ANNUAL REPORT ON PERFORMANCE AND OUTLOOK

9-30-01

[SCALE LOGO OMITTED]

FROM THE TRUSTEES

[GRAPHIC OMITTED: PHOTO OF JOHN A. HILL AND GEORGE PUTNAM III]

Dear Shareholder:

Putnam Master Intermediate Income Trust was clearly among the beneficiaries as jittery investors continued to flee equities for safer havens in the wake of a worldwide economic decline and global markets' general unease. At fiscal year's end on September 30, 2001, the fund's performance was in positive territory, a consequence, at least in part, of the brisk demand for fixed-income securities.

It is important for shareholders to keep in mind Putnam's commitment to style consistency. In your fund's case, its high-quality bonds are providing a measure of safety during the current market turbulence, while the lower-rated holdings await the opportunity to perform well when the markets and the underlying economy turn more positive.

In the following report, David Waldman and the Core Fixed Income Team provide a detailed discussion of the market environment during the fiscal year just ended. Then they offer their views of what we can expect in the months ahead.

Respectfully yours,

/S/ JOHN A. HILL

/S/ GEORGE PUTNAM, III

John A. Hill
Chairman of the Trustees
November 14, 2001

George Putnam, III
President of the Funds

REPORT FROM FUND MANAGEMENT

David L. Waldman
and the Core Fixed
Income Team

The fiscal year ended September 30, 2001, was a challenging period for Putnam Master Intermediate Income Trust. The U.S. economy's rapid deceleration in the fall of 2000 was followed by continued difficulties in 2001. Equity markets declined sharply, led by the struggling technology and telecommunications sectors. In the bond market, the higher-quality sectors performed well, while results in the lower-quality sectors and in emerging markets were poor. Finally, the period ended on a particularly tragic note, with the terrorist attacks on September 11 that sent financial markets down sharply in the final weeks of the period. In this difficult environment, your fund's

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-30D

performance at net asset value was relatively flat. The fund's market price showed stronger returns, reflecting the generally favorable attitudes among investors for fixed-income investments.

Total return for 12 months ended 9/30/01

NAV	Market price
0.58%	3.06%

Past performance is not indicative of future results. Performance based on market prices for the shares will vary from performance based on the portfolio's net asset value. Performance information for longer periods begins on page 8.

* AMID HEIGHTENED UNCERTAINTY, INVESTORS SOUGHT QUALITY

Throughout the period, world markets showed continued volatility amid fears that the U.S. economy might enter a recession. In January 2001, the Federal Reserve Board responded by signaling an end to its tightening policy and beginning a program of interest-rate cuts, eventually reducing the federal funds rate from 6.50% to 3.00% as of the close of the reporting period. This was one of the fastest and most aggressive series of cuts in the history of the Fed, and the bond market generally benefited. The decline in interest rates, however, led to a reduction in the fund's dividend in June 2001.

Hopes for a quick economic recovery, however, soon proved overly optimistic as corporate profits continued to sag and the equity markets struggled to stay afloat. In the aftermath of the September 11 events, most positive returns were shattered as investors took flight from riskier asset classes and rushed to the relative security of government bonds.

As your fund began the second half of its 2001 fiscal year, fixed-income investments had begun to lose some of their appeal. The Fed appeared to have staved off a recession in the United States. Equity markets generally stabilized, despite a rise in unemployment and disappointing corporate earnings. Nevertheless, consumer confidence and spending remained steady, albeit on a lower level, and an upturn in the stock

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-30D

market seemed possible.

Through the summer, the Fed continued easing, which was helpful for bond markets generally. The stock market's performance was lackluster, reflecting poor second-quarter earnings and uncertainty about the timing of a recovery. In the bond market, the high-yield sector was hurt by poor returns in telecommunications bonds, but most other industry sectors showed strong performance, especially the higher-quality BB-rated issues. Treasuries, mortgage-backed securities, and corporate investment-grade bonds also performed well during the summer. The fund's international position in developed markets held up, while holdings in emerging markets struggled amid concerns about Argentina.

After September 11, the Fed acted quickly to support the already weakened economy by cutting interest rates by another half percentage point in an unscheduled meeting just before the markets reopened. Central banks worldwide lowered short-term rates in an attempt to minimize the damage of the attacks on the fragile world markets.

