ACACIA RESEARCH CORPORATION  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. DESCRIPTION OF BUSINESS AND BASIS OF PRESENTATION

Description of Business. As used herein, “Acacia” and the “Company” refer to Acacia Research Corporation and/or its wholly and majority-owned and controlled operating subsidiaries. All intellectual property acquisition, development, licensing and enforcement activities are conducted solely by certain of Acacia’s wholly and majority-owned and controlled operating subsidiaries.

Acacia’s operating subsidiaries acquire, develop, license and otherwise enforce patented technologies. Acacia’s operating subsidiaries generate revenues and related cash flows from the granting of intellectual property rights for the use of, or pertaining to, patented technologies that such operating subsidiaries own or control. Acacia’s operating subsidiaries assist patent owners with the prosecution and development of their patent portfolios, the protection of their patented technologies from unauthorized use, the generation of revenue from users of their patented technologies and, if necessary, the enforcement against unauthorized users of their patented technologies. Currently, on a consolidated basis, Acacia’s operating subsidiaries own or control the rights to over 238 patent portfolios, which include U.S. patents and certain foreign counterparts, covering technologies used in a wide variety of industries.

In January 2012, a wholly owned operating subsidiary of Acacia acquired ADAPTIX, Inc. (“ADAPTIX”), a pioneer in the development of 4G technologies for wireless systems, for cash consideration of \$160 million, as described at Note 8 to these consolidated financial statements.

Basis of Presentation. The accompanying consolidated financial statements include the accounts of Acacia and its wholly and majority-owned and controlled subsidiaries. Material intercompany transactions and balances have been eliminated in consolidation. Noncontrolling interests in Acacia’s majority-owned and controlled operating subsidiaries (“noncontrolling interests”) are separately presented as a component of stockholders’ equity in the consolidated statements of financial position for the applicable periods presented. Consolidated net income (loss) is adjusted to include the net (income) loss attributed to noncontrolling interests in the consolidated statements of income. Refer to the accompanying consolidated financial statements for total noncontrolling interests and net income (loss) attributable to noncontrolling interests for the applicable periods presented.

In August 2010, a wholly owned subsidiary of Acacia became the general partner of the Acacia Intellectual Property Fund, L.P. (the “Acacia IP Fund”), which was formed in August 2010. The Acacia IP Fund is authorized to raise up to \$250 million. The Acacia IP Fund acquires, licenses and enforces intellectual property consisting primarily of patents, patent rights, and patented technologies. The Acacia IP Fund is included in the Company’s consolidated financial statements for the periods presented, as Acacia’s wholly owned subsidiary, as the majority owner and general partner, has the ability to control the operations and activities of the Acacia IP Fund.

The accompanying consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, certain information and footnotes required by accounting principles generally accepted in the United States of America in annual financial statements have been omitted or condensed in accordance with quarterly reporting requirements of the Securities and Exchange Commission (“SEC”). These interim consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto for the year ended December 31, 2011, as reported by Acacia in its Annual Report on Form 10-K. The year-end consolidated balance sheet data was derived from audited financial statements but does not include all disclosures required by accounting principles generally accepted in the United States of America.

The consolidated financial statements of Acacia include all adjustments of a normal recurring nature which, in the opinion of management, are necessary for a fair statement of Acacia's financial position as of June 30, 2012, and results of its operations and its cash flows for the interim periods presented. The results of operations for the three and six months ended June 30, 2012 are not necessarily indicative of the results to be expected for the entire fiscal year.

ACACIA RESEARCH CORPORATION  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

**Revenue Recognition.** Revenue is recognized when (i) persuasive evidence of an arrangement exists, (ii) all obligations have been substantially performed pursuant to the terms of the arrangement, (iii) amounts are fixed or determinable, and (iv) the collectibility of amounts is reasonably assured.

In general, revenue arrangements provide for the payment of contractually determined fees in consideration for the grant of certain intellectual property rights for patented technologies owned or controlled by Acacia's operating subsidiaries. These rights typically include some combination of the following: (i) the grant of a non-exclusive, retroactive and future license to manufacture and/or sell products covered by patented technologies owned or controlled by Acacia's operating subsidiaries, (ii) a covenant-not-to-sue, (iii) the release of the licensee from certain claims, and (iv) the dismissal of any pending litigation. The intellectual property rights granted may be perpetual in nature, extending until the expiration of the related patents, or can be granted for a defined, relatively short period of time, with the licensee possessing the right to renew the agreement at the end of each contractual term for an additional minimum upfront payment. Pursuant to the terms of these agreements, Acacia's operating subsidiaries have no further obligation with respect to the grant of the non-exclusive retroactive and future licenses, covenants-not-to-sue, releases, and other deliverables, including no express or implied obligation on Acacia's operating subsidiaries' part to maintain or upgrade the technology, or provide future support or services. Generally, the agreements provide for the grant of the licenses, covenants-not-to-sue, releases, and other significant deliverables upon execution of the agreement, or upon receipt of the minimum upfront payment for term agreement renewals. As such, the earnings process is complete and revenue is recognized upon the execution of the agreement, when collectibility is reasonably assured, or upon receipt of the minimum upfront fee for term agreement renewals, and when all other revenue recognition criteria have been met.

**Cost of Revenues.** Cost of revenues include the costs and expenses incurred in connection with Acacia's patent licensing and enforcement activities, including inventor royalties paid to original patent owners, contingent legal fees paid to external patent counsel, other patent-related legal expenses paid to external patent counsel, licensing and enforcement related research, consulting and other expenses paid to third parties and the amortization of patent-related acquisition costs. These costs are included under the caption "Cost of revenues" in the accompanying consolidated statements of income.

**Inventor Royalties and Contingent Legal Expenses.** Inventor royalties are expensed in the consolidated statements of income in the period that the related revenues are recognized. In certain instances, pursuant to the terms of the underlying inventor agreements, costs paid by Acacia's operating subsidiaries to acquire patents are recoverable from future net revenues. Patent acquisition costs that are recoverable from future net revenues are amortized over the estimated economic useful life of the related patents, or as the prepaid royalties are earned by the inventor, as appropriate, and the related expense is included in amortization expense in the consolidated statements of income. Any unamortized patent acquisition costs recovered from net revenues are expensed in the period recovered, and included in amortization expense in the consolidated statements of income.

Contingent legal fees are expensed in the consolidated statements of income in the period that the related revenues are recognized. In instances where there are no recoveries from potential infringers, no contingent legal fees are paid; however, Acacia's operating subsidiaries may be liable for certain out of pocket legal costs incurred pursuant to the underlying legal services agreement. Legal fees advanced by contingent law firms that are required to be paid in the event that no license recoveries are obtained are expensed as incurred and included in liabilities in the consolidated balance sheets.

During the six months ended June 30, 2012 and 2011, Acacia entered into agreements with unrelated third parties resolving pending patent matters that resulted in the grant of certain intellectual property rights and recognition of revenues, a portion of which were not subject to inventor royalty and contingent legal fee arrangements, as well as the grant of certain intellectual property rights from certain of Acacia's operating subsidiaries and recognition of revenues that were subject to inventor royalties and contingent legal fee arrangements. Revenues recognized subject to inventor royalties and contingent legal fees are based on a determination by the respective operating subsidiaries.

Use of Estimates. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. Acacia believes that, of the significant accounting policies described herein, the accounting policies associated with revenue recognition, stock-based compensation expense, impairment of marketable securities, the determination of the economic useful life of amortizable intangible assets, income taxes and valuation allowances against net deferred tax assets and the application

ACACIA RESEARCH CORPORATION  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

of the acquisition method of accounting for business combinations, require its most difficult, subjective or complex judgments.

**Concentrations.** One licensee individually accounted for 72% of revenues recognized during the three months ended June 30, 2012, and four licensees individually accounted for 36%, 24%, 13%, and 12% of revenues recognized during the six months ended June 30, 2012. Three licensees individually accounted for 30%, 28% and 12% of revenues recognized during the three months ended June 30, 2011, and three licensees individually accounted for 45%, 12% and 11% of revenues recognized during the six months ended June 30, 2011. Two licensees individually represented approximately 65% and 23% of accounts receivable at June 30, 2012. Five other licensees individually represented approximately 18%, 15%, 14%, 13% and 10% of accounts receivable at December 31, 2011. For the three and six months ended June 30, 2012, 10% and 53%, respectively, of revenues were attributable to licensees domiciled in foreign jurisdictions. For the three and six months ended June 30, 2011, 20% and 54%, respectively, of revenues were attributable to licensees domiciled in foreign jurisdictions.

**Stock-Based Compensation.** The compensation cost for all stock-based awards is measured at the grant date, based on the fair value of the award, and is recognized as an expense, on a straight-line basis, over the employee's requisite service period (generally the vesting period of the equity award) which is generally two to four years. The fair value of restricted stock and restricted stock unit awards is determined by the product of the number of shares or units granted and the grant date market price of the underlying common stock. Stock-based compensation expense is recorded only for those awards expected to vest using an estimated forfeiture rate.

