating activities, (2) net cash provided by the sale of revenue earning equipment, (3) net cash provided by the sale of

operating  
property and  
equipment, (4)  
collections on  
direct finance  
leases and (5)  
other cash  
inflows from  
investing  
activities, less  
(6) purchases  
of property  
and revenue  
earning  
equipment.

We believe  
free cash flow  
provides  
investors with  
an important  
perspective on  
the cash  
available for  
debt service  
and for  
shareholders,  
after making  
capital  
investments  
required to  
support  
ongoing  
business  
operations.

Our  
calculation of  
free cash flow  
may be  
different from  
the calculation  
used by other  
companies  
and, therefore,  
comparability  
may be  
limited.

Additional information regarding non-GAAP financial measures can be found in the Press Release and our most recent Form 10-K and Form 10-Q filed with the SEC.