"For bond investors, slow but steady -- the tortoise approach -- has won the race this year. People who viewed bonds as hopelessly boring in the late 1990s suddenly appreciate what these corporate or government IOUs can do for a portfolio."

-- Los Angeles Times, 10/3/01

In seeking to minimize risk and uncertainty, investors turned primarily to investment-grade fixed-income securities. The U.S. Treasury market fared the best as investors moved assets into government-backed bonds, a traditional safe haven in times of uncertainty. This was evident in the dramatic steepening of the Treasury yield curve. After beginning the calendar year in a basically flat position, the curve steepened considerably as the Fed lowered short-term rates a total of eight times during the fund's reporting period, while rates on long-term bonds fell more modestly. Long-term rates were pressured in part by concerns over the possibility of inflation and a reduced budget surplus. After September 30, the Fed lowered interest rates two more times for an additional percentage point.

The events of September 11 wreaked havoc on the lower-rated fixed-income sectors as concerned investors shunned the added risk of these securities. Credit spreads (the difference in yield between Treasuries and bonds with greater risk) immediately widened to historic levels, while investors sold off higher-risk fixed-income investments.

* HIGH-YIELD BONDS SHOWED SIGNS OF IMPROVEMENT, THEN FALTERED

High-yield bonds encountered much difficulty in 2000 at the hands of volatile equity markets, increasing defaults, and slowing economic growth. Credit spreads widened during the fourth quarter of 2000 and then narrowed in January, allowing the sector to recoup some of these losses. The surprise interest-rate cut in early January sparked a rally that endured through mid February and our increased weighting in high-yields at that time helped performance.

Deteriorating economic and corporate fundamentals, however, dampened performance for the rest of the period, offsetting much of the previous gains. In particular, continued woes in the telecommunications sector, beset the market again in the second quarter. In the latter weeks of September, credit spreads widened further because of heightened fears of

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-30D

recession, and the sector declined sharply. Nevertheless, we believe the high-yield sector will perform well as defaults peak, valuations remain attractive, and economic recovery seems likely.

* NON-U.S. SECTOR DELIVERED SOLID PERFORMANCE DESPITE STUMBLING EMERGING MARKETS

International bonds in developed markets performed well during the annual period as the global economy slowed and central banks worldwide initiated monetary easing policies. Global sovereign bonds continued to advance subsequent to the September 11 attacks. G-7 government bonds (issued by the Group of Seven, the seven largest industrialized nations) benefited from a flight-to-quality bid from investors in reaction to the increased political and economic uncertainty caused by the tragic events in the United States.

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-30D

As a result of the fragile state of the global economy at the time of the attacks, central banks initiated a coordinated round of easings in an attempt to limit negative effects on economic activity. Lower interest rates, in addition to heightened investor aversion to equity markets and a weakening U.S. dollar, helped boost returns for U.S. investors. The fund's holdings in Greece and Germany contributed positively to performance.

Despite a volatile period, emerging markets had generated positive returns primarily because of their attractive valuation levels. However, the emerging-bond market collapsed in July as Argentina struggled to avoid default. The market suffered considerably after the terrorist attacks as investors pulled back from riskier assets. Country selection, such as positions in Mexico and Russia, was favorable for fund performance.

* UNCERTAIN OUTLOOK SHOULD BENEFIT BOND MARKET

The terrorist attacks have significantly altered the economic landscape, postponing the anticipated economic recovery at least until the second half of next year. While the U.S. economy now faces the risk of a recession, we believe the aggressive monetary and fiscal policies that are being implemented have strong potential to stimulate the economy.

With little reason for concern over inflation, we expect the Fed to continue bolstering the economy by cutting rates further in the near term. We continue to monitor the fixed-income universe closely and look for positive fundamentals and attractive valuations. Within the investment-grade market, we will continue to take advantage of opportunities in the mortgage-backed sector, which should benefit as volatility returns to more typical levels.

We do expect near-term volatility in the high-yield market, however, as investors continue to trade on uncertainty rather than fundamentals. However, as defaults roll over and the economy returns to trend-line growth, the high-yield sector should benefit. We believe that the market has already taken into account a recessionary economic environment and an increase in defaults, and the positive policy response should lend some stability to the markets.

Within the international marketplace, we continue to take advantage of opportunities in the developed market universe by focusing on positions in Germany and maintaining minimal exposure in Japan. Although valuations are attractive, we are cautious with regard to the emerging markets sector where economic and political uncertainties remain. Overall, we believe that fixed-income investments should benefit as aggressive government spending and monetary easing takes hold.