**Fair Value Measurements.** U.S. generally accepted accounting principles define fair value as the price that would be received for an asset or the exit price that would be paid to transfer a liability in the principal or most advantageous market in an orderly transaction between market participants on the measurement date, and also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs, where available. The three-level hierarchy of valuation techniques established to measure fair value is defined as follows:

- Level 1 - Observable Inputs: Quoted prices in active markets for identical investments;
- Level 2 - Pricing Models with Significant Observable Inputs: Other significant observable inputs, including quoted prices for similar investments, interest rates, credit risk, etc.; and
- Level 3 - Unobservable Inputs: Significant unobservable inputs, including the entity's own assumptions in determining the fair value of investments.

Whenever possible, the Company is required to use observable market inputs (Level 1 - quoted market prices) when measuring fair value.

**Investments in Marketable Securities.** Investments in securities with original maturities of greater than three months and less than one year and other investments representing amounts that are available for current operations are classified as short-term investments, unless there are indications that such investments may not be readily sold in the short term. The fair values of these investments approximate their carrying values. At June 30, 2012, all of Acacia's short term investments were classified as available-for-sale, which are reported at fair value on a recurring basis using significant observable inputs (Level 1), with related unrealized gains and losses in the value of such securities recorded as a separate component of comprehensive income (loss) in stockholders' equity until realized. Realized and unrealized gains and losses are recorded based on the specific identification method. Interest on all securities is included in interest income. At June 30, 2012, short term investments were comprised of equity investments in the common stock of certain technology companies and investments in highly liquid, AAA, U.S. government fixed income securities with maturity dates ranging from 2012 to 2013.

Edgar Filing: ACACIA RESEARCH CORP - Form 10-Q

The following table presents marketable securities' cost, gross unrealized gains, gross unrealized losses, and fair value by major security type recorded as short-term investments as of June 30, 2012 and December 31, 2011 (in thousands):

	June 30, 2012			
	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
U.S. government fixed income securities	\$ 124,957	\$22	\$(206)	) \$124,773
Equity securities of certain technology companies	6,410	1,489	(176)	) 7,723
Total short-term investments	\$ 131,367	\$ 1,511	\$(382)	) \$132,496

7

---

ACACIA RESEARCH CORPORATION  
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

	December 31, 2011			
	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
U.S. government fixed income securities	\$—	\$—	\$—	\$—
Equity securities of certain technology companies	8,427	169	(1,999)	) 6,597
Total short-term investments	\$8,427	\$169	\$(1,999)	) \$6,597

**Impairment of Marketable Securities.** Acacia evaluates its investments in marketable securities for potential impairment, employing a methodology on a quarterly basis that considers available quantitative and qualitative evidence. If the cost or carrying value of an investment exceeds its estimated fair value, the Company evaluates, among other factors, general market conditions, credit quality of instrument issuers, the duration and extent to which the fair value is less than cost, and the Company's intent and ability to hold, or plans or ability to sell. Fair value is estimated based on publicly available market information or other estimates determined by management. Investments are considered to be impaired when a decline in fair value is estimated to be other-than-temporary. Acacia reviews impairments associated with its investments in marketable securities and determines the classification of any impairment as temporary or other-than-temporary. An impairment is deemed other-than-temporary unless (a) Acacia has the ability and intent to hold an investment for a period of time sufficient for recovery of its carrying amount and (b) positive evidence indicating that the investment's carrying amount is recoverable within a reasonable period of time outweighs any evidence to the contrary. All available evidence, both positive and negative, is considered to determine whether, based on the weight of such evidence, the carrying amount of the investment is recoverable within a reasonable period of time. For investments classified as available-for-sale, unrealized losses that are other-than-temporary are recognized in the consolidated statements of income.

**Patents.** Patents includes the cost of patents or patent rights (hereinafter, collectively "patents"), acquired from third-parties or acquired in connection with business combinations. Patent acquisition costs are amortized utilizing the straight-line method over their remaining economic useful lives, ranging from one to ten years.

**Goodwill.** Goodwill is tested for impairment at the reporting unit level (operating segment or one level below an operating segment) on an annual basis (December 31 for Acacia) and between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying value. Acacia considers its market capitalization and the carrying value of its assets and liabilities, including goodwill, when performing its goodwill impairment test. When conducting its annual goodwill impairment assessment, the Company initially performs a qualitative evaluation of whether it is more likely than not that goodwill is impaired. If it is determined by a qualitative evaluation that it is more likely than not that goodwill is impaired, the Company then applies a two-step impairment test. The two-step impairment test first compares the fair value of the Company's reporting unit to its carrying or book value. If the fair value of the reporting unit exceeds its carrying value, goodwill is not impaired and the Company is not required to perform further testing. If the carrying value of the reporting unit exceeds its fair value, the Company determines the implied fair value of the reporting unit's goodwill and if the carrying value of the reporting unit's goodwill exceeds its implied fair value, then an impairment loss equal to the difference is recorded in the consolidated statement of income.

Acacia uses the management approach, which designates the internal organization that is used by management for making operating decisions and assessing performance as the basis of Acacia's reportable segments. Acacia's intellectual property licensing and enforcement business constitutes its single reportable segment.

**Income Taxes.** Income taxes are accounted for using an asset and liability approach that requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been recognized in Acacia's consolidated financial statements or consolidated tax returns. A valuation allowance is established to reduce deferred tax assets if all, or some portion, of such assets will more than likely not be realized.

The provision for income taxes for interim periods is determined using an estimate of Acacia's annual effective tax rate, adjusted for discrete items, if any, that are taken into account in the relevant period. Each quarter, Acacia updates the estimate of the annual effective tax rate, and if the estimated tax rate changes, a cumulative adjustment is made.

As of June 30, 2012, Acacia's estimated annual effective tax rate is approximately 38%, mainly comprised of U.S. federal and state incomes taxes, foreign withholding taxes and nondeductible permanent expenses. Acacia's effective tax rate

ACACIA RESEARCH CORPORATION  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

for the six months ended June 30, 2012 was 25%. The difference between the effective tax rate and the estimated annual effective tax rate is mainly due to the benefit associated with the release of valuation allowance in the first quarter of 2012 in connection with the acquisition of ADAPTIX, as described below.

Tax expense for the three and six months ended June 30, 2012 included foreign withholding taxes totaling \$28,000 and \$11,890,000, respectively, withheld by the applicable foreign tax authority on revenue agreements executed with third party licensees domiciled in certain foreign jurisdictions. The tax provision for the six months ended June 30, 2012 provides for the utilization (subject to certain limitations, if any) of the foreign taxes withheld as a credit against income tax expense calculated for financial statement purposes.

For the six months ended June 30, 2011, the provision for income taxes included foreign withholding taxes totaling \$7,425,000. Excluding the impact of foreign withholding taxes, the 2011 annual effective tax rate was estimated to be lower than the 35% U.S. federal statutory rate due primarily to the anticipated utilization of available net operating loss ("NOL") carryforwards to reduce U.S. taxable income.

Tax expense for the periods presented reflects the impact of the calculation of tax expense for financial reporting purposes without the excess tax benefit related to the exercise and vesting of equity-based incentive awards. Under U.S. generally accepted accounting principles, if a deduction reported on a tax return for an equity-based incentive award exceeds the cumulative compensation cost for such instruments recognized for financial reporting purposes, any resulting realized tax benefit that exceeds the previously calculated and recognized compensation expense for such instruments is considered an excess tax benefit, and is recognized as a credit to additional paid-in capital, not taxes payable. The deduction related to the exercise and vesting of equity-based incentive awards is available to offset taxable income, if any, on Acacia's future consolidated tax returns. Accordingly, the noncash tax expense calculated without the benefit related to the exercise and vesting of equity-based incentive awards totaling \$3,239,000 and \$10,850,000 for the three and six months ended June 30, 2012 was credited to additional paid-in capital, not taxes payable, and therefore does not reflect cash taxes payable. As of and for the six months ended June 30, 2012, taxes paid or payable totaled approximately \$12,400,000, primarily comprised of foreign withholding taxes, as described above, and other state related taxes payable.

At December 31, 2011, Acacia had U.S. federal and state income tax net operating losses ("NOLs") totaling approximately \$69,062,000 and \$61,493,000, expiring between 2020 and 2030, and 2015 and 2030, respectively. Utilization of NOLs and credit carryforwards can be subject to a substantial annual limitation due to ownership change limitations that may have occurred or that could occur in the future, as required by Section 382 of the Internal Revenue Code of 1986, as amended, as well as similar state provisions.

Release of Valuation Allowance. As of December 31, 2011, the Company maintained a full valuation allowance against its net deferred tax assets. The net deferred tax liability resulting from the acquisition of ADAPTIX created an additional source of income to utilize against Acacia's existing consolidated net deferred tax assets. Under the acquisition method of accounting, the impact on the acquiring company's deferred tax assets is recorded outside of acquisition accounting. In addition, the Company estimated that certain other deferred tax assets related to foreign tax credits and other state related deferrals, totaling approximately \$1,900,000, were more likely than not realizable in future periods. Accordingly, the valuation allowance on the majority of Acacia's net deferred tax assets was released, resulting in an income tax benefit of approximately \$10,237,000, recorded as a credit to income tax expense for the six months ended June 30, 2012. The offsetting amounts reduced net deferred tax liabilities, \$8.3 million of which reduced the net deferred tax liability established in connection with the application of the acquisition method of accounting for the ADAPTIX acquisition. Refer to Note 8 to these consolidated financial statements.

