Item 2.05 Costs Associated with Exit or Disposal Activities.

On May 9, 2012, the management of Rogers Corporation (the “Company”), in connection with its continuing efforts to reduce operating costs, committed to a plan to cease operations at the manufacturing site it has been leasing in Bremen, Germany. The manufacture of certain silicone materials produced in the Bremen facility will be consolidated into the Company’s existing facility in Carol Stream, Illinois. The Bremen operation, which was acquired as part of the Company’s acquisition of certain assets of MTI Global, Inc. in 2009, has not been profitable.

The Company expects to incur expenses and charges during the second quarter of 2012 in connection with its plan to close the Bremen facility. These expenses and charges, which cannot be reasonably estimated at this time, will include, without limitation, the following major components: (i) those associated with the early termination of the lease for the 68,000 square foot building; (ii) those associated with the separation from employment of approximately 33 employees at the facility; (iii) those associated with physically removing and transporting certain manufacturing equipment and preparing the building for return to the landlord; and (iv) possible impairment of assets. An amendment to this Form 8-K will be timely filed when estimates for these expenses and charges are formulated.