The views expressed here are exclusively those of Putnam Management. They are not meant as investment advice. Although the described holdings were viewed favorably as of 9/30/01, there is no guarantee the fund will continue to hold these securities in the future. International investments are subject to certain risks, such as currency fluctuations, economic instability, and political developments. While the U.S. government backing of individual securities does not insure your principal, which will fluctuate, it does guarantee that the fund's government-backed holdings will make timely payments of interest and principal. Mortgage-backed securities in the portfolio may be subject to prepayment risk. The lower credit ratings of high-yield bonds reflect a greater possibility that adverse changes in the economy or poor performance by the issuers of these bonds will affect the issuers'

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-30D

ability to pay principal and interest.

NEWS FROM THE TRUSTEES

In July 2001, we welcomed Charles B. Curtis to Putnam's Board of Trustees. He brings an impressive list of credentials that include several key positions in Washington and directorships in education and energy-related industries. We look forward to the contributions Charles will make to the continued success of the Putnam funds.

PUTNAM'S POLICY ON CONFIDENTIALITY

In order to conduct business with our shareholders, we must obtain certain personal information such as account holders' addresses, telephone numbers, Social Security numbers, and the names of their financial advisors. We use this information to assign an account number and to help us maintain accurate records of transactions and account balances.

It is our policy to protect the confidentiality of your information, whether or not you currently own shares of our funds, and in particular, not to sell information about you or your accounts to outside marketing firms. We have safeguards in place designed to prevent unauthorized access to our computer systems and procedures to protect personal information from unauthorized use.

Under certain circumstances, we share this information with outside vendors who provide services to us, such as mailing and proxy solicitation. In those cases, the service providers enter into confidentiality agreements with us, and we provide only the information necessary to process transactions and perform other services related to your account. We may also share this information with our Putnam affiliates to service your account or provide you with information about other Putnam products or services. It is also our policy to share account information with your financial advisor, if you've listed one on your Putnam account.

If you would like clarification about our confidentiality policies or have any questions or concerns, please don't hesitate to contact us at 1-800-225-1581, Monday through Friday, 8:30 a.m. to 7:00 p.m., or Saturdays from 9:00 a.m. to 5:00 p.m. Eastern Time.

PERFORMANCE SUMMARY

This section provides information about your fund's performance, which should always be considered in light of its investment strategy. Putnam Master Intermediate Income Trust is designed for investors seeking high current income and relative stability of net asset value through U.S. government, high-yield, and international fixed-income securities with limited maturities.

TERMS AND DEFINITIONS

Total return shows how the value of the fund's shares changed over time, assuming you held the shares through the entire period and reinvested all distributions in the fund.

Net asset value (NAV) is the value of all your fund's assets, minus any liabilities, divided by the number of outstanding common shares.

Market price is the current trading price of one share of the fund. Market prices are set by transactions between buyers and sellers on the New York Stock Exchange.

COMPARATIVE BENCHMARKS

Lehman Intermediate Government/Credit Index* is an unmanaged list of U.S. government and corporate securities with maturities between 1 and 9.99 years.

Salomon Brothers Non-U.S. World Government Bond Index* is an unmanaged list of bonds issued by 10 countries.

Credit Suisse First Boston High Yield Bond Index* is an unmanaged list of lower-rated higher-yielding U.S. corporate bonds.

Consumer price index (CPI) is a commonly used measure of inflation; it does not represent an investment return.

*Securities indexes assume reinvestment of all distributions and interest payments and do not take into account brokerage fees or taxes. Securities in the fund do not match those in the indexes and performance of the fund will differ. It is not possible to invest directly in an index.

A GUIDE TO THE FINANCIAL STATEMENTS

These sections of the report, as well as the accompanying Notes, preceded by the Report of independent accountants, constitute the fund's financial statements.

The fund's portfolio lists all the fund's investments and their values as of the last day of the reporting period. Holdings are organized by asset type and industry sector, country, or state to show areas of concentration and diversification.

Statement of assets and liabilities shows how the fund's net assets and share price are determined. All investment and noninvestment assets are added together. Any unpaid expenses and other liabilities are subtracted from this total. The result is divided by the number of shares to determine the net asset value per share, which is calculated separately for each class of shares. (For funds with preferred shares,

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-30D

the amount subtracted from total assets includes the net assets allocated to remarketed preferred shares.)