ACACIA RESEARCH CORPORATION  
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

### 3. EARNINGS PER SHARE

Earnings Per Share. Basic income per share is computed based upon the weighted-average number of common shares outstanding, excluding unvested restricted stock. Diluted income per share is computed based upon the weighted-average number of common shares outstanding, including the dilutive effect of common stock equivalents outstanding during the periods. Potentially dilutive common stock equivalents primarily consist of employee stock options, unvested restricted stock, and restricted stock units (“Equity-based Incentive Awards”).

Potentially dilutive common shares from Equity-based Incentive Awards are determined by applying the treasury stock method to the assumed exercise of outstanding employee stock options, and the assumed vesting of outstanding unvested restricted stock and restricted stock units. The following table presents the weighted-average number of common shares outstanding used in the calculation of basic and diluted income per share:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
Weighted-average common shares outstanding - basic	47,944,193	40,994,082	46,155,846	38,104,500
Dilutive effect of Equity-based Incentive Awards	994,573	1,459,700	1,052,259	1,373,116
Weighted-average common shares outstanding - diluted	48,938,766	42,453,782	47,208,105	39,477,616
Anti-dilutive Equity-based Incentive Awards excluded from the computation of diluted income per share	54,260	37,760	34,260	69,960

### 4. GOODWILL AND OTHER IDENTIFIABLE INTANGIBLE ASSETS

Acacia’s only identifiable intangible assets at June 30, 2012 and December 31, 2011 are patents and patent rights. Patent-related accumulated amortization totaled \$46,850,000 and \$36,331,000 as of June 30, 2012 and December 31, 2011, respectively.

Acacia’s patents and patent rights have remaining estimated economic useful lives ranging from one to ten years. The weighted-average remaining estimated economic useful life of Acacia’s patents and patent rights is approximately eight years. The following table presents the scheduled annual aggregate amortization expense as of June 30, 2012 (in thousands):

Remainder of 2012	\$ 13,934
2013	27,589
2014	27,336
2015	26,874
2016	25,761
Thereafter	92,710
Total	\$ 214,204

For the six months ended June 30, 2012 and 2011, Acacia paid patent and patent rights acquisition costs totaling \$40,435,000 (excluding the acquisition of ADAPTIX) and \$1,805,000, respectively. The patents and patent rights acquired have estimated economic useful lives of approximately one to seven years. Included in net additions to

capitalized patent costs during the three months ended June 30, 2011 are accrued future patent acquisition costs totaling \$1,000,000, which were incurred pursuant to the terms of the underlying patent acquisition agreements. Accrued future patent acquisition costs are amortized over the estimated economic useful life of the related patents acquired.

Refer to Note 8 to these consolidated financial statements for additions to patents and goodwill in connection with Acacia's acquisition of ADAPTIX and the related application of the acquisition method of accounting.

During the six months ended June 30, 2012 and 2011, certain operating subsidiaries recovered up-front patent portfolio acquisition costs from applicable net licensing proceeds prior to scheduled amortization of such up-front patent portfolio acquisition costs, resulting in the acceleration of amortization expense for the applicable patent related assets. Accelerated amortization expense related to the recovery of up-front patent acquisition costs totaled \$0 and \$442,000 for the

ACACIA RESEARCH CORPORATION  
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

three and six months ended June 30, 2012, respectively, and \$1,063,000 and \$3,446,000 for the three and six months ended June 30, 2011, respectively.

## 5. COMMITMENTS AND CONTINGENCIES

### Patent Enforcement and Other Litigation

Acacia is subject to claims, counterclaims and legal actions that arise in the ordinary course of business. Management believes that the ultimate liability with respect to these claims and legal actions, if any, will not have a material effect on Acacia's consolidated financial position, results of operations or cash flows. Certain of Acacia's operating subsidiaries are often required to engage in litigation to enforce their patents and patent rights. In connection with any of Acacia's operating subsidiaries' patent enforcement actions, it is possible that a defendant may request and/or a court may rule that an operating subsidiary has violated statutory authority, regulatory authority, federal rules, local court rules, or governing standards relating to the substantive or procedural aspects of such enforcement actions. In such event, a court may issue monetary sanctions against Acacia or its operating subsidiaries or award attorney's fees and/or expenses to a defendant(s), which could be material.

## 6. FAIR VALUE MEASUREMENTS AND AUCTION RATE SECURITIES

As of June 30, 2012 and December 31, 2011, Acacia held investment grade auction rate securities with a par value totaling \$1,975,000 and \$2,425,000, respectively, consisting of auction rate investments backed by student loans, issued under programs such as the Federal Family Education Loan Program, which are classified as available-for-sale and reflected at fair value. Auction rate securities are classified as noncurrent for the periods presented. Contractual maturity dates range up to 35 years, with reset dates every 7 days to 63 days. The fair values of these securities are estimated utilizing an analysis of certain unobservable inputs (Level 3) and by reference to a discounted cash flow analysis as of June 30, 2012. These analyses considered, among other items, the underlying structure of each security, the collateral underlying the security investments, the creditworthiness of the counterparty, the present value of future principal and contractual interest payments discounted at rates considered to be reflective of current market conditions, consideration of the probabilities of default, continued auction failure, or repurchase or redemption at par for each period, and estimates of the time period over which current liquidity related issues will be resolved. Observable market data for instruments with similar characteristics to Acacia's auction rate securities was also considered, when possible.

As of June 30, 2012 and December 31, 2011, the net other-than-temporary loss on auction rate securities collateralized by student loan portfolios totaled \$469,000. The following table presents the auction rate securities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the interim periods presented (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
Balance as of April 1 and January 1, respectively	\$ 1,956	\$ 1,975	\$ 1,956	\$ 2,001
Total gains (realized or unrealized):				
Recognized gains included in earnings <sup>(1)</sup>	—	—	—	9
Settlements	(450	) —	(450	) (35

Balance as of June 30	\$1,506	\$1,975	\$1,506	\$1,975
(1) Total realized gains on redemptions or partial redemptions at par of auction rate securities for the periods presented.				

## 7. STOCKHOLDERS' EQUITY

In February 2012, Acacia raised gross proceeds of \$225,000,000 through the sale of 6,122,000 shares of Acacia's common stock at a price of \$36.75 per share in a private placement offering with certain institutional accredited investors. Net proceeds, net of placement agent fees and estimated offering expenses, totaled approximately \$218,983,000. Acacia intends to use the net proceeds of this private placement to finance pending and future acquisitions of patents and patent royalties and other patent licensing vehicles and companies with patent assets, and for working capital and general corporate purposes.

In March 2011, Acacia completed a registered public offering of 5,750,000 shares of common stock. The public

ACACIA RESEARCH CORPORATION  
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

offering price was \$31.50 per share, and the net proceeds to the Company totaled approximately \$175,232,000, after deducting underwriting discounts and related offering expenses. Acacia retained broad discretion over the use of the net proceeds from this sale of common stock, including the use of the net proceeds for operations and for other general corporate purposes, including, but not limited to, working capital, strategic acquisitions and other transactions.

## 8. ACQUISITION

On January 12, 2012 (the “Acquisition Date”), pursuant to the terms and conditions of the Agreement and Plan of Merger dated as of November 22, 2011 (the “Merger Agreement”) among Acacia Research Group LLC (“ARG”), a wholly-owned subsidiary of Acacia, Apollo Patent Corp., a newly-formed, wholly-owned subsidiary of ARG (“Merger Sub”), ADAPTIX, a Delaware corporation, and Baker Communications Fund II (QP), L.P. solely in its capacity as shareholder representative, ARG completed its acquisition of ADAPTIX, which held no material assets other than its portfolio of patents and \$10 million in cash, through a merger of Merger Sub with and into ADAPTIX, with ADAPTIX as the surviving corporation (the “Merger”). Upon completion of the Merger, the separate corporate existence of Merger Sub ceased and ADAPTIX became a wholly-owned subsidiary of ARG.

ADAPTIX, a pioneer in the development of 4G technologies for wireless systems, is an award-winning technology company long recognized in the industry as one of the first developers of cutting edge 4G wireless systems. With patents filed as early as 2000, ADAPTIX’s research and development efforts have resulted in one of the world’s most significant intellectual property portfolios focused on 4G technologies. With its rapidly growing portfolio of 230 issued and pending patents in 13 countries, ADAPTIX’s innovations extend across a broad range of 4G technologies including OFDMA and MIMO.

The Merger is being accounted for in accordance with the acquisition method of accounting under Financial Accounting Standards Board (“FASB”) ASC Topic 805, “Business Combinations” (“Topic 805”). Topic 805 requires, among other things, that identifiable assets acquired and liabilities assumed be recognized at their fair values as of the Acquisition Date. Under the acquisition method of accounting, the purchase consideration is allocated to the assets acquired, including tangible assets, patents and other identifiable intangible assets and liabilities assumed, based on their estimated fair market values on the date of acquisition. Any excess purchase price after the initial allocation to identifiable net tangible and identifiable intangible assets is assigned to goodwill. Amounts attributable to patents are amortized using the straight-line method over the estimated economic useful life of the underlying patents.

The total consideration paid by ARG in connection with the Merger was approximately \$160 million, paid in cash. Based on the total purchase consideration and the estimate of the assets acquired and the liabilities assumed by ARG as of the Acquisition Date, the purchase price allocation was as follows (\$ amounts in thousands):

		Amortization Period	Annual Amortization
Assets Acquired and Liabilities Assumed:			
Fair value of net tangible assets acquired	\$ 10,000		
Intangible assets acquired - patents	150,000	10 years	\$ 15,000
Goodwill	36,202		
Net deferred income tax liability	(36,202 )		
Total	\$ 160,000		

Amounts attributable to the patents acquired are being amortized using the straight-line method over an estimated weighted average economic useful life of the underlying patents, which is estimated to be approximately ten years. Goodwill is calculated as the residual after recording the identifiable net assets acquired and associated net deferred tax assets and liabilities.

Management is primarily responsible for determining the fair value of the tangible and identifiable intangible assets acquired and liabilities assumed as of the Acquisition Date. Management considered a number of factors, including reference to a preliminary independent analysis of estimated fair values solely for the purpose of allocating the purchase price to the assets acquired and liabilities assumed. The analysis included a preliminary discounted cash flow analysis which estimated the future net cash flows expected to result from the licensing and enforcement of the patent portfolio as of the date of acquisition, considering assumptions and estimates related to potential infringers of the patents, applicable industries, usage of the

underlying patented technologies, estimated license fee revenues, contingent legal fee arrangements, other estimated costs, tax implications and other factors. A discount rate consistent with the risks associated with achieving the estimated net cash flows was used to estimate the present value of future estimated net cash flows. The Company is in the process of finalizing the estimates and assumptions developed in connection with the independent analysis of estimated fair values solely for the purpose of allocating the purchase price to the assets acquired and liabilities assumed. Any adjustments to the fair values of intangibles assets acquired, or estimates of economic useful lives of the intangible assets acquired, could impact the carrying value of those assets and related goodwill, as well as the estimates of periodic amortization of intangible assets acquired to be reflected in the statement of operations. In addition, the Company is in the process of finalizing its estimate and analysis of the fair values of certain tax attributes acquired. Any adjustments to the preliminary estimates of tax attributes acquired will increase or decrease the estimated net deferred tax liability recorded in connection with the acquisition method of accounting, with an offsetting adjustment to goodwill.

The Merger is being treated for tax purposes as a nontaxable transaction and as such, the historical tax bases of the acquired assets and assumed liabilities, net operating losses, and other tax attributes of ADAPTIX will carryover. As a result, no new tax goodwill will be created in connection with the Merger as there is no step-up to fair value of the underlying tax bases of the acquired net assets. Acquisition accounting includes the establishment of a net deferred tax asset or liability resulting from book tax basis differences related to assets acquired and liabilities assumed on the date of acquisition. Acquisition date deferred tax assets primarily relate to certain net operating loss carryforwards of ADAPTIX. Acquisition date deferred tax liabilities relate to specifically identified non-goodwill intangibles acquired. The estimated net deferred tax liability was determined as follows (\$ amounts in thousands):

	Book Basis	Tax Basis	Difference
Intangible assets acquired - patents	\$150,000	\$—	\$(150,000 )
Estimated net operating loss carryforwards - ADAPTIX	—	46,565	46,565
Net deferred tax liability - pretax			(103,435 )
Estimated tax rate			35 %
Estimated net deferred tax liability			\$(36,202 )

The following unaudited pro forma combined results of operations for the interim period presented are provided for illustrative purposes only and assume the acquisition occurred as of January 1, 2011. The unaudited pro forma combined financial results do not purport to be indicative of the results of operations for future periods or the results that actually would have been realized had the entities been a single entity during these periods. The unaudited pro forma combined results are presented in thousands, except share and per share information.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
Revenues	\$50,484	\$39,746	\$149,524	\$100,876

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
Pro forma income (loss) per common share attributable to Acacia Research Corporation:				
Basic earnings (loss) per share	\$0.13	\$(0.05)	) \$1.20	\$0.15
Diluted earnings (loss) per share	\$0.13	\$(0.05)	) \$1.18	\$0.14
Weighted average number of shares outstanding, basic	47,944,193	40,994,082	46,155,846	38,104,500
Weighted average number of shares outstanding, diluted	48,938,766	42,453,782	47,208,105	39,477,616

Pro forma adjustments primarily relate to the amortization of identifiable intangible assets acquired over an estimated economic useful life of ten years, historical operating expenses of ADAPTIX for the three and six months ended June 30, 2011, and the expensing of acquisition costs incurred by ARG in connection with the Merger.

The unaudited pro forma combined statements of operations for the periods presented herein have been adjusted to give effect to pro forma events that are expected to have a continuing impact on the combined results. As such, the income tax benefit related to the release of valuation allowance reflected in the statement of income for the six months ended June 30, 2012, as described at Note 2, is not reflected in the accompanying unaudited pro forma combined statements of income for the periods presented.

## 9. RECENT ACCOUNTING PRONOUNCEMENTS

Recently Adopted Accounting Pronouncements - Adopted Effective January 1, 2012. In September 2011, the FASB issued guidance on testing goodwill for impairment. The new guidance provides an entity the option to first perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If an entity determines that this is the case, it is required to perform the currently prescribed two-step goodwill impairment test to identify potential goodwill impairment and measure the amount of goodwill impairment loss to be recognized for that reporting unit (if any). If an entity determines that the fair value of a reporting unit is greater than its carrying amount, the two-step goodwill impairment test is not required. The adoption of this accounting guidance did not have a material impact on the Company's consolidated financial statements and related disclosures.

In June 2011, the FASB issued new guidance on the presentation of comprehensive income. The new guidance allows an entity to present components of net income and other comprehensive income in one continuous statement, referred to as the statement of comprehensive income, or in two separate, but consecutive statements. The new guidance eliminates the current option to report other comprehensive income and its components in the statement of changes in stockholders' equity. While the new guidance changes the presentation of comprehensive income, there are no changes to the components that are recognized in net income or other comprehensive income from that of current accounting guidance. This new guidance is effective for fiscal years and interim periods beginning after December 15, 2011. In December 2011, the FASB issued an amendment to defer the presentation on the face of the financial statements the effects of reclassifications out of accumulated other comprehensive income on the components of net income and other comprehensive income for annual and interim financial statements. The adoption of this accounting guidance did not have a material impact on the Company's consolidated financial statements and related disclosures.

In May 2011, the FASB issued a new accounting standard on fair value measurements that clarifies the application of existing guidance and disclosure requirements, changes certain fair value measurement principles and requires

additional disclosures about fair value measurements. The standard is effective for interim and annual periods beginning after December 15, 2011. The adoption of this accounting guidance did not have a material impact on the Company's consolidated financial statements and related disclosures.

ACACIA RESEARCH CORPORATION  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Recent Accounting Guidance Not Yet Adopted. In December 2011, the FASB issued guidance enhancing disclosure requirements about the nature of an entity's right to offset and related arrangements associated with its financial instruments and derivative instruments. The new guidance requires the disclosure of the gross amounts subject to rights of set-off, amounts offset in accordance with the accounting standards followed, and the related net exposure. The new guidance will be effective for the Company beginning January 1, 2013. The Company does not expect the adoption of this accounting guidance to have a material impact on its consolidated financial statements and related disclosures.

## Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### Cautionary Statement

You should read the following discussion and analysis in conjunction with the consolidated financial statements and related notes thereto contained in Part I, Item 1 of this Quarterly Report on Form 10-Q. The information contained in this Quarterly Report on Form 10-Q is not a complete description of our business or the risks associated with an investment in our common stock. We urge you to carefully review and consider the various disclosures made by us in this report and in our other reports filed with the Securities and Exchange Commission, or the SEC, including our Annual Report on Form 10-K for the year ended December 31, 2011, filed with the SEC on February 29, 2012, as amended on March 28, 2012.

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 and concern matters that involve risks and uncertainties that could cause actual results to differ materially from those projected in the forward-looking statements. Reference is made in particular to the description of our plans and objectives for future operations, assumptions underlying such plans and objectives, and other forward-looking statements set forth under "Management's Discussion and Analysis of Financial Condition and Results of Operations" and other sections of this Quarterly Report on Form 10-Q. Such statements may be identified by the use of forward-looking terminology such as "may," "will," "should," "could," "expect," "plan," "believe," "estimate," "anticipate," "intend," "predict," "potential," "continue," or similar terms, variations of such terms or the negative of such terms, although not all forward-looking statements contain these terms. Such statements are based on management's current expectations and are subject to a number of factors and uncertainties, which could cause actual results to differ materially from those described in the forward-looking statements. Such statements address future events and conditions concerning intellectual property acquisition and development, licensing and enforcement activities, capital expenditures, earnings, litigation, regulatory matters, markets for our services, liquidity and capital resources and accounting matters. Actual results in each case could differ materially from those anticipated in such statements by reason of factors such as future economic conditions, changes in demand for our services, legislative, regulatory and competitive developments in markets in which we and our subsidiaries operate, results of litigation and other circumstances affecting anticipated revenues and costs. We expressly disclaim any intent, obligation or undertaking to update or revise any forward-looking statements contained herein to conform such statements to actual results or to reflect any change in our expectations with regard thereto or any change in events, conditions or circumstances on which any such statement is based. Readers are urged to carefully review and consider the various disclosures made by us, which attempt to advise interested parties of the risks, uncertainties, and other factors that affect our business, including without limitation the disclosures made under the captions "Management's Discussion and Analysis of Financial Condition and Results of Operations" and "Financial Statements" in this Quarterly Report on Form 10-Q and the audited consolidated financial statements and notes thereto and disclosures made under the captions "Management's Discussion and Analysis of Financial Condition and Results of Operations," "Risk Factors" and "Financial Statements and Supplementary Data" included in our Annual Report on Form 10-K for the year ended December 31, 2011.