Statement of operations shows the fund's net investment gain or loss. This is done by first adding up all the fund's earnings -- from dividends and interest income -- and subtracting its operating expenses to determine net investment income (or loss). Then, any net gain or loss the fund realized on the sales of its holdings -- as well as any unrealized gains or losses over the period -- is added to or subtracted from the net investment result to determine the fund's net gain or loss for the fiscal year.

Statement of changes in net assets shows how the fund's net assets were affected by distributions to shareholders and by changes in the number of the fund's shares. It lists distributions and their sources (net investment income or realized capital gains) over the current reporting period and the most recent fiscal year-end. The distributions listed here may not match the sources listed in the Statement of operations because the distributions are determined on a tax basis and may be paid in a different period from the one in which they were earned.

Financial highlights provide an overview of the fund's investment results, per-share distributions, expense ratios, net investment income ratios and portfolio turnover in one summary table, reflecting the five most recent reporting periods. In a semiannual report, the highlight table also includes the current reporting period. For open-end funds, a separate table is provided for each share class.

REPORT OF INDEPENDENT ACCOUNTANTS

The Board of Trustees and Shareholders
Putnam Master Intermediate Income Trust

We have audited the accompanying statement of assets and liabilities of Putnam Master Intermediate Income Trust, including the fund's portfolio, as of September 30, 2001, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the years in the two-year period then ended and financial highlights for each of the years in the two-year period then ended. These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits. The financial highlights for each of the years in the three-year period ended September 30, 1999 were audited by other auditors whose report dated November 11, 1999 expressed an unqualified opinion on those financial highlights.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform our audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of September 30, 2001 by correspondence with the custodian and brokers. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-30D

referred to above present fairly, in all material respects, the financial position of Putnam Master Intermediate Income Trust as of September 30, 2001, the results of its operations, changes in its net assets and financial highlights for each of the years or periods described above in conformity with accounting principles generally accepted in the United States of America.

(a) Per share net investment income has been determined on the basis of weighted average number of shares outstanding during the period.

(b) Total return does not reflect the effect of sales charges.

(c) Includes amounts paid through expense offset arrangements (Note 2).

(d) Portfolio turnover excludes the impact of assets received from the acquisition of Putnam Intermediate Government Income Trust.

NOTES TO FINANCIAL STATEMENTS
September 30, 2001

Note 1
Significant accounting policies

Putnam Master Intermediate Income Trust (the "fund") is registered under the Investment Company Act of 1940, as amended, as a diversified,

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-30D

closed-end management investment company and is authorized to issue an unlimited number of shares. The fund's investment objective is to seek, with equal emphasis, high current income and relative stability of net asset value, by allocating its investments among the U.S. investment grade sector, high-yield sector and international sector.

The following is a summary of significant accounting policies consistently followed by the fund in the preparation of its financial statements. The preparation of financial statements is in conformity with accounting principles generally accepted in the United States of America and requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

A) Security valuation Investments for which market quotations are readily available are stated at market value, which is determined using the last reported sales price on its principal exchange, or if no sales are reported -- as in the case of some securities traded over-the-counter -- the last reported bid price. Securities quoted in foreign currencies are translated into U.S. dollars at the current exchange rate. Short-term investments having remaining maturities of 60 days or less are stated at amortized cost, which approximates market value. Other investments, including restricted securities, are stated at fair value following procedures approved by the Trustees. Market quotations are not considered to be readily available for certain debt obligations; such investments are stated at fair value on the basis of valuations furnished by an independent pricing service or dealers, approved by the Trustees, which determine valuations for normal institutional-size trading units of such securities using methods based on market transactions for comparable securities and variable relationships between securities that are generally recognized by institutional traders.

B) Joint trading account Pursuant to an exemptive order issued by the Securities and Exchange Commission, the fund may transfer uninvested cash balances into a joint trading account along with the cash of other registered investment companies and certain other accounts managed by Putnam Investment Management, LLC ("Putnam Management"), the fund's manager, a wholly-owned subsidiary of Putnam Investments, LLC. These balances may be invested in one or more repurchase agreements and/or short-term money market instruments.

C) Repurchase agreements The fund, or any joint trading account, through its custodian, receives delivery of the underlying securities, the market value of which at the time of purchase is required to be in an amount at least equal to the resale price, including accrued interest. Collateral for certain tri-party repurchase agreements is held at the counterparty's custodian in a segregated account for the benefit of the fund and the counterparty. Putnam Management is responsible for determining that the value of these underlying securities is at all times at least equal to the resale price, including accrued interest.