### General

As used in this Quarterly Report on Form 10-Q, "we," "us" and "our" refer to Acacia Research Corporation, a Delaware corporation, and/or its wholly and majority-owned and controlled operating subsidiaries. All intellectual property acquisition, development, licensing and enforcement activities are conducted solely by certain of Acacia Research Corporation's wholly and majority-owned and controlled operating subsidiaries.

Our operating subsidiaries acquire, develop, license and otherwise enforce patented technologies. Our operating subsidiaries generate revenues and related cash flows from the granting of intellectual property rights for the use of, or

pertaining to, patented technologies that our operating subsidiaries own or control. Our operating subsidiaries assist patent owners with the prosecution and development of their patent portfolios, the protection of their patented inventions from unauthorized use, the generation of revenue from users of their patented technologies and, if necessary, with the enforcement against unauthorized users of their patented technologies.

We are a leader in licensing patented technologies and have established a proven track record of licensing success with over 1,165 license agreements executed to date across 125 of our technology licensing and enforcement programs. Currently, on a consolidated basis, our operating subsidiaries own or control the rights to over 238 patent portfolios, which include U.S. patents, and certain foreign counterparts covering technologies used in a wide variety of industries.

We were originally incorporated in California in January 1993 and reincorporated in Delaware in December 1999.

## Executive Overview

Our operating activities for the periods presented were principally focused on the continued development, licensing and enforcement of the patent portfolios owned or controlled by our operating subsidiaries, including the continued pursuit of our ongoing technology licensing and enforcement programs and the commencement of new technology licensing and enforcement programs. In addition, we continued our focus on business development, including the acquisition of several additional patent portfolios by certain of our operating subsidiaries and the continued pursuit of additional opportunities to acquire patent portfolios or partner with patent owners and continue our unique intellectual property licensing, development and enforcement activities.

Acquisition. In January 2012, we acquired ADAPTIX, Inc., or ADAPTIX, a pioneer in the development of 4G technologies for wireless systems, for \$150 million, net of cash acquired, as described below and at Note 8 to the consolidated financial statements elsewhere herein.

Operating activities during the periods presented included the following:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
Revenues (in thousands)	\$50,484	\$39,746	\$149,524	\$100,876
New agreements executed	38	29	78	64
Licensing and enforcement programs generating revenues	27	24	45	43
Licensing and enforcement programs with initial revenues	7	5	13	13
New patent portfolios	27	9	32	17
Cumulative number of licensing and enforcement programs generating revenues - inception to date	125	104	125	104

Our revenues historically have fluctuated quarterly, and can vary significantly, based on a number of factors including the following:

- the dollar amount of agreements executed each period which can be driven by the nature and characteristics of the technology or technologies being licensed and the magnitude of infringement associated with a specific licensee,
- the specific terms and conditions of agreements executed each period including the nature and characteristics of rights granted, and the periods of infringement or term of use contemplated by the respective payments,
- fluctuations in the total number of agreements executed each period,
- the timing, results and uncertainties associated with patent filings and other enforcement proceedings relating to our intellectual property rights,
- the relative maturity of licensing programs during the applicable periods, and
- other external factors.

Although revenues from one or more of our patents or patent portfolios may be significant in a specific reporting period, we believe that none of our individual patents or patent portfolios is individually significant to our licensing and enforcement business as a whole.

We measure and assess the performance and growth of the patent licensing and enforcement businesses conducted by our operating subsidiaries based on consolidated revenues and other operating income recognized across all of our technology licensing and enforcement programs on a trailing twelve-month basis. Trailing twelve-month revenues were as follows (in thousands):

As of Date:	Trailing Twelve -Month Revenues	% Change	
June 30, 2012	\$233,355	5	%
March 31, 2012	222,617	21	%
December 31, 2011	184,707	4	%
September 30, 2011	177,014	(1	)%
June 30, 2011	177,927	—	%

Revenues for the six months ended June 30, 2012 included fees from the following technology licensing and enforcement programs:

- 4G Wireless technology<sup>(1)</sup>
- Audio Communications Fraud Detection technology
- Camera Support technology
- Consumer Rewards technology<sup>(1)</sup>
- Data Compression technology

#### Summary of Results of Operations - Overview

For the Three and Six Months Ended June 30, 2012 and 2011

(In thousands, except percentage change values)

	Three Months Ended June 30,		%	Six Months Ended June 30,		%	
	2012	2011	Change	2012	2011	Change	
Revenues	\$50,484	\$39,746	27	% \$149,524	\$100,876	48	%
Operating costs and expenses	40,711	37,625	8	% 75,407	78,080	(3	)%
Operating income	9,773	2,121	*	74,117	22,796	225	%
Provision for income taxes	(3,494	) (306	) *	(18,241	) (7,454	) 145	%
Net income attributable to Acacia Research Corporation	6,321	2,139	196%	56,249	14,492	288	%

\* Percentage change in excess of 300%

Overview - Three months ended June 30, 2012 compared with the three months ended June 30, 2011

Revenues increased \$10.7 million, or 27%, to \$50.5 million, as compared to \$39.7 million in the comparable prior year quarter.

Cost of Revenues and Other Operating Expenses:

Inventor royalties and contingent legal fees, on a combined basis, decreased \$5.4 million, or 25%, as compared to the 27% increase in related revenues for the same periods due primarily to a greater percentage of revenues generated during the three months ended June 30, 2012 having no inventor royalty or contingent legal fee arrangement obligations, as compared to the revenues generated during the three months ended June 30, 2011.

Litigation and licensing expenses-patents increased \$1.5 million, or 40%, to \$5.3 million, due primarily to higher net levels of litigation support, third-party technical consulting and professional expert expenses associated with our investment in new licensing and enforcement programs commenced since June 2011.

Amortization of patents increased \$2.8 million, or 107%, to \$5.4 million, due primarily to amortization expense related to new patent portfolios acquired since June 30, 2011, totaling \$4.3 million. The increase was partially offset by a \$1.1 million decrease in accelerated patent amortization related to recoupable up-front patent portfolio acquisition costs recovered during the three months ended June 30, 2012, as compared to the three months ended June 30, 2011.

Marketing, general and administrative expenses increased \$3.6 million, or 43%, to \$11.9 million, due primarily to an increase in non-cash stock compensation charges resulting from an increase in the average grant date fair value of restricted shares expensed during the three months ended June 30, 2012, a net increase in licensing, business development, and engineering personnel since June 2011, and an increase in variable performance-based compensation costs.

Research, consulting and other expenses-business development increased \$632,000, or 47%, to \$2.0 million, due primarily to a net increase in third-party research, consulting and other due diligence related costs incurred in connection with the identification, review, and assessment of patent portfolio acquisition opportunities during the three months ended June 30, 2012.

Provision for income taxes increased \$3.2 million, or +100%, to \$3.5 million, reflecting the calculation of tax expense for financial reporting purposes without the excess tax benefits related to the exercise and vesting of equity-based incentive awards. Non-cash tax expense of \$3.2 million was credited to additional-paid-in-capital, not taxes payable. Refer to "Comparison of Results of Operations" below for additional information.

Overview - Six months ended June 30, 2012 compared with the six months ended June 30, 2011

Revenues increased \$48.6 million, or 48%, to \$149.5 million, as compared to \$100.9 million in the comparable prior year period.

Cost of Revenues and Other Operating Expenses:

Inventor royalties and contingent legal fees, on a combined basis, decreased \$16.6 million, or 38%, as compared to the 48% increase in related revenues for the same periods due primarily to a greater percentage of revenues generated during the six months ended June 30, 2012 having no inventor royalty or contingent legal fee arrangement obligations, as compared to the revenues generated during the six months ended June 30, 2011.

Litigation and licensing expenses-patents increased \$1.4 million, or 19%, to \$8.6 million, due primarily to higher net levels of litigation support, third-party technical consulting and professional expert expenses associated with our investment in new licensing and enforcement programs commenced since June 2011.

Amortization increased \$4.1 million, or 65%, to \$10.5 million, due primarily to amortization expense related to new patent portfolios acquired since June 30, 2011, totaling \$7.8 million. The increase was partially offset by a \$3.0 million decrease in accelerated patent amortization related to recoupable up-front patent portfolio

acquisition costs recovered during the six months ended June 30, 2012, as compared to the six months ended June 30, 2011.

Marketing, general and administrative expenses increased \$7.3 million, or 40%, to \$25.6 million, due primarily to an increase in non-cash stock compensation charges resulting from an increase in the average grant date fair value of restricted shares expensed during the six months ended June 30, 2012, a net increase in licensing, business development, and engineering personnel since June 2011, an increase in variable performance-based compensation costs and a net increase in corporate general and administrative costs.

Research, consulting and other expenses-business development increased \$1.0 million, or 51%, to \$3.1 million, due primarily to a net increase in third-party research, consulting and other due diligence related costs incurred in connection with the identification, review, and assessment of patent portfolio acquisition opportunities during the six months ended June 30, 2012.

Provision for income taxes increased \$10.8 million, or 145%, to \$18.2 million. Tax expense for financial reporting purposes for the periods presented was calculated without the excess tax benefits related to the exercise and vesting of equity-based incentive awards. Accordingly, \$10.9 million of non-cash tax expense was credited to additional-paid-in-capital, not taxes payable. Our effective tax rate for the six months ended June 30, 2012 was 25%, reflecting the impact of the income tax benefit associated with the release of valuation allowance primarily resulting from the ADAPTIX acquisition, as described at Note 2 to the Consolidated Financial Statements elsewhere herein. As of June 30, 2012, taxes paid or payable totaled approximately \$12.4 million, primarily comprised of foreign withholding taxes withheld of \$11.9 million, and other state related taxes payable. Refer to "Comparison of Results of Operations" below for additional information.

#### Acquisition of ADAPTIX, Inc.

On January 12, 2012, pursuant to the terms and conditions of the Agreement and Plan of Merger dated as of November 22, 2011 among Acacia Research Group LLC, or ARG, a wholly-owned subsidiary of Acacia Research Corporation, Apollo Patent Corp., a newly-formed, wholly-owned subsidiary of ARG, or Merger Sub, ADAPTIX and Baker Communications Fund II (QP), L.P. solely in its capacity as shareholder representative, ARG completed its acquisition of ADAPTIX, which held no material assets other than its portfolio of patents and \$10 million in cash, through a merger of Merger Sub with and into ADAPTIX, with ADAPTIX as the surviving corporation. Upon completion of the merger, the separate corporate existence of Merger Sub ceased and ADAPTIX became a wholly-owned subsidiary of ARG. The total consideration paid by ARG in connection with the merger was approximately \$160 million, paid in cash.

ADAPTIX, a pioneer in the development of 4G technologies for wireless systems, is an award-winning technology company long recognized in the industry as one of the first developers of cutting edge 4G wireless systems. With patents filed as early as 2000, ADAPTIX's research and development efforts have resulted in one of the world's most significant intellectual property portfolios focused on 4G technologies. With its rapidly growing portfolio of 230 issued and pending patents in 13 countries, ADAPTIX's innovations extend across a broad range of 4G technologies including OFDMA and MIMO.

#### Investments in Patent Portfolios

We also measure and assess the performance and growth of the patent licensing and enforcement businesses conducted by our operating subsidiaries based on the number of patent portfolios owned or controlled by our operating subsidiaries on a consolidated basis. As of June 30, 2012, December 31, 2011, and June 30, 2011, on a consolidated basis, our operating subsidiaries owned or controlled the rights to approximately 238, 200 and 184 patent

portfolios, respectively, which include U.S. patents and certain foreign counterparts, covering technologies used in a wide variety of industries.

During the six months ended June 30, 2012, certain of our operating subsidiaries continued to execute their business strategy in the area of patent portfolio acquisitions, including the acquisition of, or the acquisition of the rights to, 32 patent portfolios (of which 27 patent portfolios were acquired during the three months ended June 30, 2012) covering a variety of applications, including the following:

• In April 2012, we entered into a patent licensing alliance with TeleCommunication Systems, Inc. (TCS) to become the exclusive licensor of TCS' inter-carrier messaging (ICM) patent portfolio.

• In May 2012, we acquired patents, originally issued to Polaroid, covering digital imaging and related technologies.

• In May 2012, we acquired rights to 6 prominent patent portfolios comprising 68 patents covering a wide range of software technologies relating to business intelligence and data analysis, office productivity, virtualization,

graphical user interfaces, search, and software development.

In June 2012, we acquired 7 medtech patent portfolios comprised of over 150 patents and pending applications relating to medical devices, biologics and diagnostic techniques.

In June 2012, we acquired patents for x-ray powder diffraction technology.

In June 2012, we acquired 5 patent portfolios with 156 U.S. and international patents from a major semiconductor technology company.

In June 2012, we acquired patents relating to computer aided design tools.

In June 2012, we acquired 4 patent portfolios with 48 U.S. and international patents from a major technology company.

Refer to “Liquidity and Capital Resources” below for information regarding the impact of patent and patent rights acquisitions on the consolidated financial statements for the periods presented.

As of June 30, 2012, certain of our operating subsidiaries had several option agreements with third-party patent portfolio owners regarding the potential acquisition of additional patent portfolios. Future patent portfolio acquisitions will continue to expand and diversify our future revenue generating opportunities.

#### Other

In February 2012, we raised net proceeds of \$219.0 million through the sale of 6,122,000 shares of our common stock at a price of \$36.75 per share in a private placement offering with certain institutional accredited investors. In March 2011, we completed a registered public offering of 5,750,000 shares of our common stock. The public offering price was \$31.50 per share, and the net proceeds to the Company totaled approximately \$175.2 million, after deducting underwriting discounts and related offering expenses. Refer to “Liquidity and Capital Resources” below for more information regarding these offerings.

#### Enforcement Considerations

The pursuit of enforcement actions in connection with our licensing and enforcement programs can involve certain risks and uncertainties, including the following:

Increases in patent-related legal expenses, including, but not limited to, increases in costs billed by outside legal counsel for discovery, depositions, economic analyses, damages assessments, expert witnesses and other consultants, case-related audio/video presentations and other litigation support and administrative costs, could increase our operating costs and decrease our revenue generating opportunities;

Our patented technologies and enforcement actions are complex, and, as a result, we may be required to appeal adverse decisions by trial courts in order to successfully enforce our patents;

New legislation, regulations or rules related to enforcement actions could significantly increase our operating costs and decrease our revenue generating opportunities; and

Courts may rule that our subsidiaries have violated certain statutory, regulatory, federal, local or governing rules or standards by pursuing such enforcement actions, which may expose us and our operating subsidiaries to material liabilities, which could harm our operating results and our financial position.

#### Critical Accounting Estimates

Our unaudited interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. Preparation of these consolidated statements requires management to make judgments and estimates. Some accounting policies have a significant impact on amounts reported in these consolidated financial statements. A summary of significant accounting policies and a description of accounting policies that are considered critical may be found in the audited consolidated financial statements and notes thereto and under the caption "Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies" included in our Annual Report on Form 10-K for the year ended December 31, 2011. In addition to the information below, refer to Note 2 to the consolidated financial statements included in this report.

Accounting for Business Combinations - Acquisition Method of Accounting

22

---

Acquisitions are accounted for in accordance with the acquisition method of accounting under FASB ASC Topic 805, "Business Combinations," or Topic 805. Topic 805 requires, among other things, that identifiable assets acquired and liabilities assumed be recognized at their fair values as of the acquisition date. Under the acquisition method of accounting, the purchase consideration is allocated to the assets acquired, including tangible assets, patents and other identifiable intangible assets and liabilities assumed, based on their estimated fair market values on the date of acquisition. Any excess purchase price after the initial allocation to identifiable net tangible and identifiable intangible assets is assigned to goodwill. Amounts attributable to patents are amortized using the straight-line method over the estimated economic useful life of the underlying patents. Acquisition accounting includes the establishment of a net deferred tax asset or liability resulting from book tax basis differences related to assets acquired and liabilities assumed on the date of acquisition.

We assess fair value for financial statement purposes using a variety of methods, including the use of present value models and independent appraisers. Amounts recorded as intangible assets, including patents and patent rights, are based on assumptions and estimates regarding the amount and timing of projected revenues and costs associated with the licensing and enforcement of patents and patent rights acquired, appropriate risk-adjusted discount rates, rates of technology adoption, market penetration, technological obsolescence, product launch timing, the impact of competition or lack of competition in the market place, tax implications and other factors. Also, upon acquisition, based on several of the estimates and assumptions previously described, we determine the estimated economic useful lives of the acquired intangible assets for amortization purposes.

Management is primarily responsible for determining the fair value of the tangible and identifiable intangible assets acquired and liabilities assumed as of the acquisition date. Fair value measurements can be highly subjective, and it is possible that other professionals, applying reasonable judgment to the same facts and circumstances, could develop and support a range of alternative estimated amounts. Actual results may vary from projected results.

### Consolidated Results of Operations

#### Comparison of the Results of Operations for the Three and Six Months Ended June 30, 2012 and 2011

##### Revenues

	Three Months Ended June 30,				Six Months Ended June 30,			
	2012	2011	\$ Change	% Change	2012	2011	\$ Change	% Change
Revenues	\$50,484	\$39,746	\$10,738	27 %	\$149,524	\$100,876	\$48,648	48 %

(in thousands, except percentages)

Revenues. In general, revenue arrangements provide for the payment of contractually determined fees in consideration for the grant of certain intellectual property rights for patented technologies owned or controlled by our operating subsidiaries. These rights typically include some combination of the following: (i) the grant of a non-exclusive, retroactive and future license to manufacture and/or sell products covered by patented technologies owned or controlled by our operating subsidiaries, (ii) covenants-not-to-sue, (iii) the release of the licensee from certain claims, and (iv) the dismissal of any pending litigation.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
New agreements executed	38	29	78	64
Average revenue per agreement (in thousands)	\$1,329	\$1,371	1,917	\$1,576

A summary of the main drivers of the change in revenues for the periods presented, is as follows:

	Three Months Ended June 30, 2012 vs. 2011 (in thousands)	Six Months Ended June 30, 2012 vs. 2011
Increase in number of agreements executed	\$12,335	\$22,067
(Decrease) increase in average revenue per agreement executed	(1,597	) 26,581
Total	\$10,738	\$48,648

One licensee individually accounted for 72% of revenues recognized during the three months ended June 30, 2012, and four licensees individually accounted for 36%, 24%, 13%, and 12% of revenues recognized during the six months ended June 30, 2012. Three licensees individually accounted for 30%, 28% and 12% of revenues recognized during the three months ended June 30, 2011, and three licensees individually accounted for 45%, 12% and 11% of revenues recognized during the six months ended June 30, 2011. On a consolidated basis, as of June 30, 2012, 125 of our licensing programs had begun generating revenues and other operating income, up from 112 as of December 31, 2011, and 104 as of June 30, 2011.