D) Security transactions and related investment income Security transactions are accounted for on the trade date (date the order to buy or sell is executed). Gains or losses on securities sold are determined on the identified cost basis.

Interest income is recorded on the accrual basis. Dividend income is recorded on the ex-dividend date. Non-cash dividends, if any, are recorded at the fair market value of the securities received. Discounts

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-30D

on zero coupon bonds, original issue discount bonds, stepped-coupon bonds and payment in kind bonds are accreted according to the yield-to-maturity basis. Any premium resulting from the purchase of stepped-coupon bonds is amortized on a yield-to-maturity basis.

E) Foreign currency translation The accounting records of the fund are maintained in U.S. dollars. The market value of foreign securities, currency holdings, and other assets and liabilities are recorded in the books and records of the fund after translation to U.S. dollars based on the exchange rates on that day. The cost of each security is determined using historical exchange rates. Income and withholding taxes are translated at prevailing exchange rates when accrued or incurred. The fund does not isolate that portion of realized or unrealized gains or losses resulting from changes in the foreign exchange rate on investments from fluctuations arising from changes in the market prices of the securities. Such gains and losses are included with the net realized and unrealized gain or loss on investments. Net realized gains and losses on foreign currency transactions represent net realized exchange gains or losses on closed forward currency contracts, disposition of foreign currencies and the difference between the amount of investment income and foreign withholding taxes recorded on the fund's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized appreciation and depreciation of assets and liabilities in foreign currencies arise from changes in the value of open forward currency contracts and assets and liabilities other than investments at the period end, resulting from changes in the exchange rate. Investments in foreign securities involve certain risks, including those related to economic instability, unfavorable political developments, and currency fluctuations, not present with domestic investments.

F) Forward currency contracts The fund may engage in forward currency contracts, which are agreements between two parties to buy and sell currencies at a set price on a future date. These contracts are used to protect against a decline in value relative to the U.S. dollar of the currencies in which its portfolio securities are denominated or quoted (or an increase in the value of a currency in which securities a fund intends to buy are denominated, when a fund holds cash reserves and short-term investments). The U.S. dollar value of forward currency contracts is determined using current forward currency exchange rates supplied by a quotation service. The market value of the contract will fluctuate with changes in currency exchange rates. The contract is "marked to market" daily and the change in market value is recorded as an unrealized gain or loss. When the contract is closed, the fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. The fund could be exposed to risk if the value of the currency changes unfavorably, if the counterparties to the contracts are unable to meet the terms of their contracts or if the fund is unable to enter into a closing position.

G) Futures and options contracts The fund may use futures and options contracts to hedge against changes in the values of securities the fund owns or expects to purchase. The fund may also write options on securities it owns or in which it may invest to increase its current returns.

The potential risk to the fund is that the change in value of futures and options contracts may not correspond to the change in value of the hedged instruments. In addition, losses may arise from changes in the value of the underlying instruments, if there is an illiquid secondary market for the contracts, or if the counterparty to the contract is

unable to perform. When the contract is closed, the fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. Realized gains and losses on purchased options are included in realized gains and losses on investment securities.

Futures contracts are valued at the quoted daily settlement prices established by the exchange on which they trade. Exchange traded options are valued at the last sale price, or if no sales are reported, the last bid price for purchased options and the last ask price for written options. Options traded over-the-counter are valued using prices supplied by dealers.

H) Interest rate swap contracts The fund may engage in interest rate swap agreements, which are arrangements between two parties to exchange cash flows based on a notional principal amount. The fund may enter into interest rate swap agreements, to manage the funds exposure to interest rates. Interest rate swaps are marked to market daily based upon quotations from market makers and the change, if any, is recorded as unrealized gain or loss. Payments made or received are included as part of interest income. Payments received or made upon early termination are recorded as realized gain or loss. The fund could be exposed to credit or market risk due to unfavorable changes in the fluctuation of interest rates or that the counterparty may default on its obligation to perform.