#### Cost of Revenues

	Three Months Ended June 30,				Six Months Ended June 30,					
	2012	2011	\$	%	2012	2011	\$	%		
	(in thousands, except percentages)									
			Change	Change			Change	Change		
Inventor royalties	\$9,573	\$8,588	\$985	11	%	\$17,167	\$21,677	\$(4,510)	(21)	)%
Contingent legal fees	6,607	13,039	(6,432)	(49)	)%	10,355	22,406	(12,051)	(54)	)%

**Inventor Royalties and Contingent Legal Fees Expense.** The economic terms of the inventor agreements, operating agreements and contingent legal fee arrangements associated with the patent portfolios owned or controlled by our operating subsidiaries, if any, including royalty rates, contingent fee rates and other terms, vary across the patent portfolios owned or controlled by our operating subsidiaries. As such, these costs fluctuate period to period, based on the amount of revenues and other operating income recognized each period, the terms and conditions of agreements executed each period and the mix of specific patent portfolios with varying economic terms and obligations generating revenues each period.

The percentage change in inventor royalties expense for the three and six month periods presented, as compared to the 27% increase in revenues for the same periods, was primarily due to a higher percentage of revenues recognized during the three and six months ended June 30, 2012 having no corresponding inventor royalty obligations, as compared to the revenues recognized during the three and six months ended June 30, 2011, respectively. A summary of the main drivers of the change in inventor royalties expense for the three and six months ended June 30, 2012, as compared to the three and six months ended June 30, 2011, is as follows:

	Three Months Ended June 30, 2012 vs. 2011 (in thousands)	Six Months Ended June 30, 2012 vs. 2011
Increase in inventor royalty rates	\$3,248	\$6,177
Increase in total revenues	2,323	11,530
(Increase) in revenues without inventor royalty obligations	(4,586	) (22,217
Total	\$985	\$(4,510)

The percentage decrease in contingent legal fees expense for the three and six month periods presented, as compared to the 27% increase in revenues for the same periods, was primarily due to a higher percentage of revenues recognized during the three and six months ended June 30, 2012 having no corresponding contingent legal arrangement obligations, as compared to the revenues recognized during the three and six months ended June 30, 2011, respectively. A summary of the main drivers of the change in contingent legal fees expense for the three and six months ended June 30, 2012, as compared to the three and

six months ended June 30, 2011, is as follows:

	Three Months Ended June 30, 2012 vs. 2011 (in thousands)	Six Months Ended June 30, 2012 vs. 2011
(Decrease) in contingent legal fee rates	\$ (3,762)	) \$ (612)
Increase in total revenues	3,545	10,855
(Increase) in revenues without contingent legal fee obligations	(6,215)	) (22,294)
Total	\$ (6,432)	) \$ (12,051)

	Three Months Ended June 30, 2012		Six Months Ended June 30, 2011	
	2012	2011	2012	2011
	(in thousands)			
Litigation and licensing expenses - patents	\$5,268	\$3,761	\$8,649	\$7,295
Amortization of patents	5,393	2,600	10,519	6,372

**Litigation and Licensing Expenses - Patents.** Litigation and licensing expenses-patents include patent-related prosecution and enforcement costs incurred by outside patent attorneys engaged on an hourly basis and the out-of-pocket expenses incurred by law firms engaged on a contingent fee basis. Litigation and licensing expenses-patents also includes licensing and enforcement related third-party patent research, development, consulting, and other costs incurred in connection with the licensing and enforcement of patent portfolios. Litigation and licensing expenses-patents fluctuate from period to period based on patent enforcement and prosecution activity associated with ongoing licensing and enforcement programs and the timing of the commencement of new licensing and enforcement programs in each period.

Litigation and licensing expenses-patents increased for the three and six month periods presented due primarily to higher net levels of litigation support, third-party technical consulting and professional expert expenses associated with our investment in new licensing and enforcement programs commenced since the end of the prior year period. We expect patent-related legal expenses to continue to fluctuate period to period based on the factors summarized above, in connection with upcoming scheduled and/or anticipated trial dates and our current and future patent acquisition, development, licensing and enforcement activities.

**Amortization of Patents.** The increase for the periods presented was due primarily to amortization expense related to new patent portfolios acquired since June 30, 2011, totaling \$4.3 million and \$7.8 million, for the three and six months ended June 30, 2012, respectively, comprised primarily of non-cash patent amortization expense related to the patents acquired in connection with our acquisition of ADAPTIX in the first quarter of 2012, totaling \$3.7 million and \$7.0 million, for the three and six months ended June 30, 2012, respectively. The increase was partially offset by a decrease in accelerated patent amortization related to recoupable up-front patent portfolio acquisition costs that were recovered from related net licensing proceeds during the three and six months ended June 30, 2012, as compared to the three and six months ended June 30, 2011. Accelerated amortization expense related to the recovery of up-front patent acquisition costs totaled \$0 and \$442,000 for the three and six months ended June 30, 2012, respectively, and \$1.1 million and \$3.4 million for the three and six months ended June 30, 2011, respectively.

Operating Expenses (in thousands)

	Three Months Ended June 30, 2012		Six Months Ended June 30, 2011	
	2012	2011	2012	2011
	(in thousands)			
Marketing, general and administrative expenses (including non-cash stock compensation expense of	\$11,903	\$8,302	\$25,634	\$18,287

\$6,000 and \$11,090 for the three and six months ended June 30, 2012, respectively, and \$3,422 and \$6,323 for the three and six months ended June 30, 2011, respectively)

Marketing, General and Administrative Expenses. Marketing, general and administrative expenses include employee compensation and related personnel costs, including non-cash stock compensation expenses, office and facilities costs, legal and accounting professional fees, public relations, marketing, stock administration, gross receipts based state taxes and other corporate costs. A summary of the main drivers of the change in marketing, general and administrative expenses, including the impact of non-cash stock compensation charges, for the periods presented, is as follows:

	Three Months Ended June 30, 2012 vs. 2011 (in thousands)	Six Months Ended June 30, 2012 vs. 2011
Addition of business development, engineering and other personnel costs	\$492	\$1,236
Increase in annual variable performance-based compensation and other variable performance-based compensation costs	438	710
Corporate, general and administrative costs	93	634
Non-cash stock compensation expense	2,578	4,767
Total	\$3,601	\$7,347

#### Income Taxes

	Three Months Ended June 30,		Six Months Ended June 30,		
	2012	2011	2012	2011	
Provision for income taxes (in thousands)	\$3,494	\$306	\$18,241	\$7,454	
Effective tax rate	35	% 14	% 25	% 33	%

Provision for Income Taxes. For financial reporting purposes, tax expense is calculated without the excess tax benefit related to the exercise and vesting of equity-based incentive awards. Under U.S. generally accepted accounting principles, if a deduction reported on a tax return for an equity-based incentive award exceeds the cumulative compensation cost for those instruments recognized for financial reporting purposes, any resulting realized tax benefit that exceeds the previously calculated and recognized compensation expense for those instruments is considered an excess tax benefit, and is recognized as a credit to additional paid-in capital, not taxes payable, as the expense does not reflect cash taxes payable. The deductions related to the exercise and vesting of equity-based incentive awards is available to offset taxable income on our consolidated tax returns.

Tax expense for the three and six months ended June 30, 2012 included the impact of the following:

Noncash tax expense calculated without the excess tax benefit related to the exercise and vesting of equity-based incentive awards, totaling approximately \$3.2 million and \$10.9 million for the three and six months ended June 30 2012, respectively, which was credited to additional paid-in capital, not taxes payable, and other state related taxes.

Foreign withholding taxes, totaling \$28,000 and \$11.9 million for the three and six months ended June 30, 2012, withheld by the applicable foreign tax authority on revenue agreements executed with third party licensees domiciled in certain foreign jurisdictions. The tax provision for the three and six months ended June 30, 2012 provides for the utilization of a substantial portion of the \$11.9 million in foreign taxes withheld during 2012 as a credit against income tax expense calculated for financial statement purposes.

As of December 31, 2011, we maintained a full valuation allowance against our net deferred tax assets. The net deferred tax liability resulting from the acquisition of ADAPTIX created an additional source of income to utilize against the majority of our existing consolidated net deferred tax assets. In addition, we estimated that certain other deferred tax assets related to foreign tax credits and other state related deferreds, totaling approximately \$1.9 million,

were more likely than not realizable in future periods. Accordingly, the valuation allowance on the majority of our net deferred tax assets was released, resulting in a first quarter 2012 financial statement income tax benefit of approximately \$10.2 million. The offsetting amounts reduced net deferred tax liabilities, \$8.3 million of which decreased the net deferred tax liability established in connection with the application of the acquisition method of accounting for the ADAPTIX acquisition.

Tax expense for the three and six months ended June 30, 2011 primarily relates to foreign taxes withheld totaling \$7.6

million and other state taxes.

As of June 30, 2012, taxes paid or payable totaled approximately \$12.4 million, primarily comprised of \$11.9 million of foreign withholding taxes withheld by the applicable foreign tax authority on revenue agreements executed with third party licensees domiciled in certain foreign jurisdictions, and other state related taxes payable.

## Liquidity and Capital Resources

### General

Our primary sources of liquidity are cash, cash equivalents and investments on hand generated from our operating activities and proceeds from recent equity financings. Refer to "Cash Flows from Financing Activities" below for information regarding recent equity financings. We retained broad discretion over the use of the net proceeds from the offerings and intend to use the net proceeds for operations and for other general corporate purposes, including, but not limited to, working capital, strategic acquisitions and other transactions.

Our management believes that our cash and cash equivalent balances, investments, anticipated cash flow from operations, and other external sources of available credit, will be sufficient to meet our cash requirements through at least August 2013 and for the foreseeable future. We may, however, encounter unforeseen difficulties that may deplete our capital resources more rapidly than anticipated, including those set forth under the caption "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2011. Any efforts to seek additional funding could be made through issuances of equity or debt, or other external financing. However, additional funding may not be available on favorable terms, or at all. The capital and credit markets have experienced extreme volatility and disruption since late 2007, and the volatility and impact of the disruption has continued into 2012. At times during this period, the volatility and disruption has reached unprecedented levels. In several cases, the markets have exerted downward pressure on stock prices and credit capacity for certain issuers, and there can be no assurance that the commercial paper markets will be a reliable source of short-term financing for us.

### Cash and Investments

Our consolidated cash and cash equivalents and investments totaled \$430.9 million at June 30, 2012, compared to \$323.3 million at December 31, 2011. The net change in cash and cash equivalents for the periods presented was comprised of the following (in thousands):

	Six Months Ended June 30,	
	2012	2011
Net cash provided by (used in):		
Operating activities	\$63,405	\$25,119
Investing activities	(313,113	) (1,858
Financing activities	231,841	173,639

**Cash Flows from Operating Activities.** Cash receipts from licensees for the six months ended June 30, 2012 increased to \$141.6 million, from \$88.6 million in the comparable 2011 period, primarily reflecting the net increase in revenues for the same periods, as discussed above. Cash outflows from operations for the six months ended June 30, 2012 increased to \$67.4 million, as compared to \$63.5 million in the comparable 2011 period due to the impact of the net increase in licensing, business development, and engineering personnel since June 2011, marketing, general and administrative expenses including variable performance-based compensation costs and foreign withholding taxes, as discussed above, and the timing of payments to inventors, attorneys and other vendors.

Cash Flows from Investing Activities. Net cash used in investing activities for the six months ended June 30, 2012 included cash consideration paid in connection with the acquisition of ADAPTIX, totaling \$150.0 million (net of cash acquired), and patent-related acquisition costs totaling \$40.4 million, as compared to \$1.8 million in patent-related acquisition costs in the comparable 2011 period. Purchases of short term investments totaled \$240.0 million for the six months ended June 30, 2012. Sales and maturities of short term investments totaled \$117.5 million for the six months ended June 30, 2012, as compared to \$35,000 in the comparable 2011 period.

Cash Flows from Financing Activities. Net cash provided by financing activities during the six months ended June 30, 2012 included net proceeds from the sale of our common stock totaling \$219.0 million, proceeds from exercises of stock

options totaling \$88,000, and \$1.9 million in capital contributions from non-controlling interests. Net cash provided by financing activities during the six months ended June 30, 2011 included net proceeds from the sale of our common stock totaling \$175.2 million, proceeds from exercises of stock options totaling \$404,000, \$877,000 in capital contributions from non-controlling interests and \$2.9 million in distributions to noncontrolling interests.

#### Working Capital

Working capital at June 30, 2012 increased to \$404.2 million, compared to \$294.9 million at December 31, 2011. Consolidated accounts receivable from licensees increased to \$10.8 million at June 30, 2012, compared to \$2.9 million at December 31, 2011. Consolidated royalties and contingent legal fees payable decreased to \$19.1 million at June 30, 2012, compared to \$23.5 million at December 31, 2011.

The majority of accounts receivable from licensees at June 30, 2012 were collected or scheduled to be collected in the third quarter of 2012, in accordance with the terms of the related underlying agreements. The majority of royalties and contingent legal fees payable are scheduled to be paid in the third or fourth quarter of 2012, subsequent to receipt by us of the related fee payments from licensees, in accordance with the underlying contractual arrangements.

#### Off-Balance Sheet Arrangements

We have not entered into off-balance sheet financing arrangements, other than operating leases. We have no significant commitments for capital expenditures in 2012. We have no committed lines of credit or other committed funding or long-term debt. The following table lists our known contractual obligations and future cash commitments as of June 30, 2012 (in thousands):

Contractual Obligations	Payments Due by Period (In thousands)				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Operating leases	\$2,846	\$311	\$1,451	\$1,084	—
Scheduled patent acquisition related payments	10,500	10,000	250	250	—
Payments to consultants	—	—	—	—	—
Total contractual obligations	\$13,346	\$10,311	\$1,701	\$1,334	\$—

As of June 30, 2012, the liability for uncertain tax positions, associated primarily with state income taxes, was \$86,000, none of which is expected to be paid within one year. The liability for uncertain tax positions is recorded in other long-term liabilities in our consolidated balance sheets included in this report.

#### Recent Accounting Pronouncements

Refer to Note 9 to the consolidated financial statements included in this report.

### Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The primary objective of our investment activities is to preserve principal while concurrently maximizing the income we receive from our investments without significantly increasing risk. In addition, we sometimes invest in marketable equity securities for strategic purposes related to our patent monetization based businesses. Some of the securities that we invest in may be subject to interest rate risk and/or market risk. This means that a change in prevailing interest rates, with respect to interest rate risk, or a change in the value of the United States equity markets, with respect to

market risk, may cause the principal amount or market value of the investments to fluctuate. For example, if we hold a security that was issued with a fixed interest rate at the then-prevailing rate and the prevailing interest rate later rises, the current value of the principal amount of our investment may decline. To minimize these risks in the future, we intend to maintain our portfolio of cash equivalents and short-term investments in a variety of securities, including commercial paper, money market funds, high-grade corporate bonds, U.S. government and non-government debt securities and certificates of deposit. However, to the extent that our marketable equity securities have strategic value, we typically do not attempt to reduce or eliminate market risk with respect to such securities through hedging activities.

At June 30, 2012, our investments were comprised of AAA rated money market funds that invest in first-tier only

securities, which primarily include domestic commercial paper, securities issued or guaranteed by the U.S. government or its agencies, U.S. bank obligations, fully collateralized repurchase agreements (included in cash and cash equivalents in the accompanying consolidated balance sheets), direct investments in highly liquid, AAA, U.S. government securities, and strategic investments in marketable equity securities (included in short term investments in the accompanying consolidated balance sheet as of June 30, 2012), and certain auction rate securities (included in noncurrent investments in the accompanying consolidated balance sheets).

In general, money market funds are not subject to market risk because the interest paid on such funds fluctuates with the prevailing interest rate. Accordingly, a 100 basis point increase in interest rates or a 10% decline in the value of the United States equity markets would not be expected to have a material impact on the value of such money market funds. Similarly, a 100 basis point increase in interest rates or a 10% decline in the value of the United States equity markets would not be expected to have a direct material impact on the value of our auction rate securities, although auction rate securities may generally be subject to greater market risk than money market funds. Investments in U.S. government fixed income securities are subject to interest rate risk and will decline in value if interest rates increase. However, due to the relatively short duration of our investment portfolio, an immediate 10% change in interest rates would have no material impact on our financial condition, results of operations or cash flows. Declines in interest rates over time will, however, reduce our interest income. Marketable equity securities are subject to increased market risk sensitivity, but are not directly impacted by interest rate risk. To determine reasonably possible decreases in the value of our marketable equity investments, we analyzed the expected market price sensitivity of our marketable equity investment portfolio. Assuming a loss of 10% in the value of the United States equity markets, the aggregate value of our marketable equity investments could decrease by approximately 14%.

#### Item 4. CONTROLS AND PROCEDURES

##### Evaluation of Disclosure Controls and Procedures.

Our management, with the participation and under the supervision of our chief executive officer and chief financial officer, has evaluated the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended, or the Exchange Act) as of the end of the period covered by this quarterly report. Based on that evaluation, our chief executive officer and our chief financial officer have concluded that our disclosure controls and procedures were effective as of the end of the period covered by this quarterly report to ensure that the information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding required disclosure, and that such information is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

##### Changes in Internal Control Over Financial Reporting.

There were no changes in our internal control over financial reporting that occurred during our last fiscal quarter (the quarter ended June 30, 2012) that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