I) TBA purchase commitments The fund may enter into "TBA" (to be announced) purchase commitments to purchase securities for a fixed unit price at a future date beyond customary settlement time. Although the unit price has been established, the principal value has not been finalized. However, the amount of the commitments will not fluctuate more than .01% from the principal amount. The fund holds, and maintains until settlement date, cash or high-grade debt obligations in an amount sufficient to meet the purchase price, or the fund may enter into offsetting contracts for the forward sale of other securities it owns. Income on the securities will not be earned until settlement date. TBA purchase commitments may be considered securities in themselves, and involve a risk of loss if the value of the security to be purchased declines prior to the settlement date, which risk is in addition to the risk of decline in the value of the fund's other assets. Unsettled TBA purchase commitments are valued at the current market value of the underlying securities, according to the procedures described under "Security valuation" above.

Although the fund will generally enter into TBA purchase commitments with the intention of acquiring securities for their portfolio or for delivery pursuant to options contracts it has entered into, the fund may dispose of a commitment prior to settlement if Putnam Management deems it appropriate to do so.

J) Security lending The fund may lend securities, through its agent Citibank N.A., to qualified borrowers in order to earn additional income. The loans are collateralized by cash and/or securities in an amount at least equal to the market value of the securities loaned. The market value of securities loaned is determined daily and any additional required collateral is allocated to the fund on the next business day. The risk of borrower default will be borne by Citibank N.A., the fund will bear the risk of loss with respect to the investment of the cash collateral. Income from securities lending is included in investment income on the Statement of operations. At September 30, 2001, the value of securities loaned amounted to \$1,821. The fund received cash collateral of \$21,675 which is pooled with collateral of other Putnam funds into 36 issuers of high grade short-term investments.

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-30D

K) Federal taxes It is the policy of the fund to distribute all of its income within the prescribed time and otherwise comply with the provisions of the Internal Revenue Code applicable to regulated investment companies. It is also the intention of the fund to distribute an amount sufficient to avoid imposition of any excise tax under Section 4982 of the Internal Revenue Code of 1986, as amended. Therefore, no provision has been made for federal taxes on income, capital gains or unrealized appreciation on securities held nor for excise tax on income and capital gains.

At September 30, 2001, the fund had a capital loss carryover of approximately \$71,656,000 available to offset future capital gains, if any. The amount of the carryover and the expiration dates are:

Loss Carryover	Expiration
-----	-----
\$ 7,035,000	September 30, 2003
2,793,000	September 30, 2004
1,555,000	September 30, 2005
10,040,000	September 30, 2007
25,640,000	September 30, 2008
24,593,000	September 30, 2009

L) Distributions to shareholders Distributions to shareholders from net investment income are recorded by the fund on the ex-dividend date. Distributions from capital gains, if any, are recorded on the ex-dividend date and paid at least annually. The amount and character of income and gains to be distributed are determined in accordance with income tax regulations, which may differ from generally accepted accounting principles. These differences include temporary and permanent differences of losses on wash sale transaction, foreign currency gains and losses, post-October loss deferrals, expiration of a capital loss carryover, dividends payable, defaulted bond interest, both realized and unrealized gains and losses on certain futures contracts, paydown gains and losses on mortgage-backed securities, market discount and interest on payment-in-kind securities. Reclassifications are made to the fund's capital accounts to reflect income and gains available for distribution (or available capital loss carryovers) under income tax regulations. For the year ended September 30, 2001, the fund reclassified \$3,599,171 to increase distributions in excess of net investment income and \$2,178,267 to decrease paid-in-capital, with a decrease to accumulated net realized losses of \$5,777,438. The calculation of net investment income per share in the financial highlights table excludes these adjustments.

Note 2

Management fee, administrative services and other transactions

Compensation of Putnam Management, for management and investment advisory services is paid quarterly based on the average net assets of the fund. Such fee is based on the following annual rates: 0.75% of the first \$500 million of average weekly net assets, 0.65% of the next \$500 million, 0.60% of the next \$500 million, and 0.55% thereafter.

The fund reimburses Putnam Management an allocated amount for the compensation and related expenses of certain officers of the fund and their staff who provide administrative services to the fund. The aggregate amount of all such reimbursements is determined annually by the Trustees.

Custodial functions for the fund's assets are provided by Putnam

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-30D

Fiduciary Trust Company (PFTC), a subsidiary of Putnam Investments, LLC. Investor servicing agent functions are provided by Putnam Investor Services, a division of PFTC.

The fund has entered into an arrangement with PFTC whereby credits realized as a result of uninvested cash balances are used to reduce a portion of the fund's expenses. For the year ended September 30, 2001, the fund's expenses were reduced by \$71,633 under these arrangements.

Each independent Trustee of the fund receives an annual Trustee fee, of which \$968 has been allocated to the fund, and an additional fee for each Trustees meeting attended. Trustees receive additional fees for attendance at certain committee meetings.

The fund has adopted a Trustee Fee Deferral Plan (the "Deferral Plan") which allows the Trustees to defer the receipt of all or a portion of Trustees Fees payable on or after July 1, 1995. The deferred fees remain invested in certain Putnam funds until distribution in accordance with the Deferral Plan.

The fund has adopted an unfunded noncontributory defined benefit pension plan (the "Pension Plan") covering all Trustees of the fund who have served as a Trustee for at least five years. Benefits under the Pension Plan are equal to 50% of the Trustee's average total retainer and meeting fees for the three years preceding retirement. Pension expense for the fund is included in Compensation of Trustees in the Statement of operations. Accrued pension liability is included in Payable for compensation of Trustees in the Statement of assets and liabilities.

Note 3

Purchases and sales of securities

During the year ended September 30, 2001, cost of purchases and proceeds from sales of investment securities other than U.S. government obligations and short-term investments aggregated \$536,563,429 and \$542,446,862, respectively. Purchases and sales of U.S. government obligations aggregated \$168,574,804 and \$214,175,745, respectively.

Written option transactions during the year are summarized as follows:

	Contract Amounts	Premiums Received

Written options outstanding at beginning of year	\$ --	\$ --

Options opened	1,216,010	47,062

Options expired	--	--

Options closed	(1,216,010)	(47,062)

Written options outstanding at end of year	\$ --	\$ --

Note 4

Share repurchase program

In November 1994, the Trustees authorized the fund to repurchase up to

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-30D

1,950,000 of its shares in the open market. Repurchases will only be made when the fund's shares are trading at less than net asset value and at such times and amounts as is believed to be in the best interest of the fund's shareholders. Any repurchases of shares will have the effect of increasing the net asset value per share of remaining shares outstanding.

For the year ended September 30, 2001, the fund repurchased no shares.

As of September 30, 2001, 570,000 shares have been repurchased since the inception of the program.

Note 5

New accounting pronouncement

In November 2000, the AICPA issued a revised Audit and Accounting Guide, Audits of Investment Companies, which is effective for fiscal years beginning after December 15, 2000. The revised Guide will require the fund to amortize premium and accrete discount on all fixed-income securities, and classify as interest income gains and losses realized on paydowns on mortgage-backed securities which are presently included in realized gain/loss. Adopting these accounting principles will not affect the fund's net asset value, but will change the classification of certain amounts between interest income and realized and unrealized gain/loss in the Statement of operations. The adoption of this principle will not be material to the financial statements.

FEDERAL TAX INFORMATION

(Unaudited)

The Form 1099 you receive in January 2002 will show the tax status of all distributions paid to your account in calendar 2001.

For the year ended September 30, 2001, a portion of the Fund's distribution represents a return of capital and is therefore not taxable to shareholders.

The fund has designated 1.19% of the distributions from net investment income as qualifying for the dividends received deduction for corporations.

RESULTS OF JUNE 14, 2001 SHAREHOLDER MEETING

(Unaudited)

An annual meeting of shareholders of the fund was held on June 14, 2001. At the meeting, each of the nominees for Trustees was elected, as follows:

	Votes for	Votes withheld
Jameson Adkins Baxter	92,030,321	3,057,267
J. A. Hill	92,043,276	3,044,312
Ronald J. Jackson	92,040,207	3,047,381
Paul L. Joskow	92,039,989	3,047,599
Elizabeth T. Kennan	91,993,193	3,094,395
Lawrence J. Lasser	92,038,673	3,048,915
John H. Mullin III	92,029,320	3,058,268
R. E. Patterson	92,066,227	3,021,361
George Putnam, III	92,025,494	3,062,094
A.J.C. Smith	91,979,894	3,107,694

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-30D

W. Thomas Stephens	92,026,404	3,061,184
W. Nicholas Thorndike	91,943,693	3,143,895

A proposal to convert your fund from closed-end to open-end status and authorize certain related amendments to the Agreement and Declaration of Trust was defeated as follows: 9,185,005 votes for, and 36,532,101 votes against, with 49,370,482 abstentions and broker non-votes.

All tabulations are rounded to nearest whole number.
